Advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, social and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

The Grain Marketing Company

MEMBERS of the Farm Bureau no doubt have been well informed as to the announced dissolution of the Grain Marketing Company by July 28. The public press has thrown the news to the four winds, and unfortunately for true co-operative marketing, the whole attempt and failure has been hooked up as "a failure of a farmers' co-operative."

Farmers who have followed the developments will remember that when the world was first informed of the organization of the Grain Marketing Company, the Illinois Agricultural Association adopted an attitude of open-mindedness and so informed the members and the public through the RECORD and statements in press.

In order to advise the members, an investigation was started which resulted in a vigorous disapproval by the I. A. A. Chief among the factors contributing to the disapproval was the fact that, although officials of the Grain Marketing Company had promised the I. A. A. access to independent auditors' reports on the amount and kind of business done by each of the four merged companies for each of the past five years, no such records were forthcoming, and were never made available. A careful survey of the vendor companies' books would have given the I. A. A. the facts which any banker would demand before giving advice to his clients or lending his financial support to any proposition.

This led to a formal resolution of warning passed by the I. A. A. executive committee on Jan. 9, 1925. It stated in part "that we disapprove the grain marketing plan of the Grain Marketing Company and advise the members of this association against purchasing stock of the company either as an investment or for the purpose of supporting the company's program of marketing grain." The whole history, as far as the I. A. A. is concerned, can be reviewed quickly by following in 1, 2, 3 order the above reproduction of headlines of stories which have appeared about the merger in the RECORD.

S. H. Thompson, President,
Illinois Agricultural Association,
Quincy, Illinois.

Dear Mr. Thompson:

I am writing to express my congratulations and my heart-felt satisfaction that you, as president of the Illinois Agricultural Association and an Illinois man, had the foresight and the courage to stand out against the grain marketing scheme that took over a large number of another's holdings.

You have done agriculture and your (our) great State a great service and after the cream passes that the concentration of mere agricultural politics will be rebuilt upon and around such wise men as yourself who refuse to be commanded.

Faithfully yours,
E. Davenport.

Depends on How You Read It

"THIS is the first time in the history of the state farm bureau that the record has been made available to farm bureau members," stated a news story released by the I. A. A. information department not long ago.

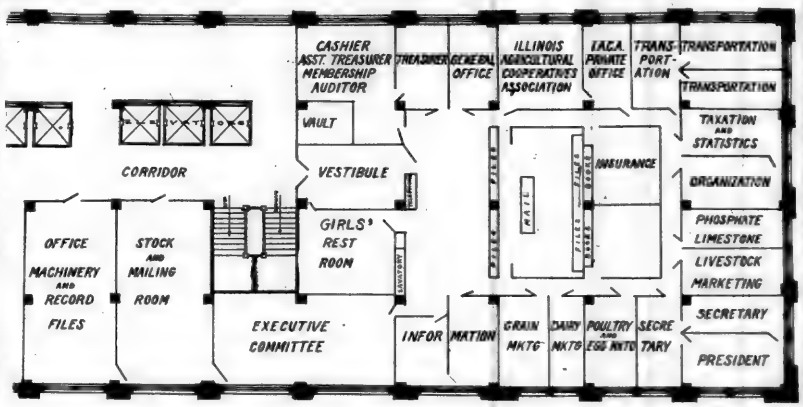
Maybe it was like the Dutchman—should be taken for what it means and not so much for what it may be interpreted as saying. It was written to mean that this was the first time in the history of the state farm bureau that the organization itself had made the legislators' record available to farm bureau members. And this is true.

Prairie Farmer published the records of the 1919, 1921 and 1923 legislatures and in doing so performed a real, constructive service to Illinois farmers. But this is the first time the record has been published by the farmers themselves, thus applying it to their own legislative program.

JOHN THINKER AND EPIDERMIS FLINT. (John's a Loyal Farm Bureau Member. Epidermis Is "Agin" It!) Ep Changes His Mind

Maybe This Ramble Will Help You Picture Your State Office Better

By Harry C. Butcher, Editor



WHEN you think of the "I. A. A.," how do you picture it in your mind?

The average farm bureau member's conception of the I. A. A. cannot help but be hazy because so few of the 63,000 members ever get into the office at Chicago to see what is actually going on. Farmers are always welcome. It is surprising to know the number that visit the office in a year, but this number after all is very small when compared with the total membership.

It was to acquaint members with the actual situation that I started out one morning not long ago to conduct and introduce an imaginary farm bureau member to each one in the office, regardless of whether he or she is a director, secretary, mailing clerk, telephone girl or file clerk, or what he or she was doing at the particular moment my mythical visitor and I happened to call.

Follow on the Plat

As a guide to my round of visits I have a plat of the floor plan of the office showing how the office proper is divided into the several compartments. If you glance at the plat reproduced herewith, note the outer row of offices beginning with the cashier's office and running around the edge in the direction of the transportation department, thence, to the secretary's office and back toward the executive committee room. Offices on the outside are separated from each other by plaster walls about three feet high, then with painted glass to a height of about five feet and from there to the ceiling is plain window glass paneled in soft wood stained in a dark mahogany color. The central partition marked "Files," "Mail" and "Insurance" is set off by a waist-high railing, so for the most part the office proper is quite open and not as congested as the plat appears.

You (speaking to the reader as if you were the invisible guest)—you come along with me and we will make a round of the various departments and see what is going on. This is a Monday morning about 9 o'clock so we'll find out if they're on the job.

We Enter

Let's go in the vestibule just like a stranger, past the rack that holds all kinds of farm papers, past the "mourner's bench" and up to the desk where the telephone girl is seated who serves as sentry halting all whom she does not know.

"Good morning, Miss Jennings, I'm conducting an imaginary farm bureau member around the office showing him what every individual who is employed in this office by the farmers is actually doing this early Monday morning. What are you doing?"

"Well, I am stamping these RECORDS that go to Chicago addresses. You know, we have to place a one cent stamp on each RECORD that goes in Chicago—."

At the Telephone Desk

She was interrupted by a buzz at the switchboard, indicating that some person in the office wanted to get connected with the outside world. Before she had taken the number wanted and put in her call there came another buzz and another light from the outside which apparently completed a connection she had been trying to make. She answered it.

"International Harvester Company? Is this the secretary to Mr. Legge—to Mr. Alexander Legge, the president? Just a minute, please, Mr. Davis is calling."

But here we left her and turned the corner into the office labeled "Cashier, Assistant Treasurer and Membership Auditor." At the first desk inside the door and just beyond the railing that keeps strangers outside, sat Helen Kummerow, who, when she started with the I. A. A. in 1920, signed her name as Helen Jensen. She's a Chicago girl. I found her busy at her desk working on her books where she had just sat down, having just completed distributing the first mail of the morning, a regular duty of Mrs. Doris King, who holds forth at the mail desk situated in the central part of the larger office and who happened to be taking her vacation.

We Visit Mr. Evans

Crashing the gate, so to speak, I guided my imaginary visitor over to the desk in the corner where L. A. Evans, membership auditor, watches your membership dues through the County Farm Bureaus and very kindly sees that they do not lapse, a service for which you have no doubt thanked (?) him many times.

"I'm just finishing checking membership records of Tazewell county and I have entered it in the books. I find that Tazewell county has collected and remitted 87 per cent of dues payable in June, which is a good percentage."

The desk of Miss Lily Sederholm, the assistant treasurer, who for a year has been Mrs. Peterson, but still uses her maiden name officially to avoid confusion, we found vacant and Mr. Evans said that she, too, was enjoying her annual vacation. Miss Sederholm has been with the I. A. A. since 1920. She serves as notary public in addition to her duties of helping keep a careful check on where the money comes and goes.

In the next office, which is marked "Treasurer" in the plat, sat R. A. Cowles, the treasurer, who is better known as "Bob." At that minute he was checking the budget preparatory to showing the directors, who were scheduled to hold a regular monthly office conference that afternoon, if they had exceeded their budgets. On Mr. Cowles' desk I saw envelopes on business pertaining to the Illinois Farm Relief Committee, of which he is chairman and is devoting considerable time. "I am going down in southern Illinois again this week," he said.

Next door in the office labeled "General Office," Edythe Lindquist, who has been with the I. A. A. since May, 1924 and whose home is Cornell in Livingston county, sat merrily pecking her typewriter.

Copying Reinsurance Contract

"I'm copying an application for a specific reinsurance contract," she said, reading from the copy. "This is for the new reinsurance company, you know."

"Where is Mr. Kelker?" I asked.

"He's gone out on an insurance matter and is also taking $100 to the post office to deposit for postage on the RECORD." Mr. Kelker's duties are to manage the general office, hire help and supervise employment. On his desk I saw several bills for the various departments which must come to him for o. k. as to details before they go to Secretary Fox to receive his o. k. In addition the finance committee gets the bills later so they are scrutinized several times very carefully. The salesmen who sell Mr. Kelker office supplies have named the seat where they wait in vestibule "mourners' bench."

Miss Vega Mekota sat before a great wide typewriter in the I. A. C. A. office, copying a report one of the auditors had completed on the Buckley Farmers' Grain Company of Iroquois county. Miss Mekota started with the I. A. A. when the I. A. C. A. was organized, and is a native Iowan, hailing from Cedar Rapids. She worked for the I. A. A. once before, from 1920 to 1922.

George R. Wicker, manager of the I. A. C. A. and by virtue of that office also director of the auditing department of the I. A. A., which are really one and the same, said he was preparing a paper on hedging and its relation to stored grain. At the moment he was going over an audit of the Buckley Farmers' Grain Company in order to check up on any possible inaccuracy and to give the audit his final o. k. before sending it on to the elevator. Other audits awaiting his o. k. included one for the Carthage Live Stock Shipping Association in Hancock county and the Springfield Dairy Producers' Association. His secretary's desk was vacant and the typewriter covered. He said she, Miss Hilma Johnson, was on her vacation. She has also been with the I. A. A. since the organization of the I. A. C. A. a year ago, and lives at Batavia.

"You see only a very small portion of the department," Mr. Wicker said. "The assistant manager, F. E. Ringham, is down at Flora today where he is doing some work for the Egyptian Fruit Growers Exchange."

Most of Department in Field

Mr. Ringham came to Illinois from Minnesota with Mr. Wicker. He was on the faculty of the University of Minnesota where he taught accounting, and also had considerable experience in auditing co-operatives in Minnesota in the state department of auditing, which was under the direction of Mr. Wicker.

"Our examiners," Mr. Wicker continued, "are in several places over the state. They do not get in the office very often since it is cheaper to have them travel from points where they work rather than back and forth from Chicago. C. H. Chilson, one of our examiners, is another Minnesotan. Today he is auditing the Milledgeville Farmers' Grain Company in Carroll county. A. J. Preszler, another of our examiners, is in Kankakee county auditing the Farmers' Grain Company at Grant Park. Joseph W. King has two jobs today—both auditing. One is the Dietrich Shipping Association in Effingham county and the other is the Effingham Equity Co-operative Exchange, a store."

In the Transportation Department

Miss Anna Townsley, clerk in the transportation department, who has been in I. A. A. employee for four years, was busy checking up on an Illinois Central claim for the Farmers' Shipping Association of E. Dubuque, Illinois. Two calves had been lost in transit and the railroad had sent a check for $28, which was the amount asked for by L. J. Quasey, the director of transportation, who sat studiously before a mimeographed packet of sheets in the corner room.

"What are you doing, Lee?"

"I'm checking a docket of the Illinois Commerce Commission."

"That's a regular chore for you, isn't it?"

Quasey Checking I. C. C. Docket

"Yes, we keep a watch on the cases that come up before the Illinois Commerce Commission because sometimes we find big companies are asking an increase in rates that would be unfair to farmers. We wouldn't be much good to the farmers if we didn't have our eyes open. In this docket I see that the railroads are suspending train service in some instances because of bus competition."

"What will you do in a case of that kind?"

"First, as in any case, we will investigate to determine the facts. We want farmers to have the service."

Finds Something Interesting

Swiftly running his pen down the list he came to one which he checked and paused.

"Aha! I see the Illinois Bell Telephone Company asked for an increase in phone rates. This is something we will be interested in."

"How do you tell when a proposed increase is justified?"

"Well, each case must be proven. We stand like a stubborn mule until we have to come across and where the facts are not proven by the petitioning companies we are usually successful."

Clara Jacox, the secretary in this department had not yet returned from a trip to Michigan for the 4th of July. She has been with the I. A. A. since 1920.

The next partition of the transportation office is the one where G. W. Baxter, assistant director, is usually found, but Miss Townsley said he had gone out to the Chicago Producers to make some necessary arrangements by which the transportation department will take over all the claim work of the Chicago Producers. He was investigating losses which had come to the transportation department from several states.

Mr. Watson Dictating

My visitor and I paused at the door of the taxation and statistics department because John C. Watson was deeply engaged in dictating a letter to Miss Josephine Tobin. (She said: "Print it as 'Jo.'") He wound up the letter with a "Yours very truly" and in response to my inquiry said he had just finished a letter to F. E. Longmire, farm adviser of the Grundy County Farm Bureau, about the analysis Mr. Watson had made of the relative valuations of property in Grundy county. If we had stayed longer we would probably have found a great deal more which farmers would have been interested in, for who isn't interested in getting taxes reduced? And that is Mr. Watson's largest job. Under present conditions he finds that in most cases farm taxes would be reduced if there were more equality in the whole system, so his job is a big one indeed.

Miss Tobin has been an I. A. A. employee since April, 1924.

In the Organization Department

Miss Edith Colvin, secretary in the organization department, was trying to make E. E. Walworth, farm adviser of Macon county, at Decatur, understand what she was saying over long distance telephone, and from appearances I judge Mr. Walworth was trying to do the same.

"I've got to call Quincy to see if Mr. Thompson can possibly take a date in Macon county on July 11, but I know that's the day Secretary Jardine is to be in Chicago and Mr. Thompson has an appointment with him so I'm afraid it will be impossible. If he can't go I will have to get someone else. That's one of the biggest jobs we have—getting speakers at meetings. There's always one or two farmers meetings in session every day over the state and to provide speakers sometimes gets to be a real problem.

"Yes, Mr. Metzger is out on the road where he spends most of his time. Here's a letter from Sidney S. Carney, farm adviser of the Rock Island County Farm Bureau asking him to come there July 11, but I know he can't do that because he has another engagement, and here's one from Saline county where J. E. Whitchurch, farm adviser, says that Mr. Gates, vice-president of the Farm Bureau, says a meeting for July 16 at Harrisburg would be o. k."

"And are all those other letters on your desk concerning dates?"

"Yes."

"Well, it looks like Mr. Metzger will be a busy man if he takes care of all of them."

Bent Was a Busy Man

In the phosphate-limestone department, J. R. Bent was busy at his desk but stopped to meet our imaginary farm bureau member.

"I'm planning to meet Dr. Bauer of the University at St. Louis tomorrow," he said. "Then we are going into Missouri to inspect some lead mines to see if we can use their available by-product, which is dolomitic limestone, to help relieve a possible shortage of limestone in southern Illinois. I also have a letter from the Missouri Farm Bureau Federation wanting to know how the I. A. A. has handled its pooling of phosphate orders. They say they are planning to undertake the same service. Today I am getting out a circular to our Farm Bureaus telling the policies of the limestone companies that co-operate with us and what prices the companies are getting. In addition, I am also getting out a circular to the Farm Bureaus which will be affected by certain changes in limestone freight rates along the Wabash. I can give you a half dozen more things if you want them."

"No, that's enough. We just wanted a peep into your affairs to see what you are doing at this particular moment."

Miss Elizabeth Watts, the secretary, better known as Betty, and who has been an employee of the I. A. A. since 1923, was cutting a stencil for one of the circulars and attending to department correspondence.

Live Stock Marketing Active

Miss Willa Nelson, secretary in the live stock marketing department, was making some changes in names of officers on a list of over 500 Illinois live stock associations when I steered my mythical visitor into his compartment. Miss Nelson has been with the I. A. A. only since April. Previous to that time she was employed at the Washington office of the A. F. B. F., and before that she was in secretarial work in Iowa State College in the office of the well known John M. Evvard, hog specialist.

The desk of Wm. E. Hedgcock, called "Bill" for short, was vacant, and upon inquiring I found that he had gone to the Chicago branch of the National Wool Exchange looking after shipments of wool from Illinois farmers in the Illinois wool pool. From the looks of the morning mail which was stacked neatly on his desk, I judge that live stock marketing business is much alive.

Miss Schecter Here Long Time

Now to the compartment devoted to the secretary and president. Stopping at the desk of Miss Grace Schecter, who serves as guard to the inner portal, she answered the inquiry saying that she was writing up the minutes of the last executive committee meeting. "Besides, I have several requests here that have just come for slum addition. That's the nicest work I do. I get a lot of pleasure out of being outing secretary, because it really is an inspiration to help these needy children get into the country. Then here is a stack of letters that Mr. Fox hasn't seen because he is still busy on those which came in the first mail. Mr. Fox writes a lot of letters in answer to correspondence to the association, and I have several on my book already and it's only 10 o'clock."

Miss Schecter has been with the I. A. A. longer than any of the other secretaries. She started in January, 1920.

It is not difficult to get in to see Mr. Fox, that is, if you have business on your mind. He sat quietly behind his desk, reading and very evidently weighing the contents of a letter which he held in his hand. In front of him on the desk were two piles of letters, evidently divided into one class that he had not yet considered and another class that he had read.

Mr. Fox Says "Welcome"

When I introduced my invisible visitor, Mr. Fox said that I should be sure and make it known to the

(Continued on page 4, col. 4.)

EVERY FRIDAY NOON AN I.A.A. MARKETING DIRECTOR ON WLS

Each Talk to Deal With Marketing Problems Met by the 5 Directors; Gougler Started Series

Illinois farm bureau members who have radios and who are within the radius reached effectively by WLS will be interested in an arrangement whereby one of the five marketing directors of the I. A. A. will give a 10-minute talk on the commodity in which he is interested every Friday about 12:30, standard time.

First on this schedule was Frank A. Gougler, director of poultry and egg marketing on July 10. Mr. Gougler spoke first of the purpose of the talks, saying that folks who are acquainted with the market-ing work of the I. A. A. have told him that the five marketing departments fill a place not occupied by any other agency.

Directors Not Statisticians

"That is," Mr. Gougler said, "we are not agricultural statisticians, although we deal in some statistics, dry as they are, neither are we called salesmen nor buyers of farmers' products. We are in service to help farmers sell their own product to the best possible advantage. It is of this phase that we will be speaking."

Mr. Gougler stated that poultry production is increasing more rapidly than population, in fact 200 per cent since 1880. During this period, hogs, cattle and sheep have increased but slightly the nation over. The reason for the increased poultry population is because consumers are eating more poultry and poultry products in proportion to beef, pork and mutton. This is caused, he says, because a dollar will purchase more food when invested in poultry and eggs than for the meats. Farmers themselves are heavy consumers of poultry products, a recent survey showing 28.8 dozen eggs eaten each year by each farm person.

Here's the Schedule

The following speakers are scheduled to appear on this series in the near future: July 17, A. B. Leeper, director of fruit and vegetable marketing; July 24, Wm. E. Hedgcock, director of live stock marketing; July 31, Chester C. Davis, director of grain marketing; and August 7, A. D. Lynch, director of dairy marketing. The speakers will then continue with the series in the same rotation throughout the remainder of 1925.

MIDWEST GROUP URGES OPPOSING RATE RAISE

(Continued from page 1.)

cluding farm products and because of the economic condition confronting agriculture in this territory we believe it unjust and unnecessary for agriculture to assume this added burden to its industry.

"Therefore, be it resolved that the presidents and secretaries of the Midwest Group, in session this 11th day of July, 1925, most urgently request that the American Farm Bureau Federation put forth every effort to combat the action of the railroads in their effort to increase freight rates in the western district on agricultural products and that the individual states of the American Farm Bureau Federation be urgently requested to bring to the attention of their members the effect of the proposed increase in agricultural products will have on the industry of farming in the states affected.

Urge Wide Publicity

"In view of the fact that the western railroads are primarily granger lines and depend upon agriculture for a large portion of their earnings, any increase in freight rates will affect agriculture more than any other industry.

"We urgently request that this matter be given the widest possible publicity, that the attention of all farm commodity organizations and individual membership of the Farm Bureau be thoroughly advised of this threatened attack upon the earning capacity of the farmer and that through their organizations and individuality they bring to the attention of their respective state Farm Bureaus the necessity of definite and persistent action to resist this attack."

"Maintaining a strong farm bureau membership and collection of farm bureau dues" was the topic of an interesting address by Geo. A. Fox, secretary of the Illinois Agricultural Association. C. E. Hearst, president of the Iowa Federation, told briefly of the value of the farm bureau day at the state fair."

Clay County Offers 18-Piece Farm Bureau Band for State Picnic

W. E. Hart, farm adviser of the Clay County Farm Bureau has offered the services of a farm bureau band of 18 pieces for the state picnic at Taylorville, August 27.

"One of our communities has developed a splendid farmers' band of 18 pieces," he says. "They are 100 per cent from farm bureau families. The leader is a former secretary of the Farm Bureau."

27 of 500 Thousand in Individual Policies Raised; Need Volunteers

Will Illinois have a state-wide reinsurance company? Indiana farmers have been running one for eight years, and Iowa farmers for 15.

The answer to the question rests solely upon the success of the new company in securing volunteer individual policies to the extent of at least $500,000. The only law under which a fire and lightning company can operate over the entire state requires that $500,000 in individual policies must be held by the company before it can receive its charter. To overcome this situation, the officers of the newly organized Farmers' Mutual Reinsurance Company are appealing direct to farmers who will volunteer to take out individual policies.

These Have Volunteered

So far, definite subscriptions, applications or inquiries amounting to $27,000 of the $500,000 have been received. These are as follows: James Gibbons, $2,000; Oscar Arnold, $4,000; C. R. Finley, $1,000, Hoopeston, Vermilion county; J. C. Jones, Ridge Farm, Vermilion, $4,000; Geo. A. Fox, Sycamore, DeKalb, $1,000; V. Vaniman, Urbana, Champaign, $2,000; J. Z. Smith, Rockford, Winnebago, $2,000; W. A. Lackey, Pulaski, Pulaski, $1,000; E. E. Slusser, Martinsville, Clark, $1,000 to $3,000; Walter J. Essington, Kempton, Ford, $4,000; Wm. L. Waters, Godfrey, Madison, $1,000 and Norman G. Flagg, Moro, Madison, $2,000.

Mr. Flagg, in his letter says:

"Until the July 4th issue of the I. A. A. RECORD came to me, I had heard little of the progress of the newly formed state mutual reinsurance company, and I enclose signed slip, as suggested, toward boosting the matter [illegible]. Send me information, rules, application, form of policy, etc., which may have been adopted to govern our state mutual, so that I may spread the word around this county as to what this company offers to do for the larger risks. . . I think the Farm Bureau here will be glad to help in every way possible to make the new company a success without infringing at all upon business of the local companies as conducted at present. Command me for any service you may require hereabouts."

If you are interested, Vernon Vaniman, field representative, asks that you will fill out the attached coupon, mail it in, and complete information will be sent you.

I am interested in the Farmers' Mutual Reinsurance Company of Illinois and in order to help it get its charter, I could use about $..... of fire and lightning insurance on my property. Send complete information.

EXPLAINS HIS VOTE

FIFTY-FOURTH GENERAL ASSEMBLY
STATE OF ILLINOIS
HOUSE OF REPRESENTATIVES
JOHN TROTTER
20TH SENATORIAL DISTRICT
COAL CITY, ILLINOIS

July 9, 1925.

Editor,
Illinois Agricultural Association RECORD,
608 South Dearborn St.,
Chicago, Ill.
Dear Sir:

I see by your issue of July 4th, that you have not quoted me as voting on the Tice bill No. 176. The reason I did not vote on it, was that I was out of the Legislature for five weeks on account of severe illness. I worked for the bill for all I was worth, while there, but was not present at the roll call.

Yours respectfully,
(Signed) John Trotter.

MANY LETTERS FROM FARM FOLKS OFFERING OUTINGS TO KIDDIES

There's Pleasure in Taking Children, But There's Also Sadness in the Parting, Says One From Mr. and Mrs. Sullivan

"Outing Secretary—

I read an article from the I. A. A. in the Freeport Journal-Standard soliciting for offering two weeks' outing for the under-privileged children of Chicago. I will gladly take two or three and I would like to have them age from five to eight years. I think there is pleasure in taking these children. But there is also sadness with it, as I had two for two weeks last year and when it came time for them to go back neither one wanted to go and I tell you it made me sad to see them go.

"Mr. and Mrs. B. F. Sullivan,
Freeport, Ill."

This is one of the many letters that have been received by the Outing Secretary from generous Illinois farm folks who are anxious to share their country privileges for a little while with one or more poor youngsters from the slums of Chicago.

The record-breaking heat of the past few weeks has been felt most keenly in the over-crowded tenement districts. Imagine, then, the delight and relief that each letter offering a vacation in the country has brought to some heat-ridden child whose only playground is the scorching pavement and whose only retreat from the glare of the sun is a sweltering tenement room.

Many Have Written In

The following people have "had a heart" and offered to take one or more children for a two weeks' vacation:

John E. Frazier, Ursa (3); Miss Louise Jackson, Bradford, (2); H. D. Tucker, Marshall, (1); Mrs. Joe Pegsant, Sandford, Ind., (2); Charles K. Carey, Vermont, (1); Mrs. D. H. Wilson, Cuba, (1); Mrs. Earl McShane, Kinsman, (1); Mrs. B. Heap, Media, (1); Mrs. Jno. Howes, Warsaw, (3); R. W. Grivy, Lostant, (2); G. H. Jacobs, St. Francisville, (3); Mrs. O. E. Witt, Hetlick, (1); Miss Golda Byram, Calhoun, (Will make up party); Mrs. Rathburn, E. Moline, (1); Mrs. Arthur Lincoln, Dakota, (1); Mrs. B. F. Sullivan, Freeport, (3); Mrs. Hans Heit, Arthur, (2); Mrs. Nora H. Clair, Clifton, (1); Mr. Joe Schwarzwalder, Forest, (2); Mrs. Jesse Perdue, Browning, (2); Mrs. P. W. Moore, Bushnell, (3); Mrs. Julia Walton, Carthage, (2).

Anyone living within a 200-mile radius of Chicago who is interested in securing a "fresh air" child this summer, may do so by writing to the Outing Secretary, care of the I. A. A., who works with the United Charities of Chicago in furnishing the children.

HOME BUREAU GETTING UNDER WAY IN FULTON

An "Officers' Training School" for the newly elected officers featured the meeting of the advisory board of the newly organized Fulton County Home Bureau July 2 at Canton. Every unit of the county bureau was represented at the meeting.

Mrs. Spencer Ewing, president of the Illinois Home Bureau Federation, addressed the meeting, emphasizing the advantages of the Home Bureau to the individual woman and to the county. The members decided on the course of study for the year.

Mrs. Jeptha Randolph, county president, presided. Bernice Kirkwood, a home economics graduate of Iowa State College, has been secured as home adviser for Fulton county.

THIS WILL HELP YOU PICTURE I.A.A. OFFICE

(Continued from page 3.)

members that this is their association and that the officers are always glad to have members drop in for a visit when they come to Chicago.

The president's office where S. H. Thompson headquarters while in the city, was vacant, Mr. Thompson being in Quincy. Daily letters keep him in contact.

F. A. Gougler, alias "Frank," director of poultry and egg marketing, was planning a group of district conferences with farm advisers on marketing poultry and eggs, the purpose of which will be to mutually map out a program so all farm advisers in each district will be working toward a common goal. Mr. Gougler is a part time man with the I. A. A., staying half time at the University where he is taking his doctor's degree in poultry husbandry.

"Bert" Leeper on Deck

A. B. Leeper, director of fruit and vegetable marketing, was also at a desk in this compartment. He came up from Centralia, where he is manager of the Illinois Fruit Growers Exchange, for the regular monthly directors' conference. He was getting some claims in shape to show Donald Kirkpatrick, legal counsel, and the transportation department. There was no secretary in this office since the secretarial duties of this and the grain marketing departments are combined.

A. D. Lynch sat at his desk in the dairy marketing department somewhat disguised behind smoked glasses. He was dictating to Mrs. Evaline Wiles, who has been with the I. A. A. since June, 1923.

"What's the need for the smoked glasses?" I asked. "Did a firecracker hit you on the Fourth?"

"No, this is the result of riding five consecutive nights on sleepers, which gave me a summer cold. It has settled in my eyes." He was dictating a radio speech which was to be given at noon over WLS.

Davis Pecks a Typewriter

Approaching the grain marketing department's area, I found Chester C. Davis diligently pecking at a typewriter. You'd be surprised at how well he runs one, for he got his training as a newspaper man and as editor of the Montana Farmer. He hasn't forgotten the art. For things which he wishes to express carefully he uses the typewriter. His typing at that moment concerned some facts he was assembling on the actual number of bushels of soft wheat that are sold from each of several southern Illinois counties. Miss Germaine Smith, secretary to the grain and poultry and egg marketing departments, and also for Vernon Vaniman, field representative of the new reinsurance association, was tending to correspondence for Mr. Davis. Miss Smith has been with the I. A. A. since November, 1924.

—"Rode the 600"—

Clippings to the front of her, clippings to the right of her, clippings to the left of her, and straight into the throes of filing them, sat Mrs. Mary Zirkle, secretary in the information department. Mrs. Zirkle was managing editor of "Point of View," a travel magazine published in Kansas City before coming to the I. A. A. in February, 1924. The clippings were those returned by a clipping bureau from papers all over Illinois and surrounding states. Every time the world says something about the I. A. A., this bureau sends in the clipping, which is duly recorded and filed.

SEVERAL ILLINOIS COUNTIES ARE CLOS TO BEING ACCREDI

Jasper County, Iowa, Has R its Hog Earnings About $ 000 by Becoming Accre

Hog raisers in several Il counties who ship to the Ch market are upon the thresho receiving the coveted 10 cent hundred premium for their por according to Dr. J. J. Lintne spector in charge of tuberc eradication for Illinois.

The premium becomes ava whenever a county becomes nated as a "modified accre area," which means a county tically free from tuberculosis designated as such by the fe and state governments.

The first hogs from such an to be sold on the Chicago m came from Edgar county, Ill over a year ago. The 10 premium amounted to $17 on carload. It was owned by F Trogden of Vermilion. This i only county accredited in Il so far, but others are close.

Iowa Ahead of Us

Lately Iowa counties have come accredited. The latest to the premium in Iowa was H county. Four loads of hogs es the premium, which amounte approximately $60. All other marketed at Chicago from this other accredited counties wil ceive the bonus, the packers

According to Dr. Lintner's ures, Jasper county, Iowa, ha ceived $14,000 in 10-cent pre money up to three months ago has not had a report since but it is estimated in the I. A office that farmers in this one county have received approxir ly $25,000 since the county been accredited. Six Iowa cou are accredited.

No one was at the assist desk, since Gerald Jenny, former assistant, returned a m ago to the University of Wisc to finish his master's degree new assistant is coming the of August, James B. White, a versity of Illinois graduate an two years in charge of info tional work for the Kentucky F ers Union.

In the Stock Room

Walking through the well nished executive committee into the stock and marketing r my visitor saw Frank Schreiber Casmir Bohanek, mailing room lists, assembling mimeographed terial to go out to the county F Bureaus. Both Frank and "Whi are basketball and baseball pla It is understood they play a w of a game in their church le

The merry click, click, of dressing machinery caught our as we entered the room contai the office machinery and R files. Miss Nora Mueller has ch of this branch and has been a I. A. A. employee since earl 1923. She is assisted by L Campbell, who has been dra I. A. A. pay checks since Septen 1924. Two outside girls were assisting in the mailing of RECORD.

Paper Late This Time

"Usually," said Miss Mue "We have the RECORD out by Sa day noon, but the 4th of July c this time so we are a little late

Ann Poister, multigraph oper was absent since she, too, was ing her vacation. She's a mer of the 1920 class, too.

Back into the general office, found another mail had come which Helen Kummerow was sorting into regular post office partments. She was taking place of Doris King, the reg mail and filing clerk who was on her vacation. She has been the I. A. A. since 1923. No was in the section devoted to surance, for Vernon Vaniman, field representative, was in country on business, pertaining the new reinsurance company.

Then I showed my visitor thro the vestibule into the corri pushed the "down" button for elevator so he could ride down 12 stories to the street level, bade him goodby and come ag

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Volume 3 | Issued Every Other Saturday for 63,000 *thinking* Farmers. August 1, 1925. | No. 15

OVER 100 PER CENT MORE CLAIM MONEY GARNERED THIS YEAR

Getting Money For Bad Claims Is Conspicuous, But Biggest Service Is Watching Rates

GOT any bad claims you'd like to get settled? If you haven't, you're lucky, for lots of people have them. Many of them who have had claims settled through the Illinois Agricultural Association's transportation department say they're not so bad after all when there's somebody on the job who knows how to get the money.

L. J. Quasey

Proof that the I. A. A. has been "bringing home the bacon" in its claim collection service as rendered by the transportation department is shown in figures presented herewith indicating claims collected during the six months from Dec. 1, 1924, to July 1, 1925. During this period, a total of $10,765.14 was collected. This is over 100 per cent more than was collected during the same period a year ago, and last year's claim collections were the greatest up to that time.

More People Getting Service

"This increase does not indicate more errors or more losses on the part of the railroads or shippers," says L. J. Quasey, director of the department. "The reason for the increase is that our members are taking more advantage of this particular service of the Illinois Agricultural Association. Farm bureau members are becoming more accustomed to the transportation service we can render and we feel that this service is materially increased from year to year."

"Lee" didn't mention that this is one of the lesser services of his department. Being on the job to protest against increases in freight rates and to be inquisitive about new schedules of rates when they are issued is one of the most important services rendered by the whole association, but it's rather intangible and not as easy to see as the collection of claims.

Look over this list and see how your county is faring:

	Number of Collected Claims	Total Collected Amount
11th District

(Continued on page 3, col. 4.)

I. A. A. REPORT SHOWS STATE'S DAIRY INCOME $165 A MINUTE IN 1924

Total Dairy Income Was $84,000,000; Co-operatives Handled 21.4 Per Cent, Increasing Return $6 to $15 Per Cow

"The dairymen of Illinois took in $165 each minute during 1924," finds A. D. Lynch, dairy marketing director, in a report of dairy statistics recently completed in his department.

"The farm value of Illinois dairy products last year was $84,000,000," he reports. "Farmer-owned dairy associations marketed 21.4 per cent of this amount in the form of fluid milk, butter fat and cheese. So the co-operative dairy business in Illinois had an $18,000,000 turnover.

"The dairy farmers marketed co-operatively 26.5 per cent of the fluid milk and cream; 13 per cent of the butter fat; and 75 per cent of the cheese made in Illinois.

"There are over 150 farmer-controlled dairy marketing associations in Illinois. Some of those do not market in a commercial fashion, but serve as collective bargaining institutions and deal with existing private owned companies. The dairymen are not anxious to invest money in plants and facilities if present business concerns are able to render the service. Among the bargaining associations are 6 which sell butter fat and 15 which merchandise fluid milk. The state has 9 co-operative creameries, 4 retail milk plants, 1 co-operative centralizer and over 100 local cheese factories.

"The Farm Bureaus with the help of the I. A. A. assist dairymen in studying their marketing problems and to find the right solution. New dairy associations are being formed constantly and sales thru co-operative organizations should increase in 1925 approximately 10% over 1924. Farmers have found their co-operative marketing efforts worth while because the return per cow is increased from $6 to $15 per year."

POSTAL ECONOMY IS DEMANDED BY A.F.B.F. TO KEEP RATES DOWN

Farm Bureau's Washington Representative Says Postal Service Needs Application of Administration's Economy Program

Spokesmen for the farmers of America demanded on July 22, in statements to a Congressional investigating committee, that the postal service be put on a solid financial basis by economy rather than by the imposition of additional burdens upon the farmer, such as the rate increases voted at the last session and others under consideration.

E. B. Reid, acting Washington representative of the American Farm Bureau Federation, declared it ridiculous to "fight and snarl over a penny or half penny increase in rates" when application of the President's economy program would relieve the situation. He advocated pruning of personnel and operating expenses in all post offices, charging to the respective government department the $7,000,000 it costs every year to handle franked mail, reorganization of the rural delivery service, and reduction of mail deliveries in the residential sections of cities.

NATION'S FARM BUREAUS MOBILIZING FOR FIGHT AGAINST 11 PER CENT FREIGHT RATE INCREASE REQUESTED BY WESTERN RAILROADS

If Increase is Effected, It Will Cost Farmers of Illinois From Three to Three-and-a-Quarter Million Dollars More in Freight Each Year, I. A. A. Transportation Department Estimates

THE fighting force of the nation's farm bureaus will be thrown into the battle of the organized farmers against the western railroads' petition for an 11 per cent increase in freight rates.

This became known when the American Farm Bureau Federation announced national opposition following the conference of Midwest state farm bureau presidents and secretaries in Chicago the middle of July. At this meeting a resolution was passed urging national action and basing the opposition to the increase upon the premise that farmers are not financially able to stand an advance.

The proposed increase, if effected, would cost Illinois farmers, taking the state as a whole, from three to three-and-one-quarter million dollars a year, according to an estimate made by L. J. Quasey, director of the I. A. A. transportation department.

22 States Affected

Twenty-one other states affected are: Wisconsin, Minnesota, Iowa, Nebraska, South Dakota, North Dakota, Missouri, Kansas, Oklahoma, Colorado, Wyoming, Idaho, Utah, Oregon, Washington, California, New Mexico, Arizona, Texas, Arkansas and Montana. Approximately 500,000 farm families in the states are members of the Farm Bureau.

An estimate by O. W. Sandberg, transportation director of the American Farm Bureau Federation, estimates that "this proposed increase would add some $180,000,000 to the annual freight bill paid in these states. Of this amount, between 85 and 90 million would be paid directly by farmers in shipping their products to market. And another large portion of it would be paid by farmers in the price they pay for various 'shipped in' commodities."

Means $16 A Car

Some magnitude of the freight bill paid by the farmers in these 22 states was made evident by Mr. Sandberg, when he said: "During the first three months of this year there were shipped in this territory 1,700,041 carloads of agricultural produce.

"If the proposed increase had been in effect western and midwestern farmers would have paid an average of about $16 more freight on each of the 1,007,041 cars."

Some of the items making up this total for the first three months as given by Mr. Sandberg were: wheat, 85,780 cars; corn, 76,785 cars; hogs, 143,929 cars; potatoes, 34,059 cars; cattle and calves, 154,527 cars; oats, 38,372 cars, and so on.

First Hearing September 1

Hearings will begin in Chicago on September 1 before the Interstate Commerce Commission, but at that time only the carriers' side will be presented. It is thought that a continuance will be set to give opposing shippers, as typified by the Illinois Agricultural Association, an opportunity to file a rebuttal.

Mobilization of the entire strength and resources of the Farm Bureau in 22 states is under way by the American Farm Bureau Federation. Plans for action in states where the Farm Bureaus do not have permanent transportation departments, call for state committees to centralize the fight, and these are to co-operate with a regional committee.

These committees which are now being formed are starting at once building an organized opposition to the rate increase proposal. A meeting of farm bureau representatives from Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Washington, Wyoming and Utah has been called in Colorado to begin July 27.

"Sam" Promises Full Co-operation

"I want to say that we are heartily in accord with the position taken by the American Farm Bureau Federation in opposing the 11 per cent freight rate increase," states President Sam H. Thompson, "and we will co-operate in every way possible so that the facts regarding the abil-

(Continued on page 4, col. 3.)

"First Come, First Served," is Sales Order on Tractors

FOR SALE—The Illinois Farm Relief Committee offers for cash, subject to prior sale, the following power farm equipment:

2—10-20 McCORMICK-DEERING TRACTORS
2—ENGINE GANG PLOWS
2—TRACTOR DISK HARROWS $1,600
(Or one of above Tractors with plow and disk at $900.)
2—FORDSON TRACTORS
2—ENGINE GANG PLOWS $900
(Or one of above Fordson tractors with plow at $400.)

The first lot of equipment may be seen at Benton, and the second lot of equipment may be seen at Carmi, Illinois, by applying to the respective Farm Bureaus.

This equipment was used in the tornado area, purchased new, and for all practical purposes is as good as new.

Orders accompanied by bank draft or certified check to cover full purchase price will be entered in their order as received by us. The purchaser will be given the privilege of immediate examination of this equipment and its acceptance or refusal will be entirely at the option of the purchaser.—Address: —R. A. Cowles, Chairman of the Committee, c/o Illinois Agricultural Association, 608 South Dearborn St., Chicago, Ill.

Says Charter Members of New Reinsurance Co. Will Be Proud Some Day

"Every friend of mutual insurance should inform himself as to the merits of the Farmers' Mutual Reinsurance Company and should assist in getting the charter for the new company," states Vernon Vanman, field representative for the newly organized company.

"Every mutual insurance company in the state, I believe, will be proud to have had a part in securing the charter for the reinsurance company. It is necessary to get $500,000 of direct policies to get the charter. With 240 companies in the state, and each company assisting to the extent of $5,000, we would soon reach our goal and get our charter."

"The reinsurance company will operate on a mutual basis. We do not have a mutual assessment law in this state under which we could organize, so we had to organize under the uniform mutual law. This company will operate the same, however, as the local assessment company only the premium will be paid in advance."

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Published every other Saturday by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by Department of Information, Harry C. Butcher, Director.

Entered as second class matter Oct. 10, 1921, at the post office at Chicago, Illinois, under the act of March 3, 1879. Acceptance for mailing at special rates of postage provided for in Section 1103, Act of October 3, 1917, authorized Oct. 31, 1921.

The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record.

Postmaster: In returning an uncalled-for or missent copy, please indicate key number on address as is required by law.

THE RECORD'S PLATFORM

Advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, social and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Support the Producers

READ the reports of the three Illinois Producer agencies in this issue. Here is a successful venture in co-operative marketing that deserves your loyal support. In fact, it is no longer a venture, it's an established institution that is doing business of farmers, by farmers and for farmers. Give the Producers your business, and if you haven't business for them, give 'em a good word. The start made toward control is especially encouraging.

—o—

Success to You!

THE dairymen in Peoria, Tazewell and Woodford counties who produce milk for the families in Peoria have organized a producers marketing association.

Among the laudable things they have set out to accomplish are: Penalize the dairyman who makes a surplus, premiumize the dairyman who produces uniformly, sell their milk in two packages—fluid and surplus—for the best the market affords, join hands with the dealers in giving Peoria families good milk at a fair price—and with a smile.

PATIENTLY PICKING PA'S PANTS

Expressions are Invited

IN the next issue we will print letters from farm bureau members pertaining to the proposed freight rate increase. Members who wish to express themselves on this subject are invited to do so, and as many letters will be permitted as space will permit. Some letters have already been received on this subject. Some of them need asbestos envelopes.

—o—

A Perplexing Problem

HOW to measure correctly the quality of the voice of a hog or chicken caller was a perplexing problem confronting the committee for the state picnic of the Illinois Agricultural Association which is to be held this year at Taylorville, Christian county, on August 26.

County champion hog and chicken calling artists, both men and women, have been invited from each of the 92 county Farm Bureaus, and now develops the question as to the right kind of measuring stick for the contest.

Selection of the state champion may depend largely upon the judge, and the best judge of hog or chicken calling ought to be the real animals, the committee thinks, but herein lies many practical difficulties.

With real hogs assembled in an open 80-acre field to determine the loudest, the most melodious, the most persuasive hog-caller in Illinois, and with the aspiring contestants arrayed at the other side, the difficulty anticipated is that after a few calls have been answered by the pigs in 40-rod sprints and with any fair degree of rapidity, they will soon register a nonchalant attitude toward the teasing, musical and alluring rural vocalists, then the remaining callers will call in vain. For this reason, the committee has decided that animal judges will not suffice. The same is true of chickens.

The committee has tentatively decided that it is best to send five impartial human criterions of the art beyond a neighboring hill where they can judge "sight unseen."

More Increases in Membership

A REPORT from the McLean County Farm Bureau says that 1,238 members have been signed in their renewal campaign which is about over. This is 200 more members in the same territory than belonged to the Farm Bureau before. There are still three townships not touched, four others not one-half done and some "clean-up" work in three or four other places.

Other counties are doing well with renewal campaigns, too, but because of threshing little activity is reported. Moultrie, however, reports 432 members as against 398 old memberships. Warren county is also over the top.

Most of the soliciting work in McLean county, as in practically all of the 40-odd counties renewing this year, is done by the members themselves. This makes a renewal campaign cost less and leaves more funds for carrying on the fight at the battle-front. Besides it gives many members an opportunity to express, both in actions and words, their loyalty to the agricultural industry, their constructive thinking along organization lines, and their steadfast belief in the Farm Bureau as an organization for meeting, attempting to solve, and solving, with favorable outcome, many of the perplexing problems confronting farmers as a group.

If this continues, we'll have to change the figures in our slogan.

—o—

Illinois Leads in Limestone Use

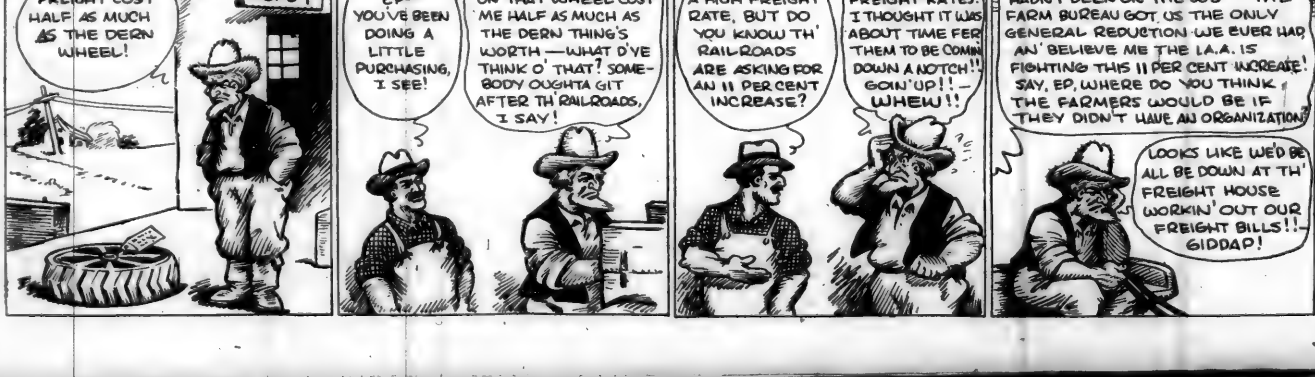
MORE limestone for sour soils will be used this year by Illinois farmers than has ever been used before, according to a report of the phosphate-limestone department.

During 1924, Illinois farmers used approximately 500,000 tons, which was the most used by any state in the Union. This year will likely eclipse last year's record, judging from the amount of soil sweetener used during the first six months. The 500,000 tons used by Illinois farmers last year was one-fourth of all the limestone used in the United States during the same period. This indicates that Illinois farmers are rapidly making use of scientific practices. Illinois' 63,000 *thinking* farmers have been largely responsible for this leadership.

—o—

Exclusion of Middlemen

MR. HACHIYA OBAMA, secretary of the Ministry of Agriculture and Forestry, and councillor of the Japanese Central Co-operative Union, is a polite Japanese gentleman who visited the I. A. A. office recently in quest of information concerning the farmers' co-operative movement in Illinois and the United States.



He told of the co-operative movement in Japan. The Central Co-operative Union, of which he is councillor, is a distributing co-operative on the order of the English and Scottish Wholesales. Three million enterprising Japanese get their food and clothing supplies through the Union's 14,000 local associations, he said. It does an annual business of one billion yen. A yen is approximately 50 cents.

Mr. Obama's knowledge of co-operatives is much more extensive than is his command of the English language.

"We wish to ex-ex-ex-ex—what you say?—ex-cremate the middlemen as far as possible," he faltered.

He left, and is on his way to Europe for more information on exclusion of unnecessary middlemen.

JOHN THINKER AND EPIDERMIS FLINT. (John's a Loyal Farm Bureau Member. Epidermis Is "Agin" It!) Freight Rates!

ST. LOUIS PRODUCERS HAVE DEMONSTRATED CONTROL OF MARKET

Letter From Missouri Pacific Railroad Pays Tribute to Prominence and Standing of St. Louis Co-op.

"The control of volume in any line of business spells ultimate control of that business and in spite of the fact that many interested parties would have us think differently, this age-old axiom applies just as surely to the live stock business as it does to shoestrings or stovepipes," declares the Producers Live Stock Commission Association of E. St. Louis, through O. A. White, assistant manager.

"This idea was the nucleus around which the various Producers Commission Associations were formed and placed on the terminal markets, and the St. Louis house, which was the first to open, is now half way through its fourth year of successful operation. Our volume has steadily increased and with it our power has grown until we have reached the stage where almost everyone connected with the live stock industry is anxious to be friends with such a powerful organization.

Enemies Are Friends Now

"This is evidenced in many ways, one of the first of which was increased yard facilities and scales. These were not given us at first but as we proved day after day that we could control a large volume of the receipts we soon reached the stage where we could demand them and we now have ample room for handling all our stock.

"It is shown in another way in the following letter, written in the general office of the Missouri Pacific Railroad Company at St. Louis, Mo., which we quote:

"'The Producers Commission Association obtains improved railroad service. Because of the prominence and standing of the producers' own co-operative agency it was possible for the president, C. B. Denman, in conference with President L. W. Baldwin of the Missouri Pacific railroad, to work out a plan whereby live stock consigned to the Producers from west of the Mississippi river will move through the St. Louis terminal and reach the unloading docks at the stock yards without delay.

"'The Missouri Pacific has a man constantly on the job whose duty is to personally follow this stock through the terminal and across the river. The plan is now in successful operation and the service is improved and is a source of satisfaction to Missouri Pacific shippers.'

Tribute to Organization

"This great railroad, one of the greatest in live stock transportation in the country, did not make these concessions to Mr. C. B. Denman the man, great leader and thinker that he is, but to C. B. Denman, president of the National Live Stock Producers Association, the greatest live stock seling agency in the world today.

"This delay in transportation has been the cause of much litigation in the past and almost every agency connected with the live stock business has tried at various times to correct it, but without success until the Producers took it upon themselves to remedy the evil.'

"Last but not the least, the effect of volume is shown in a way that perhaps lies closer to the producer's heart than any other. We mean in the market price paid for his live stock when it reaches the terminal market. It was at first thought that we would have to control at least fifty per cent to be able to talk prices with the packers, but events have proven that it does not take quite as large a percentage, and that given approximately thirty per cent of the receipts, we are able to dominate the market in so far as possible under the law of supply and demand.

Forced Market Higher

"This was shown in a small way on the sheep market in St. Louis during the week of June 15th, when the Producers, through their volume of business, were able to force the market into line and cause an advance in prices of from 75 cents to $1 per cwt. on the price of lambs.

"Our market had been out of line for some time and best lambs at St. Louis were selling almost $1 per cwt. lower than Chicago, but beginning with the week mentioned the Producers volume increased so that on the days our run was the heaviest, we controlled from 20 to 25 per cent of the receipts, and on Tuesday of that week we refused to sell our lambs at the prevailing prices, which was from $14.50 to $14.75. By holding on, $15 was obtained for practically all the lambs in the Producers' alley. On Wednesday of that week we again had a big percentage and again refused to take steady prices. Others sold from $14.75 to $15 with very few going at the latter price, while the Producers holdings went from $15 to $15.25, the latter price being paid for four cars, which was 25 cents per cwt. higher than any other sales that day. The market closed up on Wednesday nearer in line than it had been any time this summer, and this condition was obtained simply and solely because we held and handled the volume of the receipts and were in a position to have something to say about the prices of our stock. Since the week mentioned conditions have been very much the same and through our volume we have been able to hold our market well in line with other points.

Illustrates Possibilities

"This simply shows in a small way what can be done with the control and the same thing will apply to cattle or hogs. As soon as the producers in the country get this idea firmly in their minds and market their stock through their own agency at the terminal markets, they will be able to take no small part in fixing the price of their live stock."

OFFICERS OF CHICAGO PRODUCERS

Left to right: Frank Coyne, Iowa; W. B. Elliott, Illinois; R. F. O'Donnell, Iowa; A. Sykes, Iowa; S. W. Doty, Manager; C. A. Ewing, Illinois; H. H. Parke, Illinois, and W. H. Wischow, Minnesota.

Illinois Farmers' Loyalty Helps Chicago Producers Make Success

CLOSELY interwoven in the tale of the successes of the Chicago Producers is the prominent and loyal part played by the Illinois shippers and Illinois shipping associations.

For the past three years over 51 per cent of the total shipments received by the Producers have been consigned to them from the state of Illinois. Furthermore, 30 per cent of the total co-operative shipments to the Chicago market from the shipping associations in Illinois have gone to the Producers, which is an outstanding fact in itself when it is considered there are over 125 marketing agencies upon this market.

The Chicago Producers, as was brought out in the last issue of the RECORD, have just completed their third successful year, handling 6.9 per cent of the total receipts on the Chicago market—some 1,152,587 head of live stock. The total value of this stock was $31,418,656.28. During the third fiscal year a total of 16,336 cars of stock and the equivalent of 150 rail cars of truck stock were sold by this association. While this total was not as great as that of the preceding year, yet it must be remembered there has been a substantial decrease in yard receipts, hogs alone decreasing 14 per cent.

Comparisons Show Gains

When compared with the total yard receipts and receipts during the past year, each of the departments has shown a healthy increase, the cattle department having increased 4 per cent, the calf department 14 per cent, sheep department 25 per cent, and during the past year, 9.3 per cent of the total hog receipts at the yards were handled by the Producers, against 8.9 per cent during the preceding year. The cause of such growth may be readily understood when a survey is made of the accomplishments and improvements to the Producers' service which have taken place during the past year.

Total Refund Over Quarter Million

The accumulation of $82,540.36, a 25 per cent refund of paid-in commissions, has brought the total refund up to $255,086.20. While this refund is not as great as that of last year, yet the board of directors thought it wise to decrease the per cent, knowing that the receipts of live stock would be lighter during the coming months due to decreased production, and accordingly the sound policy would be to build up and maintain a substantial reserve.

Claim Department Added

With a view of still further improving the service, a claim department has been added to the organization. This department, which functions as a part of the transportation department of the Illinois Agricultural Association, is without cost to the shippers of the Producers. The services of this department, which has heretofore been rendered by the I. A. A. department, will be along the lines of collecting freight loss and damage claims, overcharge claims, collecting and verifying freight rates, and assisting in the bettering of car supply and train service.

Feeding Operations Financed

In conjunction with the Producer agencies on the St. Louis and Kansas City markets, the Chicago Producers have assisted in the formation of an organization known as the Producers Live Stock Credit Corporation which is prepared to make loans on feeding operations for cattle, sheep, and hogs, at the nominal rate of 6 per cent. This is a service given at cost, the actual credit being obtained from the Federal Intermediate Bank of St. Louis.

Selling Service Improved

In the hog department, the addition of a special outhog salesman has made it possible for our shippers to get the full market value from this class of stock. The out hogs are now collected and as far as possible, sold in large units by this special salesman. The prices which he receives shows clearly the advantages of this method.

In the calf department the marking of each calf on the basis of its true market value has eliminated an old complaint and has resulted in the increase of 14 per cent in this department.

Henry County Leads in Support

A total of 531 carloads of stock received from Henry county shippers places this county well in the lead for the second successive year. Of this number, 62 carloads were received from straight car shippers, and 469 from shipping associations.

Knox county was in second place with a total of 432 cars, 108 of which were from straight load shippers.

DeKalb county has the honor of leading in the straight load shippers, 220 being received from points in this county.

Rockford Leads Shipping Association Class

The Farmers' Shipping Association at Rockford lead in the shipping association class, 182 carloads being received from this association. The record for this association for co-operative marketing has been an enviable one. For the past two and one-half years every head of stock has been consigned to the Producers to Chicago.

Second place went to Warren County Shipping Association which shipped a total of 168 cars, while the Farmers' Elevator at Kewanee came in third with 101 cars. Figures on the largest straight load shippers are not available as yet, but will be out in the next few weeks.

The Illinois Agricultural Association has always been firmly behind this Producer movement. The growth has been constant and many of their aims have already been attained. However, the bigger things for which they were established are still in the distance and will be until the live stock producers support this agency with all their stock, for volume is the big essential necessary for the successful attainment of their aims.

PEORIA PRODUCERS HAVE RAISED PRICE AVERAGE IS REPORT

This Producers' Agency Has Returned a 30 Per Cent Refund This Year, and is Getting Good Volume

Illinois farmers who sell live stock on the Peoria market enjoy a market that on the average is 15 to 20 cents higher than three years ago, according to the Peoria Producers Commission Association in a statement issued by W. R. Hembrough, manager.

"This is a general average comparing the market with Chicago now and what it was three years ago," states Mr. Hembrough. The reason for the increase is attributed by live stock producers to the fact that on many days the Peoria Producers handle as much as 50 per cent of all stock sold on this market, thus giving the organization some control over price levels.

A total refund of $15,807.17, representing 30 per cent of commission charges, has been voted to be returned to participators in the co-operative. This is for the third fiscal year, which ended May 31, 1925.

Most Business From 7 Counties

The seven "charter member" counties of the Peoria Producers have been the heaviest contributors of shipments, an analysis of the I. A. C. A. audit shows. The refunds being returned in these counties are as follows: Peoria, $5,758.07; Tazewell, $2,052.86; Fulton, $1,955.14; Stark, $1,261.37; Knox, $1,472.10; Mason, $127.92; and Woodford, $621.61. The totals $12,149.07, leaving $3,456.10 returned in refunds to shippers outside these seven counties. Considerable Iowa business comes via the M. & St. L. This is a heavy trucking market.

The five leading shipping associations are: Toulon (Stark), $246.54; Gilson (Knox), $225.57; Hermon (Knox), $193.34; Bishop Hill (Henry), $159.93; and Maquon, (Knox), $144.58. The next five in rank are: Mason County Shipping association, Warren County Shipping association, Cambridge (Henry), Galva (Henry) and Tabor (DeWitt).

"Prospects Bright"

"The prospect for the Peoria Producers looks good for the future, although we look for light receipts during the balance of the summer, and as soon as the fall run starts we look for a larger per cent than in the past," Mr. Hembrough concludes.

$40,000 IN PRIZES AT BIG DAIRY SHOW

Over $40,000 will be offered in cash prizes for cattle at the National Dairy Show which will be held at Indianapolis, October 10 to 17 inclusive. The sum of $34,675 is offered in the five cattle breed classifications and $3,250 by the various breed associations in special prizes. A special $2,000 is offered for prizes on boys' and girls' club calves.

Various Illinois counties are planning to be represented.

OFFICE VISITORS

Would you be interested in knowing some of the callers at the I. A. A. office? Here are the names of some who called during the past couple of weeks.

Chester G. Starr, General Manager, Prairie State Farmers' Insurance Ass'n, Bloomington; R. W. Bayles, City Freight Agent, New York Central Railroad Company, Chicago; Arthur J. Mertzke, Executive Secretary, Institute for Research in Land Economics and Public Utilities, Evanston; J. W. Brinton, Organization Director, Minnesota Wheat Growers Association, Minneapolis; J. W. Shorthill, Secretary, National Farmers Grain Dealers Association, Omaha; Miss Palmer, Secretary to Mrs. Medill McCormick; Geo. N. Peek, President, American Council of Agriculture, Moline; L. A. Finsen, Superintendent, Concordia Creamery, Concordia; Mr. Waterman of the Sycamore National Bank, Sycamore, Ill.; R. H. Tanner, Kankakee, Ill.; J. L. Robertson, engineer connected with development of potash deposits in Idaho; Isao Kanimura, D. C. L., Special Food Commissioner, Prefecture and City of Tokyo, Japan; Tsutomu Obama, Graduate Student at the University of Wisconsin; Hachiya Kuroda, Secretary of the Ministry of Agriculture and For. and Councillor of the Japanese Central Co-operative Union; Mr. Roy Rees, Manager, Farmers' Grain and Coal Co., Shirley, Ill., and Mrs. Rees; Congressman Dickenson of Iowa; Charles R. Pinley, formerly president Vermilion County Farm Bureau.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Published every other Saturday by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by Department of Information, Harry C. Butcher, Director.

Entered as second class matter Oct. 10, 1921, at the post office at Chicago, Illinois, under the act of March 3, 1879. Acceptance for mailing at special rates of postage provided for in Section 1103, Act of October 3, 1917, authorized Oct. 31, 1921.

The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record.

Postmaster: In returning an uncalled-for or missent copy, please indicate key number on address as is required by law.

THE RECORD'S PLATFORM

Advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, social and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Support the Producers

READ the reports of the three Illinois Producer agencies in this issue. Here is a successful venture in co-operative marketing that deserves your loyal support. In fact, it is no longer a venture, it's an established institution that is doing business of farmers, by farmers and for farmers. Give the Producers your business, and if you haven't business for them, give 'em a good word. The start made toward control is especially encouraging.

—o—

Success to You!

THE dairymen in Peoria, Tazewell and Woodford counties who produce milk for the families in Peoria have organized a producers marketing association.

Among the laudable things they have set out to accomplish are: Penalize the dairyman who makes a surplus, premiumize the dairyman who produces uniformly, sell their milk in two packages—fluid and surplus—for the best the market affords, join hands with the dealers in giving Peoria families good milk at a fair price—and with a smile.

PATIENTLY PICKING PA'S PANTS

Expressions are Invited

IN the next issue we will print letters from farm bureau members pertaining to the proposed freight rate increase. Members who wish to express themselves on this subject are invited to do so, and as many letters will be permitted as space will permit. Some letters have already been received on this subject. Some of them need asbestos envelopes.

—o—

A Perplexing Problem

HOW to measure correctly the quality of the voice of a hog or chicken caller was a perplexing problem confronting the committee for the state picnic of the Illinois Agricultural Association which is to be held this year at Taylorville, Christian county, on August 26.

County champion hog and chicken calling artists, both men and women, have been invited from each of the 92 county Farm Bureaus, and now develops the question as to the right kind of measuring stick for the contest.

Selection of the state champion may depend largely upon the judge, and the best judge of hog or chicken calling ought to be the real animals, the committee thinks, but herein lies many practical difficulties.

With real hogs assembled in an open 80-acre field to determine the loudest, the most melodious, the most persuasive hog-caller in Illinois, and with the aspiring contestants arrayed at the other side, the difficulty anticipated is that after a few calls have been answered by the pigs in 40-rod sprints and with any fair degree of rapidity, they will soon register a nonchalant attitude toward the teasing, musical and alluring rural vocalists, then the remaining callers will call in vain. For this reason, the committee has decided that animal judges will not suffice. The same is true of chickens.

The committee has tentatively decided that it is best to send five impartial human criterions of the art beyond a neighboring hill where they can judge "sight unseen."

More Increases in Membership

A REPORT from the McLean County Farm Bureau says that 1,238 members have been signed in their renewal campaign which is about over. This is 200 more members in the same territory than belonged to the Farm Bureau before. There are still three townships not touched, four others not one-half done and some "clean-up" work in three or four other places.

Other counties are doing well with renewal campaigns, too, but because of threshing little activity is reported. Moultrie, however, reports 432 members as against 398 old memberships. Warren county is also over the top.

Most of the soliciting work in McLean county, as in practically all of the 40-odd counties renewing this year, is done by the members themselves. This makes a renewal campaign cost less and leaves more funds for carrying on the fight at the battle-front. Besides it gives many members an opportunity to express, both in actions and words, their loyalty to the agricultural industry, their constructive thinking along organization lines, and their steadfast belief in the Farm Bureau as an organization for meeting, attempting to solve, and solving, with favorable outcome, many of the perplexing problems confronting farmers as a group.

If this continues, we'll have to change the figures in our slogan.

—o—

Illinois Leads in Limestone Use

MORE limestone for sour soils will be used this year by Illinois farmers than has ever been used before, according to a report of the phosphate-limestone department.

During 1924, Illinois farmers used approximately 500,000 tons, which was the most used by any state in the Union. This year will likely eclipse last year's record, judging from the amount of soil sweetener used during the first six months. The 500,000 tons used by Illinois farmers last year was one-fourth of all the limestone used in the United States during the same period. This indicates that Illinois farmers are rapidly making use of scientific practices. Illinois' 63,000 ***thinking*** farmers have been largely responsible for this leadership.

—o—

Exclusion of Middlemen

MR. HACHIYA OBAMA, secretary of the Ministry of Agriculture and Forestry, and councillor of the Japanese Central Co-operative Union, is a polite Japanese gentleman who visited the I. A. A. office recently in quest of information concerning the farmers' co-operative movement in Illinois and the United States.

He told of the co-operative movement in Japan. The Central Co-operative Union, of which he is councillor, is a distributing co-operative on the order of the English and Scottish Wholesales. Three million enterprising Japanese get their food and clothing supplies through the Union's 14,000 local associations, he said. It does an annual business of one billion yen. A yen is approximately 50 cents.

Mr. Obama's knowledge of co-operatives is much more extensive than is his command of the English language.

"We wish to ex-ex-ex-ex—what you say?—ex-cremate the middlemen as far as possible," he faltered.

He left, and is on his way to Europe for more information on exclusion of unnecessary middlemen.

JOHN THINKER AND EPIDERMIS FLINT. (John's a Loyal Farm Bureau Member. Epidermis Is "Agin" It!) Freight Rates!

ST. LOUIS PRODUCERS HAVE DEMONSTRATED CONTROL OF MARKET

Letter From Missouri Pacific Railroad Pays Tribute to Prominence and Standing of St. Louis Co-op.

"The control of volume in any line of business spells ultimate control of that business and in spite of the fact that many interested parties would have us think differently, this age-old axiom applies just as surely to the live stock business as it does to shoestrings or stovepipes," declares the Producers Live Stock Commission Association of E. St. Louis, through O. A. White, assistant manager.

"This idea was the nucleus around which the various Producers Commission Associations were formed and placed on the terminal markets, and the St. Louis house, which was the first to open, is now half way through its fourth year of successful operation. Our volume has steadily increased and with it our power has grown until we have reached the stage where almost everyone connected with the live stock industry is anxious to be friends with such a powerful organization.

Enemies Are Friends Now

"This is evidenced in many ways, one of the first of which was increased yard facilities and scales. These were not given us at first but as we proved day after day that we could control a large volume of the receipts we soon reached the stage where we could demand them and we now have ample room for handling all our stock.

"It is shown in another way in the following letter, written in the general office of the Missouri Pacific Railroad Company at St. Louis, Mo., which we quote:

"'The Producers Commission Association obtains improved railroad service. Because of the prominence and standing of the producers' own co-operative agency it was possible for the president, C. B. Denman, in conference with President L. W. Baldwin of the Missouri Pacific railroad, to work out a plan whereby live stock consigned to the Producers from west of the Mississippi river will move through the St. Louis terminal and reach the unloading docks at the stock yards without delay.

"'The Missouri Pacific has a man constantly on the job whose duty is to personally follow this stock through the terminal and across the river. The plan is now in successful operation and the service is improved and is a source of satisfaction to Missouri Pacific shippers.'

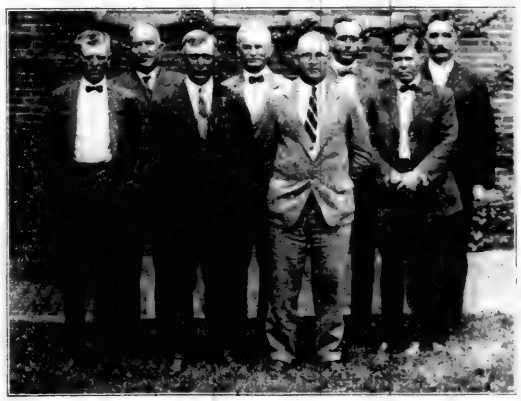
Tribute to Organization

"This great railroad, one of the greatest in live stock transportation in the country, did not make these concessions to Mr. C. B. Denman the man, great leader and thinker that he is, but to C. B. Denman, president of the National Live Stock Producers Association, the greatest live stock selling agency in the world today.

"This delay in transportation has been the cause of much litigation in the past and almost every agency connected with the live stock business has tried at various times to correct it, but without success until the Producers took it upon themselves to remedy the evil.'

"Last but not the least, the effect of volume is shown in a way that perhaps lies closer to the producer's heart than any other. We mean in the market price paid for his live stock when it reaches the terminal market. It was at first thought that we would have to control at least fifty per cent to be able to talk prices with the packers, but events have proven that it does not take quite as large a percentage, and that given approximately thirty per cent of the receipts, we are able to dominate the market in so far as possible under the law of supply and demand.

Forced Market Higher



"This was shown in a small way on the sheep market in St. Louis during the week of June 15th, when the Producers, through their volume of business, were able to force the market into line and cause an advance in prices of from 75 cents to $1 per cwt. on the price of lambs.

"Our market had been out of line for some time and best lambs at St. Louis were selling almost $1 per cwt. lower than Chicago, but beginning with the week mentioned the Producers volume increased so that on the days our run was the heaviest, we controlled from 20 to 25 per cent of the receipts, and on Tuesday of that week we refused to sell our lambs at the prevailing prices, which was from $14.50 to $14.75. By holding on, $15 was obtained for practically all the lambs in the Producers' alley. On Wednesday of that week we again had a big percentage and again refused to take steady prices. Others sold from $14.75 to $15 with very few going at the latter price, while the Producers holdings went from $15 to $15.25, the latter price being paid for four cars, which was 25 cents per cwt. higher than any other sales that day. The market closed up on Wednesday nearer in line than it had been any time this summer, and this condition was obtained simply and solely because we held and handled the volume of the receipts and were in a position to have something to say about the prices of our stock. Since the week mentioned conditions have been very much the same and through our volume we have been able to hold our market well in line with other points.

Illustrates Possibilities

"This simply shows in a small way what can be done with the control and the same thing will apply to cattle or hogs. As soon as the producers in the country get this idea firmly in their minds and market their stock through their own agency at the terminal markets, they will be able to take no small part in fixing the price of their live stock."

OFFICERS OF CHICAGO PRODUCERS

Left to right: Frank Coyne, Iowa; W. B. Elliott, Illinois; R. F. O'Donnell, Iowa; A. Sykes, Iowa; S. W. Doty, Manager; C. A. Ewing, Illinois; H. H. Parke, Illinois, and W. B. Wiechow, Minnesota.

Illinois Farmers' Loyalty Helps Chicago Producers Make Success

CLOSELY interwoven in the tale of the successes of the Chicago Producers is the prominent and loyal part played by the Illinois shippers and Illinois shipping associations.

For the past three years over 51 per cent of the total shipments received by the Producers have been consigned to them from the state of Illinois. Furthermore, 30 per cent of the total co-operative shipments to the Chicago market from the shipping associations in Illinois have gone to the Producers, which is an outstanding fact in itself when it is considered there are over 125 marketing agencies upon this market.

The Chicago Producers, as was brought out in the last issue of the RECORD, have just completed their third successful year, handling 6.9 per cent of the total receipts on the Chicago market—some 1,152,587 head of live stock. The total value of this stock was $31,418,656.28. During the third fiscal year a total of 16,336 cars of stock and the equivalent of 150 rail cars of truck stock were sold by this association. While this total was not as great as that of the preceding year, yet it must be remembered there has been a substantial decrease in yard receipts, hogs alone decreasing 14 per cent.

Comparisons Show Gains

When compared with the total yard receipts and receipts during the past year, each of the departments has shown a healthy increase, the cattle department having increased 4 per cent, the calf department 14 per cent, sheep department 25 per cent, and during the past year, 9.3 per cent of the total hog receipts at the yards were handled by the Producers, against 8.9 per cent during the preceding year. The cause of such growth may be readily understood when a survey is made of the accomplishments and improvements to the Producers' service which have taken place during the past year.

Total Refund Over Quarter Million

The accumulation of $82,540.36, a 25 per cent refund of paid-in commissions, has brought the total refund up to $255,086.20. While this refund is not as great as that of last year, yet the board of directors thought it wise to decrease the per cent, knowing that the receipts of live stock would be lighter during the coming months due to decreased production, and accordingly the sound policy would be to build up and maintain a substantial reserve.

Claim Department Added

With a view of still further improving the service, a claim department has been added to the organization. This department, which functions as a part of the transportation department of the Illinois Agricultural Association, is without cost to the shippers of the Producers. The services of this department, which has heretofore been rendered by the I. A. A. department, will be along the lines of collecting freight loss and damage claims, overcharge claims, collecting and verifying freight rates, and assisting in the bettering of car supply and train service.

Feeding Operations Financed

In conjunction with the Producer agencies on the St. Louis and Kansas City markets, the Chicago Producers have assisted in the formation of an organization known as the Producers Live Stock Credit Corporation which is prepared to make loans on feeding operations for cattle, sheep, and hogs, at the nominal rate of 6 per cent. This is a service given at cost, the actual credit being obtained from the Federal Intermediate Bank of St. Louis.

Selling Service Improved

In the hog department, the addition of a special outhog salesman has made it possible for our shippers to get the full market value from this class of stock. The out hogs are now collected and as far as possible, sold in large units by this special salesman. The prices which he receives shows clearly the advantages of this method.

In the calf department the marking of each calf on the basis of its true market value has eliminated an old complaint and has resulted in the increase of 14 per cent in this department.

Henry County Leads in Support

A total of 531 carloads of stock received from Henry county shippers places this county well in the lead for the second successive year. Of this number, 62 carloads were received from straight car shippers, and 469 from shipping associations.

Knox county was in second place with a total of 432 cars, 108 of which were from straight load shippers.

DeKalb county has the honor of leading in the straight load shippers, 220 being received from points in this county.

Rockford Leads Shipping Association Class

The Farmers' Shipping Association at Rockford lead in the shipping association class, 182 carloads being received from this association. The record for this association for co-operative marketing has been an enviable one. For the past two and one-half years every head of stock has been consigned to the Producers to Chicago.

Second place went to Warren County Shipping Association which shipped a total of 168 cars, while the Farmers' Elevator at Kewanee came in third with 101 cars. Figures on the largest straight load shippers are not available as yet, but will be out in the next few weeks.

The Illinois Agricultural Association has always been firmly behind this Producer movement. The growth has been constant and many of their aims have already been attained. However, the bigger things for which they were established are still in the distance and will be until the live stock producers support this agency with all their stock, for volume is the big essential necessary for the successful attainment of their aims.

PEORIA PRODUCERS HAVE RAISED PRICE AVERAGE IS REPORT

This Producers' Agency Has Returned a 30 Per Cent Refund This Year, and is Getting Good Volume

Illinois farmers who sell live stock on the Peoria market enjoy a market that on the average is 15 to 20 cents higher than three years ago, according to the Peoria Producers Commission Association in a statement issued by W. R. Hembrough, manager.

"This is a general average comparing the market with Chicago now and what it was three years ago, states Mr. Hembrough. The reason for the increase is attributed by live stock producers to the fact that on many days the Peoria Producers handle as much as 50 per cent of all stock sold on this market, thus giving the organization some control over price levels.

A total refund of $15,307.17, representing 30 per cent of commission charges, has been voted to be returned to participators in the co-operative. This is for the third fiscal year which ended May 31, 1925.

Most Business From 7 Counties

The seven "charter member" counties of the Peoria Producers have been the heaviest contributors of shipments, an analysis of the I. A. C. A. audit shows, the refunds being returned in these counties are as follows: Peoria, $3,758.07; Tazewell, $2,052.86; Fulton, $1,955.14; Stark, $1,261.37; Knox, $1,472.10; Mason, $927.92, and Woodford, $621.61. This totals $12,148.07, leaving $3,456.10 returned in refunds to shippers outside these seven counties. Considerable Iowa business comes via the M. & St. L. This is a heavy truck ing market.

The five leading shipping associations are: Toulon (Stark), $246.54; Gilson (Knox), $225.57; Hermon (Knox), $193.34; Bishop Hill (Henry), $159.93; and Maquon, (Knox), $144.58. The next five in rank are: Mason County Shipping association, Warren County Shipping association, Cambridge (Henry), Galva (Henry) and Tabor (DeWitt).

"Prospects Bright"

"The prospect for the Peoria Producers looks good for the future, although we look for light receipts during the balance of the summer, and as soon as the fall run starts we look for a larger per cent than in the past," Mr. Hembrough concludes.

$40,000 IN PRIZES AT BIG DAIRY SHOW

Over $40,000 will be offered in cash prizes for cattle at the National Dairy Show which will be held at Indianapolis, October 10 to 17 inclusive. The sum of $34,675 is offered in the five cattle breed classifications and $3,250 by the various breed associations in special prizes. A special $2,000 is offered for prizes on boys' and girls' club calves.

Various Illinois counties are planning to be represented.

OFFICE VISITORS

Would you be interested in knowing some of the callers at the I. A. A. office? Here are the names of some who called during the past couple of weeks.

Chester C. Starr, General Manager Prairie State Farmers Insurance Ass'n, Bloomington, Ill.; V. Hayes, City Freight Agent, New York Central Railroad Company, Chicago; Arthur J. Mertzke, Executive Secretary, Institute for Research in Land Economics and Public Utilities, Washington, D. C.; Walter Organ, Director Minnesota Wheat Growers Association, Minneapolis; J. W. Scarthill, Secretary, Associated Grain Dealers Association, Chicago; Miss Palmer, Secretary to Mr. Odell McCormick; Geo. N. Peek, President, American Council of Agriculture, Moline; L. A. Finney, Supervisor of Concordia Creamery, Concordia, Mr. Waterman of the Swanson Coal Mining Co., Chicago, Ill.; R. H. Tanimura, Takeshi Ito, J. L. Robertson, in connection with development of potash deposits in Idaho; Issa Tanimura, Jo Special Commissioner, Project and Consul City of Tokyo, Japan; Tanimura Obama, Graduate Student at the University of Wisconsin; Hachiya Obama, Secretary of the Ministry of Agriculture and Commerce of the Japanese Central Co-operative Union; Mr. Roy Reed, Manager, Farmers' Grain and Coal Co., Shirley, Ill., and Mrs. Reed; Congressman Dickenson of Iowa; Charles L. Finley, formerly president Virginia County Farm Bureau.

HERE'S REPORT ON HOW TORNADO FUND IS BEING APPLIED

Illinois Farm Relief Committee Has Turned $50,000 of $181,081.97 Over to Red Cross, Specifying Use.

By R. A. Cowles, Chairman.

The accompanying figures are intended to serve as a report on the progress of rehabilitation in the storm area, and particularly in southern Illinois, in charge of the American Red Cross. The figures used, other than those appearing under the Condensed Statement covering the Illinois Farm Relief Fund, were received from the American Red Cross.

Missouri-Illinois-Indiana Relief Appropriations Totaling $1,000,000.00 Which Figure Was Reached on June 15th, 1925

Power farm equipment for use and re-sale	2,430.00	$62,130.98
Balance in Fund		$118,950.99
		$181,081.97

Cowles Comments on Figures

Some conception of the magnitude of the undertaking by the American Red Cross may be obtained by careful reference to these reports. Based upon actual appropriations to date of the reports, funds available as of that date, and number of cases waiting disposal, some idea may be had of time and funds required to complete the program.

It will be of interest to note that on June 15th, exactly three months after the date of the disaster (March 18, 1925) that there had been set up on the books of the American Red Cross actual appropriation of funds to tornado sufferers in the amount of one million dollars, evidencing the authorized purchase of requirements for beneficiaries in this amount.

Agreement on How to Be Spent

It was also on this date that the Memorandum Agreement was entered into between the Illinois Farm Relief Committee by its chairman and the American Red Cross by its director of disaster relief, covering the transmittal of funds from the Illinois Farm Relief Committee to the American Red Cross, and restricting and limiting the use of all funds so transmitted, according to the purposes and objects for which contributed by their donors. The sum shown on the statement, as having been transmitted and other sums to be transmitted as needed, are to be expended by the American Red Cross as additional funds and in addition to actual expenditures, commitments and appropriations to the date of the Memorandum Agreement (June 15, 1925).

48 Per Cent of Cases Closed

The Consolidated Report for all areas at July 17, 1925 shows, by computation, 48 per cent of the total registered cases in Illinois as closed. —four months after the date of the storm.

The disbursements made from the Illinois Farm Relief Fund other than the item to the American Red Cross and the item covering the purchase of power farm equipment for use in re-sale, represent direct purchases of certain requirements for beneficiaries in the earlier efforts of the Committee to place the farmer beneficiaries and the farms on a producing basis for the present crop season. The American Red Cross are required under the terms of the Memorandum Agreement to segregate and properly and fully account for all funds received from the Illinois Farm Relief Committee. The War Department finally audits all books of account and records of the American Red Cross in this and all other disasters. The purchases of power farm equipment were necessary to assure seasonable plowing in part of the area. The proceeds will be returned to the fund as this equipment is resold.

The Illinois Agricultural Association, as its contribution, is taking care of all administration expenses of the fund, necessary field expenses, and other expenses, so that the fund in toto is available for the relief program.

Red Cross in Charge

So that those who are unacquainted with the Illinois area may have the proper information at hand in considering the reports: The disaster work in the entire Missouri-Illinois-Indiana area is administered by the American Red Cross from a central office located at Murphysboro, functioning through local area offices in charge of actual case work. Each local area office, as the term implies has charge of the work in a certain limited immediate territory.

The Illinois area in this manner is subdivided into the following local areas: Gorham, Murphysboro, DeSoto, all in Jackson county; Bush in the extreme corner of Williamson county; West Frankfort in Franklin county; McLeansboro in Hamilton county; and Carmi in White county. The disaster involved exclusively rural areas in Hamilton and White counties. In the other counties in Illinois, town losses were involved in addition to the rural losses suffered.

Figures Reflect Heavy Urban Damage

The town of Gorham was practically demolished and the storm damage at DeSoto involved all but the southeastern portion of the town. The storm damage at Bush covered the extreme north portion of the town and adjoining territory. The terrific and extensive destruction done by the storm and losses of property at Murphysboro and West Frankfort is no doubt well known to all and is further reflected in the financial reports. In Franklin county, in addition to the extensive losses in West Frankfort, the village of Parish was completely destroyed.

Both the vice-chairman, Mr. Curt Anderson of Xenia, and the chairman of the Illinois Farm Relief Committee have given the work, as required from time to time, their personal attention, and are continuing to do so.

REPORT SAYS AUGUST WILL BE GOOD MONTH TO BUY DAIRY COWS

Your County Farm Bureau Has Information From I. A. A. Telling Best Places To Buy.

Where can I get some good milk cows?

This is the question that enters the dairyman's mind about as soon as he has disposed of his T. B. reactors or culled out his unprofitable milkers.

"Some farmers may have the impression that milk cows are apt to be scarce and rather high priced this fall," states a report sent to all farm advisers in the state by the dairy and live stock marketing departments, which are jointly handling the t. b. eradication project of the I. A. A. In sections where surplus cows can be purchased cheese making is the chief outlet for milk. Cheese has been a good price this year. Naturally every dairyman will keep his cows as long as possible, especially with cheese milk ranging from $1.90 to $2.10 per cwt. In such sections everybody has been hanging onto their cows.

Good Selections in August

"The question of feed and housing for the coming winter will soon put surplus cows in Minnesota, Wisconsin and Ohio on the market. Recent inspection tours by the Illinois Agricultural Association found that there will be available a good selection to choose from the latter part of August and early September. This will be a good time to pick up springers to milk this fall and next winter. The prices will run quite consistently with the age and quality of the cows. Every Illinois buyer should be sure that he is buying cows that are free from tuberculosis and abortion. It is possible in many instances to obtain cows with cow test association records.

"It is a good idea for several farmers wishing to make up a carload of cattle to make the buying tour together. The I. A. A., through the county Farm Bureaus, can tell members where good milk cows can be purchased. By seeing personally where your cows come from and having taken a part in the dickering, farmers will be more satisfied. And this direct contact helps shorten the road from seller to buyer."

FARM BUREAUS FIGHT FREIGHT RATE BOOST

(Continued from page 1, col. 5.)

ity of farmers to stand an increased freight rate at this time will be thoroughly understood at the hearing."

Direction of the case for the American Farm Bureau will be in the hands of Frank Evans, secretary and general marketing counsel, and O. W. Sandberg, director of transportation of the American Farm Bureau — together with the aid and assistance of state farm bureau officers and such experts as may be called in.

The railroads have not yet specified the exact percentage of increase they will ask. They have simply filed petition asking that rates be so adjusted that the railroads will receive a 5¾ per cent return on their valuation. However, the July 11 issue of the Railway Age, of which Samuel O. Dunn, spokesman of the railroads, is editor, in an editorial states that the railroads fell short of this 5¾ per cent by $151,000,000 in 1924. To make up this deficit it is estimated would require an 11 per cent increase over present rates.

Commenting on the action of the American Farm Bureau, President Bradfute said:

"Three years ago this organization in working to relieve this serious economic situation confronting agriculture discovered that high freight rates were one of the factors which were keeping agriculture at the bottom of the pile. At that time we went before the public and to the Interstate Commerce Commission and asked that agriculture be relieved.

"A Basic Indnstry"

"We showed to the satisfaction of the Commission that freight rates did have an important part in the economic condition of agriculture. We established the fact that farming was a basic industry and that unless agriculture was restored to a prosperous condition, industries and railroads alike would suffer.

"Some relief was obtained. Then the railroads came to us. They told us that their properties had been returned to them by the Government in a most impaired condition. That in order that good service be established it was necessary that these properties be put into good shape. This, they said, could not be done if rates were further reduced.

"We agreed to this and forbore asking for further reductions. The farmer was willing to bear his share of the load of reconstruction. The railroads did put their property in good shape and now on the strength of this improved property and the outlay which was necessary to make these improvements they dare to ask for increased rates. The Farm Bureau will fight that proposal until the proposal is killed."

Annual Meet at Flora Ends Successful Year For Red Top Growers

Another successful year of marketing red top seed co-operatively for approximately 800 farmers in southern Illinois through the Egyptian Seed Growers Exchange at Flora was closed and another one begun when the annual meeting was held in the warehouse at Flora, July 14.

Gross receipts from sales during the year amounted to $181,415.79, with total cost of operations at $24,399.17, leaving the net receipts to the growers for 1,471,726 pounds of seed handled at $157,016.62, according to the financial statement. Advances to growers upon delivery of seed amounted to $118,913.26. The remainder, amounting to $38,103.36, was distributed to the grower members shortly after March 1.

The average price obtained by the members by co-operating, was above the average level of prices received by farmers who sold directly to private buyers, according to figures of the United States Department of Agriculture. The co-operative handled sufficient volume to be a strong force in maintaining a higher general price level than would exist if there were no farmers' organization in the business.

Raised Price Level

"Since about 95 per cent of the world's crop of red top is grown in this eight-county area which is served by the Egyptian Seed Growers Exchange," says Curt Anderson, general manager, "and the Exchange handles approximately 50 per cent of all the red top grown in the area, it is in a good position to exert an unusual influence in raising the price all farmers receive."

Selection of directors resulted in the election of the following new directors: O. B. Scrivner of Jefferson county, Marshall C. Smith of Wayne county, and J. M. Luse of Clay county. In addition, W. L. Cope of Salem, who succeeded J. E. Lingenfelter of Lawrenceville, was elected to the board representing the Illinois Agricultural Association.

"We feel that the meeting as a whole was a real success for the reason that a great many members entered into the various discussions, which resulted in a better understanding between members and management," said Curt Anderson, secretary-treasurer and general manager. "Although the red top crop is only about 50 per cent of normal this year, we expect to carry on in good shape."

MRS. JAMES PICTURES FUN CITY KIDS ENJOY IN HELPING DO CHORES

Her Letter Like Many Requests Coming in For Poor Slum Children, But Many More Needed. Will You Help?

"I imagine feeding the chickens and cow would be fun for little city children," writes Mrs. Wm. Pierce James of Galesburg, in her request for two youngsters from the Chicago slums for a two week's outing in the country. Mr. and Mrs. James have four children of their own, so they know how delighted and "important" the little ones feel when they are allowed to "help with the chores" — especially for the first time. Mrs. James is right in thinking that the city children, who know much of motor trucks and street cars and very little of cows and pigs, would have fun scattering grain to the greedy hens and poking fodder into "bossy's" manger. That would be a vacation and an education all in one.

Mr. and Mrs. G. H. Jacobs of St. Francisville, are giving a joyous vacation to four children who have five other brothers and sisters in the Chicago tenement district. The father of this family has been out of work for many weeks, so, in addition to the fresh air and sunshine and the delight of fields and pastures which these poor youngsters are enjoying, they are no doubt actually getting the first "square meals" they have had for a long time. It is hard for country people to realize the number of under-nourished children there are in the city, even in times of prosperity.

Other Kind Hearted People

Others who have asked that children be sent them are:

Mrs. J. P. Leach, Pontiac, 1; Mrs. Alfred Rohu, Tuscola, 1; Mrs. Haus Heit, Arthur, 2; Mrs. Gus Engelhardt, Compton, 2; Mrs. Jacob Schilling, Hanna, 1.

Many places have been provided for outings for the slum kiddies, through the generosity of farm bureau folks, but hundreds of the little folks are still waiting, hoping that this summer they will have a chance to spend two wonderful weeks in the country. Won't you folks who read this, and who live within 200 miles of Chicago, help them to realize their dreams by taking one or more for a two-weeks outing? All you need to do is to drop a line to our Outing Secretary, stating the number you want and the time it would be most convenient for them to come. The children will be delivered to the station nearest you. The United Charities of Chicago will see that they are clean and will assume all responsibility.

Remember—Outing Secretary, I. A. A., 608 S. Dearborn St.

Warns Against Fraud in Stranger's "Life Membership" Scheme

A life membership in a "Better Farming Association" at the attractive price of $8 was the offer recently of a stranger to several farmers in Woodford county, according to a report of H. A. deWerff, farm adviser, to W. H. Smith, state leader of farm advisers, at the University of Illinois.

"We know nothing of a so-called Better Farming Association. No one authorized to use name of Illinois Agricultural College in any such connection. Secure definite information if possible and assist in stopping this fraud," wrote W. H. Smith, state leader to all farm advisers.

And neither are any such persons authorized to use the name of the Illinois Agricultural Association.

COLLEGE OF AGRICULTURE,
UNIVERSITY OF ILLINOIS,
URBANA, ILL.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Volume 3 | Issued Every Other Saturday for 63,000 *thinking* Farmers—August 15, 1925 | No. 16

GRAIN MARKETING PROGRAM OF I.A.A. CONSISTS OF THREE CHIEF LINES OF ENDEAVOR WHICH CONCERN IMPORTANT PROBLEMS OF GROWERS

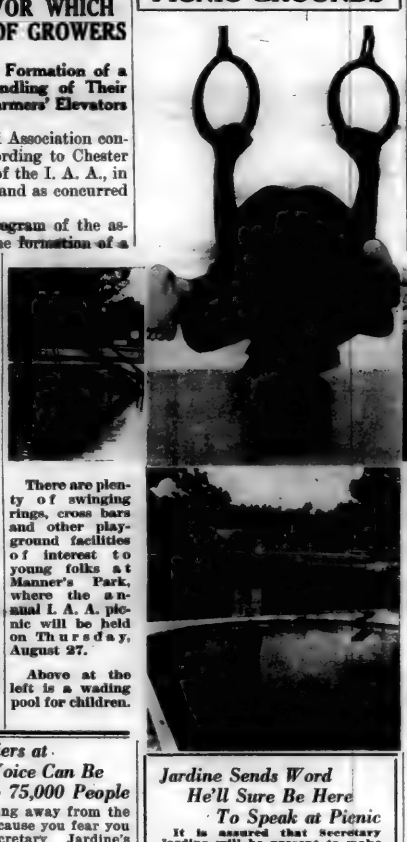
Principal Aim Is to Assist Farmers' Elevators in Formation of a Collective General Sales Agency for the Handling of Their Grain in All Markets and to Help Strengthen Farmers' Elevators

THE grain program of the Illinois Agricultural Association contains three principal phases of endeavor, according to Chester C. Davis, head of the grain marketing department of the I. A. A., in his definition of the grain policy of the association and as concurred in by the executive committee.

"Briefly," states Director Davis, "the grain program of the association aims to assist the farmers' elevators in the formation of a collective general sales agency for the handling of their grain in all markets; to co-operate in the growth and improvement in service of the local farmers' elevators and other local co-operative grain handling associations; and to assist the farmers in districts not served by farmers' elevators along the path of collective marketing of their grain."

This program covers one of the most important problems of Illinois grain growers. Illinois farmers market more grain through their own farmers' elevators than any other state in the Union. There are about 600 farmers' elevators in the state, mostly in the northern two-thirds of the state, with the greatest density in distribution forming a block whose four corners are at Chicago, Danville, Moline and Alton. It is with the representatives of these elevators—the officers of the Farmers' Grain Dealers' associations of Illinois and Iowa and their national organization—that the Illinois Agricultural Association is co-operating to help develop a central sales agency to serve these local units, and to be owned and controlled entirely by them.

Such an organization will be co-operative in form and operation and will provide service for the farmers who market their grain through their own elevators, in all the principal markets. It will be the aim of this new company to assist in the movement of grain as directly as possible from the points of surplus to points of manufacture. This new company, known as the Rural Grain Company, has been incorporated and application has been made for a seat on the Chicago Board of Trade. The farmers' elevators who are participating in and directing this development which shall take them into the terminal markets, are hoping for a sound, normal growth into a great and strong national sales agency for the farmers' elevators.



Would Be Big Project

The magnitude of such a sales agency for farmers' elevators in Illinois alone, as suggested by the program of the I. A. A., is illustrated by the latest available information from the United States Department of Agriculture which credits Illinois farmers' organizations handling grain with an annual business of $52,446,000. This figure is 30 per cent above the amount of business done by the farmers' grain merchandising agencies in Iowa, whose rank in this respect is second. Estimates as to the share of the grain in the Chicago terminal market that is shipped there by local farmers' elevators vary from 65 to 80 per cent, and the truth is somewhere between.

In regard to the portion of the state where there are few farmers' elevators—approximately one-third in the southern section—the I. A. A. program has two possibilities of approach in solving the grain marketing problem. In certain parts of the southern division of the state it may prove advisable to follow the commodity pooling plan in which the farmer-members of a definite territory band themselves together under contract to market their entire crop of any one grain through an annual pool. This plan was followed by the Indiana Farm Bureau Federation when it organized the Indiana Wheat Growers Association two years ago. This year something over 220 farmers in four Illinois counties of the Wabash Valley district signed marketing contracts and have delivered over 130,000 bushels of wheat to the Indiana pool. It is possible that other counties in that portion of Illinois may find it advisable to co-operate with the Indiana wheat association in the future.

(Continued on page 2, col. 2.)

PICNIC GROUNDS

There are plenty of swinging rings, cross bars and other playground facilities of interest to young folks at Manner's Park, where the annual I. A. A. picnic will be held on Thursday, August 27.

Above at the left is a wading pool for children.

Below is the swimming pool for young and old. It's 2 feet deep at one end, and 9 at the other, and there's a bath house with bathing suits for rent, too.

Above at the right is a sample of the scenery around the little lake in the park.

TAYLORVILLE CALLS PARK WHERE I.A.A. PICNIC WILL BE HELD "MODERN GARDEN OF EDEN;" IT HAS 60 ACRES OF PLAYGROUND-STUDDED BEAUTY

Taylorville Is Less Than Hour's Ride Southeast of Springfield on State Hard Road System; Christian County Farm Bureau Anticipates Record-breaking Crowd; Special Features Planned

TAYLORVILLE calls it "The Modern Garden of Eden." "It" is Manner's Park, Taylorville's 60 acres of playground-studded hills and vales, and it has all the earmarks of being a modern Garden of Eden for the farm bureau members who attend the annual I. A. A. picnic which is to be held there Thursday, August 27.

The park is only five blocks from the central square, about which the little city is built. Its numerous shade trees promise comfort for those who wish to sit and talk; a nestling lake and cement pool with bathhouse and suits for rent offer swimming for young and old; a cement-lined wading pool of 10 inches depth extends a splashing diversion for energetic youngsters; tennis courts offer entertainment to racquet enthusiasts; permanent horseshoe courts and baseball diamond await their opportunity to say, "A state farm bureau championship was determined on me;" feeding facilities insure sustenance for the merrymakers who themselves produce the Public Necessity; dangling playground rings tantalize young and old to "skin-the-cat;" secluded benches at points overlooking the lake and adjacent vales are irresistible enticers to those who, perhaps, may wish to hide out a bit; and its 5,000-capacity auditorium nestles serenely between the trees in anticipation of housing the United States' official leader of Agriculture—Secretary Wm. M. Jardine when he delivers a message to the nation's ear through the picnicking representatives of this organization of 63,000 *thinking* farmers.

Close to Springfield

Tayorville, the county seat of Christian county, is less than an hour's drive south-east of Springfield on the state hard road system. It is pleasantly accessible by automobile from all directions. Is it not a "Garden of Eden" for picnickers?

These vales will echo and re-echo when the first state-wide hog and chicken calling contest is pulled off. Suitable prises will be given the winners.

The Christian County Farm Bureau will be host of the day. Committees appointed by President William Grimes have been and will continue throughout the picnic day to care for all details which go to make the event a pleasant one for everyone. Clair Hay, farm Adviser, is generalissimo of the machinery.

The committees charged with the responsibility of making the picnic the best and biggest in I. A. A. history are as follows:

Dinner and Concession Committee: Geo. Spates, chairman, W. S. Scott, H. J. Cuttle, Taylorville.

Music Committee: Dwight Hart, Sharpsburg; Dwight Mason, Edinburg; W. J. Palmer, Morrisonville; Glen Hunter, Owansco; Wm. Engleman, Nokomis.

Baseball Committee: M. S. Sadler, C. R. McCloskey, Edinburg; C. J. Curtin, Pawnee.

Horseshoe Pitching Committee: W. E. Holben, Geo. Wacker, Edinburg; John Daniels, Blue Mound; H. C. Hart, Palmer; D. C. Hall, Taylorville.

Parking and Policing Committee: Frank Willeg, Taylorville; P. T. Wallace, Assumption; Chris Munzenwain, Pana; Ike Evans, Millersville; Theo. Langen, Morrisonville.

Hog and Chicken Calling Committee: M. E. Gallagher, Taylorville; I. A. Madden, Springfield.

Install Amplifiers at Picnic So Voice Can Be Borne to 75,000 People

"No need staying away from the I. A. A. picnic because you fear you can't hear Secretary Jardine's voice in the big crowd that is expected," says Billy Grimes, president of the Christian County Farm Bureau.

"We have contracted for the use of a Western Electric Public Address System from St. Louis so that as many as 75,000 people can hear all that is being said.

"The manager, Mr. O'Neil, was in Manners Park recently taking measurements. He is satisfied that the acoustic properties of the auditorium are good and that there will be a splendid job of reproduction."

Illinois' Soft Wheat Being Pooled Is Best Grade, Official Says

Illinois soft wheat delivered to the Indiana Wheat Growers Association this year has been of unusually fine quality. The bulk of the wheat has been grading No. 1 and the balance nearly all No. 2, according to a progress report made by Herman Steen, secretary of the Indiana wheat pool, to Chester C. Davis, director of the I. A. A. grain marketing department.

This is the first year that Illinois farmers of the soft wheat district have marketed their wheat through the Indiana organization and already something over 130,000 bushels have been delivered by approximately 220 members in Gallatin, White, Edwards and Wabash counties.

The Indiana wheat association is fostered by the Indiana Farm Bureau Federation and, with the I. A. A. co-operating, provides a co-operative outlet for the soft wheat growers in southern Illinois where there are relatively few farmers' elevators.

Jardine Sends Word He'll Sure Be Here To Speak at Picnic

It is assured that Secretary Jardine will be present to make the principal address at the I. A. A. annual picnic, Taylorville, August 27, according to a recent letter from F. M. Russell, personal secretary to the Secretary of Agriculture.

The Secretary is now in the Walter Reed hospital in Washington resting from his recent trip through the West and taking treatment for stomach disorders from which he has suffered slightly for the past few years. The illness is not serious and he is making every plan to be in Illinois on August 27.

"This information is given you so that the press reports may not be disturbing," writes Mr. Russell.

Farmers in Debate Regarding Best Way To Call Hungry Hogs

Is it "whooey, whooey" or "pooey, pooey?"

This question is a much mooted argument among farm bureau members throughout the state these days. Provocation of the discussion came from an editorial of a Chicago newspaper which commended the idea of a state-wide hog and chicken calling contest as a feature of the I. A. A. annual picnic, which is to be held at Taylorville, August 27.

The editorial started, "There are lots of things prisoners of the city do not know. But any one who has ever heard 'pooey, pooey' roaring across the quarter sections will know that a hog calling contest can have its Ravinia or Civic Opera strain."

Some farmers vigorously deny that hog callers say "pooey, pooey," claiming it is "whooey, whooey."

"What's the difference as long as the hogs come when called?" William Grimes, president of the Christian County Farm Bureau wants to know.

Freight Rate Problem Given General Airing By Executives Aug. 7

Consideration of the proposed 11 per cent increase in freight rates took the major portion of the executive committee's meeting of August 7. The highlights of the day are as follows:

1. Financial report approved and placed on file.

2. Report of L. J. Quasey, director of the transportation department, resulted in resolution being passed authorizing close co-operation with the Illinois Commerce Commission in an effort to forestall the proposed increase in freight rates. Full discussion, with lots of fight, I. A. A.'s major stand is that farmers can't afford to pay higher rates.

3. Report by Mr. Quasey on Galesburg-Galva case wherein Illinois Commerce Commission granted plea of I. A. A. and Knox County Farm Bureau changing course of transmission line to one favored by farmers. Hereafter the Commission will notify the Illinois Agricultural Association before granting a certificate of convenience and necessity to a public utility for right-of-way. In the past the farmers have not been consulted.

4. Wm. H. Malone, chairman of the state tax commission, addressed the committee. Favors tax re-adjustments for farmers.

5. Report of advisory committee to the fruit and vegetable department stated that because of numerous inquiries concerning the possibility of buying potatoes through the Illinois Fruit Exchange, the Exchange would give service if there is sufficient demand. The service is to be given to organizations affiliated with the farm bureaus, for the benefit of members. Report received and approved.

6. Report of phosphate-limestone department told of increased demand for limestone and phosphate. More quarry companies co-operating on rebates of 10 cents per ton to farm bureau members.

7. Next meeting to be at annual picnic at Taylorville, but next regular meeting will be in Chicago the first Friday of September as usual. Farm Bureau members are always welcome.

HERE'S REPORT ON HOW TORNADO FUND IS BEING APPLIED

Illinois Farm Relief Committee Has Turned $50,000 of $181,081.97 Over to Red Cross, Specifying Use.

By R. A. Cowles, Chairman.

The accompanying figures are intended to serve as a report on the progress of rehabilitation in the storm area, and particularly in southern Illinois, in charge of the American Red Cross. The figures used, other than those appearing under the Condensed Statement covering the Illinois Farm Relief Fund, were received from the American Red Cross.

Missouri-Illinois-Indiana Relief Appropriations Totaling $1,000,000.00 Which Figure Was Reached on June 18th, 1925

Missouri	Illinois	Indiana	Total
$61,050.00	$753,600.00	$185,350.00	$1,000,000.00

Missouri-Illinois-Indiana Tornado Relief
Report Ending June 20, 1925

	Amount Appropriated	Amount Disbursed	Total Appropriated	Total Disbursed
State of Missouri			$ 51,090.00	$ 18,691.71
State of Illinois				
Bush Area	$ 23,519.19	$ 12,005.00

Condensed Statement of Receipts and Disbursements Illinois Farm Relief Fund
At July 27, 1925

Receipts:		
Total received through Farm Bureaus		$152,327.17
Total received from other sources		28,754.80
		$181,081.97
Disbursements:		
Fencing material	$ 2,623.40	
Seed	3,883.23	
Feed	855.12	
Chicks	1,801.85	
Farm equipment	722.47	
American National Red Cross transmitted under specific Memorandum Agreement limiting its use to	50,000.00	
Refund to adjust remittance received, made in error	14.88	
Power farm equipment for use and re-sale	2,430.00	62,130.98
Balance in Fund		$118,950.99
		$181,081.97

Cowles Comments on Figures

Some conception of the magnitude of the undertaking by the American Red Cross may be obtained by careful reference to these reports. Based upon actual appropriations to date of the reports, funds available as of that date, and the number of cases waiting disposal, some idea may be had of time and funds required to complete the program.

It will be of interest to note that on June 18th, exactly three months after the date of the disaster (March 18, 1925) that there had been set up on the books of the American Red Cross actual appropriation of funds to tornado sufferers in the amount of one million dollars, evidencing the authorized purchase of requirements for beneficiaries in this amount.

Agreement on How to Be Spent

It was also on this date that the Memorandum Agreement was entered into between the Illinois Farm Relief Committee by its chairman and the American Red Cross by its director of disaster relief, covering the transmittal of funds from the Illinois Farm Relief Committee to the American Red Cross, and restricting and limiting the use of all funds so transmitted, according to the purposes and objects for which contributed by their donors. The sum shown on the statement, as having been transmitted and other sums to be transmitted as needed, are to be expended by the American Red Cross as additional funds and in addition to actual expenditures, commitments and appropriations to the date of the Memorandum Agreement (June 18, 1925).

48 Per Cent of Cases Closed

The Consolidated Report for all areas at July 17, 1925 showing, by computation, 48 per cent of the total registered cases in Illinois as closed, —four months after the date of the storm.

The disbursements made from the Illinois Farm Relief Fund other than the item to the American Red Cross and the item covering the purchase of power farm equipment for use in re-sale, represent direct purchases of certain requirements for beneficiaries in the earlier efforts of the Committee to place the farmer beneficiaries and the farms on a producing basis for the present crop season. The American Red Cross are required under the terms of the Memorandum Agreement to segregate and properly and fully account for all funds received from the Illinois Farm Relief Committee. The War Department finally audits all books of account and records of the American Red Cross in this and all other disasters. The purchases of power farm equipment were necessary to assure seasonable plowing in part of the area. The proceeds will be returned to the fund as this equipment is resold.

The Illinois Agricultural Association, as its contribution, is taking care of all administration expenses of the fund, necessary field expenses, and other expenses, so that the fund in toto is available for the relief program.

Red Cross in Charge

So that those who are unacquainted with the Illinois area may have the proper information at hand in considering the reports: The disaster work in the entire Missouri-Illinois-Indiana area is administered by the American Red Cross from a central office located at Murphysboro, functioning through local area offices in charge of actual case work. Each local area office, as the term implies, has charge of the work in a certain limited immediate territory.

The Illinois area in this manner is subdivided into the following local areas: Gorham, Murphysboro, DeSoto, all in Jackson county; Bush in the extreme corner of Williamson county; West Frankfort in Franklin county; McLeansboro in Hamilton county, and Carmi in White county. The disaster involved exclusively rural areas in Hamilton and White counties. In the other counties in Illinois, town losses were involved in addition to the rural losses suffered.

Figures Reflect Heavy Urban Damage

The town of Gorham was practically demolished and the storm damage at DeSoto involved all but the southeastern portion of the village. The storm damage at Bush covered the extreme north portion of the town, and adjoining territory. The terrific and extensive destruction done by the storm and losses of property at Murphysboro and West Frankfort is no doubt well known to all and is further reflected in the financial reports. In Franklin county, in addition to the extensive losses in West Frankfort, the village of Parish was completely destroyed.

Both the vice-chairman, Mr. Curt Anderson of Xenia, and the chairman of the Illinois Farm Relief Committee have given the work, as required from time to time, their personal attention, and are continuing to do so

REPORT SAYS AUGUST WILL BE GOOD MONTH TO BUY DAIRY COWS

Your County Farm Bureau Has Information From I. A. A. Telling Best Places To Buy.

Where can I get some good milk cows?

This is the question that enters the dairyman's mind about as soon as he has disposed of his T. B. reactors or culled out his unprofitable milkers.

"Some farmers may have the impression that milk cows are apt to be scarce and rather high priced this fall," states a report sent to all farm advisers in the state by the dairy and live stock marketing departments, which are jointly handling the t. b. eradication project of the I. A. A. In sections where surplus cows can be purchased cheese making is the chief outlet for milk. Cheese has been a good price this year. Naturally every dairyman will keep his cows as long as possible, especially with cheese milk ranging from $1.90 to $2.10 per cwt. In such sections everybody has been hanging onto their cows.

Good Selections in August

"The question of feed and housing for the coming winter will soon put surplus cows in Minnesota, Wisconsin and Ohio on the market. Recent inspection tours by the Illinois Agricultural Association found that there will be available a good selection to choose from the latter part of August and early September. This will be a good time to pick up springers to milk this fall and next winter. The prices will run quite consistently with the age and quality of the cows. Every Illinois buyer should be sure that he is buying cows that are free from tuberculosis and abortion. It is possible in many instances to obtain cows with cow test association records.

"It is a good idea for several farmers wishing to make up a carload of cattle to make the buying tour together. The I. A. A., through the county Farm Bureaus, can tell members where good milk cows can be purchased. By seeing personally where your cows come from and having taken a part in the dickering, farmers will be more satisfied. And this direct contact helps shorten the road from seller to buyer."

FARM BUREAUS FIGHT FREIGHT RATE BOOST

(Continued from page 1, col. 5.)

ity of farmers to stand an increased freight rate at this time will be thoroughly understood at the hearing."

Direction of the case for the American Farm Bureau will be in the hands of Frank Evans, secretary and general marketing counsel, and O. W. Sandberg, director of transportation of the American Farm Bureau — together with the aid and assistance of state farm bureau officers and such experts as may be called in.

The railroads have not yet specified the exact percentage of increase they will ask. They have simply filed petition asking that rates be so adjusted that the railroads will receive a 5¾ per cent return on their valuation. However, the July 11 issue of the Railway Age, of which Samuel O. Dunn, spokesman of the railroads, is editor, in an editorial states that the railroads fell short of this 5¾ per cent by $181,000,000 in 1924. To make up this deficit it is estimated would require an 11 per cent increase over present rates.

Commenting on the action of the American Farm Bureau, President Bradfute said:

"Three years ago this organization in working to relieve this serious economic situation confronting agriculture discovered that high freight rates were one of the factors which were keeping agriculture at the bottom of the pile. At that time we went before the public and to the Interstate Commerce Commission and asked that agriculture be relieved.

"A Basic Industry"

"We showed to the satisfaction of the Commission that freight rates did have an important part in the economic condition of agriculture. We established the fact that farming was a basic industry and that unless agriculture was restored to a prosperous condition, industries and railroads alike would suffer.

"Some relief was obtained. Then the railroads came to us. They told us that their properties had been returned to them by the Government in a most impaired condition. That in order that good service be established it was necessary that these properties be put into good shape. This, they said, could not be done if rates were further reduced.

"We agreed to this and forbore asking for further reductions. The farmer was willing to bear his share of the load of reconstruction. The railroads did put their property in good shape and now on the strength of this improved property and the outlay which was necessary to make these improvements they dare to ask for increased rates. The Farm Bureau will fight that proposal until the proposal is killed."

Annual Meet at Flora Ends Successful Year For Red Top Growers

Another successful year of marketing red top seed co-operatively for approximately 800 farmers in southern Illinois through the Egyptian Seed Growers Exchange at Flora was closed and another one begun when the annual meeting was held in the warehouse at Flora, July 14.

Gross receipts from sales during the year amounted to $181,415.79, with total cost of operations at $24,399.17, leaving the net receipts to the growers for 1,471,726 pounds of seed handled at $157,016.62, according to the financial statement. Advances to growers upon delivery of seed amounted to $118,913.26. The remainder, amounting to $38,103.36, was distributed to the grower members shortly after March 1.

The average price obtained by the members by co-operating, was above the average level of prices received by farmers who sold directly to private buyers, according to figures of the United States Department of Agriculture. The co-operative handled sufficient volume to be a strong force in maintaining a higher general price level than would exist if there were no farmers' organization in the business.

Raised Price Level

"Since about 95 per cent of the world's crop of red top is grown in this eight-county area which is served by the Egyptian Seed Growers Exchange," says Curt Anderson, general manager, "and the Exchange handles approximately 50 per cent of all the red top grown in the area, it is in a good position to exert an unusual influence in raising the price all farmers receive."

Selection of directors resulted in the election of the following new directors: O. B. Scrivner of Jefferson county, Marshall C. Smith of Wayne county, and J. M. Luse of Clay county. In addition, W. L. Cope of Salem, who succeeded J. E. Lingenfelter of Lawrenceville, was elected to the board representing the Illinois Agricultural Association.

"We feel that the meeting as a whole was a real success for the reason that a great many members entered into the various discussions, which resulted in a better understanding between members and management," said Curt Anderson, secretary-treasurer and general manager. "Although the red top crop is only about 50 per cent of normal this year, we expect to carry on in good shape."

MRS. JAMES PICTURES FUN CITY KIDS ENJOY IN HELPING DO CHORES

Her Letter Like Many Requests Coming in For Poor Slum Children, But Many More Needed. Will You Help?

"I imagine feeding the chickens and cow would be fun for little city children," writes Mrs. Wm. Pierce James of Galesburg, in her request for two youngsters from the Chicago slums for a two week's outing in the country. Mr. and Mrs. James have four children of their own, so they know how delighted and "important" the little ones feel when they are allowed to "help with the chores" — especially for the first time. Mrs. James is right in thinking that the city children, who know much of motor trucks and street cars and very little of cows and pigs, would have fun scattering grain to the greedy hens and poking fodder into "bossy's" manger. That would be a vacation and an education all in one.

Mr. and Mrs. G. H. Jacobs of St. Francisville, are giving a joyous vacation to four children who have five other brothers and sisters in the Chicago tenement district. The father of this family has been out of work for many weeks, so, in addition to the fresh air and sunshine and the delight of fields and pastures which these poor youngsters are enjoying, they are no doubt actually getting the first "square meals" they have had for a long time. It is hard for country people to realize the number of under-nourished children there are in the city, even in times of prosperity.

Other Kind Hearted People

Others who have asked that children be sent them are:

Mrs. J. P. Leach, Pontiac, 1; Mrs. Alfred Rohu, Tuscola, 1; Mrs. Haus Helt, Arthur, 2; Mrs. Gus Engelhardt, Compton, 2; Mrs. Jacob Schilling, Hanna, 1.

Many places have been provided for outings for the slum kiddies, through the generosity of farm bureau folks, but hundreds of the little folks are still waiting, hoping that this summer they will have a chance to spend two wonderful weeks in the country. Won't you folks who read this, and who live within 200 miles of Chicago, help them to realize their dreams by taking one or more for a two-weeks outing? All you need to do is to drop a line to our Outing Secretary, stating the number you want and the time it would be most convenient for them to come. The children will be delivered to the station nearest you. The United Charities of Chicago will see that they are clean and will assume all responsibility.

Remember—Outing Secretary, I. A. A., 608 S. Dearborn St.

Warns Against Fraud in Stranger's "Life Membership" Scheme

A life membership in a "Better Farming Association" at the attractive price of $8 was the offer recently of a stranger to several farmers in Woodford county, according to a report of H. A. deWerff, farm adviser, to W. H. Smith, state leader of farm advisers, at the University of Illinois.

"We know nothing of a so-called Better Farming Association. No one authorized to use name of Illinois Agricultural College in any such connection. Secure definite information if possible and assist in stopping this fraud," wrote W. H. Smith, state leader to all farm advisers.

And neither are any such persons authorized to use the name of the Illinois Agricultural Association.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Volume 3 | Issued Every Other Saturday for 63,000 *thinking* Farmers—August 15, 1925 | No. 16

GRAIN MARKETING PROGRAM OF I.A.A. CONSISTS OF THREE CHIEF LINES OF ENDEAVOR WHICH CONCERN IMPORTANT PROBLEMS OF GROWERS

Principal Aim Is to Assist Farmers' Elevators in Formation of a Collective General Sales Agency for the Handling of Their Grain in All Markets and to Help Strengthen Farmers' Elevators

THE grain program of the Illinois Agricultural Association contains three principal phases of endeavor, according to Chester C. Davis, head of the grain marketing department of the I. A. A., in his definition of the grain policy of the association and as concurred in by the executive committee.

"Briefly," states Director Davis, "the grain program of the association aims to assist the farmers' elevators in the formation of a collective general sales agency for the handling of their grain in all markets; to co-operate in the growth and improvement in service of the local farmers' elevators and other local co-operative grain handling associations; and to assist the farmers in districts not served by farmers' elevators along the path of collective marketing of their grain."

This program covers one of the most important problems of Illinois grain growers. Illinois farmers market more grain through their own farmers' elevators than any other state in the Union. There are about 600 farmers' elevators in the state, mostly in the northern two-thirds of the state, with the greatest density in distribution forming a block whose four corners are at Chicago, Danville, Moline and Alton. It is with the representatives of these elevators—the officers of the Farmers' Grain Dealers' associations of Illinois and Iowa and their national organization—that the Illinois Agricultural Association is co-operating to help develop a central sales agency to serve these local units, and to be owned and controlled entirely by them.

Such an organization will be co-operative in form and operation and will provide service for the farmers who market their grain through their own elevators, in all the principal markets. It will be the aim of this new company to assist in the movement of grain as directly as possible from the points of surplus to points of manufacture. This new company, known as the Rural Grain Company, has been incorporated and application has been made for a seat on the Chicago Board of Trade. The farmers' elevators who are participating in and directing this development which shall take them into the terminal markets, are hoping for a sound, normal growth into a great and strong national sales agency for the farmers' elevators.

Would Be Big Project

The magnitude of such a sales agency for farmers' elevators in Illinois alone, as suggested by the program of the I. A. A., is illustrated by the latest available information from the United States Department of Agriculture which credits Illinois farmers' organizations handling grain with an annual business of $52,445,000. This figure is 30 per cent above the amount of business done by the farmers' grain merchandising agencies in Iowa, whose rank in this respect is second. Estimates as to the share of the grain in the Chicago terminal market that is shipped there by local farmers' elevators vary from 65 to 80 per cent, and the truth is somewhere between.

In regard to the portion of the state where there are few farmers' elevators—approximately one-third in the southern section—the I. A. A. program has two possibilities of approach in solving the grain marketing problem. In certain parts of the southern division of the state it may prove advisable to follow the commodity pooling plan in which the farmer-members of a definite territory band themselves together under contract to market their entire crop of any one grain through an annual pool. This plan was followed by the Indiana Farm Bureau Federation when it organized the Indiana Wheat Growers Association two years ago. This year something over 220 farmers in four Illinois counties of the Wabash Valley district signed marketing contracts and have delivered over 130,000 bushels of wheat to the Indiana pool. It is possible that other counties in that portion of Illinois may find it advisable to co-operate with the Indiana wheat association in the future.

(Continued on page 3, col. 2.)

PICNIC GROUNDS

There are plenty of swinging rings, cross bars and other playground facilities of interest to young folks at Manner's Park, where the annual I. A. A. picnic will be held on Thursday, August 27.

Above at the left is a wading pool for children.

Below is the swimming pool for young and old. It's 2 feet deep at one end, and 9 at the other, and there's a bath house with bathing suits for rent, too.

Above at the right is a sample of the scenery around the little lake in the park.

TAYLORVILLE CALLS PARK WHERE I.A.A. PICNIC WILL BE HELD "MODERN GARDEN OF EDEN;" IT HAS 60 ACRES OF PLAYGROUND-STUDDED BEAUTY

Taylorville Is Less Than Hour's Ride Southeast of Springfield on State Hard Road System; Christian County Farm Bureau Anticipates Record-breaking Crowd; Special Features Planned

TAYLORVILLE calls it "The Modern Garden of Eden." "It" is Manner's Park, Taylorville's 60 acres of playground studded hills and vales, and it has all the earmarks of being a modern Garden of Eden for the farm bureau members who attend the annual I. A. A. picnic which is to be held there Thursday, August 27.

The park is only five blocks from the central square, about which the little city is built. Its numerous shade trees promise comfort for those who wish to sit and talk; a nestling lake and cement pool with bathhouse and suits for rent offer swimming for young and old; a cement-lined wading pool of 10 inches depth extends a splashing diversion for energetic youngsters; tennis courts offer entertainment to racquet enthusiasts; permanent horseshoe courts and baseball diamond await their opportunity to say, "A state farm bureau championship was determined on me;" feeding facilities insure sustenance for the merrymakers who themselves produce the Public Necessity. Jangling playground rings tantalize young and old to "skin the cat;" secluded benches at points overlooking the lake and adjacent vales are irresistible enticers to those who, perhaps, may wish to hide out a bit; and its 5,000-capacity auditorium nestles serenely between the trees in anticipation of housing the United States' official leader of Agriculture. Secretary Wm. M. Jardine when he delivers a message to the nation's ear through the picnicking representatives of this organization of 63,000 *thinking* farmers.

Close to Springfield

Taylorville, the county seat of Christian county, is less than an hour's drive south-east of Springfield on the state hard road system. It is pleasantly accessible by automobile from all directions. Is it not a "Garden of Eden" for picnickers?

These tales will echo and re-echo when the first state-wide egg and chicken calling contest is pulled off. Suitable prizes will be given the winners.

The Christian County Farm Bureau will be host of the day. Committees appointed by President William Grimes have been and will continue throughout the picnic day to care for all details which go to make the event a pleasant one for everyone. Clair Hay, farm Adviser, is generalissimo of the machinery.

The committees charged with the responsibility of making the picnic the best and biggest in I. A. A. history are as follows:

Dinner and Concession Committee: Geo. Spates, chairman; W. Scott, H. J. Cutti- Taylorville.

Music Committee: Dwight Hart Sharpsburg; Dwight Mason, Edinburg; W. J. Palmer Morrisonville; Glen Hunter, Owaneco; Wm. Engleman, Nokomis.

Baseball Committee: M. Sadler, C. E. McCloskey, Edinburg; C. J. Curtin, Pawnee.

Horseshoe Pitching Committee: W. E. Holben, Geo. Wacker, Edinburg; John Dawes, Blue Mound; H. C. Hart, Palmer; D. C. Hall, Taylorville.

Parking and Policing Committee: Frank White, Taylorville; F. T. Wallace, Assumption; Chris Munzenmaier, Pana; Ike Evans, Millersville; Thos. Lanson, Morrisonville.

Hog and Chicken Calling Committee: H. E. Gallagher, Taylorville; I. A. Madden, Springfield.

Install Amplifiers at Picnic So Voice Can Be Borne to 75,000 People

"No need staying away from the I. A. A. picnic because you fear you can't hear Secretary Jardine's voice in the big crowd that is expected," says Billy Grimes, president of the Christian County Farm Bureau.

"We have contracted for the use of a Western Electric Public Address System from St. Louis so that as many as 75,000 people can hear all that is being said.

"The manager, Mr. O'Neil, was in Manners Park recently taking measurements. He is satisfied that the acoustic properties of the auditorium are good and that there will be a splendid job of reproduction."

Illinois' Soft Wheat Being Pooled Is Best Grade, Official Says

Illinois soft wheat delivered to the Indiana Wheat Growers Association this year has been of unusually fine quality. The bulk of the wheat has been grading No. 1 and the balance nearly all No. 2, according to a progress report made by Herman Steen, secretary of the Indiana wheat pool, to Chester C. Davis, director of the I. A. A. grain marketing department.

This is the first year that Illinois farmers of the soft wheat district have marketed their wheat through the Indiana organization and already something over 130,000 bushels have been delivered by approximately 220 members in Gallatin, White, Edwards and Wabash counties.

The Indiana wheat association is fostered by the Indiana Farm Bureau Federation and, with the I. A. A. co-operating, provides a co-operative outlet for the soft wheat growers in southern Illinois where there are relatively few farmers' elevators.

Jardine Sends Word He'll Sure Be Here To Speak at Picnic

It is assured that Secretary Jardine will be present to make the principal address at the I. A. A. annual picnic, Taylorville, August 27, according to a recent letter from F. M. Russell, personal secretary to the Secretary of Agriculture.

The Secretary is now in the Walter Reed hospital in Washington resting from his recent trip through the West and taking treatment for stomach disorders from which he has suffered slightly for the past few years. The illness is not serious and he is making every plan to be in Illinois on August 27.

"This information is given you so that the press reports may not be disturbing," writes Mr. Russell.

Farmers in Debate Regarding Best Way To Call Hungry Hogs

Is it "whooey, whooey" or "pooey, pooey?"

This question is a much mooted argument among farm bureau members throughout the state these days. Provocation of the discussion came from an editorial of a Chicago newspaper which commended the idea of a state-wide hog and chicken calling contest as a feature of the I. A. A. annual picnic, which is to be held at Taylorville, August 27.

The editorial started, "There are lots of things prisoners of the city do not know. But any one who has ever heard 'pooey, pooey' roaring across the quarter sections will know that a hog calling contest can have its Ravinia or Civic Opera strain."

Some farmers vigorously deny that hog callers say "pooey, pooey," claiming it is "whooey, whooey."

"What's the difference as long as the hogs come when called?" William Grimes, president of the Christian County Farm Bureau wants to know.

Freight Rate Problem Given General Airing By Executives Aug. 7

Consideration of the proposed 11 per cent increase in freight rates took the major portion of the executive committee's meeting of August 7. The highlights of the day are as follows:

1. Financial report approved and placed on file.

2. Report of L. J. Quasey, director of the transportation department, resulted in resolution being passed authorizing close co-operation with the Illinois Commerce Commission in an effort to forestall the proposed increase in freight rates. Full discussion, with lots of fight, I. A. A.'s major stand is that farmers can't afford to pay higher rates.

3. Report by Mr. Quasey on Galesburg-Galva case wherein Illinois Commerce Commission granted plea of I. A. A. and Knox County Farm Bureau changing course of transmission line to one favored by farmers. Hereafter the Commission will notify the Illinois Agricultural Association before granting a certificate of convenience and necessity to a public utility for right-of-way, in the past the farmers have not been consulted.

4. Wm. H. Malone, chairman of the state tax commission, addressed the committee, favors tax readjustments for farmers.

5. Report of advisory committee to the fruit and vegetable department stated that because of numerous inquiries concerning the possibility of buying potatoes through the Illinois Fruit Exchange, the Exchange would give service if there is sufficient demand. The service is to be given to organizations affiliated with the farm bureaus, for the benefit of members. Report received and approved.

6. Report of phosphate-limestone department told of increased demand for limestone and phosphate. More quarry companies co-operating on rebates of 10 cents per ton to farm bureau members.

7. Next meeting to be at annual picnic at Taylorville but next regular meeting will be at Chicago the first Friday of September as usual. Farm Bureau members are always welcome.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Published every other Saturday by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by Department of Information, Harry C. Butcher, Director.

Entered as second class matter Oct. 10, 1921, at the post office at Chicago, Illinois, under the act of March 3, 1879. Acceptance for mailing at special rates of postage provided for in Section 1103, Act of October 3, 1917, authorized Oct. 31, 1921.

The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record.

Postmaster: In returning an unsalled-for or missent copy, please indicate key number on address as is required by law.

OFFICERS

President, S. H. Thompson, Quincy.
Vice-President, H. E. Goembel, Hooppole.
Treasurer, R. A. Cowles, Bloomington
Secretary, Geo. A. Fox, Sycamore.

THE RECORD'S PLATFORM

Advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, social and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Quit Kidding Us

EVIDENTLY certain species of the city press are trying to tickle the agricultural Mid-West in the ribs in an effort to bring forth a hilarious laugh of prosperity. We want prosperity, and we want it badly, but we don't want to kid ourselves into a situation that is not true.

A true picture of the situation can be obtained in a moment if you will study the above chart. It shows the [illegible] of farm and wholesale prices of agricultural products, wholesale prices of nonagricultural products, and the ratio of farm prices to wholesale prices of non-agricultural products, as presented by the United States Department of Agriculture.

Note that the purchasing power of the farmer's dollar is at 90. While this is some improvement over previous conditions, there are still 10 points to go before the farmer's dollar is worth as much in things it will buy as will the dollar of other industries.

It's the old story of the farmer's dollar being like a car with a slipping clutch, while the dollar of other industries uses the same power motor, but brings in more mileage because it has a three-in-one gear.

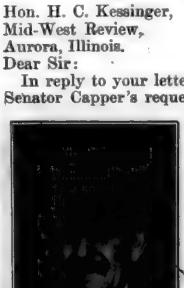
One of the biggest problems of organized agriculture, and of the nation (if it will only realize it) is to assist these dollars to get on and stay on an equal basis.

If the city press would quit trying to kid the public into believing that all's well, there would be more progress toward gaining a permanent, stable, well-being for Agriculture.

—o—

What the Mid-West Needs

WHAT are the three most important things that can be done for advancing the Middle West?



President Sam H. Thompson states his opinion on this subject in the August issue of Kessinger's Mid-West Review, which is published at Aurora by State Senator Harold C. Kessinger.

President Thompson's statement follows:

Quincy, Ill., July 16, 1925.

Hon. H. C. Kessinger,
Mid-West Review,
Aurora, Illinois.
Dear Sir:

In reply to your letter asking me to help answer Senator Capper's request as to what the three big things are that would be of the most benefit to the Mid-West, I beg leave to submit the following in order as to their importance, in my opinion:

President Thompson

1. **More Efficient Distribution.**—This applies to both agriculture and manufactured products. Not less efficiency in production, but more emphasis on distribution, which will give the producers who are carrying the major part of the load more of the consumer's dollar. Especially would we apply this to the products of the farm, agriculture being the basic industry of the U. S., the Mid-West, the heart of American agriculture, and the bread basket of the world. This makes the subject of more efficient distribution of tremendous importance to the prosperity of the whole nation.

2. **Taxation or Revenue Reform.**—There is tremendous need for a taxing system in the Mid-West states that is uniform—one that will spread more equally the burden of government over all the people who enjoy the benefits and protection of same, according to the ability to pay. Progress and prosperity await the application of tax reform and administration of revenue laws on the basis of a square deal to all.

3. **Transportation.**—That will involve the completion of the St. Lawrence Deep Water Way, thus giving the Mid-West a Sea Board in the center of agricultural production, which will result in a great saving in transportation cost. It would also offer opportunities for the development of industry along manufacturing lines. Freight rates are in need of adjustment that will insure service at the lowest minimum of cost, which will require a complete survey of the whole subject of transportation, recognizing the right of all in a fair and impartial manner. The accomplishment of these things will bring lasting prosperity to the Mid-West.

Yours very truly,
S. H. THOMPSON.

—o—

Expressions on Freight Rates

Dear Sir: In reply to your letter, I would say that I think freight rates are too high now, and would like to see the Illinois Agricultural Association put up a bitter fight against any increase.—Daniel McCulloch, Winnebago, Winnebago county.

Dear Sir: In answer to your letter of the 17th of July in regard to freight rates, we farmers of Lee county think we are carrying all the load we can at present. While conditions are some better, they are far from good. Farms are for sale in numbers, mostly mortgaged for all they are worth.

The boys are refusing to stay on the farms. They say that they put in too many hours in the day for what they receive, compared to the city boys. We farmers that have our own help can make out fairly well, but the ones that have to hire have tough sledding.—A. H. Montavon, Sublette, Lee county.

Dear Sir: In reply to your letter on the proposed increase in freight rates. I shall say, as a farmer in this county, I would like to have you do everything within your power to prevent this increase for it will mean a lot to the farmers of this county. We have to pay freight on all of our produce shipped out of the county and indirectly have to pay freight for what we buy. Our Farm Bureau has shipped out through their Live Stock Shipping Association 259 cars of live stock during the past year. We have shipped into the county 15 cars of tankage, also 45 cars of limestone and small amounts of various other things such as seeds. You can see that an 11 per cent increase in freight rates would mean much to the farmers of this county.

I am sure that I am speaking the sentiment of all the farmers of this county and we shall greatly appreciate anything our Association can do to prevent this proposed increase going into effect.—Herman Kilver, Winchester, Scott county.

Dear Sir: Replying to your letter of the 17th in regard to the Western railroads beginning a fight for an increase in freight rates. I think we should vigorously oppose any raise in freight rates on agricultural commodities. I consider it unjust and an added burden that we should not be asked to bear because of the economic conditions confronting agriculture. It will be easier to oppose a raise than to wait until a raise has been made and then get a reduction. I trust that organized agriculture will be able to put up a strong fight. I will be pleased to give whatever help I can.—J. S. McDonald, Mt. Vernon, Jefferson county.

Dear Sir: Replying to your letter of July 17, addressed to the Voting Delegates, I assure you that we are very vitally interested in opposing any increases in freight rates.

It occurs to us that it would be entirely out of line with the general tendency of the times for the railroads to expect any increases of tariffs now. Practically everything is on a decline; even labor is very materially reduced; and it would be most inopportune, in view of the condition of the farmer now and for the past five years, to thrust upon him such heavy penalties as an eleven per cent increase in freight rates.

I want to urge the Illinois Agricultural Association to do everything in its power to prevent such increases.

The cost of marketing and the cost of other products as compared to the prices received for farm products has already forced the farmer to the wall.—G. W. Lenhart, President, Vermilion County Farm Bureau, Danville.

"I believe the railroads should have sufficient revenue to give adequate service, but I don't think an increase at this time is justified, considering the farmers' financial condition," stated Chas. R. Finley, formerly president of the Vermilion County Farm Bureau, when in the I. A. A. office recently.

Dear Sir: Your letter of July 17 has been gladly received. I am pleased to do anything I can as a voting delegate to aid the I. A. A.

As to the railroad situation, I have been thinking for some time that I should tell someone my feelings about this.

The railroads are up against a strong competition with the automobile and truck. It seems to me that they should meet this competition in the natural way, and that is by reducing their rates and increasing their service. This seems to be just the opposite to what they are doing. For instance, the passenger train service is getting to be very disgusting to the traveling public. On the Wabash they used to have a train that was called the "Accommodation train." It would run to Chicago in the morning and return late in the afternoon, but now the train to Chicago leaves Emington at 2:15 P. M. and a train comes from Chicago arriving at Emington about 2:30 P. M. What is the result? We are 75 miles from Chicago and can drive it by auto in less than three hours and return the same day.

Another little incident which occurred on the branch of the I. C. between Kempton and Minonk. The passenger train had been scheduled to leave Pontiac going East at 4:30 P. M. This spring the railroad officials changed the schedule so that this train would leave Pontiac at 4:15 P. M. Just early enough so that the student would have to cut the last period of his class work to make the train. The result was that we drove by auto and brought our daughter home so she could stay and finish her class work for the day.

The same competition is going to be met with the auto truck. If they have rates increased this will make it more profitable for the truck and there will be more truck service as the hard roads increase. The natural way for the railroads to do would be to reduce the rates and the trucks would load the trains at the most convenient point and all would prosper.

If there is anything further I can do to be of service to our farm organization, I will be pleased to co-operate with you.—Isaac J. Gallup, Emington.

JOHN THINKER AND EPIDERMIS FLINT. (John's a Loyal Farm Bureau Member. Epidermis is "Agin" It) **Making Ep Ponder.**

20TH DISTRICT HEARS OF I. A. A. ACTIVITIES FROM FOUR DIRECTORS

Meeting at Jacksonville of Farm Bureau Leaders Reflects Strength of Movement in These Counties.

First-hand information concerning what the I. A. A. is doing in its departments of organization, phosphate - limestone, taxation and statistics, and information, was obtained by 65 representatives of the Farm Bureaus of Cass, Menard, Scott, Jersey, Pike, Greene, Brown and Morgan counties when the second 20th district conference of the year was held at Jacksonville, July 30. Mason county's delegation was stopped by rain.

Earl C. Smith

Earl C. Smith of Detroit, Pike county, executive committeeman for the district, officiated and absorbed the farm bureau leaders' desires in order to reflect them later to the rest of the I. A. A. executive committee. C. S. Black of Jacksonville, president of the Morgan County Farm Bureau, was elected chairman for the day, and Guy H. Husted, farm adviser of the Cass County Farm Bureau, served as secretary.

Membership Increasing Says Metzger

"Farmers are joining and rejoining the Farm Bureau this year in our renewal campaigns with a better and clearer idea than ever before as to what it is all about," stated George E. Metzger, director of organization. "The counties which are conducting renewal campaigns this year, and which have progressed to a point where we can tell the extent of membership, report increases. These range from 10 to 25 per cent of the old membership, and average about 15 per cent."

"The wealth of nation lies in the fertility of her soil," said J. R. Bent, director of the phosphate-limestone department. "Illinois farmers are keenly aware of this fact, and have demonstrated their readiness to 'take' to scientific practices to such an extent that last year Illinois used more agricultural limestone than any other state in the Union, in fact, one-fourth of all that was used in the United States. This year we will beat the previous record."

Watson Urges Amendment's Adoption

John C. Watson, director of taxation and statistics, declared that Morgan county land and city property is assessed on a higher percentage of valuation than any other county in the 20th district, and therefore bears a rather unjust portion of state taxes. A great variety of taxation conditions exist over the state, he said, most of which are the outgrowth of human nature, or the inherent desire of most people to escape taxation. With such a muddle in tax systems over the state, many people, especially owners of real property, both city and country, are paying an unjust portion, while intangibles are going practically free, and in many cases entirely so.

He strongly advocated the adoption of the amendment to the revenue section of the state constitution when it comes up for popular vote in November, 1926. Adoption of the amendment, he stated, does not enact additional taxes, but will give the General Assembly permission and power to remedy the revenue situation of the state.

I. A. A. Activities Increasing

Harry C. Butcher, director of information, told of increased activity of the I. A. A. in the news of the nation, which, he stated, is largely because of the increasing prestige of the state association and its increasingly greater activity.

"This was a fine meeting," Committeeman Smith said at the close. "There is a splendid spirit in this district, which reflects the constructive work being done."

Those who were present are as follows:

Morgan county: C. S. Black, H. P. Joy, M. Greenleaf, E. R. Hembrough, Austin B. Patterson, F. R. Watson and G. B. Crandall, farm adviser.

Pike county: Earl C. Smith, executive committeeman; J. H. Billings, W. F. Beckenholdt, J. A. Miller and Frank N. Barrett, farm adviser.

Cass county: Guy H. Husted, R. J. Meyer and Geo. R. Cline.

Scott county: Fred Booster, Bert Smothers, J. P. Bunch, Clyde J. North, W. M. Carlton, John C. Moore, A. F. Morris, M. L. Murray, A. W. Weeder, B. F. Webster, William Hasenkamp and Alfred Tate, farm adviser.

Jersey county: H. J. Steinkuehler, Ira Cottingham, John F. Powel, F. W. Schultz, C. E. Stanley, Thos. Cummings, M. B. Voorhees, John S. Cummings, F. I. Dodge, Chas. Campbell, Richard Walton and R. L. Eyman, farm adviser.

Brown county: Chas. H. Snyder, F. H. Six, Allen M. Ater, W. P. Miller, farm adviser.

Menard county: C. A. Hughes, farm adviser.

MARKETING POLICY OUTLINED BY DAVIS

(Continued from page 1, col. 1.)

For farmers in territories in which neither farmers' elevators nor commodity associations can be applied, the I. A. A. grain policy recommends the organization of local grain shipping associations. In this plan 50 or more members can organize themselves and arrange to load their grain into cars on the track and later if advisable to purchase or erect an elevator of their own. Such a plan requires neither a large capital investment nor a detailed organization and will prove advantageous in counties where grain is not the principal marketed crop.

The grain marketing policy, as developed by the I. A. A., is inclusive and may be applied to practically all territories and conditions in the state. It is toward a statewide service in marketing grain that the Illinois Agricultural Association is working.

The I. A. A. is preparing an agricultural exhibit to be displayed at the Central States Exposition at Aurora, on August 21-29; the Illinois State Fair, Springfield, September 19-26; and the Illinois Products Exposition at the American Exposition Palace, Chicago, on October 8-17. The exhibit will be a credit to Illinois agriculture and the State Farm Bureau. Come around to the booth when you attend the fairs.

Land Valuations Reduced $8,905,887 in 6 Counties Within the Last Year

SIX farm bureau counties, with the Illinois Agricultural Association co-operating, have brought about a reduction in assessed land valuations totalling $8,905,887 within the last year, according to J. C. Watson, taxation specialist. This reduction will save the landowners of the six counties approximately $57,888.26 each year in state taxes alone.

The assessed valuation of the farm lands in many of the counties in Illinois is based upon the inflated values of the world war days, and it is the plan of the I. A. A. to assist the farmers throughout the state to bring about a reduction of the assessments to amounts corresponding to the present value of the lands. The six counties, where such reductions were accomplished in 1924, included Vermilion with a reduction of $2,241,812; Logan, $2,620,790; Whiteside, $1,749,873; Kane, $919,175; Montgomery, $890,717; and Cass, $483,520.

Ford First This Year

The first county to get a reduction in 1925 was Ford. The board of revenue made a reduction in the assessed valuations amounting to nearly $1,350,000 on farm lands. This, it is estimated will make a saving to landowners of approximately $8,200 annually on state taxes. Ford county lands averaged $90 per acre in the 1924 valuation, and this reduction will reduce the value to $81 per acre.

Notable reductions have been made in other counties, principally Shelby county with a reduction of $862,731 and Jo Daviess where the reduction amounted to $299,385. In the case of Whiteside county full credit of the saving goes to the county Farm Bureau which accomplished the reduction without any outside assistance.

At the present time the McLean County Farm Bureau is requesting a reduction from the board of reviews which will amount to a saving of 10 per cent to the landowners. Other counties including Ogle, Peoria, Clay and Kane are expecting to ask for a reduction this year. The reduction made in Kane county last year was not as large as it should have been according to the present land values. Last year the Peoria Farm Bureau asked for a reduction in the assessed valuation of farm lands but was unsuccessful due to the opposition of the county treasurer and certain members of the board of review, according to the Peoria County Farmer, official organ of the county Farm Bureau. This year, it is understood that the board admits the fairness of the request and it is believed that a reduction will be accomplished.

Other States Active

Other states, particularly Iowa, Michigan, Ohio, Missouri and Indiana, are also making efforts to bring about a reduction on taxation assessments. Last year, according to the Missouri Farm Bureau News, the Farm Bureau Federation in that state succeeded in getting a reduction in 13 counties and this year data is being prepared on 57 other counties with the hope of bringing about a similar reduction.

The state executive council of Iowa, according to news reports, recently fixed a valuation on farm property of $69.45 per acre as compared to $76.66 two years ago. The decrease on farm lands in that state in 1926 and 1927 will run from 5 to 15 per cent as compared to the 1923 assessment, with an average decrease for the state varying from 9 to 10 per cent, according to a special correspondent to the Chicago Journal. The tax reduction work in neighboring states was gotten under way by Mr. Watson's assistance. He has worked in Ohio, Michigan, and Iowa, and Missouri used the I. A. A. system.

WABASH REDUCES ITS PROPOSED LIMESTONE FREIGHT RATE BOOST

Planned Big Increase to Correct Error, But I. A. A. Gets Compromise Which Will Save Farmers Many Dollars.

Farmers along the Wabash railroad who buy limestone will benefit from a recent negotiation of the I. A. A. phosphate-limestone department and Vice-President Maxwell of the railroad.

Earlier in the summer the Wabash officials signified their intention of advancing its rate on agricultural limestone in order to correct an error made by its employees at the time the former low rate was published. The former rate absorbed a 30-cent-per-ton switching charge which is necessary to transport the stone from the quarries to the company's own line.

Proposed Increase Reduced

"In correcting the error," states J. R. Bent, director of the department, "the railroad proposed an increase which would have placed a severe penalty on limestone purchases from quarries served by this line. Naturally it would have decreased the use of limestone to a considerable degree.

"I am very glad to be able to report that Vice-President Maxwell has agreed to minimize their proposed increase, even though it leaves the net rate on the Wabash extremely low for the mileage concerned in view of the fact that there is a switching charge to be handled. He promised to get out a new tariff at once which will absorb a portion of the 30-cent switching charge levied by the connecting line at 'the shipping or 'origin' end as follows:

"1. On movements where the main line haul amounts to $1 per ton or more freight, the Wabash will absorb 25c of the switching.

"2. On movements amounting to 90c or more, but less than $1, 15c.

"3. On movements amounting to 80c or more, but less than 90c, 10c.

"This very favorable action is good for the balance of 1925 as a trial matter. I hope that the results this year will convince Mr. Maxwell that such encouraging rates should be maintained permanently."

State Picnic's Still 2 Weeks Away, But There's Bid for '26

WITH this year's annual I. A. A. state picnic still two weeks in the future, the executive committee received the first invitation for the 1926 picnic at its meeting of August 7.

It was from the McDonough County Farm Bureau. The executives ordered the invitation placed on file.

Watch for Chicken Epidemic Is Warning Of Poultry Department

The chicken disease which caused the embargo to be placed on live poultry and the enormous loss to Illinois farmers last year has begun again to show up in the New York market, according to information received by F. A. Gougler, head of the poultry and egg department of the I. A. A.

To forestall the spread of the disease and the ultimate embargo, Director Gougler has issued a warning to Illinois farmers through their 93 county Farm Bureaus to, "Be extra careful not to send sick fowl to market."

"We should not forget the serious epidemic of poultry diseases that developed throughout the country last year and which may appear again this year," reads the warning. "Since symptoms of many diseases are very much alike, every effort should be made to prevent sick birds from reaching the market which may cause another embargo.

"During the months of August and September poultry culling will be done by farm advisers and other poultrymen and it will be well for them to call farmers' attention to the importance of marketing only healthy stocks."

Government and state authorities are working quietly but thoroughly to stamp out the disease wherever it appears. By careful inspection of the farm flocks and particularly fowls to be shipped to the large markets, it is hoped that the disease may be eliminated and thus prevent a recurrence of the poultry epidemic and financial loss to both shipper and receiver during the coming winter months.

Over Half of Dairy Cows in State Under Supervision for T. B.

The tuberculosis eradication project is more than half completed and soon there will be enough safe tuberculin tested milk for all families who consume milk from Illinois herds, according to statistics compiled by A. D. Lynch, head of the dairy department of the Illinois Agricultural Association.

"Already 53.1 per cent of the cows in Illinois have been placed under supervision and 2,000 head of cattle are being tested daily," states Director Lynch. "Farmers throughout the state are rapidly showing more interest in putting their herds tested and Illinois dairymen are determined to have healthy cows, safe milk for their kiddies and clean tuberculin tested milk for their city cousins.

"On July 1, a year ago," according to the records of the dairy department, "30.6 per cent of the milk cows of the state had been tested. In 1923 only 7.8 per cent were under supervision and three years ago the number of tuberculin tested cattle was but 3.5 per cent. The Illinois program has been a steady, sensible progressive plan to rid the state of bovine tuberculosis in a co-operative and complete manner and figures showing the increase in number of tested cattle from 3.5 to over 50 per cent in only three years is indicative of the success of the project.

"The farm bureaus and the Illinois Agricultural Association have backed this program and will continue to assist their members and their communities in the eradication of tuberculosis. The job is now a little over half done and it is expected that the remaining portion will be easier. The machinery is working smoothly. Over 136,000 head of cattle are on the current list waiting to be tested, and the passage of the Tice bill made possible an appropriation of $3,000,000 for indemnities for the next two years."

MARKETING POLICIES GIVEN AIRING AT 22ND DISTRICT CONFERENCE

Dairy and Grain Plans for I.A.A. Told to Farm Bureaus at Waterloo Meeting

Definite programs for the co-operative marketing of both grain and dairy products were discussed at the conference of the 22nd district of the Illinois Agricultural Association held at Waterloo on August 5.

Stanly Castle

Approximately 50 representative farm bureau members were present from Madison, Bond, St. Clair and Monroe counties, according to Stanly Castle, executive committeeman of that district. The meeting was presided over by Albert Kolmer, president of the Monroe County Farm Bureau, as chairman with Frank Oexner of Waterloo officiating as secretary.

Tells of Ratio Price Feature

During the morning session, A. D. Lynch, director of the dairy marketing department, reviewed the Illinois dairy marketing plan and explained how it may be applied to the milk distribution problem of the 22nd district. The Illinois program, which is similar to the marketing methods used successfully both in Detroit and Philadelphia, is now being prepared for the farm bureau members in Peoria, Tazewell and Woodford counties. Under this plan the price ratio is arranged according to both a basic and surplus production, which premiumizes uniform production.

The members of the 22nd district have an additional prospective outlet for their surplus milk which could be arranged through the surplus plant in the territory, if such an avenue should be needed, according to Director Lynch. No definite steps were taken in regard to the dairy marketing at this meeting, but it is believed that the question will be considered more completely at a future district meeting.

I. A. A. Grain Policy Defined

Chester C. Davis, grain marketing director, addressed the afternoon session. In his talk, Director Davis told of the Illinois plan for marketing grain and of the Rural Grain Marketing Company that has been incorporated recently (to handle the sale of the grain produced by the members in the Chicago district). The grain program, as reviewed by Davis, includes three objectives. The I. A. A. aims to assist the already existing 600 farmers' elevators in the formation of a central sales agency for the purpose of disposing of the grain on all markets; to develop a program for the farmers of the state who do not have the advantages of a co-operative elevator; and to co-operate in the growth and improvement of the local farmers' elevators and other co-operative grain handling associations for greater efficiency and harmony.

The work of the I. A. A. and its co-operation with the county Farm Bureaus of the district in developing the state-wide programs for the marketing of dairy and grain products was reviewed by Committeeman Castle.

MANY SLUM CHILDREN ENJOYING FARM LIFE

Many children of the city slums are enjoying these last few weeks of summer in the homes of Farm Bureau members near Chicago. These lucky youngsters will certainly long remember with gratitude and affection the generosity of the farm families into whose midst they have been welcomed.

The following persons have recently written to the outing secretary requesting children:

Mrs. A. W. Johnson, Jerseyville, 2; Mrs. William H. Cohrs, Homewood, 2; Mrs. B. F. Pudicil, Beecher City, 2; Mrs. Henry Tiellamp, La Moille, 1; Mrs. Emery Werkheiser, Kent, 1; Mrs. Nels Hansen, Walnut, 1; Mrs. E. Pierce, De Long, 2; Mrs. H. A. McVey, Kirkwood, 1.

STATE PRESIDENT OF FARM MUTUALS TELLS OF REINSURANCE NEEDS

C. A. Asplund of Henry County Tells of Trials of Farm Mutual Insurance Companies

"I am intensely interested in this project," writes C. A. Asplund, president of the Illinois Association of Mutual Insurance Companies, in a letter concerning the progress of the newly formed Farmers' Mutual Reinsurance Company, which has been organized by the farm mutuals of the state, and which is now in a campaign to get sufficient direct insurance on fire and lightning risks to permit a charter from the state.

C. A. Asplund

"I am anxious to do what I can for the immediate fulfillment of the requirements of the insurance laws to get this reinsurance company in operation and on a sound footing," his letter continues. Mr. Asplund is secretary of The Svea Mutual Protective Insurance Company of Knox, Henry and Mercer counties, which, he states, has over $27,000,000 insurance in force. He is also president of the reinsurance company.

Funds Now Available

"The necessity for an organization that will safeguard mutual insurance presents itself more and more forcibly as time goes on, and it seems that the mutual insurance fraternity has been lax in neglecting this important matter all these years. The reason, however, is lack of funds for its promotion. It is a well known fact that there is no business approaching in magnitude and importance that of mutual insurance work that offers as small remuneration for the time and efforts engaged in it. It should not be expected that they should also contribute cash funds in promoting its welfare but now that this obstacle has been overcome by the generous offer of the Illinois Agricultural Association to advance the $10,000 guarantee fund and all of the organization expenses, it has left the comparatively small matter of obtaining the $500,000 of direct insurance to those interested in the success of this project and to complete the requirements and launch a state-wide mutual reinsurance company in the field. This latter detail can be accomplished in a very short time if each mutual officer would take it upon himself to procure a few applications each. Incidentally, on last Saturday I made it a point to call on some of my neighbors that I knew should have more insurance than they were carrying, and in less than three hours I wrote eight applications for $22,650, and could have written considerably more had I not run out of application blanks, for not a single person approached neglected to take a policy after the object and purpose of this new company was explained, and I feel that this condition obtains everywhere.

Big Problem

"One outstanding problem in mutual insurance is the tendency to overload, or carry larger risks than is commensurate with assessment resources. This is especially so with the smaller companies; out of the 235 mutuals in the state, there are 66 with less than one million dollars of insurance in force each. It is very apparent that such companies are not in a position to give their members adequate protection and remain within reasonable bounds of safety without reinsurance facilities.

"It is a regrettable fact that two mutual companies during the past three years that have done splendid work and given their members protection at a very low cost for many years past, and operating in the same territory that our local company is operating, owing to carrying loads too heavy to be consistent with safety, have experienced a run of losses for the past two or three years which caused their loss ratio to increase above their ordinary experience, causing dissatisfaction to their members, which resulted in a decision to liquidate and go out of business. Had the newly organized reinsurance company been in operation a few years before this, and these companies taken advantage of its protection, they would be in existence today.

Reinsurance Is A Stabilizer

"Reinsurance is a stabilizer of all insurance. While it does not prevent losses it distributes them among the many to pay in smaller or more moderate amounts. It is our experience that it is infinitely more satisfactory for all concerned to pay a moderate assessment each year than to pay a large one one year and none at all the next. The average policyholder forgets the year when an assessment is not collected, but always remembers the heavy ones which are the ones that cause dissatisfaction."

Conference Meetings Scheduled for Five Districts Within Month

Five congressional district conferences of the Illinois Agricultural Association, that will include 25 county Farm Bureaus, are scheduled to be held during the next 30 days.

Those listed according to date and place are:

August 20: Third conference meeting of the 21st district at Taylorville. Counties of Sangamon, Christian, Macoupin and Montgomery. Chester C. Davis, grain marketing director, to talk.

August 25: Third conference meeting of the 24th district at Flora. Counties of Clay, Wayne, Edwards, Hamilton, White, Saline, Gallatin, Pope, Hardin, Johnson and Massac. S. H. Thompson, president of the I. A. A.; F. A. Gougler, director of the poultry and egg department; and Harry C. Butcher, director of the information department, to address meeting.

September 1: Third conference meeting of the 11th district at Libertyville. Counties of McHenry, Kane, DuPage and Will. Illinois Agricultural Association to be represented by J. C. Watson, taxation specialist, and Donald Kirkpatrick, legal counsel.

September 2: Second conference meeting of the 18th district at Marshall. Counties of Kankakee, Iroquois, Vermilion, Edgar, Clark and Cumberland. R. A. Cowles, I. A. A. treasurer, and A. D. Lynch, director of dairy department, to talk.

September 16: Second conference meeting of the 19th district at Sullivan. Counties of Champaign, Piatt, DeWitt, Macon, Moultrie, Douglas, Coles and Shelby. President Thompson; J. R. Bent, Phosphate-Limestone department; and F. D. Barton, of the finance committee, to address meeting.

Red Top Growers Win Decision Against One Member Who Sold Outside

Contracts of the Egyptian Seed Growers' Exchange with the members, are not cancellable upon the will of the member until after July 1, 1927, when members can withdraw from the co-operative if they state their desire in writing, according to a decision of the Appellate Court of Illinois in the fourth district, which reversed a decision of the Circuit Court of Clay county.

The question had gone to court when D. J. Hollinger, a member of the co-operative, sold red top seed outside the pool, thus making him liable for damages to the co-op to the extent of five cents a pound. The resulting litigation was principally over the literal meaning of clause 10 of the uniform growers' contract, which was construed by Mr. Hollinger's attorney as permitting withdrawal any year after July 1, providing written notice had been given the co-operative between May 15 and 30. The Appellate Court held that Mr. Hollinger's attorney's interpretation could only be made by completely ignoring a clause in this section as follows: "that the contract shall continue to be in full force until the first day of July, 1927." This, the written decision of Judge P. J. Higbee stated, could by no means be ignored.

This is the only case of this kind, Manager Curt Anderson states, that has come up in the three years of successful operation of the pool.

Deadline On Horseshoe Entries Set for 9 A. M. of Day of State Picnic

Entries in the state championship horseshoe tournament may be made until 9 o'clock the morning of the picnic day — Thursday, August 27, according to Clair Hay, farm adviser of the Christian County Farm Bureau.

Each entry should be made by letter to the Horseshoe committee, Christian County Farm Bureau, Taylorville, thus establishing the identity of the bona fide representative of participating farm bureaus. The earlier the entries, the better.

I. A. C. A. NOW SERVES 173 ORGANIZATIONS

Contracts for membership in the I. A. C. A., the auditing and business advisory service co-operatives, now number 173.

173

The three latest co-operatives organizations to join the Illinois Agricultural Co-operatives' Association are the Stockland Livestock Shipping Association, Iroquois county; the Claytonville Co-operative Oil Company, of the same county; and the Havana Co-operative Grain Company, Mason county.

The I. A. C. A. now lists organizations of practically every type of business co-operative operating in the state. The membership list includes 82 co-operative grain companies, 7 milk and dairy associations, 45 Farm Bureaus, 25 co-operative shipping associations, 4 mutual fire insurance companies, 1 automobile insurance association, 5 co-operative supply companies, 2 seed growers' exchanges, 1 fruit exchange, and 1 limestone association.

Other co-operative organizations in the state have received blank membership forms and are considering joining the association, for better auditing and business service, according to George R. Wicker, director of the auditing department.

Here's Spicy Program for Annual I. A. A. Gala Day at Taylorville, 27th

Following is day's program of spicy events:

9:00 A. M. Horseshoe tournament gets under way.

10:00 A. M. Beginning of Women's program with Mrs. Spencer Ewing, president of Illinois Home Bureau Federation, presiding. Assembly of children, accompanied by Hunter's Christian County band. Singing of "America" by audience. Discussion of athletic badge test for boys and girls with demonstrations of stunts actually performed by boys and girls, conducted by Mrs. Homer Johnson, former president of McLean County Home Bureau.

10:30 A. M. Baseball game for championship of state. Folk singing by boys and girls with Victrola accompaniment in charge of Miss Buchanan or Mrs. Eyring. Three folk games by Champaign County Club girls. Stunts and songs by Shelby County Club girls.

11:00 A. M. Address, "Tornado Relief in Southern Illinois," by Mrs. J. L. Mitchell of the Red Cross.

11:30 A. M. Address, "The Home Bureau and Its Work," by Mrs. Spencer Ewing.

12:00-1:30 Band concert and time off for dinner. (Bring picnic lunches but dinner for 5,000 can be secured at grounds or in business section, five blocks from grounds.)

1:30 P. M. People called together in auditorium by bugler. Community singing, led by J. H. Checkley, farm adviser of the Logan County Farm Bureau. Singing and selections by band.

1:45 P. M. William Grimes, president of Christian County Farm Bureau, presiding, will introduce Harry Hershey, mayor of Taylorville, for a short address of welcome. Mr. Grimes will then introduce Sam H. Thompson, president of the I. A. A., who will preside for the afternoon. Message from Dean H. W. Mumford of University of Illinois.

2:15 P. M. Main address of the afternoon by Secretary of Agriculture, W. M. Jardine.

3:15 P. M. Awarding of horseshoe and baseball championship cup by President Thompson. Chicken calling and hog calling contest.

Future talks by I. A. A. directors every Friday noon over WLS broadcasting station include the following speakers and dates: August 21, A. B. Leeper, director of the fruit and vegetable marketing department and manager of the Illinois Fruit Growers Exchange; August 28, Wm. E. Hedgcock, livestock marketing director, on "The Wool Marketing Situation;" September 4, Chester C. Davis, grain marketing director; September 11, A. D. Lynch, director of dairy marketing; and September 18, Frank A. Gougler, head of the poultry and egg marketing department.

Gougler Finds Active Interest in Marketing Poultry All Over State

Active interest in the possibilities of a state-wide program of marketing poultry and eggs co-operatively is seen by Frank A. Gougler, director of the I. A. A. poultry and egg marketing department.

This is indicated, he finds, in the series of meetings now being held over the state at which farm advisers gather from a half dozen or so counties, along with farm bureau leaders keenly interested in the subject.

The first meeting of the series occurred at Hannibal, Mo., where a delegation visited the Mark Twain Poultry Producers' Association, an organization that has been functioning for several months, and with good results.

Other meetings have been held at Dixon on August 4 and Champaign on August 6. A meeting at Springfield is set for August 17, and one at Peoria on August 19. One will be held at Galesburg the first week of September, and Effingham and Ottawa have been picked as meeting places, but no dates arranged.

Mr. Gougler is getting up a group to visit the successful co-operatives in Minnesota. The first active start toward forming a poultry and egg marketing association in Illinois is in Ford county. Farm Adviser Swaim of that county recently visited in Minnesota while on his vacation.

Farm Bureau Baseball Championship of State A Feature at Taylorville

The semi-final games of the Illinois Farm Bureau Baseball league are now well along their way toward the state championship game which will be played at the I. A. A. annual picnic, Taylorville, on August 27, according to G. E. Metzger, secretary-treasurer of the league.

The championship game is to be one of the big features of the picnic and much anticipation has been aroused in many of the counties regarding who will win the state honors this year.

When the league was formed early this spring it included 17 teams representing the county Farm Bureaus in Marshall-Putnam, Carroll, Knox, Mercer, Henderson, Warren, Adams, Brown, Cass, Morgan, Sangamon, Mason, Menard, Logan, Peoria, Tazewell and Woodford. These teams were arranged into seven districts and the districts into four groups. In the preliminary games, the teams matched up to determine the district champions. The district champions competed for group championship and now the semi-final games between the group champions are being played to determine who shall play at Taylorville.

PRODUCER AGENCIES INCREASE BUSINESS

The 1924 earnings of the National Live Stock Producers' Association amounted to $424,985.92, as compared with $407,916.98 for 1923, the association's annual report states. The organization sold during the year 90,910 cars of live stock, valued at $199,970,674.58.

During 1924 producer terminals handled live stock consigned from twenty-eight states. Illinois contributed the most cars, with Indiana, Iowa and Ohio following in order.

The association is now represented on thirteen markets, including Chicago, Cincinnati, Cleveland, Evansville, Indianapolis, Kansas City, East St. Louis, Oklahoma City and Peoria.

During 1924 the Chicago terminal did more business than any others, selling $27,995,127.79 worth of live stock. The East St. Louis terminal was second with total sales of $19,496,863.91.

The Producers' Association receipts amounted to 10.46 per cent of the total receipts in the markets in which it operated, as compared with 9.18 per cent for 1923.

Farmers' co-operative associations in Illinois in 1924 handled 13.28 per cent of all the livestock shipped to market from this state. This amounted to approximately 35,000 cars and had a total value of $48,450,000, according to Wm. E. Hedgcock, director of the livestock marketing department of the Illinois Agricultural Association.

FARMERS MAY KILL WILD ANIMALS THAT INJURE PROPERTY

Closed Season Does Not Apply to Destructive Game, Says State Conservation Authority

"Farmers may lawfully destroy in any manner, except with poison or poisonous substances, any wild game, except migratory birds, found destroying their property or their land only," according to a communication from S. B. Roach, chief assistant, department of Conservation in the State Department of Agriculture.

The question of the legality of killing wild animals out of season that are destroying chickens and other property has faced many Illinois farmers. Inquiries have come to the office of the Illinois Agricultural Association and the department of information referred the question to the state department for interpretation of the game law.

"No license is required to kill such animals found destroying property on the lands of the owner or tenant. This, however, does not give the owner or tenant the right to hunt fur bearing animals on their own premises during closed season, except when these animals are found to be actually destroying property," according to the state conservation department.

Section 28 of the Game Code of Illinois, which covers this point, reads:

"Sec. 28. When license not required. The owners and tenants of farm lands and their children actually residing on such lands, shall have the right to hunt, take and kill, wild animals, wild fowls and birds of the kind permitted to be hunted, taken or killed by the provisions hereof, upon such lands or waters thereon, of which they or their parents, are bona fide owners or tenants, during the seasons when it is lawful to do so, without procuring hunting licenses.

"The owners and tenants of lands may destroy any wild animal or wild bird, other than game bird, when such wild animal or wild bird is destroying property upon his or her land, but no poison or poisonous substance shall be used as a means of destroying such wild animal or bird."

New Reinsurance Body Meeting Good Support Among Farmer Mutuals

"The Farmers' Mutual Reinsurance Company now has thirty-two applications for fire and lightning insurance," states Vernon Vaniman, field representative of the new company. "This is a start on the $500,000 which is needed to secure the charter for the company."

"The mutual insurance companies of Peoria county met in Peoria on July 31 and $22,000 worth of applications for insurance were subscribed for at the meeting. The mutual insurance companies of Madison county met in Edwardsville last Saturday. They unanimously endorsed the plan of the Reinsurance Company and the men present subscribed for $20,000 of insurance.

"When will the Reinsurance Company get the $500,000 of applications so it can secure its charter and start operations? I believe the company will have $500,000 in applications by September 15, at the latest.

"If you desire to see the local mutuals put in a position so they can handle all the fire and lightning, as well as the hailstorm and windstorm, insurance needs of the farmer, then you should be a charter member of the Reinsurance Company by making out an application for insurance.

"Write the Farmers' Mutual Reinsurance Company, care of the I. A. A., and become a charter member."

REINSURANCE COMPANY MEETING WITH HEARTY APPROVAL: McFARLAND

Secretary and Manager of New Company Writes of Success of New Project

YOU will be interested in what Wm. B. McFarland, the author of this article, has to say about the new reinsurance company. He has been in the farm mutual insurance work for nearly 35 years, and therefore knows the ins and outs. He is secretary and manager of the new company and says he and his farm mutual friends have been hoping for many years to get such a company on its feet. Read it.

Wm. B. McFarland

I AM mighty glad to see the hearty response and encouragement the Farmers' Mutual Reinsurance Company of Illinois is receiving from the local fire insurance companies and from the county Farm Bureaus of the state. Almost without exception wherever it has been presented it has met with hearty approval.

Reinsurance has enlisted the best thought of those interested in farm insurance both in this and other states for a number of years. Various plans have been proposed and discussed at length at the state association meetings. Forms for interchange of reinsurance among local companies have been perfected and many companies have availed themselves of this. But a demand for a larger, more comprehensive, form or a state-wide company has been apparent through all this discussion.

The Farmers' Mutual Reinsurance Company of Illinois is the result of this demand and has been made possible by the co-operation of the Farm Fire and Tornado Companies and the Illinois Agricultural Association.

Assist Locals, Not Compete With Them

The object of this company is only to assist and in no way to compete with the local companies.

The laws of Illinois limit the service of the local companies and some local companies by reason of certain conditions limit the amount of their own service. Some local companies do not insure churches, schoolhouses, or town halls, although they are largely or wholly supported by farm interests.

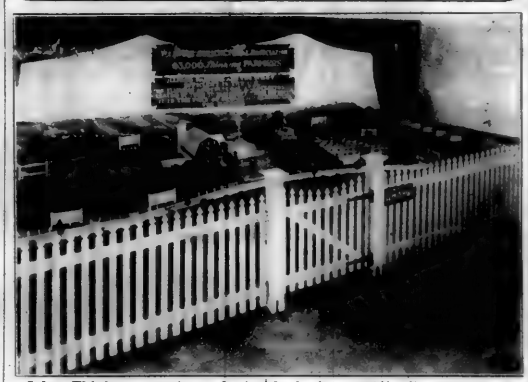
This the state company will be able to do. It will also, through its blanket insurance, be able to help the local companies in years that its losses are excessive and will share part of them, thus spreading them over a term of years, or in other words, doing for the local company just what it does for its patrons. Would it not be fine for the local company to say to its patrons that they were backed by companies representing 50 to 100 million dollars? And when that time comes the farmers will be able to insure whatever their interest may require and excessive assessment will not be heard of.

The number of local insurance companies and Farm Bureaus of the same territory have been solicited and have pledged a given amount of the required $500,000 necessary to procure the charter and have ap-

(Continued on page 4, col. 5.)

Operation Plus Doc's Orders Causes Jardine To Cancel Picnic Date

Due to doctors' orders, Secretary Jardine cancelled his engagement to speak at the annual I. A. A. picnic at Taylorville. His message was as follows:



"The Secretary has been planning on fulfilling his appointment at Taylorville, Aug. 27, but it was found advisable for him to undergo an operation for the removal of his tonsils. It will take him several days to recover from this operation, but it is quite likely that he will have to undergo further treatment and rest before his return to his duties. His doctors have absolutely refused to allow him to accept any speaking engagements. Therefore he will have to cancel his Illinois engagement."

MOVE TO COORDINATE ALL FARM STATISTICS

Under a working agreement completed August 1st, 1925, the Illinois crop and livestock reports will be issued jointly by S. J. Stanard, director of the Illinois Department of Agriculture, Springfield, and W. F. Callander, chief, division of crop and livestock estimates, United States Department of Agriculture, Washington, D. C. All reports will be issued under the head of "Illinois Co-operative Crop Reporting Service." A. J. Surratt, federal agricultural statistician, will be in charge.

"The regular crop and livestock reports issued monthly will represent the result of extensive investigations by the combined state and federal organizations for gathering agricultural statistics," states Mr. Surratt. "Briefly, the object of this co-operative project is to improve and extend the use of agricultural statistics and to co-ordinate, so far as practical, all the work in Illinois relating to the collection, distribution and use of agricultural statistics in such a way as to make the work more effective and available to the farming public and avoid duplication of effort."

I.A.A. Exhibit to be Shown at Aurora, Springfield and Chicago

John Thinker, member of the Peppy County Farm Bureau and neighbor of Epidermis Flint, is now preaching the gospel of organization and co-operation at agricultural fairs. He still retains his job as chief character of the comic strip that is published each issue on the editorial page of the I. A. A. RECORD, but for the time being his audience has been increased.

John Thinker and his farm is the subject of the exhibit that has been prepared by the Illinois Agricultural Association to be shown this fall at three fairs. On August 21-29, the exhibit was displayed at the Central States Exposition, Aurora, and will be shown again at the Illinois State Fair, Springfield, September 19-26, and the Illinois Products Exposition, Chicago, October 8-17.

Represent Agricultural Industry

The exhibit is a large reproduction of a substantial farm with all the equipment and buildings that are needed in the work of helping feed the world. It displays the spirit and magnitude of Agriculture.

It is summer time on the farm and John Thinker may be seen making hay as he drives a load of alfalfa to the barn, unloads it and returns to the field again at regular intervals. Trucks and wagons can be seen driving along the road carrying agricultural products to the city. On the right of the exhibit is shown a railroad train loaded with grain and livestock going to the terminal markets. Road signs tell the story of farming and co-operation to the passersby.

Time and expense have been used to make this exhibit one that every Illinois farmer may be proud of as representing his industry and his organization. It is to sell the Farm Bureau and the I. A. A. to the people of Illinois. Every farmer who plans to attend the state fair or the exposition at Chicago should go around to the I. A. A. booth to see the exhibit.

Will This Young Lady Carry the Illinois Banner on World Tour?

MISS AGRICULTURE! That's her name in the office. Her real name is Miss Hilma Johnson. She lives in Batavia, Kane county, and is an employee of the Illinois Agricultural Association.

However, the position of secretary of the accounting department of the I. A. A. does not satisfy all of Miss Johnson's ambitions so now she wants to carry the Illinois banner around the world to represent the grand old industry that feeds all of us—Agriculture.

To Be Miss Agriculture

Miss Hilma Johnson, Secretary, I. A. A. department of co-operative accounting.

To realize her ambition, she must sell more tickets than any other down-state girl for the Illinois Products Exposition, which opens in Chicago on October 8 and shows "Mighty Illinois on Parade" until the 17th. If she wins she gets a four-month free trip around the world.

"If all the farmers who plan to attend the Exposition would buy their tickets of me, I'd have a good chance to win," Miss Johnson says. "I am trying my hardest for I certainly want that trip. I'm most interested in agriculture so I want to represent agricultural interests in the campaign."

The I. A. A., Prairie Farmer and Orange Judd Illinois Farmer are supporting Miss Johnson. Tickets are 35 cents each if bought in advance from Miss Johnson and 50 cents at the door. Write the I. A. A., Prairie Farmer or Orange Judd Illinois Farmer if you want tickets. Let's send Miss Agriculture around the world!

Farmers Like to Hear Old Time Songs Best, Radio Survey Reveals

Jazz and syncopation have failed to lure rural people away from the old time tunes.

This is conclusively shown by a radio survey recently completed by WLS. Old time melodies like "Silver Threads Among the Gold," "Carry Me Back to Old Virginny," and "Old Kentucky Home," are more popular with the country folks than "Don't Bring Lulu," "Red Hot Mama" and "That's All There Is, There Ain't No More Blues."

The survey questionnaire was sent out on the air during the R. F. D. dinner bell programs. Responses were received from 681 in the states of Illinois, Indiana, Michigan, Iowa and Ohio, the average distance away of the listener in being 98 miles and the longest distance 400 miles. The total number of homes included was 2,500, with an average of four listeners in each home.

Old Time Tunes Liked Best

To the question "What kind of music do you like best?" the replies revealed the following: old time tunes, 349; popular, 205; classical, 39; all musical programs, 42; sacred, 16; string music, 12; instrumental music, 10; Ford and Glenn, 66; Cornhuskers' Orchestra, 43; harmonica, 44; Hawaiian guitar, 88.

"Yearning" leads the list of popular old time songs. The others in the order of their popularity are: "Silver Threads Among the Gold," "When You and I Were Young, Maggie," "Old Black Joe," "Oh, Katerina," "Oh How I Miss You Tonight," "When You and I Were Seventeen," "Red Wing," "Carry Me Back To Old Virginny," "How Do You Do," "Let Me Call You Sweetheart," "Put on Your Old Grey Bonnet," "Ukelele Lady," "In Shadowland," "By the Light of The Stars," "Moonlight and Roses," "Swanee River," "Turkey in the Straw," "Midnight Waltz," "Humoresque," "Blue Eyed Sally," "Let it Rain, Let it Pour," and "Old Kentucky Home."

ONE SPOON'S BEST TO ADMINISTER POSTAL COST REMEDY: A.F.B.F.

Board of Directors Decide One Statement for 48 States Will Suffice in Postal Rate Fight

A single statement concerning the new postal rates presented recently to the Joint Congressional Postal Committee in Washington will represent the concensus of opinion of the American farmers. This was the decision reached by the board of directors of the American Farm Bureau Federation in session in Chicago, August 19 and 20.

It was felt that a single statement reflecting the national point of view would be more effective than 48 state briefs. However, the state Farm Bureaus, where convenient, will meet with the postal committee, which is scheduled to hold further hearings in various parts of the country, and will present local testimony in support of the national brief.

The American Farm Bureau Federation argued before the committee in Washington that there is ample room in the Post Office operations for economy. Gradual reorganization of the service would be sufficient to wipe out the deficit which present figures seem to indicate will accrue during this fiscal year, the Federation declared.

Rate Increases Cutting Volume

The Farm Bureau further held that not sufficient time has elapsed to show how much of a deficit there will be nor just where it will occur but there seems ample evidence that goes to show that there will be a falling off in the parcel post business and possibly in the 3rd class business.

This was predicted by the American Farm Bureau Federation when the new rates were being written and strenuous protest made against it. The Farm Bureau also objected to the general increase in the salaries of postal employees, believing with the heads of the Post Office department and the administration that there was no necessity for a 60 to 70 million dollar increase in salary and that a few millions spent where there was demonstrated need would be ample to meet the situation.

The Federation has suggested that there be a gradual reorganization of the rural delivery system, lengthening the routes. The routes have not been lengthened materially since the automobile and hard surfaced roads were introduced and only a very small percentage of the routes are classified as "motor routes" and yet between 75 and 85 per cent of the R. F. D. carriers use automobiles.

Suggests Fewer City Deliveries

The Federation has also suggested possible economies through the elimination of some of the deliveries in the city, some municipalities having as high as seven deliveries in the business section and five deliveries in the mixed business and residence sections. For the purpose of proper bookkeeping at least, the $7,000,000 paid from the U. S. Treasury to the Post Office department for carrying franked and penalty matter should be charged up against those who use it, such as the various departments and members of Congress.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Published every other Saturday by the Illinois Agricultural Association, 308 South Dearborn Street, Chicago, Illinois. Edited by Department of Information, Harry C. Butcher, Director.

Entered as second class matter Oct. 18, 1921, at the post office at Chicago, Illinois, under the act of March 3, 1879. Acceptance for mailing at special rates of postage provided for in Section 1103, Act of October 3, 1917, authorized Oct. 31, 1921.

The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record.

Postmaster: In returning an uncalled-for or missent copy, please indicate key number on address as is required by law.

THE Record's PLATFORM

Advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, social and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

The East Needs A Middle West

WHILE your farm adviser and his family were in the East during their vacation no other condition was more outstanding than the fact that it is a mighty good thing for the East that there is a Middle West. The East is densely populated. This population is rapidly increasing. Real farms are scarce and therefore the food supply from local sources is very limited. Most of the farms consist of rough, broken land covered with stones. Dairying is and must continue to be the chief source of production on these rough farms. Scarcely no dependence can be placed on these farms for grain, butter and meat and the various other products for feeding the Eastern United States from local production. These products must come largely from the great Middle West.

There is an exceedingly healthy demand for food in these big manufacturing centers of the East. The prices paid by these consumers are very high when compared to the prices received by Middle West farmers. These consumers are not objecting to the prices they pay for food. High wages in the factories, or at the various trades enable them to pay these high prices. Further than this the population of the East is rapidly increasing. New houses are being built by the hundreds and thousands. Hence there will be a greater and increasing demand in the future for Middle West farm products.

What should these conditions mean to the Middle West farmers? If they mean anything at all they should stimulate our farmers to the following procedure: First, organize to market farm products in order to get the largest possible share of the consumers' dollar. Second, maintain and increase production to care for the future demand.—J. R. Shinn, farm adviser, in Fulton County Farm Bureau News.

—o—

The Freight Rate Situation

THE 11 per cent increase in freight rates petitioned for the western railroads has been reduced to about 5 per cent, according to press reports.

L. J. Quasey, director of transportation for the Illinois Agricultural Association, states that very little can be done by the farm organizations until the first hearing in Chicago, the date of which has been changed to September 15 instead of the 8th.

At present there is no specific brief of the railroads upon which a rebuttal can be based, and none will be available until the hearing, Mr. Quasey states. Changing the plea from 11 per cent to 5 per cent has further muddled the situation.

The Illinois Agricultural Association has gone on record as being unequivocably opposed to any increase in freight rates at this time, maintaining that the farmer is unable to stand higher rates than he is now paying. The full strength of the association will be thrown into the fight in an endeavor to defeat the increase.

—o—

The Position of Agriculture

THE time has come in the Midwest when adequate remunerative return to the farmer must come from the operation of his farm. Dependence on increased value of land holdings will be, from now on, an uncertain if not indeed a negligible factor in farm profits.

Farm operations must be conducted more nearly like an industry and the profits must come from the operating turnover. The establishment and maintenance of farm operations on a prosperous business basis is the most important economic and social question facing the American people.

The farmers of America have in the past believed in developing home industries and have subscribed to a government policy of protecting, encouraging, and developing our industries against outside competition. With the development of industry and transportation, the laboring class was faced with outside competition from people with lower standards of living. Labor pressed and secured government protection against ruinous competition caused by immigration. The farmer did not object to protecting labor.

Agriculture will decline or develop. It cannot stand still. Shall the government interest itself in developing agriculture? Shall the government aid in establishing farming on a business basis? Can the nation afford to do less for the farming business than it has done to maintain industry and labor? We think not. Only by developing all of our resources, agricultural and industrial, can we maintain an economic balance which will make the nation prosperous and safe for all time.—

Geo A Fox

Executive Secretary, Illinois Agricultural Association.

Times Have Changed Since 1870

THE present revenue section to the constitution of Illinois was adopted in 1870. The Civil War had been over for five years. John B. Palmer was governor. General Grant was president.

The world has moved rapidly forward. Great changes have taken place. Look at this list of noted American inventions since 1870:

Invention	Inventor	Date
Celluloid (Hyatt)		1870
Welt machine (Goodyear)		1871
Block signal for railways (Robinson)		1872
Automatic car coupler (Janney)		1873
Typewriter (Sholes)		1873
Quadruplex Telegraph (Edison)		1874
Water gas (Lowe)		1875
Mowing machine, differential gear (Blakemoyer, R.)		1876
Telephone (Bell)		1876
Talking machine (Edison)		1877
Incandescent lamp (Edison)		1878
Arc lamp (Brush)		1879
Gasoline motor, auto (Seiden)		1879
Automatic knot tying harvesting machine (Appleby)		1880
Chrome tanning (Schultz)		1884
Trolley car (Van Depoele & Sprague)		1884-87
Type-bar casting, linotype (Mergenthaler)		1885
Cash register (Patterson)		1885
Electric furnace reduction (Cowles)		1885
Split-phase induction motor (Tesla)		1887
Single-type composing machine (Lanston)		1887
Rotary converter (Bradley)		1887
Recording adding machine (Burroughs)		1888
Transparent photograph film (Eastman)		1888
Calcium carbide (Willson)		1888
Electric welding (Thomson)		1889
Electrolytic alkali production (Castner)		1890
Carborundum (Acheson)		1891
Harveyized armar plate (Harvey)		1891
Alternate-current motor (Tesla)		1892
Motion picture machine (Edison)		1893
Dry-air process for blast furnace (Gayley)		1894
Disk ploughs, modern type (Hardy)		1896
High-speed (Taylor & White)		1901
Aeroplane (Wilbur Wright)		1901
Hydro-aeroplane (Glenn H. Curtiss)		1911
Machine-gun (Isaac N. Lewis)		1912
Gas engine, compound (Erickemeyer, C.)		1921

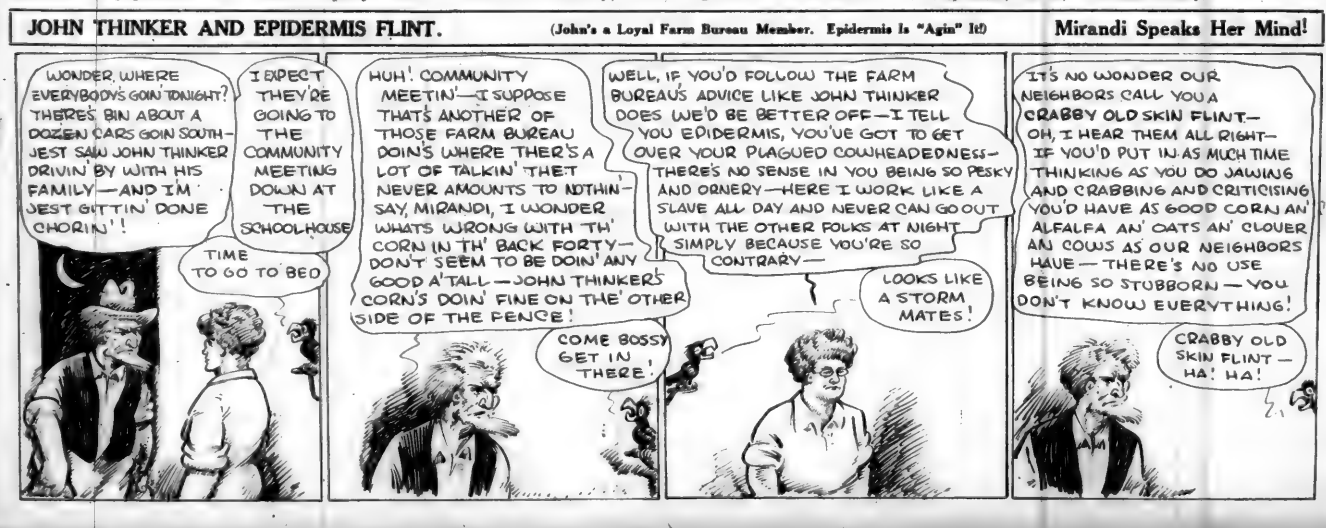
And here are the noted foreign inventions:

Invention	Inventor	Nationality	Date
Siphon recorder, Thompson		(English)	1874
Gas engine, Otto cycle, Otto		(German)	1877
Centrifugal creamer, DeLaval		(Swedish)	1880
Manganese steel, Hadfield		(English)	1884
Smokeless powder, Vielle		(French)	1886
Mantle burner, Welsbach		(Austrian)	1890
By-product coke oven, Hoffman		(Austrian)	1893
Wireless teleg., low frequency, Preece		(English)	1895
Wireless teleg., high frequency, Marconi		(Italian)	1896
Electric steel, Heroult		(French)	1900
Diesel oil motor, Diesel		(German)	1900
Depth bomb, W. T. Unge		(Swedish)	1903

But we still have the same revenue section!

When the present revenue section was adopted in 1870, it was fair, in accordance with the times. In those days a man paid very near his fair portion of taxes if he were assessed on the basis of the value of his real, honest-to-goodness tangible property (the kind you can kick, hammer, stick a shovel in, plow, get stuck in, etc.).

But back in 1870 there was less intangibles. Intangibles are defined as "evidences of indebtedness," and are the kind you can't kick, hammer, etc. Since 1870 there has been a meteoric growth in credit, much of which is non-taxable. Then there are bonds, stocks, notes, debentures, bank deposits, etc. The greatly extended use of such implements of finance has changed much of the wealth of the land from tangibles to intangibles.



But through all this change, the state's revenue section has remained the same. Is it any wonder that farmers want the amendment to the revenue section? To get the amendment passed by the voters in the election of November, 1926, is one of the big projects of the Illinois Agricultural Association. The active support of every member of the Farm Bureau is needed. Support it when you and your neighbors "talk things over."

—o—

Another Expression on Freight Rates

Dear Sir: Your letter of the 17th is at hand. In regard to freight rates, I will say that any raise in rates would work a hardship on Williamson county farmers. It would also go just as hard with any other section of the state. Off hand I am opposed to a raise in freight rates, yet it may be wise to grant them as long as we build and maintain hard roads and leave them open, free as air, to the public without any gas tax or anything of that nature. We are running a great risk of putting railroads out of business. It is my opinion that briars and sprouts will soon be growing over some of our railroads that are now in operation. On the other hand, a little lesson in economy, such as we farmers had since the war depreciation, might cut out some of their wasteful practices.—A. M. Spitznass, Marion, Williamson county.

JOHN THINKER AND EPIDERMIS FLINT. (John's a Loyal Farm Bureau Member. Epidermis Is "Agin" It) **Mirandi Speaks Her Mind!**

SURPLUS OF POULTRY PRODUCTS ON MARKET AND IN STORAGE NOW

Gougler Advises Farmers To Withhold Expanding In This Line in the Future Months

Should Illinois farmers increase their poultry and egg production in the future?

The success of expanding that phase of farm production would be very doubtful, if not unprofitable, stated F. A. Gougler, I. A. A. director of poultry and egg marketing, over WLS on the regular Friday noon I. A. A. marketing series.

"Competition is becoming mighty keen in this line" advised Director Gougler, "and only efficient producers from now on will be able to make this business pay. I do think that those producers of poultry who plan to expand their business, or individuals who now expect to enter the poultry business should move cautiously."

Cites Several Factors

When considering poultry and egg marketing problems and the future of the industry in the Mid-West, the poultry director stated that certain known facts should be studied carefully. Outstanding among these are available feed supply, all cereal grains and what they will be worth; what has been the movement of poultry products to our large consuming centers during the past six months; what are our cold storage holdings of these products now compared to a year ago; how are our exports of these commodities holding up compared to last year; what has been the outcome of this year's poultry crop, were the birds hatched early and have they been pushed to early maturity for fall and winter egg production; and, is the consuming public still hungry for our poultry products, or since pork and beef are advancing in price will this make the consumer want to change his diet?

Regarding the price of poultry feeds, it is estimated that conditions compare very favorably to last year. The costs should not advance to unusual heights, although the usual gradual increase in price from the present surplus period to the period of low grain supplies may be expected.

More Poultry in Storage

"So far this year," stated Director Gougler, "approximately 2 million pounds more of dressed poultry have been shipped to the large consuming centers than the total receipt to August 1 of last year. To be added to this is the information that we now have 37 million pounds of dressed poultry in cold storage as compared with 23 millions at this time last year or an increase of 14 million pounds. Thus we find a large carry-over facing us in the future.

"On considering the present egg marketing situation, we find that there is an increase of 116,000 more cases of eggs in cold storage than recorded at this date last year and our export in eggs has decreased as much as 450,000 cases. The reduction in our egg export is partially due to the fact that European countries, who furnished an outlet for our surplus poultry products in the past, are now reaching the point in production where they can supply their own needs.

Reports Show Increased Production

"Reports from the mid-western states indicate an increase in production this year resulting from the favorable spring season. Most of our larger producers hatched early and on many farms pullets are now coming into production.

"I have pointed out that egg consumption during the past few years has been gradually increasing per capita, but who knows how long it will continue in this direction. Perhaps the dreaded poultry disease scare of last year is responsible for the extra 14 million pounds of dressed poultry in cold storage this year over last. At least, no great increase in the consumption of poultry and eggs should be expected in the immediate future.

Illinois' present constitutional revenue section was adopted in 1870—five years after the Civil war. Support the campaign for a new one, which will be voted upon in November, 1926.

Humboldt Township Holds Record for Membership Drive

Humboldt township, Coles county, holds the record so far this year for increasing its membership, according to G. E. Metzger, director of the I. A. A. organization department.

"Humboldt township was the first to complete its membership drive in Coles county," states Director Metzger, "and it now has 30 per cent more members than it had during the past years, and has the largest increase reported this year.

"There are 47 counties who have planned to conduct farm bureau membership drives this year. Six of the Farm Bureaus have completed their sign-up, two are more than half done, and eight others are well started. Those that have proceeded far enough to show the trend of the drives indicate that there will be from 15 to 20 per cent more Farm Bureau members during the next year.

"I have visited 46 Farm Bureaus this year and have talked with their committees who are laying the plans for the resign-up of members. Practically all feel optimistic and state that they expect to be reporting a larger membership in the future."

Members of the Champaign County 4-H Club Listed to Dance at I. A. A. Picnic

Here are the girls who were on the schedule to give the Shoemaker, Kinderpolka, Chebogar, and Klappadans folk dances at the annual state picnic, Taylorville, last week. They are members of the Champaign County 4-H Club.

Their ability is not confined to dancing only, for we understand that they supervise agricultural fairs, programs, social gatherings, manage food stands and find time to go camping, besides their usual club activities.

These girls are from Rantoul, Sadorus and Ludlow. Mrs. Blanche S. Moore, Champaign county home adviser, assisted by Miss May Craw, county club leader; Mrs. Charles Boyd and Mrs. Walter Wycoff were in charge of the girls.

LEEPER REPORTS POTATO FAILURE FOR THIS YEAR

I. A. A. to Assist Farmers In Buying Potatoes to Combat the Present Shortage

The Illinois potato crop is the lightest in years and it is estimated that farmers in this state will need to purchase at least 1,000 carloads to supply their requirements until the next crop season, according to A. B. Leeper, director of the fruit and vegetable marketing department and manager of the Illinois Fruit Growers Exchange.

"This crop is reported the lightest in a number of years over the entire country," stated Director Leeper, in his talk over WLS, "and no doubt the growers in the northern sections which produce late potatoes for winter use will this year receive a fair price for their crop.

"We have received numerous requests from Farm Bureaus, farm elevators and other farm organizations to assist them in locating and purchasing supplies of potatoes for farmers in their respective counties."

To Help Supply Potatoes

The Illinois Agricultural Association, in the past, has never encouraged farmers' organization in the buying phase of co-operation. Experience has shown that co-operative buying is a considerable hazard and the saving in this line is usually small as compared to the risk involved. However, the association realizes that an emergency now exists in the potato supply for Illinois farmers and arrangements have been started to assist farm organizations and rural dealers, where they so desire, in locating and purchasing cariots of potatoes this fall. The extremely low price at which potatoes have sold the last two or three years has discouraged growers and the acreage has been naturally cut down in practically all the mid-western producing sections.

"We have made a very thorough survey of the late apple crop in Illinois and estimate that this crop will be one-third larger than in 1924," stated Manager Leeper.

"We found very little fungus disease in the well-kept orchards and insect injury is less than usual. In some sections, on account of the extremely dry weather, the growers were unable to obtain water at the proper time and these particular orchards show considerable injury from the second brood of the codling moth. In general, Illinois will produce this year one of the best quality crops of late apples in years.

Ben Davis Variety Leads

"In some sections, on account of the extremely dry weather, the growers were unable to obtain water at the proper time and these particular orchards show considerable injury from the second brood of the coddling moth. In general, Illinois will produce this year one of the best quality crops of late apples in years.

"Ben Davis leads the varieties showing the greatest increase, followed by Winesaps, Jonathans and Kinnairds. The late apple crop over the entire country will show a slight increase when compared with last year. The most of this increase is in the northwest sections, Illinois and New York being the only barrelled apple states that will produce an increase crop over 1924.

"During the last week in July and the first week in August, the summer apple market suffered one of the worst slumps ever experienced. This was due to the large supply of northern grown apples forced on the market without regard to price. It was fortunate that most of the Illinois crop was marketed before this glut.

"Illini" Brand Sells Good

"Peaches this year sold at a fair price, but this was somewhat of a disappointment both to the growers and the exchange. The Illinois crop followed closely on the Arkansas shipments and reached the market at a time when the shippers and buyers, who anticipated an advance in the market, were holding on track and in storage a large supply of southern peaches. The extreme carry-over kept all markets in a draggy condition during the entire shipping season.

"Illini" brand peaches were very favorably received on the markets and in almost every case resulted in repeat orders.

"The southern Illinois tomato crop attracted more attention in the markets than ever before. Many growers shipped a number of cars of green wrapped tomatoes which made a very favorable impression. This was the first green wraps ever shipped out of Illinois. A good start was made and our product has been established on a number of markets.

"The pear crop at present is under way and is finding ready demand in the northern markets.

Merchants and Farmers Co-operate

"Business men of southern Illinois are showing considerable interest in the future fruit and vegetable industry in that section. The business men's organizations have in view assisting the farmers in their vicinity to get larger returns from their lands, and also to give the farmers and merchants an opportunity to get together and mutually work out their problems. Both farmers and business men realize clearly that agriculture and business, in general, are interdependent and that neither can suffer financial loss without affecting the others."

What Will Happen November, 1926? The Gas Tax is Inevitable; Make it a Lieu Tax.

ANNUAL PREMIUM TO ACCREDITED COUNTY ESTIMATED $25,000

Adviser of Jasper County, Iowa, Writes of the 10 Cent Revenue On All Swine

"A premium of $25,000 a year on hogs is a profit that might well be coveted by any county whether it is located in Illinois, Iowa or any other cornbelt state."

That is the amount that Jasper county, Iowa, expects to gain during its first year as an accredited area, according to County Agent Ray D. Laflin of Newton.

In Illinois there is one accredited county and several that are on the threshold of becoming eligible for the 10 cent premium per hundred on hogs delivered to the Chicago and St. Louis markets. Thus, the extra profits acquired from the sale of hogs by the county in our sister state comes as a welcome inspiration to Illinois farmers. The premium becomes available on all hogs shipped to the Chicago market from any county designated as "modified accredited area." By that is meant that all the breeding cattle in the county have been tuberculin tested according to federal and state regulations and that the hogs have not been fed unpasteurized milk from a non-accredited county.

Farmers Getting Premium

Jasper county, Iowa, became an accredited area on March 23 of this year and since that date its farmers have shipped something over 400 carloads of hogs to market. Of this number it is estimated that 261 cars were shipped to the Chicago market in accordance with the premium requirements and have returned to the farmers of that county at least $4,264 in additional profits.

"During the past four years," writes Ray D. Laflin, county agent, "this county has annually shipped 2,200 carloads of hogs to market. These hogs were all raised in this county. If the entire crop was to receive the premium it would amount to about $37,000 a year in additional revenue to Jasper county. However, because all are not shipped according to the requirements, I believe that the annual revenue will amount to at least $25,000. I feel that a large per cent of our fall and winter shipments will receive the premium."

According to the experience of Jasper county, it is believed that the additional revenue received from the premium the first year will go a long way in paying the cost of becoming a "modified accredited area." In Jasper county it required approximately $15,000 of the state and federal funds and a like amount of the county funds, or $30,000. If the estimate of $25,000 additional revenue for the first year proves correct, Jasper county will come within $5,000 of paying for the cost by April 1 of next year, according to County Agent Laflin.

CHICAGO PRODUCERS' PATRONS MAY GET FEW CENTS REFUND ON FEED

Subscribing to Common Stock Yards Practice in Handling Feed Led to Mistake in Charging for Feed Used.

"Because they subscribed to a common stock yard practice relative to the handling of their feed account, the Chicago Producers found themselves involved in a complaint brought by the Packers and Stockyards Administration," says a statement of the National Live Stock Producers Association.

"This complaint was based upon an audit of the Chicago Producers' feed account, made by a government auditor at the request of the manager of that organization.

"This audit disclosed the fact that there had been a deficit in the feed account which been made up in the following manner: It is a practice on the Chicago yards when a deficit in the feed account occurs to make up said deficit by charging the owner of live stock for feed to which his stock has access which has been left by a previous load. In this manner no shipper is charged for feed which his stock has not received and it was this practice to which the Chicago Producers subscribed in making up the deficit discovered in their feed account.

May Refund to Some Shippers

"The board of directors have frankly admitted that the facts set forth in the complaint were, in substance, true and have indicated to the Department that they are perfectly willing to abide by any decision which the Department may make in this matter. The Department has indicated that it may be necessary to make restitution in some cases; such restitution to take the form of a refund to shippers affected. In practically all cases this will not amount to more than a few cents per patron. The office is now investigating the records to ascertain to whom such restitution should be made.

Result of Undercharging

"There is also every evidence that most of this deficit was the result of undercharges to patrons on their feed accounts. When the records have been fully scanned it will probably be found that some shippers are indebted to the Chicago Producers because of this undercharge. What action the Department will take relative to these undercharges has not been indicated as yet.

"Due to the way in which feed accounts are now handled at the Chicago yards, the Department fully appreciates the difficulty in showing a definite balance at the end of the year to such an extent that feed records out of balance several hundred dollars either way are not subject to criticism by the Department. With some change in the method of handling feed transactions there is every reason to believe that feed accounts can be made to balance accurately. Suggestions have already been made to the Packers and Stockyards Administration and to the Stock Yard Company by the board of directors of the Chicago Producers, which will probably result in these changes.

Subscribed to Stock Yards Practice

"The Chicago Producers can probably be justly criticized for subscribing to a stock yard practice, since one of the aims and purposes of this organization is to eliminate practices which are not to the best interests of the live stock producer. The Chicago board is offering no excuse when they call to your attention the fact that during the early period of operation of the Producer agencies, it was necessary to subscribe to some practices which might be questioned in order to later effect the elimination or beneficial change in such practices. Some changes have already been effected. The agency has probably been in operation long enough by this time and is so well established that further changes might have been made had a more aggressive policy been followed.

"Mistakes can be made profitable to the organization and the Chicago Producers' board of directors will exhaust every effort to see that a mistake which has been made in the handling of the feed account of that organization will eventually react to the benefit of the live stock producers."

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Published every other Saturday by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by Department of Information, Harry C. Butcher, Director.

Entered as second class matter Oct. 10, 1921, at the post office at Chicago, Illinois, under the act of March 3, 1879. Acceptance for mailing at special rates of postage provided for in Section 1103, Act of October 3, 1917, authorized Oct. 31, 1921.

The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record.

Postmaster: In returning an uncalled-for or missent copy, please indicate key number on address as is required by law.

THE RECORD'S PLATFORM

Advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, social and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

The East Needs A Middle West

WHILE your farm adviser and his family were in the East during their vacation no other condition was more outstanding than the fact that it is a mighty good thing for the East that there is a Middle West. The East is densely populated. This population is rapidly increasing. Real farms are scarce and therefore the food supply from local sources is very limited. Most of the farms consist of rough, broken land covered with stones. Dairying is and must continue to be the chief source of production on these rough farms. Scarcely no dependence can be placed on these farms for grain, butter and meat and the various other products for feeding the Eastern United States from local production. These products must come largely from the great Middle West.

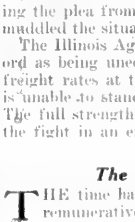
There is an exceedingly healthy demand for food in these big manufacturing centers of the East. The prices paid by these consumers are very high when compared to the prices received by Middle West farmers. These consumers are not objecting to the prices they pay for food. High wages in the factories, or at the various trades enable them to pay these high prices. Further than this the population of the East is rapidly increasing. New houses are being built by the hundreds and thousands. Hence there will be a greater and increasing demand in the future for Middle West farm products.

What should these conditions mean to the Middle West farmers? If they mean anything at all they should stimulate our farmers to the following progedure: First, organize to market farm products in order to get the largest possible share of the consumers' dollar. Second, maintain and increase production to care for the future demands.—J. R. Shinn, farm adviser, in Fulton County Farm Bureau News.

—o—

The Freight Rate Situation

THE 11 per cent increase in freight rates petitioned for the western railroads has been reduced to about 5 per cent, according to press reports.



L. J. Quasey, director of transportation for the Illinois Agricultural Association, states that very little can be done by the farm organizations until the first hearing in Chicago, the date of which has been changed to September 15 instead of the 8th.

At present there is no specific brief of the railroads upon which a rebuttal can be based, and none will be available until the hearing, Mr. Quasey states. Changing the plea from 11 per cent to 5 per cent has further muddled the situation.

The Illinois Agricultural Association has gone on record as being unequivocably opposed to any increase in freight rates at this time, maintaining that the farmer is unable to stand higher rates than he is now paying. The full strength of the association will be thrown into the fight in an endeavor to defeat the increase.

—o—

The Position of Agriculture

THE time has come in the Midwest when adequate remunerative return to the farmer must come from the operation of his farm. Dependence on increased value of land holdings will be, from now on, an uncertain if not indeed a negligible factor in farm profits.

Farm operations must be conducted more nearly like an industry and the profits must come from the operating turnover. The establishment and maintenance of farm operations on a prosperous business basis is the most important economic and social question facing the American people.

The farmers of America have in the past believed in developing home industries and have subscribed to a government policy of protecting, encouraging, and developing our industries against outside competition. With the development of industry and transportation, the laboring class was faced with outside competition from people with lower standards of living. Labor pressed and secured government protection against ruinous competition caused by immigration. The farmer did not object to protecting labor.

Agriculture will decline or develop. It cannot stand still. Shall the government interest itself in developing agriculture? Shall the government aid in establishing farming on a business basis? Can the nation afford to do less for the farming business than it has done to maintain industry and labor? We think not. Only by developing all of our resources, agricultural and industrial, can we maintain an economic balance which will make the nation prosperous and safe for all time.—

Geo. A. Fox

Executive Secretary, Illinois Agricultural Association.

Times Have Changed Since 1870

THE present revenue section to the constitution of Illinois was adopted in 1870. The Civil War had been over for five years. John B. Palmer was governor. General Grant was president.

The world has moved rapidly forward. Great changes have taken place. Look at this list of noted American inventions since 1870:

Invention	Inventor	Date
Celluloid (Hyatt)		1870
Welt machine (Goodyear)		1871
Block signal for railways (Robinson)		1872
Automatic car coupler (Janney)		1873
Typewriter (Sholes)		1873
Quadruplex Telegraph (Edison)		1874
Water gas (Lowe)		1875
Mowing machine, differential gear (Ehrlinger, E. H.)		1876
Telephone (Bell)		1876

Depth bomb, W. T. Unge		(Swedish)	1903

But we still have the same revenue section!

When the present revenue section was adopted in 1870, it was fair, in accordance with the times. In those days a man paid very near his fair portion of taxes if he were assessed on the basis of the value of his real, honest-to-goodness tangible property (the kind you can kick, hammer, stick a shovel in, plow, get stuck in, etc.).

But back in 1870 there was less intangibles. Intangibles are defined as "evidences of indebtedness," and are the kind you can't kick, hammer, etc. Since 1870 there has been a meteoric growth in credit, much of which is non-taxable. Then there are bonds, stocks, notes, debentures, bank deposits, etc. The greatly extended use of such implements of finance has changed much of the wealth of the land from tangibles to intangibles.

But through all this change, the state's revenue section has remained the same. Is it any wonder that farmers want the amendment to the revenue section? To get the amendment passed by the voters in the election of November, 1926, is one of the big projects of the Illinois Agricultural Association. The active support of every member of the Farm Bureau is needed. Support it when you and your neighbors "talk things over."

—o—

Another Expression on Freight Rates

Dear Sir: Your letter of the 17th is at hand. In regard to freight rates, I will say that any raise in rates would work a hardship on Williamson county farmers. It would also go just as hard with any other section of the state. Off hand I am opposed to a raise in freight rates, yet it may be wise to grant them as long as we build and maintain hard roads and leave them open, free gratis, to the public without any gas tax or anything of that nature. We are running a great risk of putting railroads out of business. It is my opinion that briars and sprouts will soon be growing over some of our railroads that are now in operation. On the other hand, a little lesson in economy, such as we farmers had since the war depreciation, might cut out some of their wasteful practices.—A. M. Spotzmass, Marion, Williamson county.

Mirandi Speaks Her Mind!

SURPLUS OF POULTRY PRODUCTS ON MARKET AND IN STORAGE NOW

Gougler Advises Farmers To Withhold Expanding In This Line in the Future Months

Should Illinois farmers increase their poultry and egg production in the future?

The success of expanding that phase of farm production would be very doubtful, if not unprofitable, stated F. A. Gougler, I. A. A. director of poultry and egg marketing, over WLS on the regular Friday noon I. A. A. marketing series.

"Competition is becoming mighty keen in this line" advised Director Gougler, "and only efficient producers from now on will be able to make this business pay. I do think that those producers of poultry who plan to expand their business, or individuals who now expect to enter the poultry business should move cautiously."

Cites Several Factors

When considering poultry and egg marketing problems and the future of the industry in the Mid-West, the poultry director stated that certain known facts should be studied carefully. Outstanding among these are available feed supply, all cereal grains and what they will be worth; what has been the movement of poultry products to our large consuming centers during the past six months; what are our cold storage holdings of these products now compared to a year ago; how are our exports of these commodities holding up compared to last year; what has been the outcome of this year's poultry crop, were the birds hatched early and have they been pushed to early maturity for fall and winter egg production; and, is the consuming public still hungry for our poultry products, or since pork and beef are advancing in price will this make the consumer want to change his diet?

Regarding the price of poultry feeds, it is estimated that conditions compare very favorably to last year. The costs should not advance to unusual heights, although the usual gradual increase in price from the present surplus period to the period of low grain supplies may be expected.

More Poultry in Storage

"So far this year," stated Director Gougler, "approximately 2 million pounds more of dressed poultry have been shipped to the large consuming centers than the total receipt to August 1 of last year. To be added to this is the information that we now have 37 million pounds of dressed poultry in cold storage as compared with 23 millions at this time last year or an increase of 14 million pounds. Thus we find a large carry-over facing us in the future.

"On considering the present egg marketing situation, we find that there is an increase of 116,000 more cases of eggs in cold storage than recorded at this date last year and our export in eggs has decreased as much as 450,000 cases. The reduction in our egg export is partially due to the fact that European countries, who furnished an outlet for our surplus poultry products in the past, are now reaching the point in production where they can supply their own needs.

Reports Show Increased Production

"Reports from the mid-western states indicate an increase in production this year resulting from the favorable spring season. Most of our larger producers hatched early and on many farms pullets are now coming into production.

"I have pointed out that egg consumption during the past few years has been gradually increasing per capita, but who knows how long it will continue in this direction. Perhaps the dreaded poultry disease scare of last year is responsible for the extra 14 million pounds of dressed poultry in cold storage this year over last. At least, no great increase in the consumption of poultry and eggs should be expected in the immediate future.

Illinois' present constitutional revenue section was adopted in 1870—five years after the Civil war. Support the campaign for a new one, which will be voted upon in November, 1926.

Humboldt Township Holds Record for Membership Drive

Humboldt township, Coles county, holds the record so far this year for increasing its membership, according to G. E. Metzger, director of the I. A. A. organization department.

"Humboldt township was the first to complete its membership drive in Coles county," states Director Metzger, "and it now has 30 per cent more members than it had during the past years, and has the largest increase reported this year.

"There are 47 counties who have planned to conduct farm bureau membership drives this year. Six of the Farm Bureaus have completed their sign-up, two are more than half done, and eight others are well started. Those that have proceeded far enough to show the trend of the drives indicate that there will be from 15 to 20 per cent more Farm Bureau members during the next year.

"I have visited 46 Farm Bureaus this year and have talked with their committees who are laying the plans for the resign-up of members. Practically all feel optimistic and state that they expect to be reporting a larger membership in the future."

LEEPER REPORTS POTATO FAILURE FOR THIS YEAR

I. A. A. to Assist Farmers In Buying Potatoes to Combat the Present Shortage

The Illinois potato crop is the lightest in years and it is estimated that farmers in this state will need to purchase at least 1,000 carloads to supply their requirements until the next crop season, according to A. B. Leeper, director of the fruit and vegetable marketing department and manager of the Illinois Fruit Growers Exchange.

"This crop is reported the lightest in a number of years over the entire country," stated Director Leeper, in his talk over WLS, "and no doubt the growers in the northern sections which produce late potatoes for winter use will this year receive a fair price for their crop.

"We have received numerous requests from Farm Bureaus, farm elevators and other farm organizations to assist them in locating and purchasing supplies of potatoes for farmers in their respective counties."

To Help Supply Potatoes

The Illinois Agricultural Association, in the past, has never encouraged farmers' organization in the buying phase of co-operation. Experience has shown that co-operative buying is a considerable hazard and the saving in this line is usually small as compared to the risk involved. However, the association realizes that an emergency now exists in the potato supply for Illinois farmers and arrangements have been started to assist farm organizations and rural dealers, where they so desire, in locating and purchasing carlots of potatoes this fall. The extremely low price at which potatoes have sold the last two or three years has discouraged growers and the acreage has been naturally cut down in practically all the mid-western producing sections.

"We have made a very thorough survey of the late apple crop in Illinois and estimate that this crop will be one-third larger than in 1924," stated Manager Leeper.

"We found very little fungus disease in the well-kept orchards and insect injury is less than usual. In some sections, on account of the extremely dry weather, the growers were unable to obtain water at the proper time and these particular orchards show considerable injury from the second brood of the codling moth. In general, Illinois will produce this year one of the best quality crops of late apples in years.

Ben Davis Variety Leads

"In some sections, on account of the extremely dry weather, the growers were unable to obtain water at the proper time and these particular orchards show considerable injury from the second brood of the coddling moth. In general, Illinois will produce this year one of the best quality crops of late apples in years.

"Ben Davis leads the varieties showing the greatest increase, followed by Winesaps, Jonathans and Kinnairds. The late apple crop over the entire country will show a slight increase when compared with last year. The most of this increase is in the northwest sections, Illinois and New York being the only barrelled apple states that will produce an increase crop over 1924.

"During the last week in July and the first week in August, the summer apple market suffered one of the worst slumps ever experienced. This was due to the large supply of northern grown apples forced on the market without regard to price. It was fortunate that most of the Illinois crop was marketed before this glut.

"Illini" Brand Sells Good

"Peaches this year sold at a fair price, but this was somewhat of a disappointment both to the growers and the exchange. The Illinois crop followed closely on the Arkansas shipments and reached the market at a time when the shippers and buyers, who anticipated an advance in the market, were holding on track and in storage a large supply of southern peaches. The extreme carry-over kept all markets in a draggy condition during the entire shipping season.

"Illini" brand peaches were very favorably received on the markets and in almost every case resulted in repeat orders.

"The southern Illinois tomato crop attracted more attention in the markets than ever before. Many growers shipped a number of cars of green wrapped tomatoes which made a very favorable impression. This was the first green wraps ever shipped out of Illinois. A good start was made and our product has been established on a number of markets.

"The pear crop at present is under way and is finding ready demand in the northern markets.

Merchants and Farmers Co-operate

"Business men of southern Illinois are showing considerable interest in the future fruit and vegetable industry in that section. The business men's organizations have in view assisting the farmers in their vicinity to get larger returns from their lands, and also to give the farmers and merchants an opportunity to get together and mutually work out their problems. Both farmers and business men realize clearly that agriculture and business, in general, are interdependent and that neither can suffer financial loss without affecting the others."

What Will Happen November, 1926? The Gas Tax is Inevitable; Make it a Lieu Tax.

Members of the Champaign County 4-H Club Listed to Dance at I. A. A. Picnic

Here are the girls who were on the schedule to give the Shoemaker, Kinderpolka, Chebogar, and Klappadans folk dances at the annual state picnic, Taylorville, last week. They are members of the Champaign County 4-H Club.

Their ability is not confined to dancing only, for we understand that they supervise agricultural fairs, programs, social gatherings, manage food stands and find time to go camping, besides their usual club activities.

These girls are from Rantoul, Sadorus and Ludlow. Mrs. Blanche S. Moore, Champaign county home advisor, assisted by Miss May Craw, county club leader; Mrs. Charles Boyd and Mrs. Walter Wycoff were in charge of the girls.

ANNUAL PREMIUM TO ACCREDITED COUNTY ESTIMATED $25,000

Adviser of Jasper County, Iowa, Writes of the 10 Cent Revenue On All Swine

"A premium of $25,000 a year on hogs is a profit that might well be coveted by any county whether it is located in Illinois, Iowa or any other cornbelt state."

That is the amount that Jasper county, Iowa, expects to gain during its first year as an accredited area, according to County Agent Ray D. Laflin of Newton.

In Illinois there is one accredited county and several that are on the threshold of becoming eligible for the 10 cent premium per hundred on hogs delivered to the Chicago and St. Louis markets. Thus, the extra profits acquired from the sale of hogs by the county in our sister state comes as a welcome inspiration to Illinois farmers. The premium becomes available on all hogs shipped to the Chicago market from any county designated as "modified accredited area." By that is meant that all the breeding cattle in the county have been tuberculin tested according to federal and state regulations and that the hogs have not been fed unpasteurized milk from a non-accredited county.

Farmers Getting Premium

Jasper county, Iowa, became an accredited area on March 23 of this year and since that date its farmers have shipped something over 400 carloads of hogs to market. Of this number it is estimated that 261 cars were shipped to the Chicago market in accordance with the premium requirements and have returned to the farmers of that county at least $4,264 in additional profits.

"During the past four years," writes Ray D. Laflin, county agent, "this county has annually shipped 2,300 carloads of hogs to market. These hogs were all raised in this county. If the entire crop was to receive the premium it would amount to about $37,000 a year in additional revenue to Jasper county. However, because all are not shipped according to the requirements, I believe that the annual revenue will amount to at least $25,000. I feel that a large per cent of our fall and winter shipments will receive the premium."

According to the experience of Jasper county, it is believed that the additional revenue received from the premium the first year will go a long way in paying the cost of becoming a "modified accredited area." In Jasper county it required approximately $15,000 of the state and federal funds and a like amount of the county funds, or $30,000. If the estimate of $25,000 additional revenue for the first year proves correct, Jasper county will come within $5,000 of paying for the cost by April 1 of next year, according to County Agent Laflin.

CHICAGO PRODUCERS' PATRONS MAY GET FEW CENTS REFUND ON FEED

Subscribing to Common Stock Yards Practice in Handling Feed Led to Mistake in Charging for Feed Used.

"Because they subscribed to a common stock yard practice relative to the handling of their feed account, the Chicago Producers found themselves involved in a complaint brought by the Packers and Stockyards Administration," says a statement of the National Live Stock Producers Association.

"This complaint was based upon an audit of the Chicago Producers feed account, made by a government auditor at the request of the manager of that organization.

"This audit disclosed the fact that there had been a deficit in the feed account which been made up in the following manner: It is a practice on the Chicago yards when a deficit in the feed account occurs to make up said deficit by charging the owner of live stock for feed to which his stock has access which has been left by a previous load. In this manner no shipper is charged for feed which his stock has not received and it was this practice to which the Chicago Producers subscribed in making up the deficit discovered in their feed account.

May Refund to Some Shippers

"The board of directors have frankly admitted that the facts set forth in the complaint were, in substance, true and have indicated to the Department that they are perfectly willing to abide by any decision which the Department may make in this matter. The Department has indicated that it may be necessary to make restitution in some cases; such restitution to take the form of a refund to shippers affected. In practically all cases this will not amount to more than a few cents per patron. The office is now investigating the records to ascertain to whom such restitution should be made.

Result of Undercharging

"There is also every evidence that most of this deficit was the result of undercharges to patrons on their feed accounts. When the records have been fully scanned it will probably be found that some shippers are indebted to the Chicago Producers because of this undercharge. What action the Department will take relative to these undercharges has not been indicated as yet.

"Due to the way in which feed accounts are now handled at the Chicago yards, the Department fully appreciates the difficulty in showing a definite balance at the end of the year to such an extent that feed records out of balance several hundred dollars either way are not subject to criticism by the Department. With some change in the method of handling feed transactions there is every reason to believe that feed accounts can be made to balance accurately. Suggestions have already been made to the Packers and Stockyards Administration and to the Stock Yard Company by the board of directors of the Chicago Producers, which will probably result in these changes.

Subscribed to Stock Yards Practice

"The Chicago Producers can probably be justly criticized for subscribing to a stock yard practice since one of the aims and purposes of this organization is to eliminate practices which are not to the best interests of the live stock producer. The Chicago board is offering no excuse when they call to your attention the fact that during the early period of operation of the Producer agencies, it was necessary to subscribe to some practices which might be questioned in order to later effect the elimination of beneficial change in such practices. Some changes have already been effected. The agency has probably been in operation long enough by this time and is so well established that further changes might have been made had a more aggressive policy been followed.

"Mistakes can be made profitable to the organization and the Chicago Producers' board of directors will exhaust every effort to see that a mistake which has been made in the handling of the feed account of that organization will eventually react to the benefit of the live stock producers."

THREE CO-OPERATIVE PHASES DISCUSSED AT TAYLORVILLE MEETING

Over 60 Members From Four Counties Attend 21st District I. A. A. Conference

Sam Sorrells

Co-operative oil and gas distribution, mutual automobile insurance and grain marketing were the three principal subjects of discussion at the third conference of the 21st I.A.A. district, held at Taylorville, August 26.

It is estimated that there were at least 60 representative farm bureau members present at the meeting from Sangamon, Christian, Montgomery and Macoupin counties, according to Samuel Sorrells, executive committeeman for the district, who took particular note of the desires of the farm bureau leaders in order to reflect them later to the rest of the I. A. A. executive committee. Dwight Hart, secretary of the Christian County Farm Bureau, presided at the meeting.

Following the opening of the conference, Wiley Jones, manager of the Farmers' Elevator Company, and the Farmers' Co-operative Supply Company of Willeys, addressed the meeting on the consideration of the co-operative distribution of oil and gas. Mr. Jones stated that his association has handled this product for some time with worthwhile success and saving for the organization and its members. Many of the members present showed considerable interest in the discussion that followed, although no definite action was taken at this meeting.

Ralph E. Arnett, farm adviser of Tazewell county, then told of the farmers' mutual automobile insurance company that was created and has been managed by the Farm Bureau in his county. According to Mr. Arndtt, the members of the Tazewell County Farm Bureau are well pleased with the saving in insurance costs that the company has made. From the interest shown at this meeting it is possible that mutual automobile insurande may be considered as a new project of the Farm Bureaus of the 21st district at some future time.

The grain marketing problem was discussed by C. H. Bonnell of Rosemond, vice-president of the Farmers' Grain Dealers Association of Illinois, and Chester C. Davis, director of the grain marketing department of the I. A. A. These addresses explained the principal phases of the project of joint action between the farmers' elevators and Farm Bureaus of the state. In his talk, Director Davis told of the Illinois plan for marketing grain and of the Rural Grain Marketing Company that has been incorporated recently to handle the sale of the grain produced by the members in the Chicago district. The grain program, as reviewed by Davis, includes three objectives. The I. A. A. aims to assist the already existing 600 farmers' elevators in the formation of a central sales agency for the purpose of disposing of the grain on all markets; to develop a program for the farmers of the state who do not have the advantages of a co-operative elevator; and to co-operate in the growth and improvement of the local farmers' elevators and other co-operative grain handling associations for greater efficiency and harmony.

"Modern Methods of Spreading Losses of Farm Mutuals Fire Insurance Companies," titles the radio talk to be given over WLS by Vernon Vaniman, field representative of the Farmers' Mutual Reinsurance Company, Tuesday evening, September 1, at 8:30 Central Standard time.

"Shall the Farmer Market Grain at the Terminal Markets?" This is the title of a radio talk to be given over WLS by Chester C. Davis, director of the I. A. A. grain marketing department, Friday, September 4 at 12:30.

Wicker and Lynch Tell of Meeting Of Co-operators

The American Institute of Co-operation, a summer school for officers, managers and employees of co-operative organizations and students of co-operation, which held its first annual session at the University of Pennsylvania, Philadelphia, July 20 to August 15, enlisted two I. A. A. men on its teaching staff. They were George R. Wicker, manager of the Illinois Agricultural Cooperatives' Association, and A. D. Lynch, director of the dairy marketing department.

During the third week of the institute, the school took up courses in operating methods and management of co-operative organizations and on August 3, Mr. Wicker addressed the assembly on "The External Audit as a Guide to Management," in which he told the benefits of regular and impersonal audits and reviewed the accomplishments of the I. A. C. A.

Tells Benefits of Audit

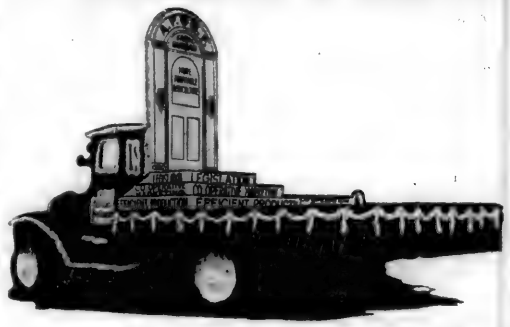
"The benefits of an external audit as a guide to management," stated Manager Wicker, "are detection and correction of errors, both in the records and the principles of accounting; the preparation of an Operating Statement, the results of which will place before the interested parties the net results of their operations; an accurate and impersonal review of the records for the purpose of presenting a Balance Sheet which will exhibit the true financial conditions of the company; the preparation of an Operating Statement, the results of which will place before the interested parties the net results of their operations; comparisons with similar exhibits covering the operations of previous years; comparisons with other enterprises of similar character; and, closer co-operation between co-operatives for the purpose of the interchange of ideas and experiences."

In telling of the benefits of regular and impersonal audits, he cited illustrations in which certain co-operative organizations were saved from failure by having an audit made that showed the present condition of the co-operative and pointed the way to improvement. Among the causes of failure of co-operative associations, according to Mr. Wicker's lecture, may be listed: lack of sufficient capital, limited credit rating, incomplete and inefficient accounting records, inexperienced managers, lack of information about the business, directors do not realize their responsibility, no reserve for depreciation, and over-extension of credit to patrons and members.

Lynch Tells of New Views

"The newest idea in co-operation," states Director Lynch, who led the round-table discussion of dairy marketing during the last week of the institute, "seems to be to select the members instead of signing up everybody in order to get full control of the product. Some associations require every member to get two members to vouch for him. Instead of enforcing the membership contracts most associations find that if the organization has the right to kick the offending member out, that it often has a better effect than suing for breach of contract. Everybody was against whirlwind membership drives because they get in a lot of people that do not understand what it is all about.

"The idea of getting control of all the product is dead forever. However, all agree a volume of business is essential to success, but it is better to have a reasonable volume from a body of good co-operators.



"A separate organization for each commodity is not regarded any more as essential. Sometimes two commodities can use similar facilities which will reduce costs and overhead for both.

Slow Progress in Buying

"Co-operative buying is making much slower progress than co-operative selling, but is proving successful in a number of cases, especially as an adjunct to co-operative selling.

"There was quite a bone of contention as to which is best—highly centralized business management or democratic control of membership. This issue will work itself out in the form of a division of responsibility between the members and the local and the central management. Some decisions need to be made by one and some by the other."

Key of Co-operation Offered Public by "Uncle Sam" on Farm Float

STARK COUNTY FARM BUREAU crystallized an idea into the form of an attractive float and won first prize during the fourth of July parade at Wyoming.

Here is a picture of the float that brought forth so much favorable comment. The color scheme in the decorations was worked out in the farm bureau colors, green and white, with the lettering done in black. During the parade, one member, representing "Uncle Sam," stood on the platform and offered the key "co-operation" to the members and non-members who rode the wagon wheel that was trailing behind the truck.

The float was planned by O. L. Hatch, county president, and Farm Adviser E. E. Brown. They were assisted in the decorating by Mrs. Harry R. Kerns, office secretary, and Mrs. Brown.

ST. LOUIS DAIRYMEN LOSE $500,000 DUE TO LACK OF CO-OP

Estimates Show Southern Illinois Farmers Lose Because of Absence of Co-operative Market

Shall the farmers have a marketing organization on the St. Louis milk market?

Leaders among the milk producers in the St. Louis territory in Illinois have said "yes" with a firm determination. They want to retain and maintain a farmers' dairy marketing organization on this market for they realize the hazard which faces them if they do not have one.

Expression of their financial support was shown when a group of the former members of the bankrupt Illinois-Missouri Co-operative Milk Marketing company got together under a new body, known as the Ill-Mo Co-operative, Inc., and purchased the physical property when it was placed on sale August 20 in accordance with the bankruptcy proceedings. The purchase price was $20,500 and covers the plant at E. St. Louis, which is strategically located, and the extensive equipment. The Ill-Mo Co-operative, Inc., is incorporated with 5,000 shares of common stock at $90 and 2,000 preferred at $50, making a total authorized capitalization of $150,000.

Sufficient funds to make a substantial payment down on the property was obtained by the Ill-Mo Co-operative, Inc., through sales of stock at $10 a share to milk producers in the area. The terms of the sale call for payment of the balance of the purchase price by November 1, 1925.

Plan Selling Stock

Plans were made immediately after the purchase to extend the stock selling campaign into all parts of St. Clair, Madison, Montgomery, Bond, Macoupin, Monroe and Randolph counties, and in other counties where there is interest. A goal was set for $25,000 by November 1. This will provide for the balance of payment and working capital. A. E. Richardson, who has been serving as manager for the Ill-Mo Dairy company, which has been operating the plant to make butter, was made director of stock sales.

The Illinois Agricultural Association was represented at the sale by Earl C. Smith, member of the I. A. A. finance commttee, R. A. Cowles, treasurer, Donald Kirkpatrick, legal counsel and A. D. Lynch, director of dairy marketing.

Finds Lack of Organization Costs Half Million Yearly

"The dismantled and disorganized condition of the St. Louis milk market which has prevailed, is now prevailing and will continue to prevail unless the farmers get an effective, conservative organization functioning upon it, is costing dairymen of southern Illinois who supply 85 per cent of St. Louis' milk, approximately $500,000 a year," states A. D. Lynch, I. A. A. dairy marketing director.

"This half million represents the farmers' rightful share which they do not get under present unorganized conditions.

"If a reasonably effective farmers' selling organization of a conservative type were now in operation, it would place this half million dollars in the farmers' pockets.

St. Louis and Detroit Compared

"These figures are based upon a comparison between St. Louis and Detroit milk markets. At Detroit there is an effective milk marketing organization serving the community. The present milk price received by farmers at Detroit is 40 cents a hundred higher than in St. Louis. The half million quoted above is based on the St. Louis producers getting 15 cents a hundred more than they are at present, or in other words, 25 cents a hundred less than the Detroit producers are now getting. The leading dairymen in the St. Louis district are well aware of this condition and express the belief that the Ill-Mo Co-operative, Inc., can be a valuable factor in finding the solution.

"A 15-cent-per-hundred increase in price is an attractive reward for the farmers in this area to abolish their petty jealousies and rally around the gospel of co-operation to form an organization that will be of mutual service to farmers, dealers and consumers."

The Ill-Mo Co-operative, Inc., has the following board of directors:

R. T. Isaacs, Gillespie, president; Fred Reis, O'Fallon, vice-president; Frank Oexner, Waterloo, secretary-treasurer; Fred Taleur, Edwardsville; George Mahlandt, Carlyle; Otto Holle, Okoville; O. C. Lynch, Robertsville, Mo.; Ross Hendon, Greenville; W. S. Blackburn, Coffeen.

Officers Confident of Future

The officers are optimistic about producers buying the remainder, but state that a well-organized, vigorous campaign will be necessary to carry direct to the producers the full meaning of the need of the farmers having their own agency on the market.

In the meantime, the plant will continue manufacturing ILLINI butter until the stockholders decide what course shall be pursued.

Let Intangibles Pay, Too

I. A. A. BOOKKEEPING SET IS TIME SAVER FOR CO-OP MANAGER

Accounting Systems Prepared by I. A. A. Department Now Installed in 34 Counties

"I find it only takes me from 15 to 20 minutes to fill out the complete record for the average load of stock, and it is well worth it, for I have the information always at hand with which to talk to some of these doubters on the value of co-operative marketing," writes E. S. Mumma, manager of the Mt. Morris Shipping Association, in discussing the value of the set of account books prepared for co-operative organizations by the I. A. A. accounting department.

That is the concensus of opinion and co-operative organizations are rapidly adopting uniform and efficient bookkeeping systems so that they may have better financial records and more information, according to George R. Wicker, director of the accounting department, when discussing the above letter.

"It is estimated that there are more than 100 bookkeeping sets prepared by our department now in use by farm organizations and co-operative business associations," states Mr. Wicker, who is also manager of the Illinois Agricultural Co-operatives' Association. "During the past seven months 51 sets of uniform accounting systems have been installed for livestock shipping associations located in 34 counties.

New System Is Complete

"The old system of bookkeeping used by many co-operatives is generally a single entry system and decidedly inadequate. When we are requested to make an audit we are often unable to find the necessary information and very few of the managers or directors know the exact financial condition of their association.

"The new system of books prepared by the I. A. A. is complete but simple in operation. The system makes it possible to have monthly financial reports which are necessary to good management of any organization or business. An association with a complete set of accounts will save time and money in auditing expense for their associations. It usually requires six or seven days to audit an association without proper records, while the operation may be reduced to four or five days under the new uniform system of bookkeeping."

Moscow Professor Says Russia Will Export More Wheat This Year

Valerian Obolensky-Ossinsky, professor of the agricultural academy of Moscow, Russia, is on a trip through the United States gathering information concerning farmers and their organizations.

While visiting at the I. A. A. office recently, he stated that Russia, in his judgment, will export 200 million bushels of wheat this year in addition to storing approximately 180 million bushels to prevent a recurrence of famine. His report is based on observations made in June, the time of his leaving Russia. Last year Russia's wheat crop was only sufficient for domestic needs.

McFARLAND WRITES ON REINSURANCE PLAN

(Continued from page 1, Col. 1.)

pointed committees to complete their pledges.

Charter Memberships Available

I hope that each Mutual Fire Insurance Company in the state will avail itself of the privilege of being a charter member and of having the honor of having a part in securing $500,000 in direct fire and lightning insurance in order to get the charter for the Reinsurance Company. One company has already sent in eight applications amounting to $22,650, another seven applications amounting to $13,500 and another five applications, amounting to $11,500.

With all friends of mutual insurance lending their assistance, Illinois can take her place in farm insurance protection alongside of her sister states, Indiana and Iowa, who have had a reinsurance company for 8 and 15 years respectively.

MISS MARY G. BURWASH, LIBRARIAN,

MR. FARMER, ARE YOU PROSPEROUS? HEADS OF RAILROADS SAY YES

Opening Statement in Hearing at Chicago Before I. C. C. Reveals Plea for Increase

Mr. Farmer, how much prosperity are you enjoying?

Upon the answer to that question largely lies the outcome of the western railroads' request for an increase of at least five per cent in freight rates.

The railroads maintain that you've been restored to prosperity. The Farm Bureaus maintain that you've not been restored to prosperity. Which is the truth? How do you answer the question?

Appearances at the first hearing before the Interstate Commerce Commission held Tuesday, Sept. 8, in the Edgewater Beach hotel at Chicago indicate that the battle front in the war between shippers vs. carriers will be arrayed along lines as pictured above.

Whipsawed Affair

The hearing was opened by Chairman Clyde B. Aitchison of the Interstate Commerce Commission with the statement that facts brought out in the sessions would apply to the Hoch-Smith resolution as well as to the western railways' request for an increase. It's a whipsawed affair—the Hoch-Smith resolution was passed by the last Congress with the intention of revising the whole rate structure of the country with the view of reducing rates on agricultural products, and on the other hand the western railroads are asking for an increase, first of 11 per cent and later rescinding to 5 per cent.

The position of the railroads was stated in the opening session by R. N. Van Doren, vice-president of the Northwestern Railway Company and chairman of the law committee of the railways represented in what is termed as the Western Freight Rate Advance Case. The opening statement, as given the press at the hearing by the Western Railways' Committee on Public Relations (publicity bureau), is as follows:

The Railways' Statement

"Further receiverships will be forced upon the western railways unless they have immediate relief from the present low level of their earnings.

"Important western railway companies are now in the hands of receivers, and other companies will follow unless financial relief is afforded them. The present low level of western freight rates, which are now only 29 per cent higher than in 1911, has been far outstripped by the rising tide of prices, wages and taxes with which we have been and are still confronted, and the western freight rate level is relatively far below that in effect in the other sections of the country.

Asking Five Per Cent Boost

"The western railways are now asking an increase of but five per cent in their freight rates, although an increase of at least eleven per cent would be necessary to yield the roads the fair return to which they are entitled, both by law and by justice. We are asking for but a five per cent increase because of the emergency of our necessity. We need additional revenue and we need it now. We have hoped that by asking for only an absolutely essential minimum that we might obtain more promptly and with less opposition this minimum of relief which we must have.

"The western railways have been operated with the strictest economy and with high efficiency. In the one matter of train loading alone, the western lines have produced economies since 1911, which, had they not been effected, would

NEW GRAIN COMPANY GETS SEAT TO SELL ON BOARD OF TRADE

Rural Grain Company Will Represent Farmers' Elevators At Chicago Terminal Market

Entrance upon the Chicago board of trade was granted to the Rural Grain Company, an organization suported by the National Farmers' Elevators Association, representing approximately 4,000 farmers' elevators in 14 states, on September 1. The Rural Grain Company is the project of the Farmers' Grain Dealers Association of Illinois and Iowa, each state having approximately 600 farmers' elevators.

The Rural Grain Company is a subsidiary of the Farmers' Elevator Grain Company, Co-operative, incorporated at Bloomington, Illinois, with total authorized capital stock of $250,000. This co-operative will act as a central company, being represented on the Chicago board of trade and other boards by subsidiary organizations similar to the Rural Grain Company. This company is capitalized at $100,000 and has $25,000 already subscribed, with $12,575 paid in. When a majority of the stock is sold, actual functioning on the board of trade will commence. Profits from the Rural Grain Company will go to the co-operatives.

Unique Organization

The object of the company, as stated in the incorporation papers, is "to engage upon the co-operative plan in a general wholesale, retail, commission, brokerage and export business in grain, hay, feed, seed and other agricultural products, and to own, lease and operate grain elevators and grain warehouses of all classes, and all other facilities necessary or incident to the business of marketing grain and other agricultural products, and to own stock in other farmers' corporations in any branch of the business above subscribed."

(Continued on page 3, col. 1.)

Milk Distribution Project at Peoria Reports Progress

Plans are getting well under way for the organization of the dairymen of Peoria, Tazewell, and Woodford counties to market their product co-operative in Peoria, according to the Peoria County Farmer, the official monthly organ of the Peoria County Farm Bureau.

It is understood that for several years, dairymen of the three counties have not been satisfied with conditions on the Peoria market and this year the county Farm Bureau members decided that it was time to work out a practical solution for the milk producers' problem.

At a meeting of 125 representatives from the three counties in June, all voted to organize and a temporary committee of seven directors were selected to investigate the ways and means for improvement.

"This committee of seven men coming from Peoria, Tazewell, and Woodford Counties, has met almost weekly," states the Peoria County Farmer. "A trip was made to Detroit, where the plan in operation there was studied carefully. After that a plan was worked out with the assistance of A. D. Lynch of the dairy marketing department of the Illinois Agricultural Association which was presented to a general meeting of the milk producers in July. They voted unanimously to proceed with this plan.

"To date about 95 memberships have been signed in Peoria county and about 15 in the other two counties. No regular membership campaign has been launched as yet. The solicitation work has been done by local men at odd times. The membership response to the association's effort will determine just how serious the milk producers are in regard to the need of an organization to better local conditions."

THRONGS ATTEND GREATEST PICNIC IN HISTORY OF ILLINOIS FARM BUREAUS; ATTENDANCE ESTIMATED AT 25,000

Horseshoe Tournament, Hog and Chicken Calling Contests, Baseball Game, Wading Pools, Swimming Tank, Playground Equipment, Speeches and Club Demonstrations Were Feature Events

TWENTY-FIVE thousand people crowded Manner's Park, Taylorville, Illinois, August 27, for the largest annual picnic ever held in the 10 years' life of the Illinois Agricultural Association.

Cars filled with farmers from practically all parts of the state began to file into Taylorville during the early part of the morning, and before the afternoon program commenced it was estimated that approximately 3,000 automobiles were parked in Christian county's 60-acre playground.

Throngs were there. Never had Taylorville seen such a mob. Never had it been privileged to entertain such a crowd. Never had an outing of the state association brought out such a large representation of its membership.

Jardine Wired Best Wishes and Regrets To I. A. A. Picnickers

Due to doctor's orders following an operation for the removal of his tonsils, Secretary Jardine was forced to cancel his engagement to speak at the annual I. A. A. state picnic, Taylorville, August 27.

On the day of the picnic the Secretary wired the I. A. A. stating his regrets at being unable to attend and extending his hearty congratulations and best wishes. The telegram read:

"I had long anticipated coming to Taylorville today and it is a great disappointment to me that conditions here make it impossible.

"However, I cannot let this occasion pass without extending to the Illinois Agricultural Association my hearty congratulations and best wishes. In my contacts with your organization I have been deeply impressed with the constructive work it is carrying forward. I am sure it will continue to reflect benefit to Illinois farmers."

Success from Every Angle

The picnic was conceded to be a success from every angle. The weather was clear and pleasant in true picnic style. Women and young people were conspicuous in attendance. For the most part people came in families. There was the picnic dinner with small groups of people scattered over the large beautiful park. It was a social occasion well enjoyed. Many families brought their lunch, but there was no lack of supplies, or delay or overcrowding at the stands for those who had to buy their noon repast.

The program was arranged to satisfy the wishes of all that might attend. In the morning for the men and boys, there was the horseshoe contest and the baseball game. For those who desired other forms of entertainment there was the band concert by the Christian county band and the speaking program at the auditorium which was crowded to its fullest capacity.

Scattered over the grounds were swings, rings, cross-bars, slides, the swimming pool, the wading pond and other playground equipment doing full duty for the younger but future farmers of Illinois.

Large Representation

Approximately every Farm Bureau in the state was represented at this farm festival. Many counties had special representatives on some part of the program. Twenty-four counties were listed in the horseshoe contest, members from 18 counties were registered for the hog calling concert, seven counties were represented for the chicken calling. Tazewell and Henderson counties were there with their baseball teams and rooters. Champaign county girls gave folk dances, Shelby county girls gave songs, drills and yells, the Christian county boys' and girls' club gave a demonstration, Farm Adviser Checkley and his delegation from Logan county put on an inspiring community sing and solos by little Miss Myrna Brooks, age 3 years. Sangamon county brought its fife and drum corp, and other counties were there with carloads of members in attendance.

Hog Calling Big Feature

The hog calling contest went over as one of the biggest features of the day.

"It was perhaps the first time such a stunt had been pulled on so large a scale," said the Springfield State Journal. "For more than a month it had been advertised extensively, even winning 'page one play' and considerable editorial comment in city and country newspapers."

Reviewing further the report of the contest in the State Journal read:

"Whoo-oey! That, dear readers, is the only proper, ethical and acceptable way to summon your swine. And don't for the old folks'

THOMPSON SCORES FORD'S FARM PLAN AT FLORA MEETING

More Limestone Now Used in Southern Illinois According to Reports at I.A.A. Conference

"Henry Ford's idea of saving American agriculture by completely industrializing farms will hold water no longer than his cars' radiators," declared President Sam H. Thompson in his speech at the conference meeting of the 24th I. A. A. district, Flora, August 25.

Thirty-five farm bureau representatives were present at the meeting from Clay, Wayne, Edwards, Hamilton, White, Saline, Gallatin, Johnson, Pope, Hardin and Massac counties. F. M. Yohe, president of the Wayne County Farm Bureau, was elected chairman for the day, with W. E. Hart, farm adviser of Clay county acting as secretary. Curt Anderson, district executive committeeman, represented the I. A. A. in summarizing the expressions of the farm bureau leaders in order to present their wishes to the other members of the I. A. A. executive committee at its regular meeting.

"I was boiling with rage after I read Henry Ford's cure-all for agriculture," stated President Thompson, who was the first speaker on the program. "His theory of larger units in farming with completely industrialized systems, strikes at the heart of the very foundation of

THE Record'S PLATFORM

Advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, social and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Justice is on the Farmer's Side

IN "The World's Work" of September, under the caption of "The March of Events," which is an editorial interpretation, there is an editorial entitled "No subsidy for Agriculture."

It is an interpretation of the federal government's attitude toward placing agriculture under the benefits of the protective system, or assisting agriculture in some other way such as was provided in the McNary-Haugen bill. The editorial pictures the general situation faced by agriculture as regards federal action for the industry. We pass it on for the benefit of farm bureau members:

NO SUBSIDY FOR AGRICULTURE

"Relief for the farmers appeared prominently in the promises of both parties during the last Presidential election. It has appeared in every general statement of Republican policy since then—and would have appeared in any general statement of the Democratic party had there been any.

The Federal Government, under the Wilson and the Harding administrations, provided the farmers with greater credit facilities than they had ever had before.

Special tariff favors have been given to special branches of farming—citrus fruits, sugar beets, etc. But the tariff cannot be made generally profitable to agriculture. Beyond the tariff favors to specialties, political help to the farmers is summed up chiefly in suggestions about co-operative selling. But this is essentially a thing the farmers must do for themselves. The government cannot co-operate with the farmers. The farmers will have to co-operate amongst themselves.

What help then can the government give the farmers? The farmers' complaint is something like this:

Whereas, the Republican party bargains to deliver prosperity through tariff protection to business groups especially if they vote the Republican ticket, and

Whereas, the Northern and Western farmers have largely voted the Republican ticket, and

Whereas, the tariff protection, which is effective for other groups, does not help to raise the price of the main farm crops, and

Whereas, on the contrary, it is a disadvantage to the farmer in raising his cost of living, be it therefore

Resolved, that the Republican party give to the farmer a benefit equivalent to the benefit that the tariff is to manufacturers.

This means some kind of a subsidy. It may be called something else. It may look like something else. But it must be a subsidy. There are only two ways to give to a particular class money taken from all the people. One way is by the tariff, the other is by a subsidy. The Republican party has always believed in special favors by tariff. It has not believed in special favor by subsidy. Yet the farmer is insistent that, if favors are to be distributed, he must get his share and that it be in a form which he can use. And *justice* is on his side. Whatever violence a subsidy does both to the science of government and to the science of economics, there is no more reason why the farmer should not have a bounty on wheat and cotton than that the American Woolen Company, for example, should have a tariff on its products, and presumably if given a bounty the farmer would behave better than the woolen company and not cut wages.

But neither justice nor logic is likely to succeed. Years ago when the farmers were a majority in this country they might have stopped the tariff or demanded for themselves an equivalent. But the Northern and Western farmers supported the tariff then as many still do. Now they are in a minority. Moreover, the high tide of their distress is over and with it the power of desperation.

There is little real benefit that the Federal Government can give them and they are not politically organized to force a subsidy on an unwilling country. Whether they can or will organize and join other forces to beat an outrageous tariff is problematical. That is the only practical amelioration which the farmer can achieve politically. In the meantime he must sell the bulk of his products without any method of stimulating sales and produce them without any method of governing production hoping that Providence and bad weather will prevent his succeeding so well as to spoil his success; for it is often that smaller crops yield more money than larger ones.

We are pleased to note that this magazine, one that carries considerable editorial weight, states that justice is on the side of the farmer. Many, and we should say most, magazines and newspapers of influence are inclined to scoff and make light of the demands of agriculture. The fact that "World's Work" holds out little hope for our success should serve to knit our fighting forces closer. Justice will eventually prevail.

—o—

Clod-Hopper or Farmer

"Senator Cuthbertson's assertion in his speech at the Farm Bureau picnic at the Fair Grounds last Thursday that the farmers are the only workmen in the world who do not have sense enough to stick together for their own benefit, appears to be true. And it also seems to be a fact that the average farmer is not interested enough in his own business to make any effort to improve his condition.

"At the experiment field meeting here Friday only about forty or fifty farmers were in attendance. This seems strange to the coal operator, the laboring man, the merchant, the banker, and even the newspaper publisher. The information obtained at the field meeting, if applied to a farm, would pay that farmer a high wage for the time spent at the meet. One little suggestion might mean thousands of dollars to him.

"The banker finds time to attend the meetings of his county, district and state association. The laboring man attends the meetings of his local in order to better himself, the merchant organizes and conducts schools of instruction, and even the overworked editor lets other business go in order to attend a meeting where he might learn some new wrinkle to aid him in getting out a better newspaper.

"Yet the average farmer, who conducts the biggest business in the world, makes no effort to better himself. He sneers at the new methods of soil treatment, refuses to absorb any knowledge on the assumption that he already knows all, and sits idly by while every other industry on the face of the earth organizes against him.

"The farmer who supports the farm organizations and who is willing to keep up with the times, will be known as a-well-to-do farmer a few years hence, while the other fellow will still be a clod-hopper."—Sparta (Randolph County, Ill.) News-Plaindealer.

—o—

The Farm Bureau Protest

THE following protest against an increase in transportation charges on products from the farm has been filed with the Interstate Commerce Commission by the American Farm Bureau Federation. It represents the stand of the national Farm Bureau and of the Illinois Agricultural Association.

1. The prosperity of all commercial activities are directly dependent upon prosperity of the farmer.

2. The government's own agencies, such as the Department of Agriculture, Department of Commerce, Department of Labor and others, whose records are available to, and may be utilized by the Commission, contain ample evidence of the general farming condition throughout the country.

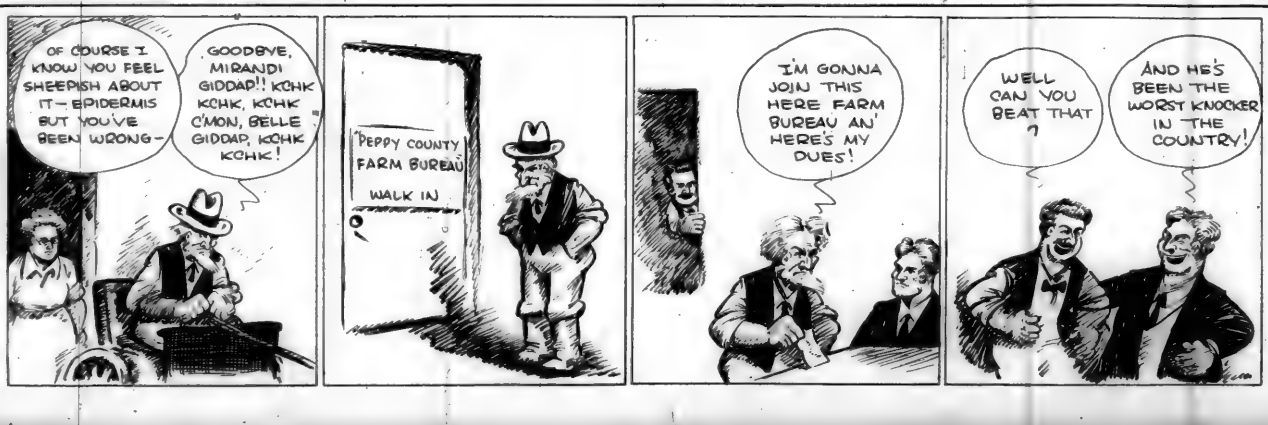
Still Serious

3. Because the present crop this year in some sections promises brighter conditions does not justify ignoring the situation which confronted our growers and shippers during the two or three years immediately prior thereto and the obligations with their resultant burdens, which that industry was and is carrying.

4. That the territory lying west of the Mississippi River is largely agricultural, therefore an increase in transportation charges in that section which included agricultural commodities, would in reality be aimed at, and a direct blow to agriculture and would cause an unbalanced and unjust tax.

5. That many rates between the western territory and the sections of the country east thereof are based on the Missouri or Mississippi River, therefore the petition threatens serious complications and may become so far-reaching as to involve through rates to and from all other sections of the country.

6. That a further general increase in all rates everywhere in the country would bring about a situation which would react on the commerce of our country and be reflected in its general prosperity.



7. That the Transportation Act now provides measures for recapturing from prosperous lines earnings in excess of certain limits, to be used for their less fortunate neighbors and we emphasize that in our opinion, the commission and the railroads should work out some plan of carrying out this feature of the law, without inflicting the public with further increases in rates.

8. That in years past, certain railroads have earned substantial returns on common and preferred stock, which in some cases was re-invested in other properties and as the public undoubtedly was a reckoning factor in contributing towards the highly successful years, that those substantial returns should also be taken into consideration at this time in determining the propriety of this petition.

9. We do not express an opinion on matters of railroad consolidations, but if the Commission is of the view that there is economy through consolidation, then this feature would also become an important factor in this case in determining if the lines in the western territory have been as active in this respect as railroads in other districts.

10. The Act also provides that "Efficiency" is an outstanding item for consideration of petitions for increases in rates—and while we are expressing no opinion at this time on this feature, yet since the commission has a department for investigating this feature, that we urge that before placing an additional tax on our products, that this item will have been thoroughly investigated.

JOHN THINKER AND EPIDERMIS FLINT. "EP" JOINS THE FARM BUREAU Mirandi Wins!

"WHOO-EY! WHOO-EY!" IS WAY TO CALL HOGS SAYS STATE CHAMPION

Hog and Chicken Calling Contests Found to Be Popular Feature at I.A.A. State Picnic

It's "whoo-oey, whoo-oey, whoo-oey" and it's delivered from the side of the mouth with the arms hanging naturally at the side, with or without gestures.

That is the answer, as far as Illinois Farm Bureaus are concerned, to the controversy over how hogs are best called that has been raging in the Middle West since announcements were made that a state-wide hog calling contest would be held by the Illinois Agricultural Association.

That is the style used by V. E. Robison of Morton, Tazewell county, who was crowned state champion hog caller of Illinois at the annual I. A. A. state picnic, Taylorville, August 27. The prize to the winner was a gold watch fob in the form of a hog.

Second place in the hog calling contest was won by E. G. Brick of Cumberland county, who used practically the same style as the winner, but lacked somewhat in volume. Emery Irwin of Menard county, who won third place, used "whoo-oey, whoo-oey, whoo-oey" with a mixture of "kip, kip, kip." The fourth was Henry Brown of Sangamon county. His style was plain but convincing.

Thirty Contestants

There were champions from 20 counties and entries in the contest included:

Morgan county—Earl Brown; Jefferson county—I. E. Beall, J. H. Payne, and W. K. Danner; Cumberland county—A. C. Gordon and E. G. Brick; Logan county—J. W. Rupp, J. W. Gardner and T. A. Gardner; Pike county—Harry Johnson; Vermilion county—J. A. Hawthorn; Marion county—W. H. Clifton; Cass county—W. P. Newell; Christian county—C. M. Brooks, William Kramer and John Chester.

Tazewell county—V. E. Robison and Jay Grosenback; Macon county—H. C. Bean; Marshall-Putnam counties—Eugene Stadel and Lewis Boyle; Greene county—Faulkner Barnes; Sangamon county—Henry Brown, Earl Coulter and Ed Baker; Shelby county—Lester Boyles; Williamson county—Jacob Krummrey and A. M. Spitznassars; Woodford county—Ed Barth; Menard county—Emery Irwin; and Jersey county—Ed Highfill.

The state chicken calling contest for the women proved to be another popular feature of the picnic. Mrs. I. N. Wooley of Marion county was declared the state champion and received the prize of a silver pitcher. Her style was more vigorous than sweet, but nevertheless calculated tremendously effective by the five judges.

The other three contestants who placed were, in order: Mrs. W. L. Fearn of Christian county, Evelyn Bell of Christian county, and Mrs. Frank Potthast of Bond county.

There were seven counties represented in this contest which included: Mrs. C. A. Hitchcock, Mrs. W. L. Fearn, Dorothy Dial, Mrs. Lewis Nash and Evelyn Bell of Christian county; Mrs. Ethel Bourne and Mrs. John Morris of Peoria county; Mrs. Earl Campbell of Montgomery county; Mrs. John W. Rupp of Logan county; Mrs. Frank Potthast of Bond county; Mrs. I. N. Wooley of Marion county; and Roberta Keller of Greene county.

NEW GRAIN COMPANY ON BOARD OF TRADE

(Continued from page 1, col. 2.)

In referring to the proposed operation of the new marketing company, S. J. Cottington, president of the National Farmers' Elevator Grain Company, Co-operative, and under whose name the board of trade membership is held, stated:

"The Rural Grain Company is formed to handle the Chicago terminal commission business for the National Farmers' Elevators Company, a co-operative company established by the farmers' elevators of Illinois and Iowa. We do not expect the company to start operations until it is amply financed by the farmers' own paid in capital.

Outgrowth of Farmers' Elevators

"This is the logical outgrowth of the farmers' elevator movement of the last 25 years, which brought into being about five thousand local farmers' grain companies. For a number of years we have been planning for the next step which would place the farmers' elevators in the terminal markets, handling the farmers' grain through their own sales agency.

"The National Farmers' Elevator Grain company will operate a general sales and service agency. Its aim wil be to assist the local elevators in moving their grain as directly as possible from the regions of surplus to the consuming centers. The terminal branch in Chicago, the Rural Grain Company, is a subsidiary of this wider co-operative company. Eventually we expect to join the farmers' elevators of other states."

I. A. A. Supporting It

The farmers' elevator people asked the United States department of agriculture for assistance in forming this co-operative and were assisted materially with it, according to J. W. Shorthill, secretary of the National Farmers' Elevator Association. The Illinois Agricultural Associaton has served the farmers' elevators in an advisory and supplementary capacity, and is supporting the movement.

Officers of the National Farmers' Elevator Grain Company, Co-operative, are as follows:

S. J. Cottington, Stanhope, Ia., president; D. H. Allen, Delavan, Ill., vice-president; Lawrence Farlow, Bloomington, Ill., secretary; and F. W. Hill, Leland, Ill., treasurer. The board of directors of the national organization includes the officers named above and Fred A. Mudge, Peru, Ill.; W. J. Lynch, Green Mountain, Ia.; Geo. L. Potter, Graymont, Ill.; W. F. Doderer, Rockwell, Ia.; J. G. Merritt, Glidden, Ia.; and G. A. Arnold, Sheldon, Ia. These, with the exception of W. F. Doderer and G. A. Arnold, also constitute the board of directors and officers of the Rural Grain Company.

WINNERS AND CONTENDERS IN I. A. A. STATE CHAMPIONSHIPS

Peoria County Farm Bureau defenders. They are Allen and Gerald Coon, aged 12 and 13, who won the championship of Peoria county against much older men and represented their county in the state championship game at the annual I. A. A. picnic, Taylorville, August 27. Allen and Gerald were strong contenders in the state match in spite of their young age.

(Above) **Male quartette of the I. A. A. grand opera,** Taylorville, August 27. They are, left to right, Y. B. Robison of Morton, Tazewell county, E. G. Brick of Cumberland county, Emery Irwin of Menard county and Henry Brown of Sangamon county, winners in the state championship hog calling contest. Mr. Robison won the miniature gold hog for being the best swine yodeler.

(Below) **State championship horseshoe pitchers** of 1924 and '25. They are, left to right, Reuben Bright and Samuel Smith of McLean county, who won the state championship horseshoe tournament at Lincoln last year, and Walter and Harry Torbert of the DeWitt county Farm Bureau, winners at Taylorville, August 27. Harry and Walter were state champions in 1923, and their father, Ed Torbert, was a member of the state championship team of 1920, '21 and '22.

Illinois Farms Have More Radios Than Any Other State in Union

More radio sets are on the farms of Illinois than in any other state in the Union, according to a nation-wide survey recently completed by the United States Department of Agriculture.

Illinois farmers have approximately 46,000 radios, which means that about 20 per cent of the farms in this state are so equipped. In other words two out of ten farmers in Illinois have radios.

In the United States, according to the survey, there are 550,000 farms equipped with radios, compared to 365,000 a year ago and 145,000 in 1923. New York and Iowa each has 39,000, and other states trail along, scaling down to 200 for Delaware.

The department's agents report that the farmers tune in not so much for grand opera or baseball or political speeches as for weather and market reports.

"Farm Bankruptcies Cause More Grief Than War", Says Wallace

"The family tragedies caused by farm bankruptcies are infinitely greater than the grief caused by the actual deaths which took place during the World War," declared Henry A. Wallace of Des Moines, Iowa, editor of Wallace's Farmer, and son of the late Secretary of Agriculture, Henry C. Wallace, in his address to the picnickers attending the annual I. A. A. state picnic, Taylorville, August 27.

"With corn at a dollar, hogs at $12 and wheat at $1.50, times are not as bad as they were in 1921. The prosperity artists hail these figures with joy but the thoughtful farmer knows that all these prices are due to scarcity and he anticipates that the new crop corn will be around 65 cents on the farm, that hogs will be $8 or less in December of 1927, and that wheat will go down to a dollar the next time the crop in the U. S. and the world at large is the least bit above normal. Moreover, in every community are found men right this minute who are absolutely ruined through no fault of their own.

"The day I left Des Moines to come to Taylorville I heard the story of an old friend with whom I had spent three years at the Agricultural College at Ames. He was the sort who studied hard and works with the Y. M. C. A. After leaving school he became a county agent but before the war came on he went to farming for himself but was not in position to make a payment down on his farm till the time of the boom. Last week he made an assignment of everything he has to his creditors and next March he and his wife and his small children will start out in the world with nothing. A few years ago he was planning on sending his children to college; now they will have to work their own way through. There are thousands of cases of this sort as we all know.

Praises I. A. A.

"For a time it seemed as though the pain of the post war farm depression would bring forth effective farm organizations but even in this there has been much bitter disappointment. True it is that the farmers of Illinois have built the Illinois Agricultural Association into a wonderful institution. And right here I want to say that the splendid work done by your Mr. Watson on taxation served as an example for our Iowa Farm Bureau which finally resulted in July of this year in a cut in farm taxes amounting to over a million dollars. The taxation work alone has justified the existence of the Illinois Agricultural Association.

"For the next five or ten years our corn belt agriculture seems to be at the mercy of the weather. In years of short crops we may get along fairly well but whenever we put a surplus on the European markets we are almost certain to get hurt unless we have the benefit of the McNary-Haugen principle. With the International situation the way it is, farmers must have the McNary-Haugen principle to put them on a position of equality until such time as our own population has increased 15 to 20 millions. A few farmers have felt apologetic about the McNary-Haugen principle when confronted by the subtle economic arguments of certain big business men. They need not be. Labor has its Adamson act and Immigration act, the Railroads have section 15-A, and Industry has its tariff and Webb Pomerene act.

Commends McNary-Haugen Idea

"The McNary-Haugen principle is simple justice and farmers should fight for it with an absolutely clear conscience. When it comes to working out the details that is another proposition which will take the best brains we can get, not only among farmers, but also among those legislators and business men who have proved themselves to be true to the farm point of view. So far as I know now, the Dickenson bill will take the place of the McNary-Haugen bill this next winter. A determined effort will be made to put it across. If it fails the next step will be to open a determined fight on those tariffs which are keeping out manufactured products from Europe."

WATSON, VANIMAN AND KIRKPATRICK TALK AT MEETING

Taxation Problems and Reinsurance Discussed at Conference Meeting, Libertyville

Wm. Webb

"Farm owners in counties near Lake Michigan are being taxed on assessed valuations based on the speculative values of subdivision property and resort sites, which is unjust to landowners of producing farms," declared J. C. Watson, taxation specialist of the I. A. A., who addressed 27 farm bureau representatives of Kane, Lake, Will and DuPage counties at the conference of the 1st to 11th districts, Libertyville, September 1.

William Webb, I. A. A. executive committeeman of the district, opened the meeting and took charge until D. H. Minto was elected permanent chairman and E. A. Carncross, farm adviser of DuPage county, nominated for secretary.

"We have found considerable difficulty in determining the proper valuation for taxation purposes that should be placed on farm lands in the counties of Cook, Lake, DuPage, McHenry and Kane," stated Mr. Watson. "In the past, assessed valuations have been made at the average selling price of all lands in the counties. This is not fair to the farmers because portions of the land near the lake and in the resort sections have been sold for speculative purposes as subdivision property and resort locations and therefore sold at figures as high as $1,000 an acre. Such values if used for taxation assessments would be unjust on land used strictly for agricultural purposes."

Reinsurance Would Save $3,000,000

"Illinois farmers could save $3,000,000 in insurance every year if there were a reinsurance company for all local mutual companies," stated Vernon Vaniman, field representative of the Farmers' Mutual Reinsurance Company of Illinois, who made the second talk on the conference program. Mr. Vaniman is representing the Illinois Association of Mutual Insurance Companies and the I. A. A. co-operating, in the formation of the new reinsurance company.

"This new reinsurance company is a mutual organization of farmers' insurance companies in the state," said Mr. Vaniman. "It supplements the activites of the local companies and puts them in a position whereby they can handle all insurance needs of the farmers on a mutual basis. It has three phases of work, specific reinsurance, direct policies, and blanket insurance. Many mutual companies cannot write insurance for over $10,000 on any one risk. By providing a company which will operate over the entire state, direct policies can be issued to take care of the insurance that is in excess of what the local company can write."

Legal Counsel Talks

The present status and past activities of the dairymen and milk distributors of the St. Louis district were discussed by Donald Kirkpatrick, legal counsel of the I. A. A. In telling of the difficulties of co-operative milk distribution at St. Louis, Mr. Kirkpatrick emphasized the importance of co-operatives producing the best quality product and using strictly the best business methods and managemnt.

Those present were: DuPage county—E. A. Carncross, farm adviser; C. C. Wimpress, William Ross, H. C. Vial and W. H. Lehman. Lake county—J. J. Doerschuk, farm adviser; D. H. Minto, Willard Darrell, J. S. Denman, Arthur Leng, W. J. Schrock, Everett Marsh, R. C. Kent, Spencer Wells, Gorm Anderson, and Sidson Gallagher. Will county—J. F. Hemcock, farm adviser; R. W. Clark, assistant farm adviser; William Welch, I. A. A. executive committeeman from the 10th and 11th districts; and L. P. Conant. Kane county—John Watt, farm adviser; Dan Davis and Lloyd Keepers.

The next meeting was set for Woodstock, McHenry county, November 24.

What Will Happen November, 1926?

Cowles and Lynch Speak at Meeting Of 18th District

Approximately 50 farm bureau representatives of the 18th district, composed of Kankakee, Iroquois, Vermilion, Edgar, Cumberland and Clark counties, were present at the I. A. A. conference meeting held at Marshall, Clark county, on September 2, according to R. F. Karr of Iroquois, I. A. A. executive committeeman of the district, who absorbed the concensus of opinions of the farm leaders in order that their wishes may be presented to the other members of the executive committee at its next meeting. J. Q. Snediker, president of the Clark county Farm Bureau, presided as chairman of the meeting.

R. F. Karr

R. A. Cowles, director of the finance department of the I. A. A., made the first talk of the day. Mr. Cowles emphasized the need and importance of having a sound financial policy for the Farm Bureaus and other co-operative organizations. An organization to be a success and accomplish the work that it should, must stand on a strong financial foundation, he said.

"Co-operative Dairy Marketing of the State" was the subject discussed by A. D. Lynch, I. A. A. director of dairy marketing. "The farm bureau members of the 18th district have two possible ways of marketing their dairy products," stated Mr. Lynch. "In certain parts of the district, it will be advantageous for the members to organize cream shipping stations, similar in operation to the livestock shipping associations. Other members may find it advisable and more profitable to sell their whole milk on the Terre Haute market."

Following Director Lynch's talk, the meeting was thrown open to a general discussion of farm bureau problems. At the present time, the Clark County Farm Bureau is starting its membership drive and considerable attention was given to the campaign.

THOMPSON SCORES FORD'S FARM PLAN

(Continued from page 1, col. 4.)

rural America — the farm home. Without good substantial farm homes, America would be like a ship without a rudder.

Taxation Important Problem

"One of the biggest problems confronting farmers and city people today is the ever increasing county and local taxes. It has reached a place where there is doubt in many people's minds as to the financial desirability of owning homes and farms. A non-home-owning United States would be a bad place to live. High taxes are causing most of this indifference to home owning.

"However, I have the good news to report to you that your present tax receipts have figures on them higher than those you will have to pay in the future. This reduction comes from the activity of the Illinois Agricultural Association in [illegible] valuations on farm and [illegible] property.

This is only a partial relief, however. The amendment to the revenue section of the state constitution, which was passed by the last General Assembly, offers a hope for relief from the present oppressive taxes on real property. All property owners, whether in city or country, should support the revenue amendment when it comes to popular vote in the fall of 1926, because it will make it possible to have a more equitable taxation system."

Poultry Marketing Discussed

The poultry marketing situation in Illinois was discussed by F. A. Gougler, director of the I. A. A. poultry and egg marketing department, who gave the second speech of the day.

"We have the same possibilities in co-operative poultry and egg marketing in Illinois as we had in livestock marketing; and, given a firm foundation, we can carry this pin-money industry as far along co-operative marketing lines as has been done in livestock marketing," Mr. Gougler said.

TAZEWELL NINE TAKE STATE CHAMPIONSHIP BY SCORE OF 8 TO 6

Five Runs in Ninth Inning Fail to Snatch Baseball Title for Henderson Farm Bureau Team

Excitement and anxiety ran at a high pitch among the farm bureau baseball fans at the Illinois Agricultural Association picnic, Taylorville, August 27, when the Tazewell County Farm Bureau team defeated Henderson county by the score of 8-6.

The game was called at 10:30 and the weather was ideal for the baseball combat. Both teams arrived in automobile busses painted with signs announcing their determination to become the second state farm bureau champions of the United States. Henderson county team had a record this year of nine games with no defeats while the Tazewell team gave evidence of practically equal strength with a record of seven games and one defeat.

Teams Have Good Records

To win a place in the final championship game, Tazewell played Peoria county two games, Woodford county three games, defeated Logan county 4 to 2 and Adams county 5 to 4. Henderson's team defeated Marshall-Putnam 8-2, Carroll county 3-0, Mercer 7-4, Knox 18-0 and Warren 6-4.

Tazewell county led off with heavy scoring the first part of the game, making one run the first inning, three the second inning, one the third period and two runs in the fourth, thus leaving the score 7-1 at the end of the fourth inning. During the next four times to bat, Henderson held the Tazewell nine to one run.

Five Runs in Ninth

The exciting part of the game came in the last inning when Henderson attempted to stage a comeback and snatch the state title during the last time to bat. When Henderson went to bat the score was 8 to 1 in favor of Tazewell. The count stood two outs and three balls when the Henderson boys rallied and the batting began. The Tazewell pitcher showed signs of weakening and the next five Henderson men made runs, bringing the score to 8 to 6. A substitute pitcher was placed in the Tazewell box who fanned out the next man to bat and finished the game with Tazewell still holding the big end of the score.

Line-ups for the two teams were as follows:

HENDERSON	POSITION	TAZEWELL
Steffey	cf	G. Israel
Hartquist	ss	Haas
G. Gailbraith	3b	B. Israel
J. Gailbraith	2bl	(Capt.) Rich
H. Pence	p	Hinman
Keener	1b	L. Carius
Ricketts (Capt.)	lf	Blumenshine
E. Pence	c	J. Carius
Painter	rf	Graff

Substitutes for Henderson—Pogue, Fryear, Clarke, Sandstrom and Downs. Manager—W. A. Stevenson and E. D. Walker, farm adviser.

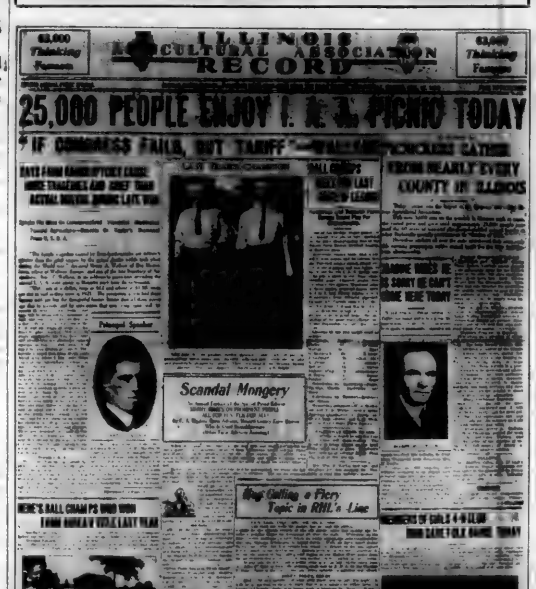
Substitutes for Tazewell—Robinson and Ellison. Managers, J. E. Harris, assistant farm adviser, and L. R. Welk, secretary of County Farm Bureau.

"The Illinois Agricultural Association is taking a higher place in the news of the nation than ever before," declared Harry C. Butcher, director of the department of information, who was the third state office speaker on the program.

Those Present at Meeting

Those present were:—Clay county—Geo. McElyea, Xenia, president, Clay County Farm Bureau; J. C. McElyea, Flora; F. W. Logan, Louisville; Clint Logan, Flora; E. R. Colclasure, Flora; W. E. Cox, Flora; Curt Anderson, Xenia; Mr. and Mrs. J. S. Anderson, Xenia; John W. Jacobs, Flora; J. L. McDaniel, Flora; Harold S. Williams, Flora; W. A. Karr, Flora; S. M. Ruckman, Xenia, and W. E. Hart, Louisville.

Wayne county—F. M. Yohe, Mt. Erie, president, Wayne County Farm Bureau; L. M. Cobourn, Rinard; G. W. Anderson, Flora; Homer Redd, Wayne City; C. T. Hufford, farm adviser; O. R. Richison, Clay.



Edwards county—H. C. Gilkerson, farm adviser.

Gallatin county—C. W. Simpson, farm adviser.

White county—William Moser, and Ed Creighton, farm adviser.

The next meeting was set for Golconda, Pope county, on November 19. A river excursion from Shawneetown to Golconda is being planned for that time.

SPECIAL PICNIC ISSUE OF I. A. A. RECORD

RAIL HEADS SAY FARMERS PROSPER

(Continued from page 1, col. 1.)

have increased their operating costs nearly half a billion dollars in 1924. The public has had the benefit of these efficiencies and economies. The amount of increased freight revenue which the carriers are now requesting is but a small percentage of the annual savings to the public.

"With regard to the Interstate Commerce Commission's general investigation of the freight rate structure of the country, now being carried on under the provisions of the Hoch-Smith Bill, and which will be considered, for the western railways, jointly at this time with the petition for increased earnings, we shall co-operate with the Commission fully.

Say Agriculture "Restored to Prosperity"

"Whatever may have been the condition of the farmers at the time the Hoch-Smith Resolution was written, whatever depression may have occurred in agriculture, such condition and depression have now been substantially, if not completely, removed, and agriculture is now restored to prosperity. In fact, the actual purchasing power of the western farmer is now greater than in the pre-war days.

"For these reasons, therefore, we ask that agriculture shall pay its full share — no more — of the western transportation charges. Substantially 25 per cent of the freight traffic of the western railways consists of agricultural products and live stock. We are performing a valuable and essential service to the western farmer. For this service we are entitled, both in law and in justice, to a fair return, which we are not now receiving. Under the present conditions, we could almost hope for co-operation with, rather than opposition to, our petition for increased earnings."

Statistics Introduced as Evidence

Statistics were then introduced through L. E. Wettling, manager of the Statistical Bureau of the western railroads, from the witness stand. A printed, 33-page book, representing the work of his bureau, was the basis for his testimony, several hundred copies being distributed to the audience. This was entered as Exhibit 1. A summary of his statement, which was hailed as the keynote of the railroads' position, as given to the press by the publicity bureau, is as follows:

"This unfortunate situation has been brought about by the reductions which have been made in western freight rates since 1920, benefiting the shipper at the expense of the railways. In August, 1920, western freight rates were increased approximately 32 per cent on the average. Immediately after this increase, downward readjustments were commenced which have continued to the present time, augmented by general rate reductions made by the Interstate Commerce Commission in 1922. Freight rates in western territory in 1921 were 2 per cent below the level established in August, 1920. Freight rates in 1922 in the west were 11 per cent lower than after the rate advance in 1920; in 1923, 15 per cent lower, and in 1924, more than 16 per cent lower. This means that railway rates in the west have been reduced approximately $850,000,000 in the past four years below the level fixed by the Interstate Commerce Commission in 1920 as calculated to yield the railways a fair return. Present rates are now more than 16 per cent below that level, and in the past four years western shippers have been saved an aggregate of $850,000,000 in freight charges at the expense of the railways and their fair return."

Jackson Represents Farm Bureaus

The Farm Bureaus including the Illinois Agricultural Association, have secured as counsel Fred S. Jackson, former attorney general of Kansas and who for four years was attorney for the Public Utilities Commission for that state.

Those who remember the freight rate fight of 1921-22 will recall Mr. Jackson as an associate of Clifford Thorne, the firm name being at that time Thorne and Jackson. He was active in assisting the Farm Bureaus get the 10 per cent reduction gained at that time.

He will co-ordinate for the American Farm Bureau Federation the testimony of the state Farm Bureaus. In this capacity he represents the Illinois Agricultural Association, which will assist him through its transportation department. Although the I. A. A. is pooling its interest in the fight with the other 21 western states concerned, its identity is being maintained in case anything should develop pertaining to rates within the state which would call for action as an individual organization.

The position of the I. A. A. is expressed in the protest against any increase in freight rates on farm products recently filed with the Interstate Commerce Commission by the American Farm Bureau Federation. The text of this protest appears on the editorial page.

TORBERTS AGAIN WIN HORSESHOE CONTEST

Winning seven out of eight games again made Walter and Harry Torbert of DeWitt county, the state horseshoe champions at I. A. A. state picnic, Taylorville, Aug. 27.

The tournament started with 24 teams representing the best skill from the same number of counties, and continued throughout the day until nearly five in the afternoon, when the loving cup was publicly given to the DeWitt boys. These brothers won the championship in 1923 and their father was a member of the championship team of 1920-21 and 22. Last year the cup went to Reuben G. Bright and Samuel G. Smith of the McLean county pitchers.

From the time the tournament started this year, anticipation ran high regarding whether McLean or DeWitt county would win the championship this year. In the early part of the contest it happened that the draw placed the two teams together in one of the hardest fought games of the day. In the first game Walter Torbert had 18 ringers and 35 points, Harry had 9 ringers and 15 points, while Bright had 10 ringers and 11 points and Smith 14 ringers and 27 points. Following this game, it was realized that the Torbert boys were in better form than the champs of 1924.

Three times during the tournament, these two teams were thrown together, the McLean pitchers winning the second game and the Torberts taking the final by a score of 46 to 52. The Torbert boys played eight games during the day and won seven. The McLean team lost two out of eight.

GREATEST PICNIC IN I. A. A. HISTORY

(Continued from page 1, col. 5)

sake, let any of these 'soo-oey' guys kid you into believing it isn't.

"For the question, be it known, has been settled once and for all, following weeks and weeks of bitter controversy. And after all was over, Christian county's 'piggies' nearly killed themselves laughing at the whole 'soo-oey' crowd.

"A little gold pig, to be worn on the watch chain, will be given by the I. A. A. to V. E. Robison, of Morton, Tazewell county, Poland-China breeder, for his perfect acquaintance with and execution of the swine 'lingo.'

Peppy Chicken Calling

"For the soprano voices, the chicken calling contest offered an event for both competition and entertainment. Twelve farm women tried their voices and the silver pitcher, which cannot be broken at the pump, went to Mrs. I. N. Wooley of Marion county. To win first place, Mrs. Wooley did not resort to any fancy stuff. She just yelled:

"'Chick, chick, chick,' all the while encircling her head with her right arm and twirling imaginary feed in the direction of the make-believe brood. It is understood that she is gaining quite a reputation as a barnyard vocalist for she has won several contests at local and county fairs this year, one of which awarded her with a prize of fifty cents."

The speeches of both morning and afternoon were enjoyed by all and easily heard either inside or out of the auditorium due to the amplifier supplied through the thoughtfulness of the picnic committee.

Wallace's speech was hailed by many as one of the best ever heard in those parts. He reviewed, as he sees them, the farm problems of the past and the prospects of the future from both the economic and financial point of view.

Special Edition of RECORD

The surprise of the day came when all were ready to start home. As the cars passed out through the gates, the picnickers were handed copies of the special picnic edition of the Illinois Agricultural Association RECORD just off the Taylorville Breeze press telling all about the events of the day. Speeches were covered in full, ready to be thoughtfully pondered over at home. 8,000 copies were printed.

The success of the picnic was illustrated by the way people lingered at the park until nearly dark, even after the program had been completed. It was a big day and those that were present regretted to see it close.

ILLINOIS POULTRY CROP TOTALS OVER $63,000,000 YEARLY

Illinois Now Ranks Second in Poultry and Egg Production States Director F. A. Gougler

Illinois hens laid $59 worth of eggs each minute during 1924. That is the record of our biddies according to F. A. Gougler, I. A. A. director of the poultry and egg marketing department, who has made a summary of poultry and egg production in this state as well as a study of the losses now involved in our present inefficient system of marketing.

F. A. Gougler

"The annual income derived from poultry and eggs in Illinois last year was no less than $63,000,000 and this state now ranks second in total production in this country," states Director Gougler. "This important farm enterprise, commonly thought of as a source of pin money, has now become one of the largest industries in the United States and for the entire 48 states is considered as a billion-dollar crop annually.

"In this country the total production of poultry and eggs now exceeds by $300,000,000 the value of the total wheat crop; is three times the value of the entire tobacco crop; nine-tenths as great as the value of our swine production; and greater than the total value of all cattle raised.

Lay 24 Carloads in Day

"Hens in Illinois last year laid an average of three and a quarter dozen eggs each second, 196.7 dozen per minute and 11,802 dozen, or one carload every hour. In terms of income, the 24 carloads of eggs produced each day or 8,498 cars annually, amounted to a daily income for Illinois poultrymen of $84,975.60 or an annual total value of more than 30 million dollars.

"The losses in this industry also amount to a large total. From surveys made by the agricultural department at Washington and authorities in this state, it is estimated that the total loss in the United States due to spoilage, breakage and inefficient handling from the time the egg is produced on the farm until it reaches the consumer is $45,000,000 annually. For the state of Illinois our proportion of this loss can be no less than four million dollars while our larger poultry and egg producing counties contribute toward this loss at the rate of $25,000 to $30,000 each year.

"It is difficult to place the exact responsibility for this loss. However, these same investigators state that at least half of the loss is due to the condition under which eggs are handled on our farms. The next largest contributor toward this spoilage is the country store or the first receiver of the eggs. This is because these stores are not properly equipped to handle so perishable a food product as eggs.

I. A. A. Suggests Remedy

"Who pays this loss? The dealer doesn't, or he couldn't stay in business. He is compelled to buy eggs at a low enough basis to permit him to pay this loss out of profits. In other words, the producer of good eggs is penalized in order that the producer of bad eggs may receive a price to which he is not justly entitled. This is the situation which the I. A. A. seeks to remedy by a marketing program.

"This enormous waste is due

(Continued on page 4, col. 5.)

INSURANCE FOR NEW COMPANY TOTALS OVER $300,000.00

Vaniman Asks Local Mutual Companies and Farm Bureaus To Assist in Solicitations

"A total of $317,000 of the $500,000 in insurance needed to secure the charter for the Farmers' Mutual Reinsurance Company of Illinois has been received at the state office," stated Vernon Vaniman, field representative of the new company, in a plea to local mutual companies and county Farm Bureaus to lend their support in getting the state mutual under way. "Thirty-seven counties have sent in applications and seven counties have reached their quota of $20,000 in insurance applications," he said.

"Illinois farmers are losing $3,000,000 annually on farm insurance due to the fact that local farmers' insurance companies cannot take care of all farm needs in the absence of a state reinsurance company," stated Mr. Vaniman, "and you can help the reinsurance company secure its charter and save this loss by sending in an application for insurance immediately.

"The reinsurance company does not oppose but is a supplement to local mutual companies. It will put the local companies of the state in a position to handle all the fire and lightning insurance needs of the farmers on a mutual basis with greater protection to themselves."

Best Plans of Any State

In referring to the complete organization and operation plans of the new reinsurance mutual company, a prominent mutual insurance man, who has been in the front ranks on all progressive movements, made the following statement in a letter to William B. McFarland, secretary of the state company.

"A pretty careful examination of the plans of the new company convinces me, and I am of the opinion that they are good, in fact better than any other state plans that I have seen. One practically good feature is that they in no way interfere with the present practice of exchange of reinsurance under the present law of our state."

Do Not Carry Enough Insurance

Recent surveys of farm insurance in this state show that most farmers have neglected to increase their insurance to cope with the increase in value of their property. Many farmers do not have their property insured for more than 50 per cent of its value. An illustration of the danger of this practice is the case of C. W. Broughton of Waterman, DeKalb county. On September 4, two modern dairy barns owned by Mr. Broughton were burned down. His loss was estimated at $34,000 while the insurance he carried was $8,000.

To begin operation the reinsurance company must have applications for $500,000 insurance from individuals. This is required by the Illinois Law. Mr. Vaniman is making personal solicitations through local farmers' mutual insurance companies for these subscriptions. The work is progressing rapidly. To hasten the time when the company may begin operating, farmers throughout the state are asked to consider their insurance needs and if they can use more protection to get in touch with the new reinsurance company through their local farmers' mutual representative.

Seven Counties Complete Quota

Counties that have sent in applications in the new company are: Adams, Bond, Cass, Christian, Clark, Cook, DeKalb, Edgar, Ford, Franklin, Hancock, Henderson, Henry, Iroquois, Jackson, Jersey, Knox, LaSalle, Macon, Madison, Marshall-Putnam, Mason, McHenry, McLean, Mercer, Montgomery, Ogle, Peoria, Pulaski, Rock Island, Sangamon, Schuyler, Vermilion, Wabash, White, and Winnebago.

Counties that have sent in their quota of $20,000 in applications are: Cass, Henderson, Henry, LaSalle, Montgomery, Pulaski, with $39,000 in applications.

174 **Contract membership in the** Illinois Agricultural Co-operatives' Association, the co-operative auditing and business advisory service, has now reached the high mark of 174. The latest organization to send in a contract was the Woodford County Agricultural Association, a co-operative seed company located at Eureka, Woodford county, according to George R. Wicker, director of the association.

FIRST HEARING OF WESTERN FREIGHT RATE CASE FOR FIVE PER CENT INCREASE BEFORE I.C.C. ADJOURNED; NEXT HEARING OCT. 26

Railroad Attorneys, Hired Economists and Representatives of Security Holders Testify at Hearing Held in Chicago; Farm Organizations to Defend the Farmers at Second Session

"Undoubtedly from the standpoint of the farmers of America, this has been the most important hearing ever held," declared L. J. Quasey, I. A. A. director of transportation, following the adjournment of the first hearing of the Western Freight Advance Case before the Interstate Commerce Commission, Chicago.

"At this hearing the representatives of the railroads attempted to show that they have been unable to make the percentage returns on investments allowed public utilities and that the farmers of the West are prosperous and fully able to stand an increase of at least five per cent in freight rates. At the second hearing, which will be held next month, the Agricultural representatives will attempt to convince the Interstate Commerce Commission that the proposed freight increase of one cent per bushel on all grains is of itself an unfair increase as compared to the five per cent increase asked for non-agricultural products," stated Director Quasey.

"According to the carriers' statements they show property investment for the western railroads to be $9,179,081,978 as of December 31, 1924, and on this property investment they have earned an average rate of return of 3.42 per cent," he declared. "They have shown that the cost of labor, equipment and materials has been greatly increased and that they also suffered a very heavy increase in taxes. The railroads' witnesses contend that the 5 per cent advance would not be sufficient to enable them to earn the 5½ per cent authorized under the Transportation Act. Their reason for asking for 5 per cent was that they considered it as an emergency measure and further that they anticipated some increase in revenue from other sources, such as in the carrying of mail and express and other rate adjustments now pending.

Says Purchasing Power Greater

"Not all commodities are proposed to be advanced. It appears that considerable lumber and coal traffic will escape any advance whatever according to the present plans and there may be further exemptions. All this will mean that the greater burden will fall upon agricultural products. These matters will be gone into completely when the hearing is resumed for the purpose of cross examination of the railroads' witnesses.

"To show that the farmer has recovered from the financial depression, they have used the Department of Agriculture reports as a basis, purporting to show that the farmers' purchasing power today is greater than before the war. They mentioned nothing about the increased cost of labor, equipment and materials used on the farm, nor that the farmers' taxes were likewise increased heavily.

"The showing about the farmers' recovery from the financial depression is purely a paper showing and in subsequent hearings the records will be replete with evidence of farmers by farmers showing their true financial condition."

Second Hearing October 26

The hearing in Ex Parte 67, which is the petition for advance in rates of the western railroads, and docket 17,000, which is the investigation of the freight rate structure in accordance with the Hoch-Smith Resolution, was adjourned at noon, September 16, at the Edgewater Beach hotel, Chicago. The hearing has been conducted for more than a week. The railroads made their principal testimonies and representatives of the railroad security holders appeared in support of the petition. With few exceptions,

(Continued on page 3, col. 5.)

Peoria County Farm Bureau Officer Says Don't Neglect Your Home

In the September issue of The Country Gentleman there is an article concerning one of our Farm Bureaus and I. A. A. leaders. It reads as follows:

You will find bigger, gaudier farms in Peoria county, Illinois, than the home, at Edwards, of Charles R. Ford, president of the county Farm Bureau. But none breathes a more satisfying air of home. The house is roomy and cosy, the other buildings neat, the fields clean and well fenced.

Said Mr. Ford: "I could never see anything to living in a bare home and slaving to salt away dollars. That's self-robbery—beating yourself out of happiness, and a mean trick for a man to play on himself and his family.

"There's some sort of relationship between beautifying a farm and successfully operating one—so much so that you can come close to picking out the really good farmers by the tidiness of their farms, when driving along the road.

"The farm matter which will be a live issue this winter is the McNary-Haugen idea as revived in the Dickinson bill. Today, because of the accidents of weather there is no great surplus of wheat or pork but in the normal course of events, we shall soon again have 100 million surplus bushels of wheat and one and a half billion pounds of pork products to send to a Europe which is unable to pay us anything which we will take.

Wallace assailed the "commercial" viewpoint taken by Secretary Hoover and his followers. He said that the seat of the trouble that caused the dismissal of Dr. H. C. Taylor as head of the Bureau of Agricultural Economics was a clash of viewpoints toward farming. Dr. Taylor, he said, has the agricultural viewpoint while the interests which unseated him wish to industrialize America which can only be done, under present conditions, at the expense of agriculture unless protective measures as enjoyed by industry and labor are extended to the farmer.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Published every other Saturday by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by Department of Information, Harry C. Butcher, Director.

Entered as second class matter Oct. 10, 1921, at the post office at Chicago, Illinois, under the act of March 3, 1879. Acceptance for mailing at special rates of postage provided for in Section 1103, Act of October 3, 1917, authorized Oct. 31, 1921.

The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record.

Postmaster: In returning an uncalled-for or missent copy, please indicate key number on address as is required by law.

OFFICERS

President, S. H. Thompson, Quincy.
Vice-President, H. E. Goembel, Hooppole.
Treasurer, R. A. Cowles, Bloomington
Secretary, Geo. A. Fox, Sycamore.

EXECUTIVE COMMITTEE
By Congressional Districts

1st to 11th.....William Webb, Route One, Joliet
12th.....G. F. Tulleck, Rockford
13th.....C. E. Bamborough, Polo

THE FARMER'S PLATFORM

Advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, social and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

The Epidemic of Prosperity Fever

For the past two months both city and country newspapers have been publishing news stories and editorials heralding the return of prosperity to mid-western farmers. With true newspaper optimism we have read of the bumper crops and higher prices. It has been said that the farmer is now in a better financial condition than at any time since the World War.

It is true that the economic condition of the farmer is improved and it brings cheer to all whether they depend entirely upon the profits of the farm for support or are merchants or manufacturers who hope to sell their products to the farmer. It is realized that the prosperity of the country depends basicly upon the prosperity of the farmer and it is for that reason that the news of improved conditions in rural sections is received so joyously by those who live in the cities.

However, it must be remembered that although a baseball team has a lucky streak and makes several scores in any one inning, it does not necessarily mean that the team will win the game. Every team has its innings but it is the final score at the end of the ninth inning that counts. So it is with the farmer. Today is his inning. As compared with the past five years, he is prosperous. His farm is perhaps producing at a profit. Nevertheless, if the present income should be averaged with that of the past half decade, there would still be a loss on the books.

A review of the present condition of Illinois agriculture and a warning to farmers against too ready acceptance of the prosperity was made by President Sam H. Thompson, in an interview with the correspondent of the Christian Science Monitor, in which he stated:

"Economic conditions in Illinois agriculture are better now than at any time since the war, and the prospects are even more favorable for the future, but it will require intelligent marketing and conservative spending of the proceeds for the farmers to secure to themselves, and not lose to others, the benefits of this situation.

"There is a tendeney to exaggerate the improvement in the situation of our farmers, and on this account a warning should be sounded. Farmers are still faced with the marketing machinery in which the law of supply and demand works quickly against them, but mighty slowly in their favor.

"Farmers of this State are being flooded as never before in their experience by 'high pressure' salesmen of every description, attracted by rosy reports of returning farm prosperity, attempting to dispose of investments, building projects, household equipment, automobiles and machinery, in fact, everything that is sold.

"The danger in this development, is that the farmer will be overloaded with things he really would not buy if guided by conservative common sense. The tendency with business of every kind today is to pile onto buyers not only everything they can pay for, but everthing they can ever hope to pay for in a lifetime.

"The people, caught in the propaganda of free spending to make business good, are showing an alarming willingness to assume obligations which they have no right to saddle upon themselves. The farmer, like everybody else, must fight the tendency of the age to live beyond his income. The Illinois farmer in the present situation should resist the impulse to spend.

"That is the one important thing for the Illinois farmer to do—adjust his buying sensibility to his income—if he is to secure to himself the benefits of the present upward trend. He is already heavily in debt and has made very little progress toward liquidation of loans made to tide him over the last four years. Until that condition is changed he will have little time to listen to the 'high pressure' salesmen who flock to his gates."

—o—

Why Not a Tariff Reduction?

Farmers in the Middle West are growing thoughtful over the flat declaration of William Green, president of the American Federation of Labor, that protected industry will not be permitted to retain its tariff favors if labor can help it, unless labor itself receives what it considers a proper share in the protection benefits.

A ten per cent cut in textile mill wages provided the text for the letter which Mr. Green wrote the American Woolen Company. He said in part:

If a tariff wall is built in order to protect special interests and special industries against competition from manufacturers, certainly when manufacturers protected by such a tariff wall reduce the wages of their employees below the subsistence level, the Government, in all fairness, should reduce the tariff schedules and tear down the tariff wall which has been so skilfully built. It is the purpose of the president of the American Federation of Labor to bring these facts to the attention of Congress, and to insist in the name of the working people of America that the textile manufacturers who have inaugurated and carried out a policy of wage-reductions shall be deprived of special privileges and special benefits which they have enjoyed from high-tariff protection.

These are ominous words, viewed from the self-interest of the eastern manufacturer, but no more disturbing than the mutter of similar opinions arising from the great surplus crop producing areas of the corn belt and the Northwest. Men and women of the farms have a clearer view of the tariff and of other devices in the American protective system than they had a few years ago. They understand them as interferences with the natural economic law in the interest of special industrial groups.

The labor leader's letter, with a slight change or two, expresses the conclusion which many a cornbelt farmer has reached as he has wrestled with his problems since 1920.

Congress has heard by no means the last of the slogan "Equality for Agriculture," as expressing the demand that if the protective principle is to be maintained in this country, an extension of its effects must be made to cover the great surplus crops of the farm.

H. A. Wallace, editor of Wallace's Farmer and son of the late secretary of agriculture, Henry C. Wallace, referred to the possibility of forcing a reduction in protective tariffs in his address at the annual I. A. A. picnic, Taylorville, in which he said:

> So far as I know now the Dickinson bill will take the place of the McNary-Haugen bill this next winter. A determined effort will be made to put it across. If it fails, the next step will be to open a determined fight on those tariffs which are keeping out manufactured products from Europe.

A fight for the reduction of tariffs on imported manufactured products would be a drastic measure. However, if the commercial interests of this country will not recognize the voice of the rural population, it is possible that such a battle may be waged during the coming session of Congress.

—o—

Their Best Defense

"A strong offense is the best defense" appears to be the principle that the western railroads have adopted in their demand for a five per cent increase in freight rates before the Interstate Commerce Commission.

It will be remembered that during its last session Congress passed what is known as the Hoch-Smith Resolution which asked the Interstate Commerce Commission to conduct a thorough investigation of the railroad freight rate structure for all roads in all sections of the United States, having in mind the reduction of freight rates on certain agricultural products where such reductions are deemed advisable. This resolution was the result of a plea by farm organizations, representing the American farmer, stating that many rates were unjust and too high.

Although it is a known fact that the railroads for some time have attempted to increase the freight rates on certain products, it would appear that their request for an increase, at this time, is a strategic move on the part of the railroads. Railroads' representatives have insisted that the five per cent increase does not cover the entire needs of the railroads, and is merely an emergency request. From this we judge that the railroads believe that by asking for an increase they will counteract any tendency toward a reduction in rates, thus holding the structure in its present condition and defeating the agricultural purpose of the Hoch-Smith Resolution.

—o—

An Expression on Freight Rates

Dear Sir: Relative to your letter of July 7th regarding taxation, I wish to say that agriculture has of necessity reduced itself to economic conditions that hurts productive enterprise and social conditions on the farm. This is not of choice but of necessity from the relation of other occupations.

With some prospects of farm markets improving, it would be disastrous to the morale of the farmer to have freight rates advanced before he has recovered from post-war conditions—L. M. Swansey, President, Stephenson County Farm Bureau, Freeport.

JOHN THINKER AND EPIDERMIS FLINT. "Ep" Has Joined but Still Kicking. MIRANDI KNOWS.

ILLINOIS FARMERS BREAK RECORD FOR USE OF LIMESTONE

Illinois Exceeds Other States In Use of Agricultural Limestone, States Director Bent

Again Illinois has broken all records in the use of agricultural limestone. Farmers of Illinois have ordered more limestone this year than any previous year in history. Not only have they exceeded their own record but they have ordered more limestone this year than has ever been used in any state in the country for any year, according to J. R. Bent, director of the I. A. A. phosphate-limestone department.

"The amount of agricultural limestone being used by Illinois farmers," states Director Bent, "has increased to such a large quantity this year that many limestone plants and quarries have shipped the entire reserve supply and are from 20 to 30 days behind on orders.

"The flood of agricultural limestone orders has resulted in delayed shipments from some plants and serious overloading of orders at other plants. I have written many quarry operators to determine their respective supply on hand and which plants are required to delay their orders.

"From their replies, we found that many of the quarries have shipped all of their reserve supply and must fill all orders within 10 to 30 days while other plants are still in a position to make prompt shipments. Before placing their orders, farmers should determine through their farm bureaus from which they can receive the prompt shipments.

Color Matters Little

"Good limestone may have either a blue, brown, white, or yellow character in color," states Director Bent, in referring to several inquiries that have come from farm bureau offices.

"Frequently I have received complaints from districts that have been accustomed to using a white stone, especially if such districts have made purchases from some new or different source having a stone of a different color. There are several reasons for the color of limestone. It may be that the supply has come from a layer which contains traces of iron that are unobjectionable but give the product a dark color. The color often varies with the location of the quarry and the ledge from which the limestone is taken.

Explains Reason for Coarse Stone

"Another source of complaint has been the presence of coarser or larger sizes of stone in the shipment. This may be due to one of three things:

"The shipment may have been loaded into a car that was not clean and had already some of the coarse stone in it. It may have been loaded off a stock pile which may have been piled adjacent to another pile of a coarser size and the two got mixed. It has sometimes happened that chutes or bins carrying coarser sizes at the crushing plant have blocked up and spilled over into the agricultural bin. When shipments are received which contain too large a percentage of such coarse stone, which causes trouble in the spreader, the facts should be reported to this department in considerable detail as to the size and the quantity of the coarse material complained of and also as to whether or not it was scattered or mixed all through the shipment or was found in only one or two spots in the car."

OFFICE VISITORS

Visitors to the I. A. A. office:

H. J. Shafer, executive committeeman, Macon County Farm Bureau and president of the Illiopolis Farmers' Co-operative Elevator, Illiopolis; and W. K. Shafer, his son; J. O. Lawrence, Sales Manager, Illinois Fruit Growers Exchange, Centralia; R. E. Rickheel; E. A. Duddy; C. D. Stevens, Elevator Engineer; Mr. McGann, from the Michigan Central railroad; C. F. Nattlehoffer, Naperville, Illinois; A. J. Surratt, Agricultural Statistician, Springfield; Professor Valerian Obelensky - Ossinsky, Agricultural Academy, Moscow, Russia; N. A. Olsen, Assistant Chief, Bureau of Agricultural Economics, U. S. D. A., Washington, D. C.; President Settle of the Indiana Farm Bureau Federation, Indianapolis; J. D. Billsborough, Assistant State Leader of Farm Advisers, Urbana; S. J. Cottington; Henry Wallace, Wallace's Farmer, Des Moines; Mr. Albaugh of the Bureau of Agricultural Economics, U. S. D. A., Washington, D. C.; Mr. Zealand, President of the American Council of Agriculture; Mr. Fred Davy, Berry, Illinois; Congressman L. J. Dickinson, Algon, Iowa; Herman Steen, Secretary Indiana Wheat Growers Association, Indianapolis, Indiana; Walton Peteet, Secretary National Council of Cooperative Associations, Washington, D. C.; E. P. Taylor, organization department, American Farm Bureau Federation; Mr. Harvey Hill, Chamber of Commerce; Dr. H. A. Ruehe; Professor W. H. Smith, State Leader, Farm Advisers; J. W. Lloyd, Chief Olericulturist; F. C. Bauer, Professor of Soils; L. E. Card, Chief of Poultry Husbandry Department, University of Illinois; B. F. Taylor, Midwest Crushed Stone Company, Greencastle, Indiana.

I. A. A. Committee Elects Delegates To A. F. B. F. Meeting

Delegates to represent the I. A. A. at the annual meeting of American Farm Bureau Federation to be held December 7-9 in Chicago, were elected by the executive committee during its last meeting.

Those who were elected as delegates are: Sam H. Thompson of Quincy, president of I. A. A.; Frank D. Barton of Cornell, executive committeeman of the 17th district; Earl C. Smith of Detroit, committeeman of the 20th district; and, J. L. Whisnand of Charleston, committeeman of the 19th district. Alternate delegates will be G. F. Tulock of Rockford, committeeman of the 12th district; A. R. Wright of Varna, committeeman of the 16th district; and Samuel Sorrells of Raymond, committeeman of the 21st district.

Other principal subjects that were discussed at the meeting were:

1. Treasurer's report read, approved and placed on file.

2. Report on the sale of the Ills Mo Co-operative Milk Producers' Association property, St. Louis, made by R. A. Cowles, director of the I. A. A. finance department. This subject was supplemented by a report made by Wm. Webb, chairman of the dairy advisory committee.

3. Report of L. J. Quasey, director of the transportation department, on Illinois' interest in the freight rate increase of 5 per cent brought before the Illinois Commerce Commission by the railroads. Mr. Quasey told of the means of co-operation with other organizations. No definite action was taken by the committee.

4. The subject of farm legislation to be taken up at the next congress was discussed and referred to the legislative committee to be reported on at the next meeting.

5. H. E. Goembel of Hooppole, chairman of the grain marketing advisory committee, reported on recent developments in co-operative grain marketing, the formation of the Rural Grain Company and its membership on the Chicago board of trade.

6. Report of the department of taxation and statistics was made by J. L. Whisnand, chairman of the advisory committee of that department. Mr. Whisnand stated that J. C. Watson, director of the department, is a member of the temporary committee appointed for the purpose of establishing a large permanent committee of all important organizations in the state for the purpose of urging the adoption of the proposed revenue amendment to the state constitution.

7. Motion made that the I. A. A. give a breakfast to the boys and girls club members of Illinois who will attend the club congress to be held during the week of the international livestock show, Chicago.

8. Report of the activities of the department of information made by R. F. Karr of Iroquois, chairman of the advisory committee of the department.

9. Report of the phosphate-limestone department made by Stanley Castle of Alton, chairman of the advisory committee.

10. Motion made, seconded and carried that the next meeting of the executive committee be held on October 8.

Co-operation is Only Salvation For Farmers, Says F. O. Lowden

"I cannot tell whether rain is a sweet and fragrant bearer of a benefit or bankruptcy—when the hot summer winds scorch the fields, I do not know whether to pray for rain or thank the Almighty for the unbroken drought," declared Ex-Governor Frank O. Lowden, when discussing the fact that a short corn crop has a greater total value and gives greater returns to the farmers than a bumper crop, in his address before 3,500 farmers attending the annual picnic of the Ogle County Farm Bureau, Oregon, September 16.

Frank O. Lowden

"Something is wrong with our method of marketing when the aggregate money value of a larger crop of a prime necessity is smaller than the value of a smaller crop," stated Mr. Lowden.

"Last winter the Department of Agriculture issued its statement of the estimated value of farm crops for 1924. This was heralded as another proof that agriculture had come into its own. For it found that the total value of the farm crops for the year was three-quarters of a billion dollars in excess of the value of the farm crops for the year before.

"This, of course, was welcome news.

"The report, however, disclosed some very perplexing facts. To illustrate, the corn crop was about 20 per cent smaller than the crop of the preceding year. The total value, however, exceeded that of the preceding crop by almost two hundred million dollars. And everyone knows that the quality of the crop was far below the quality of the preceding crop. And yet, under a marketing system which it is claimed is one of the most noteworthy achievements of this commercial age, the smaller crop of inferior corn was worth more in the market than the larger and superior crop of the year before.

"Is it to be wondered at that the farmers distrust the present methods of marketing farm products?

"Now suppose that the corn growers had been completely organized during those years, do you believe that this depressing and puzzling condition would have come about?

Something Wrong With Methods

"It is safe to say that the larger part of the bumper corn crop of '23 was sold at a price which did not cover the cost of production. If corn growers had been organized and found that the market would not receive their corn at what it cost them to produce it, they would not have dumped the larger part of the crop upon the market in a few brief months. They would have stored the remainder knowing full well that seasons of bountiful production are always followed by seasons of low production, and that at no distant day they would receive a profitable price for their corn. As it was, only a few of the corn farmers were able to hold their corn for the higher prices which they had rightly anticipated and which were later received.

"Something is wrong with our methods of marketing when the aggregate money value of a larger crop of prime necessity is smaller than the value of a smaller crop. There are untold thousands of men and women and children who need more cotton to clothe them than is produced in the world today. To say, therefore, that twelve million four hundred thousand bales of cotton are worth more than thirteen million bales is to condemn a system of marketing which so measures value.

"Agriculture cannot regain its rightful place in this highly organized world except through organization. Organization is the most powerful factor in human progress. The economists as long ago as Adam Smith found in organization the key to industrial growth.

Producer Sets Price

"In the modern world, the farmer alone has been the last to realize the value of organization for its own sake. Therefore, it happens that when the farmers in any community organize for any purpose, they soon find that there are other benefits derived in addition to the one that was their special aim. A finer community life, a widening of sympathies with their neighbors and associates, a broadening of their outlook upon the world, a new sense of the dignity and worth of their calling, an elevation of the ablest and worthiest among them to places of leadership, are among the by-products of farmers' organization.

"Agriculture has emerged from its primitive state. It must therefore conform to those practices which have been found necessary to the success of other great industries. In all other fields of commerce, unrestricted, free and open competition in the marketing of products has been gradually disappearing.

"In practice in every other industry the producer in the first instance makes the price at which he will sell his product. He usually arrives at this price by computing the cost of production and adds what he considers a reasonable profit. Of course, he may sometimes err as to what the public will pay and have to revise his price downward, but he himself sets the goal.

Stabilized Price is Goal

"In all industries the marketing problem has been the problem stressed for a generation. In the marketing of farm products alone has the producer been content with the methods of a century ago.

"In all other industries there has been a growing tendency to stabilize prices. This has been effected largely through the organization of a few great corporations which have taken the place of innumerable smaller independent units scattered over the land. Not only are there fewer manufacturers relative to production in every line, but they in turn are organized into a great national body which meets usually once a year and considers 500 questions of world supply and demand and other subjects of common interest to the industries. These great companies are therefore able to plan the next year's campaign intelligently and to adjust their production to the probable demand. From time to time they determine the price for their product, which remains until new conditions require a change. They no longer go ahead blindly running full capacity, putting their commodity upon the market at whatever price may be offered.

"In agriculture alone have the methods of marketing made no improvement, except as to the sale of those products which are now being marketed through co-operative commodity marketing associations. Indeed, while the farmer generally has retained his old methods, they have lost much of their original efficiency because of the tendency towards organization on the part of purchasers of his product. The number of sellers has constantly increased while the number of purchasers has constantly decreased.

Interests Oppose Movement

"Agriculture, therefore, finds itself with its millions of members freely competing among themselves while it is obliged to sell its products in a highly organized industrial and commercial world. Now, if the farmers are to put themselves upon terms or equality with the great industries of the country, they too must organize. It is not desirable that they should imitate the great industries, adopt the corporate form of organization and operate their farms through corporate management. It would weaken our whole social structure if our millions of farmers were to surrender their individualism in this way. Nor is it necessary. While much improved efficiency in production is still possible, the farmers have made and are making constant progress in this respect. The problems which press hardest upon him today are concerned with the mar-

(Continued on Page 4, Col. 4)

FIRST HEARING OF FREIGHT CASE ENDS

(Continued from Page 1, Col. 5)

there was no cross examination of the witnesses. This will be done when the hearing is reopened on October 26. It is expected that the second hearing will take one week. At that time witnesses will be examined and shippers who are ready to give their testimony will present evidence.

Previous to the hearing it was reported that the western railroads would ask for an 11 per cent increase. After the session was opened an officer of the railroads announced that "The western railroads are now asking an increase of but five per cent in their freight rates, although an increase of at least 11 per cent would be necessary to yield the roads the fair return to which they are entitled, both by law and by justice. We are asking for but a five per cent increase because of the emergency of our necessity. We need additional revenue and we need it now. We have hoped that by asking for only an absolutely essential minimum that we might obtain more promptly and with less opposition this minimum of relief which we must have."

Burden Is on Agriculture

During this hearing it developed that this proposed five per cent increase will not effect to any great extent, many of the important products, such as lumber, coal, and manufactured goods. This is particularly true as to lumber and coal, for it was announced that there will be no increase from competitive points on such materials from southeastern territory into St. Louis and Chicago. Likewise the through rate to the Pacific Coast and adjacent territory to be determined by the railroads will not be increased.

As the hearing adjourned, O. W. Sandberg, transportation director of the American Farm Bureau Federation, said: "The railroads have drawn a clear line. They have thrown down the gauntlet to agriculture." This appears to be especially true inasmuch as the larger share of all freight hauled west of the Mississippi River in made up of agricultural products.

Moorhouse Is Witness

A surprising situation appeared during the hearing when H. W. Moorhouse, formerly director of the research department of the American Farm Bureau Federation, was called to the stand as a witness in support of the railroads. The railroads submitted Mr. Moorhouse's testimony as evidence of the return of prosperity to agriculture and said nothing either for or against the proposed freight rate increase. His evidence was chiefly composed of certain facts to show that the purchasing power of the farmer for the crop year 1924-1925 was 14 per cent greater than the pre-war level.

More than 30 witnesses representing various vocations, including economists, bankers and insurance men, testified for the railroads. The last to appear was a representative of an insurance company who stated that his corporation had invested large sums of money in the railroads and that upon investigation were confident that a rate increase was needed. When on the stand he was asked:

"If the commission should find that a rate increase was harmful to western agriculture, would you still urge that this increase be granted?"

"Certainly not," was his reply.

Other Hearings in West

Further hearings will be held at St. Paul, November 9; Denver, November 16; San Francisco, November 23; Dallas, December 2; and Kansas City, December 14. It is understood that although the carriers' petition for advance is being heard at the same time as Docket 17,000, the two will be disposed of separately. It is anticipated that the decision on the five per cent increase will be made the latter part of December, while it will require at least a year to rearrange the present freight rate structure, which is expected to reduce the rate on certain agricultural products where reductions are advisable.

Although the I. A. A. is pooling its interests in the fight with the other 21 western states concerned, its identity is being maintained in case anything should develop pertaining to rates within the state which would call for action as an individual organization.

AUGUST BUTTER FAT PRICE WAS HIGHEST IN LAST FIVE YEARS

Dairy Marketing Specialist Predicts Profitable Winter for Dairymen of This State

Illinois dairymen received the highest price for butter fat last month than for any August during the past five years, according to A. D. Lynch, I. A. A. dairy marketing director.

A. D. Lynch

"Ninety score butter in Chicago during the month of August averaged over 42 cents," stated Director Lynch. "That price was slightly above the August price of 1923 and from six to nine cents better than the butter market in August for the years 1921, 22, and 24. July of this year was also a good month when prices were 15 per cent better than the same period a year ago.

"The chief factor in the higher price for dairy products is that seven months ago dairymen were forced to sell on a market that was 23 per cent less than the same period of the previous year. At that time many farmers, who produce dairy products as a side-line, disposed of their cows and devoted their time to grain farming, which appeared to be more profitable. This made the game better for the dairymen who are in the business through thick and thin.

Import Less Butter

"Another factor that has tended to make this year's fat price a nickel better than last year is the import situation. Up to August 1, 1925, there was imported into this country a little over 5,000,000 pounds of butter. Last year up to August 1 there was unloaded in this country over 18,000,000 pounds. So up to this time we have received from other countries less than one-third as much butter as we did over the same period a year ago. This puts a little more confidence into the market.

"A third factor that has made this year a better butter fat selling year is the cold storage holdings. On August 1 of this year we had 109,000,000 pounds of butter in the warehouses of this country. August 1 a year ago found 134,000,000 or 25,000,000 more than this year. The five-year average of holdings for August 1 is 104,000,000. So this August shows about a normal condition as far as storage holdings are concerned.

"During the year 1924 the per capita consumption of fluid milk, butter, cheese, and condensed milk all increased. Because of the cool and backward season of 1924, the consumption of ice cream dropped a least little bit. Industrial conditions in the main are relatively good over the country. This situation looks like it will continue well into the year of 1926. These factors mean a steady and persistent demand for dairy products.

Predicted Good Prices

"The dairymen who this fall and winter milk their best cows, feed them for economical production, and market their cream in the best condition will be able to put some profits in the bank. It probably would be unwise to think about enlarging the dairy herd right now. There is nothing in the cards that indicates an undue shortage of dairy products. But the market conditions do warrant, more than ever, strict attention to dairying by those who have been making dairying their regular business. The dairymen who have been developing their herds efficiently will most certainly have the edge on the men who milk scrub cows and feed them hay and grain this fall at the high prices these foods are worth."

Last spring Director Lynch predicted that the market for dairy products would reach a new high summer level and stated that Illinois farmers should not forsake their herds due to the then existing low prices.

Try This Line on Your Neighbor If He is Non-member

IF you have a neighbor of the Epidermis Flint type, just let him know about this list of achievements of the Farm Bureau:

More agricultural legislation was passed after the Washington office of the Farm Bureau had been established for two years than had been passed by the preceding 66 Congresses.

The original farm bloc was actually organized and held all of its original meetings in the Washington office of the American Farm Bureau Federation.

The agricultural legislation which the Farm Bureau actively sponsored is continued in the following acts which are now in force:

The Haugen bill—Packer-Stockyards control.

Capper-Tincher bill—Regulation of grain exchanges and future trading.

Norris-McNary bill — Extension of war finance corporation power to lend money.

Kenyon bill—Increase in rate of interest on Federal Farm Loan bonds from 5 to 5½ per cent.

Curtis-Nelson bill — Increase in the working capital of the Federal Farm Loan System by twenty-five million dollars.

Intermediate Farm Credit act—Ultimately making available for the use of agriculture $660,000,000.

Filled Milk act—Preventing the interstate shipments of filled milk.

Warehouse act—Increasing facilities for securing credit on stored farm commodities.

Dunn bill—Authorizing the appropriation for Federal Highway construction over a three-year period.

Madden bill—Appropriation for bovine tuberculosis.

Capper-Tincher bill — Re-enactment of former bill in constitutional form.

Fordney-McCumber bill—Protective tariff giving agriculture protection under the tariff.

Fordney Tax bill—Preventing the shift of tax burden to agriculture.

Kellogg bill—Giving agriculture representation on the Federal Reserve board.

McNary bill — Extending War Finance for another year.

Capper-Volstead bill—Legalising co-operative marketing.

Kinkaid bill—Extending time of payment of rentals due on irrigated land.

FEDERAL DEPARTMENT COMPLIMENTS I. A. A.

Methods employed by the Illinois Agricultural Association are declared by the federal department of agriculture to be popularizing co-operative marketing among farmers of that state. The compliment was stated in a recent report from a Washington news bureau and published in the Rock Island Argus as follows:

"Instead of holding to arbitrary regulations, the Illinois organization is said to have adapted its resources to the needs of members and prospective co-operators, with results that have been helpful all around.

"In a recent issue of Agricultural Co-operation, organ of the bureau of economics of the federal department, the example that is being set by the Illinois grain organization is held forth as worthy of adoption by similar associations in other states.

"In its efforts to serve its grain-growing members, the publication says, the co-operative in the southern part of the state where soft wheat is grown largely, has made arrangements whereby growers may become members of the Indiana Wheat Growers association, Indianapolis. Over two hundred Illinois farmers in four counties are reported as having joined the Indiana organization and so far this year have delivered to it more than 130,000 bushels of grain.

"Where there is need of local elevators for handling grain, the Illinois association is declared to be assisting producers to form companies for the launching of such enterprises. With the purpose of supplying a farmer-controlled outlet for grain on the Chicago market, the association has assisted in the organization of the Rural Grain Company, which has made application for a seat on the Chicago board of trade and plans to function as a selling agency.

"These projects represent three distinct efforts to serve farmers which are regarded by federal officials as likely to be fruitful in better returns to farmers and increased interest in and loyalty to the co-operative.

"Activities of the Illinois Agricultural Association are regarded as an effort to make its members independent of outside help in marketing operations, and this is said to be one of the reasons why the organization is forging rapidly ahead in the field which it hopes to dominate before long."

Hilma Johnson Asks Illinois Farmers To Assist in Ticket Selling Campaign

Miss Hilma Johnson, secretary of the accounting department of the Illinois Agricultural Association, wants to be "Miss Agriculture" and carry the Illinois banner around the world. To do this she must sell more tickets than any other down-state girl for the Illinois Products Exposition to be held at the Exposition Palace, Chicago, October 8-17. In order to accomplish this ambition Miss Johnson has asked Illinois farmers to support her. The Illinois Agricultural Association, Prairie Farmer, and Orange-Judd Illinois Farmer are assisting Miss Johnson in the campaign.

The Illinois Products Exposition is conducted by the Illinois Chamber of Commerce to advertise Illinois. At the exposition there will be exhibits representing every industry and practically every product produced in Illinois. It is a booster project for this state. It will advertise the enormous amount of agricultural products grown in Illinois, its minerals, its manufacturing enterprises, its transportation facilities, its homes, its merchandising business, its resources, its future possibilities, in fact everything about Illinois. Every loyal citizen of Illinois wants this exposition to succeed and everyone should help to make it a success.

To advertise the exposition and to increase the sale of tickets, the Illinois Chamber of Commerce is conducting a ticket selling contest for Illinois girls. As an incentive for the contest the Chicago girl who sells the greatest number of tickets to the exposition and the best ticket seller downstate will be given a free four-months tour around the world. Miss Johnson is a downstate girl and wants to be one of the two girls to make the trip.

Tickets are 35 cents each if bought in advance from Miss Johnson and 50 cents at the door. Every ticket sold gives "Miss Agriculture" ten votes in the world tour contest. Use the ballot below and send in your votes to the girl of your own industry and organization. Address the ballot today to: Illinois Agricultural Association, 608 So. Dearborn Street, Chicago.

CUT OUT AND MAIL

VOTING BALLOT

Illinois Agricultural Association
1200 Transportation Building
Chicago, Illinois.

I enclose herewith $..... for ..... ticket(s) to the Illinois Products Exposition to be held in Chicago at the Exposition Palace October 8-17. I want to help Miss Agriculture make the tour around the world.

Red Top Growers to Get Highest Prices In Years, Is Report

Red top growers in Southern Illinois who are members of the Egyptian Seed Growers' Exchange, located at Flora, will receive the highest price in years for their seed this year.

Curt Anderson, manager and member of the I. A. A. executive committee, reports that considerable seed has been sold at from 20 to 25 cents a pound, and two carloads at 27 and a half cents. A small crop is the reason for the higher price. Total return to the farmers will not be a great deal higher than in normal years.

LOWDEN SPEAKS AT FARMERS' PICNIC

(Continued from Page 3, Col. 4)

keting of his products at a price which will enable him to live and to go on producing. He must find some way to restore the proper relationship between the prices he receives for his products and the prices he pays when buying.

"There are powerful interests, of course, which oppose this movement. They are aggressive, for they think they see large profits disappearing if the farmers organize and put their business upon a modern business basis. Their number is small compared with the great army engaged in the production, distribution and merchandising of commodities. With a zeal, however, which self-interest always inspires, they are likely to impose their views upon chambers of commerce and other like organizations. Even though the great majority of these bodies have a feeling that agriculture must organize in order to fit into the modern business world, they are too likely to yield to the insistent and vocal minority which feels that its own interest is jeopardized. These organizations could give a mighty impetus to the movement if they would. As I have tried to point out, they are just as much interested in the progress of the movement as the farmers themselves.

Making Real Progress

"Farmers' co-operative marketing associations, however, are making real progress. Some have failed. Doubtless others still will fail. The mortality among them, however, has been no greater than among new business organizations of any other kind of which I know. We have been gathering a large fund of experience which will enable not only those already organized, but new ones yet to be, to avoid largely the errors of the past. They are destined one day to occupy the field, for there is no other way out. Just when that happy day shall come no man can tell. It depends largely upon the farmers themselves. I can foresee the day though, I think, when everything produced upon the farm for the market will be marketed by the farmers themselves through an organization of their own creation.

"I like to think of the time when everything I produce upon my farm I can deliver to my own association in full confidence that as much intelligence and as large a bargaining-power shall be exhibited by those representing me in the sale as are already exhibited now on the part of the buyer. I like to think of the time when the representatives of all these great farmers' organizations shall meet in a congress once a year and shall there work out a program for the future, just as other industries now meet annually for the purpose of forming an intelligent and co-operative program for the year. At such a meeting, if it shall appear that one branch of agriculture is expanding more rapidly than conditions warrant, steps will be taken to restore the balance as between that and the other activities of the farm. In this way we shall achieve a balanced agriculture.

Even more desirable, we shall restore the proper balance between agriculture—the greatest of all industries—and other business activities in this organized world in which we find ourselves. This is not the problem of agriculture alone. It is the problem of all because there can be no enduring prosperity unless all the principal industries which go to make up the commercial world, keeping step with one another, shall march abreast."

RECORDS SHOW MANY FORCED LAND SALES IN CORNBELT AREAS

Watson Advises Farmers in Financial Straits to Arrange For Long Time Loan

More than half of the sales of Illinois farms, with warranty deeds, are forced sales, according to information compiled by the I. A. A. department of taxation and statistics.

J. C. Watson

"This is especially true in good soil sections of central Illinois and such sales are usually made to avoid the costs of foreclosure," states J. C. Watson, I. A. A. taxation specialist. "In sales of this nature, the mortgage often exceeds, and in many cases greatly exceeds the equity. A survey of recent sales in the central cornbelt shows that in numerous instances, the equity is no more than $500 or $1,000 and less than from 5 to 10 per cent of the incumbrance.

"Forced sales of this nature indicate that Illinois agriculture is still carrying much of the burden it assumed during the deflation period following the World War and many landowners are far from recovered to a firm financial basis.

More Sales in Southern Illinois

"In the dairy sections of northern Illinois and the livestock feeding counties of the western part of the state, sales of this character are found in smaller numbers. This is likewise true in the southern third of the state where most farm lands are sold free from incumbrances. Sales of farms in southern Illinois are usually more numerous than in the remainder of the state. This fact is probably due to the much lower selling value of farm lands in that territory.

"The large percentage of forced sales of farm lands show that many landowners who made purchases during and immediately following the war have not been able to meet their payments. Most of the five-year farm mortgages made during the boom years will fall due within the next few months. It is doubtful if all these obligations can be met easily. Under such conditions, landowners should arrange early for the extension or renewal of their loans. In many cases, especially where the loans are likely to run for more than five years, this could best be done by joining a federal farm loan association or by borrowing from a joint stock land bank."

Information On Many Sales

Mr. Watson has on record information on literally thousands of farm and city properties all over Illinois. From this information, it has been found that many recorded deeds show that only 50 cents worth of Revenue stamps were affixed to the original deed of transfer, indicating that the owner of the land got $500 or less in cash for the whole property.

POULTRY INCOME IS 63 MILLION DOLLARS

(Continued from Page 1, Col. 1)

largely to our present inefficient system of marketing eggs. Farmers as a rule do not receive pay on a basis of quality, therefore, there is no incentive to exercise care in the handling of eggs on the farms. It appears that the present agencies who are charged with the marketing of this highly perishable food produce are not able to put into practice a system of buying which will pay for quality. In those states where eggs are marketed co-operatively they are graded and the producers receive pay on the basis of grade; thus in a very short time the lower grades are largely eliminated.

"From now on Illinois farmers should and are developing more interest in the marketing phase of their business. It is the greatest aim of the I. A. A., through its poultry department, to bring about as great an improvement in the marketing of poultry and eggs as has been accomplished in the production of these commodities."

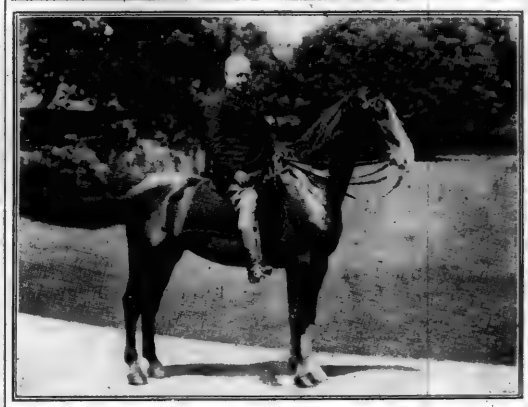
LOWDEN SUGGESTS FEDERAL BOARD TO HANDLE SURPLUS

Novel on Farm Bureau

Former I. A. A. Director Writes Book on Illinois Farm Life and Co-operation.

Lynn Montross, formerly director of the department of information of the Illinois Agricultural Association has written another novel, "East of Eden," using as a background Illinois farm life and past activities of farm organization work in this state.

Lynn Montross



"East of Eden" is based primarily on the organization of the U. S. Grain Growers, Inc., in 1921 and its publishers, Harper and Brothers of New York, declare that it is the first novel of importance dealing with the history of the development of cooperative marketing and the farm bureau movement. It includes a clash between the Illinois farm bureaus and the Chicago board of trade leaders in the legislative halls at Springfield at the time the Lantz bill was introduced.

The novel has as its principal characters a typical farm family during the deflation period following the World War. A county farm adviser is also one of the leading figures in the story and the county farm bureau office is the location of several scenes. Although no definite statement is made regarding the location of the farm of Fred Deering, the principal character, it is indicated that it is situated in eastern central Illinois, mention being made that it is located between Chicago, Springfield, Bloomington and Champaign.

The life of the farm family and the inhabitants of the country town, their economic and social problems are described in detail. A fued and love affair are part of the plot.

The author during the years 1921 to '23 directed the editorial work of the I. A. A., making many visits to county Farm Bureaus. He is known to many Illinois farmers. It was during these years that he collected the material used in this book. At present Mr. Montross is living in New York and has written two former books, "Town and Gown and "Half Gods."

Former Governor Lowden

Illinois' former governor is a great lover of horses. When not away talking before some important convention on the condition of agriculture, he can usually be found at Sinnissippi Farm, near Oregon, Ogle county. One of Mr. Lowden's gems of farm philosophy is: "For the life of me, I cannot tell whether the patter of raindrops on the roof brings benefit or bankruptcy." (World's Work photo.)

Former Governor of Illinois, Writing in "World's Work," Says the Farm Problem is Not Solved and Nation Should Recognize It

Federal Board Would Function in Sympathy with Co-operatives; Cites Brazil's Success in Handling Surplus Coffee Through Valorization Plan and Britain's Remedy for the Rubber Surplus.

Hon. Frank O. Lowden, the author of the accompanying article, is a member of the Ogle County Farm Bureau and the Illinois Agricultural Association. He is a leader in the agricultural thought of the country. Men of "big business" respect his judgment. You should read carefully and thoughtfully what he has written. The article is entitled "What We Can Do for the Farmer," and is reprinted from the October issue of the "World's Work."—Editor.

By FRANK O. LOWDEN

THE farm problem is not solved. It will be well for us if we recognize this fact.

In the monthly supplement, *Crops and Markets*, for July, published by the Department of Agriculture, appears the statement that the farmer's net income for the year 1924-25 had increased somewhat over the preceding few years. This has been heralded as proof that the situation upon the farm was righting itself. Nothing could be farther from the truth. As the Department points out, this increased income nets the farmer but 3.6 per cent. upon his capital investment, after a wage allowance for the farmer's labor which is less than common labor receives in industry. And this does not allow for depreciation and depletion. If depreciation and depletion had been deducted, as they well might, the farmer's returns upon his investment must almost have disappeared.

It is true that this is an improvement over the preceding four years, when the highest net return was 1.7 per cent. and the lowest a loss of more than 5 per cent. But it would hardly be regarded as an evidence of health in any other industry. And this increase, the Department says, is due almost wholly to the higher grain and meat animal prices, particularly of wheat and hogs. The high price of wheat was the result largely of a short crop in other wheat-producing countries, and the high price of hogs was caused in part at least by our own inferior corn crop of the year. When the prosperity of the American farmer depends upon the failure of a crop either at home or abroad, it hangs by a very slender thread.

Farmer's Capital Decreased

There are other interesting figures contained in the same report. They show a continuous decrease in the farmer's capital over a period of five years. In 1919 and 1920, it is stated, the farmers' combined capital was $47,000,000,000, which continued to shrink, until last year it was but $32,000,000,000. This decline in values is startling enough in itself. To visualize it, however, let us assume that all of the property of the six and a half million farmers of America was capitalized upon the basis of earnings that other businesses enjoy and see what the result would be.

I have taken the United States Steel Corporation for comparison, because it is one of the ablest managed as well as the largest corporation in the world. It, too, produces basic commodities, just as the farmer does. Its securities are dealt in on the open market. Its common stock, after depreciation and depletion, earns, according to its last report, about 10 per cent. upon its market value. Now, if all the property of all the farmers, according to the government report, was capitalized upon the same basis, the $32,000,000,000 would further shrink to about $12,000,000,000!

Economists See Gloomy Future

The economists who have written upon the subject in recent years, without exception so far as I know, have painted the future of American agriculture in gloomy colors. Professors Richard T. Ely and Edward W. Morehouse, in "Elements of Land Economics," recently published, say: "A downward trend of land values during the next ten years is not improbable." Professors Warren and Pearson, of Cornell University, in their recent book called "The Agricultural Situation," seem to think that the depression may last from fifteen to twenty years if nothing is consciously done to help the situation.

Another error we are likely to fall into is to assume that agriculture was receiving very large rewards in the years before the war. It is true that from the beginning of this century until the outbreak of the World War, agriculture in America did enjoy a prosperity greater than had been its lot in the preceding years. Land values steadily increased throughout this time. It was from this increase in farm values rather than from the actual operation of his farm that the farmer's profits largely came.

Surveys recently made of farm operations in the Central West for the years preceding the war, show that the actual returns upon the current values of the farms did not exceed 3 per cent. Indeed, the public has grossly over-estimated the returns to the farmers, even during war times and immediately after. The report of the Department of Agriculture, from which I have already quoted, goes back to the year 1919-1920, which was a peak year for farm profits. It discloses the fact that even in that year the rate earned on the farmer's net capital was but 6.1 per cent., while upon the capital borrowed, in the form of mortgage and other indebtedness, he paid 6.7 per cent. That is to say, in a year of great prosperity the farmer actually earned upon his own capital less than he paid for such capital as he had borrowed.

In the early days of agriculture, the farm was really a self-sustaining home and little besides. The pioneer farmer could sell the surplus of the things he had produced primarily for his own use for enough at least to meet his small cash outlay. In the evolution of farming, however, since those early days, everything has changed. Commercialized farming has taken the place of pioneer farming.

There are those who regret the passing of the freedom and independence of the old days. But let them reflect that

(Continued on page 2, Col. 1.)

Charges Against Four Boards of Review are Filed By Farm Bureaus

Charges stating the refusal or lack of proper consideration, regarding the reduction or revaluation of tax assessments on farm lands, have been filed with the Illinois Tax Commission in a complaint against four county boards of review, according to J. C. Watson I. A. A. taxation specialist.

"Farmers in several counties in this state have had undue difficulty in convincing their respective boards of review that a revaluation or reduction in the assessment of farm property should be made to correspond with the present sale value of the land," stated Mr. Watson.

"In a number of counties the assessed tax valuation placed on farm property continues as high, or nearly as high, as the assessment made during the boom years, while the sale value of the land has dropped heavily, in some cases as much as 50 per cent. This has caused the landowners to pay a much larger percentage of the cost if the state and county governments than is their rightful proportion.

Appear Before State Commission

"In cases where a reduction should have been allowed and the county boards of review apparently refused to grant the proposal, the farmers took the matter direct to the state tax commission. That was the case when representatives from Kane, Peoria, Franklin and Clay counties appeared before the state tax commission and filed the complaint charges as a further step in securing the proper reduction.

In the last three years, farm bureaus in a number of counties have called the attention of their respective tax boards to the need for revaluation and have secured reductions in valuations ranging from five to thirty per cent. These reductions, it is estimated, are saving approximately $2,000,000 each year to Illinois landowners.

THE PER CAPITA DEBT IN ILLINOIS increased from $3.67 to $14.91 between the fiscal years of 1923 and 1924, according to the United States Department of Commerce. Increased bond issues for road building was the cause.

Coolidge to Hear Farmers' Plans at A. F. B. F. Meeting

Chief Executive Accepts Invitation To Address Annual Farm Meeting the Day After His Message to Congress.

On what is thought to be another attempt on the part of the President of the United States to understand and acquire the viewpoint of American farmers, Calvin Coolidge has accepted an invitation to attend and make the principal address at the seventh annual meeting of the America Farm Bureau Federation to be held at the Sherman hotel, Chicago, December 7, 8 and 9.

It is understood that the reports of the president's agricultural commission, appointed last year, did not meet with the entire approval of either agricultural leaders or Congress and President Coolidge's trip to the A. F. B. F. meeting is to assist him to meet and understand the desires of the rural leaders and to get their proposed program for developing a more prosperous agricultural industry in this country.

President Coolidge will journey to the farm meeting the day after he gives his message at the opening of the 69th Congress and the farm representatives who attend the annual meeting will no doubt get first-hand information regarding the President's plans for the agricultural program which will receive considerable attention during the coming session of Congress.

The President's address at the Chicago meeting will be broadcast from both the WLS and KYW radio stations as well as from other stations in various parts of the country.

Limber Up Your Huskin' Arm Boys, The Annual Championship's Coming

Prairie Farmer's annual statewide corn husking contest will be held this year on the farm of Garret Pereboom in Lone Tree township, Montgomery county, in co-operation with the Montgomery County Farm Bureau. The farm is operated by William Bergman.

Aspirants for the state championships will do their stuff in 50 acres of corn that will average 60 bushels to the acre. The date has not yet been fixed according to C. V. Gregory, editor of Prairie Farmer, but it will be sometime early in November.

Last year the championship was won by Henry Niehaus, a member of the Montgomery County Farm Bureau.

This year the interestate contest will be held in Illinois, the Mercer County Farm Bureau having succeeded in bringing it into their county. Illinois, Iowa, Minnesota and South Dakota champions are to compete.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, social and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Published every other Saturday at Mount Morris, Illinois, by the Illinois Agricultural Association. Edited by Department of Information, Harry C. Butcher, Director, 608 South Dearborn Street, Chicago, Illinois. Application made for transfer of entry from the Postoffice at Chicago, Illinois, to the post office at Mt. Morris, Illinois. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association RECORD. Postmaster: In returning an unsalled- for or missent copy, please indicate key number on address as is required by law.

Read Mr. Lowden's Article

IF you have turned thus far and have not read Mr. Lowden's article, turn back and read it. His diagnosis of present-day farm ills goes to the heart of the problem. The solution of the problem is of great importance to you and your farm business. The article herewith re-printed is causing considerable comment.

Such Confidence Must Be Deserved

SO far this year more than 10,000 Illinois farmers have either renewed their memberships or have joined the Farm Bureau for the first time, according to the records of the organization department.

When 10,000 substantial farmers join and re-join any organization, that body must be performing some service worth the membership fee. General increases in memberships have been reported by counties which have completed renewal work this year. Many other counties are in the midst of renewal campaigns now and others are laying plans for them.

Up to October 1, 20 counties had started membership drives, five of which had completed their campaigns, five had made a general once-over canvass, and the remaining 10 were just getting drives underway having reported a few hundred re-signed members in each county who have visited the farm bureau offices and renewed their pledge of assisting agriculture without having to be asked. About thirty other counties are on the threshold of campaigns.

The result of the membership reports to date are an indication that the farmers of Illinois, generally, have confidence and hope in their organization. *Thinking* farmers do not join and re-join fly-by-night organizations. *Thinking* farmers believe in the farm bureau movement.

Such confidence must be deserved.

Farm Profits and Rail Rates

From The Journal of Commerce, New York

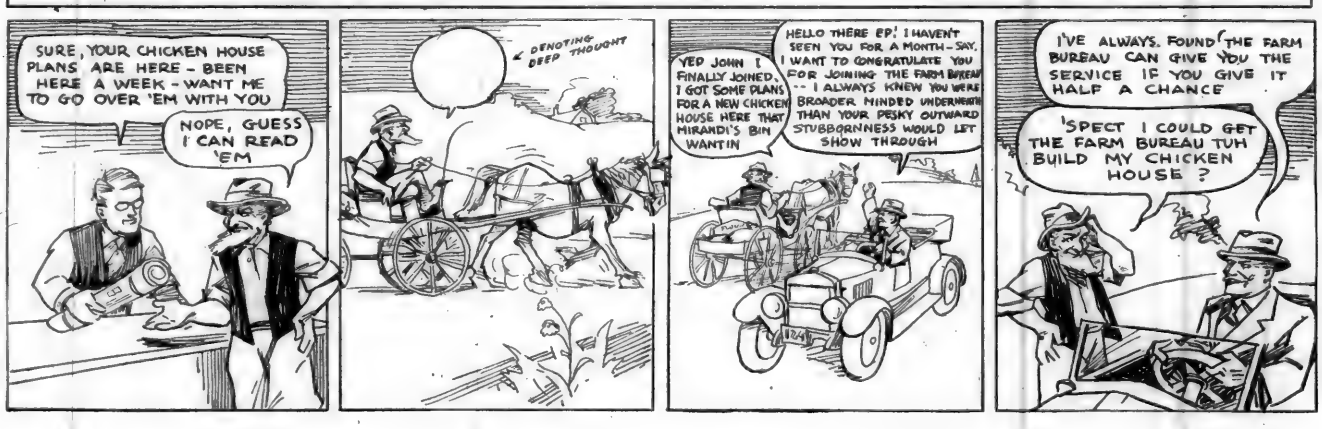
THE Interstate Commerce Commission is at present engaged in taking testimony in favor of rate increases, and the railroads have discovered a number of experts prepared to testify to the increased buying power of the farmers' net income as compared with its pre-war purchasing value. One witness has testified that the average Western farmer is now able to buy about 14 per cent more of non-agricultural products with his present income than he could have obtained before the war, while it is estimated that the purchasing power of the average Western farm has risen 72 per cent since 1922.

Estimates of this sort, based as they must be upon averages, are, of course, far from measuring the changes in economic well-being of many individual farmers. Assuming, however, that they reflect or measure fairly well the general improvement which has recently taken place in Western farm regions, it does not seem that this type of data ought to be given overmuch weight in rate hearings. Why, for example, should a temporary accession of income be urged as a basis for rate increases which are to be indefinitely applicable? Certainly when the farming income of the Western States falls again, as it obviously will, the railroads will not for that reason accept rate reductions with equanimity. There is no reason why they should do so, in fact, if they are not earning the returns on their capital to which they are entitled. Their present short-sighted eagerness to demonstrate that farm prosperity is a good reason for demanding rate advances is likely to act as a boomerang at some not very distant date.

Over longer periods of time rate adjustments obviously must be related to and modified in accordance with changes in the prices of goods transported, but no one year or season affords any reliable standard upon which to base demands for general rate increases. The roads would apparently be much wiser to take their stand on the solid ground of rising costs and lower incomes. They can point to increasing expenses over a long period of years for labor and equipment, together with expanding capital investments and diminishing net returns. These are the relevant factors that strengthen their case before the Interstate Commerce Commission. Farm prosperity is, after all, an ephemeral phenomenon.

We Like Your Book, Monty

LYNN MONTROSS, formerly director of information of the Illinois Agricultural Association, saw so much romance in the Lantz bill fight of 1921 that he has woven it into his latest novel, "East of Eden." The book has considerable historical value, especially to farm bureau members. It's well worth the reading and we hope the sale is commensurate with the amount of time and energy put into it. The book deserves a good sale. We like it, Monty.



The Record Now Printed in Ogle County

WITH this issue you will no doubt notice some changes in the appearance of the Record for it is now being printed by Kable Brothers Company of Mount Morris, in Ogle county. Heretofore the RECORD has been printed in Chicago.

Changing to Mount Morris results in some saving to the association due principally to less overhead costs in Mount Morris than in Chicago. All editorial work will be done in the Chicago office as before. Excellent mail service between Chicago and Mount Morris makes it possible to maintain the same narrow margin between dead-line and delivery in your mailbox as has prevailed heretofore.

We appreciate having any irregularities of delivery reported at the office.

JOHN THINKER AND EPIDERMIS FLINT. (Congratulations to the New Member) **Ep Has His Own Ideas About Service**

This picture represents a partial panorama of Mr. Lowden's Sinnissippi Farm on the Rock River, near Oregon, Ogle county. Simissippi Farm contains 4,500 acres, one third under crop, one third pasture, and one third in use in a reforestation plan in which Mr. Lowden is especially interested. (World's Work photo.)

Farmer's Income 3.6 Per Cent on Capital

—Lowden

(Continued from page 1, Col. 5.)

if the old methods had continued the great industrial development of our country would have been impossible. Only under a system of commercialized agriculture are the farmers of the country able to produce enough to feed the constantly increasing population of our cities and towns. As a result of commercialized agriculture, the per capita production of the American farmer has constantly increased and still is increasing.

Farmers Not Inefficient

We hear much these days of the inefficiency of the American farmer. How far this is from the truth let the figures attest. The Year Book of the United States Department of Agriculture for 1921 is authority for the statement that in America are found less than 4 per cent. of the farmers and farm laborers of the world. And yet the American farmers produce nearly 70 per cent. of the world's corn, 60 per cent. of the world's cotton, 50 per cent. of the world's tobacco, 25 per cent. of the world's oats and hay, 20 per cent. of the world's wheat and flaxseed, 18 per cent. of the world's barley, 7 per cent. of the world's potatoes.

The average production of cereals per person engaged in agriculture in the United States is 12 tons, while for the rest of the world it is about 1.4 tons. This has largely been possible by what we call commercialized agriculture, and this in turn has made possible the phenominal industrial growth of our country. It is clear that without commercialized agriculture, the whole mighty fabric of our industrial and national life would fall.

In the simpler age, cost of production did not concern the farmer much. When he produced enough to feed and clothe his family, he had accomplished his main purpose.

Farmer is a Business Man

To-day all is changed. The farmer is a business man bound by the laws which operate in other business fields. His cash expenditures are large. If he is to produce enough of food and clothing for the teeming millions in the industrial centers he, too, must employ industrial means in production. The scythe has given way to the mower, the simple plow to the gang plow, the cradle to the powerful self-binder, and the flail to the threshing machine. He must employ fertilizers if he would keep up the fertility of his soil. Social needs of his community have required better drainage, better roads, and better schools, and all these have entailed a further burden upon him in the form of taxes. He now has a large annual cash outlay. He is a producer no longer for himself mainly, but to supply the needs of this industrial age. The surplus which he produces is now the important thing.

Cost of production, therefore, has become as vital a question with the farmer as with the manufacturer. And yet when he complains that he is not receiving cost of production for the things he sells he is derided by the economists and told by the business world that the prices of farm products are controlled not by cost of production but only by the law of supply and demand. It must be conceded, though, I think, that no one, farmer or manufacturer, can go on producing indefinitely in this commercial world at less than cost of production. Does it not follow that some way must be found, if we are to insure future adequate supply of food and clothing, by which the producers of these prime necessities can secure at least the cost to them of producing those necessities?

Short Crop Worth More Than Bumper Crop

Under present conditions we have this anomaly: the farmer is not nearly so likely to suffer from a short crop as from a bumper crop. As Professors Ely and Morehouse say: "A general good season may bring a bumper crop, a fact that is heralded by the metropolitan press as a sign of the prosperity of the farmer and of the nation. As a matter of fact, a bumper crop usually brings ruinously low prices."

A year ago this summer there was a drouth in the Southwest which was injuring the cotton crop. The government estimated the crop of the year at 12,400,000 bales. And then the drought was broken. The government got out another report and this time estimated the yield at 13,000,000 bales, an increase of less than 5 per cent. Prices at once fell about 20 per cent. If these prices reflected real values, the loss to the cotton farmers of the South, due to a timely rain, was something like $300,000,000. And yet there was a dearth of cotton such as had not existed since the Civil War. The press had been filled with fears of a cotton famine.

Two years ago there was a bumper crop of corn. As a result, the price declined so low that it was cheaper in some parts of the Dakotas and Nebraska, and even Iowa, to burn corn for fuel than to buy coal. Last year, owing to a cold, wet summer, the corn crop was small in yield and inferior in quality. The government estimated the crop at 20 per cent. less than the bumper crop of the year before. As a result, according to the government's figures, the smaller crop of defective corn was worth $350,000,000 more in the market than the crop of the year before. The cold, wet summer which so seriously injured the corn crop was very favorable for the growth of grasses in the meadows and pastures, and so dairy products slightly increased as compared with the year before. This increase resulted in the dairy farmers receiving many million dollars less for their product than they had received the previous year. And yet, during this whole period there was not a sufficient surplus of dairy products on hand at any one time to supply the needs of the people of the United States for a single month.

Limiting Production

IT IS often urged that the farmer should avoid producing a surplus and should limit his production to the actual needs of the current year. This cannot be done with any assurance of a sufficient supply for future years. This year a largely increased acreage was planted to cotton. Crops started off well. Many feared so large a crop as to demoralize prices. And then came a severe drought in Texas and Oklahoma, which had been producing about half of all our cotton. The government recently has issued a statement of the probable production for the year. If this statement proves correct, there will be barely enough cotton raised this year to meet the needs of the year.

Suppose now, that the cotton farmers had planned just to meet the actual needs. The drought still would have come and the world would be faced with a cotton shortage. And so with reference to the cereals. The farmer cannot know in advance whether there will be too much or too little rain or too much or too little heat, and if he attempted always to produce just enough to meet the demand, there would be years in which our people would go hungry or import their food. If, therefore, we would be a self-sufficing nation, we must at times produce a surplus of the staple crops. This is for the common good. Under existing conditions, however, as I have pointed out, this surplus becomes a heavy burden to the farmer.

Some economists see nothing illogical or evil in such a situation. They say that it is an inevitable result—the result of the law of supply and demand. I cannot quite accede to this proposition. It answers itself. For, under that law, if the world will pay a larger price for ten bushels of wheat than it will pay for fifteen, it must be because it prefers ten bushels of wheat to fifteen bushels, and the supply, therefore, will adjust itself to meet that demand. This means a constantly increasing cost to the consumer.

Surplus Is Inevitable

It is clear, therefore, I think, that a surplus is inevitable—and desirable if we would have a nation self-sufficing in the essentials of life. It, therefore, should not operate to the disadvantage of him who produces that surplus. The nation now stands, in a sense, in the same relation to surplus as did the individual farmer of primitive times. Just as the flowing barns and bins of that time were an evidence of the prosperity of the individual farmer, so now an abundance of food and raw materials for clothing ought not to be considered as impoverishing the nation that possesses them. The nation, however, should employ this abundance wisely and prudently. It should hold sufficient for its own needs as against a less fruitful time and it should aim to dispose of the surplus beyond that in the markets of the world upon the most advantageous terms possible.

The problem is how to obtain this object. It is clear that the individual farmer cannot do this alone. If the producers of any farm commodity were completely organized, it is conceivable that they might accomplish this very end. Their collective credit would enable them to store and hold for less bountiful years such of the surplus as prudence dictated. They would then consider collectively the most profitable disposition in the world's markets of that portion remaining. However, they would not permit the exportable surplus to determine the price for domestic consumption. The domestic price would then be determined largely in the same way as is the domestic price of manufactured articles. Capital and services would receive the same reward in agriculture as in other fields of production.

The Progress of Co-Operation

ORGANIZATION of the farmers for the purpose of marketing their crops collectively is progressing. I believe that some day it will cover the entire field. Denmark has shown how, under the most adverse circumstances, it can transform the agriculture of a people. Wherever cooperative marketing is farthest advanced, either in the United States or abroad, there you find agriculture in its best estate; violent fluctuations in the markets eliminated; better prices to the producers without an increase in cost and sometimes with an actual decrease to the consumer; an approach to standardization of product; a more intelligent effort to adjust production to probable demand; a finer and more satisfying community life.

It will be many years, however, before the cooperatives of the staple farm products are sufficiently organized to take care of this ever-present problem of surplus. And this is a situation which, if left to itself, tends constantly to grow worse. For, as Professor Ely points out, when a manufacturer finds that he cannot market his product for cost of production, he can stop or reduce production and at the same time reduce expenses. The farmer cannot do this. His expenses largely go on whether his acreage planted is somewhat smaller or not. Having to meet these expenses anyway, the lower the price the larger must his acreage be to accomplish this.

If the producers of any farm product are only partly organized and attempt to take care of the surplus, the producers of that commodity who are not members of the cooperative receive the full benefit of the improved price without bearing any of the burdens incident to the surplus. To illustrate: the tobacco cooperatives have been very successful in recent years. When farm prices broke in 1920, the tobacco growers were among the severest sufferers. Tobacco was selling far below cost of production. And then cooperative marketing associations were formed. Through their largely increased bargaining power these associations were able to sell the bulk of their crop at remunerative prices. To accomplish this, it was necessary to withhold a surplus temporarily from the market. That entailed a necessary expense. The nonmember, therefore, was able to avail himself of the better prices which the association had established without bearing any part of the burden of handling the surplus. And thus, though the members of the cooperatives themselves received much larger returns than if they had not organized, the non-members have profited even more. It is difficult to maintain the *morale* of an organization when outsiders receive the benefits of the organization in a larger measure than do the members themselves.

Believes Thorough Organization Will Come

Some day the farmers will be so thoroughly organized, I hope and believe, that they will be able successfully to cope with the surplus. But that day has not come yet. Meantime, are we to sit idly awaiting the further depletion of our soils and the ruin of our agriculture until we are incapable of meeting the needs of our increasing population? For when that time comes, as the economists point out, there will be another maladjustment. Then prices of farm products will be abnormally high.

We are greatly concerned as a people, and properly so, over the waste of our natural resources. No one not actually familiar with the farms of America can know how rapidly we have been exhausting the fertility of the soil. Improved methods of farming and improved seed have tended to counterbalance the depletion of our soil and so have blinded us to the fact. I think, however, that most students of agronomy will agree that at least 25 per cent. of our lands now growing crops should be either in pasture or in legumes if we would prevent the further depreciation of our soil. The natural fertility of our corn and wheat lands has diminished constantly since they were first broken by the plow. It is only improved drainage, better seed, and better cultivation that have enabled the farmers to go on at all.

Let us consider our cotton for a moment. Last year the world's production was 24,000,000 bales. We produced something under 14,000,000 bales. The next largest producer is India, but India grows an inferior quality of cotton, which is useful principally in the Oriental trade. Of our crop last year, we exported about eight and a quarter million bales. Without this cotton, the cotton mills of Europe would have been idle and industrial chaos would have come. Without American cotton, England could hardly survive. And yet we have permitted the spinners of Europe largely to determine the price for this prime necessity of life.

American Cotton Controlled in England

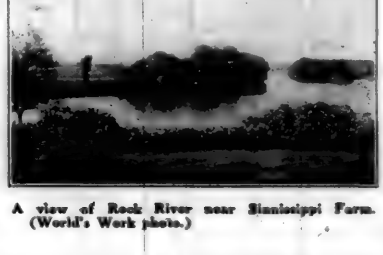
During a large part of the time in the last half-century, cotton planters have been able to hold on only, as we are told, because of the unpaid labor of women and children in the field. And during all this time the English Government and the English spinners have spent millions yearly to open up new sources of supply, with no appreciable results. It is a stupendous thing to produce considerably more than half of so essential a commodity as cotton has come to be in the industrial world. It in itself should make a nation unique among the nations of the world. One would suppose that such an advantage would confer great prosperity upon the cotton farmers of the nation. What is the fact? A few weeks ago I drove for a distance of almost two hundred miles from Memphis through the heart of the Mississippi delta. We are told by competent authority that there is no like area of fertile lands suited to the production of cotton in all the civilized world, not even excepting the famous Valley of the Nile. I was credibly informed that half of those incomparable lands were in the hands of creditors. Such sales of land as are being made there are for less than the cost of improvements.

We produce, as I have said, 70 per cent. of the world's corn—hence the corn lands of the United States should be one of its chief assets. And yet corn lands have sold in Iowa—the premier corn state—in the present year for but little more than the cost of improvements. In the South we say cotton is king; in the Middle West it is corn we have crowned. But these royalties are buffeted about by the traders of the world. They have been made to yield immense profit to every one but those who produce them.

What Brazil Did With Coffee

OTHER nations have had the problem of a surplus of natural products and have set about trying to solve it. A few years ago the coffee growers of Brazil were in dire distress. Unrestricted competition among them threatened to bring bankruptcy. The nation saw that only by centralized selling for export could they hope to adjust the supply to the world demand. To effect this, they adopted a somewhat intricate plan called valorization, which has been in operation for a number of years. That it has resulted in stabilizing the coffee markets of the world, with a living price to the producer, every one knows.

A few years ago the rubber planters in the eastern colonies of Great Britain were well-nigh bankrupt because of the low prices they were receiving for their rubber. They succeeded in interesting the British Government in their troubles. The Colonial Office of that government worked out what was known as the Stevenson plan. Under that plan, though different means were adopted, the aim was the same, namely to adjust the supply of rubber in the markets of the world to the actual demands of commerce. All the world knows the result. The price of raw rubber has greatly increased and these far-off colonies are among the most prosperous portions of the British Empire. In the case of rubber, it is probable they have gone too far, and in any plan which we might adopt we would be wise to avoid the excesses to which the British Government seems to have gone.



Britain Did It With Rubber

The American farmer is interested in rubber too, for he is obliged to use automobiles and trucks in his business. When he complains of the high price he pays for tires, he is told that it is due to the way in which the British Government has interfered with the law of supply and demand. He begins to doubt

Amendment to Revenue Act Would Make Co-ops Exempt From Taxation

Farmers' co-operative associations and organizations will not be required to pay an income tax or file tax return if the proposed amendment to the Federal Revenue Act drafted by farm representatives is passed during the next session of Congress, according to George R. Wicker, director of the I. A. A. co-operative auditing department.

"Preliminary steps towards drafting the proposed exemption amendment began at a meeting of a number of representatives of farm organizations from the East and Midwest held at the offices of the I. A. A. on September 22, and 23," stated director Wicker.

"For the past five years, farmers' co-operative associations have been handicapped by the present interpretation of sections of the Federal Revenue Act. When the act was passed by Congress it was evidently intended that farmers' cooperatives should be exempt from payment of income tax and filing income tax reports. However, that part of the act has been abridged by the regulations of the United States treasury department to such an extent that the intended benefits are no longer available. This amendment is of vital important to all farmers' organizations."

The proposed amendment, according to Mr. Wicker, will be presented to a joint session of representatives of all farm organizations at a meeting to be held in Washington, October 19. At that time it will be drafted in form to fit the requirements of all cooperative organizations and will be submitted to the ways and means committee of the House of Representatives where it is hoped that it will be drafted into the New Federal Revenue Act which is to receive the attention of the next Congress.

Brown County Adviser Writes of Service by Department of I. A. A.

"I have been informed that the Farmers' Cooperative Company at Timewell now have their lease and are very grateful to the Illinois Agricultural Association for securing it," writes W. P. Miller, farm adviser of the Brown County Farm Bureau. "They have tried individually for five years to get this lease and when I learned of their trouble I informed them that our own organization could put it across for them, and they are mighty well pleased."

That is the final chapter of a service rendered to Brown county farmers by the I. A. A. transportation department.

For sometime the members of the Timewell Farmers' Cooperative Company wanted to lease additional land located adjacent to their elevator from the Wabash railroad. On this ground they wanted to erect bins for the purpose of handling coal, limestone and other bulk materials on a cooperative basis for their members. Due to local influence they were unable to make arrangements for the lease. After five years of futile attempts, the officers applied to L. J. Quasey, director of the I. A. A. transportation department. Correspondence was dispatched immediately to the proper railroad authorities with the result that the farmers now have the lease and may proceed with the erection of the building.

NOT A CURE-ALL.

IF THE Agricultural Temple proposed to be erected in Chicago will solve the agricultural problems of America, as its progenitor, Lawrence Whiting, was recently quoted in the Chicago Tribune as having told President Coolidge, would it not logically follow that the new $80,000,000 Union Station recently completed in Chicago will solve the transportation problems of the country?

While there is much merit in the proposal to house all agricultural organizations in the Agricultural Temple, let us not become too enthusiastic about it as a cure-all. Perhaps Mr. Whiting was misquoted. We hope so.

The former governor supervises the operations on his farm. (World's Work photo.)

"Farm Board Would Help Co-operatives"

(Continued from page 3, Col. 5.)

if that law is either so potent or so universal in its application as he has been taught to believe. He wonders if maybe Former President Hadley of Yale was not right when he said in a lecture delivered in England a few years ago:

"Those of us who were brought up on the old fashioned textbooks of political economy can hardly conceive how small a part of the prices or wages or rents of the world have actually been determined by competition."

I am not advocating either the valorization plan of Brazil or the Stevenson plan of Great Britain. I do think, however, that just as Brazil has found a way by which her coffee surplus is no longer a menace and England a method by which her rubber surplus no longer paralyzes the rubber-growing industry, so we in America may, if we will, find a means of taking from the back of the American farmer the burden of his surplus.

Leaders in the British petroleum industry, I am told, are already proclaiming that when America shall have exhausted her supplies of oil, Great Britain will, by some similar method, lay the American people under tribute for its future oil supplies.

The world has long been used to the advantages of mass production. It now appears that mass selling is to be given a trial.

One of the chief reasons for the formation of the Federal Reserve banking system was to mobilize the credits of the country, so that they could be used at any time at the point needed. Isn't there some way by which the surpluses of farm products can be mobilized and thus be made to serve the future? If we could accomplish in point of time for the farm surpluses what we have accomplished in point of place for the credit resources of the country, we would have largely overcome our troubles.

Suppose We Had a Federal Farm Board?

Suppose we had a Federal farm board. Suppose that board found that the producers of any farm commodity were sufficiently organized so as to be really representative of all the producers of that commodity. Suppose that when it ascertained this fact it should authorize such producers to form a corporation for taking care of the surplus, either storing it to meet a possible future domestic need or exporting it upon the best terms available, the expenses and losses incurred for storage or in export to be borne proportionately by all the producers of that particular commodity.

Such a board could function successfully, in my opinion, only if it operated through and in hearty sympathy with cooperative commodity associations. It could expect to prevent ruinous overproduction only in cooperation with such associations. It is vital to any plan, therefore, that it should be so framed as to strengthen and not to weaken the cooperative movement. For in that movement lies the best hope for the future of American agriculture.

I throw this out by way of suggestion. I am aware of the practical difficulties in the way of any plan, but practical difficulties can always be overcome where there is a will and where the principle is sound.

If there is a better way let us find it. But let us not confess ourselves impotent in the presence of what many Americans deem to be the greatest menace to the future of our civilization—a decaying agriculture.

FARM FILLERS

TWELVE CALVES FED BY THE SANGAMON county calf club brought this year's record price when sold at auction by the Chicago Producers for $19. Coles county had seven head that brought $18.25. Homer Mendenhall of Sangamon county topped the sale with his calf that won first and reserve champion at the Illinois State Fair, Asa Halsey of Coles county had the second highest.

MEMBERS OF THE FORD COUNTY FARM Bureau are organizing a corn growers association for the purpose of storing and testing their seed corn on a cooperative basis. When completed the organization will have a membership of at least 600 farmers. The association plans to build testing rooms and install wire racks so that 3,000 bushels of corn can be tested for germination, freedom from disease, and vigor of growth, thus giving the members insured and efficient seed corn service at cost, according to George T. Swaim, farm adviser.

INSURANCE APPLICATIONS TOTALLING OVER $400,000 have been received by the Farmers' Mutual Reinsurance Company of Illinois. This is four-fifths of the $500,000 in individual insurance applications needed to secure the state charter for the new company. Thirty-seven counties have sent in applications and seven of these have reached their quota of $20,000.

THE BOARD OF REVIEW of DeKalb county recently granted a ten per cent reduction in the tax assessment on all farm property of the county. This saving to the farmers was accomplished through the efforts of county Farm Bureau assisted by J. C. Watson, taxation specialist of the Illinois Agricultural Association.

WHILE ILLINOIS REAL ESTATE CONSTITUTES only 37.4 per cent of the wealth of the state, it pays 85 per cent of the taxes. This is due to the fact that when the state constitution was adopted in 1870 practically property was tangible and could be assessed and taxed in the same manner. If the revenue amendment is adopted at the polls in November, 1926, further legislation can then be enacted to remedy the situation.

GOLD, SILVER AND BRONZE MEDALS authorized by Act of Congress and approved by President Coolidge June 5, 1924, for presentation by the Secretary of Agriculture to the first, second and third prize winners of the 25th International Live Stock Exposition held a year ago have been completed and are being mailed to the winners. Many Illinoisans are among the recipients.

A SCHOOL FOR FARM WOMEN is being conducted by the Indiana Farm Bureau Federation during the National Dairy Exposition at Indianapolis, October 10-17. The school program has been planned to cover the subjects in which women are believed to be the most interested.—Home, Health, Foods, Schools, and Rural Social and Community Life.

Thanks I. A. A. for Charity Work

United Charities of Chicago Writes Letter of Appreciation For Slum Kiddie Publicity.

"We wish to express to you our appreciation for your kindness in giving publicity to our Summer Outing work," states a letter from the United Charities of Chicago to the Illinois Agricultural Association.

"We feel that this publicity has been very beneficial in furthering our project, and that it has resulted not only in a large number of definite requests for children, but also in keeping before the minds of the people throughout the state the problems of Chicago's poor, it has made these people much more amenable to requests and pleas.

State Champion Chicken Caller

Farm Adviser Blackburn of the Marion County Farm Bureau says this picture does not look like Mrs. I. N. Wooley of Iuka, champion chicken caller of Illinois, because he rarely sees her without a smile. Perhaps the sun was shining too brightly when the picture was taken.

Mrs. Wooley was declared winner of the state championship chicken calling contests held at the annual picnic of the Illinois Agricultural Association, Taylorville, August 27, and the silver pitcher she holds is the trophy she received as state champion. Her style during the demonstration was more vigorous than sweet but nevertheless calculated extremely effective by the five judges and those who attended the picnic.

It is said that Mrs. Wooley, in her spare moments as a farm wife, attends a switchboard for the telephone lines in her neighborhood. Perhaps experience in calling "number please" is good training in the best method to tempt the barnyard fowl. This is not the first time she has been declared the best chicken caller for it is understood that she has won several contests at county and local fairs.

Seven counties were represented in the contest at the I. A. A. picnic. The other three contestants who placed were, in order: Mrs. W. L. Fearn and Evelyn Bell of Christian county, and Mrs. Frank Potthast of Bond county.

Illinois Farmers Lead in Efficiency, President Thompson Tells Businessmen

DON'T place all your eggs in one basket," says President Thompson, in an article in "Illinois Facts," a magazine concerned with Illinois' greatness, published in connection with the Illinois Products Exposition, open to the public from October 8 to 17.

ABOVE the attractive exhibit of the Illinois Agricultural Association shown at the Illinois Products Exposition is a sign upon which these words are printed:

"Illinois farmers are the most efficient in the United States.

"The Illinois Agricultural Association is created by them to represent their interests.

"It is the voice of organized agriculture in Illinois."

Its slogan is "63,000 *thinking* farmers."

"That's the gospel of Illinois Agriculture, and it's a sound one. Study the statistics which tell the annual production of farm products for this state and you'll agree that diversification is a fundamental with the farmers of Illinois.

"Run down the list of important Corn Belt crops, yes, and you'll find some crops not ordinarily grown in Corn Belt states, and you'll find Illinois Agriculture ranking 2nd, 3rd, 4th, 5th, and so on. Just as diversification pays in investments, so it pays in farming. Agriculture in Illinois is not dependent upon any one single crop; the eggs are in several baskets.

"Illinois' agricultural ranking among her 47 sister commonwealths is near the top in all the staple crops. By her rivers gently flowing you'll find corn proudly waving. And it's volume and quality places Illinois second in this respect. Oats are 3rd, rye 8th, wheat 7th, barley 9th, cotton 18th, sorghum 14th, broom corn 2nd, buckwheat 16th, potatoes 9th, tame hay 5th, clover seed 2nd, fruits 11th and truck crops 9th. Stack all these together, figure the value of them, compare that figure with that of the other 47 states, and you'll find Illinois Agriculture ranking 2nd, among the 48 states in value of farm crops—$520,429,000 (1924).

"Take the livestock. Illinois' milk cattle rank 5th, other cattle 6th. Swine have rooted themselves into 3rd place. Sheep are 22nd, poultry 2nd (usually considered the farm wife's 'pin money,' but in 1924 poultry was valued at $25,234,061), horses 2nd and mules 14th.

"Illinois dairy cattle manufactured products which sold for $71,998,333 in 1924 and ranked the state 6th. The poultry layed eggs and produced other products worth $67,690,085 in 1924 and ranked 2nd. All in all, Illinois, also ranks second in livestock.

"About one-third of the total wealth of Illinois is represented by Agriculture. In this respect it ranked 3rd among all states in 1920, having a total farm property value of $6,666,767,235. The average farm investment is well over $25,000. Walk down the street in the average town. How many businesses represent that large an investment?

"Dr. Ethelbert Taylor of the United States Department of Labor is authority for the statement that if the farmers of America were all as efficient as the farmers of Illinois, 4,619,000 of them could be dispensed with and the total production would not decrease.

"Illinois Agriculture leads in adoption of scientific principles of farming as is indicated by the use by Illinois farmers during 1924 of one-fourth of all the agricultural limestone applied on farms in the United States.

"Another indication of the advanced thinking of Illinois farmers is their comparatively general adoption of conservative, sound principles of co-operative marketing. In four years' time farmers' organizations have developed and are operating marketing agencies which handle 10 per cent of all the live stock of the state and 25 per cent of all the fruit and vegetables. Of the dairy products of the state, 21.4 per cent are handled by co-operative organizations and of the tremendous amounts of grain received on the Chicago market, approximately 75 per cent comes from the farmers' own organizations.

"Still another indication of the leadership of Illinois Agriculture is shown by the standing of their state service organization, the Illinois Agricultural Association. This is the Chamber of Commerce for the farmer. Service on all phases of the farmers' marketing and legislative problems are handled by the Illinois Agricultural Association. A quarter-million dollar reserve lines its treasury. And its slogan is 63,000 *thinking* farmers."

I. A. A. Conferences Listed

Six District Meetings to Be Held Within Next Six Weeks

District conference meetings of farm bureau representatives and members and I. A. A. officials have been scheduled for the next six weeks with place, date and district announced as follows:

October 15, 14th District—Rock Island. Speakers, Donald Kirkpatrick, I. A. A. legal counsel, and J. R. Bent, director, I. A. A. phosphate-limestone department.

October 27, 16th District—(place not determined). Speakers, Geo. R. Wicker, manager of the Illinois Agricultural Co-operatives' Association; J. C. Watson, I. A. A. taxation specialist; and F. A. Gougler, director, I. A. A. poultry and egg marketing department.

November 12, 20th District—Jacksonville. Speakers, Wm. E. Hedgcock, I. A. A. director of livestock marketing; Donald Kirkpatrick and George R. Wicker.

November 19, 24th District—Golconda. Speakers, J. C. Watson, Wm. E. Hedgcock and Donald Kirkpatrick.

November 19, 25th District—Murphysboro. Speakers, Sam H. Thompson, president of I. A. A. and F. A. Gougler.

November 24, 11th District—Woodstock. Speakers, President Thompson and A. D. Lynch, I. A. A. director of dairy marketing.

"WHO'S WHO IN AMERICA" contains names of the nation's most successful people and of these 82 per cent have been found as having been born and reared in farm communities.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Volume 3 | Issued Every Other Saturday for 63,000 *thinking* Farmers—October 24, 1925 | No. 21

RAILROADS AND FARMERS NEED EACH OTHER: THOMPSON

Mutual Reinsurance Campaign Completed

Insurance Totaling $681,000 Received As Campaign Closes

Charter To Be Applied For Immediately; Directors to Meet and Place Insurance in Force by Nov. 2

It's over the line and plenty to go!

The campaign for half a million dollars in individual insurance applications needed to secure the charter for the Farmers Mutual Reinsurance Company of Illinois has been successful.

When the dead-line was reached on Saturday night, October 17, $681,000 in insurance applications had been received by the new company. The goal has been more than reached and soon the reinsurance company will be a going concern.

"When the mutual insurance companies, Farm Bureaus and farmers of Illinois all work together, things are not done by halves. The campaign was bound to succeed," declared Vernon Vaniman, field representative of the state reinsurance company.

Organization to Start Soon

In reviewing the next steps that will be taken in the organization of the company M. Vaniman stated:

"The first step of the new company is to secure a charter from the state so it can start operations. This will be done within the next few days. The board of directors of the reinsurance company will meet Wednesday, October 21 and will determine the date the insurance will go into force. This will probably be on November 2. Everyone who has made application for insurance will be given ten days notice prior to the time the insurance will go into effect.

"Now that individuals have cooperated to get the charter for the company the next step will be consideration by officers and directors of the mutual companies of the service to be rendered by the reinsurance company that will benefit their local Company.

Three Services Offered

"One of the principal services of the new state company will be the advantage of blanket insurance. This will insure the local mutual company as a whole. If some have excessive losses for any one year the reinsurance company will come to their rescue. This will protect the local company against excessive losses and will make the assessments more uniform. Experience tables show that this can be carried for 8 per cent of the average annual loss of the local company.

"Another service of the reinsurance company will be specific reinsurance. This will enable the local company to cede to the state company that portion of the risk which they do not wish to carry themselves. For instance, if the local company writes $10,000 on a single risk and only wants to carry $4,000 of that amount, the company can cede to the state mutual the remaining $6,000.

"A third service is recession insurance. There will be a limit as to the amount of insurance the state company shall carry on a single risk. The state company must therefore have local companies that they can cede $1000 to $2000 of insurance. This will be practically the same as the local company taking insurance in their own territory and will increase their local insurance in force."

Credit Due Farmers

Mr. Vaniman states that the credit for securing $681,000 in applications for insurance is due to the farmers of Illinois, who have a vision of the necessity of the farmers cooperating together to solve their problems.

Officers and directors of mutual insurance companies, farm bureau executive committeemen, farm advisers, farmers, farm papers, state association of mutual insurance companies, the Illinois Agricultural Association and all agricultural forces have cooperated together to establish the reinsurance company.

"Now that the reinsurance company, after securing its charter, will be in a position to take care of the needs of the local companies, the next step is for the local company to give the state company an opportunity to render service inasmuch as the state mutual is the servant of the local companies," states Mr. Vaniman. "Many farmers have stated that the advantage that appeals to them is that it will put the farmer in a position whereby he can secure all of his insurance against fire, lightning, wind storms and hail on a mutual basis thus saving him thousands of dollars on his insurance."

Charter Members Listed

The following is a list of the farmers in Illinois who have become charter members of the reinsurance company by sending in applications for insurance during the campaign that has closed:

Name	Address
E. B. Pocock	Nokomis
Anna Cress, Sr.	Hillsboro
H. A. Cress	Hillsboro

Eggs From 300,000 Hens Are Marketed Co-operatively by 1800 Ohio Farmers

By F. A. Gougler

F. A. Gougler

Early in the year 1924, some of the progressive farm bureau workers of Ohio decided to make poultry and egg marketing one of the state's major projects.

This idea was backed by the Ohio Farm Bureau, the extension service of the Ohio State University and the local farm bureaus of four northwest counties, namely, Williams, Fulton, Defiance and Henry. County Agents M. L. Howell of Henry, Roy Cave of Fulton, Earl Fieltner of Williams and Jesse Wandsetter of Defiance got squarely behind this project. F. M. Glascow of the Ohio Farm Bureau Federation was the leading factor in planning the membership campaign. Farm bureau members of the four counties who have had an active part in this project are E. M. Fackler, S. G. Daughton and C. E. Greek of Williams county, Harry M. Pontioles, of Henry County; W. H. Pfaff of Fulton County and E. J. Stock of Defiance County.

Use Marketing Contract

The first members were secured in Williams County on April 16, 1924. From that date the membership campaign continued until the goal of membership was secured. Before marketing was actually to begin the membership signed up must be owners of 300,000 hens and must have signed agreements that they would market all their poultry and eggs through their association, except "such poultry and eggs as the producer may use for home consumption, hatching or sell for hatching or breeding."

This goal was reached after more than a year's effort and the association finally began to function in July of this year. The operating committee selected was composed of E. M. Fackler, H. F. Schnoble, C. E. Greek and F. M. Glascow. This committee in turn employed a manager, Mr. M. L. Howell, who for six years served as county agent in Henry County.

Ohio's association started to function with the enviable record of a clean slate. To quote from the Ohio Farm Bureau Federation News on this point we read: "The Association starts with a clean record page, a thing which older associations may envy. The entries which will be made on this page will be made with indelible ink. They will be hard to remove, it therefore, behooves the officers and members to see that the record is kept clean."

Four Pools Completed

Since July 1, at which time the association began its operations, four pools have been completed with a total of approximately one-third of a million dozen of eggs handled. The first pool, July 10-21, contained 93,214 dozen. The second pool, August 1-15, sold 86,477 dozen; the third pool 83,470 dozen; and the fourth, dating September 1-15, handled 69,730 dozen eggs. The following tabulation summarizes the number of dozen eggs handled in the four pools up to September 15 and the number of dozen in each grade:

GRADES OF EGGS	NO. DOZEN
Hennery Whites	85,372
Hennery Browns	36,865
Standards	180,599
Trades	25,105
Checks	3,515
Rejects	1,425
Total	332,882

It is interesting to note the per cent

Sam Sorrells Subject Of "Farmers Who's Who" In Montgomery County

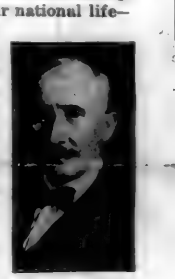
"Who's Who Among Montgomery County Farmers," a new department running in the Hillsboro Journal, has for its first subject Samuel Sorrells of Raymond, executive committeeman of the I. A. A. for the 21st district.

"Sam Sorrells of Raymond township," the article says, "is one of the most active farmers in the county, and his interest in farm bureau work has made him known in farming circles over this part of the state.

"Sorrells gives his time to community and state interests without neglecting his own farm. He has one of the best equipped and successful farms in that neighborhood; and the Raymond neighborhood, as farmers know, is one of the outstanding farming communities in this part of the state."

I. A. A. President, Speaking Before Illinois Chamber of Commerce, Says Trials of One Are Tribulations of Other; Urges Understanding

"And Prosperity of One Promotes Welfare of Other," Says President Thompson, "But Common Welfare Can Only Be Promoted When Each Industry Has True Picture of Actual Conditions Within the Other. If Facts Are Ignored, Welfare of Both Is Hindered."



Charges That Railroads Sanction Farm Prosperity Propaganda and says, "I Want to Suggest That a State of Newspaper Prosperity Will Not Pay Your Freight Bills."

What is the relationship of the railroads and the farmer? To get the farmer's viewpoint on this question, the Illinois Chamber of Commerce invited President Thompson to discuss it before that organization's annual meeting, which was held in Chicago this month.

The full text of President Thompson's speech on this timely subject is herewith presented for your consideration.—The Editor.

By S. H. THOMPSON
President, Illinois Agricultural Association

AS I FACE you men here today to discuss the relationship of these two great elements vital to our national life—the railroads and the farmers—I can recall no similar occasion in the past when I was so greatly tempted to send out a cry for help. Not help in finding things to tell you—my difficulty will be to compress within the time assigned me the story that must be told—, but help to make these few words of mine contribute to a clearer view of our common ground of interest, without which mere words will be futile to avert misunderstanding and great loss.

S. H. Thompson

It is merely stating the obvious to recite the many interests in common between agriculture and transportation. They are interdependent mutually essential. The trials of the one add to the tribulations of the other. The prosperity of one promotes the welfare of the other. But this common welfare can only be promoted when each industry has a true picture of the actual conditions within the other.

No Soft Pedal

I am going to talk plainly here this morning, gentlemen. You asked me here today because you wanted to learn a farmer's view of the relations between transportation and agriculture, and I am going to give it to you. I find that my talk just naturally divides itself into two parts, the first dealing with the view of farming and the farm problem which the railroads appear to have adopted, and the second dealing with what the farmers think of the railroads, and what they want to know about the transportation business.

Let me state as a fundamental proposition that nothing can beat a prosperous, stable and developing agriculture will serve as a basis of permanent prosperity for the western railroads of the United States. A state of "newspaper prosperity" cannot give it to you. We are witnessing today the results of what appears to be a concerted effort at propaganda to convince the American public that the farmers as a whole, and of the corn belt in particular, are riding on the peak of a condition of general prosperity. May I suggest that the railroads appear to have given their sanction to that propaganda.

Farmer Knows Actual Conditions

To the man out in the country who sees the balance sheets on his farm's operations, and who knows better than the city press what is wrong with agriculture, this is not encouraging as a basis for farmer and railroad cooperation. It may be possible to sell to the rest of the country the notion that the farmers have solved their difficulties and are on a sound foundation now, but if this is not true, it will make matters worse, not better.

You do not need to be an economist to understand that agriculture as a whole has not received, and is not receiving today, a fair share of the national income. A casual observer can see evidences of it on every hand. Go

Nearly Two-Thirds of Illinois Dairy Cattle T-B Tested

Illinois Dairy Cows Soon To Be Free of Bovine Tuberculosis; 61.8 Per Cent Are Now Tested.

Nearly two-thirds of the dairy cows in Illinois have been tested for bovine tuberculosis and placed under federal and state supervision according to a report based on government figures.

A. D. Lynch

"To be exact, 61.8 per cent, or 730,602 milk cows were in the favored class on October 1st," states A. D. Lynch, director of the I. A. A. dairy marketing department. "With only about 500,000 more cattle still to be tested, dairymen are looking forward to the not far distant day when they can tell the world that milk in Illinois is produced from cows free from tuberculosis.

"In September, 60,822 head of cattle were tested. Indications point to still greater activity during this month and November. More dairymen than ever are signing applications to have their herds tested. The spirit is to get the job done as quickly as possible, have the reactors removed for slaughter and receive the indemnity paid by the state and federal government.

"Consumer sentiment on many Illinois markets is growing in favor of milk from tested herds that are under federal and state supervision. Progressive dairymen are 'cleaning house' to supply this demand, insure themselves of an every day market and receive the benefits that they always obtain when a superior grade of milk is furnished."

A CORN CLUB ENROLLMENT SIX TIMES LARGER in 1925 than in 1924 is reported by E. I. Pilcher, state leader of boys' and girls' club work of the University of Illinois.

Published every other Saturday at Mount Morris, Illinois, by the Illinois Agricultural Association. Edited by Department of Information, Harry C. Butcher, Director, 608 South Dearborn Street, Chicago, Illinois. Application made for transfer of entry from the Postoffice at Chicago, Illinois, to the post office at Mt. Morris, Illinois. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record. Postmaster: In returning an uncalled-for or missent copy, please indicate key number on address as is required by law.

Re-affirm Stand on Equality for Agriculture

EIGHT of the middle west state Farm Bureaus, representing the midwest group of the American Farm Bureau Federation, have pledged themselves to fight with "unremitting and determined effort" toward the enactment of legislation in the next Congress to give agriculture equality with industry and labor. These states are Illinois, Iowa, Indiana, Ohio, Michigan, Wisconsin, Missouri and Minnesota.

Following is the text of the pledge which was passed unanimously at the regular meeting of mid-west Farm Bureau officials at Chicago early in October:

"The effort of the mid-west states Farm Bureaus to improve methods of production and marketing, and to speed adjustments in farming to meet changing conditions, will be pushed vigorously in the future as in the past, but we insist that in addition to all the savings that can be made thereby, Agriculture is entitled to and must be accorded the full benefits of protective tariffs if the American protective system for industry is to be retained.

"We call attention once more to the fact that world prices of farm products will prevail in our domestic markets regardless of tariff schedules since the surplus determines the price of the whole crop, whether at home or abroad.

"We therefore pledge our unremitting and determined [illegible] enactment of legislation to give agriculture [illegible] with industry and labor in the American protective system."

Small but Active

One of the smallest Farm Bureaus in Illinois, from the standpoint of number of members, is in Gallatin county, which is located in "Egypt" at the junction where the moonlight on the Wabash joins the commerce of the Ohio.

For a Farm Bureau with only 254 members, the annual report indicates surprising activity. During its last fiscal year, which closed this month with an annual meeting at Ridgway, its reserve was boosted from $160 to $1850.

A service which the members appreciate is that of assembling orders for seed, lime stone spreaders, lime stone, phosphate, etc., through the Farm Bureau. The combined buying power of the members was used without financial risk on the part of the Farm Bureau, and without the Farm Bureau actually getting into business, which is a practice with many pitfalls. During the year a $20,000 business was done, with an average saving of about 13 per cent to the participants.

The Farm Adviser tested the soil of 106 of the 254 members' farms. The result is a tremendous increase in limestone application.

What is regarded with more satisfaction than anything else is that this was the first year farmers came into the office and voluntarily joined up.

That's a good record, Gallatin, but what good is a record if you can't have some fun breaking it?

Re-insurance Company Reaches First Goal

OVER the top and then some!

That's the record made by the new reinsurance company organized by the Illinois State Association of Mutual Insurance Companies and the Illinois Agricultural Association. To get a charter from the state it was necessary that at least $500,000 in direct policies from individual farmers be obtained. This has been done in a relatively short time. The total amount secured is over $681,000.

Everybody co-operated practically 100 per cent to reach this first goal. Local farm mutuals, county Farm Bureaus, Orange Judd Illinois Farmer and Prairie Farmer all gave the project a boost. It deserved their support as it does of every *thinking* farmer.

Now that the individuals have made it possible for the company to get its charter, thus completing the first step, it remains for the officers and directors of each mutual company to consider the further service that can be rendered mutual insurance for farmers by having blanket reinsurance, specific reinsurance and recession reinsurance.

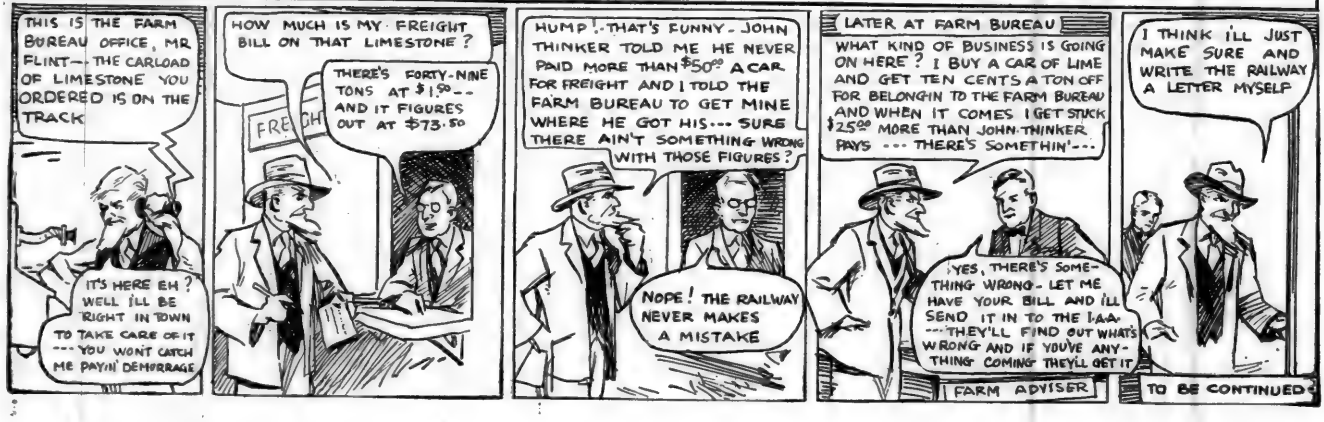
The above forms of service rendered by the Farmers' Mutual Reinsurance Company of Illinois will place the local mutual companies in a position whereby they can handle all the insurance needs of the farmer against fire, lightning, wind storm and hail on a mutual basis, and also protect the local companies against excessive assessments.

In another column are listed the charter members. Not only should they be designated as charter members, but also as pioneer and honor members, for they have made it possible to obtain the charter for a farmers' state-wide reinsurance company, a dream of prominent farm mutual leaders for over a quarter century.

You Know the Answer

THE farmers come to bat in the world series freight rate case on Oct. 26 when the Interstate Commerce Commission opens hearings in Chicago to receive evidence showing why the railroads should not be granted their desired five per cent increase.

Evidence will be entered by the I. A. A. in co-operation with other farm organizations, to show the *actual* financial condition of Illinois farmers. There is considerable difference between the *actual* and that which has been reflected by newspapers.



President Thompson's speech delivered before the railroad officials and others gathered in the transportation conference held in connection with the annual meeting of the Illinois Chamber of Commerce, and which is reprinted in full in this RECORD, reflects the stand of the Illinois Agricultural Association on this important question.

It has been estimated that an increase of five per cent in freight rates will add from twenty to thirty dollars a year to the average farmer's expense wherever the increase takes effect. At first an 11 per cent increase was asked, but so much opposition developed from the Farm Bureau and others that the request was lowered to five per cent.

Fifteen years ago such an increase could have been gained by the railroads with much less effort than now. Why?

You know the answer to this question.

JOHN THINKER AND EPIDERMIS FLINT. **Ep Has a Claim Against the Railroad**

Wicker in Washington Telling Why Co-op Tax Law Needs Some Fixing

Opens Campaign to Get Law Clarified Regarding Income Tax Exemptions for Co-ops.

George R. Wicker, manager of the Illinois Agricultural Co-operatives' Association and director of the I. A. A. accounting department, is in Washington this week assisting in representing the interests of agricultural co-operatives before the ways and means committee of the 69th Congress.

Geo. R. Wicker

The congressional committee is considering and drafting the amendment to the revenue act which will exempt agricultural co-operative associations and organizations from payment of income tax and filing annual returns. Recently Director Wicker discussed the proposed amendment with Secretary Mardine and it is understood that every effort will be made to include the agricultural amendment in the revenue act which will receive considerable attention during the next session of Congress.

"For the past five years, farmers' co-operative associations have been handicapped by the present interpretation of sections of the Federal Revenue Act," stated Mr. Wicker. "When the act was passed by Congress it was evidently intended that farmers' co-operatives should be exempt from payment of income tax and filing income tax reports. However, that part of the act has been abridged by the regulations of the United States treasury department to such an extent that the intended benefits are no longer available. This amendment is of vital importance to all farmers' organizations."

To Speak at Cornell

On November 13 Mr. Wicker will address the students and faculty of Cornell University, Ithaca, N. Y., on "Analysis of Accounts of Co-operatives and Their Relationship to Business Practices," which is along the line of information which gave at the American Institute of Co-operation at Philadelphia this summer. "Co-operative Marketing in the Midwest" is another talk he will give.

Cornell University, a leader among educational institutions on subjects of co-operative marketing of farm products, is reaching into the field of practice for information on how co-operative marketing is actually done. In seeking an authority on accounting methods of co-operatives, and for specific information on chronic maladies of co-operatives, the university invited Mr. Wicker.

Producers List Eight Reasons Why Thinking Farmers Support Them

Eight reasons that thinking farmers give for shipping to the Producers are given out by the Chicago Producers Commission Association in a recent letter to its regular shippers. These reasons are:

1. PRODUCERS selling service is the best to be obtained anywhere.
2. PRODUCERS are owned and controlled by the member shippers, and the policies directed by a board of directors elected by the members.
3. PRODUCERS operate their business on a cost basis and return profits to their members—$255,000 saved in three years.
4. PRODUCERS, through their feeding buying service, connect the range and feed lots directly; this fall 30,000 lambs were purchased direct from Montana ranges and shipped to producer feeders at an estimate saving of between $25,000 and $30,000.
5. PRODUCERS operate a Claim and Transportation Department which collects losses FREE OF CHARGE.
6. PRODUCERS' LIVE STOCK CREDIT CORPORATION furnishes money for feeding operations at lowest possible rate, 6 per cent at present time.
7. PRODUCERS have successfully inaugurated new systems of selling and handling of shipments (such as pooling and sale of out-hogs, and pigs).
8. PRODUCERS are a national organization, and due to their large volume of business are in a position to become a real factor in the marketing of the farmers product.

IT IS DEFINITELY DECIDED THAT THE President's Agricultural Conference will not meet before Congress convenes.

ADVOCATES OF THE CHILD LABOR AMENDMENT are starting an active campaign of propaganda designed to create public sentiment in favor of it in states where it was voted down last year.

40,000 Head in Lamb Pool

St. Louis Producers' Complete Largest Lamb Pool for Cornbelt Feeders.

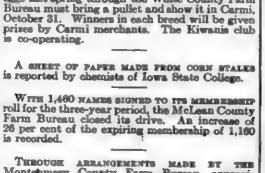
The largest lamb pool ever conducted in the United Stated was completed this month by the Producers' Livestock Commission Association at the National Stock Yards, according to H. D. Wright, manager of the Producers' association.

More than 40,000 head of ewe and wether lambs were shipped in from Wyoming to fill contracted orders of lamb feeders in Illinois and other midwestern states who patronize the St. Louis market. The lamb pool was conducted by the Producers' association on a co-operative basis for the purpose of assisting its patrons to purchase feeder lambs direct from the western range at the lowest cost and transportation expense consistent with the desired quality.

"This pool," stated Manager Wright, "saved the lamb feeders of the Middlewest from $1.50 to $2.00 a hundred pounds or approximately $270 on each double deck of lambs purchased. The feeder lambs that we bought for our patrons cost on an average of $12.75 a hundred at the loading point or less than $14.00 at the point of delivery. To appreciate the saving it is only necessary to consider the prices of feeder lambs on the Chicago market this month which are ranging from $15.25 to $15.75 a hundred.

Direct to Feeder

"The pool lasted practically one month. During the latter part of August we sent four of our men to Wyoming to buy the lambs to fill the future orders we had contracted. The animals were driven in from all over the mountain sides to loading points. They were then graded to comply with the desires of our patrons and shipped direct to the purchasing feeder. This also eliminated the usual speculative factor of former methods of buying feeder lambs.



"The pool has been so successful this year that we are planning to make it a national pool next year, with all of the Producers Commission Associations in the United States pooling their orders instead of separate lamb pools."

To Have Calf Pool

A similar pool will be conducted next month on the buying of feeder calves by the St. Louis Producers' Association. During the latter part of October, special calf buyers will be sent to the extreme western part of Texas near Marfa and Alpine, where they will purchase Highland calves and yearlings from the Big Bend country for cornbelt feeders. According to Mr. Wright, in that part of Texas the production of feeder calves is an agricultural specialty and the cattlemen produce the best feeders that are shipped out of Texas. Only pure bred stock will be purchased.

It is expected that nearly 10,000 head of calves will be handled by the pool. The first consignment will be shipped to Kansas City where the calves will be auctioned off to the feeders of that territory that have membership. Other consignments will be shipped to St. Louis at later dates for feeders patronizing that market. This is an entirely new feature in cooperative livestock buying and is conducted for the benefit of producer patrons on a cooperative basis.

FARM FILLERS

—From Knox County Farm Bureau Bulletin.

Is This Team Work?

W. A. MCNEILL OF CHANDLERVILLE, ILLINOIS, formerly a member of the I. A. A. grain committee, was selected to impersonate Abraham Lincoln in the Jacksonville centennial pageant.

EVERY BOY AND GIRL WHO GOT A SETTING OF eggs last spring through the White County Farm Bureau must bring a pullet and show it in Carmi, October 31. Winners in each breed will be given prizes by Carmi merchants. The Kiwanis club is co-operating.

A SHEET OF PAPER MADE FROM CORN STALKS is reported by chemists of Iowa State College.

WITH 1,460 NAMES SIGNED TO ITS MEMBERSHIP roll for the three-year period, the McLean County Farm Bureau closed its drive. An increase of 26 per cent of the expiring membership of 1,160 is recorded.

THROUGH ARRANGEMENTS MADE BY THE Montgomery County Farm Bureau, approximately 125 farmers of that county are expected to entrain October 25 on a "Dairy Special" to Green County, Wisconsin, where general dairy conditions will be investigated.

Corn Borer Dangerous To Cornbelt Farmers Says Iowa Authority

Pest Spreading at Rate of 5 to 20 Miles a Year; Canadian Corn Destroyed This Year

There is real cause for Illinois and other cornbelt farmers to fear the introduction of the European corn borer into this area, in the opinion of C. F. Curtiss, dean of agriculture at Iowa State College, who has been named chairman of a special committee to work with state and federal authorities in finding control measures.

Cornfields were completely destroyed in Ontario, Canada, this year and the pest is spreading at the rate of 5 to 20 miles each year, with no means yet devised for checking it.

So far, western Ohio and eastern Michigan is as close as the corn borer has approached Illinois, but since the pest attacks 200 different food plants and cotton, there is no telling when it may be carried into the cornbelt. Although no important damage has been done to corn this year, except in western Ontario, the pest seems to be increasing in severity each year and no one can forecast when it may reach a severe stage in the United States, according to Dean Curtiss.

Special Committee Appointed

More than 100 representatives from 12 states and Canada were present at conferences held recently in the infected areas. So seriously did the men from the cornbelt look upon the advance of the pest toward this area, that they appointed a special committee to work with the state and federal authorities to find control measures. Dean Curtiss was made head of this committee.

Strict quarantine measures are being used by state and federal authorities in the infected areas. Quarantine officials in western New York took 100,000 cars of corn from automobiles of tourists and hucksters coming down from Canada this past year and found that 12 per cent of these cars had corn borer worms. Should any of these ears get by and be carried to new areas, it would probably cause a fresh outbreak.

About the only promising means of combating the corn borer at the present time appears to be by introducing parasitic enemies of the borer. These are being imported from foreign countries, but not enough that yet been done to cause any material effect in control.

"Facts brought out at the conferences show clearly that all agricultural states have a vital interest in this problem of the corn borer," Dean Curtiss asserts. "If the pest should enter and become as severe in its injury as it has in Canada, the loss would be enormous."

Women May Have Program at Annual I. A. A. Convention

Plans for the program of the annual meeting of the Illinois Agricultural Association to be held at Urbana, January 21 and 22, furnished one of the chief subjects of discussion at the I. A. A. executive committee at its regular meeting on October 8.

The consideration of having a special woman's program for the wives of the delegates and other women who will be present at the annual meeting was discussed. A suggestion was made that the home economics department of the University of Illinois be asked to co-operate with the I. A. A. program committee in arranging this special feature.

The question of co-operative purchase of farm supplies, chiefly feeds, seeds and fertilizers, by county Farm Bureaus for their members was discussed. In the past, no definite policy in this nature had been determined by the executive committee. At the June meeting of the committee, a special committee was appointed to formulate a plan whereby a purchasing service could be furnished by the I. A. A. for its members.

The legislative committee of the I. A. A. reported three major legislative projects that the association would support to the A. F. B. F. for the national legislative program during the next Congress. The committee suggested:

"First, legislation that will put agriculture on equality with industry and labor; second, legislation regarding our revenue laws establishing proper exemptions for co-operative marketing organizations; and third, legislation regarding Muscle Shoals, looking toward the manufacture of fertilizers at the least possible expense."

Other topics of consideration included a report of the co-operation between the I. A. A. with other state farm bureaus and A. F. B. F. regarding the present fight against the 5 per cent freight rate increase asked by the western railroads, and a motion to assist the Illinois Milk Producers' Association of Tazewell, Woodford and Peoria counties in their membership drive. The I. A. A. will underwrite one-half of the cost of an organizer to assist in the milk producers' campaign.

Member in Stephenson County Breaks World's Record for Ton Litter

Having raised the world's single litter of pigs in the honor of the W. T. Rawleigh company, operator of Ideal Stock Farms, Freeport, a member of the Stephenson County Farm Bureau.

Not only on one litter was the former world's record broken, but on two, both of which were bred, fed and developed on the same farm, according to official figures announced by W. H. Smith of the College of Agriculture, who has charge of the Illinois Ton Litter contest.

The two litters of purebred Poland China pigs entered in the contest by W. T. Rawleigh have recently come off feed at the end of the allotted six months time with respective weights of 4,789 and 4,511½ pounds of pork to their credit. The former world's record, which was made last month by a Kentucky litter, was 4,323 pounds. The Kentucky litter contained 12 purebred Poland Chinas, while the breeder of the two Illinois litters contained 16 and the lighter 15 pigs. Both litters were sired by the same boar and were fed under direction of Farm Adviser W. A. Herrington.

Trials of One Are Tribulations of Other

(Continued from page 1, col. 5)

into any city of the United States, wherever you will, and you see feverish building activity, the development of great residential districts and the tearing down of old but usable business blocks to make room for sky-scrapers to rise in their foundations. Go out through the country, and observe the contrast. There you see unpainted buildings, a wearing down of the capital plant and equipment that means an unbalanced economic life in this country and nothing else. Over half the farm sales in this great state of Illinois last year were forced sales. I could tell you a story of farm mortgage foreclosures in this state and our great neighboring state of Iowa that would amaze you, but lack of time will not permit. I want to suggest to the railroads that "newspaper prosperity" will not pay their freight bills, and what is just as essential, will not enable their best customers, the farmers, to buy loads of freight for them to haul back to balance the freight movement out of the farming districts.

Surplus Sets Price

I am glad to acknowledge that some beneficial price increases have taken place recently, but I ask you gentlemen to distinguish between the actual and the nominal improvement. The difficulty that contronts the farmer is that he always has a surplus to sell of that which brings the lowest price.

Last year the farmers of Illinois had hogs to sell in great abundance, but the price was below the cost of production, and they had to be finished on high-priced corn, which was a short crop. This year hogs are high, but we find we are short on hogs, and long on corn, and you know what is happening to the corn price right now. Oats are selling at far below the cost of production. Last year's wheat price was satisfactory, but reached its level after most of the farmers had sold their crop, and the price increase was abnormal, due to general crop failures, particularly severe on our neighbors to the north. A partial failure in winter wheat started this season's market off on a satisfactory level, but it did not last. But such price for wheat as we do get this season will be due to the fact that drought and winter kill made the year's wheat production the lowest in decades.

Large Crop—Low Prices

So it has been with cotton. It has required disaster here or abroad to bring a living price to the American farmer, and it is unthinkable that we should consider prices resulting from it as evidence of the fundamental correction of the farm situation when normal corps next year or the year after will bring a return of the old disadvantage in price relationships.

The fixed charges of farming are inelastic and inescapable. Taxes, wages, interest and the cost of non-agricultural commodities make a total which has no relation whatever to the price the farmer gets when he hauls his crop to market. His only possible response is to strive for the utmost production from his land. If Nature is kind, we witness the paradox of low prices and an unprofitable year.

Quotes Lowden's Article

I know of no better statement on this question than the article written by our former governor, Frank O. Lowen, and published in the October number of World's Work. Every man here who is sincere in his interest in the welfare of farming ought to read that article. Governor Lowden says:

"A year ago this summer there was a drought in the Southwest which was injuring the cotton crop. The government estimated the crop of the year at 13,486,000 bales. And then the drought was broken. The government got out another report and this time estimated the yield at 13,900,000 bales, an increase of less than 5 per cent. Prices at once fell about 20 per cent. If these prices reflected real values, the loss to the cotton farmers of the South, due to timely rain, was something like $300,000,000. And yet there was a dearth of cotton such as had not existed since the Civil War. The press had been filled with fears of a cotton famine.

"Two years ago there was a bumper crop of corn. As a result, the price declined so low that it was cheaper in some parts of the Dakotas and Nebraska, and even Iowa, to burn corn than to haul it to be sold. Last year, owing to a cold, wet summer, the corn crop was small in yield and inferior in quality. The government estimated the crop at 2,900,000,000 less than the bumper crop of the year before. As a result, according to the government's figures, the smaller crop of defective corn was worth $300,000,000 more in the markets than the crop of the year before.

"Some economists see nothing illogical or evil in such a situation. They say that it is an inevitable result—the result of the law of supply and demand. I cannot quite accede to this proposition. It answers itself. For, under the law, if the world will pay a larger price for ten bushels of wheat than it will pay for fifteen, it must be because it prefers ten bushels of wheat to fifteen bushels, and the supply, therefore, will adjust itself to meet that demand. This means a constantly increasing cost to the consumer."

Normal Production Cannot Be Reduced

It is sometimes hard to be patient with the man who, recognizing this problem, says: "Well, let the farmers reduce their production, and grow only what our domestic market can absorb." This can be done in a factory. It cannot be done on a farm where from long before planting time, until after the crop is marketed, elements over which the farmer has no control make or break it.

Asks Assistance to Secure Equality

Let me quote you an illustration. We cut our wheat acreage in 1924 by four and one-half million acres below that of 1923, but our wheat crop was 70,000,000 bushels more in the year with the smaller acreage. The same is true of corn, or cotton, or pigs, or calves.

Of course the farmers and farm organizations want to make adjustments in farming to meet changing conditions; and want to improve methods of growing and selling crops. But there has been no sign to thoughtful men that these improvements can balance the scales in the system, where every conceivable device in organization and legislation has been employed to stabilize industry successfully. This is why we want the railroads to face this problem with us squarely, and help us to a place of equality with other forms of industry in the American protective system, if we are to retain that system.

Says Railroads Ignore True Situation

You may ask what this has to do with transportation, and I repeat that the railroads of the West will be sound and prosperous just so the degree that

Watch for Cholera! States Warning to Illinois Stockmen

Iowa Authority Reports Increase of Disease This Year; Illinois Farmers

"Watch your hogs for cholera symptoms," states a warning to Illinois farmers sent out by Wm. E. Hedgcock, director of the livestock marketing of the I. A. A.

Wm. E. Hedgcock

"This is the time of year when hog cholera is most likely to break out, states Director Hedgcock," and so far this year more than 10 counties of this state have reported cholera cases. As yet cholera reports in Illinois are not unduly alarming but every hog feeder or breeder should be on the lookout for the disease. If cases are reported in his community he should vaccinate his herd immediately.

"Vaccination for cholera is not a cure but a preventative. It is the cheapest insurance that a hog feeder can procure. Farmers who attempt to carry hogs to maturity without first vaccinating are running a risk that may prove very costly. This can best be done with the least when the animals are young and light in weight. If the feeder waits until the epidemic breaks out in his country he may be forced to spend more money for vaccination and lose about two weeks of his feeding period or sell his herd at a probable loss.

"According to Dr. K. W. Stouder, extension veterinarian of Iowa State College, more hog cholera is to be found in Iowa as a whole this year than a year ago. This is probably due to neglect to immunize the hogs by vaccination because the disease may not have appeared in certain communities for some time. Conditions in our sister state are generally similar to those found in Illinois and that reason farmers of this state may well take heed and be extra careful in watching for hog cholera symptoms this fall."

farming in these great surplus-producing districts prospers. Rail income from farm business during the past five or six years has come from exhaustion of farm capital, rather than from farm net income. And as I see on every hand the tremendous improvements in the city properties of railroads—the colossal passenger stations, the electrified, systems built for city comfort out of earnings, and compare it with what I know is taking place in my own farm neighborhood, I wonder if the railroads, after all, recognize the situation in which the farmers have been, and I fear, still are.

I am about to get over into the second part of my discussion, and probably is is about time. There is so much to be said about the post-war agricultural condition that I find it difficult not to use up my allotted time on that.

Farmers Close Students of Railroads

The farmers, on the whole, are friendly to the railroads. Each farmer is a property owner, a manufacturer, a laborer and a shipper for himself. His contact with railroads is immediate and personal. Therefore, he is a much closer student of railroad problems than the average man in town. The conflict which in the past has marked the relations of agriculture and transportation has not found farmers fighting railroads in their proper functions, but the abuse of railroads to foster favoritism and preserve inequalities.

So it is now. The farmer favors a square deal for the railroads. He recognizes his need for ample and adequate rail service. By nature the farmer is a conservative. He is an independent capitalist with an inbred love of property and respect for property rights. Let me call your attention to the fact that for several generations the farmers of the middle West have been voting right along with the manufacturers for protective tariffs, and with insurance companies and banking interests for financial legislation. But let me drop a word of warning right here. The farmer is now thoroughly awake to the fact that he must compete with the world and see his home markets governed by prices established by the labor of peasants abroad. His conservative colleagues have not given him any favors comparable to the favors they have appropriated to themselves.

Fears Railroads Alienating Farmers

If the railroads themselves pursue a policy that alienates the support of this great agricultural group whose interests are so close to theirs, where in America, I want to ask, do they expect to replace

Business men in general, and I am tempted to add, railroad men in particular, have exercised freely the right to criticise and advise agriculture concerning readjustments to meet its crisis. There will be no objection raised then, I am sure, when I say that there are many things in the transportation situation with which the farmers are not satisfied, and many points on which they want information. They can be depended upon to make up their minds fairly if they are given accurate and trustworthy information.

Farmers Question Railroads' Actions

The farmer wants to know why rate increases should be made horizontally and if rail rates are such a jumble that no more scientific mode of increase is possible. He wants to know why promoters are permitted to make millions through consolidation of broken-down railroads, and, if that is possible, why do the railroads need an increases in rates?

If motor transport companies make so much money that the railroads suffer great loss, the farmer wants to know why one system of transportation should be permitted to fatten off another system, and the general public asked to come to the rescue of the one thus weakened?

Who Pays For New Equipment

What is the truth about the enormous additions to equipment and rolling stock which the railroads advertise they are making now? Are they paid for out of current income?

If we glance back over railroad history, we will recall that the Interstate Commerce Commission was created to give the public the facts on just such questions as the one here raised. Has the Interstate Commerce Commission become merely a court before which public interest has to fight special interests? Certainly that is not the function for which it was established. The Interstate Commerce Commission should represent the public in every rate case, and by impartial investigation should give the public all the facts in matters of railroad policy.

If the Interstate Commerce Commission will not help in this way, then it becomes necessary for agriculture to conduct its own investigation, and to co-operate with trade bodies such as the Illinois Chamber of Commerce in looking after the public interest.

Farmers Want the Truth

These questions are not asked in any unkindly or critical spirit. It would be possible to raise many others involved in the modern transportation problem on which the farmers want the truth. I assure you they can be depended on to judge and act fairly upon it.

In conclusion I am tempted to point out that the attitude of agriculture toward the railroads, in recognizing the need for their proper maintenance and support, is fairer than that of the average business view of agriculture. Am I wrong in saying that the typical attitude of the cities toward this farmer may be summed up about as follows? "Your income is shrinking, therefore, reduce the valuation of your farms, lower your living standards, increase your hours of labor and those of your family, until your income suffices; you are overexpanded, so reduction is inevitable decreed by economic law, and even though reduction must be attended by foreclosure and bankruptcy, nothing can be done about it."

Prosperous Agriculture—Prosperous Railroads

A prosperous agriculture will do more to rebuild railroads, then increased freight rates; a human understanding of our common problems must precede a solution of the difficulties of either the railroad or the farmer, or of both. These are the two thoughts I want to leave with you this morning, above all else.

Business intercourse is moving along on higher levels than before the war. A prevalent view among leaders of business and industry is that these higher levels are here to stay. It is not my purpose to discuss that with you today further than to say that they cannot permanently be maintained for some groups if others are to be excluded. They can only be maintained by the co-operation of all groups, and the putting into practice of the golden precept which has come down through the ages as the guide for men's relations, one with another:

"Whatsoever ye would that men shall do unto you, do ye even so unto them."

Farmers' Poultry Meeting Holds Up Passenger Trains

B. & O. Officials Co-operate With Southern Illinois Farmers in Selling Eggs on New York Market

Seldom does a farmer's meeting become so important as to hold up a passenger train, but such was the case in Flora on October 8 when approximately 25 farm advisers, farm bureau officials and officials of the Baltimore and Ohio railroad met to discuss and study the packing of eggs and how they should be loaded into refrigerator cars. Two trains were improperly delayed an hour and half an hour because of the meeting.

It was the third of a series of meetings held in Flora on fundamentals of co-operative poultry and egg marketing by Frank A. Gougler, I. A. A. director. Flora is a point that has been selected after thorough study as being advantageous for a farmers' poultry and egg marketing organization.

Not only is it in the heart of a rich poultry section, but is the junction point for the B. & O. north and south and east and west lines. An egg car is served by the E. St. Louis to Mattoon Flora which stops at various stations along the way picking up eggs of dealers and farmers en route to New York and other eastern points.

Flora is Reloading Point

Similarly, cars are routed toward Flora from Vincennes, Ind., Shawneetown and Beardstown, all scheduled to arrive there the same day. Here the partially filled cars are reloaded, filling as many refrigerator cars as are required, and dispatched immediately to the East.

Anyone with two cases of eggs or more can ship this way, and many farmers are taking advantage of it, according to Mr. Gougler. He cites one instance in which J. C. McElyea, a prominent farmer living near Flora, shipped three cases to a commission firm in New York, October 5, and by this means saved approximately 50 per cent in transportation charges under express rates. Furthermore, Mr. McElyea reaped a price of 47 cents a dozen, laid down at New York. After deducting freight, cartage and packing expense, his net return was 43 cents. Farmers were receiving from 25 to 35 cents from dealers in this territory for the same period.

Railroad Officials Interested

Officials of the B. & O. were interested in the farm bureau meeting because they are desirous of carrying more poultry and eggs out of southern Illinois. They predict an increase in poultry husbandry in this section of the state.

Mr. Gougler thinks that a corps of a farmers' shipping organization may be developed at Flora and other points by first organizing the heaviest farm-shippers. With a strong desire already manifest by the leading farmers in this locality, some definite action may be expected. However, the primary purpose of this meeting, and other meetings being held by Mr. Gougler over the state, was to acquaint farm advisers and leading farmers with first-hand information on some of the problems which must be met by any co-operative poultry and egg marketing organization.

OFFICE VISITORS

Chris Christenson, in charge of the division of agricultural co-operation, United States Department of Agriculture, Washington, D. C.; Elmer E. Lyon, Georgetown; W. V. Jones, Georgetown; J. J. Lintner, in charge of tuberculosis eradication, Illinois Department of Agriculture, Chicago; J. J. Sullivan, Consumer's Company, Chicago; T. F. Quilty, president, Superior Stone Company, Chicago; Herman Steen, secretary, Indiana Wheat Growers' Association, Indianapolis, Ind.; M. L. Wilson, bureau of farm management, United States Department of Agriculture, Washington, D. C.; C. W. Holman, secretary of the National Co-operative Milk Producers' Association, Washington, D. C.; S. A. Miller, legal counsel, Dairymen's League Co-operative Association, Inc., New York; Frank Evans, general marketing council, American Farm Bureau Federation, Chicago; J. P. Larson, Farmers' National Grain Dealers Association, Ft. Dodge, Iowa; A. W. MacKay, division of agricultural co-operation, U. S. Department of Agriculture, Washington, D. C.; J. P. Tocher, general western freight agent, Southern Railway System; Stanley M. Powell, assistant Secretary, and legislative representative of the Michigan State Farm Bureau, Lansing, Michigan; Mr. Collins of West Frankfurt, Ill.; J. W. Goemans of the Grain Dealers National Association; Rev. Elmer Olson, Watsga, Illinois; Dr. C. E. Nourse, Washington, D. C.; E. L. Corbin, organizer for the Missouri Farm Bureau Federation; N. W. Strother, office manager and director of information department of the Missouri Farm Bureau Federation; John M. Crebs, chairman advisory committee of the American Red Cross White County; O. R. Waddle, assistant general livestock agent, Atchison, Topeka & Sante Fe Railway Company; Mr. Cowling, Plainfield, Illinois; John N. Davis, assistant commissioner of agriculture, Hamilton, Mont.; F. E. Harris, in charge of co-operative auditing, department of agriculture, St. Paul, Minn.

Farmers Co-operate in Marketing Eggs

(Continued from page 1)

of the different grades in a pool, and the range of price received by members. The last pool for example graded and netted members as follows:

GRADE	PER CENT	PRICE RECD
Hennery	32%	42c
Standards	56%	34c
Trades	9%	27c
Checks	1.8%	20c
Rejects	.4%	

Get Five Cents Additional Profit

The average price received by the members during this pool (Sept. 1-15) was 35.7 cents and the average current receipt and price paid to non-members for this period in these four counties was 30 cents per dozen. Thus it is seen that the members received a premium of five cents per dozen through their association. This does not take into consideration the amounts received by the association for a reserve. For one single pool the members of the association enjoyed the privilege of having no less than $3,450 more money to their credit than they might otherwise have had.

This extra gain, however, is not the only thing to hold up as the goal of the association. Being able to sell eggs on grade is of far greater importance. The above table clearly points out that better eggs bring the most money for there was a margin of 15 cents a dozen between the top grade and the lowest grade outside of checks. This difference is a strong stimulus for producers to improve quality.

Have Forty-four Receiving Stations

Set-up of the Ohio organization and its method of assembling and handling eggs is very similar to those found in Minnesota, which have already been explained in these columns. This one organization of 1800 members covers four small counties in the northwest corner of the state, an area about 40 by 50 miles square. These 1800 members take their eggs to some 44 receiving stations in this manner the produce moves every other day from any one of the receiving stations to the concentration point where the produce is graded and packed for shipment.

At present poultry is handled alive in carlot shipments. Taking all conditions into consideration, there seems to be no outstanding reason why this method of marketing these commodities should not be just as practical for Illinois as for Ohio. This is particularly true for such areas of Illinois that correspond in every way to the northwest section of Ohio.

FARM ADVISER BURNS OF CHAMPAIGN COUNTY represented the Illinois advisers at the National Conference of County Agents at Indianapolis.

THE I. A. C. A., CO-OPERATIVE ADVERTISING service, has opened a branch office at Champaign. Fifteen farmers' business organizations will be served from this point, thus cutting overhead expenses to a minimum.

Marketing Problems Main Topic at 23rd District Conferences

Cowles, State Treasurer, Tells Necessity of Concerted Action On National Farm Legislation

Discussion of the marketing and production projects carried on in the various counties formed the major portion of the program of the 23rd District conference of the Illinois Agricultural Association, held at Effingham, October 14.

W. L. Cope

Eighteen farm leaders and farm advisers from Wabash, Richland, Jefferson, Marion, Crawford and Effingham counties were present. Following the election of W. L. Cope of Salem, executive committee man of the 23rd district of the I. A. A., as chairman and Bliss E. Loy, secretary of the Effingham County Farm Bureau, as secretary of the meeting, the farm advisers were asked to give a short review of the work in their respective counties.

Membership Drive Promising

This was followed by open discussions with a view of assisting in solving the common problems. These talks covered such subjects as tuberculosis eradication, the purchase of limestone, discussion of poultry, egg and cream marketing, membership drives, boys and girls club work, experimental plots, and live-stock marketing. Farm Adviser Wascher stated that the membership drive of the Effingham County Farm Bureau is progressing rapidly and indications are that the campaign will go over 100 per cent.

R. A. Cowles, I. A. A. state treasurer, gave the address of the meeting. Besides answering many of the questions put forth by the leaders present regarding state policies and problems, Mr. Cowles emphasized the need of co-operation and concerted action regarding the national legislative problems of the American farmer and particularly those of the Middlewest.

"Agriculture must have a voice in directing the progress and political trend of this country," stated Mr. Cowles, "and this can be accomplished most effectively through co-operation in the state and county Farm Bureaus." If we do not unite in making known our needs and desires our mid-western farmers can expect the same disaster that the farmers of England met following the abolition of the English corn laws in 1847. At that time the English government decided that England was predominately an industrial country and practically destroyed her rural people by the industrializing laws that were passed in an effort to get cheap food for her laboring class.

Membership Drive Promising

"We must realize that the people of our eastern states are principally interested in getting their food at the lowest cost and we cannot expect them to defend our farmers in the efforts to get greater agricultural returns. It is for us to work together through the farm bureaus, the Illinois Agricultural Association, and the American Farm Bureau Federation in stating and directing our legislative and industrial needs before our governmental bodies.

"I am pleased to state that, in general, the farm organizations and leaders of the Middle West are co-operating for the good of agriculture.

Tornado Relief Work Told

Mr. Cowles, who is also trustee of the $182,000 farm bureau fund for relief work in the tornado stricken district of Illinois, told of the efforts and money that are being expended to assist the farmers of that district to reconstruct their buildings and purchase animals so that the devastated area may be restored to its former productiveness. The committee in charge of the fund is working with the American Red Cross in the rehabilitation.

Among those present were: W. W. Bunn, farm adviser, and D. H. King, president of the Richland County Farm Bureau; J. R. Spencer, farm adviser of the Wabash County Farm Bureau; L. G. Stillwell of Mt. Carmel; L. R. Caldwell, farm adviser of Jefferson County Farm Bureau; F. J. Blackburn, farm adviser of Marion County Farm Bureau; J. L. Parks and G. R. Williams of Marion County; N. F. Elder of Saline County; W. L. Cope of Salem; David McClary of Lawrence County; George Knierim of Shumway; Charles Evans of Mason; Otto Braasch of Altamont, and F. W. Miller, president. F. W. Wascher, Farm Adviser, and Bliss E. Lop, secretary of the Effingham County Farm Bureau.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Volume 3 | Issued Every Other Saturday for 63,000 *thinking* Farmers—November 7, 1925 | No. 22

FARM BUREAU FINDS ERRORS IN RAILROADS' TESTIMONY

Farm Bureau Members Must Reserve Places At A. F. B. F. Meeting

Farmers Should Notify Farm Bureau if They Plan to Hear President Coolidge Talk at Chicago

Special arrangements are being made by the American Farm Bureau Federation to provide "hearing and seeing" space for every farm bureau member who attends its seventh annual meeting at the Sherman hotel, Chicago, when President Coolidge speaks on December 7.

Members of each County Farm Bureau wishing to attend, should make reservations through their County Farm Bureau either by phone, personal call or letter.

Seats are being allotted to each state in proportion to the number of members it has in the national organization. This entitles the Illinois Agricultural Association to approximately 300, which does not include farm advisers, there being a special section reserved for them.

Seats For 200 Members

With 92 presidents of county farm bureaus invited by the Illinois Agricultural Association to attend a state-wide prexy conference during the national convention, seats are available to slightly over 200 Illinois farm bureau members.

Special railroad rates are effective for those attending the meeting. The fare amounts to one and one-half round trip. Tickets should be purchased to Chicago the regular way, but a certificate of purchase must be obtained from the local station agent. Through the transportation department of the American Farm Bureau Federation, the certificate will be properly validated so a return ticket can be purchased at one-half fare. There will be no reduced fares to those who forgot their certificates.

Puncturing Their Testimony

Railroads' Picture of Return of Prosperity, Painted Last September, Gets Severe Reversal Under Cross Examination by Farm Bureau

I. A. A. Gathering Data Direct From Counties and Country Banks to Give Interstate Commerce Commission an Actual Picture of Farm Conditions Which Will Be Introduced at Kansas City in January

THE story of the grand return of farm prosperity which was told the Interstate Commerce Commission in September by economists employed by the western railroads was thoroughly punctured by the Farm Bureau during the cross examination proceedings at Chicago which began Oct. 26. One of the important basis for rate-making is to charge "what the traffic will bear," consequently the railroads introduced testimony in the hearing at Chicago in September to show that the farmers could afford an increase in freight rates—namely, that the farmers' purchasing power has been fully restored to the pre-war basis, and that a depression in agriculture no longer exists. The carriers hoped that, had their testimony prevailed, it would have had the effect of completely eliminating the possibility of reduction in rates on farm products under the Hoch-Smith resolution.

Railroads' Testimony Punctured

It was this testimony which was punctured in cross examining Dr. David Friday, formerly president of the Michigan Agricultural College, and H. W. Moorhouse, of the Brookmire Economic Service, both of whom were employed by the railroads to prepare statistics and to testify on the agricultural situation. In their direct testimony, both painted a rosy picture of the return of agricultural prosperity, a situation that is not believed by those who are close to the farms, and a picture which has raised considerable ire among farmers.

Reveal Faulty Figures

Perhaps the most important revelation in the Farm Bureau's cross-examination was the bringing to light of the erroneous figures of Dr. Friday which had been used to show that the farmers' purchasing power in 1924 and 1925 had risen to as high a point as was reached in 1913, the highest pre-war year. When this testimony was given by him in September, the impression was taken by the public from the press reports that agriculture had regained its pre-war condition, which was taken for granted as having returned to a prosperous condition.

In direct testimony during the hearing in September, Dr. Friday said:

"Agricultural products in the year 1924, according to this computation, as well as according to the computation of the department of agriculture, have regained, within a fraction of a per cent, the relative purchasing power of 1913, the highest pre-war year."

Farm Bureau Points Out Errors

Fred S. Jackson, attorney representing the American Farm Bureau Federation and Illinois Agricultural Association interests, in cross-examining Dr. Friday, pointed out errors in figuring, and substituted the correct ones as prepared by the United States Department of Agriculture, which were compiled upon request of and in cooperation with the Farm Bureau.

A part of the record of the cross examination reveals this important point:

Q.—(by Mr. Jackson) Dr. Friday, has your attention been called to the fact that beginning with 1909 errors occur in your divisions?

A.—No, sir.

Q.—And that the defects increase from there on down to the end of the column?

A.—No, sir.

Q.—Your attention has not been directed to that, Doctor, you say?

A.—No, sir.

Q.—Well, if those were corrected, they would read as follows.—If I may be permitted to read them, Mr. Chairman—

Chairman Atchison: Commencing with what?

Mr. Jackson—1909, column 5, the figure should be 129—

Introduce Correct Figures

The figures read by Col. Jackson substitute for those which Dr. Friday's exhibit showed as representing the par-

(Continued on page 4, Col 4)

Cider Effective in Extinguishing Fire When Water's Scarce

"Cider, cider everywhere" was the situation at Neoga, Cumberland county, recently, when, according to estimated reports, 40,000 gallons of processing vinegar were used to fight the fire which destroyed one of the cold storage warehouses and 30,000 barrels of apples owned by the Watson Orchard Company.

When the fire broke out in the main warehouse, on this eventful Sunday morning, the only water supply of the plant was used to fight the blaze. Sparks soon spread to a nearby warehouse where a half-million gallons of cider was stored until it would reach the proper state of fermentation. The men attempting to defeat the conflagration realized that the cider would eventually be destroyed, if the fire were not controlled, and substituted the beverage for the much needed but scarce water.

No report was made to indicate the effect of the alcoholic content of the hard cider upon the blaze.

Reinsurance Company Applies for Charter; Total Now $700,000

Applications and Books Passed Inspection By State Examiners; Henry Leading County in Campaign

All arrangements and requirements are being completed and the Farmers' Mutual Reinsurance Company of Illinois will soon be under way, according to Vernon Vaniman, I. A. A. representative of the new mutual state-wide insurance company.

Last week, W. Rufus Kendall, chief examiner, assisted by W. E. Cable and Max Beekler of the Illinois State Insurance Department, Springfield, examined the applications and books and passed sanction on the new company. Application for the state license has been made to the division of insurance of the Department of Trade and Commerce, Springfield.

Campaign Totaled $700,000

Farmers in 67 counties of this state assisted in getting the charter for the reinsurance company by sending in applications for insurance to an amount totaling over $700,000. According to Mr. Vaniman, it is expected that other counties would have assisted in the campaign but the personnel of the new company did not have time or opportunity to explain the project to the members in all counties.

In ranking the counties according to amounts of insurance subscribed during the campaign, it was found that Henry county led with a total of $48,950. LaSalle county ranked second with $40,000; Madison, third, with $35,460; and Henderson, fourth, with a total amount of $30,650.

Work has begun in signing up counties for specific reinsurance and blanket reinsurance. Six counties have already signed the contracts for specific reinsurance and the new company will be in position to take care of insurance ceded to it by the local company just as soon as they have signed the contract.

Blanket reinsurance cannot be put

Illinois Real Estate Now Pays 85 Per Cent of State Tax Revenue

Land Ownership Becoming Undesirable in Illinois Due to Old Tax System—Watson

Illinois real estate constitutes less than 40 per cent of the wealth of the state but is paying 85 cent of the taxes, according to J. C. Watson, director of the I. A. A. taxation and statistics department.

"People of Illinois realize very keenly the breakdown of the present revenue laws," stated Director Watson, when discussing the proposed revenue amendment to the State Constitution which will be voted upon by the people of Illinois during the general election of November 1926.

"Farmers of Illinois realize also that unless the General Assembly is given much broader powers than it now possesses, it cannot do much to remedy the present condition. As a result of the present Illinois tax system, people are becoming more and more unwilling to own their own homes, and farm ownership has become very undesirable.

Tax Laws 55 Years Old

"The Constitution of Illinois was adopted in 1870 when practically all property in the state was tangible and could be assesed and taxed in the same manner. This is no longer the case. Under the proposed tax amendment to the Illinois Constitution, the members of the two legislative bodies of our state will be permitted to adopt methods of taxation, free from limitations in the present Constitution, adopted fifty-five years ago, which now prevent an equitable adjustment of our tax burdens. The proposed amendment will impose no new taxes or affect any existing exemptions from taxation."

Illinois County Farm Bureaus and the Illinois Agricultural Association have been co-operating for more than three years in the work of bringing about more equitable adjustments in the taxes of this state.

M. P. Roske became farm adviser for Carroll county in October.

Red Grange Reared on Milk; Worked on Farm of Uncle, Says Father

Prisoners of the DuPage County jail should consider themselves lucky and might be expected to develop into super-athletes because they are fed by no other than Deputy Sheriff L. N. Grange, father of Harold "Red" Grange, Illinois football ace and famous gridiron sprinter of all football history.

"Harold, as his father recently told a representative of the I. A. A. RECORD, is very fond of milk. Ever since Red was a little tot and attended his first athletic event, way back in Pennsylvania, he has drunk milk with practically every meal, according to his father.

"Harold would have made a good farmer. He likes the farm and farm work says Mr. Grange, in telling how years ago before Red Grange became the famous 'Wheaton Iceman,' he worked on the farm of his uncle, E. O. Grange.

"Harold can milk, plow, disc, make hay and do all farm chores. Several years ago when we had the exceptional cold weather, Harold was one of the hands on his uncle's farm. The hard physical work of the farm appealed to him. He is a lover of animals and especially of fine horses. He would go a long way to see an exhibit of pure-bred livestock."

Chicago Producers' Buy 27,000 Montana Lambs For Feeders

A lamb-buying pool composed of approximately 27,000 head of Montana lambs has been completed by the Chicago Producers' Commission Association.

This pool was conducted by the Producers' for their patrons in Illinois and Iowa who were desirous of purchasing feeder lambs at the lowest price commensurate with good quality and condition. A. E. Adams, representing the Producers', made a special tour throughout the entire state of Montana where he purchased and loaded some 90 double-deck carloads of lambs and shipped them direct from the loading point to farmers' feed lots in Illinois and Iowa who had contracted for purchases.

Lower Prices on Farm Products Expected in Future, Economist Says

Three hundred farm bureau leaders, home demonstration agents and county agents who met at the thirteenth annual extension conference at Iowa State College recently were told by G. F. Warren of Cornell University, New York, one of the outstanding agricultural economists of the country, that a period of low prices is in prospect. He feels that there is likely to be a trend toward lower prices during the next 10 or 15 years.

Dr. Warren stated that he stands about half-way between two schools of economic thought—one saying that there will be a return of the pre-war price level, while the other believes future prices will be about 60 per cent higher than the pre-war. Dr. Warren personally believes there will be somewhere between these two, or about 20 to 30 per cent above pre-war levels.

FOR 1924 THE TAXABLE VALUATION of property in Illinois subject to ad valorem taxation was $4,090,509,504; the amount of state taxes levied was $20,452,548; and per capita levy $2.99.

Published every other Saturday at Mount Morris, Illinois, by the Illinois Agricultural Association. Edited by Department of Information, Harry C. Butcher, Director, 608 South Dearborn Street, Chicago, Illinois. Entered as second-class matter October 20, 1925 at the post office at Mount Morris, Illinois, under the Act of March 3, 1879, as a bi-weekly. Acceptance for mailing at special rate of postage provided for in Section 1103, Act of August 24, 1924, authorized October 20, 1925. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record. Postmaster: In returning an uncalled for or missent copy, please indicate key number on address as is required by law.

Canada's Farmers and The Tariff

FARMERS of Canada, particularly of those great surplus-producing provinces of the West, see clearly that high tariffs which profit industrial Canada, operate to their disadvantage. This was the issue in the recent Canadian election. It is significant to note that the stubborn farmer fight against the Conservative, or high tariff party in Canada, did not stem the tide of high-tariff sentiment fostered by Canadian industrialists. The Conservatives gained more seats than any other party, but fell short of control by several votes.

This indecisive election which left the Conservatives with about 116 seats, the Liberals with 102, and the Progressives with 23, will undoubtedly be followed by another election, possibly within the year. If the Conservatives should then gain control, and enact high tariff laws, important reactions may be looked for in the United States.

The reciprocity issue will be with us again. Manufacturers of the United States who want no effective tariff between them and the Canadian market, will demand a trade under which the American market can be made free to Canadian farm products, in exchange for a free Canadian market for our industrial goods.

The industrially-minded Chicago Tribune is in the field early with its demand for this sort of a customs agreement with Canada. Right now the tariff on farm products is operating to the advantage of farmers of the United States, due to the partial crop failure in important wheat states, and to the forced reduction that has taken place in livestock.

The outlook on the tariff of the farmers of the United States and of Canada is exactly the same, even though there is an economic clash for the United States market. On both sides of the boundary there is a growing conviction that we want to be done with special privilege; that if the tariff must be ineffective for agriculture, then let us stop the tariff subsidy for those whose goods we buy.

Where there is a surplus over what the domestic market absorbs, then world prices rule, and a tariff, though it be high enough to constitute an embargo, is a teasing bit of political fiction, and the farmers know it.

Renewal of the demand for Canadian reciprocity can only be countered by a demand from the farms that the rest of the tariff wall be leveled.

Governors Favor Equality

"IF the American protective tariff is to be retained, legislation must be enacted which will give Agriculture equality with industry and labor in the American protective system," is a part of a resolution passed by the governors of North and South Dakota, Minnesota, Nebraska, Missouri and Iowa when they held a midwest governors' conference at Sioux Falls, S. D., on October 29.

It will be remembered that the last General Assembly of Illinois memorialized Congress to take some action on this same problem. Many other states have done likewise. All of which indicates that there is strong feeling in the Middle West for some provision being made to permanently relieve American Agriculture from world competition—an accomplishment gained by both industry and labor, and largely because of farmer support.

We Repeat: Such Confidence Must be Deserved

IN addition to the news story report in this issue on the progress of organization work in the many counties which are renewing memberships this year, G. E. Metzger, organization director, reports that 33 Farm Bureaus have finished the second school of instruction stage. Twenty-seven Farm Bureaus have made reports—of these, five have completed, eight are in the "clean-up" stage, and 14 others have broken the ice.

"The total reported this year is slightly over 15,000," states Mr. Metzger. "A reasonable estimate on the number which will yet join in the remaining 14 counties is 6,000, which means a total of 21,000 members. This is about 2,500 more than the same counties had three years ago."

An increase of 2,500 means an average boost of 13.5 per cent for these Bureaus. Again we say that such confidence in the Farm Bureau must be deserved.

Overcoming Knavish Leadership

For a period of nearly twenty-five years certain politicians, lawyers, and cattle dealers in Northern Illinois have fought the tuberculin test. They have done all within their power to encourage the development of tuberculosis, to make the counties of Northern Illinois the dumping ground of reacting animals, and to increase tuberculosis among the herds and flocks of those counties. It is pathetic to read what these men say and to listen to their advice to farmers. They have seen tuberculosis spread in these counties until some herds contained 50 to 75 per cent of diseased animals. They opposed legislation which would keep reacting animals from entering Illinois. They tried to defeat the Tice Bill which makes provision for assisting cattle owners of Illinois to rid their herds of tuberculosis.

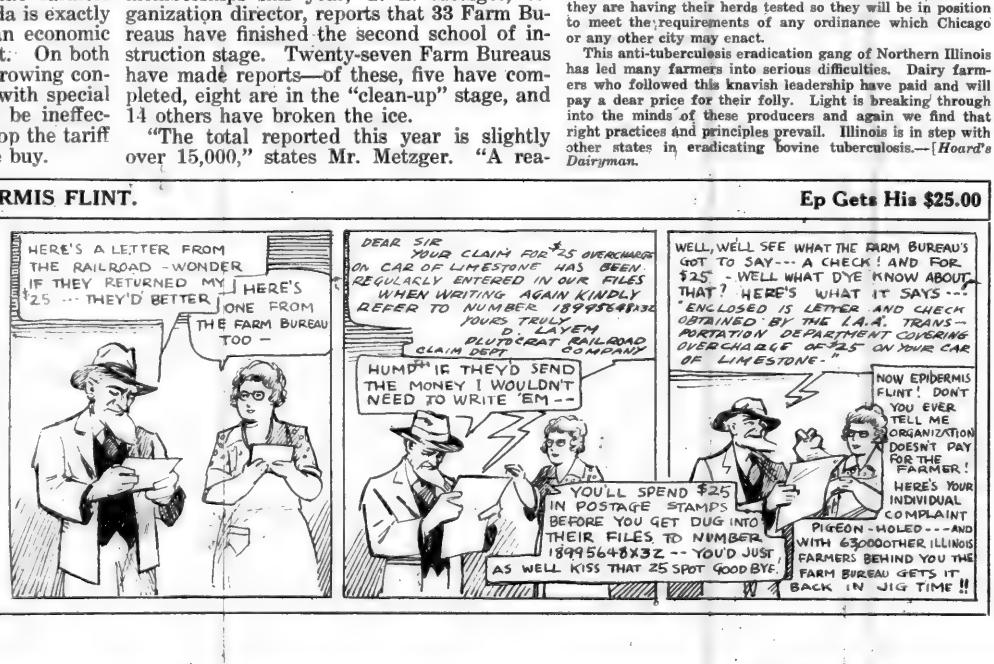
It must be pretty hard on these men to find that the farmers of Illinois are gradually discovering it is to their advantage to eradicate tuberculosis and that the state is no longer to be made the dumping ground for reacting animals; it must be pretty hard to find that few states are doing more tuberculin testing than Illinois, it must be pretty hard to realize that it is gradually growing in the minds of all farmers that they are bearing the expense of tuberculosis.

These men who have opposed tuberculin testing helped to enact a law which purports to prevent cities from enacting ordinances requiring their milk supply to come from tuberculin tested and clean herds. We presume some dairy farmers think this law is effective and will prevent cities from enacting ordinances designating conditions under which their milk supply must be produced. It is our opinion, however, the people of any city have the inherent right to determine the source of its milk supply and to demand that it come from clean herds.

The leaders among the dairy farmers of Illinois see the handwriting on the wall, for they know it is only a matter of time before the city of Chicago will enact an ordinance demanding its milk supply to come from herds free from tuberculosis. They recognize that cities have this right and they are having their herds tested so they will be in position to meet the requirements of any ordinance which Chicago or any other city may enact.

This anti-tuberculosis eradication gang of Northern Illinois has led many farmers into serious difficulties. Dairy farmers who followed this knavish leadership have paid and will pay a dear price for their folly. Light is breaking through into the minds of these producers and again we find that right practices and principles prevail. Illinois is in step with other states in eradicating bovine tuberculosis.—[*Hoard's Dairyman.*

JOHN THINKER AND EPIDERMIS FLINT. — Ep Gets His $25.00



THE STORY

AFTER a long period of antagonistic resistance, Epidermis Flint joined the Farm Bureau, but not until the membership committee, of which his neighbor, John Thinker, was chairman, had declined to even solicit him. Urged on by his progressive wife, Mirandi, who sees the difference between the farm of John Thinker and that of her husband, Ep finally swallowed his pride, walked into the Farm Bureau office, and signed the membership agreement.

For years Mrs. Flint wanted a new chicken house—one built in accordance with the College of Agriculture principles. The first service she wanted rendered by the Farm Bureau was to furnish plans for the new chicken house. Ep was still suspicious of the Farm Bureau, and kicked because he couldn't get the plans immediately. Mirandi said that since they had waited years before deciding to even build, they could at least wait a few days until the best plans could be obtained from the University through the Farm Bureau. The plans came and the chicken house was built, much to the satisfaction of Mirandi.

Then Ep got "sold" on limestone, having seen the good results obtained by John Thinker. He ordered a carload through the Farm Bureau, and upon its arrival found he had been overcharged $25 on the freight. Again he was peeved, both at the railroad and at the Bureau, but went to the office where the Farm Adviser said, "Yes, There's something wrong—let me have your bill and I'll send it in to the I. A. A.—they'll find out what's wrong and if you're anything coming they'll get it."

But Ep wasn't quite sure about the I. A. A. getting his money back for him, so he decided to write to the railroad himself. Now continue—

Farm Leaders of 15th District Think Press Over Play Prosperity

Treasurer Cowles Stresses Problem of Surplus as Farm and Nation Issue

Officials and farm advisers of four county Farm Bureaus—Knox, Fulton, Henry and Schuyler—met at Galesburg Oct. 20 in a regular district conference to discuss their mutual farm problems and to reflect their views to B. H. Taylor of Rapatee, who represents this congressional district on executive committee of the Illinois Agricultural Association, and who presided.

The farm leaders in this district are not in harmony with the attitude of the city press in labeling the recent increases of farm prices as a grand return of farm prosperity.

It was brought out that the newspapers of the smaller cities, such as Galesburg, and the newspapers of small towns, are much closer to the actual farm facts and are not so often misled, intentionally or unintentionally, as their big city brethern.

Farm News is Good News

"The average capital invested in the farms around any Illinois town," said Harry C. Butcher, I. A. A. director of information who spoke at the forenoon session, "is somewhat in excess of $25,000. Walk down the street of your home town—How many businesses represent that much capital? It logically follows that it is good business upon the part of newspapers in such towns to print as much news of the farm as they can. This has proved out in practice, too. Farmers should encourage their local and county newspapers to print farm news because it helps the industry."

Radio and it's value to the farmer was also discussed, the general opinion being that the radio has become an indespensible tool for the farmer. The thought was expressed that farmers in Illinois should have their own radio station.

Cowles Stresses Problem of Surplus

After luncheon, the group re-convened in an afternoon session, which was addressed by R. A. Cowles, treasurer of the Illinois Agricultural Association.

"The 1925 census gives definite proof," said Mr. Cowles, "that there still is a farm problem. The census shows a decrease of five per cent in the number of farms in Illinois from 1920 to 1925. Every banker in a rural community knows the cause of this heavy fatality.

"The real cause of agriculture's difficulty, which is by no means corrected because of any temporary increase in prices, is the surplus production which is sold in the world market and which sets the price on that which is sold in the domestic market. Agriculture has assisted industry and labor to get protection under the protective system of this country, but this protection has never had the desired effect for farmers. We buy in a protected market and sell in a world market."

Those present were as follows: Knox county: Ray Arnold, W. B. Elliott, A. N. Skinner, L. R. Marchant, farm adviser and A. R. Kemp, assistant adviser; Henry: D. Downs, H. E. Goembel, vice-president of the I. A. A., F. E. Good, Henry Larsen and J. L. Whisenand, farm adviser; Fulton: B. H. Taylor, C. T. Whitnah, M. R. Starr, J. E. Shinn, farm adviser, and J. N. Price, assistant adviser; Schuyler: C. J. Thompson and L. E. McKenzie.

I. A. C. A. Membership Grows

Eight More Sign Up Without Solicitation

Contract membership in the Illinois Agricultural Co-operatives' Association, the co-operative auditing and business advisory service, has reached a new high mark—182. Without solicitation eight co-operative and marketing associations or organizations have sent in membership contracts during the past five weeks.

182

The latest organizations to join the auditing co-operative are: Fancy Prairie Co-operative Company, Fancy Prairie, Menard county; Colchester Livestock Shipping Association, Colchester, McDonough county; Williamsville Co-operative Association, Williamsville, Sangamon county; Strasburg Equity Union Exchange, Strasburg, Shelby county; Culver Farmers' Co-operative Company, Culver, Menard county; Marshall Co-operative Shipping Association, Marshall, Clark county; McLean County Farm Bureau, Bloomington; and, Winchester Mutual County Fire Insurance Company, Winchester, Scott county.

THE IOWA FARM BUREAU MEMBERSHIP HAS reached the highest peak in years, according to the Iowa Farm Bureau Messenger. During the month of July there was an increase of 1,500 members. This gives a net gain over previous years of approximately 7,000 members for the first six months of this year.

These Men Attended the District Conference Held at Galesburg, Oct. 20

Farmers Can Order Limestone at This Time, Says J. R. Bent

"Several of the larger limestone quarries and companies are now in a position to make prompt shipments of a good grade of limestone from current production and are desirous of receiving orders, so they may avoid, as far as possible, the necessity of storing this material in the open during the winter," states J. R. Bent, director of the I. A. A. phosphate-limestone department.

"As it seems almost certain that the demand next year is going to be greater than the supply of by-product screenings, I feel that I should recommend to farmers who can use limestone this fall and winter, to place orders at this time. Orders placed now may avoid disappointment and perhaps greater costs than waiting until next summer to order.

"Of course, winter shipments must be safeguarded against bad weather and freezing conditions but if the material is loaded out of the bin in a dry condition it will stand considerable bad weather without much damage being done."

EXTEND WORK OF U. S. D. A.

Farm Leaders Agree Upon Bill to Establish Division of Co-operative Marketing

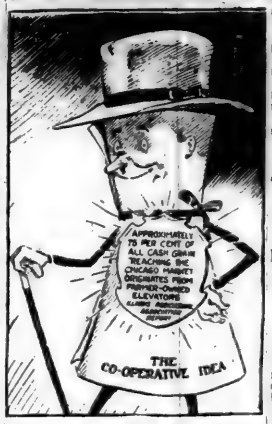
Establishment of a Division of Co-operative Marketing in the United States Department of Agriculture was one of the suggestions pointed out whereby the governmental department might extend further assistance to the American farmer, according to a report of the conference of farm leaders of co-operative marketing with Secretary Jardine at Washington on October 29 and 30.

The Illinois Agricultural Association is in favor of the proposed addition to the agricultural department and it is understood that Secretary Jardine has given his unqualified approval.

A legislative bill which authorizes the new division was agreed upon by the twenty some leaders and will be submitted to the coming Congress, including the following principles:

1. There will be no regulatory features in the legislation such as were alleged to exist or to be implied in the Capper-Williams bill introduced in the last Congress as a result of the recommendations of the president's farm commission.

2. The personnel and scope of the work of the present one man co-operative bureau in the Department of Agriculture will be increased so as to create a real governmental agency for the assistance of the co-operative movement.



3. An appropriation will be asked of Congress of not less than $150,000, part of which will go for salaries but most of which will be expended for the assistance of experts to help the co-operatives when they ask for help.

It is said that the new measure will in no way conflict with the McNary-Haugen bill to create an exporting agency for the export of surplus farm products under governmental assistance and control.

THE PRODUCERS' LIVESTOCK COMMISSION Association will conduct a special show and sale for the Boys' and Girls' Clubs of the Midwest on December 10 and 11 at the National Stock Yards, St. Louis, according to H. D. Wright, manager of the Producers' association. Prizes will be given for the best calves shown in each class of Angus, Shorthorn and Hereford breeds. The judges at the show will be Professor Rush of the University of Illinois and Professor Trowbridge of the University of Missouri. On the day following, the calves will be sold at a special auction and premium prizes will be received.

This Boys' and Girls' calf club sale and show was originated last year by the Producers' Association. The grand sweepstake prize was won by a member of the calf club at Auburn, Illinois, and the top calf sold for 40 cents a pound.

DECORATED

By R. J. Bieger in the St. Louis Twice-A-Week Globe-Democrat.

FARM FILLERS

PEOTONE, WILL COUNTY, HAS FOLLOWED THE lead of Joliet and several other Illinois cities in adopting a milk ordinance designed to prevent the sale of milk from cattle suffering from contagious and infectious diseases. The ordinance which is directed mainly against dairy herds not tested for tuberculosis, provides that "all milk sold, bartered or exchanged in Peotone as raw milk shall be derived from animals under state and federal supervision and proven free from all contagious diseases."

THE REPORT AT THE 16TH ANNUAL MEETING of the stockholders of the Watseka Farmers Grain Company disclosed that the elevator during the past year was operated on a 2½ per cent basis. This represents the cost of handling and marketing grain which is unusually low for a successful elevator. The low cost of operation was due to the larger volume of business and the efficient management by the board of directors and the manager, according to Geo. R. Wicker, manager of the I. A. C. A.

ONE OF THE MENARD COUNTY FARM BUREAU'S activities is an annual fish fry. The event is an all day affair with wives and families attending. The fry this year was held at Petersburg on October 23. A local talent show, "Hank Homebrew Carries On," was presented in the morning and Sam H. Thompson, president of the I. A. A. spoke in the afternoon.

ON ONE FARM IN PUTNAM COUNTY IT WAS found necessary on Oct. 10 to have two radio sets going in one room. One set was used to get the Ohio-Chicago football game and the other the world series baseball game, according to the Marshall-Putnam Farm Bureau. The report comments that the radio will do more to keep boys on the farm than a thousand lectures. The gain from close observation of the market will more than pay the running costs of a good set, states the report.

APPROXIMATELY 190 CARS OF LIMESTONE WERE ordered by Wabash County farmers through their Farm Bureau this year, according to J. R. Spencer, farm adviser of the Wabash County Farm Bureau, Mt. Carmel, Illinois.

THE NUMBER OF FARMS IN ILLINOIS HAS DE-creased more than one per cent a year since 1920, according to a preliminary announcement of the 1925 farm census. Illinois has 225,945 farms this year, a decrease of 11,536 or over five per cent. The number of farms in the United States during this five year period decreased 75,735 or more than one per cent. The decrease was not general, some states reporting declines while increases were shown in others. Texas led with the greatest increase in the number of farms while the greatest decrease was shown in Georgia. In the Mid-West Wisconsin showed an increase.

Union County Farmers Save $2700 Annually In Purchase of Manure

Union County Farm Bureau is saving for its fruit and vegetable growers between $2700 and $3000 annually in the purchase of manure, according to George E. Fager, farm adviser. This project is still in its first year operation, it having been started early in the year with assistance from the I. A. A.

This saving was brought about by the Farm Bureau last February when the officers made a contract with a fertilizer company of Chicago to furnish manure at a reduced rate. According to Farm Adviser Fager, a canvass was made of the membership to determine the amount of manure needed each month by Union county farmers. From this solicitation it was found that an average of 15 cars would be required each month or between 4500 and 5000 tons annually.

The Farm Bureau then signed a contract with the Chicago fertilizer company for 15 cars of 25 tons each to be delivered every month. Due to this large future order the company granted a reduction in price of approximately $15 a car.

Cheaper Freight, Too.

Union County Farm Bureau then applied to the Illinois Central railroad for a reduction in freight which was granted through the efforts of the I. A. A. transportation department. The cars are delivered on railroad sidings at various points in the county and unloaded by the members.

The manure is used for application on fruit orchards and vegetable plots of about 35 members at an average of from 15 to 20 tons each.

"It is not a case of demand, but supply," stated Mr. Fager, "Union county farmers could, and no doubt would use a greater quantity of manure if more rapid deliveries could be made by the fertilizer company. Next year we will be required to increase the number of cars under our contract and thereby make a saving to more of our members."

State Commission Compliments I. A. A. For Taxation Work

Farm Bureaus Using Best Method In Finding Inequalities, Say Members of Illinois Tax Body

The work of the Illinois Agricultural Association and the county Farm Bureaus in their efforts to bring about greater equality in the tax assessment of this state was complimented highly by the Illinois Tax Commission during a hearing before that body when investigations were made regarding the complaints of the Farm Bureaus of Peoria, Kane, Clay and Franklin counties.

On Sept. 27, farm representatives of Kane and Peoria counties appeared before the commission with charges that their county boards of review had refused to consider the needed reduction in farm property assessments and that the farmers are required to pay an unduly large proportion of the taxes.

Farm Bureau Collects Facts

Lloyd Keepers, assistant farm adviser of the Kane County Farm Bureau pointed out to the state commission that the farm property of his county was assessed at 46.4 per cent of the actual sales value while the city property was assessed at 35.7 per cent. During the period of March 1, 1924, and March 1, 1925, the Kane County Farm Bureau under the direction of J. C. Watson, I. A. A. taxation specialist, made a careful study of the sales of farm and city properties which included some 500 city sales and 30 transactions of farm property. From figures compiled during this study, the Farm Bureau determined the actual values of the city and farm properties and the inequality of tax assessments.

According to Mr. Keepers, these inequalities were shown to the Kane county board of review but it refused to act and through the selection of sales of exceptional farm lands, some of which were used for subdivision purposes, attempted to show that the Farm Bureau's calculations were too low.

Commission Agrees With Bureau

Members of the tax commission stated that they believed the Farm Bureau had collected the facts in the most intelligent and honest method known and inasmuch as the board of review did not check the figures presented by the farm organization or suggest a better method of compiling the information, the board has thrown itself open to criticism because of its refusal to act.

Representatives of the Peoria County Farm Bureau told the state commission that their board of review had refused to a reduction in farm assessments but the state's attorney has prohibited such a reduction on the grounds that it would be illegal. The state's attorney did not appear before the tax commission and no decision was reached.

When the Clay county delegation appeared, they presented information and figures to show that the assessment of farm property in Clay county was 56 per cent higher than the assessments on city lots and buildings.

Eleven Appear Before Board

The state commission is considering the complaints made by the Farm Bureaus and is expected to render a decision in the near future. Those who appeared before the commission as representing the farmers were:

Kane county: J. E. Watts, farm adviser; Lloyd Keepers, assistant farm adviser; Henry McGough, W. C. McQueen and J. H. Burr.

Peoria county: Wilford Shaw, farm adviser, Sam McClagage and W. T. Conley.

Clay county: W. E. Hart, farm adviser, Curt Anderson, I. A. A. executive committeeman of the 24th district, and George McElyea, chairman of the Clay County Farm Bureau tax committee.

Potato Shortage Acute; Price 50 Per Cent Higher

I. A. A. Director Says Spud Market Is Panicky; Difficult to Secure Deliveries At Any Price

"The potato shortage in Illinois has been more acute than at first anticipated," states A. B. Leeper, I. A. A. director of fruit and vegetable marketing and manager of the Illinois Fruit Growers Exchange of Centralia.

"Sections producing the commercial crops of late potatoes have experienced the same unfavorable climatic conditions as the Illinois sections, and these conditions coupled with a drop which was considerably below normal, have kept the market in a very unsettled condition, and most of the time almost panicky. Potatoes are today selling for more than 50 per cent higher than at the beginning of the season, and it has been almost impossible to get deliveries late in the season at any price."

In response to an urgent demand, the Illinois Fruit Growers Exchange, co-operating with the I. A. A., offered to assist the farmers of Illinois in buying potatoes for winter use through their respective Farm Bureaus. According to Director Leeper, the Exchange has had many inquiries relative to making purchases for farm bureau members. It is understood that the Exchange will place orders for car lot shipments but its principal service has been that of keeping the county farm advisers posted as to the markets and changes in prices.

"Those who purchased potatoes early this fall were fortunate in getting the lowest price," stated Director Leeper. 'Those who ordered late, or expect to order in the future, will be lucky to get deliveries."

Better Sire Train On Tour

Dairy Exhibition Train to Stop at 19 Cities in Southern Illinois

Farmers who live near 19 towns and cities in central and southern Illinois located on the Baltimore and Ohio railroad will have an opportunity to see the "Better Dairy Sire" train which will be on an exhibit tour from November 9 to 20.

This exhibit train, which is conducted by the University of Illinois in co-operation with the B & O railroad and other dairy interests, will make half-day stops at Flora, Iuka, Carlyle, Breese, O'Fallon, Fairfield, Norris City, Ridgway, Shawneetown, Lawrenceville, Sumner, Olney, Altamont, Beecher City, Cowden, Pana, Taylorville, Springfield and Beardstown. The train will consist of ten cars including an exhibit car, lecture car, a flat car for cow demonstrations, cars for the livestock which will be exhibited, four cars for purebred bulls and cars for the accomodation of the staff which will accompany the train.

In addition to the lectures, demonstrations, exhibition that will be given at each stop, farmers will be given an opportunity to buy a purebred dairy sire. For this purpose 50 bulls of the three breeds—Jersey, Holstein, Guernsey—will be carried on the train. Arrangements have been made with the local business men of the 19 towns whereby a grade heifer will be give to some farmer who visits the train at each point.

The speakers who will accompany the train are: C. S. Rhodes, dairy extension specialist of the agricultural college, A. J. Glover, editor of Hoard's Dairyman; and, O. K. Quivey representative of the B & O railroad. The county farm advisor and a local representative businessman will also speak at each stop. The National Dairy Council will make an exhibit showing the value of milk and its products as human food.

EVERY FRIDAY NOON A DIRECTOR IS ON HAND on the five marketing departments of the I. A. A. talks over WLS. Do you hear them?

FRIDAY EVENING, OCTOBER 30, IS THE TIME set for a debate over WLS on the railroads' petition for a five per cent rate increase. President Bradfute of the A. F. of L. and a member of the National Grange, will tell the farmers' side.

Davis Tells Grain Marketing Plan at Ottawa Conference

Farm Leaders Told of New Grain Marketing Association by I. A. A. Director at 12th District Meeting

"Approximately 65 per cent of all cash grain that reaches the Chicago market originates from farmer-owned elevators," declared Chester C. Davis, director of the grain marketing department of the I. A. A., in his address before 41 farm leaders and advisers from LaSalle, Grundy, Kendall, DeKalb, Boone and Winnebago counties, who attended the 12th district State Farm Bureau conference held in the LaSalle county courthouse, Ottowa, October 22.

The meeting was presided over by E. E. Stevenson of Streator, president of the LaSalle Farm Bureau, with Walter W. McLaughlin, farm adviser, acting as secretary. L. F. Tullock of Rockford, I. A. A. executive committeeman of 12th district, introduced Director Davis, who gave the address of the meeting.

"There are more than 600 farmers' elevators in Illinois and no less than 30 are located in LaSalle county alone", stated Mr. Davis, "These local and county farmers' elevators have contributed tremendously in a local co-operative way for Illinois cornbelt farmers. No one can discount the benefits that these elevators have performed in maintaining a higher local price level. However, in the past, their work has ceased at the local railroad station and they have been unable to assist the Illinois farmer in handling his product from the elevator to the point of consumption.

To Have Commission Firms on Markets

"The National Farmers' Elevators Grain Company, Co-operative, representing the national scope of grain marketing, and the Rural Grain Company, which will represent the farmers' elevators on the Chicago market, have been organized for this purpose. The Rural Grain Company, which was incorporated in May, as a subsidiary of the National Organization, has secured a seat on the Chicago board of trade. This company will handle on a co-operative commission basis, the grain from the farmers' elevators of Illinois and Iowa delivered to Chicago.

"The National Farmers' Elevators Grain Company, Co-operative, will act in the capacity of a sales agency and co-operative commission organizations in the terminal markets of St. Louis, Peoria, Indianapolis and St. Paul as the work advances.

Similar to Canadian Plan

"These organizations will not deal directly with the individual farmers, but function as agencies of farmer-owned elevators. They are built from the ground up on the firm foundation formed by the county and local organizations. They are receiving the support of the elevators because they were formed by and for the farmers' institutions. This plan is similar in many ways to the Canadian method of marketing spring wheat which has been in successful operation for several years."

Those Present at Meeting

L. A. Frisbie, president of the Winnebago County Farm Bureau stated that an effort is being made in his county to bring the farmers and city people together on a mutual understanding. Dinners, luncheons and meetings are being held and attended by both groups whereby they may learn to know each other and understand their respective viewpoints.

Those present at the meeting included:

Lasalle county—J. L. Eutis, T. W. Esmond, R. W. Cross, Walter W. McLaughlin, Geo. Grover, Jule Baker, J. J. Hornung, J. A. Anderson and Alex McFedron of Ottawa; C. H. Mudge of Peru; F. W. Klein, G. J. Elliott and E. E. Stevenson of Streator; L. A. Breuer, H. T. Marshall and D. Schedicker of Seneca; L. C. Rinker and O. D. Center of Grand Ridge and J. E. Rice of Marseilles.

Grundy county—H. E. Green, F. E. Longmire, farm adviser, Alem Anderson and E. G. Geisler of Morris; and W. R. Broderick of Verona.

DeKalb county—E. A. Nelson, assistant farm adviser, and A. W. D. Dodge of DeKalb; R. J. White of Somonauk and H. H. Bullis of Esceville.

Kendall county—Frank H. Crumm and L. S. Nelson of Newark; Earl Price, farm adviser and E. L. Matlock of Yorkville.

Winnebago county—L. A. Frisbie, C. H. Keltner, farm adviser, J. M. Rankin and L. F. Tullock of Rockford, executive committeeman of the 12th district of the Illinois Agricultural Association. J. A. Gilchrist and E. W. Carper of Coal City.

"RADIO WILL DO MORE TO KEEP THE BOY ON the farm than a thousand lectures," states F. E. Fuller, adviser for the Marshall-Putnam Farm Bureau, "and the gain from close observation of the market will more than pay the running costs of a good set."

WOOL HAS BEEN SOLD COOPERATIVELY IN THE United States for 40 years. The Putnam County (Ohio) Wool Growers' Association sold its first crop in 1885. Today 30,000 sheep men in the United States are selling 12,500,000 pounds of wool through 22 state-wide cooperatives. As much as 80 per cent of all American wool is sandled in this manner.

Producers' Handle 8.9 Per Cent of Livestock Sold on Chief Markets

Sales agencies of the National Live Stock Producers' Association in the 13 principal terminal livestock markets of the United States handled 8.9 per cent of the animals sold on those markets during the month of August.

The percentage of receipts handled by the Producers' sales agencies in the various markets were listed as follows:

Market	Percentage
Evansville, Ind.	53.05
Peoria, Ill.	28.88
Indianapolis, Ind.	24.11
Cleveland, Ohio	19.70
Buffalo, N. Y.	17.77
Pittsburgh, Pa.	15.41
St. Louis, Mo.	13.37
Fort Worth, Tex.	9.75
Cincinnati, Ohio	8.82
Chicago, Ill.	5.57
Sioux City, Iowa	4.41
Oklahoma City, Okla.	2.23
Kansas City, Mo.	1.74

There was considerable variation in the percentages for the different kinds of animals. In the case of cattle the Producers' co-operative sales agency at Evansville handled 54.5 per cent of cattle received. The Indianapolis sales agency was in second place with 20.26 per cent. Fifty-two per cent of the calves received at the Peoria market were handled by the co-operative, as well as 54 per cent of the hogs and 42 per cent of the sheep.

The thirteen sales agencies handled 3.6 per cent of the cattle received at the 13 markets, 10.35 per cent of the calves, 13.39 per cent of the hogs and 6.23 per cent of the sheep.

Membership Reports Show Increase From 15 to 26 Per Cent

Many County Farm Bureaus Conducting Campaigns This Year Tell of Favorable Results

Substantial increases in membership have been reported by many county Farm Bureaus who are conducting campaigns this year, according to G. E. Metzger, director of the I. A. A. organization department.

"McLean county," states Director Metzger, "holds the record so far this year with an increase of 26 per cent in membership. Iroquois and Knox counties tie for second place with reported increases of 15 per cent each, while Woodford county has an increase of 14 and one half per cent over its first three townships to report.

"In Marshall-Putnam, 700 membership renewals were obtained in seven days. In Henry county six townships still remain for canvassing, but the former membership total has been reached. A 15 per cent increase is anticipated in that county."

"Woodford county started its renewal campaign on October 21 and Mason began next day. Shelby county opened its drive on October 24, Kane the 26th, Adams the 27th, Sangamon the same day, Lake the 30th, and DeKalb November 2.

"County Farm Bureaus that will start membership drives in the near future are: Saline and Menard, November 10; Randolph, November 11; Williamson, November 12; and, Bureau, December 1.

"All renewal work in the Farm Bureaus of Illinois," states Metzger, "is being done by the farmers themselves in what is termed the 'neighbor-to-neighbor' style. Farmers are re-signing for three-year memberships all over the state with a keener appreciation of the possibilities, accomplishments and limitations of the Farm Bureau."

Reinsurance Company Applies for Charter

(Continued from page 1, Col. 1)

into force until at least twenty-five companies have signed the contract. This form of insurance operates for the local companies in the same manner that the local mutual protects the individual farmers.

Counties that contributed individual insurance applications during the campaign and the total amounts of their applications are as follows:

Adams	$ 5,000	Lee	1,000
Bond	1,000	McHenry	3,200
Boone	12,650	McLean	11,650
Brown	11,500	Macon	1,800
Carroll	2,500	Macoupin	15,340
Cass	20,000	Madison	35,460
Champaign	12,800	Marion	3,650
Christian	9,450	Marshall	7,150
Clark	6,625	Mason	6,800
Clay	1,000	Massac	12,000
Clinton	13,500	Menard	26,000
Cook	5,500	Montgomery	22,800
DeKalb	24,840	Ogle	5,000
DeWitt	20,758	Peoria	10,800
DuPage	2,500	Pike	15,340
Edgar	21,000	Pulaski	20,687
Edwards	1,400	Putnam	4,100
Effingham	2,250	Rock Island	2,000
Fayette	2,500	Sangamon	13,500
Ford	13,950	Schuyler	4,000
Franklin	1,000	Shelby	6,000
Fulton	2,450	St. Clair	1,000
Greene	2,850	Stark	1,000
Hancock	21,000	Stephenson	15,000
Henderson	30,650	Tazewell	2,000
Henry	48,950	Union	1,000
Iroquois	5,000	Vermilion	17,300
Jackson	8,500	Wabash	15,725
Jersey	6,000	Wayne	1,000
Jo Daviess	1,000	White	11,660
Kane	5,000	Will	4,000
Knox	17,250	Williamson	3,250
Lake	7,000	Winnebago	20,750
LaSalle	40,000		

THE KIWANIS CLUB OF OTTAWA IS OFFERING to the farmers of that vicinity a copy, free of charge, of the book by Chris L. Christensen, "Co-operation in Denmark". Mr. Christensen is an agricultural economist on the staff of the U. S. D. A. The agricultural committee of the Kiwanis club reports that it is taking this step as a means of aiding in the progress of cooperative farm organization.

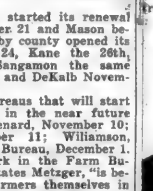
TWO HUNDRED TWENTY FARMERS IN 38 COUNties of Ohio have made an effort to produce 100 bushels of corn to the acre. Reports are now being assembled to see how nearly they come to the mark.

Revenue Amendment Would Save Co-ops $400-$500 Yearly

I. A. A. Director Says Farmers' Elevators Have Been Denied Rightful Income Exemptions

Not one of the farmers' co-operative elevators in Illinois has been able to obtain exemption from payment of income tax or filing of annual returns, despite of the intentions of Congress at the time the revenue act was passed, according to George R. Wicker, director of the co-operative auditing department of the I. A. A. and manager of the Illinois Agricultural Co-operatives' Association.

"Illinois farmers' elevators have been denied the exemptions intended to be granted by Congress and the present provisions of our national internal revenue act are detrimental to the promotion of more efficiency in the production and marketing of our nation's crops," declares Wicker, who has just returned from appearing before the congressional ways and means committee, Secretary of Agriculture Jardine and President Coolidge, relative to drafting and promoting an amendment to the revenue act which will give definite exemption to farmers' co-operative organizations and associations.



While in Washington, Mr. Wicker cited four test cases, regarding co-operative exemptions, brought before the treasury department which met with denials because of minor technicalities, representative of the leaders of agricultural co-operation in this country, he asked that specific legislation granting relief for co-operatives be included in the new revenue amendment.

"The provisions of the existing law, as well as previous revenue acts, are restrictive to members only and therefore do not accomodate the general practice of co-operative associations of dealing with both members and non-members," states Mr. Wicker, "The proposed amendment broadens the basis for exemption and in addition provides for the distribution of net incomes common to such associations which are conducted upon the actual cost of service and assessment plan."

Director Wicker, who is also chairman of the committee representing agricultural co-operatives in sponsoring the revenue amendment, states that if the new amendment is included in the new revenue act, it will save the individual farmers' elevator companies of Illinois an average of from $400 to $500 annually.

One-Fourth of Red Top Seed of World Sold Through Co-op

More red top seed is produced in central southern Illinois than any other territory of the world.

Curt Anderson

"From 85 to 90 per cent of all red top seed grown in the world is produced in 8 Illinois counties," stated Curt Anderson of Xenia, manager of the Red Top Seed Growers Association and the Egyptian Seed Growers Exchange. "This percentage amounts to approximately 7,000,000 pounds of clean seed annually and is grown in Wayne, Clay, Marion, Jefferson, Hamilton, Fayette, Effingham and Richland counties.

"Approximately 25 per cent of the red top seed produced in the counties is marketed co-operatively by the 800 members of the Red Top Growers Association located at Flora, Illinois."

"Although red top seed is not one of the major farm crops of this country, the annual gross receipts from this crop last year in the eight counties amounted to between $600,000 and $700,000," stated Mr. Anderson. "Of this amount nearly $182,000 worth of the seed was sold co-operatively."

The average price received by the producers this year was 18¼ cents a pound, according to the United States Department of Agriculture. Through pooling and stabilizing the delivery on the market, it is estimated that the members of the Red Top Growers Association will receive approximately 25 cents a pound for the 1925 crop.

I. A. A. Director Gives Demonstrations Before Shipping Associations

Wm. E. Hedgcock, director of the I. A. A. livestock marketing department, has been asked by many Farm Bureaus and livestock shipping associations in this state to address their members on the proper grading of their animals for the market.

"In attempting to create a better understanding of the marketing problem, we have arranged with the managers of the shipping associations and farm advisers for a county livestock grading demonstration to which the managers and officers of the shipping associations are invited to attend," states Director Hedgcock.

"At these demonstrations a representative from the nearest Producers' market assists in pointing out the various grades of livestock which have been assembled by the shipping association for shipment that day. A special effort is made to impress upon the shipping association officers the requirements of the market, with the thought that they can point out these market requirements and explain them to the livestock farmers in their respective communities. This should create more efficiency in preparing livestock and do away with a great deal of misunderstanding of the market needs and the quality of livestock which the owner should consign for shipment."

Railroads' Picture of Prosperity Denied

(Continued from page 1, Col. 6)

chasing power of farm products. Both sets of figures follow:

Year	U. S. D. A.	Dr. Friday
	Purchasing Power of Farm Products	
1909	129	125
1910	127	123
1911	125	125
1912	132	129
1913	131	128
1914	136	131
1915	138	134
1916	106	121
1917	138	134
1918	147	140
1919	143	140
1920	141	120
1921	105	105
1922	103	111
1923	110	115
1924	119	120
1925		125

Correct Figures Reverse Testimony

A moment's consideration of the two sets of figures above shows one of the ways Dr. Friday's expert testimony was punctured. It will be noted that he estimated the purchasing power of farm products for 1925 as 125, which is exactly the same as his 1913 figure, while his 1924 figure is only five points below his 1913 level. The correct figures, as furnished by the United States Department of Agriculture upon request of the Farm Bureau, tell a wholly different story—namely, that the purchasing power of farm products is not as great today as it was from 1909 to 1914—pre-war year.

Following Dr. Friday, H. W. Moorhouse took the stand for cross examination. This brought out, first, that the figures and exhibits prepared and introduced by him were carefully prepared by an expert statistician; second, that many factors entering into those exhibits were merely guesses; third, that the exhibit, as introduced upon direct testimony, concerned itself up to and including the crop year ending June, 1924.

Move to Deny Increase

At the close of the hearing in Chicago, Fred S. Jackson, representing the Farm Bureau, presented a motion to dismiss the rate increase petition of the western railroads on the ground that the carriers failed to show that the present rates on agricultural products are noncompensatory and unlawful under the Transportation Act. Also, that the Interstate Commerce Commission, under the Hoch-Smith resolution, is legally required to make a full investigation in the rate structure of the country and make such changes in the rate structure as will promote the freedom of movement by the common carriers of the farm products affected by the depression, including livestock, at the *lowest possible lawful rates* compatible with the maintenance of adequate transportation service.

Hearings Continue In West

The western hearings will go on, nevertheless. They will open at Denver, Nov. 9. From then on there will be a constant flow of testimony against the proposed increase excepting for some brief additional testimony which Chief Counsel Dan Doren for the railroads said might be presented at the western hearings.

Considerable first-hand information concerning the prosperity of farmers in Illinois as determined from facts gleaned from county records and from county bankers, has been and is being secured by the I. A. A. This will be introduced at the hearing in Kansas City, which begins Jan. 4.

In the meantime, L. J. Quasey, director of the I. A. A. transportation department, is carefully following the hearings so as to be in touch with any situation which might affect Illinois farmers.

TB Eradication Work Discussed at I. A. A. District Conference

Fox, Bent and Hosford Speak Before Farm Leaders At Rock Island Meeting, Oct. 20

Eradication of tuberculosis in Illinois dairy herds was one of the main topics of discussion when 35 representative farm leaders and advisers of Rock Island, Warren, Henderson, Mercer, Hancock and McDonough counties met at the I. A. A. conference of the 14th congressional district held at Rock Island, on October 20.

The meeting was called to order by W. H. Moody, I. A. A. executive committeeman of that district. A. Larson, president of the Rock Island County Farm Bureau, was elected chairman with Sidney S. Carney, Rock Island farm advisor, acting as secretary.

General discussion of the T. B. eradication work occupied most of the morning session.

Mercer Soon Accredited Area

Rock Island county veterinarian has completed first time over the county. Many farmers failed to test on the first trip but are anxious for their cattle to be tested in the near future. Well over 50 per cent of the cattle in the county have been tested and reactors have averaged about three per cent or less, except in a few herds.

Warren county veterinarian has tested 80 per cent of the cattle in the county with two to three per cent reactors.

Mercer county veterinarian has tested 22,000 head once, 20,000 cattle have been retested with only 2,000 head to test the second time to make the county an "Accredited Area."

Henderson county veterinarian is going over the herds of the county for the second time. The retest is 75 per cent complete with no reactors.

Illinois Uses One-Fourth Limestone

"More than 500,000 tons, or one-fourth of the total limestone used in the United States, was used by Illinois farmers last year," declared J. R. Bent, director of the I. A. A. phosphate-limestone department, who made the opening talk of the afternoon session. "This year Illinois is making a more rapid race. Reasons for this remarkable lead are due to education and knowledge of the value of limestone, use of limestone stressed by Farm Bureaus as a major project, better business relations existing between the farmers and the producers of limestone, and a proper regard for the future of agriculture on the part of the farmer," stated Mr. Bent.

Questions following the talk brought out the fact that 13 per cent rock phosphate is selling at $7.00 f. o. b. Tennessee quarries and the additional cost for freight is about $4.50 a short tone.

Fox Speaks on Taxation

Geo. A. Fox, I. A. A. executive secretary, was the second speaker on the program. Instead of making a formal address, Secretary Fox gave those present an opportunity to bring up questions regarding the work of the I. A. A. and some of the problems confronting the farmers. He discussed the tax question in this state and urged that farmers become posted on the new revenue amendment to the State Constitution which will come before the voters in the general election in November, 1926.

Before adjournment, I. N. Hosford of Hamilton told of the $500,000 campaign to secure the charter for the Farmers Mutual Reinsurance Company of Illinois which was sponsored and completed by the I. A. A. in cooperation with the Illinois Association of Farm Mutual Companies.

Farm Bureau Members Raise More Per Acre Than Non-Members

Marshall-Putman Farm Bureau is carrying on an experiment which gives tangible evidence that members of the Farm Bureau who follow the better methods as advocated by the adviser and the state experiment stations raise more corn on each acre than to the farmers who disregard the more advanced ideas of production.

Eighteen ears were taken promiscuously from members' seed corn and the same amount was taken from the seed corn of non-members. The seed from each was planted on different farms. The first test to report this year was that grown on the farm of John Stadel. The results were that the non-members corn made 55.7 bushels to the acre and the members seed corn produced 67.2 bushels an acre.

"PUT IT ON—DON'T PUT IT OFF" READS AN advertisement urging the use of limestone by American farmers that is being published by the New York Central Lines in farm papers of the central states that have a total circulation of approximately 1,700,000.

"THE ILLINOIS AGRICULTURAL ASSOCIATION may well be used as a model for other state Farm Bureaus," stated Paul A. Eke, agricultural economist of West Virginia University in a recent letter.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Volume 3 | Issued Every Other Saturday for 63,000 *thinking* Farmers—November 21, 1925 | No. 23

JARDINE AND LOWDEN TO SPEAK AT ANNUAL MEETING

Executive Committee Passes on Program of I. A. A. Convention, University of Illinois, Jan. 21 and 22; Open Discussion is Planned

Annual Budget, Financial Report, Grain Marketing, Constitutional Amendments and State Police Bill Discussed at November Executive Meeting

WILLIAM M. JARDINE, secretary of agriculture, and Former-Governor Frank O. Lowden have promised to address the delegates and members attending the annual meeting of the Illinois Agricultural Association which will be held again this year at the University of Illinois, Champaign-Urbana, Jan 21 and 22.

The Secretary's address will be given during a luncheon between 12 and 2 o'clock on Thursday, Jan. 21 and Former-Governor Lowden's speech will be at a luncheon on Friday, according to the program submitted by Secretary Fox to the executive committee at its regular monthly meeting on Nov. 6.

This year's program is planned expressly for the purpose of giving each delegate an opportunity to express himself. To permit sufficient time for free discussion, sectional conferences are planned during which open consideration of a large variety of subjects will prevail. In addition, each Congressional district will hold a conference. Even-numbered districts will nominate executive committeemen to hold office for a two-year period, and a president and vice-president for 1926 will be elected. The secretary and treasurer are employed on a month-by-month basis by the executive committee and are not elected.

All Farm Forces Represented

For the evening program of the first day, the customary annual banquet will provide a common meeting ground. Speakers of the evening are expected to be Dean H. W. Mumford; Director S. J. Stanard, Illinois department of agriculture; Mrs. Spencer Ewing, president, Illinois Home Bureau Federation; and President S. H. Thompson. The Farmers' Institute and the Grange are also to be represented on this program. The principal address of the evening will be on the subject, "The Future of the Radio Industry and its Use by Farmers," but the speaker is yet to be selected.

Besides approving this program for the annual meeting, the executive committee also set the date of Wednesday, Jan. 20, the day preceding the annual meeting, for an all-day conference of the farm advisers, the executive committee and I. A. A. officers and directors of departments. At this time the full program of activities of the Illinois Agricultural Association will be gone over and discussed, the object being to permit every farm adviser in the state to become thoroughly acquainted with the extensive activities of the I. A. A.

Free-For-All-Discussion

The evening preceding the annual meeting, an open conference of all county Farm Bureau presidents and farm advisers will be held with officers of the Illinois Agricultural Association presiding. No program will be arranged, this being a time for open free discussion of those in attendance. Last year such a meeting was held for the first time and resulted in a general airing of opinions and inter-change of ideas of infinite value. During last year's meeting it was voted to have a similar one again this year.

The executive committee voted to pay one-half of the necessary expenses of farm advisers who attend the Wednesday conference, the other half to be borne by the county organizations.

A budget committee, consisting of the officers and finance committee, was ordered by the executives. To these men is charged the responsibility of budgeting the finances of the association for 1926 and reporting back to the executive committee which will pass finally upon it. Members of the finance committee are: William H. Moody, Port Byron, Rock Island county, chairman; F. D. Barton, Cornell, Livingston county and Earl C. Smith, Detroit, Pike county.

Farm Bureau Members Discuss I. A. A. Work At District Meeting

Kirkpatrick, Hedgcock and Quasey Speak at 20th District Jacksonville Conference

Fifty-four farm bureau leaders, advisers and members from the counties Brown, Green, Jersey, Pike, Cass, Mason, Scott and Morgan attended the I. A. A. 20th district conference held at Jacksonville on Nov. 12 and expressed their views and wishes regarding farm problems and activities which will be forwarded on to the officers and executive committee of the state organization by Earl C. Smith, I. A. A. executive committeeman of the district.

Earl C. Smith

The meeting was presided over by C. S. Black, president of the Scott County Farm Bureau, with R. J. Liable, farm adviser of Green county acting as secretary.

Tells of Freight Rate Fight

L. J. Quasey, director of the I. A. A. transportation department made the opening address in which he discussed the traffic work of the organization and told of the fight that is being waged by the I. A. A., in co-operation with the A. F. B. F. and other state organizations, against the five per cent freight rate increase that is being demanded by the western railroads. He related the proceedings of the Interstate Commerce Commission hearings that were held in Chicago recently and are now being continued in western states.

Following Director Quasey, Wm. E. Hedgcock, I. A. A. director of livestock marketing, addressed the members. He told of the work of the shipping associations in the state and emphasized the need for federation of the local associations in the counties. Director Hedgcock urged that the associations become incorporated under the laws of Illinois and adopt a more improved system of accounting. He told of the plans that are now being considered for the organization of a livestock commission association at Springfield.

Farmers Must Keep Control

"Not only is it necessary that the county, state and nation Farm Bureaus work to secure national legislation for farmers," stated Donald Kirkpatrick, I. A. A. legal counsel who spoke before the conference in the afternoon session, "but after these front line trenches have been taken, we must keep them from the enemy. Those who constantly fought such legislation have no right to move in, and control it."

All of the talks were followed with questions from the floor.

I. A. A. Directors On the Air

Marketing Talk Broadcast Over WLS Every Friday Noon For Illinois Farmers

Are you on the "air" every Friday noon?

Four more radio talks are scheduled for I. A. A. directors to be given over WLS every Friday noon between now and Christmas. These will conclude the first series of marketing addresses which have been conducted for the benefit of Illinois farmers during the past six months.

Those who will take part in the Friday noon programs are:

November 27, F. A. Gougler, director of the I. A. A. poultry and egg marketing department; December 4, A. B. Leeper, manager of the Illinois Fruit Growers Exchange and director of the fruit and vegetable marketing of the I. A. A.; December 11, Wm. E. Hedgcock, director of the livestock marketing department; and, December 18, Chester C. Davis will be on the program again.

1925 Officers and Executive Committee

Seated at table, left to right: R. A. Cowles, treasurer; H. E. Goembel, vice-president; S. H. Thompson, president; Geo. A. Fox, secretary. Standing are the district executive committeemen, left to right, G. F. Tullock, Rockford, 12th district; C. E. Bamborough, Polo, 13th district; W. H. Moody, Port Byron, 14th district; B. H. Taylor, Rapatee, 15th district; Wm. Webb, Joliet, 1st to 11th district; A. R. Wright, Varna, 16th district; F. D. Barton, Cornell, 17th district; R. F. Karr, Iroquois, 18th district; J. L. Whisnand, Charleston, 19th district; Earl C. Smith, Detroit, 20th district; Samuel Sorrels, Raymond, 21st district; Stanley Castle, Alton, 22nd district; W. L. Cope, Salem, 23rd district; Curt Anderson, Xenia, 24th district; and R. K. Loomis, Makanda, 25th district.

I. A. A. Speaker Accepts Call as Pastor of Long Beach Lutheran Church

Rev. Elmer Olson, formerly on the speakers bureau of the organization department of the I. A. A., has accepted a call to the First Lutheran Church of Long Beach, Cal. Rev. Olson was mayor of Wataga, (Ill.) and pastor of the Lutheran church of that city before accepting the California call. He was a farmer before being ordained two years ago and during the past year he has spent considerable time as a solicitor of the I. A. A. He has represented the association as speaker at many annual meetings and picnics of county Farm Bureaus and is well known in many sections of the state.

7 Things to Remember Before You Invest in Florida Real Estate

Ohio farmers have been advised against unwise speculation in Florida lands by the Ohio Farm Bureau Investment Service company which is at present conducting an energetic campaign in the interest of conservative investments. In the October issue of the Federation news the service company published "A Cure for Florida Real Estate Fever." The warning reads:

"Whenever you are tempted remember:

"1. That it is estimated that 2,000 real estate men from Ohio are going to Florida to buy real estate to sell northern prospects.

"2. That lots are sold to be resold at higher prices—not for improvements.

"3. That it is estimated that one-eighth of the entire state is staked off in lots.

"4. That if homes were erected upon these lots, they would accommodate 36,000,000 people—one-third of the population of the United States.

"5. That one company bought 17,000 acres at $10 per acre, divided it into 135,000 lots which it expects to sell next winter at $14.75 each—cost $170,000, selling price, $1,991,250.

"6. Business properties in Florida cities are offered at more per front foot than lots in northern cities with more than ten times the population.

"7. That real estate companies admit 50 per cent of the selling costs are spent for commissions, to furnish free auto rides, free lunches, free banquets, free vaudeville acts and free band concerts to all comers."

Southern Illinois Cotton Co-op Saves $2240 for Members

Members of Cotton Association Receive 5 to 6 Cents More a Pound than Non-Members

Members of the Illinois Cotton Growers' Cooperative Association, Incorporated, received from 5 to 6 cents a pound more for their cotton than non-members in southern Illinois last year, according to E. A. Bierbaum, farm adviser of the Pulaski County Farm Bureau. This is the second year for the Illinois cotton pool, it having been started last year with assistance of the I. A. A.

"This amounted to an additional profit to the average members of approximately $120," stated Farm Adviser Bierbaum. "Of course, the amount of saving to the members depends upon the number of bales marketed through the pool, but it has been estimated that a saving of approximately $20 on a bale was made by the association. This equals a total saving of about $2240 annually."

The Illinois cotton Growers' Cooperative Association was incorporated with 26 members in September, 1924, and handled the crop for last year. The association is a project of the members of the Pulaski County Farm Bureau but a considerable amount of cotton has been handled for farm bureau members in Union, Johnson, Alexander and other southern counties.

Sold With Arkansas Growers

In 1924, the association handled 112 bales or approximately 60,000 pounds of cotton. The amount to be handled by the cooperative association this year is expected to be a similar figure.

The cotton is marketed in cooperation with the Arkansas Cotton Growers' Association and the members thereby receive benefits derived by the larger association. During delivery times the cotton is brought to the association's receiving warehouse where it is sampled and classed according to color, staple and grade. If the member desires, an advance of generally $70 a bale is made. The amount of this advance depends upon the market price of the grades delivered, but usually averages this amount.

Prices 26 to 33 Cents a Pound

As soon as all of the cotton of the members has been received, the bales are shipped to a reliable warehouse in Memphis, Tennessee, where the cotton is stored and sold as a unit of the Arkansas association. Members of the Association are protected at all times by a substantial amount of insurance upon their product whether in transit on the railroad or stored in the warehouse. Warehouse receipts are issued to the members and reasonable amounts may be borrowed on the cotton from a bank if the owner desires.

Prices to the members last year ranged from 26 to 33 cents a pound depending upon the grade of the product while a majority of the Association's sales average 28 to 29 cents. Total sales for the association in 1924 were said to approximate $17,000.

Officers of the Illinois Cotton Growers Cooperatives Association are:

L. E. Lingenfelter, of Ullin, president; T. A. Dubois of Cobden, vice-president; and, E. O. Schoembs of Villa Ridge, secretary-treasurer. The main office of the association is located at Mound City.

Can You Find the Eggs in Eggplant Or Cat in Catnip?

Many's the mind that has puzzled over the origin of the names of many of our common products or why certain trademarks and trade names have been adopted.

In this regard, a current issue of The Sunkist Courier, official organ of the California Fruit Growers Exchange, told of a lawyer who made application to register a trademark "Limestone Brand," a carthartic medicine, and was refused because the medicine did not contain limestone and might give a deceptive impression. The lawyer then prepared a brief which stated, in part, as follows:

"Ivory is a good trademark for soap not made of ivory. Gold Dust washing powder is not made of gold. There is no bull in Bull Durham. Peerless contains no pearls, and White Rock is water. There is no cream in Cream of Tartar, in cold cream or in chocolate, no milk in magnesia, in milkweed or in the cocoanut. These are all as remote from the cow as the cowslip.

"There is no grape in grapefruit, or bread in breadfruit. A pineapple is neither pine nor apple; a prickly pear is not a pear; and alligator pear is neither a pear nor an alligator, and a sugar plum is not a plum.

"Apple butter is not butter. All the butter is taken out of buttermilk, and there is none in butternuts, nor in buttercups, and the flies in the dairy are not butterflies."

In Clinton county, Iowa, 110 rural schools have decided to teach farm accounting as a part of regular eighth grade arithmetic.

EXECUTIVE COMMITTEE
(By Congressional Districts.)

1st to 11th ..... William Webb, Route One, Joliet
12th ..... G. F. Tullock, Rockford
13th ..... C. E. Bamborough, Polo
14th ..... W. H. Moody, Fort Byron
15th ..... B. H. Taylor, Rapatee
16th ..... A. R. Wright, Varna
17th ..... F. D. Barton, Cornell
18th ..... R. F. Karr, Iroquois
19th ..... J. L. Whitenand, Charleston
20th ..... Earl C. Smith, Detroit
21st ..... Samuel Sorrells, Raymond
22nd ..... Stanly Castle, Alton
23rd ..... W. L. Cope, Salem
24th ..... Curt Anderson, Xenia
25th ..... R. K. Loomis, Makanda

Published every other Saturday at 404 North Wesley Ave., Mount Morris, Illinois, by the Illinois Agricultural Association. Edited by Department of Information, Harry C. Butcher, Director, 608 South Dearborn Street, Chicago, Illinois. Entered as second-class matter October 20, 1925 at the post office at Mount Morris, Illinois, under the Act of March 3, 1879, as a bi-weekly. Acceptance for mailing at special rate of postage provided for in Section 412, Act of February 28, 1925, authorized October 27, 1925. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record. Postmaster: In returning an uncalled for or missent copy, please indicate key number on address as is required by law.

Grain Marketing Progressing Minus Headlines

THE grain marketing department of the Illinois Agricultural Association has notified all the Farm Bureaus in the state that the National Farmers' Elevator Grain Company, Co-operative, is now ready for the consideration of the farmers' grain companies of the Midwest.

It has required a great deal of time and effort to work out the form of the organization, and to gain a seat on the Chicago Board of Trade for the subsidiary, the Rural Grain Company. The national company is strictly co-operative. It will operate subsidiaries in various grain markets, and the profits or losses from these will reflect on the books of the national body. This plan permits entrance on the boards of trade, at least on the Chicago board, and at the same time will permit savings in commissions and economies in handling grain to be prorated back to the local elevators in proportion to the grain handled for each individual elevator company.

In marked contrast with other attempts of farmers to extend their control of their grain marketing, this attempt is going on slowly but surely and without the hubbub and newspaper headlines which characterized previous efforts. Perhaps the principal reason that there is a noticeable absence of headlines concerning this co-operative is that it is not particularly unusual. It is best that the company be not unusual; the plan can be better and more universally understood. It cannot be denied that the farmers elevators people know their business, for as a whole, they have been successful. A terminal marketing organization built upon this successful foundation cannot be far from right.

It should not be difficult, the leaders in the movement think, to get together the necessary amount of working capital, as it will only require a few hundred dollars from each farmers' elevator company. No company can hold more than $500 worth of stock, but the officers want none to take less than $200.

An important meeting of the directors of the company, together with representatives of stock-holding elevators who may be in Chicago at the time, will be held December 1 at the I. A. A. office. At that time the plans for the winter's organization in Illinois and Iowa will be made and arrangements perfected for the first annual stockholders' meeting to be held as soon afterward as possible.

Every effort is being made to keep down expenses of organization, and there is no method so direct and effective to bring about action in any county, by the local farmer grain companies, as joint effort on the part of the county farm bureaus and farmers' elevators themselves.

Just as the county Farm Bureaus are paramount factors in the success of the Producers, so will they figure prominently in any successful grain marketing movement.

Let's Put This Across

NOW that farmers in some 67 Illinois counties have made it possible for the Farmers Mutual Re-insurance Company to get its charter, having over-subscribed the necessary $500,000 in insurance by $215,000, the first step is completed and everything is set to gain the principal objective. The machinery has been set up, now comes the time when it shall be put in operation.

It is now up to the officers and directors of local mutual companies to take advantage of what the far-sighted individuals have made possible. Will these officers and directors place their companies in a position whereby they can: (1) handle all the insurance needs of the farmers against fire and lightning (later wind storms and hail) on a mutual basis; (2) protect the local company against those inevitable years when there are excessive losses and provide against excessive assessments through blanket re-insurance?

We believe that every director and officer of every local mutual in Illinois should get full information on the newly chartered company so they can pass intelligent judgment on it and answer any questions that their members may ask.

Both Indiana and Iowa have had a re-insurance company for many years. Let's make the Illinois re-insurance company the best in the United States!

Incidentally, the farmers whose local companies take advantage of the re-insurance company will be saved several million dollars on their insurance bills.

Farmers Lose Tax Case

THE Supreme court of Illinois at the October term handed down a decision in which the Illinois Agricultural Association was interested. In 1924, 199 farmers in Madison county filed objections to the application of the collector of Madison county for judgment and order for sale for taxes delinquent against lands of these farmers. The work of the Madison County Farm Bureau, co-operating with John C. Watson of the I. A. A. taxation department, indicated that the farm lands in Madison county were assessed for taxation purposes at one-half more than they should be. This was the basis for the filing of objections to the application of the collector.

The County court of Madison county held against the farmers and the Supreme court affirmed the decision of the County court. The Supreme court, in its opinion, finds that "the evidence justifies the conclusion that in the assessment actually made, the ratio of the assessed valuation of city and village lots to the actual value was substantially only about two-thirds of the assessed valuation of lands devoted to agricultural purposes to their actual value."

While the Supreme court finds that the facts were as claimed by the farmer objectors, it holds that the objection to applications for judgment for unpaid taxes must be made by each individual person who is aggrieved, and that the objection cannot be made by a group. Although application has been made for re-hearing of this case in the Supreme court, it has not been determined as yet whether or not the case will be carried further.

Make It the Corn Belt's National Sport

SO well was the state husking contest handled by the Montgomery County Farm Bureau folks that scarcely nothing was overlooked that could contribute to the comfort of the onlookers and to the efficiency of the competition. Even a corn-sheller style pencil sharpener attached to the business-end of the scales was provided.

Staging a husking contest, whether county or state, is no small job. The state contest required the services of 148 officials, and they worked with a will. The ladies did their bit and then some in furnishing good food, tasty and hot.

Next year we hope more Farm Bureaus will have county husking contests. With more county contests, there could be no mistake about getting the very best picker out of each county. C. V. Gregory, editor of Prairie Farmer, which is sponsoring the contests in Illinois, said after the Hillsboro affair that quite likely many individual entries could be eliminated next year if there are enough county contests to give a fair representation of the state. Farm Bureaus which held county contests this year seem well pleased with the sport as a morale builder.

There's nothing like a snappy huskin' contest to put a kick in the atmosphere! And farmers say that a contest benefits a whole community. One farmer in Montgomery county said his boys averaged from five to ten bushels more a day after they watched the style of the good huskers competing in a contest.

How about corn shuckin' as the National game of the Corn Belt? And hog callin' as the Corn Belt's song?

ANOTHER service of your organization is the promotion of the consumption of farm products. Recently the famous "Red" Grange and "Five Yards" McCarty testified to representatives of the RECORD as to the important part milk has had in making them football heroes. This was broadcast to the world. No need to tell you what the kids with football aspirations who read these stories will do.

St. Louis District Farm Bureaus Adopt Detroit Milk Plans

Executive Committees of Clinton, Macoupin, Montgomery and St. Clair Counties Pass Resolution

Farm Bureaus in the counties of the St. Louis district are now making definite plans for the organization of the milk producers in that territory, according to A. D. Lynch, I. A. A. director of dairy marketing. The scheme under consideration is known as the "Detroit Plan" which regulates the price of milk when the market has a surplus which cannot be bottled and sold

Recently Director Lynch met with the executive committees of four Farm Bureaus and explained the plan which will probably be adopted for the milk produced in southern Illinois and distributed through the St. Louis companies.

The following resolution was adopted by the executive committees of the St. Clair County Farm Bureau and the Macoupin County Farm Bureau on Nov. 2, the Montgomery County Farm Bureau on Nov. 3, and the Clinton County Farm Bureau on Nov. 5, and will probably be considered by other Farm Bureaus.

Resolution Adopted

"Whereas, a condition exists in this county and has existed for a number of years whereby the dependable 12-month dairy farmer with his capital invested in dairy farming has been in competition with other dairymen who are not 12-month dairymen, and who operate a dairy part of the time and usually in the period of the year when milk can be produced most cheaply, thereby creating a surplus which lowers the market value of the milk of all who are producing it.

"And, whereas, a sound, conservative sales plan for merchandising the milk so that the dairymen who are producing milk more nearly as consumers require it may be premiumized, is needed as the proper means for effectively selling the milk in our several communities in a business-like manner.

"And, whereas, such a sales plan can succeed only when all dairymen and their service organizations unite unselfishly in formulating such a plan and set it in operation under the guidance of capable persons democratically serving the interests of the membership.

Seek Help of Organization

"Therefore, be it resolved, that this executive committee approve the adoption of such a plan in the St. Louis dairy district and give it the unqualified endorsement of this county Farm Bureau.

"Be it further resolved, that we seek and request the co-operation of the State Department of Agriculture, University of Illinois, Illinois Agricultural Association, the several county Farm Bureaus, the Illinois State Grange, the Farmers' Equity Union and all buyers of milk in our communities to unite with us actively in bringing to a successful conclusion the formation and adoption of a sound, conservative milk merchandising plan for the benefit of the whole dairy industry in the St. Louis milk district."

I. A. A. to Entertain Farm Club Boys and Girls at Breakfast

"Last call for breakfast!"

This is the call that will assemble nearly 100 Illinois farm boys and girls to a breakfast entertainment on Dec. 2, which will be given by the Illinois Agricultural Association when they attend the Boys' and Girls' Club Congress and the International Live Stock Exposition at Chicago during the first week in December.

Club boys and girls of Illinois will not get out of the habit of rising early, as customary on the farm, when they take a short vacation trip and attend their national meeting and the live stock show, for on the second day of December they will breakfast at 7:30 a. m. in the Crystal room of the Great Northern hotel.

This annual breakfast for the boys and girls of Illinois has become an established tradition in the state farm bureau activities. Last year approximately 150 boys, girls and officers and directors of the I. A. A. attended the annual breakfast. Two years ago, the farm club members of Illinois who earned trips to the stock show as rewards for superior club work, were given a banquet and dance.

The program of the breakfast will probably include exhibits by special demonstration teams, speeches by the boys and girls, talks by President Thompson and Geo. A. Fox, executive secretary of the I. A. A., and a general introduction of the guests to the state farm bureau directors and their work.

IN CALIFORNIA, COOPERATIVE ASSOCIATIONS are being formed to erect and operate large storage tanks for oil used in heating orchards during frost periods.

On The Job

And here's Col. L. B. Warnsing, chief manager of the state corn husking contest, and his two assistants, William Rebkaus and Wade Weller.

FARM FILLERS

CITIZENS OF THIS COUNTRY ARE EATING ABOUT 18 pounds more meat a year than they were consuming five years ago. During 1923 the total amount of meat consumed was 18,481,000,000 pounds. Pork lead in popularity with beef, veal, mutton and lamb and goat following in order named. The consumption of pork totaled over ten billion pounds while goat meat was consumed at the rate of three million pounds annually.

COMPLAINT HAS BEEN MADE THAT THE co-operative egg association in Oregon has been so manipulating the egg market that the cold storage interests and speculators have been getting the short end of the profits. In the spring the charge is that the price for eggs is held up so high that the ice house men cannot afford to buy them for storage stock and in October the price in Portland is so low that there is little profit in bringing them out, while the co-operative sell carloads of eggs in New York at an advance over the Portland price.

MICHIGAN STATE FARM BUREAU HAS A FABRIC department which sells suits, overcoats, woolen bed blankets, auto robes and underwear to its members. The merchandise is said to be manufactured of 100 per cent wool and of the highest quality.

A RECENT INCOMPLETE SURVEY OF JUNIOR 4-H clubs in Iowa showed 18,052 club members scattered throughout the 99 counties of the state. Of this number 10,326 are enrolled in girls' clubs and the remaining 7,726 in boys' clubs.

IN THE SIXTH EGG POOL, OCTOBER 1 TO 15, OF the Ohio Poultry Producers' Co-operative Association the members received 47.5 cents a dozen for their eggs. This price was 7.5 cents above the price paid by local poultry and egg buyers during the same period when the non-members received 40 cents a dozen. By the first week in November it was expected that the Ohio co-operative would reach the $200,000 mark in total sales for the first four months of operation, according to M. L. Howell, manager of the association.

THE ALBERTA (CANADA) WHEAT POOL MEMbership is increasing more rapidly than ever a U. S. D. A. report states. A million additional acres are expected to be signed by January 1. Coarse grains may also be pooled if enough contracts are received. Some elevators are being built by the pool.

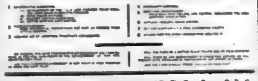
JERSEY COUNTY HAS RECENTLY EMPLOYED A county veterinarian, Dr. H. H. Seely, who will have charge of tuberculosis eradication work being started in that county with the support of the Jersey County Farm Bureau.

FORD COUNTY DAIRY MARKETING ASSOCIAtion, located at Paxton, started with 115 members and now has 201. During its first year of operation it did over $30,000 of business and paid patronage refunds of $1,391.05 to its members.

GATHERING THE CORN

THE great plumes, the ears well enveloped in their husks, the long and pointed leaves, in summer, like green or purple ribands, with a yellow stem line in the middle, all now turned dingy; the sturdy stalks, and the rustling in the breeze—the breeze itself well tempering the sunny noon—the varied reminiscences recall'd—the ploughing and planting in spring—the whole family in the field, even the little girls and boys dropping seed in the hill—the gorgeous sight through July and August—the walk and observation early in the day—the cheery call of the robin, and the low whirr of insects in the grass—the Western husking party, when ripe—the November moonlight gathering, and the calls, songs, laughter of the young fellows.—Walt Whitman.

FARM BUREAU POSTER



FORD COUNTY FARMBUREAU

AND HOW IT HAS PAID

WHAT IT HAS DONE

WHAT THE FARM BUREAU IS DOING

Do Not Be Misled By Statements Of Those Opposed To The Farm Bureau Or To Co-operative Marketing, But Remember The Wheel That Squeaks Is The One That Needs The Oil.

This poster, which is one of the achievements of the publicity committee of the Ford County Farm Bureau, is displayed in all public places in the county for the purpose of pointing out to both members and non-members, the activities, accomplishments and program of the organization.

Adviser Idea 200 Years Old

Letters In New Jersey Archives Show Farmers Wanted County Agents in 1723

How old is the county agent idea?

Carl R. Woodward, editor of the New Jersey extension service, found upon examing colonial documents in the New Jersey archives that more than 200 years ago a suggestion was made that a farm demonstrator be employed.

As early as 1723 a farm demonstrator was proposed for the colonial planters of flax and hemp. In November, 1719, Lewis Morris, president of the East Jersey Council, suggested the establishment of demonstration farms in a letter written to the lords of trade in which he said:

"Hemp may be easily raised in great quantities in this country; but we do not well understand the managery of it.

"I humbly submit to your Lordship's consideration whether, if a few families that understood it were plac't by His Majestie, on some propper lands in the Province of New Yorke (of which there are great quantities), and oblig'd to attend solely the raising of hemp, it would not be the best direction; and of use."

Mr. Woodward states that four years later a memorial was presented to the lords of trade which concluded that a farm demonstrator was the best means of promoting the interests of agriculture. It read:

"That they . . . humbly propose some person well Skilled in Raising and Manufacturing the several Species of Naval Stores (flax, hemp, tar), ... may be Forthwith appointed with sufficient power to instruct the Inhabitants and conduct this Affair, which is of the greatest consequence to his Maj'ts. Dominions both here and in the Plantations."

Whether or not the lords of trade ever acted on this proposal, Mr. Woodward has so far been unable to discover.

THE CHICAGO PRODUCERS' BUSINESS IS STEADILY growing, judging from the October receipts.

County Farm Bureau Presidents to Hold Breakfast Meeting

When it comes to having business breakfast conferences, President Coolidge has nothing on the county farm bureau presidents of Illinois who will attend the conference of the Illinois Agricultural Association and the annual meeting of the American Farm Bureau Federation in Chicago, December 7, 8, and 9.

According to an announcement sent to Presidents of the 92 county Farm Bureaus by Geo. A. Fox, executive secretary of the I. A. A., all county farm bureau presidents of the state have been called to meet at a special breakfast conference in the Crystal room of the Great Northern hotel, at 7:00 a. m., Tuesday, December 8.

This early morning conference has been called to make plans for other meetings of the county presidents which will convene during the annual convention of the national farm organization and to give the presidents an opportunity to attend the national meeting and take part in its activities.

It is understood that the presidents expect to journey to Chicago on Monday, December 7, to hear President Coolidge, who will address the farm delegates at 11:00 o'clock that morning.

The conference of the county presidents of Illinois will take up legislative, administrative and marketing problems strictly related to the farm work in this state. The discussion at this meeting will supplement the convention work of the national organization.

"Five Yards" McCarty Drinks Quart of Milk Three Times Each Day

When Austin ("Five Yards") McCarty, Chicago's famous gridiron player and human battering ram, sits down to his three square meals he finds at the right of his plate a quart bottle of milk to which is attributed considerable of his ability to gain five yards on the football field every time he carries the ball, according to information coming to the Illinois Agricultural Association.

"Red" Grange, Illinois' football ace, may have had a hard time keeping his hands off of the white bottles of the lactile substance when he delivered ice to the Wheaton refrigerators last summer but to McCarty three quarts of milk is a daily present to him from his fraternity.

In the trophy room of Austin's fraternity stands a silent monument to the American cow and her contribution to Chicago's football victories, it is learned. The trophy, imposing beside the loving cups won for athletic achievements, is the first milk bottle emptied by "Five Yards" McCarty when he entered the fraternity life of his school.

McCarty's success and perfect health, through his milk diet, has been so convincing that his room-mates have taken to drinking the farm beverage. The steward of Austin's fraternity states that up until 1923, when McCarty became a member of the college organization, milk was used only for cooking purposes. However, this fall the steward finds that he must order 20 bottles of milk for each meal. Of these, 19 are pint bottles and one a quart and is to be placed before McCarty's chair at the table. Upon this diet, the steward believes, the members of the chapter will soon outgrow their present clothing measurements.

NINETY-SEVEN SHIPPERS OF THE MARION county Ill. Shipping Association visited the East Saint Louis Producers recently watching the stock go through the yards. F. J. Blackburn, farm adviser and C. C. Clifton, shipping association manager, promoted the trip.

SEVENTEEN PER CENT OF THE TOTAL RECEIPTS of livestock on the St. Louis market were handled during a recent week by the Producers. This was considerable more than any other agency handled.

I. A. A. Conferences Listed

Four District Meetings to be Held Before Close of Year

Congressional district conference meetings of farm bureau representatives and members and I. A. A. officials have been scheduled for the next four weeks with place, date, district and speakers announced as follows:

November 23—22nd district, Greenville. Speaker, Vernon Vanimas, field representative of the Farmers' Mutual Reinsurance Company of Illinois.

November 24—17th district, Woodstock. Speakers, President Thompson and A. D. Lynch, I. A. A. director of dairy marketing.

December 2—17th district, Bloomington. Speakers, J. C. Watson, I. A. A. taxation specialist; President Thompson, and L. J. Quasey, director of the I. A. A. transportation department.

December 14—18th district, Wataska. Speakers, Geo. A. Fox, executive secretary of the I. A. A., and Wm. E. Hedgcock, I. A. A. director of live stock marketing.

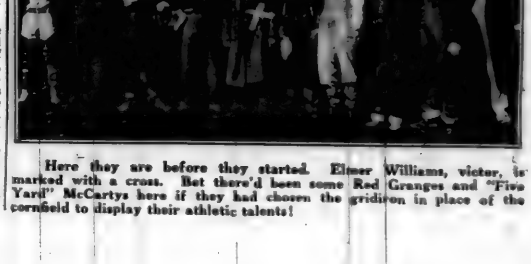
Renewing Members of Alabama Farm Bureau Must Pool Farm Crop

A new policy toward co-operative marketing has been formulated by the board of directors of the Alabama Farm Bureau Federation. Hereafter farm bureau members must market their crops through commodity co-operatives.

After the expiration of the present farm bureau memberships on December 31, no application for renewal or for new membership will be accepted unless at the same time the farmer signs up a commodity contract for such crops as he is known to grow, handle or sell. This ruling applies only to the crops for which the state and county Farm Bureaus have fostered commodity marketing associations.

The resolution setting forth the new policy was adopted unanimously and official notice has been sent to every member. Better marketing is the chief purpose of the Farm Bureau, according to its directors, and farmers who are not willing to help improve marketing do not belong in the organization.

Knox Bureau Buys $10 Gas Coupon Books And Memb[illegible]s Get 'Em For $9



A saving of close to two cents a gallon on gasoline is now available to members of the Knox County Farm Bureau, which has used the buying power of the organization to purchase $10 coupon books at a discount, and sells them to members at $9.

"It is getting to be a difficult matter to keep gasoline on the farm without a lock or key," a statement in the Knox County Farm Bureau Bulletin reads. "In fact, a goodly number of farmers have discontinued buying gasoline in large quantities from tank wagons because of the shrinkage through evaporation and loss due to passing motorists who find their gas tanks empty at a large hour.

"Thus the Farm Bureau has opened a new way for members to buy gas at a discount. Practically every corporation using large quantities of gasoline is able to purchase it at a discount. The Farm Bureau has been able to do likewise, the only difference being that the Farm Bureau takes a large number of coupon books instead of gasoline. These are redeemable at filling stations throughout the county."

The coupons are good for kerosene, oil, grease or any products sold at filling stations. By taking advantage of the coupon book savings, members can "clip cash coupons from their membership," concludes the statement.

Aspirants for State Huskin' Title

Here they are before they started. Elmer Williams, victor, is marked with a cross. But there'd been some Red Granges and "Five Yard" McCartys here if they had chosen the gridiron in place of the cornfield to display their athletic talents!

Carterville Lions Work With Farmers In Co-op Marketing

Fruit and Vegetable Association Formed by Co-operation of Farmers and Business Club Proves Success

Logan N. Colp

MUCH of the credit of the success of the Carterville Growers' Association is due to the leadership and work of Logan N. Colp, president of the association. As a farmer, Mr. Colp knew the condition of local agriculture and as vice-president of the Lions club he was able to join the businessmen with the farmers in making the organization a success. Colp manages a 340-acre farm of which 137 acres are planted in fruit trees. He is a director of the Illinois Fruit Growers' Exchange, Centralia. Recently he has given many talks before farmers and businessmen of southern Illinois telling of the success of the Carterville association and assisting in organizing similar organizations in that part of the state.

When the business men and the farmers get together on a cooperative and mutual project things begin to happen. What is a known fact and Carterville has an example which furnishes a good proof for the axiom.

It was last year that the citizens of Carterville began to realize that all was not well around their community. Agriculture had not been doing well and Carterville depended largely upon its rural people. Farmers were badly in debt. Corn and wheat farming had not been a paying business. Mortgages were increasing and the average farmer did not have enough money to make a change if he desired.

That was the condition when the Lions Club of Carterville, through the efforts of Logan N. Colp, a local farmer, began to take a hand. Farmers were called in for consulation, a careful study of conditions was made and in October a joint tour of farmers and merchants was made through the fruit and vegetable districts of southern Illinois. This was followed by local farm meetings with the result that last December, the Carterville Growers Association, Inc., was formed with seventy-one members. Logan N. Colp was elected president.

Tomatoes Yield $300 an Acre

Twenty-five acres of tomatoes were grown by the members this year which netted them from $150 to $300 per acre after all expenses were paid. Beans, sweet corn and spinach also were planted by the members but due to the dry season, these crops did not yield as well. These were not a complete loss by any means because of the unusual climatic conditions for more than 1000 hampers of green beans, 350 sacks of corn and 300 bushels of spinach were shipped to market on a cooperative basis by the association members.

Although it is planned that the production of fruit shall be the major crop, the members decided to confine their initial efforts to vegetables the first year in order to receive immediate returns on their investment.

The tomato crop proved the big success. In all, fourteen cars or approximately 4,000 bushels were shipped by the association. The distribution was handled by the Illinois Fruit Growers Exchange, Centralia, and the product was sold on the market in Chicago, Milwaukee, St. Paul, Indianapolis, Cincinnati, Rochester, New York and other prominent points of consumption.

Green Wraps Profitable

Ten of the fourteen cars were shipped as green wrapped tomatoes and thus allowed a wider distribution with less spoilage or loss and greater financial returns. This was the first time that green wrapped tomatoes had been shipped out of this district and they took exceptionally well on the markets. It is believed that the Carterville farmers have established a demand for their green wrapped tomatoes that will prove of unusual financial benefit in future seasons.

Local greenhousemen co-operated with the association members this year and the tomato plants were grown in the Carterville green house on a purely cost of production basis. A local warehouse was rented at a reasonable rate for grading and packing the crops.

Lions Club to Furnish Wrappers

For the next year, the Lions Club of Carterville has offered to furnish free of charge, special printed wrappers for the green tomatoes shipped by the association. The product will be marketed under the "Illini" brand but the wrapper will bear the name of the association and a statement to the effect that the organization was sponsored by the Carterville Lions Club.

It is expected that next year the membership of the Carterville Growers Association will number more than 150 and at least 60 to 75 cars of vegetables will be handled by the association. The members were well satisfied with the results this year.

The success of the Carterville growers has come to the attention of both farmers and towns people throughout the district and it is understood that the Rotary and Lions' clubs of many towns are making arrangements to cooperate with the farmers in sponsoring fruit and vegetable associations in their respective communities.

The total sales of the Carterville Growers Association this year has been estimated at approximately $13,000 and was made up of $11,000 in tomatoes, $1,500 in beans and $500 in spinach and corn. This was a good start and with similar success next year it is expected that the total sales will reach a mark of at least four times this amount.

Officers of the association include: Logan N. Colp, president; Jay Bick, vice-president; Leo Watson, secretary-treasurer and J. W. Hayton, Matt Conner, J. B. Moulton, Claude Cox and Richard North, directors.

Williams, Stark County Member, Husks Barehanded; Wins State Shuckin' Title

"BROWN, I've got to get this news to my wife!"

So said Elmer Williams when it was announced that his 27.21 bushels which he shucked in eighty minutes in the second annual state corn husking contest, conducted by Prairie Farmer, entitled him to the title of Illinois champion.

Nineteen other fast corn pickers competed in the contest which was held on the farm of William Bergman, ten miles north of Hillsboro in Montgomery county November 12 under auspices of the Montgomery County Farm Bureau. While the corn was of good yield, the ears ran high and a long drizzling rain the night before caused considerable difficulty in getting about.

"Brown" is the farm adviser of the Stark County Farm Bureau—E. E. Brown. He played a new role for farm advisers—that of coach. Williams, the state's newly crowned champion, has been a member of the Stark County Farm Bureau since it was organized.

"I wish they'd had these contests ten years ago," declared Williams. "I'm getting so my arms begin to numb, but when I was younger I could toss 'em faster. Why about fourteen years ago I shucked 202 bushels in eight hours and twenty minutes, and one week I got over 800 bushels."

Williams is 35 years old, 5 feet 6 inches tall, 160 pounds in weight and a farmer.

Adviser Brown was on the job to render rubbing service if necessary, but none was.

Williams used a shucking peg and worked barehanded. The peg jabbed his left wrist badly. When the contest ended his wrist and hands were bleeding. He tossed from 37 to 42 ears into the wagon per minute.

Husking 27.21 bushels in eighty minutes is the rate of 202 bushels if that pace is maintained for ten hours, 183.6 bushels for nine hours, 163 for eight hours, or one-third of a bushel a minute.

A Close Second

Close on his heels was Walter W. Olsen, member of the Knox Farm Bureau, with 26.56 bushels. Third was Earl Niehaus, 20-year-old son of Henry Niehaus, winner of last year's state contest, who could not compete this year because of boils on his wrists. The younger Niehaus, however, turned in a remarkably clean load, having only four ounces of ribbons on the 100-pound sample taken from his load. It weighed 1778 pounds, and dividing by 89-pound bushel gave him a total of 25.40 bushels. Henry Franzen of Flanagan, Livingston county, landed fourth with 25.12 bushels. Oscar Hagemeier of Nokomis, Montgomery county, took fifth with 25 bushels.

Other placings were as follows: 6—Orville Welch, Monticello, Piatt county, 24.6 bushels; 7—M. V. Beck, Rochester, Sangamon county, 24.5 bushels; 8—Theodore Tuftin, Ottawa, LaSalle county, 23.93 bushels; 9—Wayne Umphries, Covell, McLean county, 23.74 bushels; 10—E. C. Henry, Piper City, Ford county, 23.3 bushels; 11—Pearl Mansfield, Montgomery county, 22.05 bushels; 12—O. R. Pawley, Aledo, Mercer county, 21.94 bushels; 13—William Wellenreiter, Danvers, McLean county, 21.89 bushels; 14—Gus Miller, Geneseo, Henry county, 21.66 bushels; 15—Curtis Robb, Taylorville, Christian county, 20.9 bushels; 16—Earl Marquis, Bethany, Moultrie county, 20.42 bushels; 17—Grover Leigh, Sangamon county, 20.19 bushels; 18—Souvie Harland, Marietta, Fulton county, 18.81 bushels; 19—Joe Morford, Alexis, Mercer county, 18.14 bushels; 20—Dave Spain, Armstrong, Vermillion county, 17.35 bushels.

Illinois' New Champ in Action

Penalty For Too Many Ribbons

Under the system of scoring used, a 100-pound sample was taken from each contestant's corn. All husks left on ears in this sample were removed and weighed. No penalty was made if not more than four ounces of husks were found, but for each ounce over four, three per cent was taken off the total weight of the corn. Some contestants were penalized heavily because of "dirty" husking and those who turned in clean loads were benefitted. For each pound of corn left behind in the field, each contestant was penalized two pounds from the total husked.

Several of the contestants earned the right to enter the state contest by winning in county contests, several of which were put on by county Farm Bureaus. Others entered by affidavit as to amounts they had shucked under observation of some onlooker. It is expected that more county contests will be held by Farm Bureaus next year and individual entries eliminated.

About 3,000 People

About 680 cars were counted as the onlookers left for home, and it was estimated that at least 3,000 people saw the event.

Handling such a crowd in an efficient manner, and also superintending the many details of the contest itself, was the job of the Montgomery County Farm Bureau. That this was well done was the opinion of everyone. One hundred and forty-eight men were required as gleaners, drivers, judges, timekeepers, mounted police and officials. Col. R. B. Warnsing of Nokomis was in charge. His close assistants were: Will Rebham and Louis Weller of Raymond. Farm Adviser Alden Snyder and others of the Farm Bureau deserve much credit for the efficient manner in which the contest was handled. The Hillsboro Chamber of Commerce gave good support. Appetites were appeased by the hospitable ladies of the locality who served food during the day.

The farm is owned by Garrett Pereboom and Mr. Bergman is the renter. Most of the 680 automobiles were parked on a bluegrass pasture and it was badly cut up.

"Aw, don't worry about that pasture," Bergman said after the contest, "it hasn't been in corn for forty years, so I'll plow it up next spring."

Midwest Contest Next

Both Williams and Olsen will represent Illinois in the Midwest contest in Mercer county, Illinois, November 19. There is keen desire to bring the corn belt championship to Illinois this year. State champions of Illinois, Iowa, Nebraska, and Minnesota, and perhaps representatives of Indiana and South Dakota, will compete.

W. J. Sharer, representing the Burgess Community Club, an important part of the Mercer County Farm Bureau, invited all to attend the Midwest contest in the "best county in Illinois, but if I lived in Montgomery county, I'd say this is the best one."

"Beat Iowa! Beat Iowa!" answered the crowd.

Rains, Bad Roads Slow Farm Bureau Membership Drive

Rains, snows and bad roads during the past two weeks have combined in retarding the membership renewal campaigns in many counties of the state, according to Geo. E. Metzger, I. A. A. director of organization.

"Membership drives have been in progress in many counties and their results have been encouraging," states Director Metzger. "However, when many of the roads became in such a condition that our cars mired down to the hubs, we were forced to quit and wait until the boggs freeze up or become dry enough to be passable. In counties having hard roads we have been able to complete the solicitation of the members living on the concrete highways. We are unable to complete the campaign in many counties until the side roads are in better condition.

"The recent continuous rains have caused great losses to many Illinois farmers. In our work in the country we find that thousands are unable to get in the fields to harvest their corn. These rains have been exceptionally prevalent in our southern counties. In one county, which ordinarily sows a large acreage of wheat, it is said that this fall the farmers have been able to sow less than 100 acres on the entire county.

"Under these conditions we are holding up our membership campaigns. Several of our solicitors have been withdrawn to curtail expenses."

New Game Law Makes "No Hunting" Signs Mean What They Say

Several county Farm Bureaus in Illinois are furnishing "No Hunting" signs to members. In the last legislature an amendment to the game laws was enacted which protects an owner or tenant who posts a "No Hunting" sign on his premises, or inserts a small advertisement in the local newspaper telling that no hunting is permitted.

The text is as follows:

"It shall be unlawful for any person to trap or hunt with a gun or a dog, or allow a dog to hunt within or upon the land of another or upon the waters flowing over or standing on the land of another, where notice that hunting or trespassing is forbidden, is posted or exhibited in a conspicuous place on such land, or where the owner, agent of the owner, or occupant has expressly forbidden hunting or trespassing on such land by publication in a local newspaper."

In analyzing this amendment, Legal Counsel Kirkpatrick states that it serves as a protection for those who put up signs or who advertise, yet does not lessen the protection of the owner or tenant as it stood before the game law was amended.

The penalty for violation is a fine of not less than $15 nor more than $100, or county jail imprisonment of not less than 10 days nor more than 20 days, at the discretion of the court.

Jardine and Lowden to Speak at Meeting

(Continued from page 1, col. 5)

A committee to consider any proposals for amending the I. A. A. constitution, should there be any, was also appointed. The members are: B. H. Taylor, Lapatee, Fulton county; Samuel Sorrells, Raymond, Montgomery county and G. F. Tullock, Rockford, Winnebago county. Proposals to amend the constitution must be submitted 20 days in advance of the annual meeting in order that all voting delegates may be notified, according to the by-laws of the I. A. A.

Other actions taken by the executive committee in its November meeting were: approval of the treasurer's financial report which showed the I. A. A. is operating under its budget; received a report on grain marketing, a story of which is in another column, and received a verbal report from the legislative committee telling of work being done to form a citizens' protective body for the purpose of pushing a state police bill in the next legislature which would have the support of the Illinois Chamber of Commerce, Illinois Bankers' Association and the I. A. A.

All three organizations are co-operating in this effort to secure a state police bill which will furnish adequate rural protection and without undesirable political influences.

In a letter to the Illinois Agricultural Association concerning the Record, the Literary Digest says: "We are looking forward to receiving future issues of this interesting publication."

A recent survey of the U. S. D. A. revealed that 70 per cent of the price paid by consumers in Boston for onions was absorbed in handling costs between the producers and the consumers.

The Chicago Producers handle about 5 per cent of the total livestock receipts on the Chicago market after deducting shipments direct to packers.

Nearly two-thirds of the nation's cranberry crop is marketed cooperatively.

"No Trespass" signs are ready for delivery to all members of the Winnebago County Farm Bureau.

Gougler and Wicker Address Members at District Conference

I. A. A. and Woodford County Farm Bureau Complimented by Members at 16th District Meeting, Oct. 27

Poultry and egg marketing, principles involved in developing successful co-operative organizations and a general review of the problems and projects of the county Farm Bureaus were the chief subjects discussed at the 16th district I. A. A. conference held at Henry, Oct. 27.

A. R. Wright

Thirty-two farm bureau officers, advisers and members from Marshall, Putnam, Peoria, Bureau, Stark and Tazewell counties attended the meeting. A. R. Wright, I. A. A. executive committeeman, who will reflect the wishes and expressions of the leaders on to the state organization, presided as chairman with F. E. Fuller, adviser, Marshall-Putnam Farm Bureau, as secretary.

During the morning session, F. A. Gougler, director of the I. A. A. poultry and egg marketing department, told the members about the Illinois poultry and egg marketing plan that is now in the educational stage in many counties. It was the opinion of those present that most farmers will be willing to take better care of the eggs by gathering them twice a day, "swatting the rooster" and in general, produce a higher quality of eggs, provided there is a profit for doing so. Under present marketing conditions farmers get little or nothing extra for the extra work.

Woodford County Praised

Following the noon hour, the meeting was turned over to a round-table discussion of the problems and projects of the various Farm Bureaus represented. The progress of the membership drives was reviewed and the unanimous opinion was stated in the belief that, when possible, non-members should be excluded from participation in the benefits of the Farm Bureau.

Hog vaccination work which makes a saving in lower costs of serum to farmers was reported as saving more than the cost of running the Farm Bureaus of the district. Praise was given to the Woodford County Farm Bureau for its discovery of Krug corn and work in increasing the yield. Tazewell county representatives related the work with their automobile insurance for members.

I. A. A. Complimented

The work of the I. A. A. was complimented by J. E. Shanklin of Toluca, who stated that he saw the great value of the organization at the time of the hearing of the state commerce commission in defense of the farmers' elevator which he represents at Varna. This elevator company owns property along a railroad that is attempting to cease operations, thus leaving the elevator stranded for want of transportation facilities. "When these emergencies arise we see the great value of sticking together," he stated.

Geo. R. Wicker, manager of the Illinois Agricultural Co-operatives' Association, the I. A. A. co-operative auditing and business service, made the afternoon address. He explained the necessity of a solid foundation for grain marketing founded upon farmers' elevators. He stated that now farmers' elevator associations are getting together on a plan acceptable to all.

Thirty-two Present

Those present at the meeting, according to counties represented, included:

Marshall-Putnam County Farm Bureau—J. E. Shanklin, John McDonald, H. H. Hastinge, A. R. Wright, I. A. A. executive committee, Charles Martin, Ben Modro, H. I. Webber, J. A. Shanklin, J. T. Mills, John Schmitt, H. H. Thierry, J. E. Carlson, Otis McClary, A. M. Stoner, F. E. Fuller, farm adviser, Louis Boyle, assistant adviser, F. E. Smith, George Wheeler, William Downey, L. F. Doyle, David Sipe and Guy French.

Peoria County Farm Bureau—Charles Ford, president; and C. R. Coultas, assistant adviser.

Bureau County Farm Bureau—Herman Madsen, William Habercorn, and W. W. Wilson, farm adviser.

Stark County Farm Bureau—Ed. Welcox and E. E. Brown, farm adviser.

Tazewell County Farm Bureau—L. E. Welk and President Morris.

Fruit trees and many spring and early summer flowers within a radius of 50 miles of Duquoin, Perry county, were in bloom or bud this fall, making two "spring seasons" for 1925.

The board of the Vermilion County Farm Bureau has expressed itself as favoring a corn husking rate of five cents a bushel for this fall and feels this is the average in central Illinois.

J. Franklin Hedgcock, farm adviser of the Will County Farm Bureau, was one of the speakers at the National Conference of County Agents which was held at the National Dairy Show, Indianapolis.

Most animals about the farm have a name. Why not give one to the farm tool?

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Volume 3 | Issued Every Other Saturday for 63,000 *thinking* Farmers—December 5, 1925 | No. 24

750 ILLINOIS FARMERS TO ATTEND A. F. B. F. MEETING

Marketing Proves Lively Subject at Murphysboro Meet

Lynch, Leeper and Gougler Address Farmers at 25th District I. A. A. Conference

Twenty-eight farm bureau officers, advisers and members from the counties of Jackson, Union, Randolph, Franklin and Williamson attended the 25th district I. A. A. conference held at Murphysboro, Nov. 19, and united in expressing their views and wishes regarding farm problems and activities which will be forwarded to the officers and executive committeemen of the state organization by R. K. Loomis of Makanda, I. A. A. committeeman of the district and chairman of the meeting.

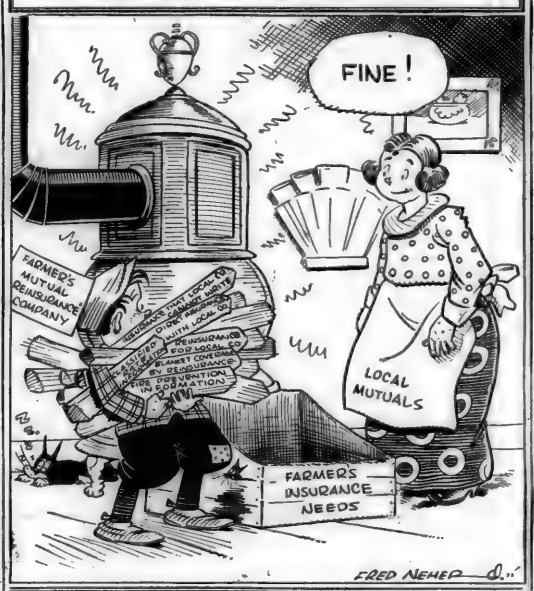
R. K. Loomis

The program was taken up chiefly with discussions on co-operative marketing with special talks given on the marketing of poultry and eggs, cream and milk, and fruit and vegetables.

F. A. Gougler, director of the poultry and egg marketing department of the I. A. A., explained the Illinois poultry and egg marketing plan and emphasized the importance of carefully planned educational work as a ground-breaker before actual marketing is begun.

Loomis Reviews I. A. A. Work

The second I. A. A. speaker to address the conference was A. D. Lynch, head of the dairy marketing department, who told of the co-operative cream and milk marketing organizations that are being organized or are in operation in the state. Director Lynch also pointed out the progress that has been made on the tuberculosis eradication project in Illinois.



A. B. Leeper, I. A. A. director of fruit and vegetable marketing and manager of the Illinois Fruit Growers Exchange, Centralia, spoke on problems of interest to the fruit men of the 25th district. He was followed on the program by Committeeman Loomis who told of the important current activities of the Illinois Agricultural Association and opened the meeting to a round-table discussion.

Those who attended the meeting were: Jackson County Farm Bureau—Herbert Young, George Smith, C. C. Logan, Charles Miller, L. D. Reickenberg, Henry Reickenberg, Henry Dickmeyer, Jesse Klein, Nick Maes, Charles Maes, H. P. Sauer, Frank Easterly, E. Melner, Fred Dietz, L. A. Dietz, Philip Dietz, Adviser C. J. Thomas, C. O. Allard, H. G. Easterly and H. Burkey. Union—R. K. Loomis; Randolph county—John Uffelman and E. C. Secor, farm adviser; Franklin county—H. H. Webb, president, and E. E. Glick, farm adviser. Williamson county—Josh Collins, J. M. Krumrey, president, and W. K. Galeener, farm adviser.

SECRETARY JARDINE, IN A RECENT SPEECH estimated that $2,500,000,000 of farm products would be marketed co-operatively in the U. S. in 1925.

IN OHIO THE FARM BUREAU RECENTLY ORGANized the Ohio Farm Bureau Corporation which is incorporated for the purpose of offering financial and managerial services to co-ops. Shares and bonds in it will be offered to the general public.

To Take Care of All Insurance Needs of Farmer

24th District Farmers Discuss Limestone R. R. Rates at I. A. A. Meeting

Resolutions urging T. B. Testing of Illinois herds, the continuance of a strong differential in the purchase price of limestone, favoring farm bureau members, and the holding of the I. A. A. district conferences next year, summarizes much of the discussion of the 22 farm leaders, officers, advisers and members from Clay, Pope, White, Gallatin, and Johnson counties, who attended the 24th district conference, held at Golconda, Nov. 19.

Curt Anderson

The meeting was called to order by Curt Anderson, I. A. A. executive committee of the district, who absorbed the opinions of the leaders present with the view of forwarding the information on the state executive committee for the purpose of directing the activities of the state organization.

Report on Wheat Pool

During the morning session, the meeting was turned over to a round-table discussion which brought out the fact that the Louisville and Nashville railroad is not making an allowance for demurrage on rainy days on cars while other roads reported on have made allowances in the past. The freight rate on limestone chat from Southern Missouri to Illinois points was discussed and a feeling shown that the I. A. A. should attempt to gain a more favorable rate from this source of supply.

Farm Advisers Creighton of White county and Simpson of Gallatin county both reported favorably on the soft wheet pool of the Indiana Wheat Growers Association but stated that the pool has not progressed far enough to throw much light on the probable future of the organization.

Resolution Urges T. B. Testing

Before the close of the meeting a committee reported on the following resolutions, which were adopted:

"Resolved, in view of the vast amount of educational work on lime-

(Continued on page 3, col. 5.)

Famous Poland China Is Model For Medal Awarded Hog Caller

Because he was adjudged the most effective and persuasive hog caller of Illinois at the I. A. A. annual state picnic, which was held under auspices of the Christian County Farm Bureau at Taylorville August 27, V. E. Robison of Morton, Tazewell county, is awarded the medal reproduced here.

The medal was made from a photograph of Armistice Boy, famous grand champion Poland China boar. It is a watch charm and is one inch long. Champion Robison is a Poland China breeder. People who have seen the charm marvel at its fine detail. It is 10-karat gold.

Many National Authorities to Address Seventh Annual Meeting of A. F. B. F. at Sherman Hotel, Chicago, Dec. 7-8

President and Mrs. Coolidge to be Luncheon Guests of Farm Bureau Officials; Illinois County Presidents to Attend Breakfast Conference; Seats For All Illinoisians.

HEADLINERS including the President of the United States, Senator Capper of Kansas, representatives of the United States Department of Agriculture, leaders in the fields of electricity, organization, advertising, marketing and women's work are scheduled to speak on the program of the annual meeting of the American Farm Bureau Federation which opens at the Sherman Hotel, Chicago, on Monday, December 7 and continues for three days.

Senator Arthur Capper

Besides the general sessions, special sectional meetings are scheduled which are to include brief discussions covering the various types of work carried on by the state Farm Bureaus and lines of endeavor allied to farm organization activities. Although varied the program is full and complete with practically every minute of the three days taken up with convention work. It will be a school of farm organization information.

President Coolidge will open the speaking program of the convention at 11 a. m., Monday, the first day. Following this he will have lunch with the national officers and presidents of the state Farm Bureaus at which time only foods that have been marketed through co-operative organizations will be served. The First Lady of the Land, who will accompany the President, will be entertained at a special luncheon given by the farm bureau women who attend the national convention. The Coolidges will return to Washington Monday afternoon.

I. A. A. Director to Talk

During the first afternoon James O'Shaughnessy, secretary of the American Association of Advertising Agencies, New York City, will address the meeting on "The Application of Advertising to the Farming Industry." He will be followed on the program by Lucius Wilson, president, General Organization Co., Chicago, who will speak on "The Farm Bureau—Mother Organization of Agriculture."

Following President Wilson's talk, the convention will be opened for a sectional meeting on organization, membership and field service with S. H. Thompson, I. A. A. president, presiding. During this meeting George E. Metzger, director of the I. A. A. organization department, will speak on "The Intensive Sales Campaign."

"Making the Load Lighter by Electricity" is the subject scheduled for the principal address of the evening session of the first day. The speaker will be Owen D. Young, chairman of the board of directors of the General Electric Company, New York City. Mr. Young collaborated with Vice-President Dawes on the formulation of the Dawes plan of reparation.

Owen D. Young

At 7:00 a. m., Tuesday, Dec. 8, all presidents of the county Farm Bureaus of Illinois will meet at a special breakfast conference, called by Geo. A. Fox, executive secretary of the I. A. A. At this early morning conference the 92 county presidents

Insurance Totaling $750,000 Placed in Force by New Mutual

Farmers' Mutual Reinsurance Company of Illinois Received Charter Nov. 17

At noon, Monday, Nov. 21, approximately three-fourths of a million dollars of risks in farm mutual insurance was placed in force through the Farmers' Mutual Reinsurance Company of Illinois.

This notice was issued on receipt of the company's charter from the Illinois trade and commerce department, Springfield, on Nov. 17, following a state-wide campaign for $500,000 in individual insurance applications in which 385 Illinois farmers in 67 counties took part. This campaign, which over-subscribed the goal by $240,000, was accomplished in less than four months through the co-operation of county Farm Bureaus, the I. A. A., secretaries of local and county mutual insurance companies and individual farmers throughout the state.

A 25-Year-Old Aspiration Realized

With the starting of operations by the Farmers' Mutual Reinsurance Company of Illinois, an aspiration of mutual insurance leaders in Illinois for more than 25 years has been completed. For over a quarter of a century mutual companies of the state have realized the need of a state-wide reinsurance company to allow further development of the field and place the mutuals in a position to take care of all the insurance needs of Illinois farmers. However, it was not until this year that definite plans were adopted by the State Association of Mutual Insurance Companies of Illinois and through the assistance of the I. A. A. organization efforts were started.

The new reinsurance company will in no way conflict with the activities of the local mutuals but will supplement their benefits by extending blanket reinsurance, specific reinsurance and recessional in-

Published every other Saturday at 404 North Wesley Ave., Mount Morris, Illinois, by the Illinois Agricultural Association. Edited by Department of Information, Harry C. Butcher, Director, 608 South Dearborn Street, Chicago, Illinois. Entered as second-class matter October 20, 1925 at the post office at Mount Morris, Illinois, under the Act of March 3, 1879, as a bi-weekly. Acceptance for mailing at special rate of postage provided for in Section 412, Act of February 28, 1925, authorized October 27, 1925. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record. Postmaster: In returning an uncalled for or missent copy, please indicate key number on address as is required by law.

Fine! Now Support It

"WE call attention to the fact that a tariff on agricultural products is not effective when there is an exportable surplus, and call upon the business interests of the country and Congress to assist in remedying this situation, to the end that American Markets at American Prices be preserved for American farmers."

The above is a part of the resolutions adopted by the board of governors of the American Farm Congress, the most conservative agricultural group in these States. Secretary Jardine is a past president of the organization and addressed the convention at Kansas City at which this important resolution was adopted.

The coming session of Congress will no doubt give the element which fostered this resolution a splendid opportunity to back up what they say.

Quality Product + Organization = Higher Price

BECAUSE they are offering milk from tuberculin-tested cows that is of extra good quality, and also because they formed an organization and appointed a sales committee to bargain for them, the members of the DeKalb Milk Producers Association raised their price from $2.25 to $2.75 a hundred.

Quality Product + Organization = Higher Price.

A Timely Warning

IN order to guarantee fair and square treatment to the farmers in Illinois in purchases of ground rock phosphate, your association has been maintaining, for six years, a supervisional service with a branch office and chemical laboratory facilities in the phosphate field in Tennessee.

Rigid regulations and specifications have been established by the association, and any phosphate company which is able, physically and financially, to meet the requirements of the I. A. A. and shows its willingness to abide by the I. A. A.'s regulations and supervision by signing the agreement which the I. A. A. has prepared, is placed upon what is known as the I. A. A. Accredited List.

At present there are three such companies and no more. These are: Robin Jones Phosphate Company, Nashville, Tenn.; Ruhm Phosphate & Chemical Company, Mt. Pleasant, Tenn.; Thomson Phosphate Company, Home Life Bldg., Chicago, Ill.

If, in the future, other companies are able to qualify and satisfy the I. A. A. requirements and will sign the agreement with the I. A. A., they will be added to the list and farm bureau members will be advised of the fact through the RECORD and through your respective Farm Bureaus. In the meantime, if other parties attempt to sell phosphate in Illinois and make claims or statements which might cause you to think they are operating under the I. A. A. plan, or in co-operation with the I. A. A. you should inquire about them through your Farm Bureau, or direct to the phosphate-limestone department. This department requests that you report promptly such facts to it.

Where The I. A. A. Stands

YOUR organization—and stress the *y-o-u-r*—has replied to a request from the American Farm Bureau Federation in which the Illinois Agricultural Association was asked to list, in order of importance, the subjects of far legislation which the association considers should be brought before the next session of Congress.

The reply listed the following:

1. Legislation that will place Agriculture on equality with Industry and Labor.
2. Legislation that will establish proper income tax exemptions for co-operative marketing organizations which were meant by Congress to be effective but which the treasury department has interpreted differently.
3. Legislation making it possible for fertilizers to be manufactured at Muscle Shoals with the least possible expense to farmers.

These are national objectives. Don't forget the major state legislative program, which is:

1. Adoption of the amendment to the revenue section of the state constitution which wins or loses at the polls in November, 1926.
2. Adoption of a gasoline tax in lieu of some present tax.
3. Adoption of a state police.

Why Did You Join?

WHAT was your reason for joining the Farm Bureau?

George E. Metzger, organization director, finds that the five reasons given most often by farmers who joined or re-joined this year are:

1. I believe that the farmers of the United States must become strongly organized. I am putting my belief into action by becoming a member of the Farm Bureau.
2. I believe that farmers have a legislative problem in gaining "Equality for Agriculture" which can only be solved through organization.
3. I believe that co-operative marketing is the way to a reasonable degree of price stabilization and I recognize the value of the Farm Bureau in organizing such co-operatives, as well as rendering field service and legislative services to such organizations after they have been set up.
4. I believe that the problem of ever-increasing overhead expense of farm supplies, labor and taxes can best be studied and solved by farmers through organization.
5. I believe in the study of greater efficiency in production of farm products which comes through co-operation and membership in the Farm Bureau.

Do these reasons cover your thoughts toward the Farm Bureau when you joined or re-joined? Write us your views.

Not Credit, But Price

THE finding of the official team that was sent to Iowa to see whether special credit to enable farmers to hold their corn would help the agricultural situation any, is receiving passing notice in the press. The investigators, one from the U. S. department of agriculture, the other from the federal farm loan board, undoubtedly reported much more to the Secretary of Agriculture than the published report reveals. There was nothing in the report that any farmer in the corn belt could not and no doubt many did tell them.

More credit cannot relieve a situation that is due to inadequate price. No business can pay off a debt that was incurred when all costs were inflated, with a product whose price has fallen out of proportion to costs which still stay up.

The concluding paragraph of the summary of the investigating committee's report as released from Washington is more to the point than all of the eight or ten paragraphs that precede it. It reads:

> While our mission was to survey credit and farm storage conditions in Iowa, we feel it should be added that deep interest was expressed in the problem of stabilizing the prices of farm products and in bringing about a better relationship between the price of the things farmers buy and the things they sell. The agricultural situation has improved since 1921, but it is apparent that many Iowa farmers still labor under the handicaps of large debts, high operating expenses, high taxes, high interest rates on short time loans, and also widely fluctuating and often unsatisfactory prices for their products.

In the past two years, the farmers have brought forth proposals for an export corporation or similar device to stabilize prices by caring for the surplus that follows any normal crop of certain farm products. The government has taken no pains to hide its opposition to such projects.

The problem of the surplus is recognized at Washington. The Secretary of Agriculture has repeatedly said so. The late agricultural commission, on adjournment last winter, announced that the first problem it would take up, on reconvening, would be that of the surplus. Now it is announced that the commission is not to meet again. The farmers are not disappointed over lack of effective action from the commission. They did not expect it. But they are waiting, more or less patiently, for the administration to bring forth its suggestions as to how the farmer may be included in the American protective system.

I. A. A. Cream Reports Force Local Stations to Pay Better Prices

Spread Between Butter Fat and Butter Prices Reduced Through Price Reporting Service of Department

Weekly reports issued by the dairy marketing department of the I. A. A. giving the butter fat prices paid by Illinois cream stations, have had a marked influence in reducing the spread between the price of 90-score butter and butter fat, according to A. D. Lynch, director.

This "bullish" influence on the prices paid for butter fat by Illinois cream stations was brought out in a report by Director Lynch which showed a decrease of four cents a pound in the spread between 90-score butter prices and the prices paid farmers for their butter fat over a period of 18 months.

In May, 1924, when the weekly price reports were first issued, the average difference in price between butter fat and 90-score butter was five cents a pound. Six months later the Illinois cream stations had raised their price standards and the spread was reduced to four cents. The weekly reports were then continued for another year and during October of this year, the average spread was less than one cent a pound.

Reports From 42 Counties

Figures for these reports are compiled by the I. A. A. dairy department through the co-operation of 125 members in 42 Illinois counties who send in an account of the prices paid for butter fat at their respective cream stations each Saturday in the month. These reports are summarized and a statement issued by the dairy department giving the average prices paid for butter fat in the various counties and the differences between these prices and the market quotations on 90-score butter.

These differences are brought to the attention of farm bureau members who in turn investigate the reason for the spread. This indirectly influences the cream buyer to pay a higher price for the dairy product.

"In one Illinois county," states Director Lynch, "the spread has been reduced nine cents a pound in the last 18 months and has indirectly given an additional profit of nine cents on each pound of butter fat marketed by the farmer of that county."

Co-Ops Force Price Up

Reports from the 42 counties also show that cream stations located in counties where co-operative creameries are in operation pay higher prices for butter fat than in counties where there are no co-operative cream marketing efforts. This was brought out particularly in Carroll and Stephenson counties during October of this year. Both of these counties have co-operative creameries and the average prices paid for butter fat were 47.2 cents and 49.0 cents respectively, as compared with the average price of all counties of 46.1 cents.

This result is also found in a comparison of states. In Ohio, where co-operative cream marketing is more extensive than in Illinois, the farmers receive an average of five cents more for their butter fat than those of Illinois.

"In general, it is found that through co-operative marketing operations the net return to farmers amounts to an increase of from seven to ten per cent," states Director Lynch. "This increased price, due to co-operative efforts benefits the outsiders as well as the member."

HENRY COUNTY HAS INCREASED ITS FARM bureau membership about 13 per cent.

ALEXANDER LEGGE, PRESIDENT OF THE International Harvester Company, recently stated before the National Industrial Conference Board, New York, a research organization for industrial interests, that agricultural inequality began before the war and that it is newspaper writers and so-called economists who are filling the papers with bombast as to the come-back of the farmer. He said that the farm situation is better than two years ago, but nothing has happened looking toward a permanent improvement.

A "White House" Atop a Skyscraper

Perched 300 feet above Randolph street, Chicago, on the tiptop of the new Hotel Sherman, is a new Georgian residence which is a midwestern "White House" where President Coolidge will make his headquarters when he comes to address the American Farm Bureau Federation Seventh Annual Meeting, December 7.

It is an honest-to-goodness two-story house with stairs connecting the first floor with the upstairs, where there are four master bedrooms. Downstairs there is a wood paneled living room with a wood-burning fireplace, a dining room and a kitchen. The tall west windows look out on a yard which is to be planted in grass. This yard is surrounded by an old fashioned tall brick wall.

President Coolidge will deliver his speech, which will be in the presence of approximately 750 Illinois farmers, in the "basement" to his midwestern "White House."

Illinois Farmers Sell Half of Eggs During 4 Lowest Priced Months

One half of the eggs produced in Illinois are marketed during the months of March, April, May and June, according to F. A. Gougler, director of the I. A. A. poultry and egg marketing department.

"It has been noted," states Director Gougler, "that during the four months which we call our flush season, 50 per cent of the eggs move to market and the other half are distributed throughout the other eight months. This heavy movement always comes during the season of low prices. In fact, the heavy marketing is responsible for the low prices at that time of the year. Likewise, it has been noted that November is the low month of production, the average farmer selling only half a case during the month, and this accounts for the high prices for fresh eggs during the winter months."

Pacific Coast Producers Sell in Fall

Director Gougler points out that one of the important phases of a co-operative marketing association will be to educate its members to the need of changing their production methods in order to produce the largest volume of eggs during the high price months. A notable example of heavy production in months of high prices is found on the Pacific Coast where co-operative marketing of eggs has been carried out extensively. Figures from those states show that 84 per cent of the Pacific Coast eggs sold on the New York market during the winter of 1924-25 were marketed in the high price months of November, December, January and February. On the other hand during the heavy months of production in other states, the Pacific Coast producers sell less than 25 per cent of their annual production.

Sells 20 Cases Annually

The average size flock on an Illinois farm is 106 and from this, it is estimated that Illinois farmers sell approximately six dozen eggs per hen. Therefore, one farmer with an average number of 100 laying hens, will sell annually 600 dozen or 20 cases of eggs. Under present marketing and production methods these eggs are marketed by months as follows:

Month	No. of Cases
January	1
February	1½
March	2
April	3
May	3
June	2
July	2
August	1½
September	1½
October	1
November	½
December	1

THE MICHIGAN POTATO GROWERS' EXCHANGE, Cadillac, Mich., has sold nearly 19,000 cars of potatoes for its affiliated local associations in seven years. The number of cars handled each season has averaged from 2,118 to 3,250.

Coolidge To Be Served Only Co-op Foods When He Dines With A. F. B. F.

It's a 100 per cent co-operative meal that President Coolidge will eat when he takes lunch with the national officers and presidents of the state Farm Bureaus at the annual meeting of the American Farm Bureau Federation, Chicago, Monday, Dec. 7.

The milk that the President will drink will be "Creamy Products" milk from tuberculin tested cows and sold by the Quincy Co-operative Milk Producers' Association, a co-op that has a record of paying its members the highest price and selling to the consumers at the lowest price of any milk distributing agency in the United States. Only "Vita-Gold" cream, produced by the Stephenson County Co-operative Cream Producers' Association.

19 Counties Expect To Feature Shuckin' Contests Next Fall

Nine Others Say 'Probably" or "Maybe" and Five Answer "No"; Stark County Member World Champ

Following the state corn husking contest held in Montgomery county and the mid-west competition in Mercer county, keen interest has developed among a large number of county Farm Bureaus in "corn shuckin'" as a farm sport.

Both Elmer Williams of Stark county and Walter W. Olson of Knox county, winners of first and second in the state and mid-west contests, respectively, are members of the Farm Bureau.

Williams hung up an official world's record in the mid-west contest with 35.9 bushels, while Olson was not far behind with 34.03 bushels in the 80-minute battle.

A questionnaire sent to each farm adviser in the state asking the question, "Do you plan to have a county husking contest next fall?" resulted in 33 replies (by Nov. 28), 19 of which said "yes," 9 "probably" or "maybe" and 5 "no."

"We anticipate a big event in our county contest next year," states Adviser E. E. Brown for Stark county.

"The Rio Community Men's Club held a banquet in honor of Walter Olson last night," Adviser L. R. Marchant of Knox county writes. "Some eighty men voted to co-operate in conducting a local contest.

The Farm Bureaus which have rather definitely decided, although in some cases not officially, to hold county husking contests next fall are: Shelby, Hancock, Knox, Douglas, Carroll, Christian, McLean, Tazewell, Iroquois, Piatt, DeWitt, Ford, Warren, Henry, Clark, LaSalle, Rock Island, McDonough and Stark.

Those reporting "no": Pike, Lawrence, Crawford, Madison and Vermilion. "Probably" or "maybe": Sangamon, Peoria, Bond, Schuyler, Ogle, Grundy, DeKalb, Macon and Henderson. Other counties probably will be heard from.

MIMEOGRAPHING IS HER PET PEEVE!

This is the first of a series of stories about farm bureau secretaries of Illinois. The work of the office secretary is important to the success of every Farm Bureau. The efficiency displayed in handling the office routine, her knowledge of the work and farm problems and her courteous personality in greeting the office visitors reacts directly upon the membership. During the coming months our readers will meet some twenty of the farm bureau office secretaries who have been in the service the longest period of time.—Editor.

"WHERE will I find the cow tester (county veterinarian)?" is one of the questions asked most frequently by farmers of Lake county, according to Miss Blanche Osborne, who has held the position of office secretary of the Lake County Farm Bureau for nearly six years, in answering a questionnaire from the information department of the Illinois Agricultural Association.

MISS BLANCHE OSBORNE
Secretary, Lake County Farm Bureau, Libertyville

Another question we hear several times a day, writes Miss Osborne, is, "Where will I find the farm adviser?" From this it is readily gathered that personal service plays an important part in the work of the Lake County Farm Bureau, for when asked what she considers the most important phase of farm organization work, Miss Osborne writes:

"While it possibly should not be true, nevertheless, in our county the personal service of the farm adviser to the members is the most important. We have that demonstrated now in our membership campaign. In localities where more personal service has been rendered we are finding the least trouble in getting new members and renewing old memberships.'

"The value of tuberculosis testing to the dairymen of the Chicago district, writes Miss Osborne, "is the most important problem facing the farmers of Lake county today." To this she ads that the utilization of the various side-lines of farming that will bring the farmers considerable income beside milking cows is always a cause for more or less trouble in her section. Lake county is located in the center of the district that supplies the Chicago milk.

This secretary says that the best thing she likes about her work is the personal contact with people and their problems, and the necessity of using her wits in giving the service when she is the only one around the office. Mimeographing is her pet peeve.

Miss Osborne denies that she is married but when asked her opinion whether it is better to be a farm bureau secretary than married she writes: "That's hardly fair to ask before we've tried it. Both might be O. K."

I. A. A. Presents Club Medals

Seven State Champion Club Winners Given Medals at I. A. A. Breakfast

Seven medals were given to state champion boys' and girls' club winners by the Illinois Agricultural Association when 113 Illinois farm boys and girls, attending the club congress, were at a breakfast entertainment given by the I. A. A. in the Crystal room of the Great Northern hotel, Chicago, Dec. 2.

The medal winners were presented to the I. A. A. by Dean H. W. Mumford, of the college of agriculture, University of Illinois, and the I. A. A. medals were presented by President S. H. Thompson. Following the presentation of the medals, one boy and one girl winner responded with a short talk for the guests.

Those who received I. A. A. medals were: Donald Cameron of Peoria county, was declared state champion at the livestock judging contest held at Urbana, August 17. Donald, who is president of the Hahna City pig club, has been chosen by the Peoria county boys and girls club committee as the Peoria county pig club champion for 1925.

Elmer Becker, Adrian Bullington and Donald Dean of Bureau county, members of the state champion livestock judging team which made the greatest number of points in the judging contest held at Urbana, Aug. 17.

Clifford Erickson, Donald Nelson and Leonard Lanegran, members of the DeKalb county dairy judging team, which was declared state champion dairy team.

Other state club champions who were given medals at the I. A. A. breakfast by their respective county Farm Bureaus were:

Name	County	Project
Joseph Baumgardner	Marshall-Putnam	Beef Calf
Franklin Singer	Montgomery	Alfalfa
G'en Baker	Lasalle	Garden
Forest Weseman	Kane	Dairy
Glen Bossinger	Christian	Boys' Clothing
M. T. Stephenson	Henry	Meat Pigs
Hazel Quicksall	Shelby	Poultry
Margaret Fortune	Williamson	Clothing
Ella Bliss	Gallatin	Meat Pigs
Lucile Tavener	Livingston	Baking
Lotas Beckmeyer	Adams	Room improvement

24th District Farmers Discuss R. R. Rates

(Continued from page 1, col. 3.)

stone usage, as initiated by our Farm Bureaus.

"That the limestone and transportation departments of our I. A. A. co-operate with our Farm Bureaus and the lead mines of Missouri in securing the best possible rate on limestone chat from the Missouri supply for southern Illinois;

"That we recommend that the activities of the Producers' Livestock Commission Association on all Terminal markets serving Illinois be given special mention through the I. A. A. Record as to the comparative amounts of business handled by these firms at their respective markets;

"That the T. B. testing of cattle be urged at the earliest possible date throughout the counties of the 24th district;

"And be it further resolved, that this meeting go on record as favoring a continuance of these district meetings, and that we urge a more enthusiastic interest and a better attendance."

Value Of 1925 Corn Crop Is Lower Than Short Crop Of 1924

Current Corn Prices Fall Short of Paying Cost of Production, Says I. A. A. Grain Director

Notwithstanding the size of the 1925 bumper corn crop in Illinois, its cash value to the farmers who produced it is sixty million dollars less than the value of last year's poor crop, if the price which the farmers of the state are actually receiving at country elevators in November continues through the season, according to findings of Chester C. Davis, I. A. A. grain marketing director.

The statement of Director Davis points out that November 1 estimates credit Illinois with a corn crop of $394,994,000 bushels for 1925 as compared with 293,600,000 bushels in 1924. But the 1924 crop had a farm value of $278,920,000 at the December 1 price, according to the U. S. Department of Agriculture, while the price which farmers are actually receiving at country points in the state this week would yield a total of only $217,246,700 if it were all sold.

Farmers who are selling their corn are receiving from fifty to sixty cents a bushel for it, with the bulk of it going at 55 cents or less. Excessive moisture in this year's corn is the factor which is holding the country cash price below contract grade quotations.

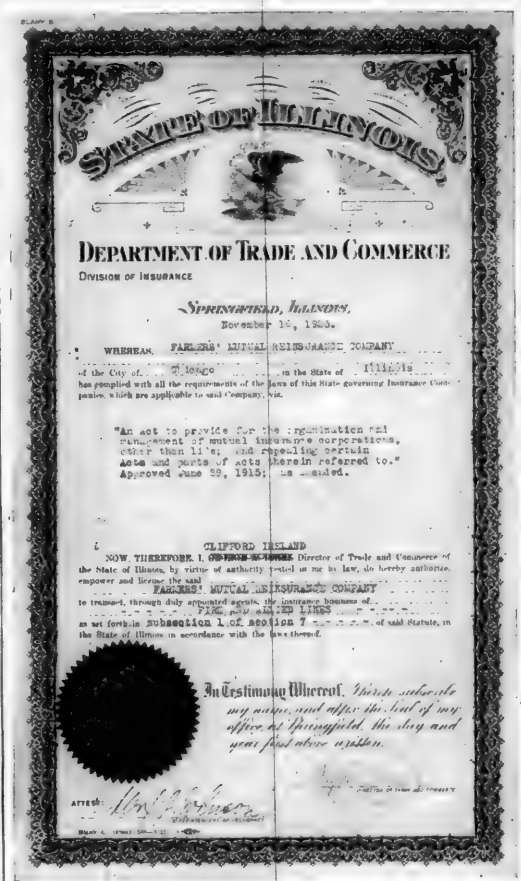
Production Costs 68 Cents

Current corn prices fall far short of paying costs of production, and entail a loss of millions to farmers of Illinois if they continue, it is pointed out. Actual cost records on a number of farms in Champaign and Piatt counties, in one of the best corn producing districts in Illinois, show a corn production cost of 68 cents per bushel for 1924 on farms having an average yield of [illegible]

If a [illegible] market rules through the season," states Director Davis, "farmers who sell their corn as their cash crop will be in much worse state than those who feed and market their corn as pork, or who buy corn to feed. Many factors enter into a calculation as to what the trend of corn prices will be this winter. Heavy discounts have ruled on the new corn crop because of excess moisture. Weather that would permit drying before the corn is marketed would help the farm price. Spoiling of cribbed corn is reported from all over the state as a result of the wet weather.

Need Way to Handle Surplus

"Farmers of Illinois are not as much interested in devices to make more credit available to enable them to hold their corn, as they are in some means to handle the surplus that follows a normal crop, so as to prevent it from breaking down prices disastrously. It is not lack of credit so much as wet corn and inadequate storage facilities that prevents farmers from holding their corn this year. The unfavorable fall, the short carry-over, and the relatively good market for hogs and best grade cattle all support the farmers' view that he ought to have a better price for corn, but no one can be certain of what the market will do."



Insurance Totaling $750,000 Placed

(Continued from page 1, col. 4.)

surance. The extension of these aids to local mutuals, it is estimated, will save Illinois farmers more than $3,000,000 annually. This estimate is reached upon consideration of the greater amounts of individual risks that the mutual companies will be able to handle and the reduction in costs and additional assessments due to exceptional losses.

Individual farmers, by responding heartily to the campaign, have made the reinsurance company an actual accomplishment and it is now up to the local and county mutuals to take advantage of the organization and gain the benefits for their respective members.

The Goal of a 25-Year-Old Ambition

STATE OF ILLINOIS,

DEPARTMENT OF TRADE AND COMMERCE

DIVISION OF INSURANCE

SPRINGFIELD, ILLINOIS,
November 18, 1925.

WHEREAS, FARMERS' MUTUAL REINSURANCE COMPANY
of the City of Chicago in the State of Illinois
has complied with all the requirements of the laws of this State governing Insurance Companies, which are applicable to said Company, viz.

"An act to provide for the organization and management of mutual insurance corporations, except farm lines, and repealing certain Acts and parts of Acts therein referred to." Approved June 29, 1915; as amended.

CLIFFORD IRELAND

NOW, THEREFORE, I, [illegible] Director of Trade and Commerce of the State of Illinois, by virtue of authority vested in me by law, do hereby authorize, empower and license the said
FARMERS' MUTUAL REINSURANCE COMPANY
to transact, through duly appointed agents, the insurance business of
FIRE, and ALLIED LINES
as set forth in Subsection 1 of Section 7 [illegible] of said Statute, in the State of Illinois in accordance with the laws thereof.

In Testimony Whereof, I [illegible] my name, and affix the seal of my office at Springfield, this day and year first above written.

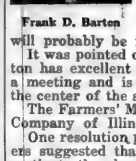
ATTEST: [illegible]

Charter of the Farmers' Mutual Reinsurance Company of Illinois granted by the state department of trade and commerce, Nov. 17. A document that opens a new and larger field of insurance to Illinois farmers and mutual farm insurance companies of this state. An acknowledged need of more than a quarter of a century accomplished through the cooperation of Farm Bureaus, mutual insurance companies of the state and Illinois Agricultural Association.

Milk From Tested Herds Pays Premium

Dairymen of the Chicago District who have tested their cattle and who sell milk to the Bowman Dairy Company, one of the biggest distributors in Chicago, are receiving a premium of twenty-five cents a hundred, beginning with December 1.

The Bowman Company, along with other Chicago distributors, have been paying $2.55 a hundred for all milk, regardless of source. The new price to farmers with tested herds is $2.75. Dairymen with untested herds will be paid only $2.50.



In addition to this penalty for not having tested herds, the company is paying only $2.10 a hundred for surplus but no milk going from herd under State and Federal Supervision will be classified as surplus, the company officials state.

This premium for T. B. free milk is a goal sought by the Farm Bureaus and the Illinois Agricultural Association for three years and now that one company has seen fit to establish a premium for the farmer who produces the higher quality and safe milk, the Illinois Agricultural Association will continue and try to get as many as possible distributors in the Chicago district to pay the premium.

Wants Next I. A. A. Convention

I. A. A. 17th District Conference Held at Bloomington, Nov. 27

Representatives of the Farm Bureaus in McLean, Ford, Livingston and Woodford counties who attended the 17th district conference, held at Bloomington, Nov. 27, passed a resolution asking the Illinois Agricultural Association to consider Bloomington as the logical place to hold its next annual convention, which will probably be in January, 1927.

Frank D. Barton

It was pointed out that Bloomington has excellent facilities for such a meeting and is ideally located in the center of the state.

The Farmers' Mutual Reinsurance Company of Illinois was endorsed.

One resolution passed by the leaders suggested that the I. A. A. investigate the plans and programs of other state farm bureau federations with the view of bettering the service rendered in Illinois.

The proposition of the Kenneth-Murry Company to lease the C. and A. yards and operate as a livestock order buyer in Bloomington, buying through commission companies, was brought up for considerable discussion. Some farmers were not so sure as to the advisability of the scheme.

Popularity of Farm Sports Growing; Big Aid to Home Morale

Mythical All-Farm Sport Team of Mid-West Composed Entirely of Illinois Bureau Members

There has been more organized farm sport in Illinois during 1925 than in any other year in the history of the state.

Only two of the five sports which were extensively participated in by the Farm Bureaus are common to both rural and city people—baseball and horseshoes pitching. The other three are distinctly farm sports. These are hog calling, chicken calling (for women) and corn husking.

The development of sports among farmers, their sons, and even their wives and daughters is regarded by President Sam H. Thompson as a splendid condition. He says that farm sports contribute much to the happiness and contentment of farm life. Anything along the lines of competition creates more interest around farm life, he says, and, furthermore, farm sports have a bearing on the problem of keeping boys and girls on the farms.

Torberts on Team

Farm sport enthusiasts, like their city cousins who are now busy selecting, re-selecting and debating over who shall be on the All-American football team, can also point to star performers in the various farm sports field.

Walter and Harry Torbert of DeWitt county, Illinois, earned a place on the mythical All-Farm sport team by throwing the most ringers and counters in the annual state farm bureau horseshoe tournament held in connection with the state picnic of the Illinois Agricultural Association August, 27 at Taylorville. Walter and Harry are 19 and 20 respectively, and are sons of Ed. Torbert, a member of the state champion team of 1920, 21, and 22. The boys defeated Reuben G. Bright and Samuel G. Smith of McLean county, champion team of 1924. About 25 county horseshoe pitching contests were held by county Farm Bureaus preliminary to the state competition.

V. E. Robison of Morton, Tazewell county, perhaps qualifies best for the quarter-back or signal-calling position of the All-Farm sports team. He proved that "whoo-o-oey, whoo-o-oey" is the most effective way to call hogs when he was declared by the two-legged judges to be the champion swine yodeler in a contest which was also held at the state farm bureau picnic. This was the first state-wide competition ever held and was the basis for a long preliminary discussion by city feature writers and editorial expounders on the merits of "poo-o-oey" or "who-o-oey," the former being the form fancied by a metropolitan newspaper as comparable to strains of opera, but one which showed the writer was not a hog caller.

Mrs. Wooley Selected Captain

Mrs. I. N. Wooley of Iuka, Marion county, won the state chicken calling contest, and since she is the only woman rating the All-Farm sports team, she should be captain.

The baseball division of the All-Farm sport team is awarded to the Tazewell County Farm Bureau aggregation, it having won the state title after an interesting season which terminated in the championship game at the state picnic. Baseball among the Farm Bureaus is conducted through the Illinois Farm Bureau Baseball league.

Elmer Williams of Toulon, Stark county, wins a prominent place on the All-Farm sports team, and is also entitled to a place on a national selection, having won both the Illinois and the Mid-West corn husking contests. On November 2 in the Montgomery county contest staged by Prairie Farmer, state farm paper, he out-shucked 19 other contestants, many of whom were winners of county contests staged by Farm Bureaus. On November 19 he Red Granged the best shuckers of Iowa, Nebraska, Minnesota and Indiana when he picked 35.9 bushels in 80 minutes in the Mid-West contest at Burgess, Mercer county, a speed equivalent to 269 bushels in 10 hours.

This stands as an official world's record—one actually established by physical, field performance in the presence of some 7,000 witnesses, whereas many higher unofficial records have been established around the stoves of country stores in the presence of hot air competitors.

The personnel of the 1925 All-Farm sports team follows:

Champion hog caller—V. E. Robison, Morton, Tazewell County Farm Bureau.

Champion chicken caller—Mrs. I. N. Wooley, Iuka, Marion County Farm Bureau.

Champion baseball team—Tazewell County Farm Bureau.

Champion husker—(Illinois and Mid-West) Elmer Williams, Toulon, Stark County Farm Bureau.

Champion horseshoe team—Walter and Harry Torbert, DeWitt County Farm Bureau.

Prizes were given by the Illinois Agricultural Association to the champions of hog and chicken calling, horseshoe and baseball. These were, for the hog calling champ, a gold miniature hog for watch chain pendant; for the chicken calling victor, a silver cream pitcher; and a silver loving cup each for the horseshoe and baseball teams. Prairie Farmer gave $100 to the winner of the state husking contest, $50 for second, $25 for third, $15 for fourth and $10 for fifth. This farm paper, in company with Wallaces' Farmer, Nebraska Farmer and The Farmer (St. Paul) gave $100 and a gold medal to the Mid-West champion, and Prairie Farmer gave $50 for the winner of second place who was Walter W. Olson of Rio, a member of the Knox County Farm Bureau.

Large Number to Attend Meeting

(Continued from page 1, col. 5.)

will discuss the program of the annual meeting of the I. A. A. to be held at the University of Illinois, Champaign-Urbana, Jan. 21 and 22. The new plan of special sectional meetings will be explained to the county executives.

Headliners on the second day's program includes:

Capper to Speak at Banquet

Twenty-minute talks on "Co-operative Cotton Marketing" by C. O. Moser, manager, American Cotton Growers' Exchange; "Livestock Marketing" by C. B. Denman, president, National Livestock Producers' Association; "Fruit and Vegetable Marketing" by A. R. Rule, manager, Federated Fruit and Vegetable Growers, Inc., New York; and, "The Farm Bureau's Opportunity in Co-operative Marketing" by Dr. E. G. Nourse, chief of agricultural division, Institute of Economics.

During the annual banquet, to be held on Tuesday evening, the principal addresses will be given by Senator Arthur Capper of Kansas and Mrs. Ivan D. Gore of Utah, authority on farm home and community work. The third day will be taken up with reports of resolution committees, election of officers, adoption of resolutions, new and unfinished business and adjournment.

Seat Requests Heavy

Demands for seat reservations to hear President Coolidge have been coming in thick and fast from Illinois farm bureau members. Officials of the American Farm Bureau Federation at first allotted 300 seats to Illinois, but this number was increased to 750 upon the urgent request of Secretary Fox, who on Dec. 1 had nearly 800 requests from county Farm Bureaus throughout the state. There are only 2600 seats in the whole hall where President Coolidge speaks and Illinois has more seats reserved than any other state. However, it seems probable that all Illinois requests will be cared for. The I. A. A. ticket booth will be open at the Sherman Hotel on Sunday and Monday morning. Members are advised to get their reserved tickets as soon as they arrive in the city. At 10:30 Monday morning the booth will be closed and all seats not called for will be given to those not holding reservations.

A DECREASE OF FROM 10 TO 15 PER CENT IN the production of hogs and cattle in Iowa this year as compared with 1924 has been reported by Knute Espe, secretary of the Federation of Live Stock Shippers.

McLEAN COUNTY FARM BUREAU HAS SECURED Henry A. Wallace, editor of Wallaces' Farmer as principal speaker for the annual meeting to be held at Bloomington, Dec. 31.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Volume 3 | Issued Every Other Saturday for 63,000 *thinking* Farmers—December 19, 1925 | No. 25

"OUR SAM" TAKES A. F. B. F. PRESIDENCY WITH HUMBLENESS

Sam Thompson "Came Up from the Ranks" Through Farm Bureau

Has Held Many Offices All the Way From Solicitor of Memberships to President of Farmers' Greatest Body.

Sam H. Thompson, newly-elected president of the American Farm Bureau Federation, has "come up from the ranks" in the farm bureau organization.

He has been a leader in his home community in Gilmer township, Adams county; president of the Adams County Farm Bureau; executive committeeman of the Illinois Agricultural Association; chairman of its legislative and finance committees; president of the Illinois Agricultural Association; director of the American Farm Bureau Federation; member of its finance committee and is now president of the national organization.

Lived on Farm 54 Years

He was born August 18, 1863, on a 40-acre farm in Gilmer township, near Quincy. He was the youngest of five children, three girls and two boys. He grew to manhood on this farm and received his education in the public schools. He joined the Methodist Episcopal church when 12 years old and always has been active in church and Sunday school work.

At the age of 26 two important events took place. He married Miss Lemmie Dickhut and the same year he bought an 80-acre farm at $75 an acre, going in debt for the entire amount. On this farm there were born to the Thompsons seven children, four boys and three girls. Five are now married and living on farms in the neighborhood of their father and grandfather. Two of the children live at home, the youngest having graduated last year at the Agricultural College of the University of Illinois.

Has 500-Acre Farm

Mr. Thompson engaged in grain and live stock farming. The 80-acre farm was paid for and adjoining land was acquired which enlarged the old home place to 500 acres. Two of the sons are now farming it under the eye of Mr. Thompson.

He was tax collector at 22 years of age. Since then he has always taken an active part in the public affairs of his neighborhood, township and county. He was commissioner for nine years and supervisor for six years. In 1916 he was elected to the 50th General Assembly of Illinois.

It was back in 1915 that Mr. Thompson got active in Farm Bureau work. He became a strong advocate for the organization of farmers. He was president of the Adams County Farm Bureau and was a charter member in the organization of the Illinois Agricultural Association in 1917. Although he had moved in to Quincy in 1918 and was elected president of the Broadway Bank of Quincy, which position he now holds, he gave considerable time in helping the Illinois Agricultural Association get on its feet. Even though a bank president, he spent weeks out in the country as a solicitor.

He became an executive committeeman of the Illinois Agricultural Association representing the 22nd congressional district, serving for three years. He was also chairman of the finance and legislative committees. Mr. Thompson also helped organize the American Farm Bureau Federation and has been, for two years, a member of its executive committee.

Mr. Thompson has had 54 years of actual farming experience. He has business experience as president of the Broadway Bank of Quincy. The deposits of that bank have doubled since he became president and in the financial depression which has hit farming communities so hard, the bank of which Mr. Thompson is president suffered no loss of any kind. In public affairs, Mr. Thompson has had wide experience, first, in his township and county affairs; second, as a public legislator in the General Assembly and third, through official position of the Illinois Agricultural Association and the American Farm Bureau Federation, where he has had direct experience in state and national agricultural problems.

President Thompson Pinning Medals on Illinois Club Winners

The University of Illinois, through Dean H. W. Mumford and E. I. Pilchard, state leader of boys' and girls' work, and the Illinois Agricultural Association gave medals to winners in club competitions when the Illinois boys and girls who were attending the International Live Stock Exposition were breakfasted by I. A. A. officials, executive committee and directors. Left to right: Sam H. Thompson; Adeline Spragg, Sangamon county, Donald Cameron, Peoria county; Dean H. W. Mumford and Forrest Weseman, Kane county.

Chef Got 'Ze Great Kick' in Cooking Co-op Luncheon for Calvin Coolidge

THOMAS MAGLIANO, a former subject of the Prince of Monoco and who learned his cooking in Monte Carlo, his native land, was the chef who supervised the cooking of the co-operative luncheon served to President Coolidge guests during the American Farm Bureau convention at Chicago last week. Three assistant chefs helped him.

Chef Magliano took great pride in cooking for the president. On two previous occasions he has prepared food for presidents, in both instances for the late Theodore Roosevelt, once in Colorado in 1901, and the other time in Arizona in 1911.

"I got ze big kick out of getting this great meal for ze President," said Senor Magliano, who is chef de caisine at the Sherman Hotel, where the convention and luncheon was held. "And deed you bear what the President he say? He say hemself it was a great luncheon. It should be—you know the quality of food was tres bon—excelente—it came from farmers themselves.

"We cooked all of it in a special kitchen apart from all food for ze regular customers of the hotel. We had nothing but new utensils. And ze secret service men! Aha. They stand around looking to see that no poison get in. They found none, I assure you. And Dr. Bundesen of the Chicago health department he send inspectors! They asked about the milk—it was good milk—I found it came from Quincy and the farmers' cows are all tested for ze tuberculosis. They say 'fine.'"

Senor Magliano has been in the United States 25 years and has become a naturalized citizen.

The Illinois Fruit Growers Exchange furnished apples for the co-op luncheon, but the Stephenson County Co-operative Cream Producers' Association is experiencing such a demand for its "Vita-Gold" butter that no cream could be spared.

Besides the luncheon to President Coolidge, a co-op luncheon was also served the next day.

Senor Thomas Magliano, the chef who cooked the co-operative luncheon for President Coolidge.

Telegrams and Letters Pile on Thompson's Desk Saying "We're With You"

"We're with you, Sam!"

That's the sentiment expressed in a big pile of telegrams and letters which tumbled onto President Thompson's desk after his election to the national presidency. One telegram was a resolution of congratulation from the Illinois State Grange which was in session at the time in Champaign-Urbana. It pledged full co-operation, as did the scores of other letters and telegrams which came from all over the country.

I. A. A. Leader Elected President of American Farm Bureau Federation for 2-Year Term Which Began Immediately

Hopes He Can Serve Humbly Enough So He Will Always Be Close to "the Folks Back On the Farms"; E. A. O'Neal of Alabama Re-elected Vice-President; Thompson Gives His Future Policy in Statement in This RECORD.

"I HOPE and trust I can serve humbly enough so I always will be close to the folks back home on the farms," fervently declared "Our Sam" Thompson in his first speech as president of the American Farm Bureau Federation before the delegates at the national organization's seventh annual meeting in Chicago last week after he had been elected, in a warm contest, to become "Our Sam" to the farm bureau farmers of the nation.

"And I want to promise you who represent the states which make up this great federation," he said, "that from now on my viewpoint is primarily a national one. As a director of the American Farm Bureau Federation I have had a splendid opportunity to see agricultural problems in a national way, and it is my duty, in co-operation with the new board of directors, to act in the best interests of all the farmers in America."

Frank D. Barton
Illinois Delegate

Three candidates were pushed by their respective backers in what developed into a three-cornered contest. They were: O. E. Bradfute of Xenia, Ohio, who has been president for three years; E. A. O'Neal of Birmingham, Alabama, vice-president during 1925 and president of the Alabama Farm Bureau Federation and Sam H. Thompson of Quincy, who has been president of the Illinois Agricultural Association during 1923-24-25 and a director of the American Farm Bureau Federation for the same period. Eight secret ballots were cast, the ninth being a vote by acclamation, upon motion by President Palmer of the Ohio Farm Bureau Federation, which was made unanimous.

Earl C. Smith
Illinois Delegate

The majority gained by Mr. Thompson on the eighth ballot. The eighth ballot stood: Mr. Thompson, 24; Mr. Bradfute 19 and Mr. O'Neal 1. Then the vote was made unanimous.

Bradfute Pledges Co-operation

E. A. O'Neal was then elected vice-president to succeed himself. President Bradfute, in addressing the delegates later, warmly bespoke the co-operation of all states for the new president and pledged himself to serve the Farm Bureau in any manner in which he could be of service.

President Thompson assumed the duties of his new office immediately. The next day, Thursday, the newly elected board of directors met in the American Farm Bureau offices, where Frank Evans, general marketing counsel and acting secretary for the past year, was re-elected, as was A. R. Simpson, treasurer. The next meeting was set for Feb. 9.

J. L. Whitesell
Illinois Delegate

Representatives of the Mid-West states elected to serve on the board

(Continued on page 4 Col 5)

After His Election Sam Was Sad Because He'd Be At Home Less

Upon learning of his townsman's election as president of the American Farm Bureau Federation, the editor of the Quincy Herald wired President Thompson for a word to the folks back home." He replied as follows:

"To my friends at home:

"After being elected president of the American Farm Bureau Federation, the distressing thought came to me as I sat at supper with a group of congratulating friends that my new duties would pull me more and more away from Quincy and the Adams county folks with whom I have lived all the years of my life. The thought made me sad.

"But with this sadness I also feel that I must assume this new responsibility as a sacred duty to American agriculture and that I can be of wider service to the farmers. In the future I hope to continue the principles which have made the Illinois Agricultural Association such a strong and useful organization.

"My prayerful hope is that I will be able to serve humbly enough to be always close to the folks on the farm and home. Sincerely,

Sam. H. Thompson."

Another County Group of Mutuals Okehs the New Reinsurance Body

"We hereby endorse the plan of the Farmers' Mutual Reinsurance Company for direct insurance, specific reinsurance, blanket reinsurance and also recession reinsurance and authorize the La Salle County Reinsurance committee to put on record our endorsement of said Farmers' Mutual Reinsurance Company."

Thus comes indorsement from another county group of farm mutuals for the new reinsurance company. La Salle county has more fire and lighting companies than any other county in the state—13. Representatives of these have met several times during the last two years studying reinsurance.

"Therefore," says Vernon Vaniman, field representative, "they are glad that a company has been organized that will cover the entire state, thereby putting their companies in a position whereby they can take care of all the insurance needs of their farmers against fire and lightning."

Many other mutuals in Illinois have endorsed the new company. Madison county recently gave it a strong indorsement.

Value Of 1925 Corn Crop Is Lower Than Short Crop Of 1924

Current Corn Prices Fall Short of Paying Cost of Production, Says I. A. A. Grain Director

Notwithstanding the size of the 1925 bumper corn crop in Illinois, its cash value to the farmers who produced it is sixty million dollars less than the value of last year's poor crop, if the price which the farmers of the state are actually receiving at country elevators in November continues through the season, according to findings of Chester C. Davis, I. A. A. grain marketing director.

The statement of Director Davis points out that November 1 estimates credit Illinois with a corn crop of 394,994,000 bushels for 1925 as compared with 293,600,000 bushels in 1924. But the 1924 crop had a farm value of $278,920,000 at the December 1 price, according to the U. S. Department of Agriculture, while the price which farmers are actually receiving at country points in the state this week would yield a total of only $217,-210,700 if it were all sold.

Farmers who are selling their corn are receiving from fifty to sixty cents a bushel for it, with the bulk of it going at 55 cents or less. Excessive moisture in this year's corn is the factor which is holding the country cash price below contract grade quotations.

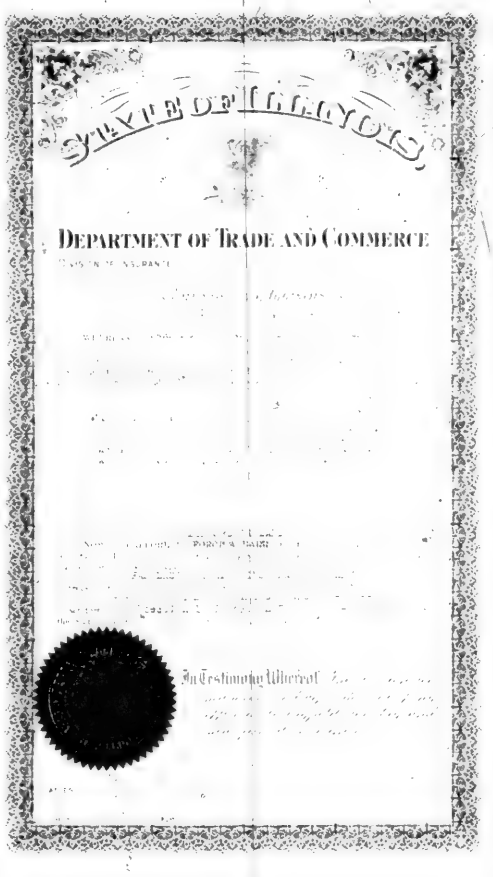
Production Cost 68 Cents

Current corn prices fall far short of paying costs of production, and entail a loss of millions to farmers of Illinois if they continue, it is pointed out. Actual cost records on a number of farms in Champaign and Piatt counties, in one of the best corn producing districts in Illinois, show a corn production cost of 68 cents per bushel for 1924 on a [illegible] basis.

[illegible] rules through the season," states Director Davis, "farmers who sell their corn as their cash crop will be in a much worse state than those who feed and market their corn as pork, or who buy corn to feed. Many factors enter into a calculation as to what the trend of corn prices will be this winter. Heavy discounts have ruled on the new corn crop because of excess moisture. Weather that would permit drying before the corn is marketed would help the farm price. Spoiling of cribbed corn is reported from all over the state as a result of the wet weather.

Need Way to Handle Surplus

"Farmers of Illinois are not as much interested in devices to make more credit available to enable them to hold their corn, as they are in some means to handle the surplus that follows a normal crop, so as to prevent it from breaking down prices disastrously. It is not lack of credit so much as wet corn and inadequate storage facilities that prevents farmers from holding their corn this year. The unfavorable fall, the short carry-over, and the relatively good market for hogs and best grade cattle all support the farmers' view that he ought to have a better price for corn, but no one is certain of what the market will be."



Insurance Totaling $750,000 Placed

(Continued from page 1, col. 4.)

[illegible]ance. The extension of these [illegible] to local mutuals, it is estimated, will save Illinois farmers more than $1,000,000 annually. This estimate is reached upon consideration of the greater amounts of individual risks that the mutual companies will be able to handle and the reduction in costs and additional assessments due to exceptional losses.

Individual farmers, by responding heartily to the campaign, have made the reinsurance company an actual accomplishment and it is now up to the local and county mutuals to take advantage of the organization and gain the benefits for their respective members.

The Goal of a 25-Year-Old Ambition

Charter of the Farmers' Mutual Reinsurance Company of Illinois granted by the state department of trade and commerce, Nov. 17. A document that opens a new and larger field of insurance to Illinois farmers and mutual farm insurance companies of this state. An acknowledged need of more than a quarter of a century accomplished through the co-operation of Farm Bureaus, mutual insurance companies of the state and Illinois Agricultural Association.

Milk From Tested Herds Pays Premium

Dairymen of the Chicago District who have tested their cattle and who sell milk to the Bowman Dairy Company, one of the biggest distributors in Chicago, are receiving a premium of twenty-five cents a hundred, beginning with December 1.

The Bowman Company, along with other Chicago distributors, have been paying $2.55 a hundred for all milk, regardless of source. The new price to farmers with tested herds is $2.75. Dairymen with untested herds will be paid only $2.50.

In addition to this penalty for not having tested herds, the company is paying only $2.10 a hundred for surplus but no milk going from herd under State and Federal Supervision will be classified as surplus, the company officials state.

This premium for T. B. free milk is a goal sought by the Farm Bureaus and the Illinois Agricultural Association for three years and now that one company has seen fit to establish a premium for the farmer who produces the higher quality and safe milk, the Illinois Agricultural Association will continue and try to get as many as possible distributors in the Chicago district to pay the premium.

Wants Next I. A. A. Convention

I. A. A. 17th District Conference Held at Bloomington, Nov. 27

Representatives of the Farm Bureaus in McLean, Ford, Livingston and Woodford counties who attended the 17th district conference, held at Bloomington, Nov. 27, passed a resolution asking the Illinois Agricultural Association to consider Bloomington as the logical place to hold its next annual convention, which will probably be in January, 1927.

Frank D. Barton

It was pointed out that Bloomington has excellent facilities for such a meeting and is ideally located in the center of the state.

The Farmers' Mutual Reinsurance Company of Illinois was endorsed.

One resolution passed by the leaders suggested that the I. A. A. investigate the plans and programs of other state farm bureau federations with the view of bettering the service rendered in Illinois.

The proposition of the Kenneth-Murry Company to lease the C. and A. yards and operate as a livestock order buyer in Bloomington, buying through commission companies, was brought up for considerable discussion. Some farmers were not so sure as to the advisability of the scheme.

Popularity of Farm Sports Growing; Big Aid to Home Morale

Mythical All-Farm Sport Team of Mid-West Composed Entirely of Illinois Bureau Members

There has been more organized farm sport in Illinois during 1925 than in any other year in the history of the state.

Only two of the five sports which were extensively participated in by the Farm Bureaus are common to both rural and city people—baseball and horseshoes pitching. The other three are distinctly farm sports. These are hog calling, chicken calling (for women) and corn husking.

The development of sports among farmers, their sons, and even their wives and daughters is regarded by President Sam H. Thompson as a splendid condition. He says that farm sports contribute much to the happiness and contentment of farm life. Anything along the lines of competition creates more interest around farm life, he says, and, furthermore, farm sports have a bearing on the problem of keeping boys and girls on the farms.

Torberts on Team

Farm sport enthusiasts, like their city cousins who are now busy selecting, reselecting and debating over who shall be on the All-American football team, can also point to star performers in the various farm sports field.

Walter and Harry Torbert of DeWitt county, Illinois, earned a place on the mythical All-Farm sport team by throwing the most ringers and counters in the annual state farm bureau horseshoe tournament held in connection with the state picnic of the Illinois Agricultural Association August, 27 at Taylorville. Walter and Harry are 19 and 20 respectively, and are sons of Ed. Torbert, a member of the state champion team of 1920, 21, and 22. The boys defeated Reuben G. Bright and Samuel G. Smith of McLean county, champion team of 1924. About 25 county horseshoe pitching contests were held by county Farm Bureaus preliminary to the state competition.

V. E. Robison of Morton, Tazewell county, perhaps qualifies best for the quarter-back or signal-calling position of the All-Farm sports team. He proved that "whoo-o-oey, whoo-o-oey" is the most effective way to call hogs when he was declared by the two-legged judges to be the champion swine yodeler in a contest which was also held at the state farm bureau picnic. This was the first state-wide competition ever held and was the basis for a long preliminary discussion by city feature writers and editorial expounders on the merits of "poo-o-oey" or "whoo-o-oey," the former being the form adopted by a metropolitan newspaper as comparable to strains of opera, but one which showed the writer was not a hog caller.

Mrs. Wooley Selected Captain

Mrs. I. N. Wooley of Iuka, Marion county, won the state chicken calling contest, and since she is the only woman rating the All-Farm sports team, she should be captain.

The baseball division of the All-Farm sport team is awarded to the Tazewell County Farm Bureau aggregation, it having won the state title after an interesting season which terminated in the championship game at the state picnic. Baseball among the Farm Bureaus is conducted through the Illinois Farm Bureau Baseball league.

Elmer Williams of Toulon, Stark county, wins a prominent place on the All-Farm sports team, and is also entitled to a place on a national selection, having won both the Illinois and the Mid-West corn husking contests. On November 2 in the Montgomery county contest staged by Prairie Farmer, state farm paper, he out-shucked 19 other contestants, many of whom were winners of county contests staged by Farm Bureaus. On November 19 he Red Granged the best shuckers of Iowa, Nebraska, Minnesota and Indiana when he picked 35.9 bushels in 80 minutes in the Mid-West contest at Burgess, Mercer county, a speed equivalent to 269 bushels in 10 hours.

This stands as an official world's record and actually established by physical field performance in the presence of some 7,000 witnesses, whereas many higher unofficial records have been established around the stores of country stores in the presence of hot air competitors.

The personnel of the 1925 All-Farm sports team follows:

Champion hog caller—V. E. Robison, Morton, Tazewell County Farm Bureau.

Champion chicken caller—Mrs. I. N. Wooley, Iuka, Marion County Farm Bureau.

Champion baseball team—Tazewell County Farm Bureau.

Champion husker—(Illinois and Mid-West) Elmer Williams, Toulon, Stark County Farm Bureau.

Champion horseshoe team—Walter and Harry Torbert, DeWitt County Farm Bureau.

Prizes were given by the Illinois Agricultural Association to the champions of hog and chicken calling, horseshoe and baseball. These were, for the hog calling champ, a gold miniature hog for watch chain pendant; for the chicken calling victor, a silver cream pitcher; and a silver loving cup each for the horseshoe and baseball teams. Prairie Farmer gave $100 to the winner of the state husking contest, $50 for second, $25 for third, $15 for fourth and $10 for fifth. This farm paper, in company with Wallaces' Farmer, Nebraska Farmer and The Farmer (St. Paul) gave $100 and a gold medal to the Mid-West champion, and Prairie Farmer gave $50 for the winner of second place who was Walter W. Olson of Rio, a member of the Knox County Farm Bureau.

Large Number to Attend Meeting

(Continued from page 1, col. 5.)

will discuss the program of the annual meeting of the I. A. A. to be held at the University of Illinois, Champaign-Urbana, Jan. 21 and 22. The new plan of special sectional meetings will be explained to the county executives.

Headliners on the second day's program includes:

Demonstration by Club Boys Harold Rubiger and Geo. Bohnstin, Bureau county, state championship team of Illinois.

Capper to Speak at Banquet

Twenty-minute talks on "Co-operative Cotton Marketing" by C. O. Moser, manager, American Cotton Growers' Exchange; "Livestock Marketing" by C. B. Denman, president, National Livestock Producers' Association; "Fruit and Vegetable Marketing" by A. B. Rule, manager, Federated Fruit and Vegetable Growers, Inc., New York; and, "The Farm Bureau's Opportunity in Co-operative Marketing" by Dr. E. G. Nourse, chief of agricultural division, Institute of Economics.

During the annual Banquet, to be held on Tuesday evening, the principal addresses will be given by Senator Arthur Capper of Kansas and Mrs. Ivan D. Gore of Utah, authority on farm home and community work. The third day will be taken up with reports of resolution committees, election of officers, adoption of resolutions, new and unfinished business and adjournment.

Seat Requests Heavy

Demands for seat reservations to hear President Coolidge have been coming in thick and fast from Illinois farm bureau members. Officials of the American Farm Bureau Federation at first allotted 300 seats to Illinois, but this number was increased to 750 upon the urgent request of Secretary Fox, who on Dec. 1 had nearly 800 requests from county Farm Bureaus throughout the state. There are only 2600 seats in the whole hall where President Coolidge speaks and Illinois has more seats reserved than any other state. However, it seems probable that all Illinois requests will be cared for. The I. A. A. ticket booth will be open at the Sherman Hotel on Sunday and Monday morning. Members are advised to get their reserved tickets as soon as they arrive in the city. At 10:30 Monday morning the booth will be closed and all seats not called for will be given to those not holding reservations.

A DECREASE OF FROM 10 TO 15 PER CENT IN the production of hogs and cattle in Iowa this year as compared with 1924 has been reported by Knute Lister, secretary of the Federation of Live Stock Shippers.

MCLEAN COUNTY FARM BUREAU HAS SECURED Henry A. Wallace, editor of Wallaces' Farmer as principal speaker for the annual meeting to be held at Bloomington, Dec. 31.

ILLINOIS AGRICULTURAL ASSOC RECORD

Volume 3 | Issued Every Other Saturday for 63,000 *thinking* Farmers—December 19, 1925 | No. 25

"OUR SAM" TAKES A. F. B. F. PRESIDENCY WITH HUMBLENESS

Sam Thompson "Came Up from the Ranks" Through Farm Bureau

Has Held Many Offices All the Way From Solicitor of Memberships to President of Farmers' Greatest Body.

Sam H. Thompson, newly-elected president of the American Farm Bureau Federation, has "come up from the ranks" in the farm bureau organization.

He has been a leader in his home community in Gilmer township, Adams county; president of the Adams County Farm Bureau; executive committeeman of the Illinois Agricultural Association; chairman of its legislative and finance committees; president of the Illinois Agricultural Association; director of the American Farm Bureau Federation; member of its finance committee and is now president of the national organization.

Lived on Farm 54 Years

He was born August 18, 1865, on a 40-acre farm in Gilmer township, near Quincy. He was the youngest of five children, three girls and two boys. He grew to manhood on this farm and received his education in the public schools. He joined the Methodist Episcopal church when 12 years old and always has been active in church and Sunday school work.

At the age of 26 two important events took place. He married Miss Lemmie Dickhut and the same year he bought an 80-acre farm at $75 an acre, going in debt for the entire amount. On this farm there were born to the Thompsons seven children, four boys and three girls. Five are now married and living on farms in the neighborhood of their father and grandfather. Two of the children live at home, the youngest having graduated last year at the Agricultural College of the University of Illinois.

Has 500-Acre Farm

Mr. Thompson engaged in grain and live stock farming. The 80-acre farm was paid for and adjoining land was acquired which enlarged the old home place to 500 acres. Two of the sons are now farming it under the eye of Mr. Thompson.

He was tax collector at 22 years of age. Since then he has always taken an active part in the public affairs of his neighborhood, township and county. He was commissioner for nine years and supervisor for six years. In 1916 he was elected to the 50th General Assembly of Illinois.

It was back in 1915 that Mr. Thompson got active in Farm Bureau work. He became a strong advocate for the organization of farmers. He was president of the Adams County Farm Bureau and was a charter member in the organization of the Illinois Agricultural Association in 1917. Although he had moved in to Quincy in 1918 and was elected president of the Broadway Bank of Quincy, which position he now holds, he gave considerable time in helping the Illinois Agricultural Association get on its feet. Even though a bank president, he spent weeks out in the country as a soliciter.

He became an executive committeeman of the Illinois Agricultural Association representing the 22nd congressional district, serving for three years. He was also chairman of the finance and legislative committees. Mr. Thompson also helped organize the American Farm Bureau Federation and has been, for two years, a member of its executive committee.

Mr. Thompson has had 54 years of actual farming experience. He has business experience as president of the Broadway Bank of Quincy. The deposits of that bank have doubled since he became president and in the financial depression which has hit farming communities so hard, the bank of which Mr. Thompson is president suffered no loss of any kind. In public affairs, Mr. Thompson has had wide experience, first, in his township and county affairs; second, as a public legislator in the General Assembly and third, through official position of the Illinois Agricultural Association and the American Farm Bureau Federation, where he has had direct experience in state and national agricultural problems.

President Thompson Pinning Medals on Illinois Club Winners

The University of Illinois, through Dean H. W. Mumford and E. I. Pilchard, state leader of boys' and girls' work, and the Illinois Agricultural Association gave medals to winners in club competitions when the Illinois boys and girls who were attending the International Live Stock Exposition were breakfasted by I. A. A. officials, executive committee and directors. Left to right: Sam H. Thompson; Adeline Spragg, Sangamon county, Donald Cameron, Peoria county; Dean H. W. Mumford and Forrest Weseman, Kane county.

Chef Got 'Ze Great Kick' in Cooking Co-op Luncheon for Calvin Coolidge

THOMAS MAGLIANO, a former subject of the Prince of Monoco and who learned his cooking in Monte Carlo, his native land, was the chef who supervised the cooking of the co-operative luncheon served to President Coolidge and guests during the American Farm Bureau convention at Chicago last week. Three assistant chefs helped him.

Chef Magliano took great pride in cooking for the president. On two previous occasions he has prepared food for presidents, in both instances for the late Theodore Roosevelt, once in Colorado in 1901, and the other time in Arizona in 1911.

"I got ze big kick out of getting this great meal for ze President," said Senor Magliano, who is chef de cuisine at the Sherman Hotel, where the convention and luncheon was held. "And deed you hear what the President he say? He say himself it was a great luncheon. It should be—you know the quality of food was tres bon—excellente—it came from farmers themselves.

"We cooked all of it in a special kitchen apart from all food for ze regular customers of the hotel. We had nothing but new utensils. And ze secret service men! Aha. They stand around looking to see that no poison get in. They found none, I assure you. And Dr. Bundesen of the Chicago health department he send inspectors! They asked about the milk—it was good milk—I found it came from Quincy and the farmers' cows are all tested for ze tuberculosis. They say 'fine.'"

Senor Magliano has been in the United States 25 years and has become a naturalized citizen.

The Illinois Fruit Growers Exchange furnished apples for the co-op luncheon, but the Stephenson County Co-operative Cream Producers' Association is experiencing such a demand for its "Vitas Gold" butter that no cream could be spared.

Besides the luncheon to President Coolidge, a co-op luncheon was also served the next day.

Senor Thomas Magliano, the chef who cooked the co-operative luncheon for President Coolidge.

Telegrams and Letters Pile on Thompson's Desk Saying "We're With You"

"We're with you, Sam!"

That's the sentiment expressed in a big pile of telegrams and letters which tumbled onto President Thompson's desk after his election to the national presidency. One telegram was a resolution of congratulation from the Illinois State Grange which was in session at the time in Champaign-Urbana. It pledged full co-operation, as did the scores of other letters and telegrams which came from all over the country.

I. A. A. Leader Elected President of American Farm Bureau Federation for 2-Year Term Which Began Immediately

Hopes He Can Serve Humbly Enough So He Will Always Be Close to "the Folks Back On the Farms"; E. A. O'Neal of Alabama Re-elected Vice-President; Thompson Gives His Future Policy in Statement in This RECORD.

"I HOPE and trust I can serve humbly enough so I always will be close to the folks back home on the farms," fervently declared "Our Sam" Thompson in his first speech as president of the American Farm Bureau Federation before the delegates at the national organization's seventh annual meeting in Chicago last week after he had been elected, in a warm contest, to become "Our Sam" to the farm bureau farmers of the nation.

"And I want to promise you who represent the states which make up this great federation," he said, "that from now on my viewpoint is primarily a national one. As a director of the American Farm Bureau Federation I have had a splendid opportunity to see agricultural problems in a national way, and it is my duty, in co-operation with the new board of directors, to act in the best interests of the farmers in America."

Three candidates were picked by their respective locals and developed into a three-cornered contest. They were: O. L. Bradfute of Xenia, Ohio, who has been president for three years; E. A. O'Neal of Birmingham, Alabama, vice-president during 1925 and president of the Alabama Farm Bureau Federation and Sam H. Thompson of Illinois, who has been president of the Illinois Agricultural Association during 1923-24-25 and a director of the American Farm Bureau Federation for the same period. Eight secret ballots were cast, the ninth being a vote by acclamation, upon motion by President Palmer of the Ohio Farm Bureau Federation, which was made unanimous the majority gained by Mr. Thompson on the eighth ballot. The eighth ballot stood: Mr. Thompson, 24; Mr. Bradfute 19 and Mr. O'Neal 1. Then the vote was made unanimous.

Earl C. Smith
Illinois Delegate

Bradfute Pledges Co-operation

E. A. O'Neal was [illegible] vice-president to succeed himself. President Bradfute in addressing the delegates later, warmly bespoke the co-operation of all states for the new president and pledged himself to serve the Farm Bureau in any manner in which he could be of service.

President Thompson assumed the duties of his new office immediately. The next day, Thursday, the newly elected board of directors met in the American Farm Bureau offices, which Frank Evans, general marketing counsel and acting secretary for the past year, was re-elected, as was A. R. Simpson, treasurer. The next meeting was set for Feb. 9.

Representatives of the Mid-West states elected to serve on the board

J. L. Whisnand
Illinois Delegate

After His Election Sam Was Sad Because He'd Be At Home Less

Upon learning of his townsman's election as president of the American Farm Bureau Federation, the editor of the Quincy Herald wired President Thompson for a "word to the folks back home." He replied as follows:

"To my friends at home:

"After being elected president of the American Farm Bureau Federation, the distressing thought came to me as I sat at supper with a group of congratulating friends that my new duties would pull me more and more away from Quincy and the Adams county folks with whom I have lived all the years of my life. The thought made me sad.

"But with this sadness I also felt that I must assume this new responsibility as a sacred duty to [illegible] agriculture and that I could render wider service to the farmers. In the future I hope to continue the principles which have made the Illinois Agricultural Association such a strong and useful organization.

"My prayerful hope is that I will be able to serve humbly enough to be always close to the folks on the farm and home. Sincerely,

Sam. H. Thompson."

Another County Group of Mutuals Okehs the New Reinsurance Body

"We hereby endorse the plan of the Farmers' Mutual Reinsurance Company for direct insurance, specific insurance, blanket reinsurance and also reinsurance and authorize the La Salle County Reinsurance Committee to put on record and endorse said Farmers' Mutual Reinsurance Company."

Thus comes indorsement from another county group of farm mutuals for the new reinsurance company. La Salle county has more fire and lightning companies than any other county in the state—265. Representatives of those have met several times during the past two years studying reinsurance.

"Therefore," says Vernon Vanaman, field representative, "they are glad that a company has been organized that will cover the entire state, thereby putting their companies in a position whereby they can take care of all the insurance needs of their farmers against fire and lightning."

Many other mutuals in Illinois have endorsed the new company. Madison county recently gave it a strong indorsement.

EXECUTIVE COMMITTEE
(By Congressional Districts.)

1st to 11th ..... William Webb, Route One, Joliet
12th ..... G. F. Tullock, Rockford
13th ..... C. E. Bamborough, Polo
14th ..... W. H. Moody, Port Byron
15th ..... B. H. Taylor, Rapatee
16th ..... A. R. Wright, Varna
17th ..... F. D. Barton, Cornell
18th ..... R. F. Kerr, Iroquois
19th ..... J. L. Whisenand, Charleston
20th ..... Earl C. Smith, Detroit
21st ..... Samuel Sorrells, Raymond
22nd ..... Stanly Castle, Alton
23rd ..... W. L. Cope, Salem

Phosphate-Limestone ..... J. R. Bent
Poultry and Egg Marketing ..... F. A. Gougler
Taxation and Statistics ..... J. C. Watson
Transportation ..... L. J. Quasey

Published every other Saturday at 404 North Wesley Ave., Mount Morris, Illinois, by the Illinois Agricultural Association. Edited by Department of Information, Harry C. Butcher, Director, 608 South Dearborn Street, Chicago, Illinois. Entered as second-class matter October 20, 1925 at the post office at Mount Morris, Illinois, under the Act of March 3, 1879, as a bi-weekly. Acceptance for mailing at special rate of postage provided for in Section 412, Act of February 28, 1925, authorized October 27, 1925. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association RECORD. Postmaster: In returning an uncalled for or missent copy, please indicate key number on address as is required by law.

A Changing Attitude?

THE first beneficial result of the election of officers of the American Farm Bureau Federation is the partial change of attitude of the general public and the city press toward the whole agricultural problem. Many people and interests have had it brought to their senses, through events occurring during the A. F. B. F. annual meeting, that there is much more to the agricultural problem than what they have liberally labelled as chronic wails. A reflection of this change of attitude is shown by the editorial, "The Farmers' Just Complaint," which appeared in the Chicago Tribune, Dec. 11:

"Mr. Coolidge came out to Chicago the other day to address the American Farm Bureau federation, at the invitation of O. E. Bradfute, its president. The farmers heard Mr. Coolidge, and apparently were not much impressed by his proposals for improving their lot. They took the first opportunity to show their displeasure by refusing to reelect Mr. Bradfute, who had held office for three terms. Instead they chose S. H. Thompson, whose criticism of agricultural policies laid down by the President was most outspoken.

"We think it would be a grave error to attempt to minimize the incident. It shows clearly that an influential section of the agricultural community in this country is dissatisfied and insistent upon governmental help in fixing prices of crops. The idea takes form in a number of proposals for more or less direct subsidies, which the President attacked with vigor, offering substitutes. The delegates heard him and were unconvinced. It is, perhaps, not an overstatement to say that many of them cared so little for remedies he proposed as to be indifferent to their success or failure in congress.

[illegible]ation may become a critical one for the President and his party. Agriculture is underpaid in this country today, and the farmers know it. They are not [illegible] to accept whatever fate may offer them. They have been airing their difficulties and asking for remedies ever since the post-war deflation. They have received higher tariffs on farm products and a somewhat improved credit machinery, but these measures apparently have failed to do all that was hoped of them.

"There has been little sympathetic understanding in the east of the farmers' troubles. There seldom has been. Generally speaking, the east does nothing until the farmers, goaded to desperation, demand some unsound measure of direct relief, such as free silver or greenbacks, whereupon the industrial and financial interests unite in saying no. The east has frequently defeated the farmers' program and offered no substitute. It is time the business interests of the country, and particularly those of this section, realized that the prosperity of the farmers is a matter of direct concern to city dwellers. If there is no prosperity on the farms there can be no prosperity in the cities.

"All this does not mean that congress should accept whatever the farmers propose and turn it into law. That would be as unwise as it would be to adopt every proposal made by manufacturers in their own interest. The alternative, however, is not inactivity. Looking at the farm question as we do, from the center of the nation's most productive farming district, we conclude that congress has been neglectful of its duty. The men on the land will not be content any longer with a sop, and they ought not to be. If congress disapproves of the farmers' own remedies it must come forward with something constructive to take their place."

We Never Asked For Subsidy

THE Chicago Daily Drovers Journal in captious comment upon the resolution adopted by the American Farm Bureau Federation, asking that agriculture be given a place of equality with other interests in the American protective system through legislation directed at the problem of the surplus, seems to find great significance in the closing phrase "not involving government subsidy."

The RECORD is glad this point has been raised, since it gives opportunity to drive home the point that neither the Illinois Agricultural Association nor the American Farm Bureau Federation ever asked for legislation involving direct government subsidy.

Contrary to the misrepresentations circulated by some of its opponents, the McNary-Haugen bill did not call for a government subsidy as that term is understood. The public understands a government subsidy to mean financial payment out of the public treasury for the benefit of some particular group or class. The McNary-Haugen bill provided for a government loan, to be repaid out of the proceeds of an equalization fee or tax paid by the farmers themselves, on the commodities directly benefited in price by the operation of the corporation which the bill proposed to create.

What the farmers want is enabling legislation to put them in position to handle the surplus in the interest of a stabilized, American price, not fixed, as far as the home market is concerned, by the low costs of production in other countries.

This is entirely in harmony with the resolution, and the Drovers Journal's glee over the words "not involving government subsidy," lacks point.

It carries its comment further to say that advocates of the McNary-Haugen bill never answered the question of how production could be limited if it were made profitable. The Journal's very statement implies its own answer since it shows that what the Journal is arguing against is not the McNary-Haugen bill, or any legislation aimed at control of the surplus, but a profitable price for farm production. Obviously, the farmers' response to a profitable price level would be the same in all cases, whether that price resulted from voluntary reduction of acreage, an act of God, or the segregation of the surplus as provided under the McNary-Haugen bill.

As a matter of fact, farmers rob their land, and work themselves and their families longer hours than they otherwise would when farm prices are generally low in order to meet their fixed charges.

Where The A. F. B. F. Stands

THERE were about 5,000 words of resolutions passed by the delegates at the seventh annual meeting of the American Farm Bureau. To print them in full would require most of the space of this RECORD, consequently they have been boiled down to give only the gist. Copies of the official resolutions may be obtained by writing the information department of the A. F. B. F. The resolution of most interest to Illinois members follows in full:

We endorse the enactment of a federal law based on the principle of a farmers' export corporation, providing for the creation of an agency with broad powers for the purpose of so handling the surplus of farm crops that the American producer may receive an American price in the domestic market and we instruct our officers and representatives to work for the early enactment of such a law founded upon sound economic policy and not involving government subsidy.

Other official pronouncements of the American Farm Bureau Federation are:

Approves and endorses the proposed amendment to the Federal Revenue Act of 1924 making effective the exemption of agricultural co-operative marketing associations from the payment of income tax and the filing of annual returns. (The I. A. A. has been particularly interested in obtaining this exemption.)

Confirms previous resolutions in favor of deep channel waterways from the Great Lakes to the Atlantic Ocean, as well as general improvement of navigation and power conditions as might be brought out in a survey made by the chief engineers of the United States Army.

Approves of the services now being rendered by the government under the Merchant Marine Act of 1920 which provides for the development of shipping lines to a paying basis and then selling them to citizens of the United States to be operated under the American flag and under a guarantee of continued service.

Endorses the McNary-Woodruff bill authorizing the appropriation of $3,000,000 a year for five years and $5,000,000 a year for the succeeding five years for purchasing national forest lands and urges its early passage by Congress.

Urges the complete construction and disposition of Muscle Shoals for the utilization of the largest portion of the hydro-electric power to manufacture concentrated nitrogen fertilizers with a farmer board to pass upon the cost of production, distribution and profit, assuring low cost to farmers.

Petitions Congress to continue the co-operation with the states in constructing roads as rapidly as the economic conditions of the country will permit.

Summarized its position on federal taxation by suggesting that the new revenue law, now before Congress, include the following points: (a) tax, at proper rates, undistributed profits of corporations; (b) tax stock dividends; (c) sharply curtail nuisance taxes, particularly on auto accessories, autos, trucks and forms of sales tax found to be generally objectionable; (d) federal government should stay in the inheritance and estate tax field; (e) opposition to the abolition of the gift tax; (f) tax no incomes under $5,000; (g) reduction in normal tax rates as the total reduction decided upon will permit; (h) retain capital stock tax; (i) increase personal exemption and decrease tax rate; (j) remove restriction of states to tax national banks; (k) retain differential in favor of earned income.

Recommends immediate congressional action on the Vestal Standard Container bill which would eliminate hundreds of odd-sized and unnecessary off-standard containers of fruits and vegetables.

Demands that the administration of the national forest should continue with the Secretary of Agriculture and regulation of grazing privileges should not be placed elsewhere.

Requests that the tariff commission make a study of the cost of frozen eggs, meats and dried eggs in this country and in China with the view of increasing the tariff the full 50% allowed under the flexible provisions of the tariff law.

Requests Congress to readjust postal rates to approximately the 1924 level, to take positive steps toward safeguarding the parcel post system, and to effect a reorganization of the postal service with a view to greater economy and efficiency.

Requests Congress to enact legislation preventing the importation into the United States non-adapted and worthless Italian red clover and alfalfa seed, and of Argentinian, Arabian, South African and other seed from regions of mild climate, as well as a law authorizing the Secretary of Agriculture to stain by some non-injurious method all imported red clover and alfalfa seed excepting Canadian-grown.

Petitions the United States Department of Agriculture and the extension service departments of the land grant colleges of this country to instruct their employees, agents and teachers to lend their influence and support in teaching the principles and practices of co-operative marketing and assisting existing co-operative associations in their operation policies and membership relations.

Calls attention to the need for unbiased livestock market news service from the cities of Detroit, Indianapolis, Pittsburgh, Cincinnati and Buffalo similar to that given from other cities by the U. S. D. A. and petitions Congress to include this item in the appropriation for the Department of Agriculture.

Reminds the state Farm Bureaus that the question of an amendment to the Federal constitution which would grant power to Congress to limit, regulate and prohibit the labor of persons under 18 years of age is still before the states for ratification. The American Farm Bureau unsuccessfully opposed this measure in Congress and asks state Farm Bureaus to be on watch in their respective states to defeat renewals of attempts to get state ratifications.

Asks that Congress consider favorably the Capper-French bill, known as the truth-in-fabric measure, requiring the labeling of woolen goods so as to show the amount of virgin wool, shoddy, or re-worked wool, cotton, silk or other fibers which they contain.

Recommends the creation in the Department of Agriculture a division of co-operative marketing that will assist in an educational way the farm co-operative marketing associations in this country.

Recommends as a part of the A. F. B. F. work of 1926 the study of co-operative insurance as it relates to life, indemnity, fire, automobile and liability and to submit the findings to the member states for consideration.

Endorses the proposal for a National Agricultural Day.

Endorses the principles of protection against introduction of foreign pests and diseases through quarantines as provided by present laws and asks the Secretary of Agriculture to do all in his power to maintain the effectiveness of such protective laws.

Suggests the appointment of a permanent committee on boys' and girls' club work in the A. F. B. F., including representatives from the National Home and Community committee, and that proper action be taken to secure more club leaders.

Recommends the appointment of a farm woman leader to be placed in charge of home and community work in the department of organization of the A. F. B. F. and that adequate money be set aside in the budget of the national organization to carry on the work.

Demands that the railroad rates on agricultural products, including livestock, be restored to what they were prior to the World War and that A. F. B. F. stand opposed to the five per cent increase in freight rates now being asked by western carriers.

PRESIDENT COOLIDGE ADDRESSES FARM BUREAU MEMBERS

Senator Capper Says Congress Must Aid in Farm Surplus Problem

National Authorities Speak Before Delegates at American Farm Bureau Federation Convention.

FOR the first time in the history of farm organizations, in fact for the first time in the history of this country, the Chief Executive of the United States made a special trip of 2000 miles to greet and address a meeting of America's farmers.

On Monday, Dec. 7, at exactly 11 o'clock President Coolidge, accompanied by Mrs. Coolidge, O. E. Bradfute, president and E. A. O'Neal, vice-president of the American Farm Bureau Federation, entered the ball room of the Sherman hotel where he addressed nearly 4,000 farmers representing approximately all the states of the Union, over a thousand of whom were from Illinois.

Fifty newspaper and motion picture cameramen were crowded around the speaker's platform. Four microphones were arranged to broadcast the message to the farm people of the United States who could not attend. Two telegraph instruments ticked out the story to thousands of newspapers in all corners of the land. On the platform were also Governor Small, Mayor Dever of Chicago, Everett Sanders, secretary to the President, military aides and secret service men.

Slaps McNary-Haugen as Unsound

President Coolidge predicted that, in spite of past and present adversities, agriculture as a whole will lead industry in future prosperity. Assailing legislative proposals savoring of paternalism, he promised to approve any agricultural relief plan "devised in accordance with sound economic principles."

"I propose," he added, "actively and energetically to assist the farmers to promote their welfare through co-operative marketing."

He opposed tampering with the tariff with any intention of aiding the farmers, and condemned proposals which would bring the government into the field of buying and selling farm products, or of fixing prices.

To Assist Co-operative Marketing

The President's audience listened attentively to the address, which he read with few gestures. Only a half-dozen times was he interrupted by applause. His defense of the tariff as an aid to agriculture and his arraignment of proposals that the government engage in the marketing of farm products or in price fixing direct or indirect were greeted with silence.

With an assurance that his administration will assist farmers in disposing of their products and providing better storage facilities and credit, the President expressed the view that agriculture could thus be placed "on a sound and independent business basis."

"To have agriculture worth anything, it must rest on an independent business basis," he added, "it cannot at the same time be part private business and part government business. I believe the government ought to give it every assistance, but it ought to leave it as the support, the benefit and the business of the people."

Opposes Direct or Indirect Price-Fixing

The President launched into an attack of proposals that the government engage in buying and selling of farm produce and direct or indirect price fixing with the following observations:

"This would be a dangerous undertaking, and as the emergency is not so acute, it seems at present to have lost much of its support. No matter how it is disguised, the moment the government engages in buying and selling, by that act it is fixing prices.

"Moreover, it would apparently destroy co-operative associations and all other marketing machinery, for no one can compete with the government. Ultimately it would end the independence which the farmers of this country enjoy as a result of centuries of struggle and prevent the exercise of their own judgment and control in cultivating their land and marketing their produce.

"Government control cannot be divorced from politicsl control. The overwhelming interest of the consumer, not the smaller interest of the producer, would be sure to dominate in the end."

Co-operatives Promise Greatest Success

Referring to the co-operative movement as the most important development of late years in the agricultural field, and emphasising the crop surplus problem as a vexing factor in the farm price situation, Coolidge expressed the opinion that with the economic information furnished by the Department of Agriculture, with better warehouses and storage facilities and a better credit structure much can be done to take care of the ordinary surplus.

"The leaders in the co-operative movement with the advice of the Department of Agriculture have prepared what is believed to be an adequate bill embodying these principles, which will be presented to the Congress for enactment.

"For a more orderly marketing calculated to secure a better range of prices the co-operative movement promises the greatest success. Already they are handling $2,500,000,000 of farm produce, or nearly one-fifth of the annual production.

Points to Tariff as Assisting Farmers

"The initiative of the farmers themselves, with such assistance as can be given by the government without assuming responsibility for business management through financing and through the co-operative movement, would appear to be a wise method of solving this problem. **Of course I should be willing to approve any plan that can be devised in accordance with sound economic principles."**

Turning to the question of tariff, President Coolidge, as a defender of Republican policies, pointed out that the import duty on products that the farmer purchasers and the general increase in price of non-agricultural necessities advances the cost to the farmer less than from two to three per cent. He said that many economists consider this contribution of farmers to the tariff is over estimated. On the other side he told how the protective tariff on agricultural products benefited the farmer and tended to hold the domestic agricultural markets above the world or foreign price levels. He stated that $780,000,000 of agricultural products imported last year had paid $260,000,000 for the privilege of coming into competition with our own farm production.

"But the largest benefits accruing to the farmer come from supplying him with home markets," he stated. "What the farmer raises must either be sold at home or sent abroad. Our per capita consumption of butter, sugar, meats, eggs, milk and tobacco is far above those of foreign countries. When the depression of 1920 came and 5,000,000 of our wage earners were unemployed, their consumption of the more expensive agricultural supplies fell 18 per cent below what it had been before and what it became again when employment increased. This was more than the amount of our exports.

"Prosperity in our industries is of more value to the farmer than the whole export market for foodstuffs. Protection has contributed in making employment plentiful with the highest wages and highest standards of living in the world. General economic stability is of the utmost importance to the farmer and a depression in industry with the attendant unemployment would do the farmer an incalculable injury.

Farm Loan Banks Help

"If the price fixing and tariff revision do not seem to be helpful, there are other proposals that do promise improvements. For financing the farmer we are developing the farm loan and intermediate credit banks. These have put out about $1,200,000,000 of loans at moderate rates to about 350,000 farmers. In addition, there is the general banking system, national and state. All of these agencies need to give more informed attention to farm needs. They need more energy in administration. They should be equipped to supply not only credit, but sound business advice and the farmers to a much better extent should learn to use all these facilities."

So much was going on during the seventh annual convention of the American Farm Bureau Federation that the only suitable time that could be found for the presidents of the county Farm Bureaus and the I. A. A. officials to hold a conference was at breakfast. Can you pick out the president of your Farm Bureau? Most all of them attended. Plans were made for the I. A. A. annual meeting which will be held Jan. 21-22 at the University of Illinois. It's to be the biggest and best so far, the presidents decided. Howard Leonard, former I. A. A. President, was present also, and gave a short talk.

And here's the hope chest of the future—the boys and girls of the farms. These are the ones who were entertained by the I. A. A. at a breakfast affair during the International Live Stock Exposition when they were cashing in on their hard earned trips to Chicago. Dean Mumford made a talk and said, among other things, that Red Grange has the best wishes of everybody at the U. of I. and they all hope he will make barrels of money, but the real question is: Will he be as good a moral character as he would have been if he had not become a professional? The Dean said each of the leading boys and girls represented here is a kind of Red Grange in his or her own community and now each must live up to his or her success. Success brings greater responsibility, he said.

CAPPER SPEAKS

SENATOR ARTHUR CAPPER of Kansas, who addressed the members attending the annual banquet, Tuesday night, Dec. 8, on the subject, "The Farmer and the New Congress," spoke in a more optimistic and promising manner than did the President. Although stating that he was in agreement with the statements made by President Coolidge, Senator Capper showed a more sympathetic understanding of the farm problem and offered in a stronger manner to assist in getting greater "equality for agriculture." In part he said:

"The farmer is fully justified in asking of Congress that the economic rewards of agriculture shall be on a parity with those accorded 46 industry. He is justified in asking that agriculture is sufficiently remunerative for him to maintain a comfortable home and educate his children according to the best standards. In asking this, he is not demanding special privileges; equality of opportunity is all.

"The tariff helps the manufacturer, immigration restriction helps labor, the Esch-Cummins act helps the railroads and the Federal Reserve act helps the banks and the farmer pays a good part of the cost without receiving his fair share of the benefits of much of this legislation. It cannot be emphasized too often nor too strongly that what the farmer really needs is not the chance to borrow more money, though adequate credit facilities mean a great deal to him—but first and above everything else he must have better prices, a fair profit for his products.

Capper Says Congress Must Help

"The farmer is encouraged by the temporary relief afforded by circumstances and is paying off debts, but allowing for the recent change in price levels, he can buy today with his dollar only about 85 per cent as much as he could before the war. And the most generous figures yet disclosed show he earns a net income of less than 4 per cent annually on his investment.

"Even in taxes farmers are not on an equality with the rest of the world. Last year in most farming states taxes absorbed one-third of farm income compared with less than one-tenth in 1913. All other business passes on its increased taxes to the consumer, but the farmer cannot do this.

"These and many other facts show that if the producer is to receive anything like a fair return for his labor and his risks, Congress should go as far as it can to provide some means by which an equality with other groups in our industrial life may be attained. The agricultural industries must be reconstructed and stabilized. A permanent policy for agriculture must be worked out with the farmer himself a large factor in the program.

Surplus Big Problem

"I want to see this government, so far as it can, put through an aggressive policy for advancement of the interests of agriculture, but after six years at Washington, I am convinced that the best government can do for farmers is of little importance compared with what, by carefully thought out and loyal co-operation, they can do for themselves.

"But even after all that is done the problem of the surplus will still be with us, although it may not always be quite so evident. We will still have wonderful wheat years, like 1914 for example, when all of nature seems to co-operate in a delightful way to produce a real bumper crop, far larger than the home market, no matter how prosperous it may be, can ever absorb. When this occurs the surplus must be sent abroad. **We should see to it if possible that this is done in a way so the surplus of 10 or 15 or 20 per cent will not set the price for the entire yield. This means that some system must be worked out so it can be moved into foreign channels, sold for what it will bring, and the loss distributed properly among the producers, who will then be able to sell their remaining crop at home, free from the weight of this excess production. We must give the farmer the same kind of market to sell in that he is obliged to buy in. And this must be**

Poultry and Egg Marketing ..... F. A. Gougler
Taxation and Statistics ..... J. C. Watson
Transportation ..... L. J. Quasey

Published every other Saturday at 401 North Wesley Ave., Mount Morris, Illinois, by the Illinois Agricultural Association. Edited by Department of Information, Harry C. Butcher, Director, 608 South Dearborn Street, Chicago, Illinois. Entered as second-class matter October 29, 1925 at the post office at Mount Morris, Illinois, under the Act of March 3, 1879, as a bi-weekly. Acceptance for mailing at special rate of postage provided for in Section 412, Act of February 28, 1925, authorized October 27, 1925. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes a subscription of fifty cents for subscription to the Illinois Agricultural Association RECORD. Postmaster: In returning an uncalled for or missent copy, please indicate key number on address as is required by law.

A Changing Attitude?

THE first beneficial result of the election of officers of the American Farm Bureau Federation is the partial change of attitude of the general public and the city press toward the whole agricultural problem. Many people and interests have had it brought to their senses, through events occurring during the A. F. B. F. annual meeting, that there is much more to the agricultural problem than what they have liberally labelled as chronic wails. A reflection of this change of attitude is shown by the editorial, "The Farmers' Just Complaint," which appeared in the Chicago Tribune, Dec. 11:

"Mr. Coolidge came out to Chicago the other day to address the American Farm Bureau federation, at the invitation of O. E. Bradfute, its president. The farmers heard Mr. Coolidge, and apparently were not much impressed by his proposals for improving their lot. They took the first opportunity to show their displeasure by refusing to reelect Mr. Bradfute, who had held office for three terms. Instead they chose S. H. Thompson, whose criticism of agricultural policies laid down by the President was most outspoken.

"We think it would be a grave error to attempt to minimize the incident. It shows clearly that an influential section of the agricultural community in this country is dissatisfied and insistent upon governmental help in fixing prices of crops. The idea takes form in a number of proposals for more or less direct subsidies, which the President attacked with vigor, offering substitutes. The delegates heard him and were unconvinced. It is, perhaps, not an overstatement to say that many of them cared so little for remedies he proposed as to be indifferent [illegible] r success or failure in congress. on may become a critical one for rty. Agriculture is underpaid in e farmers know it. They are not ept whatever fate may offer them. They have been airing their difficulties and asking for remedies ever since the post-war deflation. They have received higher tariffs on farm products and a somewhat improved credit machinery, but these measures apparently have failed to do all that was hoped of them.

"There has been little sympathetic understanding in the east of the farmers' troubles. There seldom has been. Generally speaking, the east does nothing until the farmers, goaded to desperation, demand some unsound measure of direct relief, such as free silver or greenbacks, whereupon the industrial and financial interests unite in saying no. The east has frequently defeated the farmers' program and offered no substitute. It is time the business interests of the country, and particularly those of this section, realized that the prosperity of the farmers is a matter of direct concern to city dwellers. If there is no prosperity on the farms there can be no prosperity in the cities.

"All this does not mean that congress should accept whatever the farmers propose and turn it into law. That would be as unwise as it would be to adopt every proposal made by manufacturers in their own interest. The alternative, however, is not inactivity. Looking at the farm question as we do, from the center of the nation's most productive farming district, we conclude that congress has been neglectful of its duty. The men on the land will not be content any longer with a sop, and they ought not to be. If congress disapproves of the farmers' own remedies it must come forward with something constructive to take their place."

We Never Asked For Subsidy

THE Chicago Daily Drovers Journal in captious comment upon the resolution adopted by the American Farm Bureau Federation, asking that agriculture be given a place of equality with other interests in the American protective system through legislation directed at the problem of the surplus, seems to find great significance in the closing phrase "not involving government subsidy."

The RECORD is glad this point has been raised, since it gives opportunity to drive home the point that neither the Illinois Agricultural Association nor the American Farm Bureau Federation ever asked for legislation involving direct government subsidy.

Contrary to the misrepresentations circulated by some of its opponents, the McNary-Haugen bill did not call for a government subsidy as that term is understood. The public understands a government subsidy to mean financial payment out of the public treasury for the benefit of some particular group or class. The McNary-Haugen bill provided for a government loan, to be repaid out of the proceeds of an equalization fee or tax paid by the farmers themselves, on the commodities directly benefited in price by the operation of the corporation which the bill proposed to create.

What the farmers want is enabling legislation to put them in position to handle the surplus in the interest of a stabilized, American price, not fixed, as far as the home market is concerned, by the low costs of production in other countries.

This is entirely in harmony with the resolution, and the Drovers Journal's glee over the words "not involving government subsidy," lacks point.

It carries its comment further to say that advocates of the McNary-Haugen bill never answered the question of how production could be limited if it were made profitable. The Journal's very statement implies its own answer since it shows that what the Journal is arguing against is not the McNary-Haugen bill, or any legislation aimed at control of the surplus, but a profitable price for farm production. Obviously, the farmers' response to a profitable price level would be the same in all cases, whether that price resulted from voluntary reduction of acreage, an act of God, or the segregation of the surplus as provided under the McNary-Haugen bill.

As a matter of fact, farmers rob their land, and work themselves and their families longer hours than they otherwise would when farm prices are generally low in order to meet their fixed charges.

Where The A. F. B. F. Stands

THERE were about 5,000 words of resolutions passed by the delegates at the seventh annual meeting of the American Farm Bureau. To print them in full would require most of the space of this RECORD, consequently they have been boiled down to give only the gist. Copies of the official resolutions may be obtained by writing the information department of the A. F. B. F. The resolution of most interest to Illinois members follows in full:

We endorse the enactment of a federal law based on the principle of a farmers' export corporation, providing for the creation of an agency with broad powers for the purpose of so handling the surplus of farm crops that the American producer may receive an American price in the domestic market and we instruct our officers and representatives to work for the early enactment of such a law founded upon sound economic policy and not involving government subsidy.

Other official pronouncements of the American Farm Bureau Federation are:

Approves and endorses the proposed amendment to the Federal Revenue Act of 1924 making effective the exemption of agricultural co-operative marketing associations from the payment of income tax and the filing of annual returns. (The I. A. A. has been particularly interested in obtaining this exemption.)

Confirms previous resolutions in favor of deep channel waterways from the Great Lakes to the Atlantic Ocean, as well as general improvement of navigation and power conditions as might be brought out in a survey made by the chief engineers of the United States Army.

Approves of the services now being rendered by the government under the Merchant Marine Act of 1920 which provides for the development of shipping lines to a paying basis and then selling them to citizens of the United States to be operated under the American flag and under a guarantee of continued service.

Endorses the McNary-Woodruff bill authorizing the appropriation of $3,000,000 a year for five years and $5,000,000 a year for the succeeding five years for purchasing national forest lands and urges its early passage by Congress.

Urges the complete construction and disposition of Muscle Shoals for the utilization of the largest portion of the hydro electric power to manufacture concentrated nitrogen fertilizers with a farmer board to pass upon the cost of production, distribution and profit, assuring low cost to farmers.

Petitions Congress to continue the co-operation with the states in constructing roads as rapidly as the economic conditions of the country will permit.

Summarized its position on federal taxation by suggesting that the new revenue law, now before Congress, include the following points: (a) tax, at proper rates, undistributed profits of corporations; (b) tax stock dividends; (c) sharply curtail nuisance taxes, particularly on auto accessories, autos, trucks and forms of sales tax found to be generally objectionable; (d) federal government should stay in the inheritance and estate tax field; (e) opposition to the abolition of the gift tax; (f) tax no incomes under $5,000; (g) reduction in normal tax rates as the total reduction decided upon will permit; (h) retain capital stock tax; (i) increase personal exemption and decrease tax rate; (j) remove restriction of states to tax national banks; (k) retain differential in favor of earned income.

Recommends immediate congressional action on the Vestal Standard Container bill which would eliminate hundreds of odd-sized and unnecessary off-standard containers of fruits and vegetables.

Demands that the administration of the national forest should continue with the Secretary of Agriculture and regulation of grazing privileges should not be placed elsewhere.

Requests that the tariff commission make a study of the cost of frozen eggs, meats and dried eggs in this country and in China with the view of increasing the tariff the full 50% allowed under the flexible provisions of the tariff law.

Requests Congress to readjust postal rates to approximately the 1924 level, to take positive steps toward safeguarding the parcel post system, and to effect a reorganization of the postal service with a view to greater economy and efficiency.

Requests Congress to enact legislation preventing the importation into the United States non-adapted and worthless Italian red clover and alfalfa seed, and of Argentinian, Arabian, South African and other seed from regions of mild climate, as well as a law authorizing the Secretary of Agriculture to stain by some non-injurious method all imported red clover and alfalfa seed excepting Canadian-grown.

Petitions the United States Department of Agriculture and the extension service departments of the land grant colleges of this country to instruct their employees, agents and teachers to lend their influence and support in teaching the principles and practices of co-operative marketing and assisting existing co-operative associations in their operation policies and membership relations.

Calls attention to the need for unbiased livestock market news service from the cities of Detroit, Indianapolis, Pittsburgh, Cincinnati and Buffalo similar to that given from other cities by the U. S. D. A. and petitions Congress to include this item in the appropriation for the Department of Agriculture.

Reminds the state Farm Bureaus that the question of an amendment to the Federal constitution which would grant power to Congress to limit, regulate and prohibit the labor of persons under 18 years of age is still before the states for ratification. The American Farm Bureau unsuccessfully opposed this measure in Congress and asks state Farm Bureaus to be on watch in their respective states to defeat renewals of attempts to get state ratifications.

Asks that Congress consider favorably the Capper-French bill, known as the truth-in-fabric measure, requiring the labeling of woolen goods so as to show the amount of virgin wool, shoddy, or re-worked wool, cotton, silk or other fibers which they contain.

Recommends the creation in the Department of Agriculture a division of co-operative marketing that will assist in an educational way the farm co-operative marketing associations in this country.

Recommends as a part of the A. F. B. F. work of 1926 the study of co-operative insurance as it relates to life, indemnity, fire, automobile and liability and to submit the findings to the member states for consideration.

Endorses the proposal for a National Agricultural Day.

Endorses the principles of protection against introduction of foreign pests and diseases through quarantines as provided by present laws and asks the Secretary of Agriculture to do all in his power to maintain the effectiveness of such protective laws.

Suggests the appointment of a permanent committee on boys' and girls' club work in the A. F. B. F., including representatives from the National Home and Community committee, and that proper action be taken to secure more club leaders.

Recommends the appointment of a farm woman leader to be placed in charge of home and community work in the department of organization of the A. F. B. F. and that adequate money be set aside in the budget of the national organization to carry on the work.

Demands that the railroad rates on agricultural products, including livestock, be restored to what they were prior to the World War and that A. F. B. F. stand opposed to the five per cent increase in freight rates now being asked by western carriers.

PRESIDENT COOLIDGE ADDRESSES FARM BUREAU MEMBERS

Senator Capper Says Congress Must Aid in Farm Surplus Problem

National Authorities Speak Before Delegates at American Farm Bureau Federation Convention.

FOR the first time in the history of farm organizations, in fact for the first time in the history of this country, the Chief Executive of the United States made a special trip of 2000 miles to greet and address a meeting of America's farmers.

On Monday, Dec. 7, at exactly 11 o'clock President Coolidge, accompanied by Mrs. Coolidge, O. E. Bradfute, president and E. A. O'Neal, vice-president of the American Farm Bureau Federation, entered the ball room of the Sherman hotel where he addressed nearly 4,000 farmers representing approximately all the states of the Union, over a thousand of whom were from Illinois.

Fifty newspaper and motion picture cameramen were crowded around the speaker's platform. Four microphones were arranged to broadcast the message to the farm people of the United States who could not attend. Two telegraph instruments ticked out the story to thousands of newspapers in all corners of the land. On the platform were also Governor Small, Mayor Dever of Chicago, Everett Sanders, secretary to the President, military aides and secret service men.

Slaps McNary-Haugen as Unsound

President Coolidge predicted that, in spite of past and present adversities, agriculture as a whole will lead industry in future prosperity. Assailing legislative proposals savoring of paternalism, he promised to approve any agricultural relief plan "devised in accordance with sound economic principles."

"I propose," he added, "actively and energetically to assist the farmers to promote their welfare through co-operative marketing."

He opposed tampering with the tariff with any intention of aiding the farmers, and condemned proposals which would bring the government into the field of buying and selling farm products, or of fixing prices.

To Assist Co-operative Marketing

The President's audience listened attentively to the address, which he read with few gestures. Only a half-dozen times was he interrupted by applause. His defense of the tariff as an aid to agriculture and his arraignment of proposals that the government engage in the marketing of farm products or in price fixing direct or indirect were greeted with silence.

With an assurance that his administration will assist farmers in profitably disposing of their products and providing better storage facilities and credit, the President expressed the view that agriculture could thus be placed "on a sound and independent business basis."

"To have agriculture worth anything, it must rest on an independent business basis," he added, "It cannot at the same time be part private business and part government business. I believe the government ought to give it every assistance, but it ought to leave it as the support, the benefit and the business of the people."

Opposes Direct or Indirect Price-Fixing

The President launched into an attack of proposals that the government engage in buying and selling of farm produce and direct or indirect price fixing with the following observations:

"This would be a dangerous undertaking, and as the emergency is not so acute, it seems at present to have lost much of its support. No matter how it is disguised, the moment the government engages in buying and selling, by that act it is fixing prices.

"Moreover, it would apparently destroy co-operative associations and all other marketing machinery, for no one can compete with the government. Ultimately it would end the independence which the farmers of this country enjoy as a result of centuries of struggle and prevent the exercise of their own judgment and control in cultivating their land and marketing their produce.

"Government control cannot be divorced from political control. The overwhelming interest of the consumer, not the smaller interest of the producer, would be sure to dominate in the end."

Co-operatives Promise Greatest Success

Referring to the co-operative movement as the most important development of late years in the agricultural field, and emphasizing the crop surplus problem as a vexing factor in the farm price situation, Coolidge expressed the opinion that with the economic information furnished by the Department of Agriculture, with better warehouses and storage facilities and a better credit structure much can be done to take care of the ordinary surplus.

"The leaders in the co-operative movement with the advice of the Department of Agriculture have prepared what is believed to be an adequate bill embodying these principles, which will be presented to the Congress for enactment.

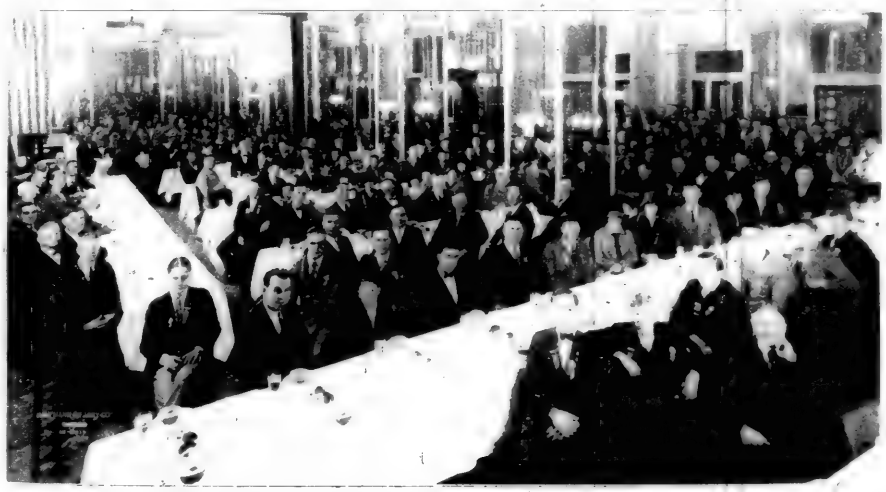
"For a more orderly marketing calculated to secure a better range of prices the co-operative movement promises the greatest success. Already they are handling $2,500,000,000 of farm produce, or nearly one-fifth of the annual production.

Points to Tariff as Assisting Farmers

"The initiative of the farmers themselves, with such assistance as can be given by the government without assuming responsibility for business management through financing and through the co-operative movement, would appear to be a wise method of solving this problem. **Of course I should be willing to approve any plan that can be devised in accordance with sound economic principles."**

"Turning to the question of tariff, President Coolidge, as a defender of Republican policies, pointed out that the import duty on products that the farmer purchases and the general increase in price of non-agricultural necessities advances the cost to the farmer less than from two to three per cent. He said that many economists consider this contribution of farmers to the tariff is over estimated. On the other side he told how the protective tariff on agricultural products benefited the farmer and tended to hold the domestic agricultural markets above the world or foreign price levels. He stated that $780,000,000 of agricultural products imported last year had paid $260,000,000 for the privilege of coming into competition with our own farm production.

"But the largest benefits accruing to the farmer come from supplying him with home markets," he stated. "What the farmer raises must either be sold at home or sent abroad. Our per capita consumption of butter, sugar, meats, eggs, milk and tobacco is far above those of foreign countries. When the depression of 1920 came and 5,000,000 of our wage earners were unemployed, their consumption of the farmers' [illegible] more expensive agricultural [illegible] 18 per cent below what it had been before and what it became again as employment increased. This would more than [illegible] amount of our exports.



"Prosperity in our industries is of more value to the farmer than the whole export market for foodstuffs. Protection has contributed in making employment plentiful with the highest wages and highest standards of living in the world. General [illegible] business a[illegible] ought [illegible] the same [illegible] which other [illegible]

Farm Loan Banks Help

"If the price fixing [illegible] revision do not seem to be [illegible] other proposals that do promise improvements. For financing the farmer we are developing the farm loan and intermediate credit banks. These have put out about $1,400,000,000 of loans at moderate rates to about 350,000 farmers. In addition, there is the general banking system, national and state. All of these agencies need to give more informed attention to farm needs. They need more energy in administration. They should be equipped to supply not only economic stability is of the utmost importance to the farmer and a depression in industry with the [illegible] ment would do the [illegible] mary.

So much was going on during the seventh annual convention of the American Farm Bureau Federation that the only suitable time that could be found for the presidents of the county Farm Bureaus and the I. A. A. officials to hold a conference was at breakfast. Can you pick out the president of your Farm Bureau? Most all of them attended. Plans were made for the I. A. A. annual meeting which will be held Jan. 21-22 at the University of Illinois. It's to be the biggest and best so far, the presidents decided. Howard Leonard, former I. A. A. President, was present also, and gave a short talk.

And here's the hope chest of the future—the boys and girls of the farms. These are the ones who were entertained by the I. A. A. at a breakfast affair during the International Live Stock Exposition when they were cashing in on their hard earned trips to Chicago. Dean Mumford made a talk and said, among other things, that Red Grange has the best wishes of everybody at the U. of I. and they all hope he will make barrels of money, but the real question is: Will he be as good a moral character as he would have been if he had not become a professional? The Dean said each of the leading boys and girls represented here is a kind of Red Grange in his or her own community and now each must live up to his or her success. Success brings greater responsibility, he said.

CAPPER SPEAKS

SENATOR ARTHUR CAPPER of Kansas, also addressed the [illegible] farmers' problem [illegible] night. He said the [illegible] farmer and the New [illegible] poke in a new spirit [illegible] and promising [illegible] and the President [illegible] saying that he was in agreement with the statements made by President Coolidge. Senator Capper showed a more sympathetic understanding of the farm problem and offered in a stronger [illegible] assist in getting [illegible] parity for agriculture. In [illegible] he said:

"The time is fully accepted [illegible] ing of Congress that the [illegible] rewards of agriculture [illegible] on a parity with those [illegible] of industry. He is [illegible] in asking that agriculture [illegible] sufficient remuneration [illegible] to maintain comfort [illegible] home and other [illegible] keeping to the best standards [illegible] In doing this, he is not [illegible] special privileges [illegible] of opportunities [illegible]

"The tariff helps the manufacturer, immigration restriction helps labor, the Esch-Cummins law helps the railroads and the [illegible] and the farmer pays a good part of the cost without receiving his fair share of the benefits of much of this legislation. It cannot be emphasized too often nor too strongly that what the farmer really needs is not the chance to bottle up his surplus, though adequate credit facilities mean a great deal to him—but first and above everything else he must have better prices, a fair price."

Capper Says Congress Must Help

"The farmer is encouraged by the temporary relief afforded in certain cases and is paying off [illegible] of the recent change in price levels [illegible] ten times worse than with his dollar only about 55 per cent as much as he could before the war. And the cost [illegible] figures [illegible] this [illegible] shows a net increase [illegible] less [illegible] per cent annually on his [illegible] investment [illegible] men on [illegible] farmers are not on an equality with the rest of the wage [illegible] Last, [illegible] most farming states taxes [illegible] ated first of farm income compared with [illegible] less than one-tenth in 1913." All other [illegible] losses on the farmer's investment [illegible] the cost [illegible] but the farmer cannot [illegible] the [illegible]

"[illegible] other facts show that [illegible] the producer is to receive anything like a fair return [illegible] his labor and his risks [illegible] so far as it can to provide [illegible] which an equality [illegible] in our industrial [illegible]

"The agricultural industry [illegible] must be reconstructed and [illegible] A permanent policy [illegible] for agriculture must be worked [illegible] with the farmer himself [illegible] in their program.

Surplus Big Problem

[illegible] government [illegible] solar as there is enough [illegible] surplus [illegible] relation [illegible] attitude [illegible] as at Washington. I [illegible] clear that the [illegible] control [illegible] farm [illegible] surplus [illegible] with which [illegible] Canada [illegible] changed [illegible] and I can [illegible] not [illegible] to [illegible] for [illegible] themselves.

"But [illegible] that is [illegible] the problem of the surplus will still be with us, although it may [illegible] be quite so evident. We [illegible] still have bumper crops [illegible] which [illegible] years like 1914 for example, [illegible] all of which seems to indicate [illegible] in a general way [illegible] a normal [illegible] crop, for [illegible] the [illegible] harvest [illegible] for [illegible] prospects [illegible] Washington.

We should see to it if possible that this is done in a way so the surplus of 10 or 15 or 20 per cent will not set the price for the entire yield. This means that some system must be worked out so it can be moved into foreign channels, sold for what it will bring, and the loss distributed properly among the producers, who will then be able to sell their remaining crop at home, free from the weight of this excess production. We must give the farmer the same kind of market to sell in that he is obliged to buy in. And this must be

done in a way which is practicable, and which the American people will accept. Up to this time the various plans presented to Congress have not been found workable, but equality for agriculture is an issue that will not down.

Must Find Better Market

"Agriculture must be placed squarely under our protective system. Our tariff must apply to agricultural surpluses, otherwise its beneficient protection is likely, I fear, to be removed from our surpluses of manufactured products. Very few farmers, I am glad to say, subscribe to a program of arbitrary price-fixing by the government, or purely political expedients that are unsound and impractical. While the government should not engage in the buying and selling of commodities, nor the arbitrary fixing of prices, it can take a more active part in finding a better market for our agricultural surplus, that prices of farm products shall not continue to be out of line with the general price level.

"Another thing which Congress will consider this winter is co-operative marketing. I endorse all that President Coolidge said to you yesterday on *this subject* in his splendid address on the problems of agriculture. To reorganize our farming industry on modern lines we must have a better marketing system in the hands of the producers of the basic commodities. **Farmers are subject to the organized wiles of big buying interests with the disposition and the facilities for securing the products at the lowest possible prices and in absolute disregard of production costs. Agriculture must create and use the selling machinery that general industry has found so necessary. Co-operative marketing can be made to shorten the spread between producer and consumer, eliminate waste and benefit all. Evidence of the success of co-operation, where it is set up on a sensible, business basis and so conducted, continues to pile up."**

METZGER ON PROGRAM

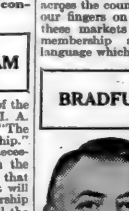
GEORGE E. METZGER, director of the organization department of the I. A. A., addressed the convention on "The Intensive Method of Selling Membership." Director Metzger emphasized the necessity of having a definite program in the state and county Farm Bureaus and that it must include certain activities that will reap direct benefits to the membership in a dollar and cents manner. To sell the idea to farmers, stated Mr. Metzger, the salesmen must have something to sell, must believe in it and be able to explain to the prospect.

In conclusion, he stated, "we are quite firmly convinced that to secure membership the farm bureau program must first of all be pretty thoroughly understood by a good sized group of leading men in each county. To attain this end we have attempted to make organization one of the regular projects of the county Farm Bureau. When a piece of work is projected, two things essentially happen. First, a definite set of rules is laid down which will govern in a business way the carrying out of the piece of work in question. Second, a number of men are interested in the proposition to the extent that they will take those rules, put them into action, and carry out the work so as to arrive a certain conclusion."

WOMEN HAVE PROGRAM

THE women members of the Farm Bureau were not without a program and interesting speakers on subjects of particular interest to them, for on Tuesday afternoon, Grace E. Frysinger, extension home economist of the United States Department of Agriculture, addressed the wives and daughters who attended the convention. In telling of the projects of the Home Bureau and farm community work for 1926, Miss Frysinger, threw out this challenge: "It seems to me," she said, "that you women members of the Farm Bureau have a two-fold function to perform. As an individual, a citizen, and a co-ordinate farm owner or operator you may well be interested in matters of legislation, tax reduction rate fixing, co-operative marketing and the many and one other economic matters contained in the program of the American Farm Bureau Federation. But as a woman, as the one who throughout the centuries has been responsible to carry on from generation to generation those values which develop soul and heart as well as mind and body, you must feel it your especial function to stress without cessation the need of giving greatly increased attention in the programs of community, county, state and national Farm Bureaus to such factors as health, recreation, music, reading, religious education, training for parenthood, better schools community centers, civics and other considerations for the common weal."

LIVE STOCK MARKETING



C. B. DENMAN, president of the National Livestock Producers Association, spoke before the delegates on livestock marketing. In speaking of the problem of marketing co-operatively the great volume of livestock produced in the mid-west states of Nebraska, Iowa, Kansas Colorado, and Illinois, he said:

"I have not come to boast, but I think that we, as farm bureau folks, have a right to feel proud of the fact that the 13 terminals operating under the National Livestock Producers Association, are more nearly approaching the handling of this volume than any other organization in this country. The fact that during 1924 we handled more than 92,000 cars of livestock valued at more than $121,000,000 for approximately 240,000 members, justifies our pride. Thus we have an organization of producers from the range country of the west and southwest, the cornbelt feeder and breeder, with markets located entirely across the country in which today we have our fingers on the pulse of the trade on these markets and are able to tell our membership about these markets in language which they can understand."

After President Coolidge's address before some 3,000 delegates and farmers, of which over 1000 were from Illinois, he was treated to a luncheon on products marketed co-operatively. The President pronounced the food as "great." Illinois products were represented by "Creamy Products" milk from the Quincy Co-operative Milk Producers' Association and "Illini" apples from the Illinois Fruit Growers' Exchange, Centralia.

BRADFUTE'S MESSAGE

O. E. Bradfute

PRESIDENT Bradfute's message to the convention was made up of a review of the various activities of the federation and recommendations for future work. He stated that the former debt of $47,418.46 has been completely wiped out and organization now has a surplus of more than $10,000. In speaking of the financial expenditures of the federation, he said:

"When we stop to think that the results attained by the American Farm Bureau Federation during its six years of operation has cost the individual member but $3 each all told, we begin to realize that the work has been done at a minimum cost." Of the 50 cents which went to the Federation during 1925 from each member, the money was spent as follows:

President's office and general administration work	8.5c
Organization work	8.8c
Department of Marketing and Secretary	4.0c
Treasurer and Department of Finance	2.0c
Transportation Department	2.2c
Legislative work by our department at Washington	4.2c
Department of Information	3.6c
General office expenses	7.0c
Miscellaneous—such as Women's Home and Community work; Boys' and Girls' Club work; Committee on the Relation of Electricity to Agriculture	2.4c
Board of Directors	2.8c
Annual Meeting	2.8c
Used in payment of old debts	7.7c

In referring to the importance of taxation work to American farmers, Mr. Bradfute mentioned particularly the taxation activities of the Illinois Agricultural Association, calling attention to the annual saving in this state of over $2,000,000. In this regard he stated:

"We also should be making some special studies along the lines of federal taxation, and should, therefore, have a specialist working on these problems. Some of the most valuable services rendered by a number of our state Farm Bureaus have been through this means, of which Illinois is a notable example. If it is not possible to have a specialist, we should by all means have a special committee with sufficient funds available to begin such work."

FARM FIRE LOSSES

DIRECTLY in line with the recent accomplishment of the Illinois farmers, Farm Bureaus, and mutual fire and lightning insurance companies in the organization of the Farmers Mutual Reinsurance Company, as well as former work in this field by other state Farm Bureaus, Wallace Rogers, chairman of the fire prevention committee of the Farm Fire Association, Chicago, addressed the convention on "Farm Fire Losses" and the prevention of such losses. In this he stated:

"The loss by fire to farm property, real and personal, in America has attained the astounding figure of $150,000,000 annually. The toll which the fire demon exacts from American farmers will pay their annual interest bill on all borrowed capital with more that $50,000,000 left to be applied on principal each year.

"It amounts to $26.29 for each farm in America. It is equivalent to one-half the value of all crops raised in the State of Indiana in one year. Its approximation the total value of all annual crops in such states as Michigan and South Dakota. The building material thus consumed materially discounts the combined efforts of the Government and other bodies to conserve the forests and other natural resources of the nation. If, as believed, one-half of this loss comes from the destruction of buildings, our forests are depleted to the tune of 7,500 acres annually.

"But, while fire losses are showing a per capita decrease for the nation and a decrease in certain cities, they are still increasing on the farm. Figures compiled by the Farm (Insurance) Association, which includes practically all business transacted by legal reserve companies on farm property in twelve of the middle western states known as the Heart States, indicate an increase of 29 per cent in fire losses for the five-year period ending December 31, 1924."

Farm Bureau Members Get $15 Discount on Phosphate Next Year

Beginning Jan. 1, 1926, Farm bureau members in Illinois will have an opportunity to save $15 on every 30-ton car of phosphate that they order, due to a recent agreement with three phosphate companies accomplished through the efforts of J. R. Bent, director of the I. A. A. phosphate-limestone department, and his advisory committee.

This phosphate discount amounting to 50 cents a ton is given as a special recogniation to farm bureau members by means of a farm bureau membership credit certificate similar in principle to the one used in ordering limestone during the past two years. The phosphate discount will be applied as a credit at the time of paying for the material.

One minimum carload ordered by a farm bureau member allows him a saving of $15 or an amount equal to his membership dues in the county and state organization for an entire year or will justify a non-member in joining due to this one item alone.

"It is hoped and expected," states Mr. Bent, "that this will be a big talking point for the Farm Bureaus in securing and keeping members, and that it will not only justify but encourage the members and advisers in their promotional work for the use of phosphate and thereby result in an increased demand. In fact, that is the main argument upon which the producers were finally convinced in granting the discount. We hope to prove that it was a sound argument."

The Illinois Agricultural Association's accredited list of phosphtate companies at present include:

Robin Jones Phosphate Company, Nashville, Tenn.

Ruhm Phosphate and Chemical Company, Nashville, Tenn.

Thomson Phosphate Company, 137 So. LaSalle St., Chicago.

Illinois Farm Bureau Member 'Signed' Father of Coolidge in Bureau

C. J. Cooper, formerly a member of the DeKalb County Farm Bureau and the I. A. A., but now residing in Oak Park, Ill., bears the unique distinction of having "signed" Col. Coolidge, father of the president, in the Farm Bureau. It was several years ago.

In the early days of the Farm Bureau in Illinois, Mr. Cooper helped organize in 40 counties, and later was called to assist in expanding the organization in other states.

Because he was practically through with active farming himself and more concerned with his store, Mr. Coolidge, Sr., at first did not feel justified in joining, but when told of the Farm Bureau's benefit for his grandchildren and nephews, who would inherit the farm, he "peeled off a 10-dollar bill, sighed, and signed." The largest cultivated field on the Coolidge farm is about three acres, Mr. Cooper said, and the land is rough and stony.

Limestone Rate on Wabash R. R. Saves $9,000 in 4 Months

Illinois farmers living in 21 counties served by the Wabash railroad are gaining a saving of over $2,000 a month in limestone transportation costs due to an agreement secured by the Illinois Agricultural Association through J. R. Bent, director of the phosphate-limestone department.

This saving to farm bureau members was brought about on Aug. 17 of this year when officials of the Wabash lines agreed to absorb a portion of the cost of switching at origin on shipments of limestone intended for delivery at Wabash points in Illinois. This meant an average saving of approximately $10 a car on the transportation costs. Since the agreement was arranged, close to 900 cars have been handled by the railroad with the result of a saving of nearly $9,000 to Illinois farmers in less than four months.

Director Bent states that this special rate agreement was first accepted by the Wabash company as an experimental proposition for the balance of 1925. The results, however, have been so satisfactory that the railroad officials have consented to extend the rate for 1926 and it may become permanent.

Counties affected by this special limestone rate are: Adams, Brown, Champaign, Christian, Cook, Ford, Effingham, Grundy, Hancock, Livingston, Macon, McLean, Montgomery, Morgan, Moultrie, Piatt, Sangamon, Scott, Shelby, Vermilion and Will.

Illinois' 20 Master Farmers All Members of the Farm Bureau

"To these farmers, because they are good farmers, good neighbors and good citizens, Prairie Farmer is awarding the degree of Master Farmer, and presenting each with a gold medal."

Such is the enviable honor bestowed upon 20 Illinois farmers, all farm bureau members, because "they stayed on the farm and made a good job of farming and farm living."

All farmers in Illinois, whether they belong to the Farm Bureau or not, were eligible in the contest which culminated in the selection of the 20 Master Farmers, but it is notable that each of the 20, coming from 16 counties which range from "Little Egypt" in the south to the Chicago Milk territory in the north, are members of their respective county Farm Bureaus.

Judges in the contest were: Sam H. Thompson, president of the Illinois Agricultural Association and the American Farm Bureau Federation, Dr. W. L. Burlison, University of Illinois; C. V. Gregory, editor, Prairie Farmer and S. R. Guard of the WLS radio station.

The 1925 Master Farmers of Illinois are: Roy Atwood, Grand Ridge, LaSalle county; E. E. Boyer, Ashmore, Coles county; Glenn Craft, Burlington, Kane county; A. O. Eckert, Belleville, St. Clair county; L. B. Eidman, Mascoutah, St. Clair county; John B. Eyman, Pontiac, Livingston county; Clyde Hall, Aurora, Kane County; W. D. Howland, Gardner, Grundy county; Lawrence Kiesling, Mason City, Mason county; W. O. Kunkle, Carthage, Hancock county; E. R. Leigh, Sparland, Marshall county; John C. Mais, Fairbury, Livingston county; J. E. Mummert, Astoria, Fulton county; S. Niemeyer, Humboldt, Coles county; A. J. Pallimard, St. Anne, Kankakee county; Oris Pepple, St. Francisville, Lawrence county; John Rathbun, Lombard, Du Page county; W. E. Reigle, Tolono, Champaign county; L. C. Rinker, Grand Ridge, LaSalle county and Carle C. Walker, Clinton, DeWitt county.

The gold medals were awarded at a banquet given in honor of the Master Farmers in Chicago, Dec. 2, at which former Governor Frank O. Lowden spoke.

"Our Sam" Takes A. F. B. F. Presidency

Continued from page 1, col. 5.

of directors for two years are: C. E. Hearst, president of the Iowa Farm Bureau Federation; M. L. Noon, president of the Michigan Farm Bureau Federation and L. B. Palmer, president of the Ohio Farm Bureau Federation. Those elected for one year: W. H. Settle, president of the Indiana Farm Bureau Federation and F. L. Kelso, president of the South Dakota

A. R. Wright
Alternate Delegate

Upon request of Frank Ridgway, agricultural editor of the Chicago Tribune, President Thompson gave a statement from Quincy Friday, Dec. 11, as follows:

"I was extremely pleased to see the editorial in the Chicago Tribune this morning entitled, "The Farmers' Just Complaint." The biggest opposition that agriculture has been confronting has been due to lack of sympathy from other interests who should lend us a hand. Our problem is a common one to all people.

"I particularly like the statement that if Congress disapproves of the farmers' own remedies it must come forward with something constructive to take their place. The problem of the surplus, which is our principal one, is a problem that can be solved by the brains of America if we will adopt the right attitude toward it.

Not Unfriendly to Coolidge

"I am not unfriendly to President Coolidge, in fact, I agree with much of what he said before the American Farm Bureau convention, especially as regards co-operative marketing. He referred to but failed to recognize adequately our paramount problem—that of disposing of the normal surplus, which, because it is sold in world markets at world prices in competition with the very cheapest standards of living, sets the price on the entire American demand. In taking up the surplus problem, he consciously or unconsciously assumed the responsibility of dealing with it.

"As regards the present agricultural situation, I think that such improvements as have taken place in the relative prices of wheat and of hogs have been due to abnormal conditions of production, rather than to any correction of the fundamental underlying maladjustment. In 1924 we profited from a world-wide shortage of wheat due to misfortunes abroad. This year we have been placed on a domestic basis with our wheat because of the partial failure of the winter wheat crop of this country. Hogs are high because we have comparatively few hogs to sell, owing to the short corn crop of last year, and the unprofitable prices for hogs that have ruled since 1921, while corn this year, of which we have a good crop, is selling today at less than it cost to grow it.

Quotes Jardine on Farm Situation

"In the 1925 report, released Dec. 7, Secretary of Agriculture says: 'Much remains to be done to put agriculture on a profitable basis. The purchasing power of farm products in October was still 13 per cent below its pre war level.'"

"Agricultural conditions of the past five years have resulted in a decline of the capital value of agricultural investment of 20 billions of dollars. Even after writing this off as lost, agriculture is not in a position of parity. With normal crops at home and abroad, I can see no reason why the price relationship in the future may not slump further to the disadvantage of the products of those crops that normally are produced in excess of the amount which the domestic market can absorb at a fair value.

"The problems of the new administration of the American Farm Bureau Federation will be determined by the resolutions of the convention and carried out by the concurrent action of the board of directors and myself.

The Illinois delegates were Sam H. Thompson, Earl C. Smith, Frank D. Barton and J. L. Whisnand. A. R. Wright was alternate. These delegates were placed on several important committees.

done in a way which is practicable, and which the American people will accept. Up to this time the various plans presented to Congress have not been found workable, but equality for agriculture is an issue that will not down.

Must Find Better Market

"Agriculture must be placed squarely under our protective system. Our tariff must apply to agricultural surpluses, otherwise its beneficient protection is likely, I fear, to be removed from our surpluses of manufactured products. Very few farmers I am glad to say, [illegible] arbitrary fixing by the government or party politics experiments [illegible] unsound and impractical. While the government should not engage in the buying and selling of commodities or the arbitrary fixing of prices, it can take a more active part in finding a better market for our agricultural surplus, that portion of farm products shall not be controlled by the [illegible] world.

"Another [illegible] which Congress will consider this winter is cooperative marketing. I endorse all that President Coolidge said to you yesterday on this subject in his splendid address on the problems of agriculture. To organize our farming industry on modern lines we must have a better marketing system in the hands of the producers of the basic commodities. Farmers are subject to the organized wiles of big buying interests with the disposition and the facilities for securing the products at the lowest possible prices and in absolute disregard of production costs. Agriculture must create and use the selling machinery that general industry has found so necessary. Co-operative marketing can be made to shorten the spread between producer and consumer, eliminate waste and benefit all. Evidence of the success of co-operation, where it is set up on a sensible, business basis and so conducted, continues to pile up."

METZGER ON PROGRAM

GEORGE E. METZGER, director of organization development of the I. A. A., addressed the County Membership Intensive Method of Membership. Director Metzger emphasized the necessity of having a definite program in the state and county Farm Bureau and that it must include certain activities that will bring direct benefits to the membership in a regular and certain manner. To sell the idea to farmers, stated Mr. Metzger, the organization must have something to sell [illegible] to explain [illegible] we are quoting [illegible] any interest that to [illegible] membership [illegible] farm bureau people must first [illegible] a county organization [illegible] a good sized group of leaders [illegible] in each county. To attain this [illegible] we have attempted to [illegible] organization [illegible] one of the regular projects of the County Farm Bureau. When a piece of work is projected, [illegible] essential. First a definite set of rules is laid down which will govern in a basic way the carrying out of the piece of work in question. Second, a number of men are interested in the proposition to the extent that they will take those rules, put them into action and carry out the work so as to [illegible] a successful conclusion."

WOMEN HAVE PROGRAM

THE women members of the Farm Bureau were not without interesting and interesting speakers on subjects of particular interest to them, for on Tuesday afternoon Grace E. Frysinger, extension home economist of the United States Department of Agriculture, addressed the women and daughters who attended the convention. In addressing the project—the Home Bureau and farm organization work for 1926, Miss Frysinger threw out this challenge: "It seems to me," she said "that you women members of the Farm Bureau have a twofold function to perform, as an individual, a citizen, and as the [illegible] farm owner or operator you may well be interested in matters of legislation, a tax reduction rate fixing, cooperative marketing and the many and various economic matters contained in the program of the American Farm Bureau Federation. But as a woman, one who realizes that the centuries has been responsible to carry on from generation to [illegible] those values which development and heart as well as mind and body, you must feel your especial function to stress without ceasing the need of giving greatly increased [illegible] to the problems of community, county, state and national Farm Bureau [illegible] such factors as health, recreation, music, reading, religious education, training for [illegible] hood, better schools, community centers, [illegible] and other considerations for the country as a whole."

LIVE STOCK MARKETING

C. B. DENMAN, president of the National Livestock Producers Association spoke before the delegates on livestock marketing. In speaking of the problem of marketing cooperatively the great volume of livestock produced in the rapid-west states of Nebraska, Iowa, Kansas, Colorado, and Illinois, he said:

"I have not come to boast, but I think that we, as farm bureau folks, have a right to feel proud of the fact that the 13 terminals operating under the National Livestock Producers Association are now nearly approaching the handling of this volume than any other organization in this country. The fact that during 1924 we handled more than 92,000 cars of livestock valued at more than $121,000,000 for approximately 100,000 members, justifies our pride. Thus we have an organization of producers from the range country of the west and southwest, the corn belt feeder and breeder, with markets located entirely across the country in which today we have our fingers on the pulse of the trade on these markets and are able to tell our membership about these markets in a manner which they can understand."

BRADFUTE'S MESSAGE

O. E. Bradfute

PRESIDENT Bradfute's message to the convention was made up of a review of the various activities of the federation and recommendations for future work. He stated that the former debt of $47,418.46 has been completely wiped out and organization now has a surplus of more than $10,000. In speaking of the financial expenditures of the federation, he said:

"When we stop to think that the results attained by the American Farm Bureau Federation during its six years of operation has cost the individual member but 83 cents all told, we begin to realize that the work has been done at a minimum cost." Of the 50 cents which went to the Federation during 1925 from each member, the money was spent as follows:

Legislative work at Washington, D. C.	5¢
Organization work	18¢
Department of Marketing	3¢
Insurance and Department of	2¢
Transportation Department	2¢
Publication work [illegible] Washington, D. C.	5¢
Department of Information	1¢
Overhead expenses	7¢
Miscellaneous such as Wood [illegible]	1¢
Community work, Boy Scouts, Girl Scouts, etc.	1¢
Contribution to the Federation of Labor	1¢
Board of Directors	2¢
Annual Meeting	2¢
Interest on amount of old debt	2¢

In referring to the importance of taxation work to American farmers, Mr. Bradfute mentioned particularly the taxation activities of the Illinois Agricultural Association, calling attention to the annual saving in this state of over $2,000,000. In this regard he stated:

"We also should be making some special studies along the lines of federal taxation, and should, therefore, have a specialist working on these problems. Some of the most valuable service rendered by a number of our state Farm Bureaus have been through the means of which Illinois is a notable example. If it is not possible to have a specialist, we should by all means have a special committee with sufficient funds available to begin such work."

FARM FIRE LOSSES

DIRECTLY in line with the recent accomplishment of the Illinois farmers, Farm Bureaus, and mutual fire and lightning insurance companies in the organization of the Farmers' Mutual Reinsurance Company, as well as former work in this field by other state Farm Bureaus, Wallace Rogers, chairman of the fire prevention committee of the Farm Fire Association, Chicago, addressed the convention on "Farm Fire Losses" and the prevention of such losses. In this he stated:

"The loss by fire to farm property, real and personal, in America has attained the astounding figure of $150,000,000 annually. The toll which the fire demon exacts from American farmers will pay their annual interest bill on all borrowed capital with more than $50,000,000 left to be applied on principal each year.

"It amounts to $26.29 for each farm in America. It is equivalent to one-half the value of all crops raised in the State of Indiana in one year. It approximates the total value of all annual crops in such states as Michigan and South Dakota. The building material thus consumed materially discounts the combined efforts of the Government and other bodies to conserve the forests and other natural resources of the nation. If, as believed, one-half of this loss comes from the destruction of buildings, our forests are depleted to the tune of 7,500 acres annually.

"So that, while fire losses are showing a per capita decrease for the nation and increase in certain cities, they are still increasing on the farm. Figures compiled by the Farm (Insurance) Association, which includes practically all business transacted by legal reserve companies on farm property in twelve of the middle western states known as the Heart States, indicate an increase of 29 per cent in fire losses for the five-year period ending December 31, 1924."

Farm Bureau Members Get $15 Discount on Phosphate Next Year

Beginning Jan. 1, 1926, Farm bureau members in Illinois will have an opportunity to save $15 on every 30-ton car of phosphate that they order, due to a recent agreement with three phosphate companies accomplished through the efforts of J. R. Bent, director of the I. A. A. phosphate-limestone department, and his advisory committee.

This phosphate discount amounting to 50 cents a ton is given as a special recognition to farm bureau members by means of a farm bureau membership credit certificate similar in principle to the one used in ordering limestone during the past two years. The phosphate discount will be applied as a credit at the time of paying for the material.

One minimum carload ordered by a farm bureau member allows him a saving of $15 or an amount equal to his membership dues in the county and state organization for an entire year or will justify a non-member in joining due to this one item alone.

"It is hoped and expected," states Mr. Bent, "that this will be a big talking point for the Farm Bureaus in securing and keeping members, and that it will not only justify but encourage the members and advisers in their promotional work for the use of phosphate and thereby result in an increased demand. In fact, that is the main argument upon which the producers were finally convinced in granting the discount. We hope to prove that it was a sound argument."

The Illinois Agricultural Association's accredited list of phosphtate companies at present include:

Robin Jones Phosphate Company, Nashville, Tenn.

Ruhm Phosphate and Chemical Company, Nashville, Tenn.

Thomson Phosphate Company, 137 So. LaSalle St., Chicago.

Illinois Farm Bureau Member 'Signed' Father of Coolidge in Bureau

C. J. Cooper, formerly a member of the DeKalb County Farm Bureau and the I. A. A., but now residing in Oak Park, Ill., bears the unique distinction of having "signed" Col. Coolidge, father of the president, in the Farm Bureau. It was several years ago.

In the early days of the Farm Bureau in Illinois, Mr. Cooper helped organize in 40 counties, and later was called to assist in expanding the organization in other states.

Because he was practically through with active farming himself and more concerned with his store, Mr. Coolidge, Sr., at first did not feel justified in joining, but when told of the Farm Bureau's benefit for his grandchildren and nephews, who would inherit the farm, he "peeled off a 10-dollar bill, sighed, and signed." The largest cultivated field on the Coolidge farm is about three acres, Mr. Cooper said, and the land is rough and stony.

Limestone Rate on Wabash R. R. Saves $9,000 in 4 Months

Illinois farmers living in 21 counties served by the Wabash railroad are gaining a saving of over $2,000 a month in limestone transportation costs due to an agreement secured by the Illinois Agricultural Association through J. R. Bent, director of the phosphate-limestone department.

This saving to farm bureau members was brought about on Aug. 17 of this year when officials of the Wabash lines agreed to absorb a portion of the cost of switching at origin on shipments of limestone intended for delivery at Wabash points in Illinois. This meant an average saving of approximately $10 a car on the transportation costs. Since the agreement was arranged, close to 900 cars have been handled by the railroad with the result of a saving of nearly $9,000 to Illinois farmers in less than four months.

Director Bent states that this special rate agreement was first accepted by the Wabash company as an experimental proposition for the balance of 1925. The results, however, have been so satisfactory that the railroad officials have consented to extend the rate for 1926 and it may become permanent. W. I.

Counties affected by this special limestone rate are: Adams, Brown, Champaign, Christian, Cook, Ford, Effingham, Grundy, Hancock, Livingston, Macon, McLean, Montgomery, Morgan, Moultrie, Piatt, Sangamon, Scott, Shelby, Vermilion and Will.

Illinois' 20 Master Farmers All Members of the Farm Bureau

"To these farmers, because they are good farmers, good neighbors and good citizens, Prairie Farmer is awarding the degree of Master Farmer, and presenting each with a gold medal."

Such is the enviable honor bestowed upon 20 Illinois farmers, all farm bureau members, because "they stayed on the farm and made a good job of farming and farm living."

All farmers in Illinois, whether they belong to the Farm Bureau or not, were eligible in the contest which culminated in the selection of the 20 Master Farmers, but it is notable that each of the 20 come from 16 counties which range from "Little Egypt" in the south to the Chicago Milk territory in the north, are members of their respective county Farm Bureaus.

Judges in the contest were: Sam H. Thompson, president of the Illinois Agricultural Association and the American Farm Bureau Federation; Dean W. L. Burlison, University of Illinois; C. V. Gregory, editor, Prairie Farmer and S. R. Guard of the WLS radio station.

The 1925 Master Farmers of Illinois are: Roy Atwood, Grand Ridge, LaSalle county; E. E. Boyer, Ashmore, Coles county; Glenn Craft, Burlington, Kane county; A. O. Eckert, Belleville, St. Clair county; L. B. Eidman, Mascoutah, St. Clair county; John B. Eyman, Pontiac, Livingston county; Clyde Hall, Aurora, Kane County; W. D. Howland, Gardner, Grundy county; Lawrence Kiesling, Mason City, Mason county; W. O. Kunkle, Carthage, Hancock county; E. R. Leigh, Sparland, Marshall county; John C. Meis, Fairbury, Livingston county; J. E. Mummert, Astoria, Fulton county; S. Nieneyer, Humboldt, Coles county; A. J. Pallissard, St. Anne, Kankakee county; Oris Pepple, St. Francisville, Lawrence county; John Rathbun, Lombard, DuPage county; W. E. Reigle, Tolono, Champaign county; L. C. Rinker, Grand Ridge, LaSalle county and Carle C. Walker, Clinton, DeWitt county.

The gold medals were awarded at a banquet given in honor of the Master Farmers in Chicago, Dec. 2, at which former Governor Frank O. Lowden spoke.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Volume 4 — Issued Every Other Saturday for 63,000 *thinking* Farmers—January 2, 1926

1926 FINDS PUBLIC MORE AWARE OF PROBLEM OF SURPLUS

PROGRAM OF ANNUAL MEETING ANNOUNCED

Jardine, Lowden and Davis Will Address State Farm Bureau

Plan Largest I. A. A. Annual Meeting to be Held at Champaign-Urbana, Jan. 21-22.

Arrangements are being made to accommodate the wives of delegates to the Annual meeting; and the women folks are especially invited.

There will be lots to hear, much to do and many meetings to attend when the farm bureau officers, members and advisers gather at the annual meeting of the Illinois Agricultural Association to be held at University of Illinois, Champaign-Urbana on Jan. 20, 21 and 22.

It will be a great state farmers' event, comparable only to the state I. A. A. picnic or the annual meeting of the A. F. B. F. when President Coolidge made his trip to Chicago last month.

William M. Jardine, secretary of Agriculture, Frank O. Lowden, former governor of Illinois, and Hon. Stephen Davis of the U. S. Department of Commerce are scheduled as headliners who will address the members and delegates attending the annual gathering. Besides the meeting of the I. A. A., the Illinois Farm Bureau Serum Association, the annual conference of the I. A. A. staff and Illinois farm advisers and the Illinois Agricultural Co-operatives Association, it will be Farmers' Week at the University of Illinois.

County President Enter Jan. 20.

Secretary Jardine will address the delegates at a luncheon between 12 and 2 o'clock on Thursday, Jan. 21. Former Governor Lowden's speech will be made at a similar luncheon on Friday noon and Mr. Davis will talk on "The Future of Radio Industry and Its Use by Farmers" at the annual banquet to be given on the evening of Jan. 21.

The Illinois Farm Bureau Serum Association has scheduled its meeting for 9:00 a. m. Tuesday, Jan. 19, while the Illinois Agricultural Co-operatives Association will hold its meeting during the afternoon of the same day. On Wednesday, Jan. 20 all the farm advisers of the state will gather in the assembly room of the Illinois Union building at the University of Illinois for an all-day conference with the I. A. A. officers, directors and executive committeemen to consider and map out the program of cooperative work for 1926.

Special Sectional Conferences.

The program for this year's annual meeting of the I. A. A. which will open in the auditorium of the University at 9:00 a. m. on Thursday, Jan. 21, is planned expressly for the purpose of giving each delegate an opportunity to express himself. To permit sufficient time for free discussion, sectional meetings conferences are planned during which open consideration will be given to a large variety of subjects. In addition, each congressional district will hold a conference. The even-numbered districts will nominate executive committeemen to hold office for the next two-year period and a president and vice-president will be elected.

In a notice sent to the 92 county Farm Bureaus of the state particular mention was made that for the sectional conferences on Thursday and Friday, each Farm Bureau should have not less than four representatives—one for each of the four conferences in session at the same time. This was suggested so that each representative could be assigned by his county to the particular conferences which it is desired that he should attend and thus be able to report on at the next county board meeting following the annual I. A. A. meeting.

Publish Complete Program.

Farm Bureaus should notify Geo. A. Fox, executive secretary of the I. A. A., of the number of representatives from the respective counties not later than Jan. 15, and specify the conferences to which each representative has been assigned.

The I. A. A. will pay one-half of the county president's expenses and one-half of the farm advisers expenses to

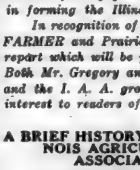
Fairness Demands They Be All Up or All Down, Uncle Sam!



I. A. A. Will Be 10 Years Old This Month; Farm Editors, Who Watch Growth, Comment

It was in January 10 years ago that the Illinois Agricultural Association was born. When the forthcoming annual meeting is held at Champaign-Urbana January 21 and 22, it will be almost exactly 10 years since a small group of farm advisers, then known as county agriculturists, in co-operation with leading farmers and farm paper men met at the University and took the preliminary step in forming the Illinois Agricultural Association. That was January 26, 1916.

In recognition of the 10-year birthday, the editors of Orange Judd ILLINOIS FARMER and Prairie Farmer have contributed brief comments for the annual report which will be placed in the hands of all delegates at the annual meeting. Both Mr. Gregory and Mr. Page have followed and watched the Farm Bureaus and the I. A. A. grow and it is thought their comments will be of particular interest to readers of the RECORD.

A BRIEF HISTORY OF THE ILLINOIS AGRICULTURAL ASSOCIATION

By C. V. Gregory, editor, Prairie Farmer

C. V. Gregory

HERMAN DANFORTH of Tazewell county, Illinois, went to the short course at the University of Illinois in January, 1916, with one idea firmly in his mind. He believed that the county soil improvement associations (they were not called farm bureaus in those days) ought to join hands to form a state association.

When Danforth gets an idea he sticks to it persistently. So on January 26 he got a group of farm advisors and farmers together in the Agricultural Building and the Illinois Agricultural Association was formed.

A few weeks later (March 15) at a meeting at Ottawa, a constitution and

THE FARM BUREAU IS FIRMLY ROOTED

By Arthur C. Page, editor, Orange Judd Illinois Farmer

WE HAVE learned from watching the processes of Nature how an ideal organization should develop. A fertile soil, a seed, and a small growth mostly of roots come first. As the plant grows above ground, the roots strike constantly deeper into the soil.

That is the way the Illinois Agricultural Association started; that is the way it has grown.

The farm bureau idea in a single county was the seed. The great farming public of Illinois, entering a period of tremendous importance in its history, and needing public representation, was the soil. The Illinois Agricultural Association in its present stature is the tree, with roots reaching back into almost every county and every township and into thousands of farm homes throughout the state. The organization has grown in the ideal way, supplying a need.

Arthur C. Page

Whole branches might be cut off from this great tree, and it would still live. Even if some of its roots should now be cut away it would go on growing and bearing fruit.

The greatness of the Illinois Agricultural Association has always depended, and depends today, on its responsiveness to the thoughts and desires of its membership.

Among the achievements of the I. A. A. one of the most important has been the development and education of leaders. Agriculture has its full share of intelligent and thoughtful men, but it has lacked men trained for public leadership. In training a few such men through their organization, who have been contributed to the nation, the farmers of Illinois have performed a great service.

Coolidge's Blunt Dismissal of All Farm Relief Proposals as "Price-Fixing" Gets Fiery Come-back in Des Moines Conference

And Next Day Secretary Jardine Announces: "Now that the Plan to Aid Co-operative Organizations Has Been Placed Before Congress I Feel that Further and More Definite Attention Can Be Directed to the Agricultural Surplus Problem."

THE year 1926 starts off with excellent prospects for a real consideration by Congress of agriculture's major problem—the disposal of the abnormal surplus.

Ever since President Coolidge's failure to recognize this problem adequately in his speech before the annual meeting of the American Farm Bureau Federation and the triumph of the export corporation idea as a means of obtaining equality for agriculture, which is characterized by the election of Sam H. Thompson as president, there has been a wide and startling awakening in the city press and by the public to the fact that *there is a farm problem.*

Frank D. Barton, Representative at Des Moines Meeting

Before that event the city press frequently referred to the truly representative spokesmen of the farmers as "calamity howlers" and labelled practically all attempts of the farmers to get national legislation designed to place them on a level with other classes as "nostrums" and every kind of quackery.

Washington Getting Busy

But since that event a wave of realization that agriculture is not getting its fair share of the national income has swept the country—*and has stirred Washington.* Several measures have been introduced in Congress embodying the principle of the McNary-Haugen bill which, briefly, provided for the abnormal surplus to be segregated and sold abroad in the world market in order that world price levels would not set the price on the whole American production (as is now the case). Any losses incurred through the sale of the surplus abroad was to be borne equally by those producers who benefited.

Several other plans have been suggested. Now the problem is to run all suggested plans through a hopper of sound judgment and grind out an effective one which Congress will pass and which will do the job for which it is intended. It must be effective on cotton, as well as for wheat and corn.

Red Blooded Meeting at Des Moines

On Dec. 21 and 22, representatives of every grain belt farm organization of consequence, including in their membership about 1,000,000 farmers in Oklahoma, Kansas, Nebraska, South and North Dakota, Minnesota, Iowa, Missouri, Illinois and Indiana, met at Des Moines, Iowa, and passed bristling resolutions demanding effective export control of abnormal surplus crops. It was a joint meeting of the Corn Belt committee, representing 23 farm organizations in the west and northwest, and the executive committee of the American Council of Agriculture which has for its one and only objective securing "equality for agriculture." Frank D. Barton of Cornell, Livingston county, chairman of the I. A. A. legislative committee, represented the Illinois Agricultural Association. R. A. Cowles, I. A. A. treasurer, also attended, but in capacity of secretary-treasurer of the American Council.

Fear Co-op Bill Only Gesture

Although the Illinois Agricultural Association has the word of Secretary Jardine that the administration's bill which has been introduced by Senator McNary and Representative Haugen, providing for creation of a division within the department of agriculture to give advisory service and assistance to co-operative marketing will in no way take the place of some measure meeting the surplus problem, there was a

(Continued on page 4, Col. 3)

Reinsurance Company Sustains First Loss In Franklin Co. Fire

The first loss of the Farmers Mutual Reinsurance Company occurred on Monday morning, Dec. 21, when the granary of J. S. Webb of Ewing, Franklin county, was burned to the ground. The losses included the building, about 1500 bushels of corn, 400 bushels of oats and machinery valued at $700.

Grain and implements were insured for $500 each in the Farmers Mutual Reinsurance Company, while the Franklin County Farmers Mutual Fire Insurance Company carried $500 each on the building and implements and $200 on the grain.

The fire originated in a country store building of A. N. Webb and Sons, located some 200 or 300 feet from the granary. Clues point to the belief that the fire was started by burglars who were rifling the store.

Mr. Webb is a farm bureau member and a charter member of both the Farmers Mutual Reinsurance Company and the Franklin County Farmers Mutual Fire Insurance Company.

Insurance settlements for the losses were made in a few days after the loss.

EXECUTIVE COMMITTEE
(By Congressional Districts.)

1st to 11th ..... William Webb, Route One, Joliet
12th ..... G. F. Tullock, Rockford
13th ..... C. E. Bamborough, Polo

Published every other Saturday at 404 North Wesley Ave., Mount Morris, Illinois, by the Illinois Agricultural Association. Edited by Department of Information, Harry C. Butcher, Director, 608 South Dearborn Street, Chicago, Illinois. Entered as second-class matter October 20, 1925 at the post office at Mount Morris, Illinois, under the Act of March 3, 1879, as a bi-weekly. Acceptance for mailing at special rate of postage provided for in Section 412, Act of February 28, 1925, authorized October 27, 1925. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record. Postmaster: In returning an uncalled for or missent copy, please indicate key number on address as is required by law.

Policy Holders in Mutuals Please Note

WOULDN'T it be wonderful for the year 1926 to be the most successful year of your insurance company?

Wouldn't it be a great satisfaction for your directors to say, "Our mutual company can now take care of all the insurance needs of our farmers against fire, lightning and windstorm on a mutual basis. Our company is backed by over 240 other mutuals that have over $600,000,000 insurance in force! Just as you insure your building, likewise we have our mutual company insured. That will increase the amount of insurance and also the confidence in our mutual, as our assessments will be more uniform."

The new Farmers' Mutual Reinsurance Company can place your local in this position.

A Chance to Practice What They Preach

WITH OFFICIALS in administration circles in Washington singing "Halleluiah! Halleluiah! Co-operative Marketing" as a love toast to the farmers, there ought to be more real honest-to-goodness consideration given by the treasury department to exemptions of farmers' co-operatives from federal income taxes.

The intent of the Federal Revenue Act is that farmers' co-operatives shall be exempt from income taxes, the idea being that any profits accruing to a co-op are pro-rated back to the individual members and are there caught by the income tax collector.

The Illinois Agricultural Association, through our department of co-operative accounting, has had several income tax cases up for consideration, all of which have been turned down by treasury department officials.

When the Congressional ways and means committee met early last fall and held hearings on tax matters, our Director Wicker of the co-operative accounting department appeared before them asking that the committee recommend to Congress certain clarifying clauses to the revenue act which would erase the red-tape haze which persisted in befogging the issue with the treasury officials. Mr. Wicker's suggestions were received favorably and they appeared to have won the case, but later treasury officials appeared before the committee and stated that all of the proposed amendments were being carried out in actual execution of the act—which was not true. But the committee didn't know it and Mr. Wicker was back in Chicago. Consequently the clarification was not included in the ways and means committee's tax bill recommended to the House and since passed.

This is the only request of the farmers concerning the amendments to the federal revenue act, but there are requests from other interests for exemptions on articles ranging from chewing gum to pogo sticks.

But the cause is not yet lost. The I. A. A. stand was backed up by a resolution passed by the American Farm Bureau Federation in its last annual meeting. Senator Capper will sponsor the amendments on the floor of the Senate and they will have the support of other prominent senators from the Mid-West. Senator Capper writes the following:

"I am heartily in favor of the amendments to the Federal Revenue Act relating to the exemption of co-operative marketing associations as proposed . . . I will be pleased to handle the matter on the floor of the Senate if you wish and will do everything in my power to secure favorable action."

The attitude of the administration toward co-operative marketing as a cure for all farm ills and the coldness of certain officials of the administration toward exemptions for co-ops puts that particular element in the same boat with the fellow who doesn't practice what he preaches.

This is a test of the good faith of the administration toward co-operative marketing. Will it ring true?

False Economy

NOT CONTENT with refusing to increase the federal appropriation for t. b. eradication, the director of the budget bureau went further and sliced off a half million.

Such economy is false economy. With tuberculosis on the run it is not economy to let up on the campaign. T. B. eradication is like killing quack grass—the only way to get rid of it is to keep everlastingly at it. If a little patch is left, it will soon spread itself to its former area, and perhaps farther. Slowing up on tuberculosis eradication—the result of decreased federal appropriation—is not conducive to early and efficient eradication of the dreaded disease.

This is a case of a dollar in time will save nine. A half million dollar slice may look fine for economy propaganda, but in the end it will be false economy.

Co-operation Not So New

CO-OPERATION is not so new, after all. When the Pilgrims came over on the Mayflower, they drew up a contract and agreement in which they agreed to pool all of their resources for seven years after landing. They adopted the one-man one-vote policy, which is a fundamental of successful co-operatives today.

Through the troublesome days that followed, the colony was preserved largely because of mutual helpfulness and support—in other words, through co-operation.

T. B. Eradication Should Not Stop

BECAUSE the federal appropriation for t. b. testing in Illinois is exhausted for the fiscal year ending June 30, 1926, an order was issued on Dec. 23, by J. J. Lintner, federal supervisor, discontinuing all testing under the co-operative plan in Illinois where obligations for payments of indemnities are involved.

By this order 77 veterinarians in 67 counties ceased their testing activities. Washington officials also requested the names and addresses of the veterinarians in order that they might be transferred to some other state.

This deplorable situation arose out of the state's refusal to continue, as it had done in the past, to pay the federal one-third of indemnities. Governor Small wants a larger federal appropriation, as does the I. A. A., but that is no justifiable reason for discontinuing all testing. The testing should continue on the state's money in-so-far as it will go. The $2,000,000 appropriation made by the last General Assembly to indemnify cattle owners will permit considerable testing to be done even though the federal government is out of indemnifying funds.

Testing cattle for t. b. and elimination of those found diseased should continue. Economic production demands it. The thinking farmer and the consumer demand it and humanity requires it.

According to the act adopted by the last General Assembly governing t. b. eradication, the Illinois department of agriculture has the control and supervision of it and is directed to co-operate with the federal department of agriculture. When federal funds are exhausted, the act further states, the state shall continue to supervise this work and shall pay both the state and federal shares. A $2,000,000 appropriation was made to accompany the t. b. law with such a possibility in mind.

The testing program should be continued under joint federal and state supervision as heretofore because of the inter-state traffic in cattle and for uniform efficiency in eradicating the disease. Such co-operation is absolutely necessary to maintain modified accredited areas and accredited herds in Illinois.

The Illinois Agricultural Association is urging Washington officials to pass an emergency appropriation. The association stands four-square that Governor Small and the state department of agriculture should continue the co-operative plan between federal and state departments.

T. B. eradication should not stop. The fight to clean up our herds has been vigorously waged in No Man's Land until the enemy is on the run. Holding up the indemnity fund at this stage of the campaign is like delaying the ammunition when all are ready to go over the top for victory.

Insurance In State Mutual Approaching Million Dollar Mark

Scott County Farmers Form County Mutual Similar to State Reinsurance Company.

With the total amount of insurance in force rapidly nearing the million dollar mark, activities of the Farmers Mutual Reinsurance Company are now being directed toward the development of specific reinsurance, blanket reinsurance and recessional insurance. Direct insurance in the new state company, which is chiefly the result of the recent campaign, in which farmers in 67 Illinois counties took part, now totals $817,997. To be added to this figure is $40,850 in specific reinsurance, the total of 27 applications from mutual companies in 5 counties.

Vernon Vaniman
Field Representative

Twelve mutual companies, according to Vernon Vaniman, field representative of the reinsurance mutual, have signed contracts for specific reinsurance and eight other companies have made out the application subject to the approval of their respective boards of directors.

Blanket Reinsurance to Be Feature

Applications for blanket reinsurance are also being considered by the local companies throughout the state. So far eight companies have signified their intentions of applying for this benefit from the state mutual while many others are waiting the approval of their boards of directors and members. This form of reinsurance has not shown as rapid progress as the specific form due to the fact that such action must be considered and passed upon by the local memberships and boards of directors which usually hold their annual meetings during the first month of the new year. Mr. Vaniman points out that during the coming spring months blanket reinsurance will probably prove one of the most popular forms.

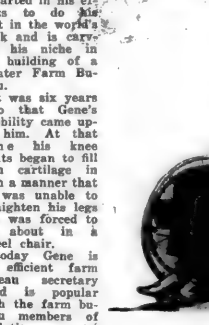
Six mutual companies have now received recessional insurance totaling $286,275 from the state mutual. This type of insurance is used when the state company has more insurance than it wishes to carry and cedes part of it to certain local or county mutuals who are not carrying their maximum amount and are desirous of increasing their total amount of insurance in force.

Scott County Farmers Form Mutual

Following the organization of the state mutual company, the farmers of Scott county formed the Winchester County Mutual Fire Insurance Company. This new company is modeled in many respects after the state organization and is so organized that it can work with the state organization in direct harmony. The Winchester company started operations on Nov. 16 with $160,000 insurance in force. The rates of the Winchester Mutual are based on the same classification of property as the state organization. No dwelling will be insured unless it has proper access to the attic. Registered livestock will be insured by name and number and the new company is encouraging its members to install fire extinguishers, realizing that fire prevention is an important feature.

Scott County Farm Bureau has actively assisted in the formation of the Winchester company and the relationship between the two organizations is 100 per cent co-operation with mutual advantage to all, according to Mr. Vaniman. Miss Ferry Coultas, office secretary of the county Farm Bureau, is acting secretary of the insurance company. Geo. H. Vannier of Bluffs is president of the new local mutual and the board of directors is composed of the president and H. H. Fletcher, Winchester; E. M. Chrisman, Jacksonville; Fred Korty, Bluffs; Carl Ritter, Naples; B. F. Webster, Winchester; R. P. Allen, Winchester; W. D. McEvers, Winchester; R. S. Coon, Winchester; F. H. Allen, Winchester; Albert Rolf, Bluffs; Wm. S. Fletcher, Winchester; Roe Smothers, Naples; Chas. D. O'Donnell, Winchester, and Ralph Curtis, Manchester.

Jo Daviess County Favors Reinsurance



Officers and directors of the farmers mutual insurance companies of Jo Daviess county met on Dec. 23 and enthusiastically endorsed all four phases of insurance offered by the state re-insurance company. The insurance companies included in the endorsement were: Jo Daviess Mutual Fire Insurance company; Menominee, Vinegar Hill and Dunleith Insurance company; Thompson and Guilford Mutual Fire and Lightning Insurance company; Woodbine Mutual Fire Insurance company and the Stockton and Wards Grove Mutual Fire and Lightning Insurance company.

Surmounts Handicap of Wheel Chair

ALTHOUGH working under a permanent physical handicap, Gene Barter, office secretary of the Gallatin County Farm Bureau, has refused to be thwarted in his efforts to do his part in the world's work and is carving him a niche in the building of a greater Farm Bureau.

It was six years ago that Gene's disability came upon him. At that time his knee joints began to fill with cartilage in such a manner that he was unable to straighten his legs and was forced to go about in a wheel chair.

Today Gene is an efficient farm bureau secretary and is popular with the farm bureau members of Gallatin county. His rare wit, a smile, and his extreme personal interest in farmers and farm bureau work have won the respect and confidence of his employers—the farmers of Gallatin county. Although he has held the position only since the first of February, Gene is well informed on all current farm bureau work in the county, state and nation.

Gene Barter

Gene says that his pet peeve is making out a federal farm loan application for a slow-thinking, undecided-minded farmer who is without a sense of value of his personal property. He states that this duty would "tax the patience of an old maid trying to flirt with the 'last chance.'"

In talking of the present day farm problems, Secretary Barter states that, in his opinion, the biggest national problem facing the farmers today is the job of marketing the surplus products produced. However, in Gallatin county, he points out, farmers are most interested in the problem of permanent soil fertility, for questions asked most often are about use of limestone, its price, and use of sweet clover.

I. A. C. A. Members Increase

Three More Co-operatives Join During Past Month

Contract Membership of the Illinois Agricultural Co-operatives' Association, the co-operative auditing and business service of the I. A. A., reaches a new high mark this month—185. Without solicitation three organizations joined the association during the past month and others have signified their intentions to sign the membership contract as soon as the opportunity permits.

185

The three latest to join the auditing co-operative are: Farmers Co-operative Supply Company, Taylorville, Christian county; Bath Co-operative Grain Company, Bath, Mason county; and the Hilladale Livestock Shipping Association, Hilladale, Rock Island county.

Illinois Farmers Again Break Record in Use of Agricultural Limestone

More than three-fourths of a million tons of agricultural limestone were supplied on over 250,000 acres of Illinois land by farmers of this state in 1925, according to an estimated report of J. R. Bent, director of the I. A. A. phosphate-limestone department.

This 750,000 tonnage of limestone, when if loaded on a single train of freight cars would extend 123 miles, breaks all records for use in any one state in the United States during the past year. It exceeds by 50 per cent or 250,000 tons the Illinois record of 1924 which was also greater than any other state in the country. Illinois farmers, according to government statistics, in 1924 used more than one-fourth of all agricultural limestone spread on farm lands in the United States.

"The amount of agricultural limestone used by Illinois farmers in 1925," states Director J. R. Bent, "increased to such a large quantity that many of the limestone plants and quarries used their entire reserve supply and were from 20 to 30 days behind on orders.

"In fact the flood of limestone orders resulted in such a delay at a few of the production plants that several farmers were forced to cancel their orders as the late deliveries would have arrived during the busy fall season. This increasing demand for agricultural limestone has caused several farmers and Farm Bureaus in various parts of the state to consider the possibility of producing their own community needs from some possible local limestone deposits."

Due to the increased use of this product in Illinois, the Illinois Agricultural Association secured a $10 reduction in freight rates to 21 counties located on the Wabash railroad lines. This reduction has saved the farmers of these counties approximately $9,000 in the past four months.

Farmers in 48 Counties Used 19,625,000 C. C. of Cholera Serum in 1925

If all the hogs that were vaccinated with hog cholera serum distributed by the Illinois Farm Bureau Serum Association during the past year were formed in a single line, the column would extend such a distance that the first hog might be rooting at the gates of the Chicago stockyards while the last of the line would be standing hock-deep in mud on the banks of the Ohio river at Cairo, Illinois.

This somewhat 'lengthy' illustration was brought out in a recent announcement which stated that 19,625,000 cubic centimeters of hog cholera serum were purchased and administered by farmers in 48 Illinois counties during the past year. This amount of serum, which if based on the number of cubic centimeters of serum injected into the average 120-150 pound hog, would vaccinate 356,818 head of animals. It was distributed by the Illinois Farm Bureau Serum Association composed of 48 county Farm Bureaus. These Farm Bureaus in turn delivered the serum to their members who vaccinate their own swine.

During the past year, according to Director Hedgcock who is a member of the board of directors of the serum association, the officers of the organization inspected nine serum companies and contracted with seven to furnish serum to the association's members at prices ranging from 50 to 65 cents a hundred cubic centimeters. Farm bureau members whose county organizations are not members of the serum association were charged five cents a hundred more for the serum. The total of 19,625,000 c. c. does not include the amount of serum contracted by county Farm Bureaus not members of the association.

"The success of farmers administering serum and virus has exceeded expectations in Illinois, as the majority of farmers have been under the impression that this vaccination cannot be done successfully by other than a graduate veterinarian," states Director Hedgcock. "The farmer is conscious of the necessity of extreme care in vaccination in order that his year's work may not be lost.

Dairymen To Give Prize

Illinois State Dairymen's Association Offers Calves to Boys and Girls Securing Most Members

Six registered heifer calves will be given as prizes to the six Illinois boys or girls who are able to secure the most memberships in the Illinois State Dairymen's Association, which is holding its annual meeting at Galesburg, Jan. 26-28.

The contest is open to boys and girls under 21 years of age who apply for application blanks to the secretary, George Caven, Illinois State Dairymen's Association, 136 West Lake Street, Chicago, Illinois.

A 15 per cent commission on all memberships is paid to every boy and girl with the exception of the prize winners. The six winners will each receive a pure bred heifer of the breed they like best as a prize.

Stock Solicitation For Farmers' Grain Company Started at Pontiac, Ill.

Solicitation of subscriptions for $250,000 in capital stock for the National Farmers' Elevator Grain Company, Co-operative, a grain marketing organization being organized through the co-operation of some 1200 farmers' elevators in Illinois and Iowa, is now getting well under way, according to C. C. Davis, director of the I. A. A. grain marketing department, who has been assisting in an advisory capacity with the formation of the new organization.

M. L. Hunt, field representative of the grain marketing organization, is now working in Livingston county in co-operation with Geo. L. Potter, president of the Livingston County Farm Bureau and member of the board of directors of the Farmers' Grain Dealers Association of Illinois and the National Farmers' Elevator Grain Company.

On Tuesday, Dec. 22, a meeting, attended by members of the boards of directors of the 25 farmers' elevators in the county, was held in the courthouse at Pontiac. At this meeting the organization and operating principles were discussed and the plans completed. Several of the elevator companies represented became members of the national co-operative and subscribed for stock. Before this meeting 12 of the county's farmers' elevators had become affiliated with the association. Other farmers' elevators of the county are expected to act favorably upon the projects proposed by the new grain company.

During the next few weeks Mr. Hunt will attend a number of meetings comprising representatives of many farmers' elevators in central Illinois, where he will explain the work of the grain co-operative.

"Voluntary stock subscriptions have been coming in from elevators in Illinois and Iowa in considerable number during the past month," states Director Davis. "A large field organization has not been organized as yet and no definite time has been set for the completion of the stock campaign. Mr. Davis points out that this work will depend entirely upon the local farmers' elevators.

Program of Annual Meeting is Announced

(Continued from page 1, col. 1)

the meeting on Wednesday, Jan. 20. If the president is a regular delegate to the I. A. A. meeting the entire traveling expense and other expenses for Jan. 21 and 22 will be paid by the I. A. A.

The outline of the program of the four days is as follows:

Tuesday, January 19

9:30 a. m. to 2:00 p. m.—Annual meeting of the Illinois Farm Bureau Serum Association. Illinois Union Building.

2:00 p. m. to 5.00 p. m.—Annual meeting of the Illinois Agricultural Co-operatives Association, Illinois Union building.

Wednesday, January 20

9:00 a. m. to 5:00 p. m.—Annual conference of I. A. A. staff and farm advisers. Illinois Union building.

6:00 p. m.—Annual I. A. A. dinner (Beardsley hotel) for county farm bureau presidents.

Thursday, January 21

I. A. A. Annual Meeting

9:00 a. m.—Invocation.—Dr. I. R. E. Hieronymous, community adviser.

9:30 a. m.—Address of welcome.—Dean H. W. Mumford.

10:00 a. m.—President's address.—Sam H. Thompson.

10:30 a. m.—Secretary's report.—Geo. A. Fox.

11:00 a. m.—Treasurer's report.—R. A. Cowles.

11:30 a. m.—Announcements.

12:00 m. to 2:00 p. m.—Luncheon. Address by Wm. M. Jardine, secretary of agriculture. Place—Stock Pavilion.

2:00 p. m. to 5:00 p. m.—Twelve sectional conferences covering the co-operative marketing of livestock, grain, dairy products, poultry and eggs, fruits and vegetables, as well as such subjects as auditing and accounting, finance, organization, information, taxation, transportation and phosphate-limestone.

5:00 p. m.—District meetings.—Separate meeting for the representatives of each I. A. A. district. Includes nomination of executive committeemen for the 12th, 14th, 16th, 18th, 20th, 22nd, and 24th districts. General business conference for the representatives of other districts.

7:00 p. m.—Banquet, Music.—University Gymnasium Annex.

8:00 p. m.—Responses, Dean H. W. Mumford, college of agriculture, University of Illinois; S. J. Stanard, director, state department of agriculture; S. H. Thompson president, I. A. A. and A. F. B. F.; L. C. Brown, president Farmers' Institute; E. A. Eckert, master, Illinois State Grange; Mrs. Spencer Ewing, president, Illinois Home Bureau Federation.

9:00 p. m.—Address, "The Future of Radio Industry and Its Use by Farmers," by Hon. Stephen Davis, U. S. Department of Commerce.

Friday, January 22

8:00 to 9:30 a. m.—Two sectional conferences covering insurance and legislation.

9:30 a. m. to 12:00 m.—General assembly meeting. Reports from sectional conferences.

12:00 to 2:00 p. m.—Luncheon; Address by Frank O. Lowden, former governor of Illinois. Place—Stock Pavilion.

2:00 p. m.—Business meeting. Reports of committee on amendments to constitution, report of committee on resolutions, election of executive committee, election of president and vice-president. Adjournment.

State Tax Increase Partly Overcome By Reduced Valuations

J. C. Watson Tells How Lower Valuations Save Farmers $1,912,500 as Compared to 1920 Rate

In spite of the fact that the Illinois state tax rate for 1925 has been increased from 65 to 85 cents on the $100, an increase requiring land owners to pay about $2,000,000 more in state taxes this year than they paid last year, they will pay approximately $1,912,500 less than would have been required, if the high tax valuations of 1920 had not been reduced through the efforts of the county Farm Bureaus and the Illinois Agricultural Association.

"The valuations on farm lands since 1920 have been reduced about $225,000,000," states J. C. Watson, director of the I. A. A. taxation and statistics department, who has conducted tax investigations and aided in securing reductions in many Illinois counties. "This reduction has made a savings in state taxes on farm lands this year, as compared with what would have been true under the former high valuations, of about $1,912,500.

"The increase in saving comes chiefly in state taxes, although the reductions in valuations of farm lands for county and local purposes in the state as a whole now amount to more than $120,000,000. Lower county valuations also resulted in lower taxes but due to the differences in tax levies for various county and local purposes, it is impossible to compute the amount of such savings until after taxes are extended.

112½ Per Cent Increase Since 1920

"The state tax rate for 1924 was 65 cents to $100. For 1925 it is 85 cents. The increase in the last year alone, if applied to the high valuations of 1920, would have cost the land owners about $450,000 more in state taxes than they will have to pay this year.

"It cannot be claimed that the cut in valuations of lands caused much of the increase in state tax rates. The total reduction in state valuations from 1920 to 1924 was a little more than 5½ per cent of the valuation of all classes of property in the state. The increase in state tax rates for this year alone is more than 30 per cent, while the increase as compared to 1920 is 112½ per cent."

Illinois Farmers Sold 82,909 Pounds of Wool Thru Co-ops Last Year

Wool sufficient to clothe 10,000 men in all-wool suits was marketed co-operatively by farmers in 25 Illinois counties in 1925.

This estimate was reached following an announcement of Wm. E. Hedgcock, director of the I. A. A. livestock marketing department, to the effect that 82,909 pounds of wool were pooled by 352 Illinois farmers during 1925.

Of this amount approximately 81,000 pounds were sold by 345 producers through the National Wool Exchange of Boston, Mass., a wool commission company organized by northwestern wool growers to market their fleeces co-operatively. In one Illinois county 7 growers desire to sell through the Ohio Wool Growers' Association and 1908 pounds were shipped to that state.

During the past 7 years the livestock marketing department of the Illinois Agricultural Association has aided Illinois farm bureau members, who were interested in pooling their wool, to market it through the most profitable channels. This year the amount of wool pooled was somewhat less than former years. This was due, Director Hedgcock points out, to the extreme activities of the commission companies who are opposed to co-operative marketing of wool, the general high level of prices offered by the speculative buyers, and the reduction in number of sheep being raised.

A Brief History of the I. A. A.

(Continued from page 1, col. 3)

by-laws was adopted and officers were elected. Herman Danforth was elected president, and E. T. Robbins, then farm adviser in Tazewell county, secretary. Lyle Johnstone of McLean county was elected vice-president and Howard Leonard of Woodford county, treasurer. The dues were fixed at $100 a year from each county farm bureau, and even that small amount was hard to get. But an organization had been formed that was destined to play a major part in the future history of Illinois Agriculture.

Slow Progress During War

In 1917 came America's entrance into the war, and for nearly two years Illinois farmers were too busy growing crops to devote much attention to organization. During these two years J. W. Kirkton of Livingston county was president of the Illinois Agricultural Association and Adviser Roy Bishop of the same county, secretary. The chief work of the association was legislative. A pure-seed law which it sponsored failed of passage in 1917, but the pioneer work done at that time insured its passage at the next session.

The close of the war, which brought with it a multitude of pressing farm problems, many of which are still unsolved, was followed by a reorganization to make it a factor of major importance in Illinois and the nation originated with W. G. Eckhardt, then farm adviser in DeKalb county. At that time I had been for a year a member of the executive committee of the association—long enough to learn that without ample funds its usefulness could not be great. I talked this matter over many times with Eckhardt.

"Let's Build a Real Organization"

"What we need is a big vision of what such an association can do," he said. "Make the membership fee $5 a year for each farm bureau member, hire the best man that can be found for secretary, and build up a real organization."

The idea of asking for $5 a year from every farm bureau member in the state was startling. I told Eckhardt that it could not be done and suggested that we start with one dollar a year. He persisted, however, and I was finally convinced that he was right.

Before the next session of the executive committee I sold the idea to Howard Leonard and Lyle Johnstone, and with their help the entire executive committee was converted to the plan. The executive committee presented this plan to the delegates at the meeting January 21—22. It was warmly defended and just as warmly attacked. After two days of discussion, which at times grew so heated as to threaten to break up the meeting, the new plan was adopted.

Personal Notes Not Needed

Three hundred farmers signed notes for $100 each in order that the organization might launch its new plans at once. So liberally and quickly did farmers rally to the support of the association, however, that these notes were never collected and were later returned to the signers. Many of them are now filed away among the treasured family possessions.

Harvey Sconce of Vermillion county was elected president of the reorganized association, and J. C. Sailor of Iroquois county vice-president. Howard Leonard was retained as treasurer. An executive committee of one representative from each congressional district was elected and the association was ready for business.

The new executive committee immediately employed D. O. Thompson, who had been doing outstanding work as farm advisor in McLean county, as secretary. A state-wide membership campaign was launched.

80,000 Members a Year Later

A year later when 900 enthusiastic farmers again gathered at Peoria for the annual meeting (Jan. 13-14) the association had 50,000 paid members and its net assets had grown from $1,800 to $574,000. The meeting was devoted strictly to business. The only set speech was made by J. R. Howard, president of the newly-organized American Farm Bureau Federation.

Howard Leonard was elected president and Z. M. Holmes of Peoria county vice-president. Geo. Fox of DeKalb county was elected as treasurer.

At the next annual meeting, Jan. 13, 1921, 106,413 members were reported. During the year the association had engaged heavily in cooperative marketing enterprises and had added a number of special men to its staff to handle this work, chief among them being W. G. Eckhardt as director of grain marketing, H. W. Mumford as director of livestock marketing, and J. R. Bent as director of the phosphate-limestone department. Leonard and Holmes were re-elected.

The annual meeting the following year was held at Springfield, Jan. 11-12. Howard Leonard was re-elected president. S. H. Thompson of Adams county replaced Z. M. Holmes as vice-president. Shortly after this meeting D. O. Thompson resigned as secretary and George Fox was hired to take his place, which position he has held since. R. A. Cervine of McLean county took Fox's place as treasurer.

The hard times on the farm which began during the later part of 1920 had their effect on the membership of the Illinois Agricultural association. When the delegates gathered at Chicago for the eighth annual meeting early in January, 1923, the membership had shrunk to 70,000. S. H. Thompson was elected president, which position he has held since. A. O. Eckert of St. Clair county was elected vice-president.

The ninth annual meeting was held at Galesburg during the third week in January 1924, Mr. Thompson was re-elected president and C. B. Watson of DeKalb county was elected vice-president. The chief features of this meeting were the decision to devote more attention to co-operative marketing in view of the lessened efforts of the American Farm Bureau Federation along this line, and refusal to endorse the McNary-Haugan bill. This measure was endorsed by the executive committee later in the year, however, after it was better understood.

At the tenth annual meeting, held at Champaign in January, 1925, Mr. Thompson was elected president for the third time and H. E. Goembel of Henry county was elected vice-president. The treasurer reported assets of over $250,000.

Enthusiasm Replaced by Spirit of Business

The Illinois Agricultural Association seems to be now established on a stable basis. Its membership is far below the high point of 1921, but with improving farm conditions there is reason to hope that it will grow. The initial enthusiasm has been replaced by the spirit of a business organization. While the association has grown more conservative with age, this is a natural development. In the long run the association may be expected to reflect the wishes of the majority of its membership in the future as it has for the most part in the past.

As a soundly financed and stable business organization of farmers the Illinois Agricultural Association has attracted nation-wide attention, and has become an organization that is a constant source of pride to the farmers of Illinois.

Warns Against New Movement

Hedgcock Tells Farmers That Too Many Small Local Stockyards May Kill Co-operative Movement

From the standpoint of Illinois farmers, the establishment of small stockyards or livestock sales agencies throughout the various districts of the state may eventually work a loss to livestock producers, according to Wm. E. Hedgcock, I. A. A. director of livestock marketing.

"The recent movement on the part of a few private interests to encourage the building and operation of local stockyard sales agencies will bring about the disselling or wrecking of local co-operative shipping associations and a general decline in our large terminal markets and producers commission associations may be expected," states Director Hedgcock.

If the livestock which is delivered to the small stockyards, Mr. Hedgcock points out, is purchased by local speculators who are forwarded to our large terminal markets, which is highly possible, it means that a large number of the farmers will pay two selling commissions, two yardage charges, two feed charges and perhaps an additional freight cost. This in itself means that the farmers would receive less for their livestock than they would have received if it had gone direct to the larger market.

Danger in Lack of Buyers

"Other problems confronting the farmers who choose to market their livestock through the small stockyards," Mr. Hedgcock states, "are the scarcity of buyers, an absence of buying competition and the lack of packing facilities at the local yards which will require shipping to distant points for slaughter. On the small yards there is a danger that only one or two buyers will be represented.

"The livestock producer must remember that in order to have a good outlet for his product he must have active competitive buyers present at the sale. He must also bear in mind that if the co-operative commission companies have a large bulk of the livestock in their control they will be in a better position to deal with the buyers than they would have if the livestock is in the control of a large number of small commission companies."

The price to the farmer, it is pointed out, depends upon the ratio of buyers to sellers. Under the local stockyards movement, Mr. Hedgcock believes, the farmers in the community will be at the mercy of so few buyers that their returns for livestock will be decidedly reduced.

1926 Finds Public Aware of Problem

(Continued from page 1, col. 5)

strong feeling that, after passing the bill, the administration might say, "why, we've given your farm legislation!" This thought, as expressed in resolutions lambasting this bill as "a means of salving the farmer with information, of which farmers never had so much in their lives."

No particular export corporation bills now pending in Congress were indorsed, but a committee was named to present the export corporation in the simplest form, compatible with effectiveness. Frank D. Barton was placed on this committee. Congress was asked to postpone all action on export corporation bills until the committee's bill is drafted.

Specific mention was made in the resolutions "that the agricultural question is fundamentally economical rather than political," which was a reiteration of the stand taken at the St. Paul conference in 1924.

Westerners Severely Criticize Coolidge

"We are obliged to differ from the administration," the resolutions read in a particularly vigorous section which followed criticism of the reasoning of President Coolidge before the A. F. B. F. convention, "not only in his statements in Chicago, but also in that portion of his message to Congress which dealt with agriculture.

"We protest against such a misrepresentation of the movement for equality in which the people of the great staple growing empire of America are enlisted with all their hearts.

"We protest against the abrupt dismissal of a petition in the formulation of which the best intelligence in agriculture has put in so many years of devoted and sincere study.

"We protest respectfully, but none the less with every ounce of power, that it is incumbent upon anyone who comes into the agricultural forum to thwart a constructive and practical program to have an equally constructive and practical program to suggest in its place.

Say Tariff Favors Other Classes Most

"We submit that, in view of the pitiable conditions exisiting among men who have spent a lifetime in hewing a destiny from the soil, anything less is a betrayal of faith.

"Wherever one turns, except in the price of the great staples of agriculture," the resolutions declared in expressing surprise at Coolidge's statements in Chicago, "the influence of the protective tariff is encountered. The farmer, consequently, while himself deriving almost none of the benefits, bears the burden and shares in adverse economic implications of protection to the full.

Why Not Protect Agriculture, Too?

"If it was wise on the part of Congress to stabilize our banking system through the federal reserve act and our transportation system through the Esch-Cummins act, then why not indulge the same solicitude for the 40,000,000 people who live upon the farm and whose purchasing power is so vital to our myriad of mills and factories?

"Finally we desire to say to Congress on this score that the time has come when it must choose between one of two alternatives—if industry insists that it cannot exist without the tariff, then it must take agriculture in on the deal. And, failing to do this, it should not blame the farmers if they invoke the principles that self-preservation is the first law.

Coolidge's Tariff Plea Denounced

"If the existing tariff is such a boon to agriculture then how can the fact be explained that, although this tariff has been in operation for five years, agriculture is at this hour staggering on the brink of complete collapse?

"With all due respect to the President, we desire to say that the farmers of this country know the source of their difficulties—they know that on the one hand they are carrying the heavy burdens of the protective system and sustaining the generous wage scales of organized labor, while on the other hand they are meeting world competition which industry and labor refuse to meet, and in these premises we demand of the sixty-ninth Congress that it enact legislation that will assure the same degree of equality for agriculture that industry and labor have so uncompromisingly demanded and received for themselves.

Labor and Industry Protected

"If it is not unsound to fix prices on steel, textiles and other similar commodities by protective legislation, then why is it unsound to fix them for agriculture by the same process? If it were not unsound to vouchsafe the Adamson law to organized labor, then why be so horrified at specific legislation for the nation's great basic industry?

"Already hundreds of thousands of farmers have been sold out by the sheriff, while many thousands of others will suffer a similar fate before relief can possibly come. Already more than 2,000 rural banks have been forced to close their doors, while the shadow of insolvency is hovering over hundreds of other banks which only a little while ago were the pride of their communities. Therefore let those who by plausible pretext seek to minimize the wrongs of the farmers pause before it is too late—let them have a care lest their attitude not only assure the final and complete collapse of agriculture but also a condition of affairs which in the not distant future will bring distress to every great industrial center.

Ridicule Co-op Bill

"In this connection and with a degree of amusement which shows that, despite our tragic condition we still have a sense of humor left, we note that the new measure sponsored by Secretary Jardine is to prove a means of salvation to the farmer by supplying him with a new and expert fund of information about the mysteries of co-operative marketing. And in these premises we desire to assure the secretary that it is not information that we need, but a fair price. As a matter of fact we have never had so much information in our life—it is about all we have left. But we wonder if when the Fordney-McCumber act in Congress someone had moved to substitute a bureau of information, whether this would have been satisfactory to industrial New England? Also we wonder whether organized labor would have been content with mere information in lieu of the Adamson law?

"This meeting desires to take cognizance of the enheartening action of the legislatures of 12 western states (including Illinois) which have lent the strength of their indorsement to the demand of a method of making the tariff effective for agriculture.

Commend Governor's Action

"We commend the governor of South Dakota in calling a conference of the midwest governors, which has resulted in the unqualified adherence to the proposition that the protective system should be extended to include the crops of agriculture of which we produce a surplus if the protective tariff is to be retained for industry. The voice of these men is the voice of the great agricultural region for which they speak. We consider that such a pronouncement cannot be ignored."

News of the Des Moines meeting evidently traveled fast. The following statement was issued at Washington by Secretary Jardine for publication Dec. 23:

Jardine Announces Consideration of Surplus

"Now that the plan to aid co-operative organizations has been placed before Congress, I feel that further and more definite attention can be directed to the agricultural surplus problem.

"During the past several weeks, I have had under consideration with co-operative marketing organizations a plan for aiding and assisting cooperative effort. A bill embodying this plan and carrying practically the unanimous endorsement of the entire co-operative movement in this country has been introduced in both branches of Congress. This plan, as I have oftentimes stated, should stand upon its own merit and not be confused or considered in connection with other agricultural measures.

"Discussing agricultural surpluses in my Annual Report released on December 7, I laid down certain broad principles which in my opinion, constitute the basis of any plan for the solution of this perplexing problem now facing the agricultural industry. Dealing broadly with the subject I stated that it "is one of the major economic problems of the nation. It does seem essential that this issue should receive broad recognition as a problem of national importance and, second, that public agencies should make every proper effort to co-operate in sound workable programs looking to its solution." I am opposed, as stated in my report, to any plan of government price-fixing or the handling of farm products by government agencies or officials. On the other hand, I said that "farmers through their organizations have a most powerful instrument to control the movement of surpluses into consumptive channels."

Surplus Remedies Coming to Common Ground

Again referring to my annual report, I stated that "the discussion of the problem of surpluses is entering more and more upon common ground and I look forward to an agreement upon the principles of a solution along the broad lines here suggested." I believe that, as things stand today, the most effective machinery in sight exists in the co-operative marketing movement. Any sound plan directed to the surplus question will be practically certain, in my judgment, to recognize the co-operative movement and carry the approval of cooperative leaders.

Refers to Lowden Plan

"A number of plans have been proposed which warrant thoughtful attention. Former Governor Lowden of Illinois has referred to a plan which, as I understand it, would have surpluses handled by co-operative organizations assisted by a Federal Farm Board of parallel importance to the Federal Reserve Board but in which there would be no governmental price-fixing and no buying and selling of farm products under the control of government officials. Secretary Hoover made an almost exactly similar proposal two years ago with the idea of giving agriculture the same stability as in industry. C. R. Noyes, of St. Paul, also has given a great deal of thought to this question and has worked out the details of a plan. Other proposals have been introduced in Congress and others are in the course of preparation.

To Call Conferences on It

"With the sincere feeling that a further crystallization of thought and development of a common aim can and should be secured on this vital problem, I have decided to call to Washington from time to time a number of leaders who can make a contribution looking to the laying down of a sound and effective plan. I have already issued an invitation to the agricultural editors of the country to come to Washington to discuss the surplus problem among other things in order that I might have the value of their knowledge and experience as reflected in different sections. I propose to call other leaders, starting immediately."

THERE ARE NOW 578 RADIO BROADCASTING stations in operation in the United States. Today every solitary channel of the air is occupied by at least one broadcasting station and there are now pending before the U. S. Department of Commerce more than 175 applications for new licenses. Experience and experiments have found that there are only 80 distinct wave lengths to serve all who wish to use the air at one time. It is estimated that $50,000 is spent every night to fill the radio ears of this country.

THE RUHM PHOSPHATE AND CHEMICAL COMpany is situated at Mt. Pleasant, Tenn., instead of Nashville, Tenn. as stated in the last Record.

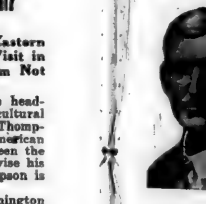
Woman Judged Best Feeder

Farm Bureau Tour Shows Mrs. Virgie Mathews Is Best Lamb Feeder in Montgomery County.

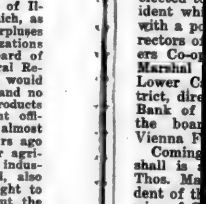
The best lamb feeder in Montgomery county is a woman—Mrs. Virgie Mathews. That was the consensus of opinion of the county's lamb feeders following a tour of the flocks on Dec. 19.

This tour was an unique demonstration in the proper feeding of lambs and was conducted under the auspices of the Montgomery County Farm Bureau, with Farm Adviser Snyder and Manager Roberts of the shipping association as directors. Starting at the farm bureau office with two or three members in one car, they drove to the farm of the first feeder, Nathan Wescott. Then he joined in and went to the next feeder, and so on until by the time the tour was well under way about eight automobile loads of interested feeders had joined the demonstration.

There were approximately 7,000 sheep and lambs on feed in Montgomery county. After the tour, which lasted from 7:30 in the morning until 6:00 at night it was considered that Mrs. Mathews had the best lambs of any seen on the trip. She personally supervises the feeding operations.



Is Sam Thompson Radical?



Farm Writer for 40 Big Eastern Papers Tells World That Visit in I. A. A. Office Proves Him Not

"Anyone who has visited the headquarters of the Illinois Agricultural Association, of which Sam H. Thompson, the new head of the American Farm Bureau Federation, has been the executive officer, will have to revise his idea of a 'radical'—if Mr. Thompson is to be so designated."

So states O. M. Kile, Washington farm correspondent who writes for about forty big Eastern city papers on "How Things Look to the Farmer."

"Occupying some 15 or 20 nicely furnished, glass partitioned offices in a high grade office building in Chicago, the Illinois unit of the Farm Bureau has built up a large, efficient and most business-like business organization. It is thoroughly departmentalized, budgeted and audited in the most approved style. Its co-operative departments supervise the handling of millions of dollars of farm products each year—it is at least seven years old—its tax department has gone before nearly all the county tax boards in the state and effected readjustments in farm land assessments that have saved Illinois farmers millions of dollars in taxes. A dozen other service features might be mentioned. It seems a little harsh to call such organizations 'radical' merely because it insists on legislative assistance in carrying out one feature of its co-operative marketing business."

ILLINOIS AGRICULTURAL ASSOC RECORD

Volume 4 | Issued Every Month for 63,000 *thinking* Farmers—February 1, 1926 | No. 2

EARL SMITH OF PIKE COUNTY IS NEW I. A. A. PRESIDENT

Convention Elects Three New Members To I. A. A. Committee

Members of 20th, 22nd and 24th Congressional Districts Nominate New Men for Executive Committee

Three new men were elected to the executive committee of the association at the close of the annual meeting held at Champaign – Urbana, Jan. 21 and 22. They are: Chas. Borgelt to represent the 20th congressional district in place of Earl C. Smith, Frank Oexner to succeed Stanly Castle of the 22nd district and Chas. Marshall as successor to Curt Anderson for the 24th district.

Chas. Marshall

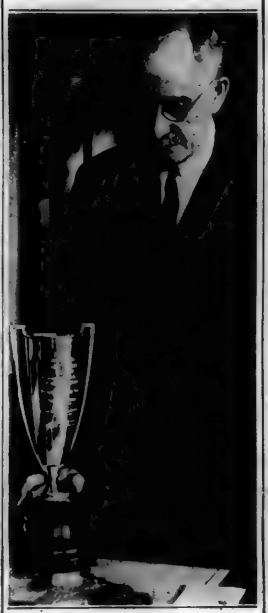
Chas. Marshall was born in the Blue Grass district of Kentucky. Forty-two years ago he moved to Mason county, Ill., where he took up a farm near Belknap and has remained a tiller of the soil to the present day. By following the livestock and grain principle of agriculture Mr. Marshall has developed his holdings until he now owns 2600 acres of land and manages 1000 acres of adjoining territory.

Marshall An Active Worker

When the Johnson County Farm Bureau was organized Mr. Marshall became a leader in organization work and has served on the executive committee since its origin. Three years ago he was elected to the office of county president which he now holds together with a position on the board of directors of the Illinois Cotton Growers Co-operative Association. Mr. Marshal is commissioner of the Lower Cache River Drainage District, director in the First National Bank of Vienna and president of the board of directors of the Vienna Farm Loan Association.

Coming from Kentucky, Mr. Marshall is a descendent of the late Thos. Marshall, former vice president of the United States, and likewise of Chief Justice Marshall, formerly of the supreme court.

"Chas. Borgelt gives more time to farm bureau work than any farm bureau president in the state." That is the reputation Mr. Borgelt holds with his neighbors and members of the Mason County Farm Bureau. Mr. Borgelt lives in Havana and owns and manages a half section of land just outside of the city where he grows acres and acres of alfalfa. Besides the Havana farm he operates another one in Fulton county just across the county line.



Frank Oexner

Mr. Borgelt has served as president of the Mason County Farm Bureau since its organization and is a strong disciple of farm organization and the production principles advocated by the University of Illinois. He is also a partner in a grocery store located in Havana.

(Continued on page 4, Col. 3.)

"OUR SAM" DONATES CUP

"To the Farm Bureau having the best information service to members and general public," is a part of the engraving on this sterling silver loving cup which Sam H. Thompson is personally donating as a farewell affair. Mr. Thompson thinks the fundamental requirement of a good farm bureau member is that he be well posted on the activities of his organization. From this it follows, Mr. Thompson thinks, that each county Farm Bureau and the state and national bodies should develop the very best possible information service.

A committee is to be selected by President Thompson soon which will take care of the details. It will be given to the lucky county at the annual meeting in January, 1927. When won three times by one Farm Bureau, it shall become its permanent possession.

Jardine Defines His Position on 8 Points; Tosses Some Bouquets

Secretary Tells 1,700 Delegates and Visitors That Surplus Problem Underlies Whole Farm Situation

Secretary Jardine, speaking before some 1,700 people at the Thursday luncheon during the I. A. A. annual meeting, hit seven points before coming to the one in which Illinois farmers are principally interested—the surplus. This was his eighth point.

At the outset, however, the Secretary made some statements concerning the Illinois Agricultural Association which should kindle the pride of every member of the association who has placed his faith and financial backing into it. Said he:

(Continued on page 3, Col. 4.)

Lowden Talks Surplus Amid Hearty Cheering at Annual Convention

Says Federal Farm Board Could Stabilize Farming Like Federal Reserve Board Stabilized Banking.

Former Governor Lowden, speaking before the largest assembly ever gathered at an annual meeting of the Illinois Agricultural Association —some 2,300 people—was received with a tremendous ovation and scarcely a minute passed during his hour of discourse without general applause and cheering.

In introducing "Farmer" Lowden, President Thompson said that Lowden knows farm problems from actually bumping into them, that he has been next to the soil for a long time and that he has been consistent in his attitude toward national legislation for farmers.

Proud of I. A. A.

"I am proud of the Illinois Agriculture Association," Mr. Lowden said. "When I am in other states I point out the achievements of the I. A. A. as examples of what farmers can do by organizing.

"And I hope that under the new leadership of Sam Thompson, the American Farm Bureau Federation will become as effective in its field as the I. A. A. has been."

* * *

Lowden had prepared a written address, but he tossed it away and did not refer to it excepting when he needed certain statistics.

Lowden's talk was especially significant because he gave the viewpoint endorsed and followed by the Illinois Agricultural Association on the relation of the export corporation idea and the co-operatives. The association's viewpoint was reflected in the endorsement of the general principles of the Dickinson bill later in the day. Lowden has also given a similar endorsement of the Dickinson bill, and even Secretary Jardine has stated, and repeated it at the annual meeting, that the Dickinson bill contains substantial ground for agreement.

* * *

Dickinson Bill Presents Feasible Plan

In the Dickinson bill is proposed a federal farm board with power to segregate abnormal surpluses, through co-operatives if they be sufficiently represented in the given surplus commodity, but if co-operative machinery is insufficient, the board would encourage the organization of co-operatives, and in the meantime use existing facilities for quickly skimming off the surplus in order to preserve the American price for the share of the crop consumed in America.

* * *

Lowden's theme was the surplus problem and reiterated his suggestion of a federal farm board, as is now incorporated in the Dickinson bill.

Lowden Wants Federal Farm Board

His idea is that a federal farm board could operate in farm produce similar to the federal reserve board in adjusting nation-wide credit facilities for the industrial world.

Acting through co-operative groups representing certain crops, such a farm board, Lowden said, might expect to prevent the ruinous over-production which, from time to time confronts agricultural producers "turning the surplus of the very essentials of life from a burden into a blessing."

(Continued on page 3, Col. 2.)

Eleventh Annual Meeting Proves Largest And Best One Ever Held; Delegates O. K. General Principles of Dickinson Measure

Of the Seven Even-Numbered Districts Which Were Due for Electing Executive Committeemen, Four Re-elected and Three Chose New Representatives.

THE tenth anniversary of the formation of the Illinois Agricultural Association was celebrated at the annual meeting in Champaign-Urbana, Jan. '21 and 22 with the biggest birthday party of any of the association's eleven annual events.

For at some of the sessions as many as 2,300 people were in attendance, and the trekking to the University from the farms in 92 counties was so heavy that the railroad officials were not sorry they had given fare-and-a-half rates for round trips.

OUR NEW LEADER

Meet your new president!

Here's what his home folks tell about him and, after all, home folks know a man best.

He was born in Pittsfield, Pike county, Feb. 19, 1886. His father was a college professor at Macon. In 1907 President Smith moved on the farm and has been there ever since. Mary Sanderson, a farm girl, was his bride. They were married in 1909.

The 160 acres upon which the Smith's now live is only a mile and a half from Mrs. Smith's girlhood home. This 160 was obtained by Smith's grandfather by grant from the government and has been in the family since then. In addition to this 160, there are 388 more acres, making the home farm of 548 acres which Smith lives on and actively operates. In addition, Smith has the active management of 578 acres.

Local People Give Him Their Responsibilities

Smith has been a member of his home school board at Detroit for 12 years and has been chairman of the board of the Christian church for seven. After passage of the 60 million bond issue, a mass meeting of the citizens of Pike county chose him as one of seven to look after the county's interest in that issue. When the 100 million bond issue was passed, a similar meeting selected him for the same capacity.

Smith joined the Farm Bureau in the original organization and became vice-president in 1921, president in 1922 and was elected by the 20th Congressional district, comprising nine I. A. A. counties, to the I. A. A. executive committee for the years 1923-24-25. He has been a member of the finance committee of the I. A. A., an important post.

Earl Smith New Chief

Chief among all business done by the delegates was the election of Earl C. Smith of Detroit, Pike county, as president to succeed "Our Sam" Thompson, who now wields the gavel of the American Farm Bureau Federation. As a result of friendly campaigns conducted by friends, three men were nominated —Earl C. Smith, Frank D. Barton of Cornell, Livingston county, and H. H. Taylor of Rapatee, Fulton county, in the order named.

Chas. R. Finley

Smith received 126 votes, Barton 64 and Taylor 3. Immediately after announcement of the outcome of the balloting, Barton jumped to the floor and moved that the election be made unanimous for Smith, which was done.

"This thing is bigger than Smith or me or any personalities," Barton fervently declared, "and I want you men who thought I was *it* to support Smith to the last ditch."

Finley Is Vice-President

Chas. R. Finley of Hoopeston, Vermilion county, a former executive committeeman, was elected vice-president over W. C. McQueen of Elgin, Kane county, 95-69, in an equally sportsmanlike competition.

Even-numbered Congressional districts were the ones which fell due at this meeting for election of new executive committeemen. Districts 12, 14, 16 and 18 re-elected their men. District 20, formerly represented by President Earl C. Smith, elected Charles Borgelt of Havana, Mason county. District 22 put in Frank Oexner of Waterloo, Monroe county, to succeed Stanly Castle of Alton, Madison county. Charles Marshall of Belknap, Johnson county, succeeds Curt Anderson of Xenia, Clay county, for the 24th district. These men hold office for two years and at the next annual meeting odd-numbered districts will be due for elections.

Earl's a Disciple of Sam

After his election, President Smith, who is known as a disciple of Sam Thompson, made the following statement:

"I have been a hearty supporter of the policies of the past administration and contemplate no changes at this time."

The I. A. A. meeting was scheduled by the University of Illinois as a feature of its annual Farmers' Week, which was also acclaimed a tremendous success.

Poultry and Egg Marketing ..... F. A. Gougler
Taxation and Statistics ..... J. C. Watson
Transportation ..... L. J Quasey

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, social and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Published once a month at 404 North Wesley Ave., Mount Morris, Illinois, by the Illinois Agricultural Association. Edited by Department of Information, Harry C Butcher, Director, 608 South Dearborn Street, Chicago, Illinois. Entered as second-class matter October 20, 1925 at the post office at Mount Morris, Illinois, under the Act of March 3, 1879. Acceptance for mailing at special rate of postage provided for in Section 412, Act of February 28, 1925, authorized October 27, 1926. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record. Postmaster: In returning an uncalled for or missent copy, please indicate key number on address as is required by law.

The I. A. A.'s Greatest Meeting

NEVER in the history of the association has there been such a splendid, fine-spirited meeting as the one just concluded at Champaign-Urbana—and this is written with the knowledge that there have been good meetings in the past.

On this page are the resolutions passed by the 194 delegates, each of which received their unanimous indorsement.

You owe it to yourself and your organization to read the resolutions carefully. The resolutions stand as guide posts for the officers to follow during the year. They are the dictates of the delegates.

The resolutions:

Thanks to the Hosts

1. The visitors and delegates to the Eleventh Annual Meeting of the Illinois Agricultural Association, held in Champaign and Urbana, Jan. 21-22, 1926, hereby express their appreciation for the courtesy and co-operation extended to them by the University of Illinois, the Champaign County Farm Bureau, Champaign and Urbana Chambers of Commerce, and all citizens of the Twin Cities and organizations thereof that have contributed to making this annual meeting a success from every standpoint.

Commend New Grain Company

2. We commend the spirit of co-operation now being manifested by the Illinois Agricultural Association and the Farmers' Grain Dealers Association in the establishment of an agency for securing better marketing facilities for grain, crops in the terminal markets of the country, and [illegible] reference to co-operative marketing of farm products and urge our members to continue their efforts toward the perfecting of more direct agencies for the handling of our farm products.

Co-ops Should be Exempt From Income Tax

3. Agricultural co-operative marketing associations in Illinois are largely barred from benefits of exemption under the Federal Revenue Act because of the law's restrictive language, and of unfavorable regulations of the Bureau of Internal Revenue. The Illinois Agricultural Association has been active in proposing certain amendments to secure for co-operative associations of this state, the benefits which Congress evidently intended to grant but which have not been accorded under interpretations of the act. Since we consider these amendments of great importance, we ask our officers to continue to press them in every proper way, and we urge members of Congress from Illinois to work for their early adoption.

Raise Tariff on Onions

4. Production of pickling onions has been an important farm industry in counties surrounding Chicago, but now faces extinction because the American farmer cannot compete with cheap foreign labor in this field without additional and effective protection. We urge, therefor, the enactment by Congress of a tariff amendment providing a duty of 50 per cent ad valorem, American valuation at port of entry, in place of the existing duty based on foreign valuation.

T. B. Testing Should Continue As Before

5. The Illinois Agricultural Association emphatically reaffirms its position, long maintained, with reference to the need and desirability of effectively eradicating the plague of bovine tuberculosis. We commend the work that has been done heretofore to that end.

We call for the continued adequate appropriation from both State and Federal governments to carry forward the work to the earliest possible conclusion. We further urge an emergency appropriation from the Federal government to meet the emergency now existing in Illinois.

Because of the nation-wide character of the work and the necessity for uniform administration, we urge the continuance of this work under Federal supervision, on the same basis as heretofore.

We further urge that the money already appropriated by the State of Illinois be made available for the payment of condemned cattle as rapidly as the testing of cattle can be effectively administered. In view of the emergency existing with reference to the milk supply of the city of Chicago we urge the fair minded and earnest co-operation of all the people of Illinois to meet the situation in justice to all parties concerned.

Protect Members from Thievery

6. Theft of live stock, poultry and other farm property results in a tremendous loss to the farmers of Illinois which we believe can be greatly reduced by organized protective effort through the Farm Bureaus for farm bureau members. We urge, therefore, that the executive committee of the Illinois Agricultural Association undertake at once a study of ways and means to accomplish this, leading as soon as possible to the adoption of some workable plan, applicable to all parts of the state, to be put in operation by the Illinois Agricultural Association and the county Farm Bureaus.

Commend New Reinsurance Company

7. We commend the organizations, namely,—Illinois State Association of Mutual Insurance Companies, Illinois Agricultural Association, County Farm Bureaus and local insurance companies for their co-operation in the organization of the Farmers' Mutual Reinsurance Company. We believe every Farmer Mutual Insurance Company in the state will be rendering a real service to Mutual Insurance by using one or more of the insurance services offered by the State Company.

Support Amendment to State Constitution

8. The present taxing system of this state has proved unworkable and unfair. It has thrown at least 85 per cent of the burden of supporting public institutions and functions on real estate which is probably not more than one-half of the property in the state and produces an even smaller proportion of the wealth of the state. This inequitable condition, under the limitations of the present constitution, cannot be corrected by the General Assembly. Until it is corrected, it is certain to grow worse. It is already interfering with the desirability of owning homes and farm lands and with their values. The certain end, if it continues long enough, is confiscation of property values of real estate.

We, therefore, pledge our support to the pending amendment to the revenue article of the State Constitution submitted for approval or rejection by the voters of the state at the general election of November, 1926. We regard the proposed amendment as embodying the changes necessary to permit the General Assembly to broaden and modernize our taxing system. We believe that it properly safe-guards the just rights of every citizen of the state in any new forms of taxation which may be established under its provisions.

Want Gas Tax As Lieu Tax

9. A tax on gasoline is generally recognized as fairly distributed on owners of motor vehicles, the chief beneficiaries of highway improvement, according to their use of the highways. Recognition of this fact, and the demand for better improvement of the highways, have led to the establishment of a tax on gasoline in all but four of the states of the Union.

We favor a tax on gasoline in Illinois on condition that the proceeds of the tax are used in improving and maintaining the secondary highways of the state known as State Aid roads, and on condition that it is used in lieu of some other highway tax and not in addition to other taxes. These principles were embodied in the Cuthbertson gasoline tax bill, which we supported in the 56th General Assembly. We hereby declare our continued support of a bill embodying these principles. Even with a gasoline tax which we here propose, property—chiefly farm property—will continue to carry the entire burden of improving and maintaining more than two-thirds of the public highways of the state.

Check Up On Legislators

10. Whereas, at the nominating primaries in April and at the general election in November of this year representatives to the Congress and State General Assembly will be nominated and elected at the first sessions of which matters of especial concern to agriculture will be pending, and

Whereas, it not only becomes but behooves organized agriculture in a more positive way to interest itself in the nomination and election of such persons.

Now, therefore, be it resolved that the Illinois Agricultural Association and the county Farm Bureaus during these coming primary and election campaigns earnestly search the past records and sympathies of all candidates along lines of legislation affecting agriculture and solicit from such candidates statements of position and commitments of action thereon.

Want Annual Meetings In Logical Order

11. We recommend the rearrangement as speedily as possible of the time of holding the Annual Meetings of County Farm Bureaus, of the Illinois Agricultural Association and of the American Farm Bureau Federation in the order as to time of the organizations so named. We believe that by this arrangement the wishes of the smaller units in the Farm Bureau Federation could be more effectively expressed, both as to the selection of delegates to such meetings and as to suggesting policies for consideration.

12. We favor such legislation as may be necessary to eliminate unfair discrimination against the use of corn sugar as a means of assisting in the absorption of the surplus of corn in Illinois.

13. We commend the work that has been accomplished with reference to the improvement of the Lakes to Gulf Deep Waterways and we urge adequate appropriation and speedy administration looking toward completion of that project.

We urge that due consideration be given to the protection of health and property of the people living adjacent thereto.

We also commend the proposed St. Lawrence waterway.

Indorse Principles of Dickinson Bill

14. The unfavorable situation of agriculture since the war has been due in large part to the working out of national policies which have expanded farm production to the utmost above domestic needs, on the one hand, while they have maintained a high level of farm production costs, on the other. Because of this, the responsibility of establishing a new national policy aimed to correct existing disparities and to promote economic equality for agriculture rests on the nation as a whole. Attempts to include the American farmer in the protective system by tariffs have been largely futile because the normal surplus of the important cash crops holds the domestic price to world levels regardless of tariffs.

Therefore, the farmers of Illinois join with the farmers of the other agricultural surplus states in asking the Sixty-Ninth Congress, as part of a definite national farm program, to create an export board or corporation under which producers can, at their own expense, control the marketing of their surpluses abroad in such manner as to sustain an American price for that portion consumed in America.

Many plans for dealing with the surplus problem have been proposed to Congress, some of which are now in the form of bills providing for export bounties, foreign credits, and other means and agencies.

The Illinois Agricultural Association, while reiterating its willingness to support any sound and workable plan to accomplish the desired ends, recognizes its responsibility to express its general judgment on the relative value of the several plans, some of which are:

1. Export bounty on each of several farm commodities approximately equal in amount to the import duty provided in each case, financed by an excise tax on the units of each commodity that move in trade.

2. Export bounty on each of several farm commodities approximately equal in amount to the import duty provided in each case, the bounty payable in form of due bills acceptable by the United States Treasury in payment of import duties.

3. Government loans to buyers abroad to provide funds for foreign purchase of our farm surplus.

4. Federal board to assist farm producers to control, segregate or dispose of surpluses abroad or at home, the actual buying and selling to be done wherever practicable through corporations created by associations of producers themselves, but financed as to sales abroad by an equalization fund from an excise tax similar to that proposed for the export bounty.

An export bounty, not administered by a central body empowered to segregate and control the surplus movement, would, in our judgment, be less effective than other proposals in adjusting domestic supply and demand at a fair price. The plan to finance bounty payments either from the United States Treasury or from diverted import duties in effect proposes a public subsidy against which the American Farm Bureau Federation has gone on record. The plan to loan additional funds to finance foreign purchases could not materially change the world price level at which the sales would be made, could not operate to maintain an American price for that portion consumed in America, and does not appear to be a proper solution for the further reason that since the war our farm exports have not been curtailed but on the contrary have found ready buyers at a world price and in volume greater than pre-war. The bounty and loan proposals do not tend to bring the organized producers into the market in control of the handling of their surplus.

(Continued on page 3, col. 3.)

Illinois Co-ops Sold $200,000,000 In Farm Products During 1925

Farmers' Elevators Handled Over Hundred Million Dollars in Grain; Livestock 31 Million

Nearly two hundred million dollars worth of farm products was handled by farmers' co-operative marketing associations in Illinois during 1925. With the exception of the farmers' elevators, all other marketing agencies which contributed to this tremendous turnover were 'mothered' by the association.

This total amount of co-operative business, which is comparable to the amount of business done by the largest industries in the state, is estimated at $181,928,000 for the past year. The figure was reached following a survey by the I. A. A. of the total sales of more than 1,000 co-operatives in the state including the co-operative marketing of corn, wheat, oats, livestock, dairy products, fruit, cotton, red top seed and wool.

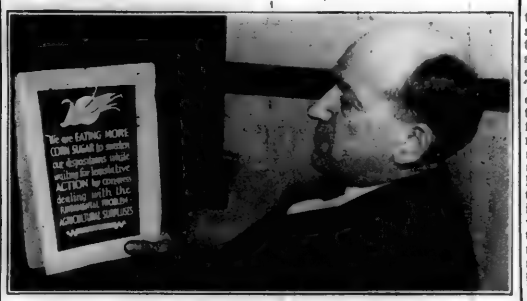
The figure does not include all of the products sold co-operatively by all the farmers in the state for during the past year $5,161,070 worth of Illinois livestock was shipped to and sold by the Producers Commission Association at Indianapolis, a smaller amount by the Producers at Evansville, Ind., as well as $200,000 worth of Illinois soft wheat which was marketed co-operatively through the Indiana Wheat Growers' Association.

Farmers' Elevators Lead

A large portion of this Illinois co-operative business was done by some 600 farmers' elevators in the state, a total amounting to $104,250,000 during the past year. In a recent investigation by the co-operative auditing department of the Illinois Agricultural Association it was revealed that approximately $174,000 worth of corn, wheat and oats is handled annually by the average farmers' elevator in this state.

Livestock ranked second in the amount of co-operative business done, totaling $58,000,000. Of this amount $31,000,000 worth of livestock was handled by the Producers Commission Association on the Chicago stockyards, $22,000,000 by the Producers on the National stockyards, East St. Louis and $5,000,000 by the Producers at Peoria. This gross total includes approximately 15 per cent of all livestock handled on the three major yards of the state and represents a decided increase in the amount of business as compared to 1924.

Third in the amount of co-operative business in Illinois stands the distribution of fluid milk, table cream, farm and factory butter and cheese. This amount of business for 1925 totaled $19,100,000, an increase of approximately 5 per cent over the previous year when the total figure was $18,035,000.



Fruit Business Increased

With somewhat less impressive figures but of equal importance to the farmers of Illinois is the amount of fruit, red top seed, cotton and wool handled by the co-operatives. Last year approximately $300,000 worth of fruit was sold co-operatively by southern Illinois farmers through the Illinois Fruit Growers Exchange, Centralia. This represents an increase of $50,000 over the total of 1924 and six per cent of all fruit sold in the southern part of the state.

In 1925 close to 83,000 pounds of wool was sold co-operatively by Illinois farmers. This was collected through the various county Farm Bureaus of the state, and through the livestock marketing department of the I. A. A. was sold at an amount totaling in the neighborhood of $35,000. Cotton amounting to approximately $18,000 was handled co-operatively by the Illinois Cotton Growers' Co-operative Association, a small but effective organization formed by the farmers in the extreme southern counties of Illinois.

THE COMBINED VOLUME OF BUSINESS OF THE cotton co-operatives of this country, since their organization five years ago, is approximately $400,000,000. They are doing a combined annual business of nearly $125,000,000.

Sweeten Your Disposition with Corn Sugar

George A. Fox, executive secretary, is seen here looking over the original drawings from which stickers have been made and are being placed on letters leaving the office of the I. A. A. The stickers say, "We are eating more corn sugar to sweeten our dispositions while waiting for legislative action by Congress dealing with the fundamental problem—agricultural surpluses."

Lowden Talks Surplus at Annual Convention

(Continued from page 1, col. 3)

"The federal reserve board seeks to do, in reference to space—what a farm board should accomplish, in reference to time, with the seasonal surpluses of the farm," the former Governor said.

"A surplus of the staple farm products is inevitable and necessary," said Lowden. "The farmer asks why, if this seasonal surplus is a good thing for everyone else, it should result in a loss to him. The farmer must always plan to raise more than just enough if the world is to be fed and clothed. Everyone recognizes this need.

The Farmer's Dilemma

"Business responds to the promise of a bountiful crop. The farmers' gladness, however, is tempered with the bitter thought that maybe these seeming blessings of a kindly Providence may bring him ruin. He is always confronted with this dilemma. If he produces too little, the world will go hungry and naked; if he produces too much, the surplus for the time may break the price he receives for his product to a point where it would have been better for him to have left his fields lie fallow.

* * *

"In the South we say cotton is king; in the Middle West, it is corn we have crowned. But these royalties are buffeted about by the traders of the world. They have been made to yield immense profits to everyone but those who produce them. And all the while we have been marketing not alone these great staples of the North and the South, but also each year a part of the fertility of the soil itself.

Needs Help in Burden

"If the farmer alone must bear the crushing burden of a surplus, under the slow operation of economic laws the time will come when there will be no surplus and they will go hungry and but half clothed. In the interest, therefore, of society as well as the farmer, we must contrive some method by which the surplus of the very essentials of life shall become a blessing and not a burden.

* * *

"There seems to be an analogy between the seasonal surplus of staple farm crops and the surplus credit resources of the banks before the adoption of the Federal Reserve System. The resources of the banks as a whole were adequate for the business of the country as a whole. It frequently happened, however, that an unusual demand at some particular place exceeded the resources of that community, while in other sections there were ample credit resources in excess of their need.

WILL COUNTY FARM BUREAU ORDERED POtatoes for its members at a laid down price of $1.42 a bushel. For the members who took advantage of this offer to the amount of 10 to 15 bushels, a saving equal to one year's membership fee was secured.

Don't Blame Mailman If You Missed Record; It's Once a Month Now

You'll notice that the line under the "flag" on page one says, "Issued Every Month for 63,000 *Thinking* Farmers," instead of "every other Saturday" as it has stated in the past.

The change is due to curtailment in the general budget.

The decision to eliminate a half of the issues of The RECORD as an economy measure came after the Jan. 2 issue was mailed, consequently no advance announcement could be made. So if you missed The RECORD of Jan. 16, it wasn't the mailman's fault. The RECORD is to continue in its present size, but monthly.

Greatest Meeting of the I. A. A.

(Continued from page 2, col. 3)

Therefore, be it resolved that the Illinois Agricultural Association endorse the general principles set forth in the Dickinson Bill now before Congress; a measure which provides for a federal board to administer an equalization responsibility for the surplus farm commodities, the finances to be put up by the producers themselves in the most practical manner, through excise tax or equalization fee, and the actual buying, storing and selling involved in handling the surplus to be done, with the support of the board, by corporations created and controlled by the producers themselves.

We're With You, Sam!

15. Whereas, Sam H. Thompson has for three years ably served the Illinois Agricultural Association as its president, and

Whereas, the farmers of America have recognized his sterling qualities and able leadership in calling him to the presidency of the American Farm Bureau Federation, and

Whereas, by reason of such position it becomes necessary for him to retire from the presidency of the Illinois Agricultural Association in order to assume the vast responsibilities imposed upon him by his new position.

Therefore, be it resolved that we hereby express our hearty appreciation for the service he has rendered and for the personal sacrifice which he has made in behalf of the interests of agriculture during his term as President of the Illinois Agricultural Association.

Be it further resolved, that we extend our heartiest wishes to him in such efforts as he may put forth for the cause of agriculture in particular and the American people in general, as he takes up his duties in his new position, and

Be it further resolved, that we pledge him our earnest support and our hearty cooperation in such endeavors as he may make as president of the American Farm Bureau Federation for the cause of agriculture.

Jardine Defines His Position on 8 Points

(Continued from page 1, col. 2)

"I have followed the progress of this association with real interest and I want to take this opportunity to express my appreciation of the strong, forward-looking character of the work of your organization. The men who founded and developed this association sensed clearly the trend of modern needs in the field of farm organization. They need not only the vision to see what such an institution might mean to the farmers of Illinois; they had the sound, practical sense that financed it securely and shaped its activities out into those fields where they were genuinely effective. It was my pleasure last summer to spend a brief time hastily surveying the different projects then carried on by your association. Your activities in marketing, taxes, auditing and along numerous other lines manifestly react to the benefit of the men on the farm."

* * *

Summarized briefly, his eight points were:

1. Taxes. Farmers tell the department of agriculture that high taxes is their second most important concern, next to low prices, which comes first. I firmly believe that our system of valuation can be materially improved and the tax burden of farmers can be substantially lightened by reducing present inequalities in assessments and by giving greater consideration to the earning power of the land in making such assessments. Your own association has done a fine piece of work in this state in ironing out inequalities between the assessment of farm lands and in other property and in building a foundation for a more satisfactory administration of the general property tax.

* * *

2. Land Policy. Not in favor of aggravating the crop surplus problem by the government helping develop new lands any further than is necessary to complete present projects. It's better to reforest than to develop new and competing farm lands.

* * *

3. Farm Credit. Much remains to be done in bringing all credit facilities to farmers. This is especially true of the federal intermediate credit system. It is necessary to develop credit machinery which serves the farmer adequately and reasonably in times of depression as well as in times of prosperity.

* * *

4. Freight Rates. I believe we must have substantial readjustment in freight rates. High freight rates contributed to the farm depression. The whole freight-rate structure needs overhauling. Adjustments should be made which take into account the market value of farm products. On the other hand, railroads need adequate income to render efficient and adequate service.

* * *

5. Roads. It is important to the nation that highway development be so directed that it bring good roads as near as possible to every farmer. Necessary that state and federal governments co-operate.

* * *

6. Water Developments. Our navigable waterways should be made effective outlets for products of the farm. Secretary Hoover has pointed out that many competing agricultural sections of the world are close to seaboard, that ocean rates are on a pre-war basis, that our increased rate to sea-board therefore penalizes Mississippi Valley producers in foreign markets by just this amount—from five to twelve cents a bushel, that one remedy lies in improvement of our waterways, thus reducing freight costs.

* * *

7. Co-operative Marketing. As an individual the farmer can do little or nothing to improve marketing conditions, but through organization, the financing, insurance, standardization, storage and distribution of farm crops may be made more efficient and less costly. I am anxious to promote the development of co-operative marketing along sound lines. In order that the department may render co-operatives even greater assistance than in the past, I have given my support to a measure now before Congress, expanding the department's work in the field of marketing research and service. This section of the country does not lack successful co-operatives. Your farmers' co-operative elevators are among our best examples of successful co-operation. It is my opinion that you have the foundation on which to build a thoroughly effective marketing organization, and I believe the time is soon at hand when the grain producers of the middle western grain states will join in a sound grain marketing organization. Such an effort, in my opinion, is worthy of early consideration. *(The Secretary had reference in the above to the work now being done in setting up the National Farmers' Elevator Company, Co-operative, with its subsidiary selling agency on the Chicago market, the Rural Grain Company.)*

* * *

8. Surplus. No longer is it the size of the crop that counts, but its purchasing power. The surplus frequently is not a blessing to the farmer, for even a smal surplus tends disproportionately to lower the market value of the whole product. This is the surplus problem—this uncontrollable aspect of agricultural production that tends to put the farmers at the frequent disadvantage in the field of exchange relations. *It is a problem underlying the whole agricultural situation.* I believe we must recognize it on that basis.

A National Problem

The nation must recognize this problem for it is a matter of national concern. I am already on record with my belief that public agencies should make every proper effort to co-operate on sound workable programs looking to its solution.

I am opposed to price-fixing. I am opposed to government handling of farm products.

It has seemed to me, however, that something could be done toward reducing the hand[illegible] which surround certain phases of agricultural merchandising—the term merchandizing being here used in its broadest sense. It has seemed that this could and should be done by some farmer-controlled agency. When Mr. Dickinson came forth with his new bill, introduced in the House January 4, it appeared that we had approached some common ground, and I frankly and openly said so. I tried to make it plain that I want to give full consideration to constructive proposals directed to the surplus problem, even though I did not favor all the provisions of the Dickinson bill as introduced. There has been general discussion of late as to the formation of a federal farm board or commission as embodied in the Dickinson bill and other proposals. *I see in a rightly constituted agency of this nature the possibility of attacking the surplus problem in a constructive and scientific way.* Furthermore, there is as broad field of action for such a board as a powerful spokesman for American agriculture.

Conferences to Continue

I have called into conference on this surplus problem men whom I consider among the best equipped in the country to contribute to a solution. I have scheduled other conferences during the remainder of January and the fore part of February. There is a great division of opinion. The whole subject is controversial. *But the economic conditions back of this condition are undeniable.* The American people will profit in my judgment, by giving fair-minded, sympathetic consideration to those conditions. We should bury all bitterness in these discussions. Men are sincere and we will only have success when we pound out every proposal upon the anvil of constructive debate. *I look forward to ultimate action on this problem which will be sound, constructive, and in the interest of the nation.*

IN A CHECK-UP OF THE ASSESSMENTS ON FARM lands as compared to city property in Franklin county by D. C. Watson, I. A. A. taxation specialist, in co-operation with the Franklin County Farm Bureau, it was found that farm lands were assessed at 38.6 per cent of their sale values and city lots and houses at 29.5 per cent. These facts were brought to the attention of the County Board of Equalization but no action was secured. The Farm Bureau then appealed to the State Tax Commission and the case is being considered by that body.

1925 Annual Report Of Association Now Printed In Booklet

80-Page Illustrated Review of Year's Work Ready for Distribution to Bureaus and Members

"What Happened in Illinois Farm Organization Circles in 1925" might well have been the title of the annual report of the I. A. A. recently printed in a most comprehensive 80-page booklet and now ready for distribution to Farm Bureaus and members.

This publication, which reviews the many fields of the association's activities, includes 38 pictures and illustrations placed to add color and clearness to the facts as reported in a concise manner by each director of the 15 departments.

From time to time the association has received many requests for information concerning "What is the I. A. A. and What has it Done?" In this booklet may be found the answers and the member or solicitor by gleaning certain paragraphs finds the information that he needs in explaining the benefits of farm organization to a prospective member.

Special Features Included

Opening with a drawing on the front page depicting the growth of the I. A. A. from the first meeting in 1916 to the tenth anniversary the recent annual meeting held at Champaign-Urbana, there may be found pictures of the officers and executive committee; the departmental directors; the office staff; the county farm bureau president's breakfast, Chicago, Dec. 8; the boys' and girls' club breakfast, Chicago, Dec. 2; the I. A. A. fair exhibit; the picnic issue of THE RECORD; and maps of Illinois showing the location of farmers' elevators, county Farm Bureaus, livest[illegible] associations [illegible]

[illegible] Brief History of the Illinois Agricultural Association" by C. V. Gregory, editor of Prairie Farmer; [illegible] Farm Bureau is Firm [illegible] by Arthur C. Page, edito[illegible] Judd Illinois Farmer and the annual crop review [illegible] mitted through the co-operation of the United States and Illinois departments of agriculture.

Sam H. Thompson, president of the A. F. B. F. and former president of the I. A. A., has included a message to the 63,000 Illinois farmers and extends admonition for future progress. In the introduction, Secretary Fox points out:

Divided Into Five Sections

"The material for this, the Eleventh Annual Report, has been assembled under five main divisions to indicate the general character of service which is attempted by the various members of the staff of workers. The field of service is that of a general farm organization extending its usefulness into the fields not covered by other agencies of a public, semi-public or private nature. These five divisions characterizing this service are administraton, organization, public relations, financial business service and marketing. The accomplishments in the fields of service outlined fully justify the costs involved and the vast amount of personal effort which many over the state have so generously given to bring about more tolerable conditions for the farmers today and to lay the foundation for a prosperous and contented agrarian population in the future."

Turning over the pages from department to department certain facts may be found as follows:

More than 600,000 pieces of mail were handled by the general office of the association during 1925, not including the general routine of office work.

In 1925 the organization department supervised membership drives in 50 Illinois counties. Under the association's campaign plan this work was so arranged that the local men signed, on an average, 75 per cent of the membership, the remainder being signed by state solicitors going over the territory, following the local men.

Reserve Fund Over $273,000

The financial report shows the association's general reserve fund totaling over $273,000, an accomplishment that has gained for the organization the reputation of being the most strongly founded farm association in this country. It is also shown that the expenses of the organization for 1925 were $21,545.97 less that the income for the same. period, thus giving an addition to the reserve of that amount.

During the 12 months of 1925, 12,982 clippings bearing the name "Illinois Agricultural Association" were returned by a commercial clipping bureau which clips news articles in a large portion of the newspapers of the United States, according to the report of the information department. This gives a general idea of the news of the association's activities distributed through the press. The amount of clippings returned last year was 50 per cent more than 1924, 400 per cent more than 1923 and 300 per cent greater than the clipping returned in 1922.

Report of the legislative committee for 1925 includes work of state legislation including the proposed amendment to the state constitution concerning taxation, a state gasoline tax law and a bill to facilitate the eradication of bovine tuberculosis as well as analyzing all bills that were introduced in the legislature to protect Illinois farmers against detrimental law-making.

Tax Department Saves $2,000,000

The legal department functioned chiefly as a legal counsel for the various departments and activities of the association with special work being done on tax hearings, grain problems and legislative matters.

Accomplishments of the taxation and statistics department have saved for Illinois farmers approximately $2,000,000 annually. This was gained through securing reductions in the tax assessments on farm lands to an amount [illegible] the Re- [illegible] ductions as [illegible] were secured in several counties.

The transportation department collected 594 claims totaling over $16,000 for Illinois farmers during the last year. Other work of the department included investigations in freight rate structure, reduction in limestone rates, represented the farmers in hearings regarding the installation of light and power lines as well as telephone rates and service.

Reduces Auditing Costs

During the last year 73 farmers organizations joined the Illinois Agricultural Co-operation Association, the auditing and business advisory service of the association. This brings the total membership up to 185. One hundred eighty-nine examinations were made at a reduction of 20 per cent in costs as compared to the previous year and decidedly lower than the general commercial costs of equal ability.

Through the limestone-phosphate department, farm bureau members in Illinois during 1925 were able to secure approximately 750,000 tons of limestone at a contract price.

By co-operation of the association, the county Farm Bureaus and the Illinois Association of Mutual Insurance Companies, the Farmers Mutual Reinsurance Company was organized with over $700,000 direct insurance in force. In a few years it is estimated that this organization will save the farmers of this state two million dollars annual in insurance costs.

Dairy Marketing Service Rendered

The fruit and vegetable department which functions as the Illinois Fruit Growers Exchange, Centralia, handled approximately $300,000 in fruits and vegetables for southern Illinois Farmers in 1925. This volume was distributed in 105 different cities in 25 states including points as far south as Jacksonville, Fla., and north to Portland, Me.

Last year the dairy marketing department assisted in organizing five co-operative associations. Field service was rendered in eight counties. Seventy-one organization problems were handled in 18 counties. In 32 counties merchandising service was rendered.

The grain marketing department completed arrangements with the Indiana Wheat Growers Association, so that the soft wheat of Illinois farmers could be marketed co-operatively. It was largely through this department that the formation of the National Farmers' Elevators Grain Company has been made possible.

Poultry Marketing to Start Next

More than $104,000,000 in livestock was marketed co-operatively in Illinois in 1925 by the Producers Associations, livestock commission companies formed and fostered by the I. A. A. livestock marketing department. This department also handled 82,909 pounds of wool and assisted in the Illinois Farm Bureau Serum Association.

Educational work preparatory to the organization of poultry and egg marketing associations in many Illinois countjes was carried on by the poultry and egg marketing department of the association.

You Can Get Full Text of Important Speeches if You Write For Them

Space does not permit printing more than excerpts from the addresses made at the annual meeting, but anyone who wants a copy of any of the principal ones can get one as long as the supply lasts by writing the information department of the I. A. A., 608 S. Dearborn Street, Chicago.

You can also get a copy of the annual report for 1925 and the report of the Illinois Farm Relief Committee.

Convention Elects Three New Members

(Continued from page 1, col. 1)

Many farmers of this state need little or no introduction to Frank Oexner, newly elect committeeman from the 24th congressional district. For the last three years Mr. Oexner has worked with the organization department of the I. A. A. in the solicitation of membership in more than half of the counties of Illinois. He lives near Waterloo and has served as secretary of the Monroe County Farm Bureau.

Mr. Oexner owns and operates an 80-acre farm and has developed its fertility to more than four times its original produciveness. Several years ago the land, of which Mr. Borgelt's farm is a part, produced about seven or eight bushels of wheat to the acre. During the last season Mr. Borgelt's wheat yielded an average of 32 bushels. He credits this increase due to the use of limestone and sweet clover.

Earl Smith is New I. A. A. President

(Continued from page 1, col. 5)

Outstanding among the official [illegible]tions taken by the delegates was [illegible]e endorsement of the general [illegible]inciples set forth in the Dickinson [illegible]ill, now pending in Congress, which was mentioned by Secretary of Agriculture Jardine in his speech at the Thursday luncheon as the one measure offering substantial ground for agreement. It is also the bill which contains the federal farm board idea suggested by former Governor Lowden in the past and reiterated by him amid hearty applause by 2,300 people at the Friday luncheon.

A summary of all the resolutions will be found on the editorial page.

Conference at Carmi Feb. 12 Will Discuss Future of Wheat Pool

Whether or not the Indiana Soft Wheat pool shall be extended further into White, Gallatin, Edwards and Wabash counties and other parts of southeastern Illinois will be decided in a conference of all interested parties at Carmi, Feb. 12, according to Chester C. Davis, director of grain marketing of the Illinois Agricultural Association. Reports from the first year's operations of the pool in the four counties named are generally satisfactory.

I. A. A. Increased Its Financial Reserve in 1925, Auditor's Certified Report Shows

THE most outstanding point of interest about the Illinois Agricultural Association as seen by other organizations and business interests is its extraordinary financial stability.

During 1925 the association lived within its income and saved the excess of income over expense, which was $21,545.97. This sum was invested in safe securities by the treasurer, R. A. Cowles. The total of the general reserve fund is now $273,606.85 and it is invested in Liberty and other safe bonds.

The financial standing as found by the independent auditors, Frazer and Torbet, is as follows:

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Volume 4 | Issued Every Month for 63,000 *thinking* Farmers—March 1, 1926 | No. 3

REAL BATTLE FOR EQUALITY FOR FARMERS BEGINS MARCH 1

I. A. A. Wins Long Fight in New Federal Tax Bill

Co-ops Exempted From Income Taxes; Saving Over Million $s a Year

Two Years' Persistent Effort by I. A. A. Ends in Victory; Revenue Law is Clarified After Much Opposition.

Due largely to the persistent efforts of the Illinois Agricultural Association through George R. Wicker, director of the department of cooperative accounting, the new federal tax bill as agreed upon by the conference committee appointed by the House and Senate to conciliate points of difference between their respective bills, a clarification of the exemption rules concerning farmers' cooperative marketing and purchasing associations has been obtained which means an annual saving to Illinois farmers' elevators of approximately $75,000.

George R. Wicker

The victory represents nearly two years of effort by the Illinois Agricultural Association. In the past, farmers' cooperatives have experienced an interpretation of the exemption clause which has been out of harmony with the intent of the cooperative marketing laws as enacted by Congress, consequently many cooperative organizations paid from $200 to $300 taxes a year when they should have been exempt. The clause was re-worded through suggestions of the association and the American Farm Bureau Federation, whose support was enlisted, and when Congress gives its final O. K. to the conference tax bill, the exemptions will be clarified and definite.

Illinois Saves $75,000 Annually.

About half the farmers' elevators in Illinois pay income tax, Mr. Wicker finds, these paying from $200 to $300 a year. The clarification exempts them and results in a saving estimated at $75,000 annually. There are about 4,500 farmers' elevators in the United States, Mr. Wicker says, and about half of these have been paying income taxes. Combining the saving to the nation's farmers' elevators and that given other cooperatives, a total annual saving of about $1,125,000 results.

The I. A. A. has had representatives at Washington on several occasions in behalf of the exemption problem. Mr. Wicker appeared before the House ways and means committee last fall urging a clarification, but due to opposition from the treasury department officials who claimed the changes unnecessary, the House committee did not include the I. A. A. changes in the original bill recommended to the House and subsequently passed.

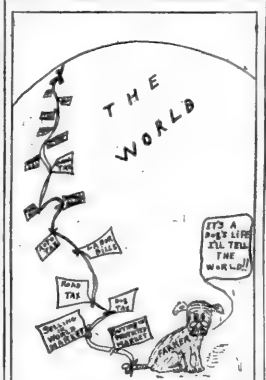
Victory Followed Defeat.

Although defeated before the House ways and means committee, the I. A. A. persisted. The case was brought to the attention of the Senate finance committee where, after considerable effort, favorable action was accorded it and an amendment was made to the tax bill in the Senate covering the I. A. A. request. This amendment was subsequently adopted by the conference committee, which means enactment when the entire tax bill is finally passed by Congress, which is now considered a mere formality.

25 States Reached by Illinois Fruit Grower's Exchange

During 1925 the Illinois Fruit Growers Exchange at Centralia, "mothered" by the I. A. A. and Farm Bureaus, handled products from 35 shipping points which were sold direct to 105 markets located in 25 states.

Not more than 1500 cars of peaches will be signed for 1926 and it was decided at the Exchange's annual meeting. By limiting the amount handled, the quality can be bettered, producers who are chronic kickers can be left out and a general increase in efficiency will result, it is believed.



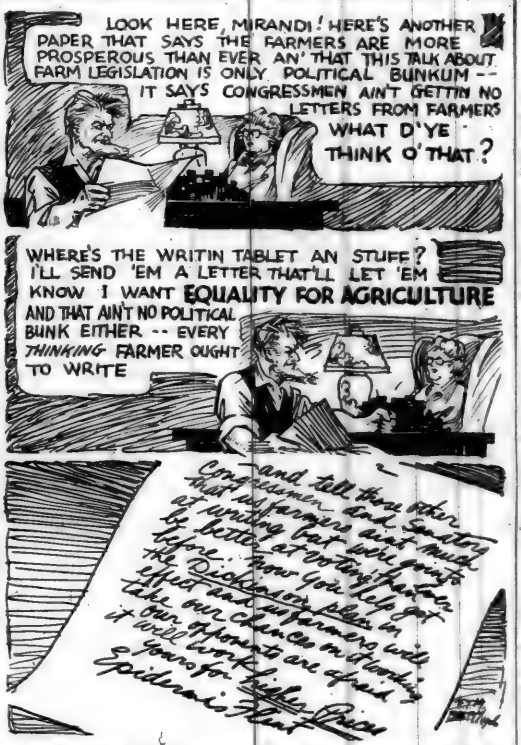
Sam Thompson's Silver Cup Arouses Interest of Many Farm Bureaus

Information about what your county, state and national Farm Bureaus are doing in your behalf ought to be more prevalent this year than ever before, judging from the interest shown by the county Farm Bureaus in the silver loving cup to be awarded by Sam H. Thompson to the Farm Bureau having the "best information service to members and general public."

The information service of each Farm Bureau which enters the contest will be judged next January by a committee yet to be named by Mr. Thompson. In judging, the committee will use the following scorecard:

Farm Bureau official organ	40 points
News in papers of county	40 points
State news	10 points
Special features (posters, radio speeches, special postcards, stickers, etc.)	10 points
	100

ANYTHING ELSE?



WHAT ELSE CAN WE TIE TO HIS TAIL?

Miss Lillie Brandt, 16 years old, won first place on this cartoon in a contest in the Sibley High School in Ford county. Excuse us, Miss Brandt, but we couldn't resist adding two more signs to your dog's tail—the first two.

A "JUNIOR FARM BUREAU" IS ONE OF THE major projects of the De Witt County Farm Bureau this year.

If You *Feel* The Same, *Do* The Same!

Every letter to a Congressman or Senator from an Illinois farmer is a bullet that hits its mark in this great battle for "Equality for Agriculture." Use your pen—it is mightier than a sword—and do *your* bit to win this economic war! *Your* organization can be no stronger than the moral support behind it from the members. Do *your* bit NOW!

New I. A. A. President Announces Committees To Serve During 1926

Number of Advisory Committees Reduced to Save on Traveling Expenses; 13 Departments Under 5 Divisions

The advisory committees which will guide the work of the Illinois Agricultural Association during 1926 were announced by Earl C. Smith, new president, at first meeting of new executive committee.

The number of advisory committees is cut down this year in order to economize on traveling expense, each of this year's committees being given more responsibility. The 13 departments, each of which had a separate advisory committee last year, are brought under five functional headings.

The committees and personnel: Finance—William H. Moody, Port Byron, Rock Island county, chairman; Charles R. Finley, Hoopeston, Vermilion county; A. R. Wright, Varna, Marshall county. Organization—C. E. Bamborough, Polo, Ogle county, membership acquisition; Frank Oexner, Waterloo, Monroe county, membership collections; R. F. Karr, Iroquois, Iroquois county, information; L. R. Marchant, Galesburg, Knox county, farm adviser.

Public relations—Frank D. Barton, Cornell, Livingston county, legislation; R. K. Loomis, Makanda, Jackson county, transportation; J. L. Whisnand, Charleston, Coles county, taxation; E. W. Rusk, Carlinville, Macoupin county, farm adviser.

Financial business service—G. F. Tullock, Rockford, Winnebago county, insurance; Charles Borgelt, Havana, Mason county, farm supplies; B. H. Taylor, Rapatee, Fulton county, accounting; Ralph E. Arnett, Pekin, Tazewell county, farm adviser.

Marketing—C. R. Finley, Hoopeston, grain; Samuel Sorrells, Raymond, Montgomery county, livestock; William Webb, Joliet, Will county, dairy; Charles Marshall, Belknap, Johnson county, poultry; W. L. Cope, Salem, Marion county, fruit and vegetable; J. H. Lloyd, Carthage, Hancock county, farm adviser.

Dickinson Bill's the Flag; Sam Thompson Fires Opening Volley

House Committee on Agriculture Begins Hearings; Gossip Says Bill Will Be Reported Out Favorably

MARCH 1 in the date set for the beginning of hearings on the Dickinson bill by the House committee on agriculture at Washington. And the economic war for "Equality for Agriculture" with industry and labor is on at close range!

Every member of the Farm Bureau will be represented by Sam H. Thompson as president of the American Farm Bureau Federation, who fires the opening volley. Other representatives of the American Farm Bureau Federation and of other farm organizations will then have their say.

Business Interests Back Farmers

Backing up the farm organizations in their fight for the Dickinson bill is the "Executive Committee of 22," appointed to carry on the pledge to the Dickinson plan given by the All-Agricultural Area Conference at Des Moines, which represented business interests closely allied to farming in 11 states of the Middle West. Earl C. Smith, president of the Illinois Agricultural Association, is on this committee representing Illinois in company with George N. Peek of Moline who is chairman and also president of the American Council of Agriculture which was formed at St. Paul after the defeat of the McNary-Haugen bill in the spring of 1924 for the sole purpose of securing "Equality for Agriculture."

The House committee on agriculture has expressed itself as not wanting to hear any testimony concerning the seriousness of the agricultural situation. Members of the committee say they know what it is. The thing they want to hear is some feasible plan which will give agriculture equality with industry and labor.

Strong Front for Dickinson Plan

The Dickinson plan, which really is a plan worked out by farm leaders in cooperation with Representative Dickinson of Iowa, represents the most substantial common ground for agreement of any relief bill in Congress, and for that reason has the best chance of passing. Eastern farm organizations have endorsed it and a more united front prevails for this plan than for the McNary-Haugen bill.

Gossip from Washington already has it that the House committee on agriculture will vote the Dickinson plan out with a recommendation that it pass—but that is gossip.

All indorsements of the Dickinson plan—including that given it by the Illinois Agricultural Association at the annual meeting—have been general and apply to the general principles, which, briefly, call for creation of a Federal Farm Board in connection with which the producers can control and dispose of the surplus above domestic needs of the major farm commodities in such manner as to maintain an American price in the home market, the finances to be derived in the most practical manner from all producers, and the actual buying, storing and selling involved in handling the surplus to be done by associations or corporations created and controlled by the producers themselves. These are the principles sought to be established in the Dickinson bill.

EXECUTIVE COMMITTEE
(By Congressional Districts)

1st to 11th	William Webb, Route One, Joliet
12th	G. F. Tullock, Rockford
13th	C. E. Bamborough, Polo
14th	W. H. Moody, Port Byron
15th	B. H. Taylor, Rapatee
16th	A. R. Wright, Varna
17th	F. D. Barton, Cornell
18th	R. F. Karr, Iroquois
19th	J. L. Whisnand, Charleston
20th	Charles Borgelt, Havana
21st	Samuel Sorrells, Raymond
22nd	Frank Oezner, Waterloo
23rd	W. L. Cox, Salem
24th	Charles Marshall, Belknap
25th	R. K. Loomis, Makanda

OFFICERS

President, Earl C. Smith	Detroit
Vice-President, Charles R. Finley	Hoopeston
Treasurer, R. A. Cowles	Bloomington
Secretary, Geo. A. Fox	Sycamore

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, social and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Published once a month at 404 North Wesley Ave., Mount Morris, Illinois, by the Illinois Agricultural Association. Edited by Department of Information, Harry C. Butcher, Director, 608 South Dearborn Street, Chicago, Illinois. Entered as second-class matter October 20, 1925 at the post office at Mount Morris, Illinois, under the Act of March 3, 1879. Acceptance for mailing at special rate of postage provided for in Section 412, Act of February 28, 1925, authorized October 27, 1925. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association RECORD. Postmaster: In returning an uncalled for or misent copy, please indicate key number on address as is required by law.

The Chicago Producers Situation

THE hearing on the citation concerning the Chicago Producers Commission Association has been concluded. The reams of testimony, much of which was simply hearsay on the part of some witnesses and would not have been admitted as evidence in a regular court, now lies before Secretary Jardine for his review and final decision which is expected shortly.

During the nine-day hearing, three hog salesmen—Fred Zeiss, George Parmenter and Bob Cranston—confessed to receiving money from John Reilley and R. Shefler, yard traders, for the privilege of operating in their alleys, and for receiving "throw-outs."

Immediately following their confession, they were discharged. In order to continue taking care of the Producer hog business, the St. Louis and Indianapolis sister organizations loaned hog salesmen who are serving until permanent, competent salesmen are secured.

Cooperative marketing is a comparatively new system, but it must necessarily, at least in the beginning, draw its employees from among those who have received their training in the employ of old-line commission firms. Unfortunately a few of these men have proven to be dishonorable and dishonest. In this case it is the misfortune of the farmers' organization to have had to shoulder the blame—and they are not dodging their share of it—and the employee's moral downfall is being used by old-line interests against the principles of cooperative marketing.

The facts disclosed by the hearing sink home the ever existing responsibility of any board of directors and the management to whom it delegates authority. The management and directors who hold the reins of authority and have the responsibility of guiding a cooperative dare not let those reins escape their constant attention, or else the organization will get off the road which the members want it to travel. The Chicago Producers board of directors is meeting its responsibility courageously, has the confidence of the farm organizations and I. A. A., and merits the utmost confidence of the country.

The interest of the Illinois Agricultural Association in this matter is that our cooperative marketing enterprises shall be conducted honestly and efficiently. There is absolute necessity of employing men who are thoroughly informed on the principles of cooperative marketing and who have the ability and courage to honestly represent the farmers' interests.

Speaking of the 1925 annual report of the Illinois Agricultural Association, the Springfield Journal recently stated: "Every farmer would find something in this report to interest him; certainly it is enough to inspire hope in the ability of farmers to conduct so great an association for their mutual benefit. The pity is that every farmer in the state is not a member and giving aid to the movement."

Emphasize the Last Sentence

EMPHASIS should be placed on the last sentence of the story on the opposite page concerning the secret subsidy given the "County Agent and Farm Bureau" magazine. If the exchanges have a legitimate fight against cooperative marketing, why not come out in the open?

"Serving 63,000 *thinking* farmers, the Illinois Agricultural Association, through five divisions, those of administration, organziation, public relations, financial business service and marketing, seems to have gone far during the year 1925 towards its declared object of bringing about more tolerable conditions and of laying the foundation for a prosperous and contented agrarian population. . . . It *pays* to organize."—Rock Island Argus.

Are Farm Bureau Members "Real Farmers"?

USUALLY the Illinois Agricultural Association does not reply to published attacks upon the organization because nine times out of ten an attack is its own answer.

In the case reprinted below, however, George E. Metzger, I. A. A. organization director, could not bear remaining silent. The first letter was written to and printed in Prairie Farmer of Feb. 13 and the second is Mr. Metzger's answer, submitted to Prairie Farmer.

We Are All Wrong

How does it come that you recommend policies advanced by the farm bureau and not those advanced by the real farmers?

Did you know that the farm bureau represents about one-tenth of the farmers, and they have not done, or recommended anything that has the approval of real farmers?

The bill to take care of the surplus that you say has the best chance of passing in congress is one to reimburse exporters for any loss they may sustain in exporting grain.

How much of it do you think would reach the farmers? I think the best bill yet introduced in congress is the one by McKinley to use grain as collateral to borrow money so we can hold grain off the market.

Douglas Co., Ill. JOHN E. MAX.

We can borrow money on grain without any new laws.—Editor.

Editor, The Prairie Farmer:

I want to take the liberty to ask John E. Max of Douglas County, Illinois, writing in your issue of February 13, 1926, just who the "real farmers" are. He insinuates that our farm bureau men are not "real farmers."

First of all, Mr. Max's statement that the Farm Bureau represents one-tenth of the farmers is incorrect, insofar as Illinois is concerned. Our paid-up memberships in 1925 represent approximately 25 per cent of the farmers in the state, based on the number given by the census, which includes all farms from three acres up.

Apparently Mr. Max does not belong to a farm organization. If he represents the "real farmers," then certainly the "real farmers" do not believe in organization. The Farm Bureau has had in its program for several years the development of cooperative marketing on such a scale that the farmer can have some hope of stabilizing the price of his products. Agencies for this purpose have been established for the handling of livestock, fruits, dairy products and grain, but there are a lot of Mr. Max's "real farmers" who do not see fit to patronize those agencies. Apparently those "real farmers" are not in favor of stabilizing the price of their products.

The Farm Bureau is standing solidly for some sort of a Government Board which can assist in stabilizing the price of various farm commodities, so that the farmer may take advantage of the protective system in this country and prevent a little surplus of some commodity from depressing the price of the whole crop. Apparently Mr. Max, if he represents the "real farmers," is not in favor of making the protective system available to the American farmer, and thus increase his prices.

The Farm Bureau has been active in legislative affairs, and its work since the opening of the American Farm Bureau office in Washington has been largely responsible for the passing of 26 bills favorable to agriculture. The results of this work helps every farmer in America, including Mr. Max's so-called "real farmers" as well as the farm bureau members.

The Farm Bureau has also been very much interested in tax reduction and its work in Illinois has been responsible for a decrease of $225,000,000 in the full assessed valuation of farm lands, and a saving in taxes during 1924 of $8.04 per farm, based on the high valuations of 1920. Apparently Mr. Max's "real farmers" are not interested in tax reduction.

The Farm Bureau has also stood solidly for a program of efficiency in farm operations, tending to cut down the cost of production. Apparently the "real farmers" are not interested in lowering production costs.

They say that a real man when he sets forth destructive criticism always has constructive criticism to offer. We take it that if this is true of a real man it should be true of a "real farmer." After all of Mr. Max's destructive criticism will he kindly come through and offer a constructive program, stating in concrete terms what the "real farmers" want?

Yours very truly,
(Signed) GEORGE E. METZGER.

National Producers Have Facts on Attempt of Old Line Interests to Kill Farmers' Selling Own Products

Farmers Who Have Received "County Agent Farm Bureau" Magazine in Their Mail Boxes Without Subscribing Will Now Know Why.

FARMERS who have received the "County Agent and Farm Bureau" magazine in their mail boxes, and have wondered at its persistence in reaching them even though no subscription fee was ever collected from them can now have their questions answered for the so-called friend of the farmer has been exposed. To many this expose is simply proof of well-founded suspicions.

There is substantial evidence in possession of the National Livestock Producers Association proving that the livestock exchanges of several of the principal markets of the United States are secretly subsidizing the "County Agent and Farm Bureau," which has been bitterly and viciously against farmers marketing their own products. The purpose of the secret subsidy has evidently been to defeat the farmers of the country in their efforts to have a voice in the marketing of the products which they grow.

Exchanges Represent Old-Line Interests.

The livestock exchanges are the organizations of the old-line proprietary commission houses. There is an exchange on each market, and the group of exchanges have a national organization called the National Livestock Exchange. The farmers' cooperative organizations are not members of the exchanges.

"The County Agent and Farm Bureau" sails under false colors. Instead of flowing a banner openly representing the old-line interests which are subsidizing it, it sails the high seas through second-class mailing privileges under the name "County Agent and Farm Bureau" which is intended to give it a friendly approach to the would-be cooperative shippers and persons generally interested in the farmers' welfare. Yet it has been denounced, disclaimed and condemned by the National Association of County Agents and the American Farm Bureau Federation, as well as by county and state Farm Bureaus.

Old-Liners Scared at Co-ops Growth.

The growth of the cooperative selling of livestock by the farmers themselves on the principal market of the United States has cut into the business of the old line commission houses to the extent that the livestock exchanges of Chicago, St. Paul, St. Louis, Buffalo and Sioux City are known to be working against the farmers' interests by subsidizing and furnishing a selected mailing list for the "County Agent and Farm Bureau."

This magazine is mailed to livestock shippers, managers and officers of the livestock shipping associations, farm advisers or county agents, officers of county Farm Bureaus, and many others in positions of responsibility in farmers' organizations. This is done for the sole purpose of attempting to shake their faith in cooperative marketing. Thus the old-line interests are working under cover to clamp the brakes on the present healthy growth and progress of cooperative marketing.

Many Advisers Get it Free.

The magazine is published by the Lightner Publishing Corporation at 2721 South Michigan Avenue, Chicago, which claims the subscription rate is $1.50 a year. Reports from Illinois farm advisers in response to an inquiry sent out by the Illinois Agricultural Association show that the majority of them receive it month after month and year after year and yet pay no subscription fee. The same is true as regards managers of shipping associations and farmers' elevators in Illinois and many other states.

The total circulation is approximately 10,500. The bona fide subscription is only a small fraction of the total circulation. The South St. Paul exchange has been especially active in circulating the paper. It is reported that this exchange is paying for 1000 subscriptions and has paid something like $750 in advance for this privilege. The rate in this case was 75 cents per copy per year in this instance, but the advertised rate is $1.50.

Fights Co-ops for Own Profit.

When the "County Agent and Farm Bureau" was established several years ago, its publishers tried to represent the thought of the farm bureau movement. However, a few years later it changed hands, the present publisher, the Lightner Publishing Corporation of which O. C. Lightner is president, gaining control. The motive for publishing anti-cooperative marketing articles is defined as simply one from which the corporation can reap commercial gain.

Gloats over Failures.

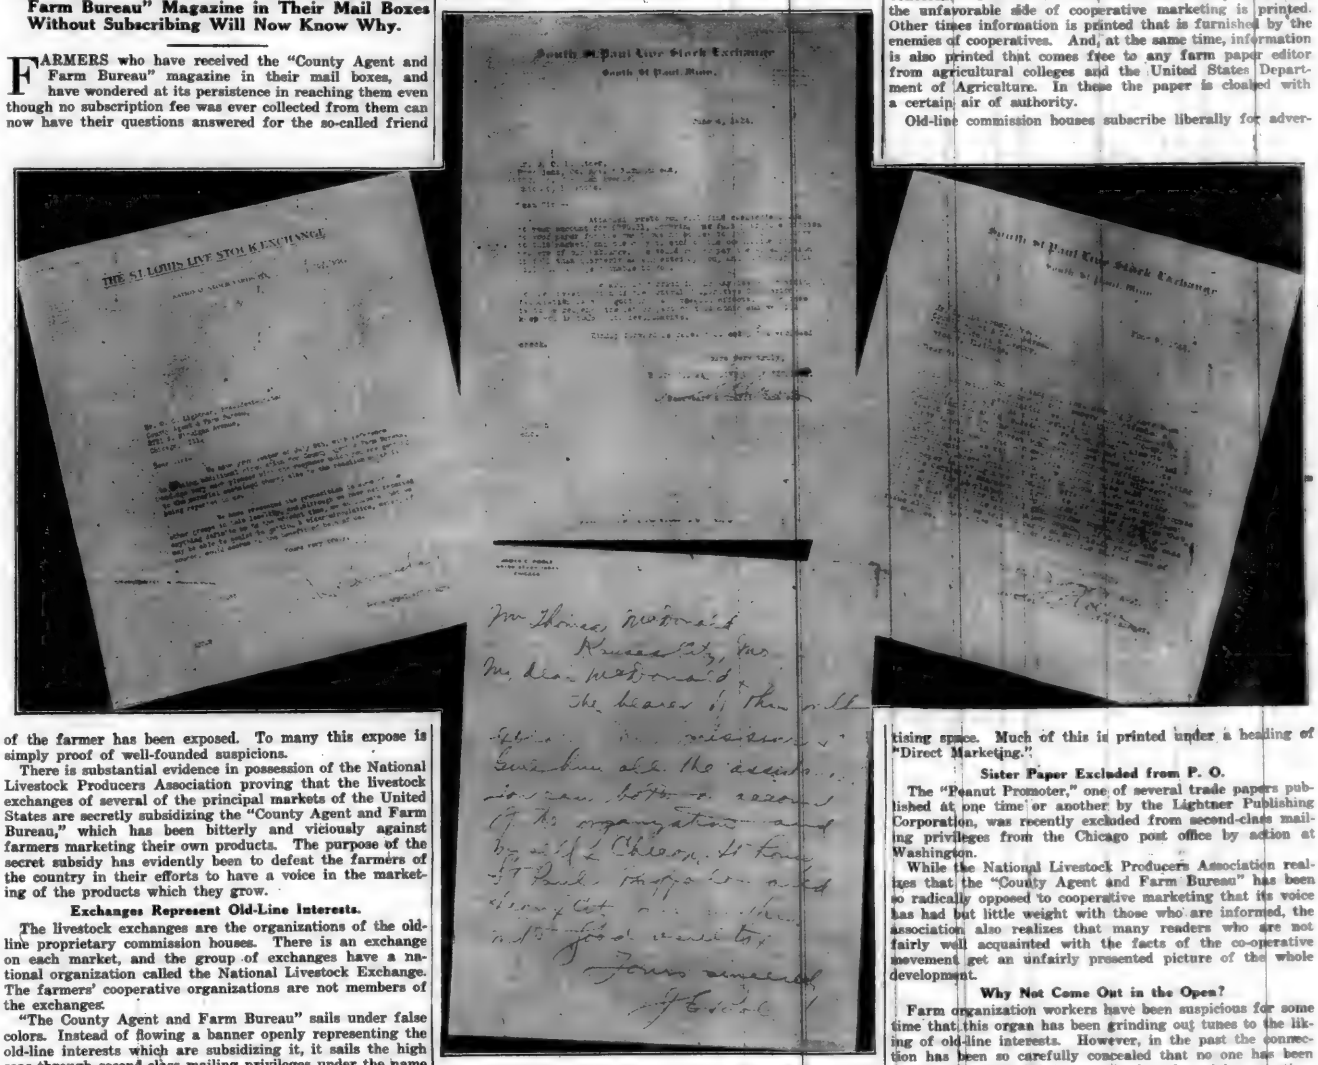
Certain interests opposed to the producers and the cooperative movement generally were found ready and willing to assist the paper in a financial way. The name "County Agent and Farm Bureau," gave these old-line interests, especially their field men, a fine opportunity to quote propaganda from that paper and say, "and that's from the 'County Agent and Farm Bureau,' your own paper."

To get articles and information to fill up the paper, the corporation subscribes to the United States Press Clipping Bureau at 538 South Clark St., Chicago, for clippings on activities or reorganizations of cooperative marketing concerns. These are edited in such a way that only the unfavorable side of cooperative marketing is printed. Other times information is printed that is furnished by the enemies of cooperatives. And, at the same time, information is also printed that comes free to any farm paper editor from agricultural colleges and the United States Department of Agriculture. In these the paper is cloaked with a certain air of authority.

Old-line commission houses subscribe liberally for advertising space. Much of this is printed under a heading of "Direct Marketing."

Sister Paper Excluded from P. O.

The "Peanut Promoter," one of several trade papers published at one time or another by the Lightner Publishing Corporation, was recently excluded from second-class mailing privileges from the Chicago post office by action at Washington.



While the National Livestock Producers Association realizes that the "County Agent and Farm Bureau" has been so radically opposed to cooperative marketing that its voice has had but little weight with those who are informed, the association also realizes that many readers who are not fairly well acquainted with the facts of the co-operative movement get an unfairly presented picture of the whole development.

Why Not Come Out in the Open?

Farm organization workers have been suspicious for some time that this organ has been grinding out tunes to the liking of old-line interests. However, in the past the connection has been so carefully concealed that no one has been able to establish definite proof of a financial connection. Now the connection has been definitely established.

If the old-line interests have a legitimate fight against cooperative marketing, why not come out in the open?

Here Is the Evidence— You Are Judge and Jury

Five Bureaus Getting Into Poultry and Egg Marketing as Project

The first week in March was set as the time to hold a series of educational meetings at 14 points in Clay county on the poultry and egg marketing plan sponsored by the Clay County Farm Bureau and I. A. A. poultry and egg marketing department. A committee of 40 men and women have been named by Curt Anderson, president of the Bureau, to make a study of the project and assist with the meetings.

Ford and Fulton County Farm Bureaus have been considering poultry and egg marketing nearly a year, but other important projects have delayed action. counties now report that plans are being made to beg active organization work soon, according to Frank A. Gougler, director of the department.

Knox and Warren counties have voted poultry and egg marketing into their programs as projects for 1926 and contemplate an organization with its concentration point at Galesburg. Meetings were scheduled at Monmouth Feb. 25 and Galesburg, Feb. 27 to explain the plan to representatives from each community in the two counties.

ONLY 10,840 HENS WERE WITHDRAWN FROM THE PACIFIC CO-OPERATIVE POULTRY Producers, Portland, Oregon, during the withdrawal period, out of the 307,400 hens under contract in 1924. The reason given by the owners of more than half of the number withdrawn was that they have sold out or quit the poultry business.

HOW WISCONSIN SEES IT

When Farmers' Week was held at the University of Wisconsin not long ago, the Farm Bureau was pictured like you see above.

The men are: I. M. Wright, secretary of the Wisconsin Farm Bureau, Orrin Fletcher, former president, and Sam H. Thompson, also a former president."

I. A. A. Urges Higher T. B. Appropriation Through Congressmen

Energetic action by the Farm [illegible] to get favorable action from the Senate for an increased appropriation from Congress for eradication of bovine tuberculosis. The amount was set at $6,000,000 and Illinois' share is expected to be $1,000,000.

Secretary Fox wrote each Congressman and Senator representing Illinois as follows:

"The officers and executive committee of the Illinois Agricultural Association regard an increase in the federal appropriation for the eradication of tuberculosis as very important and necessary. We believe that Congress should appropriate not less than $6,000,000 for this purpose.

"We, therefore, urge that you use your influence and give your full support to an increase in the appropriation."

This association stood for a state appropriation of $3,000,000 during the last legislature which was cut to $2,000,000.

The following Illinois Congressmen responded promptly to Secretary Fox's letter and pledged themselves whole-heartedly behind an increased appropriation as endorsed by the Illinois Agricultural Association:

Congressman	District
A. J. Sabath	5
Stanley H. Kunz	8
Frank R. Reid	11
Charles E. Fuller	12
William R. Johnson	13
William E. Hull	16
William P. Holaday	18
Charles Adkins	19
Henry T. Rainey	20
T. S. Williams	24
E. E. Denison	25
Henry R. Rathbone	Congressman

Senator Deneen acknowledged receipt of the letter but failed to indicate his position.

IT IS ANNOUNCED AT BRISBANE, AUSTRALIA, that the Queensland government has decided to form a cotton control board which will function for a period of five years beginning Jan. 1, 1927. Wonder if the U. S. A. will have an export corporation by then?

INCREASED FARM PRODUCTION THIS YEAR "will undoubtedly end this favorable economic position," meaning the present "farm prosperity," states the U. S. Department of Agriculture. In other words, increased production in 1926 means still less income than 1925.

Illinois Accredited Hatcheries Announced by State Department

Thirty-eight Hatcheries of More Than 180,000 Birds Have Passed Required Rules and Regulations

Thirty-eight hatcheries, including 180,000 birds, are now listed as accredited institutions by the Illinois Department of Agriculture.

This plan of government inspection to insure a higher quality of baby chicks hatched and distributed in Illinois, a movement of less than three years, was originally promoted by the joint action of the Illinois Agricultural Association, the poultry department of the University of Illinois, the Illinois Baby Chick Association and the Illinois Poultry Association.

In 1924 there were 36 hatcheries inspected and placed on the accredited list. These inspections totaled 800 flocks of approximately 120,000 birds. The inspection is made by a representative of the division of standards and markets of the Illinois Department of Agriculture. Hatcheries are not compelled to subject themselves to the examinations but are volunteering to gain the guarantee advertising prestige.

Accredited hatcheries as announced by H. W. Day, superintendent of the division of standards and markets of the state Department of Agriculture, are:

Walnut Ridge Hatchery, Butler; Stouffer Egg Farms, Mount Morris; Chestnut Hatchery, Chestnut; Rock River Hatchery, Rockford; Egyptian Hatchery, Summerfield, Eldorado Hatchery, Eldorado; Rochelle Egg Farms, Rochelle; Great Eight Poultry Farm, Carlyle; Brenner Hatchery and Poultry Farm, Freeburg; Danville Baby Chick Co., Danville; Edward L. Parker, New Athens; Joseph Mueth, New Athens; Elso Saunders, Belleville; Dean and Son Hatchery, Jacksonville; Eureka Hatchery, Belleville.

New Era Hatchery, Pittsfield; Chas. W. Norgren, Monticello; Farmers' Cooperative Hatchery, Elizabeth; Fairmont Farms, Fairfield; Mrs. Ross Bartholomew, Vermont; Kemp Creme, Albion; Clinton Hatchery, Clinton; Clyde Smith, Golden Gate; Chandler Hatchery, Macomb; Marion J. Porter, Pittsfield; J. E. Elsesser, Amboy; Moultrie County Farm Bureau Hatchery, Sullivan; Southern Illinois Accredited Hatchery, Murphysboro; Roscoe Hatchery, Roscoe; J. S. Pennington, Plainfield; Corn Belt Hatcheries, Gibson City, Oakcrest Fruit and Poultry Farm, Dundas.

Albert Atwood, Davis Junction; Millway Hatchery, McNabb; Brooks Hatchery, Mt. Sterling; Helena Browning, Perry; J. D. Garren, Centralia; A. Clyde Parfrey, Spring Grove.

Women in Many States Proposing Marriage to Cornhusking Champion

Young women in many cities have been pestering Elmer Williams of Toulon, Stark county, with offers of marriage and expressions of admiration ever since he won the world's cornhusking championship last fall at Burgess, Mercer county.

Reaching the Toulon post office recently was a letter from a Kentucky widow, who, E. E. Brown, the farm advisor of Stark county, wrote to the Illinois Agricultural Association, was anxious "to enlist for a second term."

Still another was from Elmira, N. Y., and apparently was written by two young women who expressed themselves as glad to find some one interested in something beside "Charlestoning." Their letter read:

"Dear Champion:

"Please accept our congratulations on your wonderful record of corn husking, which was published in a local paper. We were delighted to learn that there was some one interested in attaining a record in a line of this kind rather than Charlestoning. We envy the dames who were around when the red ears were found. East is east, and west is west, but should the twain ever meet, it would be a pleasure for us to show you our beautiful Chemung Valley."

The only difficulty with Elmer's growing mail is that he is married. Mrs. Williams destroyed the last letter he received—but she enjoys reading them.

For Members Only

ILLINOIS AGRICULTURAL ASSOCIATION
and
ILLINOIS COUNTY FARM BUREAUS
Cooperating

Phosphate Credit Certificate

This Certifies that Mr. _____ (Purchaser)

_____ (Address)

being a member, in good standing of the undersigned

County Farm Bureau
and of
The Illinois Agricultural Association

Is Entitled to a credit of fifty cents (50c) per ton when paying for the Ground Rock Phosphate which he has ordered from one of the Phosphate Companies on the Illinois Agricultural Association accredited list.

This Certificate being in accordance with an agreement between the TENNESSEE PHOSPHATE ROCK ASSOCIATION and THE ILLINOIS AGRICULTURAL ASSOCIATION, will be accepted by an accredited member of the said Phosphate Association as part payment to the extent of fifty cents (50c) per ton on the regular current price for said Ground Rock Phosphate, providing the balance of the account is paid, or arranged for in a manner satisfactory to the Company making the sale, within fifteen (15) days following the date of the invoice (although not necessarily earlier than two (2) days following arrival of shipment).

_____ (County Farm Bureau)

By _____

Title _____

LIST OF MEMBERS OF THE TENNESSEE PHOSPHATE ROCK ASSOCIATION ACCREDITED BY THE ILLINOIS AGRICULTURAL ASSOCIATION

ROBIN JONES PHOSPHATE COMPANY, Nashville, Tenn.
RUHM PHOSPHATE & CHEMICAL COMPANY, Mt. Pleasant, Tenn.
THOMSON PHOSPHATE COMPANY, Chicago, Ill

Farm Bureau Member please fill in form on reverse side of this Certificate

THIS is a reproduction of the phosphate credit certificate now in use by county Farm Bureaus and the I. A. A. which, when properly filled in at your farm bureau office, will save you 50 cents a ton on phosphate bought under the I. A. A. accredited plan. This lower price is for members only.

Complete instructions for ordering can be obtained from your Farm Bureau. Three of the principal phosphate producers are cooperating—they are known as "I. A. A. accredited companies." These are:

Robin Jones Phosphate Co., 156 Fourth Ave., N., Nashville, Tenn.

Ruhm Phosphate & Chemical Co., Mt. Pleasant, Tenn.

Thomson Phosphate Co., 137 S. LaSalle St., Chicago.

"Any one of these companies is in position to take care of any member's order," states J. R. Bent, director of the phosphate-limestone department. "They are backed up by I. A. A. guarantee as to accuracy of quality, weight and service. All purchasers should specify that they desire I. A. A. service when ordering and they will receive a report direct from the I. A. A. Branch Phosphate Supervisional office located at Columbia, Tenn."

Another Monument Meaning Stability

THE stability of the Farm Bureau is reflected in the increasing number of office buildings built and owned by the organization.

In McDonough county the Bureau has a new home, 30x64, cost $12,000 (lot and building), steam heated, front office 15x30, assembly room 15x30, and a rear room 30x32, which is filled with seed corn brought in by members to be tested. A freight elevator carries it to the basement which is 8 feet in the clear, and 30x64 feet. The seed testing room is 13x22 and is built of shiplap lined inside with roofing paper. Hot water heat keeps a temperature of around 85 degrees. Its 80 trays hold 300 ears each.

The Bureau is testing about 150 bushels a week and expects to turn out 1,500 bushels before planting time. Of the sack-picked corn from McDonough county fields, reports are that about 85 per cent will be unsuitable for planting and only 10 per cent disease free and only 50 per cent of crib-selected corn is suitable for planting.

Offices such as this one make business interests respect the Farm Bureau more than ever, according to M. L. Hunt, president, who sent in the photograph.

Chicago Dairymen Who Have Tested Organize to Protect Themselves

Pure Milk Association Formed; Object is to Protect Own Interests and Furnish Consumer Commodity Wanted

Will April Fool's Day have a stinger in it for dairymen in the Chicago district?

April 1, 1926 is the date when the Chicago milk ordinance goes into effect which bars all non-tested milk from being sold in the city. Dairymen who have not tested their herds by that date will be excluded from the Chicago market, according to the ordinance. Dairymen who have tested will not be barred.

Dairymen in the Chicago milk belt who have tested are carefully preparing for the deadline day—now only a month away. Their preparation is organization and their organization is the Pure Milk Association, which is being formed to protect their interests and to give Chicago the kind of milk its consumers want.

Membership in the Pure Milk Association is limited strictly to farmers whose herds have been tested for bovine tuberculosis or those who have filed applications for testing with authorities in charge.

This is the entrance requirement set up by the board of directors of the association, which grew out of the recent controversy between non-testing dairy farmers and health authorities of Chicago.

"We dairymen who had tested our cattle and were in shape to sell Chicago consumers tested milk as the health department demanded, felt the need of an organization to speak for our interests, so we formed one, and it is the Pure Milk Association," says W. C. McQueen of Route 3, Elgin, president.

"The principal object of the association is to protect dairymen who have had their herds tested or who will have had them tested by April 1, 1926, and, in addition, our object is to furnish Chicago milk consumers the kind of milk they want, which we feel is not only good business practice, but absolutely necessary from a health standpoint," Mr. McQueen states.

Here is Secretary Jardine's Attitude

DEPARTMENT OF AGRICULTURE
WASHINGTON

Mr. C. A. Stewart, Executive Secretary,
National Livestock Producers Association,
608 South Dearborn Street,
Chicago, Illinois.

February 1, 1926.

My dear Mr. Stewart:

Through the medium of your letter of January 16th my attention has been directed to the December issue of the County Agent and Farm Bureau. This publication carries an item on the charges recently issued under the Packers and Stockyards Act in a citation to the Chicago Producers Commission Association. This article has been arranged so that the editorial comment, interspersed with the text of the citation, all appearing over my signature, may create the impression that the observations of the editor are expressions of this Department. In fact, communications which both you and we have received bear out this conclusion.

There can be, of course, no objection to the complete publication of such official documents as may be issued by the Department in connection with action similar to that pending against your organization but it is both objectionable and unfair to supplement the text of such documents by statements of the publisher in a manner to create possibly the impression that they are a portion of the text. While it is not apparent to me that any action can be taken by the Department against the publishers, I do not hesitate to express in this form to you, for whatever disposition you may care to make of it, my condemnation of the arrangement of this article.

Very truly yours,

W. M. Jardine
Sec.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Volume 4 | Issued Every Month for 63,000 *thinking* Farmers—April 1, 1926 | No. 4

HERE'S TEXT OF FEDERAL FARM BOARD MEASURE; STUDY IT!

Report of Industrial Economists on Farm Supports Our Position

National Board Finds Agriculture's Plight Largely Due to Buying in Protected Market and Selling in World Market.

A report on the farm situation was made public recently by the National Industrial Conference Board. This is not a farm organization. It is an organization of engineers and economists sustained by the transportation, manufacturing, mining and other interests for the scientific investigation of economic questions pertinent to these industries.

These industries, having come to the realization that agriculture has a very direct relation to themselves, have undertaken an extended inquiry to find out just what the economic status of the farmer is. The study upon which the report is based has been in progress about a year. It substantiates the position of the I. A. A. and many other farm organizations.

The report shows that there has been:

"A progressively declining tendency ever since 1900, excepting during war years, when there was a temporary respite."

Farming Lagging Behind.

Again in the report comes this significant statement:

"It is no more a question of what ails the farmer than of what will be the consequence for all the rest of the nation, for industry, finances and general business, for all the urban population, if American agriculture continues to lag behind in comparison with the general development of the country."

A capital decrease from 47 billion dollars in 1920 to 32 billion dollars in 1925 is shown by the report. The rate of farm failures from 1910 to 1924 shows an increase of over 1,000 per cent in contrast to that in commercial failures which has remained practically the same. Farm acreage and farm production declined, and overhead capital costs, including taxes and interest, increased about 100 per cent from 1900 to 1910 and nearly 600 per cent between 1900 and 1920. Combined costs per unit of production rose over 300 per cent, while wholesale prices increased only 120 per cent.

Farmers' Earnings Lowest

Of startling significance, the report shows that actual earnings of farmers average only $780 in 1924, as against the average earnings of $1,256 per wage-earner in the manufacturing industries; of $1,572 among transportation workers; of $2,141 by clerical workers; of $1,295 by teachers; $1,650 by government employes, or an average of $1,415 per worker in groups other than farmers.

All this is due, the National Industrial Conference Board finds, to the fact that 60 per cent of the farmer's income depends on world conditions of supply, demand and costs, which are out of his control, while the expense of operating the farm is determined by domestic conditions "which place the costs for the farmer on a higher level of values than the world level of values which determines the bulk of the farmer's income."

Of the 12 Producer agencies functioning on livestock markets of the United States which reported their standings during the first part of March, six were first in volume of business done and one was second.

Another Remedy for Surplus: Let U. S. A. Give Liquor Gratis

Of the many plans offered to the Illinois Agricultural Association for solving the problem of the surplus, a particularly unusual one was explained recently by S. Cohn, age 76, "soft drink" manufacturer of 116 N. Keeler Ave., Chicago, who stopped in at the office.

"The government should pass a law stopping all this temperance business," Mr. Cohn suggested. "Prohibition has cut down by millions of bushels the demand for farmers' corn and barley. Cut out the temperance business, then the government would save enough on its budget for enforcement that it could manufacture whiskey, beer and wine and give it away free, which would get rid of the surplus."

Appeal to I. A. A. for Help in Dealing With Thieving from Farmers

An appeal to the I. A. A. to inaugurate some state-wide move to stop thieving from farmers was made by Samuel Sorrells, executive committeeman for the 21st district, who presented a resolution from Sangamon, Christian, Montgomery and Macoupin counties, which comprise that district.

The executive committee referred the resolution to the sub-committee dealing with public relations with the request that definite consideration and recommendations be laid before the executive committee at its next regular meeting, which will be April 9.

Why Farmers Should *Support* the Tax Amendment to Illinois Constitution

(To be voted on in November, 1926)

1. Real estate, although less than one-half—many say less than 40 per cent—of the property in the state, is now paying about 80 per cent of all of the taxes for most purposes.

2. Tangible property, although probably not more than one-half of the property in the state, is now paying more than 92 per cent of all of the taxes for most purposes.

3. A minority of the people of the state are now paying all of the taxes for most purposes.

4. Owners of some kinds of property easily can and do add their taxes to the prices of their services or products. Owners of other kinds of property, notably land, cannot shift their taxes to others to pay.

5. Owners of mortgaged property are now paying double or multiple taxes. They pay taxes not only on their equities, but also on the value of the mortgages, and pay a higher rate of interest on taxable mortgages whether the mortgages pay taxes or not.

6. Lack of personal interest on the part of most people in the economical and efficient use of tax moneys, and their belief that they are paying no taxes of any kind, promote extravagance and a rapid increase of deferred taxes in the form of bonded indebtedness.

7. Taxes are rapidly increasing in Illinois partly because the population is increasing, but chiefly because of the demand for new forms of service.

8. Under the present constitutional limitations none of the inequalities of the present taxing system described above can be fairly or properly corrected. The proposed amendment is a grant of power to the General Assembly, enabling it from time to time to correct inequalities in taxation and to establish a modern and equitable system of taxation.

Earl C. Smith

President, Illinois Agricultural Association.

[Brief articles in support of the points stated above will be printed in later issues of The Record. Questions relative to the proposed tax amendment are invited and will be answered through The Record.]

More Voluntary Support

SUPREME COURT
STATE OF ILLINOIS

CHAMBERS OF
JUSTICE CLYDE E. STONE

Peoria, Illinois,
March 4th, 1926.

Mr. A. R. Wright,
Varna, Ill.

My dear Mr. Wright:

I am in receipt this morning of a copy of the Illinois Agricultural Association Record and notice on its editorial page that individual membership fee in the Illinois Agricultural Association is $5.00 a year. I am wondering whether or not membership privileges would extend to a person who farms through a tenant. If so, I should like to join the Association and assist in any way I can to further the interests of that organization as I understand them to be.

The necessity for such an organization in the agricultural industry is so very apparent in order to secure a fair place for that industry that I trust it will grow very rapidly in numbers and influence.

Awaiting your convenience, I am

Very truly yours,

Clyde E. Stone

WHEN A. R. Wright of Varna, representing the 16th district on the I. A. A. executive committee, received the letter reproduced above from Clyde E. Stone, justice in the Supreme court of Illinois, needless to say he was pleased. Mr. Wright informed Justice Stone that it would be necessary to join the county Farm Bureau in his home county, which is Peoria, and the fee is $15 for a joint membership. Justice Stone replied saying he was joining in Peoria county.

National Association of Grain Dealers Set to Help(?) Farmers

If You Don't Believe it, Read What Has Been Sent All Their Members Concerning Dickinson Bill Principles.

The official organ of the Grain Dealers National Association, well-known *friends* of the farmers, contains the following significant paragraph in bold face type which concludes a long editorial tirading against the farmers' efforts to secure better prices for their crops:

"It may be necessary for the Association to call upon its members, direct and affiliated, for assistance in the fight before Congress. If the Dickinson bill is reported out, and indications point to its serious consideration by the House, then it will be up to YOU to do your duty! You will be kept posted and when President Horner issues the call for your aid you will be expected to respond as you did when the McNary-Haugen bill was snowed under. You are duty bound to fight such legislation, from the standpoint of patriotism as well as SELF-INTEREST."

Some of the 75 Chicago members of this association are: Armour Grain Co.; Bartlett, Frazier Co.; Rosenbaum Bros. and the Rosenbaum Grain Corporation, which, it will be remembered, were anxious some time back to assist the farmers by selling them a $26,000,000 "cooperative" grain company.

The Association is maintaining a representative at Washington who is carefully watching developments.

The Executive Committee of the Crawford County Farm Bureau recently decided that all service be limited to members only, and they have called on the members to help carry out the new policy.

Measure Embodies Broad Principles of Dickinson Bill

President Smith Says Members Can Do Nothing More Important for Cause Than to Study Bill Now.

THE complete text of the "Federal Farm Board Measure" is printed in this issue of The Record so that every member can carefully study this proposal which contains the general principles of the Dickinson bill which were endorsed by delegates at the annual meeting of the I. A. A. at Champaign-Urbana in January. In addition to the text, there is a chart-diagram which pictures the measure in an understandable manner.

Sam H. Thompson, president of the American Farm Bureau Federation, your national organization that is on the job at Washington guarding and advancing your interests, has the following to say about the measure:

"Farmers, themselves, and not members of Congress, nor any committee thereof, have drafted and presented this bill on farm relief which is epochal in character. Not often in Congressional history has such a burden been thrown upon farm leaders. Congress realizes that there must be farm relief, but seems either indisposed or unable to present a solution in definite form. It is into this breach that farmers have thrown themselves in offering this measure, which need not be presented as being perfect but which represents a sincere and conscientious effort to solve the perplexing problem of surpluses in a way which is economically sound."

Earl C. Smith, president of the I. A. A., urges that every member read with considerable care the entire bill as presented in The Record.

"There is nothing more important that individual members can do at this time in helping win the battle for 'Equality for Agriculture' than to make themselves fully conversant with this measure and thus be able to talk intelligently with their neighbors about it," President Smith declares. "Keep this issue for future reference."

The measure begins on page 2.

Executive Committee of I. A. A. Offers Proposal to Farmers' Elevator Co.

At the March meeting of the I. A. A. executive committee, a resolution was passed to the effect that the committee is willing to enter a contract with the directors of the National Farmers' Elevator Grain Company, to furnish a man and pay his expenses to sell the stock of the company in Illinois. The other terms of the proposed agreement are the same as the general practices among other business institutions.

At a meeting on March 15 of the board of directors of the National Farmers' Elevator Grain Company, Cooperative, a committee to consider the proposal was appointed, consisting of D. H. Allen, Delavan; Fred Mudge, Peru; F. W. Hall, Leland, and Lawrence Farlow, Bloomington.

Further progress will depend upon action of this committee.

Samuel Insull, public utility genius of Chicago who has successfully directed and promoted gigantic traction, power, gas and light enterprises throughout the Middle West, has lost heavily for 20 years in operating his 4,000 acre Lake county farm, Frank Ridgway narrated in the Chicago Tribune recently. The farm itself is divided and kept separate from the Insull home estate, which is not expected to earn its way, but the farm is operated under approved methods with efficiency stressed to the limit, yet it lost an average of $18 an acre last year.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, social and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Published once a month at 404 North Wesley Ave., Mount Morris, Illinois, by the Illinois Agricultural Association. Edited by Department of Information, Harry C. Butcher, Director, 608 South Dearborn Street, Chicago, Illinois. Entered as second-class matter October 20, 1926 at the post office at Mount Morris, Illinois, under the Act of March 3, 1879. Acceptance for mailing at special rate of postage provided for in Section 412, Act of February 28, 1925, authorized October 27, 1925. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record. Tentative Draft of Farm Relief Bill

(Committee Print No. 1)

March 16, 1926

69th CONGRESS—1st Session

H. R.

In the House of Representatives

March —, 1926

Mr. ..... introduced the following bill; which was referred to the Committee on Agriculture and ordered to be printed:

A BILL

To establish a Federal Farm Board to aid in the orderly marketing and in the control and disposition of the surpluses of agricultural commodities, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

Declaration of Policy

SECTION 1. It is hereby declared to be the policy of Congress, in order to promote the general welfare of the United States, to promote the orderly marketing of agricultural commodities; to enable producers of agricultural commodities to stabilize their markets against undue and excessive fluctuations and minimize speculation and unsound practices in marketing; to encourage the organization of producers of agricultural commodities into co-operative associations; and to protect domestic markets against world prices by providing for the control and disposition of the surpluses of agricultural commodities.

Federal Farm Advisory Council

Sec. 2. (a) There is hereby established a Federal Farm Advisory Council (hereinafter referred to as the "council") to consist of five members from each of the twelve Federal land bank districts. The members of the council from each district shall be elected by the bona fide farm organizations and co-operative associations in such district at a convention of such organizations and associations, to be held at the office of the Federal land bank in such district or at such other place in the city in which such Federal land bank is located as the convention may adjourn to.

(b) The Secretary of Agriculture shall annually, with the advice and assistance of the president of the American Farm Bureau Federation, the master of the National Grange, and the president of the Farmers' Educational and Co-operative Union of America, (1) fix the date on which such conventions shall be held, (2) designate the farm organizations and co-operative associations in each district eligible to participate in such conventions, and (3) designate the number of representatives and the number of votes to which each such organization or association shall be entitled. The Secretary of Agriculture shall mail, at least fifteen days prior to the date on which a convention is to be held, to each organization and association eligible to participate in such convention, notice of the date and place of such convention. The conventions first held after the date of enactment of this Act shall be held within forty-five days after such date. The Secretary of Agriculture shall prescribe uniform regulations for the procedure at such conventions and for the proper certification of election of the members of the council.

(c) The term of office of each member first elected shall expire one year from the date of his election, and the term of office of all successors shall expire one year from the date of the expiration of the preceding term. Any member in office at the expiration of the term for which he was elected may continue in office until his successor takes office.

(d) The members of the council shall serve without salary but may be paid by the Federal Farm Board (established in section 4 and hereinafter referred to as the "board") a per diem compensation not exceeding $25 for attending meetings of the council. Each member shall be paid by the board his necessary traveling expenses to and from the meetings of the council and his actual expenses while engaged upon the business of the council.

Duties of Council

Sec. 3. (a) The council shall—

(1) Meet and organize as soon as practicable after the enactment of this Act and select a chairman, secretary and such other officers as it deems necessary.

(2) Nominate to the President three individuals from each of the twelve Federal land bank districts, eligible for appointment to the board.

(3) Meet thereafter at least twice in each year at a time and place designated by the Secretary of Agriculture; or upon a petition duly signed by a majority of the individuals elected to the council at a time and place designated therein.

(4) Nominate individuals to fill vacancies occurring in the board.

(5) Submit to the board such recommendations, and co-operate with the board in such manner, as the council deems most effective to carry out the purposes of this Act.

(b) The individuals to be nominated for appointment to the board from any district shall be selected by the members of the council from such district.

Federal Farm Board

Sec. 4. (a) There is hereby established in the Department of Agriculture a board to be known as the Federal Farm Board and to be composed of twelve members, one from each of the twelve Federal land bank districts, appointed by the President by and with the advice and consent of the Senate from the individuals nominated as provided in section 3.

(b) The Secretary of Agriculture shall be ex-officio member of the board

Appointment and Qualification of Members

Sec. 5 (a) The terms of office of the appointed members first taking office after the enactment of this Act shall expire, as designated by the President at the time of nomination, four at the end of the second year, four at the end of the fourth year, and four at the end of the sixth year, after the date of the enactment of this Act. A successor to an appointment member shall be appointed by the President, by and with the advice and consent of the Senate, from the individuals nominate, as provided in subdivision (d) of this section, for a term expiring six years from the date of the expiration of the term for which his predecessor was appointed.

(b) Any person appointed to fill a vacancy occurring prior to the expiration of the term for which his predecessor was appointed shall be appointed for the remainder of such term.

(c) Any member in office at the expiration of the term for which he was appointed may continue in office until his successor takes office.

(d) Whenever a vacancy occurs in the board or whenever, in the opinion of the chairman of the board, a vacancy will soon occur, he shall notify the council thereof and request that the council nominate three individuals qualified to fill such vacancy. Upon receipt of such nominations he shall submit their names to the President as the nominees for such vacancy.

(e) Vacancies in the board shall not impair the powers of the remaining members to execute the functions of the board, and a majority of the appointed members in office shall constitute a quorum for the transaction of the business of the board.

(f) Each of the appointed members shall be a citizen of the United States, shall not actively engage in any other business, vocation, or employment than that of serving as a member of the board, and shall receive a salary of $10,000 a year, together with necessary traveling expenses and expenses incurred for subsistence, or per diem allowance in lieu thereof, while away from the principal office of the board on business required by this Act.

General Powers of Board

Sec. 6. The board:

(a) Shall annually designate an appointed member to act as chairman of the board.

(b) Shall maintain its principal office in the District of Columbia.

(c) Shall have an official seal which shall be judicially noticed.

(d) Shall make an annual report to the Congress.

(e) May make such regulations as are necessary to execute the functions vested in it by this Act.

(f) May (1) appoint, and fix the salaries of such experts and, in accordance with the Classification Act of 1923 and subject to the provisions of the civil service laws, a secretary and such other officers and employees, and (2) make such expenditures (including expenditures for rent and personal services at the seat of government and elsewhere, the law books, periodicals, and books of reference, and for printing and binding), as may be necessary for the execution of the functions vested in the board. All expenditures of the board shall be allowed and paid upon the presentation of itemised vouchers therefor approved by the chairman.

Special Powers and Duties

Sec. 7 (a) The board shall meet at the call of the chairman at least weekly, and at such other times as the Secretary of Agriculture or the chairman deems advisable.

(b) The board is authorized—

(1) To obtain from any available sources, information in respect of crop prospects, supply, demand, current receipts, exports, imports, markets, transportation costs and facilities, and prices of agricultural commodities, and economic legal and financial information in respect of the organization, progress, and business methods of co-operative associations in the United States and foreign countries.

(2) To disseminate any such information, or analyses or summaries thereof, from time to time, among co-operative associations and farm organizations in the United States.

(3) To advise co-operative associations, farm organizations, and producers in the adjustment of production in order to secure the maximum benefits under this Act.

Control and Disposition of Surplus

Sec. 8 (a) The board shall keep advised by investigations, from time to time, made upon its own initiative or upon petition of any co-operative association or farm organization, of the domestic and world prices and the existence or the probability of the existence of a surplus of any agricultural commodity or any food product thereof.

(b) The board shall furnish, upon request, to any co-operative association or farm organization, or to any producer of any agricultural commodity, or to any person owning or controlling any of such commodity, its recommendations upon the disposition of such commodity, or any surplus thereof, and upon the available methods of financing. Whenever the board is of opinion that the provisions of this Act applicable to a basic agricultural commodity (as defined in subdivision (e) of this section) should be made applicable to any other agricultural commodity, it shall submit its report thereon to Congress.

(c) Whenever the board finds (1) that there is or may be during the ensuing year a surplus above domestic requirements of cotton, wheat, cattle, or swine (hereinafter referred to as "basic agricultural commodity"), or any food-product of wheat, cattle or swine, and (2) that substantial number of co-operative associations or other organizations representing the producers of such basic agricultural commodity are in favor thereof, the board shall determine upon and declare an operation period and prepare for its operations in respect of such basic agricultural commodity.

(d) During such operation period the board shall assist in removing or withholding from the domestic market the surplus above domestic requirements of such basic agricultural commodity or food product by entering into agreements with co-operative associations engaged in handling such basic agricultural commodity, or with a corporation or association created by one or more of such co-operative associations, or with persons engaged in processing such basic agricultural commodity, for the payment, out of the equalization fund hereinafter established, or losses, and the payment into the equalization fund of profits, arising out of the purchase, storage, sale, or other disposition, and or contracts for the purchase, storage, sale or other disposition (after such agreement has been entered into and in accordance with the terms and conditions thereof) of such basic agricultural commodity of food product, except that—

(1) If the board is of the opinion that there is no such co-operative association capable of carrying out any such agreement, the board, prior to the expiration of two years from the enactment of this Act, shall enter into such agreements with other agencies; and

(2) Such agreement shall provide, among other things, that no payment of losses shall be made under any purchase or contract for the purchase is made at a price which in the opinion of the board is not in excess of a fair and reasonable price, and that no sale or contract for sale shall be made in respect of which a loss would be sustained unless such sale or contract is authorized by the board.

(e) If the board is of the opinion that there are two or more co-operative associations capable of carrying out any such agreements the board, in entering into such agreements, shall not discriminate unreasonably against any such association and in favor of any other such association.

Purposes of Equalization Fee

Sec. 9. In order that the producers of each basic agricultural commodity may pay ratably their equitable share of the losses and expenses to be paid by the board in respect of such operation period; in order to prevent any unjust discrimination against any direct burden or undue restraint upon, and any suppression of, commerce in basic agricultural commodities with foreign nations in favor of interstate or intrastate commerce; and in order to encourage and stimulate the normal and usual current of foreign and interstate commerce in basic agricultural commodities, an equalization fee shall be apportioned and paid, as hereinafter provided, during the operation period in respect of such basic agricultural commodity.

Determination of Amount of Fee

Sec. 10. Prior to the operation period in respect of any basic agricultural commodity, the board shall estimate the probable losses and expenses to be paid in respect of such operation period. Having due regard to such estimates, the board shall determine and publish the amount for each unit of weight, measure, or value designating by it to be collected upon the processing of such basic agricultural commodity during such operation period. Such amount is hereinafter referred to as the "equalization fee."

Payment and Collection of Fee

Sec. 11 (a) During the operation period in respect of any basic agricultural commodity, the equalization fee shall be paid, under such regulations as the board may prescribe, upon the processing (as hereinafter defined) of such basic agricultural commodity.

(b) The board may by regulation require any person engaged in processing such basic agricultural commodity, during such operation period, to file returns under oath and to report, in respect of his purchases and processing of such basic agricultural commodity, the amount of the equalization fees payable thereon, and any other facts which may be necessary for the payment or collection of the equalization fees.

(c) Every person who, in violation of the regulations prescribed by the board, fails to account for any equalization fee shall be liable for such fee and to a penalty equal to one-half the amount of such fee. Such fee and penalty may be recovered together in a civil suit brought by the board in the name of the United States.

Equalization Fund

Sec. 12. (a) In accordance with regulations prescribed by the board, there shall be established an equalization fund for each operation period and for each basic agricultural commodity, into which the equalization fees and the profits for such operation period shall be deposited.

(b) The board, in anticipation of the collection of the equalization fees for any operation period, and in order to provide for the prompt payment of the losses agreed to be paid, of the salaries and expenses of experts, and of the refunds on exportation (as provided in section 16), in respect of such operation period, may advance to the equalization fund of any basic agricultural commodity, out of the revolving fund hereinafter established, such amounts as may be necessary.

(c) From such equalization fund, the losses agreed to be paid in respect of such operation period by the board shall be disbursed, the salaries and expenses of such experts as the board determines should be payable therefrom shall be disbursed, and any amounts advanced from the revolving fund (hereinafter established) and remaining unpaid (together with interest on such amounts at the rate of 4 per centum per annum) in respect of such basic agricultural commodity, shall be repaid. Any balance remaining in such fund shall be transferred to the equalization fund of such basic agricultural commodity for the next operation period.

Audits of Books and Accounts of Board

Sec. 13. The books and accounts of the board showing the payments of the losses and profits under agreements entered into under section 7, salaries and expenses of experts, and refunds on exportation shall be audited at least once every year at such times and by such auditors as the board may direct. The report of such auditors shall be included in the annual report to the Congress.

Co-operation With Executive Departments

Sec. 14 (a) It shall be the duty of any governmental establishment in the executive branch of the Government, upon request by the board, or upon Executive order, to co-operate with and render assistance to the board in carrying out any of the provisions of this Act and the regulations of the board. The board may, in co-operation with any such governmental establishment, avail itself of the services and facilities of such governmental establishment in order to avoid preventable expense or duplication of effort.

(b) The President may by Executive order direct any such governmental establishment to furnish the board with such information and data pertaining to the functions of the board as may be contained in the records of such governmental establishment. The order of the President may provide such limitations as to the use of the information and data as he deems desirable.

(c) The board may co-operate with any State or Territory, or department, agency, or political subdivision thereof, or with any person.

Definitions and Short Title

Sec. 15 (a) As used in this Act—

(1) In the case of wheat, the term "processing" means the milling for

market of wheat, or the first processing in any manner for market of wheat not so milled.

(2) In the case of cotton, the term "processing" means the milling for market of cotton, or the first processing in any manner (other than ginning) of cotton not so milled.

(3) In the case of cattle and swine, the term "processing" means slaughter for market.

(4) The term "person" means individual, partnership, corporation, or association.

(5) The term "United States," when used in a geographical sense, means continental United States.

(6) The term "co-operative association" means an association of persons engaged in the production of agricultural products, as farmers, planters, ranchers, dairymen, or nut or fruit-growers, organized to carry out any purpose specified in section 1 of the Act entitled "An Act to authorize association of producers of agricultural products," approved February 18, 1922, whether or not such association is qualified under such Act.

(b) This Act may be cited as the "Federal Farm Board Act of 1926."

Revolving Fund and Appropriation

Sec. 17 (a) There is hereby authorized to be appropriated the sum of $250,000,000, which shall be administered by the board and used as a revolving fund, in accordance with the provisions of this Act.

(b) For expenses in the administration of the functions vested in the board by this Act, there is hereby authorized to be appropriated the sum of $300,000, to be available to the board for such expenses (including salaries and expenses of the members and the per diem compensation and expenses of members of the council) incurred prior to July 1, 1927.

Separability of Provisions

Sec. 18. If any provisions of this Act is declared unconstitutional or the applicability thereof to any person, commodity, or circumstance is held invalid, the validity of the remainder of the Act and the applicability of such provision to other persons, commodities and circumstances shall not be affected thereby.

Refund on Exportation

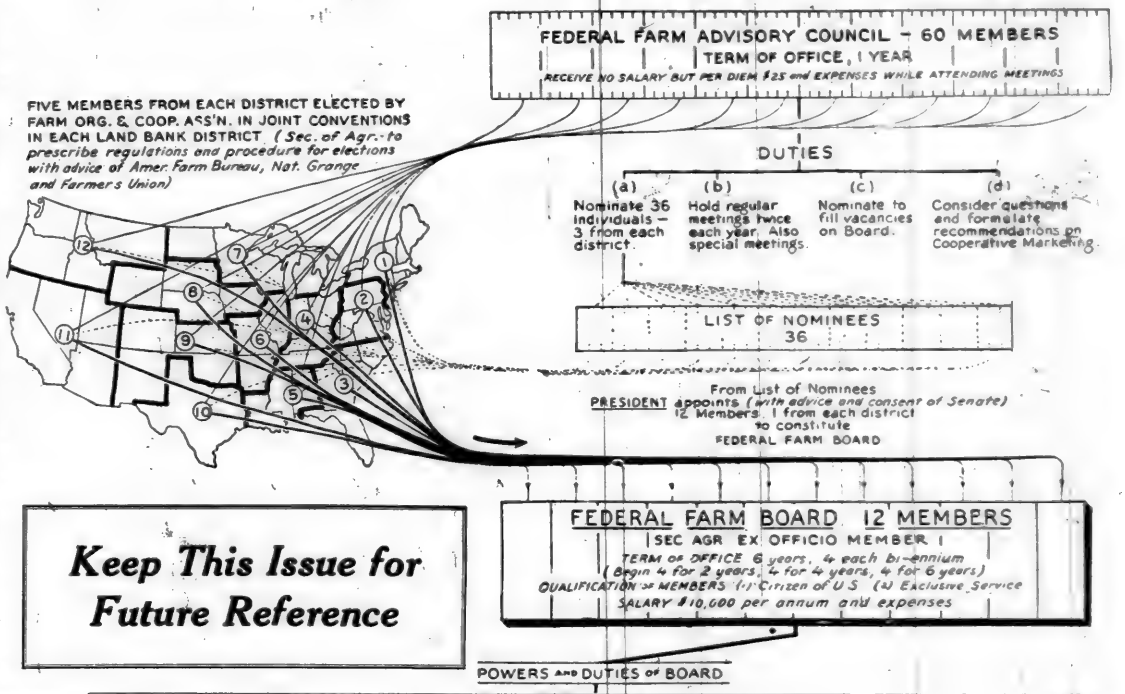
Sec. 16 (a) Upon the exportation from the United States of any product of a basic agricultural commodity in respect of which an equalization fee has been paid, the board shall allow and pay, out of the proper equalization fund, a refund in an amount equal to the amount of such equalization fee properly allocable to such product.

(b) The board shall prescribe such regulations as may be necessary for determining the amount of such refund, the identity and quantity of such basic agricultural commodity, and the payment of such refund to the exporter or to the person to whom the exporter shall in writing order such refund to be paid.

Relief of Corn Emergency

Sec. 19 (a) The board is authorized and directed to enter into agreements, under the conditions applicable in the case of a basic agricultural commodity, for the payment of losses arising out of the purchase (as soon as practicable after the enactment of this Act), drying, storage, sale or other disposition, of corn, or products thereof, except that—

(1) Such losses shall be paid out of, and any profits shall be paid into, the revolving fund:



(2) No operation period shall be declared, and no equalization fee shall be paid or collected; and

(3) Such agreement shall provide among other things, that corn purchased prior to November 1, 1926, shall not be sold in the United States prior to January 1, 1927.

(b) So much of the revolving fund as may be necessary, but not exceeding the sum of $100,000,000 shall be available for carrying out the provisions of subdivision (a).

(c) On and after the tenth day after the date of the enactment of this Act and until the expiration of one year from such date it shall be unlawful to import into the United States any article included in paragraph 724 of the Tariff Act of 1922.

PROPOSED MEASURE FOR RELIEF OF AGRICULTURE

Keep This Issue for Future Reference

Farmers Are 1-3 of U. S. Population; We Own 1-5 of U. S. Capital, But We Get Only 1-7 of National Income. That's Why We Are Fighting for *Equality for Agriculture*.

THE MONTGOMERY COUNTY FARM BUREAU is in the oil business. A farmers' company was started at Raymond March 1 with $5,500 subscribed for preferred stock at $50 a share, which is to bear 7 per cent interest. As soon as profits of the company warrent, it is to be taken up at 5 per cent premium.

Every farm bureau member is to receive a share of common stock which entitles him to dividends in proportion to the amount of business done by his own company. Oil trucks are being maintained to deliver gas, kerosene and lubricating oil. The net profit for the first two weeks was $115.

THE OFFICE OF THE SANGAMON COUNTY Farm Bureau has been moved into the $100,000 building and plant of the Producers Dairy Company, which was formed by the Springfield Milk Producers Association, sponsored by the Farm Bureau. The building occupied by the Farm Bureau is 40'x140'. A space 40'x50' is used for offices and seed germination, with 40'x90' space for storage.

MEMBERS OF THE FARM BUREAU WHO WANT to buy dairy cows to replace reactors or build up their herds can get information as to where to buy them through their own Farm Bureau. It is obtained by the dairy marketing department of the I. A. A. and passed on.

FARM BUREAUS INTERESTED IN HAVING THIS year's I. A. A. picnic will be interested in knowing that the executive committee expects to decide on its location April 9.

JOINT MEMBERSHIP AGREEMENT

No. A

Peppy COUNTY FARM BUREAU and the ILLINOIS AGRICULTURAL ASSOCIATION

The undersigned farmer hereby makes application for membership in the Peppy County Farm Bureau and the Illinois Agricultural Association, for the three year period beginning April 1, 1926 and ending March 31, 1929, inclusive.

If this application, agreement and concurrent orders attached hereto are not returned to the undersigned within five (5) days from the date hereof, it shall be conclusively presumed that this application has been accepted, and the undersigned entitled to full rights of membership.

If accepted for membership, I agree to abide by and conform to the by-laws of the said organizations, pledge to pay to the County Farm Bureau in membership dues Fifteen Dollars ($15.00) on April 1, 1926 Fifteen Dollars ($15.00) on April 1, 1927 and Fifteen Dollars ($15.00) on April 1, 1928.

Written orders duly executed evidencing then obligations for the three (3) years are herewith delivered to the Associations, receipt of which is hereby acknowledged. The Treasurer of said County Farm Bureau shall receive in trust for and remit to the Treasurer of said Agricultural Association Five Dollars ($5.00) out of the First payment, and Five Dollars ($5.00) out of each of the succeeding payments aforesaid as membership dues in the State Association. Out of each payments, fifty cents (50¢) of the dues each year to the Illinois Agricultural Association is to cover subscription to the Illinois Agricultural Association Record, of the dues each year to the County Farm Bureau is turnover subscription to the

In case of any permanent retirement from all farming interests, this membership shall terminate, conditioned, however, upon my promptly so the official board of the Farm Bureau proper written notice and evidence of such fact and having removed favorable action thereon such recess to be finally and conclusively evidenced by the return of all signed obligations given to the Farm Bureau. In case of my death this membership shall automatically terminate.

FIFTEEN and No/100 DOLLARS

192_

Slim and Spud

TWO well-known gentlemen of Illinois, the Honorables Slim and Spud, cartoon characters of Prairie Farmer who find fun, mystery and adventure about an ordinary farm at the beck and call of the pen of Cartoonist E. Ray Inman, have joined the Peppy County Farm Bureau and the Illinois Agricultural Association.

Proof of their membership is furnished in the reproduction of the joint membership agreement shown above.

Recently Hon. Slim had the good fortune to sell a plug horse for $50,000.

"Now that you've got all that money, what are you going to do with it?" asked his partner, Hon. Spud.

"Well, first of all, I think I'll join the I. A. A.," declared Slim.

"Join the I. A. A.!! . . . Gee, me . . . I can't figure you the Sam Hill you th A. A."

"Well, for one thing, I'm a THINKING farmer!" rejoined Slim.

"Oh-ho-ho-ho-ho—a *thinking* farmer! Har-har-har—Where do you get that noise? You, a *thinking* farmer!"

"Say!" returned Slim, hotly, "Didn't I sell an ol' horse that wasn't worth more'n a dime for $50,000. That's 500,000 per cent on your money, isn't it? I guess that makes me a THINKING farmer."

"I never thought of that."

"In fact, I think I am almost a Master Farmer!"

So Slim took Spud to the farm bureau office where they got a special joint membership for both of them. Both are prominent and favorably known in their home community, which is Porkshank township, near the town of Cassarole, Peppy county, "somewhere in Illinois."

With $49,985 still in his possession, Slim has turned his thoughts to the solution of the problem of the surplus. It is understood that the financial wizard of Porkshank township will have a definite solution to the agricultural problem in a week or so. Anyway we welcome Slim and Spud into the ranks of the Farm Bureau, and trust that Slim's efforts to solve the problem are more successful than many who have tried before him.

First Week of Chicago Producers' Suspension Brings More Shipment

Although the thirty days' suspension order against the Chicago Producers' went into effect March 20, more business was done the first week of the suspension than the week before it went into effect. The St. Louis Producers', with authority of Secretary Jardine, established a branch in Chicago, using the Chicago Producers' personnel under the management of C. D. Denman, president of the St. Louis and National Producers.

At the special meeting held March 18, in Chicago, attended by over six hundred representatives of the 90,000 shippers to the Chicago Producers' located in Illinois, Iowa, Minnesota, Wisconsin and Indiana, the resignations of the seven directors and manager, S. W. Doty, were tendered; but those of the board were vigorously refused. Five new directors were added to the board, however, and the executive committee was instituted, consisting of the president, secretary and three directors, to be elected by the twelve directors. The executive committee is to keep closely in touch with the business during the intervals between board meetings. Lyle C. Johnston, Bloomington, is the additional director from Illinois.

The board meets April 15, to elect officers and the executive committee. Resolutions of the six hundred commended the honesty of the seven directors and managers who placed the case before the meeting so the farmers themselves could be judged and juried. In the meantime, Secretary Jardine is encouraged to carry on the same stringent clean-up process all over the yard, and indications are that he is doing so.

Reinsurance Company Announces Crop Hail Insurance; Low Cost

Crop hail insurance for Illinois farmers is now available on a mutual basis, it is announced by the Farmers Mutual Reinsurance Company, the state-wide organization formed about a year ago by joint action of the Illinois Association of Farm Mutual Insurance Companies and the I. A. A.

"In order that Illinois farmers may receive this insurance service at the cheapest possible cost, it will be written by agents of local mutual insurance companies and by Farm Bureaus," says Wm. B. McFarland, secretary.

"Arrangements have been made to reinsure the crop hail insurance with one of the largest mutual hail insurance companies in the world. The farmers will be protected against excessive assessments.

"The policy will be for one year with an automatic renewal privilege for four more years, making five in all. The cost for the first year will be based on experience tables and in all probability will not exceed $24 per $1,000 of insurance. On an average for the five years, the cost is expected to be around $20 to $22 per $1,000. The greater the volume of business, the less the cost. This rate means a saving to the farmers who take advantage of it of from 20 to 30 per cent in premium cost."

Policy blanks and agent's instructions were sent out from the I. A. A. office last week.

THE DEKALB COUNTY FARM BUREAU successfully defended a number of its members against a seed company which sold them seed oats at $2 per bushel. Upon learning that the oats were not as represented, the order was cancelled. Then it was found they had signed a combination note and order.

THE JACKSON COUNTY FARM BUREAU is fostering a tomato marketing cooperative.

Milk Consumption Increased by Dry Law, Survey Shows

Fifty-one Dairy Authorities Answer Questionnaire; 33 Say "Yes," 7 "No" and 11 are Non-Committal.

Prohibition has been a principal factor in the 27 per cent increase in milk consumption from 1918 to 1924 according to a nation-wide questionnaire-survey conducted by the Illinois Agricultural Association.

Fifty-one leading dairy experts employed as heads of dairy departments of agricultural colleges, agricultural agents of railroads, managers of cooperative milk distributing agencies and milk dealers answered the questionnaire which was sent out by A. D. Lynch, director of the association's department of dairy marketing.

Of the 51, 33 definitely stated that prohibition has had an effect upon the increasing consumption of milk by the American public, 7 said "No" and 11 were non-committal.

The opinions as to the degree of effect of the Volstead act varied from 50 per cent to "very little" with a majority attributing about one-fourth of the increase to scarcity of beer, wine and other intoxicating liquors. Educational advertising was given most of the credit.

More Phosphate Used During 1925 Than in Any Year Since 1920

During 1925, 26,270 tons of phosphate were used by Illinois farmers, which is more than has been used during any other year since 1920 when 32,000 tons were applied to the soil.

The I. A. A. maintains a branch of its phosphate-limestone department at Columbia, Tenn., in the heart of the phosphate-producing country, where analyses are made and reports made direct to farmer-purchasers. Members get this service free as well as a 50-cent per ton lower price than non-members due to group-buying advantages used by the I. A. A. The five outstanding phosphate-consuming counties during 1925 were: Will, Iroquois, Livingston, Grundy and McLean.

THE CLEARING HOUSE ASSOCIATION of Quincy, representing the banks, is offering $595 for prizes, premiums and trips to members of Adams County Boys' and Girls' Clubs during 1926. The move is sponsored by the Farm Bureau.

Lived Nearly a Century on One Farm

ABOVE is pictured the gentleman who is thought to be the oldest member of the Farm Bureau and I. A. A. in Illinois. He is William Marvin, age 93, of West Union, Clark County. The lady is Mrs. Marvin. The picture was taken only last August, so you can see that Mr. Marvin bears his years well.

"William Marvin was born, raised and has lived his entire life on the farm which he now owns," states Worth W. Merritt, farm adviser of the Clark County Farm Bureau. "He is rated as a successful farmer by his many friends in York township. Excepting the time which he spent in the Union army during the Civil war, he has spent his entire life on this farm. At a corn culling demonstration held at West Union recently, Mr. Marvin was an interested spectator, coming with some of his tenants, bringing his corn and remaining during the entire forenoon session.

"Judged from all standpoints, Mr. Marvin has been a success. He has lived in the same community nearly a century, and he can well be classed as an asset on the balance sheet of mankind."

Mr. Marvin joined the Farm Bureau in January at the solicitation of H. A. Bramlet of Eldorado, Saline county, who has been doing membership work in that county.

In the spring of 1924, Mr. Marvin planted a peach orchard by himself, and recently purchased a stump puller. This past winter he has been supervising the clearing of 12 acres of brush land. He is also making preparations to sow 12 acres of alfalfa.

"He is remarkably active for a man of his age and takes a keen interest in the affairs of life," says Mr. Bramlet.

If any reader knows of an older member of the Farm Bureau, or one who is approximately the age of Mr. Marvin, THE RECORD would be glad to have the information.

Farm Bureau Saved From $45,000-$60,000 On Limestone In 1925

More limestone was used by Illinois farmers during 1925 than ever before. The amount was 800,000 tons, which is comparable with 525,000 tons used in 1924, a record at that time. During 1925 Illinois farmers used about one-third of all that was applied in the United States. Indications are that 1926 will see 1925's record broken.

Members get a 10-cent per ton lower price on limestone which amounted to a saving during 1925 of between $45,000 and $60,000. Lower prices, brought about by group bargaining, resulted in an additional saving, other than the 10-cent per ton differential, of over $100,000, according to J. R. Bent, director of the I. A. A. phosphate-limestone department.

THOMAS CUMMINGS, PRESIDENT OF THE Jersey County Farm Bureau, spoke right from his heart in a message sent by the Farm Bureau to every member recently. It was addressed "To the Men Who Made Every Fellow Rich Save Himself."

"Farmers talk too much and think too little," he said. "We need less talking, more thinking and more willingness to give our problems mature consideration of our best judgment. We should have a greater willingness to sit down and work these problems over together and out of this cooperation we can come to a definite agreement of ways and means to help ourselves. Organization is the means for this."

THE ADAMS COUNTY FARM BUREAU HAS gone on record against old age pensions and daylight savings.

FOR THE ELEVENTH SUCCESSIVE YEAR, B. H. Taylor, of Rapatee, has been elected president of the Fulton County Farm Bureau. Mr. Taylor is also an executive committeeman of the I. A. A. His 11 years of continuous service is thought to be a record in Illinois. Anyone knowing of longer service by any official of a Farm Bureau would bestow us a favor by so informing this office.

ORGANIZATION WORK IS PROGRESSING RAPIDly in Edwards, White and Wabash counties in behalf of the Indiana Wheat Growers Association. Membership in the pool is being limited to members of the Farm Bureau, and dues are to be taken out of proceeds from sales of wheat. About 150,000 bushels of soft wheat in Wabash Valley counties were marketed through the pool last year, and the growers are enthusiastic.

A COOPERATIVE OIL COMPANY HAS BEEN started by the Marshall-Putnam Farm Bureau which is expected to operate in parts of La Salle and Bureau counties as well. Capital stock is $25 a share, totaling $25,000. There are 2,000 shares of common stock to be held by farm bureau members. Preferred stock will pay 8 per cent before refunds are made to members in proportion to their purchases.

THE E. ST. LOUIS PRODUCERS' HANDLE between 18 and 20 per cent of the total receipts on that market every week.

MACOUPIN COUNTY LIVESTOCK SHIPPERS contributed the most business to the E. St. Louis Producers during 1925, this county having a refund recently of $1,816.29. Twenty per cent of the paid-in commissions was refunded by the St. Louis co-op totaling $17,694.22. The total Illinois refund was $18,756.94.

Exactly Our Sentiments

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Volume 4 | Issued Every Month for 63,000 *thinking* Farmers—May 1, 1926 | No. 5

PRESIDENT SMITH URGES EVERY FARMER TO WRITE CONGRESSMEN!

Smith Gives Reason Why Tincher Bill Is No Good for Farmers

Says Administration's Farm Relief Proposal Would Place Entire Burden of Stabilization on Cooperatives, Thus Making Membership Undesirable.

THE Coolidge administration's program for farm relief as embodied in the Tincher bill, referred to in Washington as a measure "everyone knows has the endorsement of the administration," and which has the open support of Secretary Jardine and the endorsement of "the spokesman of the White House" is unqualifiedly disapproved by the Illinois Agricultural Association.

Speaking for the association's 63,000 farmer-members, Earl C. Smith, Detroit, Pike county, president, issued the following statement:

"The appearance of the Tincher bill in the House and its companion bill in the Senate, draws a clear picture of the tremendous gap between the national agricultural program which the farmers are working for and what the administration offers as its program.

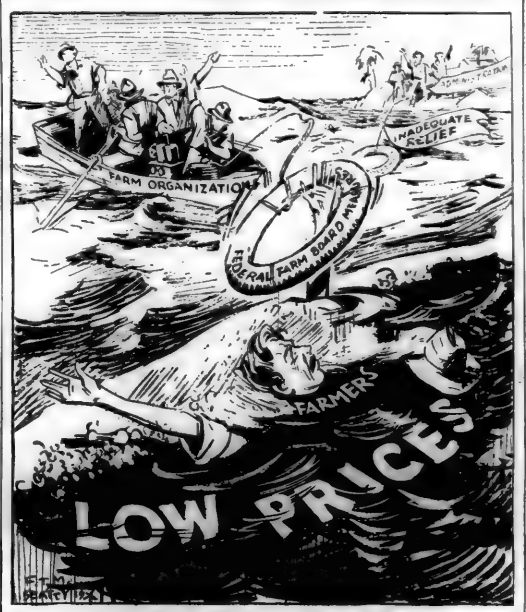
"Now that the House committee on agriculture has reported out both the farmers' measure, which is the Federal Farm Board bill and the Tincher bill, bringing both to the attention of the whole House, it is time that we clearly state our position.

Would Not be Effective.

"In our opinion the Tincher bill fails utterly to address the basic problem of agriculture besides embodying in it most objectionable provisions.

"The reasons why the Tincher bill has the unqualified disapproval of the Illinois Agricultural Association are:

"(1) It provides no mechanism or funds for making the tariff effective.



"(2) It makes no provision of any kind for handling the surplus or stabilizing markets or prices.

"(3) It provides no aid for carrying over surplus production from one year to the next or for finding markets.

"(4) The revolving fund provided in the bill cannot be used except to make loans to cooperatives which must be repaid with interest. Cooperatives do not need government loans for their regular marketing operations. If they need loans for handling the surplus they will unfairly impose upon their members the entire cost of stabilization, and, therefore, they will not accept such loans. In other words, this bill provides for an additional method for cooperatives to get into debt. If cooperatives undertake to handle a crop surplus so as to stabilize prices, to make the tariff effective, or to regulate the world price, (as in the case of cotton) the costs of the endeavor and the risks they run would be borne by the members only of such cooperative associations. The cooperative which attempted to do this would certainly destroy itself for it would in effect be placing a penalty on membership in that organization.

"The Federal Farm Board measure which is supported by the farm organizations of the Corn Belt, of the North, the West and of the South, truly representative of the producers and in substantial agreement, and has been reported on favorably by the Senate committee on agriculture, places the cost of caring for the surplus on every producer. It is not price-fixing any more than the tariff is price-fixing or the immigration law, or the transportation act. It does not place the government in business, and does make the tariff effective."

No Use Throwing a Life Saver That Won't Reach

225 of Illinois' Best Farmers Earned 3.21 Per Cent on Investment in 1925

THE first annual report of Farm Bureau-Farm Management service conducted under auspices of the department of farm organization and management of the University of Illinois and the Farm Bureaus in Livingston, McLean, Tazewell and Woodford counties, shows that the 225 farmers whose records were used in preparing the report, after paying all expenses of operating their farms, without including any allowance for their own labor, lacked $382 of making 5 per cent on their investment.

M. L. Mosher and H. C. M. Case are authors of the report, the former acting as field man for the 225 farmer-cooperators who keep records.

The average investment per acre, states the report, including buildings, livestock and other equipment, was $258.15 per acre. Expressed in another way, these men earn 3.21 per cent on their investment, after deducting all expenses of operating their farms and $720 for the value of their own labor.

"In addition to the wages allowed a man for his own labor, these farms on an average received the use of produce from the farm which at farm prices was worth $430 per farm. Also the house they lived in was worth $446 per farm each year based on depreciation, upkeep and interest charges. The total value of the living furnished from the farm at farm prices amounted to $876 per farm.

These Farms Much Above Average.

"In considering the earnings on these farms it must be recognized that these farms do not represent the average farm conditions and average farm earnings. Most of these men own their own farms or else are renting them from relatives, and on the whole they are more productive than the average of all farms of a community in this section of the state. A survey was made of all the farms of one township in the center of the area represented by the 225 farms securing information which would determine the approximate farm earnings. It was found that the 225 cooperators in this project received a return of more than a thousand dollars greater net income per farm for 1925 than those in the one township where very few farm records were kept."

Farmers' "Lead Pencil" Letters Needed Down at Congress NOW; Says Farm Board Bill Only Hope to Quickly Boost Prices

EVERY farm bureau member is urged to write letters to his Congressman, the two Congressmen-at-large and the two Senators, by Earl C. Smith, president of the Illinois Agricultural Association.

"In the last issue of THE RECORD," says President Smith, "we printed the full text of the Federal Farm Board measure which is the definite form of the general principles of farm legislation endorsed by the delegates at the annual meeting at the University of Illinois last January.

"We asked at that time that members study the bill and be in position to act when called upon. It has developed, with the drawing of definite lines in this fight, that the administration leaders who do not want the Federal Farm Board measure are saying that the real farmers in the country do not want the equalization fee, which makes it possible to skim the surplus production off the domestic market and dispose of it abroad at world prices and place the loss on the producers of the commodities benefited.

Equalization Fee Necessary.

"I am convinced, as are the others who have given this problem close study, that the equalization fee is absolutely necessary to make the plan effective; to avoid direct government subsidy and to strengthen our cooperative marketing organizations.

"I know that Congressmen and Senators give more weight to letters from farmers within their district than a half-dozen telegrams from outside. The more letters each member writes, the greater is his realm of influence and usefulness in this fight.

"The following Congressmen and Senators should be written IMMEDIATELY:

1. Senators Charles S. Deneen and William B. McKinley of Illinois.

2. Congressmen-at-large Richard Yates and Henry R. Rathbone.

3. Your own Congressman.

"Address these men care of the Senate or House Office buildings, Washington, D. C.

What to Write.

"The points that should be stressed in letters are: (1) That Congressmen exert their utmost efforts to pass the Haugen bill, which is the name of the farm organizations' Federal Farm Board measure in the House, and, that Senators vigorously support and defend the McNary bill, as our bill is known, in the Senate; (2) Urge defeat of the Tincher bill in the House and the Capper bill in the Senate as it is evident that the administration has brought out this proposal to substitute for and to defeat the Federal Farm Board measure.

"There is no doubt that the Federal Farm Board measure is the only bill before Congress that promises to immediately enhance the value of major farm commodities."

3 Important Bodies Indorse I. A. A. Stand on Farm Legislation

Three important indorsements of the Illinois Agricultural Association's stand for "Equality for Agriculture" have been rendered recently.

The American Federation of Labor officially indorsed the Federal Farm Board bill before the proper committees at Washington. The Hamilton Club of Chicago, the largest Republican organization of its kind west of New York, passed a resolution urging Congress to "redeem the Republican pledges of 1924" by providing adequate relief legislation for the farmers. The Illinois Bankers Association, through its administrative committee and committee on agricultural relations, endorsed the Federal Farm Board measure. In a letter from Secretary M. A. Graettinger of the Bankers association to Secretary Fox, he said:

"The general sentiment was in favor of going along with the Illinois Agricultural Association and cooperating with it to the fullest extent, and with this end in view, action was taken endorsing the Federal Farm Board bill."

Many local Chambers of Commerce in Illinois have taken similar action.

Legislative Situation at Washington Rallies 500 More to Our Ranks

At least 500 new members in the Farm Bureaus and the I. A. A. will result from the large number of township meetings held in some 40 Illinois counties the week of April 19 to 24, according to George E. Metzger, organization director.

"Up to Tuesday morning, April 27, 276 new members have been reported to my office," Metzger says. "There are 39 from Pike county; 25 from Rock Island; 22 from Macon; 25 from Morgan; 6 from Hancock; 12 from Henry; 22 from Sangamon; 25 from DeWitt, and 100 from McLean.

Bad Weather Interfered.

"Reports from farm advisers show that stormy weather seriously handicapped holding the meetings. The

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, social and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Published once a month at 404 North Wesley Ave., Mount Morris, Illinois, by the Illinois Agricultural Association. Edited by Department of Information, Harry C. Butcher, Director, 608 South Dearborn Street, Chicago, Illinois. Entered as second-class matter October 30, 1925 at the post office at Mount Morris, Illinois, under the Act of March 3, 1879. Acceptance for mailing at special rate of postage provided for in Section 412, Act of February 28, 1925, authorized October 27, 1925. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record. Postmaster: In returning an uncalled for or missent copy, please indicate key number on address as is required by law.

Address All Communications to Illinois Agricultural Association, 608 S. Dearborn St., Chicago, Ill.

How the McNary-Haugen Bill Was Defeated

THE Congressional Record of April 15 contains an interesting revelation in line with the story printed in the April 1 issue of THE RECORD. In that issue we told how the Grain Dealers' National Association (old line companies) were urging through their official organ that members hold themselves in readiness to send letters and telegrams to Congressmen and Senators to defeat the Dickinson bill, which has since been slightly changed and re-named as the Federal Farm Board measure and was printed in full in the preceding RECORD.

"It may be necessary for the Association to call upon its members, direct and affiliated, for assistance in the fight before Congress," was a statement printed in bold face type in a long editorial against the farmers' efforts to secure equality, which appeared in the Grain Dealers' official paper. "If the Dickinson bill is reported out, and indications point to its serious consideration by the House, then it will be up to YOU to do your duty! You will be kept posted and when President Horner issues the call for your aid you will be expected to respond as you did when the McNary-Haugen bill was snowed under. You are duty-bound to fight such legislation, from the standpoint of patriotism as well as SELF-INTEREST!"

Some of the 75 Chicago members of the Grain Dealers' National Association are: Armour Grain Co.; Bartlett, Frazier Co.; Rosenbaum Bros. and the Rosenbaum Grain Corporation, which, it will be remembered, were anxious to assist the farmers by selling them a $26,000,000 "cooperative" grain company.

Then on April 15, in the Congressional Record, we find the following:

"Mr. Summers of Washington: (Speaking before the House) Mr. Chairman and gentlemen, two years ago I led an active campaign of education in behalf of farm legislation. Our bill was known as the McNary-Haugen bill. We sent out more than 30,000 letters from my office to farm leaders throughout the United States. At one time I predicted the passage of that bill. I was not mistaken at that time. It was finally defeated but 'murder will out.' We now know 'who killed Cock Robin.' The Colorado Wheat Grower of February 20, 1926, tells a story that will interest every farmer in America. I quote from the Wheat Grower:

"*'GRAIN OFFICIALS TELL HOW FARMERS' BILLS ARE BEATEN—SECRETARY OF GRAIN DEALERS' NATIONAL ASSOCIATION EXPLAINS HOW McNARY-HAUGAN BILL WAS DEFEATED AFTER LOBBYISTS INTERVIEWED CONGRESSMEN; 'WE WORK WHILE YOU SLEEP.'*

"'How a well-organized minority can impose its wishes on a poorly-organized majority was entertainingly explained by Charles Quinn, secretary-treasurer of the Grain Dealers' National Association, speaking before the Colorado Grain Dealers' Association in Denver last week.

"'More specifically, Mr. Quinn's story described how 16,000 grain dealers have been able to maintain their marketing whip hand over 7,000,000 farmers.

"'With pardonable pride Secretary Quinn told 'what an association can do.' (He referred to an association of grain men.)

"'He told how the Grain Dealers' National Association had helped to defeat the McNary-Haugen bill. He told how the grain dealers' lobbyist in Washington carries on his work. He told how the Grain Dealers' National is always on the job and 'works while you sleep.'

"'Speaking on the work of the Grain Dealers' National, he said:

"*'When the McNary-Haugen bill was introduced, a canvass of the House showed enough votes to pass it with 95 to spare. The Grain Dealers' National Association got busy. Grain men gave freely of their time and we had from 5 to 15 men in Washington all through the danger period.*

"Killing the McNary-Haugen Bill.

"We met in the morning and each man was assigned to see certain Congressmen. In the evening each man reported the results of his interviews. Before a vote was called every Congressman had been interviewed and we estimated we had beaten the bill by 75 votes. The following day the returns showed it was beaten by 73. That is what an association can do.

"Many bills to help the farmer are before Congress now, but there is only one that is really dangerous and that it is necessary to fight—the Dickinson bill."

"'Mr. Quinn did not explain why it is necessary for the grain dealers to fight a bill which is, by his own statement, designed "to help the farmer." Neither did he say, in so many words, that the grain dealers' interests are directly opposed to the interests of the farmer. His listeners were left to draw their own conclusions.

"'Speaking on the work of the Grain Dealers' National, he said:

"*'It (the Grain Dealers' National) is always on the job looking out for the interests of the grain trade; looking out for the interests of the Colorado Grain Dealers' Association as well as those of the 18 other affiliated organizations. (There is an Illinois organization.) Every industry has lobbyists in Washington. And it is necessary that the Grain Dealers' National Association keep a man there also, which we do. He goes every morning to the clerks and finds out what bills have been introduced. Then he checks on what happens to them in all the various details and keeps me acquainted by letter and telegraph. I in turn acquaint the state organization secretaries with any developments of importance, that they may carry it to their membership.*

"I took the secretaryship of the National Association on January 1, 1914. During the last 10 years hell has broken loose!

"'Mr. Chairman, while I do not believe Mr. Quinn spoke for all millers throughout the United States, I do suggest that all members of Congress re-read and ponder his statement when general farm legislation is under consideration. Perhaps we can corral some of this fire and brimstone in behalf of the farmer.'"

This ought to make every red-blooded farmer hot under the collar. You can see now who is causing most of the opposition down at Washington, and we know they're on the job down there right this minute trying to influence votes against the farmers' bill for equality with industry and labor. They will be successful in proportion to our weakness.

The only way to meet this kind of opposition is by letters from the farmers themselves. A prominent Congressman recently said that "two or three pencil letters have more weight with Congressmen than a stack of telegrams." Therefore your voice has considerable weight and you can make good use of it by writing your Congressman. If you have written before, as many Illinois farmers have, then it won't hurt to write again, in fact the cumulative effect will be greater if you write several times. Be sure and make your letter plain in support of the farm organization's bill—the Federal Farm Board measure.

If farmers get as active now in advancing their own interests as the grain dealers have in opposing the farmers, then Manager Quinn will have more reason to believe that "hell has broken loose."

Why Farmers Should *Support* the Tax Amendment to Illinois Constitution

(To be voted on in November, 1926)

1. Real estate, although less than one-half—many say less than 40 per cent—of the property in the state, is now paying about 80 per cent of all of the taxes for most purposes.

2. Tangible property, although probably not more than one-half of the property in the state, is now paying more than 92 per cent of all of the taxes for most purposes.

3. A minority of the people of the state are now paying all of the taxes for most purposes.

4. Owners of some kinds of property easily can and do add their taxes to the prices of their services or products. Owners of other kinds of property, notably land, cannot shift their taxes to others to pay.

5. Owners of mortgaged property are now paying double or multiple taxes. They pay taxes not only on their equities, but also on the value of the mortgages, and pay a higher rate of interest on taxable mortgages whether the mortgages pay taxes or not.

6. Lack of personal interest on the part of most people in the economical and efficient use of tax moneys, and their belief that they are paying no taxes of any kind, promote extravagance and a rapid increase of deferred taxes in the form of bonded indebtedness.

7. Taxes are rapidly increasing in Illinois partly because the population is increasing, but chiefly because of the demand for new forms of service.

8. Under the present constitutional limitations none of the inequalities of the present taxing system described above can be fairly or properly corrected. The proposed amendment is a grant of power to the General Assembly, enabling it from time to time to correct inequalities in taxation and to establish a modern and equitable system of taxation.

Earl C. Smith

President, Illinois Agricultural Association.

[Brief articles in support of the points stated above will be printed in later issues of THE RECORD. Questions relative to the proposed tax amendment are invited and will be answered through THE RECORD.]

The Greatest Inequality of the Illinois Taxing System

By John C. Watson, Director, Department of Taxation and Statistics, Illinois Agricultural Association.

THE unfairness of the present taxing system in Illinois is well shown by a comparison of amounts of income received by the population of the state from different sources, and the relative direct tax burden carried by each principal source of income. The figures on income given below are taken from the book entitled "Income in the Various States," recently published by the National Bureau of Economic Research. They are for the year 1921, but there is every reason for believing that the unfairness disclosed would be worse if the figures for 1925 were available. The percentages of total income derived from each source are computed from the figures given. The percentages of total valuations of property, which are also approximately the percentages of total taxes paid by the several sources of income, are computed from the 1924 report of the Illinois Tax Commission.

Tax Burdens of the Principal Sources of Current Income Received by the Population of Illinois.

Source of Income	Income Received in 1921. Amount	Percentage of Total	Percentage of Valuation in the 1924 Assessment
Intangible Property, Interest and Dividends	$ 489,640,008	10.0	7.3
Tangible Property. Rented out or used for farming or for business	1,130,000,000	23.0	70.8
Miscellaneous—Chiefly rental values of urban and farm residences occupied by their owners	387,296,000	7.8	22.2
Personal service—Salaries, and wages	2,910,080,000	59.2	None possible

According to these figures, interest and dividends make up about 10 per cent of the total income of the population of the State. The sources of interest and dividends are 7-3/10 per cent of all valuations for tax purposes in the 1924 assessment. Tangible property, not including residences, either urban or rural, occupied by their owners, returned 23 per cent of the total income, but had 70⅓ per cent of the total assessments. Relative to income, therefore, tangible property used for farming or business, including the railroads, had 4-1/5 times as heavy a direct tax burden as intangible property. Income from miscellaneous sources, chiefly urban and farm residences occupied by their owners, must also be allowed for, since this kind of property not only saved the payment of rentals, but also paid taxes. Income of this character accounted for 7-4/5 per cent of the total and had about 22-1/5 per cent of tax valuations.

The greatest weakness in the present taxing system is its failure to tap the greatest source of income and of taxable wealth in the state. In 1921, salaries and wages accounted for more than 59 per cent of the total income of the population of the state. They paid no direct taxes and could pay none. Undoubtedly this source of income was used for actual payment of taxes on some property, especially urban residences occupied by their owners. From another and more correct point of view, taxes on this class of property were paid out of the saving in rentals. For it must be kept in mind that the general property tax is never levied on individuals, but is levied on property, and that non-payment of a property tax results in the sale or forfeiture of the property, if real estate, to the state.

On January 1, 1920, less than 37 per cent of urban residences and less than 58 per cent of the farms of the state were occupied by their owners. It is certain, therefore, that the amount of income derived from salaries and wages used in payment of taxes on owned homes was a relatively small amount of the total income.

It is true that some of the income derived from personal services is used in an indirect way for paying taxes which are shifted in urban rentals, transportation or public utility rates, in the prices of consumption goods, or in other similar ways. The amounts of taxes thus indirectly paid are a small percentage of the total income from this source. Total state, county, and local taxes in Illinois are only about 10 per cent of the total income from personal services. It is certain that indirect taxes paid out of income from this source are only a fraction of ten per cent of the total income.

Under the present taxing system in Illinois, tangible property, chiefly real estate, including the railroads, is compelled to pay at least four times as much taxes relative to what it produces, as money and credits.

Owners of land, especially farm land, cannot usually shift their taxes to others to pay. They are compelled, therefore, to pay many times as much in direct taxes as those who receive equal income for their personal services. Under the present system of taxation such inequalities cannot be removed. The situation is certain to become worse. It can be corrected only under broad powers granted to the General Assembly as in the pending revenue amendment. It must be corrected if we are to avoid confiscatory taxation of real estate.

DOESN'T FARMING MERIT PROTECTION GIVEN OTHER CLASSES?

Here's High Spots of Executive Body's Meeting April 7; Picnic at Mt. Vernon

THE high spots of the executive committee meeting on April 7 are summarized as follows:

1. Treasurer's report, on motion by Moody, seconded by Tullock, ordered received and placed on file.

2. Report by Barton, chairman of public relations sub-committee, that I. A. A. lend its moral support to Illinois Association for Criminal Justice, the purpose of which is to obtain information concerning criminal justice and make recommendations. A similar organization in Missouri has done good work. Donald Kirkpatrick, I. A. A. legal counsel, has assisted the cause. Motion by Barton, seconded by Whisnand, that recommendation be adopted.

I. A. A. to Help Solve Crime Problem

Report by Barton concerning possibilities of helping form state-wide farm bureau protective association. Information obtained insufficient for action and more time required.

3. Report by Tullock, chairman committee on financial business service, on Farmers Mutual Reinsurance Company. The company, he reported, is making a steady growth, having $1,496,867 of insurance in force at the time, with 51 local mutuals using the company's specific reinsurance service, 42 the blanket reinsurance and 23 the recession reinsurance. The state company can now handle a $40,000 risk. The companies having blanket reinsurance with the Farmers Mutual Reinsurance Company have over $90,000,000 of insurance in force. This means that each company carrying blanket reinsurance is protected by other companies that have a total of about $90,000,000 of insurance in force.

Reinsurance Company Making Steady Growth

Tullock also reported that crop hail insurance is now available to the farmers of Illinois through the Farmers Mutual Reinsurance Company. Farm Bureaus and agents of mutual fire insurance companies will act as agents of the reinsurance company in writing hail insurance. The saving to the farmer should be about 20 per cent. Both reports accepted and placed on file by motion of Tullock and seconded by Bamborough.

Crop Hail Insurance Now Available At Saving

4. Bamborough, chairman of the committee on organization, reported that all details were arranged for beginning the I. A. A. farm radio program from WGN as soon as the executive committee approved it, which was done upon motion by Bamborough, seconded by Tullock.

5. Report by Finley on grain marketing stated that on March 15 at a meeting of the board of directors of the National Farmers Elevator Grain Company, Cooperative, the basis of a contract was discussed which would set forth the relationship between the I. A. A. and the company in the selling of stock of the company. The I. A. A. proposed to furnish a man and pay his salary and expenses in the selling of the stock and suggested that the length of time, amount to be sold, return of amount subscribed, (to be returned in full to subscriber if insufficient stock was sold) together with other minor items, should be in the contract.

Basis of I. A. A.-Farmers Elevator Co. Discussed

This kind of agreement was not acceptable to the company. A committee was appointed to give further consideration to it and a meeting was held April 7 when it was decided that a committee meet with the I. A. A. on April 16 and submit a proposition for consideration.

Motion by Barton that contract terms be left with I. A. A. officers, but with instructions to properly safeguard funds derived from sale of stock in such manner that in case of insufficient stock being sold to properly finance company, those funds already collected from stock sales to be returned, except such amount as shall be agreed upon as necessary for organization work. Seconded by Marshall and carried.

Report of Finley on soft wheat pool in Southern Illinois which is an extension of the Indiana Wheat pool into Illinois, showed that Edwards, Wabash, White, Wayne and Crawford counties have definitely decided to put on membership drives. Ninety members in pool secured in short time, 27 of which thereby became new members of Farm Bureaus.

Soft Wheat Pool Growing in Illinois

6. George J. Jewett, formerly president of American Wheat Growers, and now president of the Federal Land Bank at Spokane, Wash., was invited to give the committee the benefit of his recent trip to Washington from which he was returning.

7. Sam H. Thompson, past president of I. A. A. and now A. F. B. F. chief, addressed the committee briefly on the legislative situation at Washington, saying, among other things, that the powers-that-be at Washington need to know how the farmer out on the farm feels about legislation. Every farmer can be of immediate assistance to the cause by writing his Senators and Congressmen, he declared.

"Our Sam" Urges You to Write Congressmen

"They'll take the farm leaders' word for it if we're for the bill they're for," said President Thompson, "but if we want one they do not, then they are inclined to doubt our authority for speaking for farmers."

8. Report by Webb stated that I. A. A. should continue to work for increased federal appropriation for t. b. Report moved adopted by Webb, seconded by Karr.

9. President Smith opened consideration of time and place of annual I. A. A. state-wide picnic. A delegation was present from Tazewell county, consisting of Joseph Morris, president, and Ralph Arnett, farm adviser, representing the Tazewell County Farm Bureau, and Secretary Lyman of the Pekin Association of Commerce, which spoke for holding the picnic at Pekin. W. L. Wimberly, member of executive committee of the Jefferson County Farm Bureau, spoke for Mt. Vernon. Secretary Fox read a letter from McDonough County Farm Bureau in behalf of Macomb. Vote by ballot resulted in Mt. Vernon getting the picnic with 13 votes, Pekin getting 2 and Macomb 1. Since the annual meeting is always held in Northern Illinois, it was the opinion of the majority that Southern Illinois should have this year's picnic. Wimberley's oration on Southern Illinois peaches and promise of free ones also had some weight. Date to be announced later, but it is expected to be sometime in August.

State Picnic to Be At Mt. Vernon This Year

10. Consideration of place of next annual meeting, on motion of Karr and seconded by Whisnand, to be at next meeting.

THE MAN WHO WILL ELECT THE NEXT PRESIDENT

—Chicago Tribune

Predicts 10 Per Cent Volume for Producers By End of This Year

"The support given the St. Louis Branch agency the month it operated in Chicago and to the Chicago Producers during "Producer Week" answered the public's inquiry as to whether the farmer believes in the principles of cooperative marketing, especially of livestock, according to William E. Hedgcock, I. A. A. director of livestock marketing.

"The receiving, yarding and selling of 7½ per cent (315 cars) of the entire Chicago receipts of live stock during "Producer Week" is a wonderful record for cooperative marketing. In making this record the Chicago Producers handled 68 more cars than their nearest competitor and, with only two exceptions where check-ups were necessary, had every bill of sale in the mail the same day the sale was consummated.

70 Buyers in Producer Alleys.

"The activity of the Chicago Producers is commanding the attention of the buyers as indicated by the fact that they sold livestock to 70 different buyers in one week.

"The Chicago Producers handled 130 carloads of cattle, which was 5.1 per cent of the Chicago run, 166 carloads of hogs, which was 11.5 per cent and which was more hogs than the combined receipts of the next three largest firms, and 17 carloads of sheep, which was 8.2 per cent of the run during 'Producer Week.'

"This spirit of confidence and cooperation on the part of livestock producers has made it possible, during the past three years, for the association to sell 57,000 cars of livestock, with a total value of over $100,000,000. With this spirit of cooperation and confidence it is not unreasonable to expect the Chicago Producers to be marketing 10 per cent or more of the total receipts of the Chicago Stock Yards by the end of the year."

Egypt Launches Co-op to Handle Poultry and Eggs of 250,000 Hens

"Egypt" will soon launch a new enterprise in the way of a cooperative poultry and egg marketing association—a companion to the well-known "Red-Top" Seed Growers Association. During the past two months the counties of Clay, Effingham, Wayne and Edwards have been covered with meetings for the purpose of explaining the I. A. A. plan for marketing poultry and poultry products cooperatively.

"Everywhere the poultry producers have shown unusual interest in this plan and have urged the several Farm Bureaus to get squarely back of this plan," says Frank A. Gougler, the I. A. A. poultry and egg marketing director, who has been pushing this work.

"During the past month a number of meetings have been held at Flora, Ill., of representatives from the counties of Clay, Effingham, Marion, Wayne and Edwards for the forming of a temporary organization. The officers elected to head this new undertaking for the first year are as follows:

President—C. R. Richison, Clone, Wayne county.
Vice President—H. O. Henry, Beecher City, Effingham county.
Secretary-Treasurer—Orville Bryant, Xenia, Clay county.

TIME TO START LAYING

—Chicago Tribune

Directors in addition to the officers are: Louis Jack, Albion, Ill., Edwards county. Sam Reckman, Xenia, Clay county. Roy Cunningham, Rinard, Wayne county. Will Fry, Louisville, Clay county.

"The district center will be located at Flora, and the membership will be secured in most of Clay and Wayne counties and parts of Edwards, Effingham and Marion. In the territory covered from 20 to 30 towns will serve as receiving points to which the members will take their produce. From these points the produce will be assembled at Flora by trucks over the splendid system of hard roads leading into that city from four different directions. Here the eggs will be graded and packed for shipment and as rapidly as car loads are assembled they will be shipped to terminal markets. Eggs are pooled by two-week periods according to grade and as returns are received by the association, members will receive pay for their eggs by check according to grade and quality.

"By the time this announcement appears in THE RECORD, active membership acquisition into this new enterprise should be under way. The goal set by the association is 250,000 hens. This will probably mean a membership of 1,200 to 1,500 members and in this heavy producing area such a membership should furnish the association from 100 to 125 car loads of eggs and about 40 cars of poultry per year."

Revenue Amendment Supported by G. O. P., Democrat Pledges

Amendment to Constitution up to Voters in November; I. A. A. Supports it and Urges Farmers to Vote for it.

The platforms adopted by the state conventions of Democrats and Republicans support the amendment to the revenue section of the Illinois constitution which is to be voted on by the people in November, 1926. The Illinois Agricultural Association earnestly and vigorously supports the amendment and urges every farmer to vote for it at the polls.

The Democratic platform said on this subject: "We favor the adoption of the amendment to the Revenue Clause of the Constitution to be submitted to the voters at the next general election, thereby enabling the General Assembly to enact an equitable system of taxation throughout the State."

The Republicans said:

"Economy in the use of the people's money and the lowest tax-rate compatible with good service are fundamental doctrines of our party. While we realize that adjustments in the way of the men and women in the public service to meet increases in the cost of living were only fair and essential, and that to meet these adjustments and the increased cost of all supplies and materials purchased for public use have required higher appropriations by state, county and municipal authorities, we believe present conditions demand every possible retrenchment by all governing bodies which have authority to levy taxes. We believe there should be concerted and cooperative efforts among state, county and municipal bodies to lighten the burden of taxation, and pledge Republican officials to this course. Also, to permit the equal distribution of our tax burden, we recommend the proposed amendment to our State Constitution which will be submitted to the voters in November."

HELP SECURE HIGHER PRICES—DO YOUR BIT BY WRITING!

BOTH ILLINOIS PARTY CONVENTIONS URGE FARM RELIEF

Democrats

"POST war readjustments have inflicted tragic penalties upon the farmers of Illinois.

"Thousands of farm families have been forced through bankruptcy. They have lost their homes, their land and their hopes for their future.

"Other thousands are confronted by the terrors of insolvency and are depeadent upon the generosity of those who hold their mortgages and notes to permit them to enjoy the shelter of the only home they know.

"Illinois' one great and rich basic industry, which made her famous throughout the world as the biggest producer of farm products, is in desperate straits.

"The farmers carried their case to President Coolidge and he came to Chicago a few months ago and offered the farmers no relief of any kind, but told them to get together and cooperate and do the best they could for themselves. He offered them nothing. He gave them a stone. The Republicans in Congress, under orders from the White House, are getting ready to adjourn without giving the farmers any adequate or beneficial relief.

"We believe that if the Government, by tariff, puts up the price for the eastern manufacturer and for the labor he employs; if the Government by law puts up railroad rates, so that the railroads shall not lose money, then we contend that the Government shall enact appropriate legislation so that the farmers, who are the bone and sinew of the nation, shall not be sacrificed."

Illinois Republicans Snub Administration's Fake Farm Relief Plan

DURING the month the state conventions of both the Democratic and Republican parties drafted their platforms. Their promises to agriculture are printed herewith.

It is noteworthy that the Illinois Republicans, in contrast to the expressed policy of the Republican administration, vigorously endorsed the "equalization fee" principle which places the loss—if any—of the control of the surplus distribution on the producer, a principle which has been vigorously advanced by the united farm organizations, including the Illinois Agricultural Association. The "equalization fee" principle is embodied in the Federal Farm Board measure, now pending in both branches of Congress and is supported by the Farm Bureaus and I. A. A. Note also that the Illinois Republicans did not so much as mention the Tincher bill, the administration's "give-them-a-board" measure which the I. A. A. opposes.

Republicans

"WE recognize that because of the wide expanse of our country, the industrial needs of one section may be different from those of another section, therefore, we regard it to be the special duty of Illinoisans in the national service to be alert to protect the particular interests of this state and of the Middle West, of which Illinois is the heart. We believe the following insistant needs of the Middle West should command the immediate and careful consideration of all representatives of the Republican party who are charged with the enactment and administration of national laws:

"(a) The earliest possible relief of the great industry of agriculture and the continuing protection of that industry equal to the protection given other industries by our tariff system. This should include emergency legislation for the establishment of federal agencies effectively to control the distribution of our exportable surplus of farm products in such manner as will restore the industry to a profitable basis and give to the producer an American price for his products, the loss—if any—of such control of surplus distribution to be borne by the producer. This we deem to be imperative for the preservation of the greatest industry of our State, and to be essential to the welfare of the Middle West, of the nation and of our party."

Producers to Pool Lambs on National Basis This Season

Corn Belt Feeders Were Saved $1 to $2 on Feeder Lambs Last Year by Pooling Operations of Co-op.

A saving of $1 to $2 a hundredweight is promised to farmers who [illegible] Producers' lamb pool this year, according to the National Livestock Producers Association, which is arranging for a larger pool this year.

Last year 68,000 feeder lambs were purchased direct from the range through the National Producers, with the branch agencies at Chicago, St. Louis and Kansas City handling the animals.

The lamb pool proved so satisfactory to the livestock producers that a feeder lamb pool on a national basis has been organized by the branch agencies for this year.

To Average 55 to 65 Pounds.

The National Producers will have general supervision of the pool, although orders will be received by the terminal agencies which will forward them to national headquarters. The lambs will be mostly from the Montana and Wyoming ranges, averaging between 55 and 65 pounds. They will be only from inspected flocks and all unmerchantable lambs will be rejected before loading on cars in the West.

Approximate prices will be quoted Corn Belt purchasers in advance. The price will be determined by pooling the costs at intervals, contingent with volume received and changes in price conditions. The lambs will be billed at cost, f. o. b. cars at loading point, plus $15 commission per car and 5 cents per head for insurance, which will cover all losses from deads, cripples and shortage in transit.

How to Order.

An order must be for at least one double-deck car, approximately 275 head, and an advance payment of $1 per hundredweight is required, which is credited to the purchase price. Any farmer who wants to feed sheep this fall and winter can place an order with any one of the 14 Producer agencies. Growers are advised by the National Producers that the earlier the order is placed, the less the price will be. It is expected that shipments will begin about Sept. 1.

WGN Abruptly Stops I. A. A. Farm Period, Refusing Reason Why

Many members who listened in on the I. A. A. farm program from WGN, the Chicago Tribune station, during the one week which it was on the air, must have wondered why the association was not on WGN's program after Monday, April 26. The reason is partially explained in the following statement which was issued Tuesday, April 27, to the press because wide publicity was given in the newspapers of the Middle West to the association's farm radio program from WGN:

"An arrangement was recently announced whereby the Illinois Agricultural Association would broadcast a daily noon farm program from its offices over WGN, the Chicago Tribune station.

"The announcement gave the names of speakers for two weeks in advance, beginning with April 19 when the program was started, and the Illinois Agricultural Association had scheduled speakers for a complete program as far in advance as May 15, which was in line with a written memorandum between WGN and the association calling for one year's participation with a 30-day termination clause.

"After one week, WGN officials abruptly terminated the arrangement on three hours' written notice, and refused to give a reason. During the week the following speakers and organizations were on the program:

Sam H. Thompson, president, American Farm Bureau Federation. (Personal message read which was sent from Washington, D. C.)

C. B. Denman, president, National Livestock Producers Association, and J. D. Harper, editor of the National Livestock Producer, who gave daily livestock market analyses based on reports from Producer agencies on 13 markets.

Arthur C. Page, editor, Orange Judd Illinois Farmer.

Miss Edna Walls, specialist in Child Care and Training, University of Illinois.

C. V. Gregory, editor, Prairie Farmer.

Earl C. Smith, president, Illinois Agricultural Association.

C. E. Durst, editor, American Fruit Grower.

A. C. Hughes, editor, Barrel and Box.

A. Sykes, president, Chicago Producers Commission Association.

A. D. Lynch, director of dairy marketing, Illinois Agricultural Association.

Uncle Bert, the Garden Expert, United States Department of Agriculture.

"Reports direct from the country concerning the I. A. A. Farm program over WGN were favorable, several characterizing it as 'a real farm program expressing honest-to-goodness farmer thought.'

"No criticism was given either by WGN or the federal supervision of radio. The termination became effective following the program given Saturday, April 24, without WGN stating the cause."

Sam Thompson Calls Administration Bill "An Empty Proposal"

President of A. F. B. F. Says Tincher Bill Devoid of Any Real Promise to Agriculture —a Half Measure.

THE admistration's farm relief plan is an empty proposal devoid of any real promise to agriculture," declares Sam H. Thompson, president of the American Farm Bureau Federation.

The American Farm Bureau "is not seeking palliatives and half measures" declared President Thompson in issuing the statement which analyzes the position of the Farm Bureau in regard to the Administration Bill introduced by Congressman Tincher of Kansas, in the House during the month. The statement also heavily scores the "give-them-a-Federal Board" attitude adopted by Senators and Congressmen seeking to defeat farm relief measures.

Reviews History of Situation

The full statement as issued by President Thompson, of the Farm Bureau, setting forth the attitude of the organization upon the important agricultural relief measures now before Congress, is as follows:

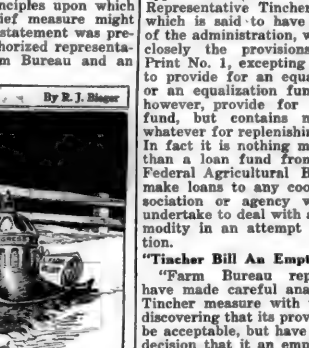
"When the representatives of the Farm Bureau, together with spokesmen for other farm groups, appeared before the House Agricultural Committee on March 5, 1926, they were requested by the Committee to file a written statement of the principles upon which an adequate relief measure might be based. This statement was prepared by an authorized representative of the Farm Bureau and an authorized representative of other farm groups, and after being submitted to and approved by a meeting of the leaders of all these farm organizations it was filed with the Agricultural Committee of the House. This statement was published in full and sent to all State Farm Bureaus, and it brought forth many expressions of approval and no statements of disapproval.

Farm Organizations Told to Draw Up Bill

"After consideration had been given to these proposals by the Committee, the farm representatives were requested to prepare a bill for the use of the Committee, according to the principles set forth in this proposal. For 10 days the persons who prepared the proposals, with the assistance of the House Drafting Committee, applied themselves to the task of preparing the bill requested by the House Committee. On Tuesday, March 16, this bill, designated as House Print No. 1, together with a graphic analysis of the bill, was tendered to the Committee. This bill followed closely the lines of the Dickinson bill with some important changes.

Bill Followed A. F. B. F. Resolution

"Special care was taken to formulate this bill in accordance with the resolutions adopted at our Annual Meeting and by our Board of Directors, and an effort was made to conform to the declared policies of the administration. Extended hearings were conducted and one by one all objections to the measures were swept away, excepting for one feature—namely, the equalization fee. There recently appeared a measure sponsored by Representative Tincher of Kansas, which is said to have the support of the administration, which follows closely the provisions of House Print No. 1, excepting that it fails to provide for an equalization fee or an equalization fund. It does, however, provide for a revolving fund, but contains no provision whatever for replenishing this fund. In fact it is nothing more nor less than a loan fund from which the Federal Agricultural Board would make loans to any cooperative association or agency which would undertake to deal with a given commodity in an attempt at stabilization.



"Tincher Bill An Empty Proposal"

"Farm Bureau representatives have made careful analysis of the Tincher measure with the hope of discovering that its provisions might be acceptable, but have reached the decision that it an empty proposal. Although the Tincher Bill recognizes the surplus problem, yet there is, in our opinion, only one conceivable way in which any one of the great "surplus" commodities, such as wheat or cotton, could be stabilized through this machinery, namely: by securing co-operative action on the part of substantially all the producers of the commodity. A wheat association composed of *all* the wheat growers or an association made up of *all* the producers of swine, dairy products, cotton or potatoes, if adequately financed and properly conducted would, we believe, be capable of stabilizing the product. A 100 per cent sign-up is a worthy ideal. It is the millennium in co-operative marketing. Notwithstanding the remarkable progress made in the organization of co-operative associations in recent years, the percentage of cotton, wheat, hogs, potatoes, dairy and other products which are handled co-operatively is comparatively small. It is obviously hopeless to expect relief from a plan that would impose the burden of stabilization upon the comparatively few who compose these respective co-operating groups.

Tincher Bill "Gives-them-a-Board"

"During the course of the hearings on House Print No. 1, opponents of agricultural relief legislation were continually seeking a place for compromise, and the phrase "Give them a federal board," became a commonplace. The Tincher bill does just that. The American Farm Bureau Federation has no disposition to enter into any such compromise. This organization is not seeking palliatives and half measures. It demands a wholesome straight-forward provision which will enable agricultural producers to stabilize their industry so that they will receive the benefit of the American protective system. We do not begrudge the stability and the independence of American labor and American industry. We demand the same stability and independence for American Agriculture."

Ho, Hum! By R. J. Bleger

Volume 4 | Issued Every Month for 63,000 *thinking* Farmers—June 1, 1926 | No. 6

COWLES REPORTS TO MEMBERS ON STATUS OF FARM RELIEF

"Haugen Bill Would Bring Nation a New Prosperity,"—Fox

Says Effective Action by Congress Would Change Pessimism Into Optimism, Besides Helping Prices.

A permanence of prosperity never before seen in this country would be a logical result of enactment of the Haugen federal farm board measure by Congress, according to George A. Fox, executive secretary of the Illinois Agricultural Association.

"The enactment of a genuine farm relief bill, making possible equality for agriculture and effectively coping with the uncontrollable surplus, would have a two-fold beneficial effect upon the farmers themselves, and the rest of the nation," declares Secretary Fox.

"The first is psychological. Farmers have been more or less pessimistic for five or six years. Pessimism is a brake on any industry, and if effective legislation is passed, optimism will chase away pessimism, which will be of considerable value in helping agriculture get back on its feet—an event which would reflect benefits into every allied industry and business.

Would Increase Prices

"The second is material. Low prices have caused pessimism. Legislation along the lines of the Haugen bill, if properly administered, would materially enhance prices to the farmers. All who trade with farmers would benefit therefrom, as would the farmers themselves.

"What about the consumer? His benefits from a rehabilitated and rejuvenated agriculture would greatly offset the small increase in the cost of living, if there is any. An increase of 25 cents a bushel on wheat adds only three tenths of one per cent to a one-pound loaf of bread, the government has found.

"Wheat is a fair example of all foodstuffs; consequently it follows that there would be a very small increase in the cost of living to consumers, and if there should be much, the merchandising mechanism of the country would be profiteering, and not the farmers.

'Some interests profess to believe that if any effective bill is enacted which would raise farm prices for farmers, the other two-thirds of the population—the major portion of the consuming public—would immediately react unfavorably and wipe out all the farmer had gained, and even set him back a notch.

"What happens under present conditions when the farmers are prosperous? All the country is prosperous, and the press is full of prosperity talk, 90 per cent of which is based on the farmers' higher prices.

Cites Aluminum Interests

"What about other similar cases? Take, as an example, the Mellon aluminum interest which is virtually a monopoly of products used extensively in practically every American household. The consumers of aluminum are a much greater majority over the aluminum interests than the food consumers are over the farmers. But, were tyrannical laws made or regulations promulgated against the aluminum interests as a result of the recent Congressional inquiry? No.

"The same is true of manufacturers who enjoy the benefits of our protective tariff which increases costs of practically all our products to the consumers yet the manufacturers are an insignificant minority, numerically. The tariff is known to benefit many consumers more than it increases their cost of living, therefore there is no general attack against it.

"Making the tariff effective on agricultural products, as is done by the Haugen federal farm board measure, also benefits most of the consumers by rehabilitating the finances of the largest single consuming class in the country—the farmers."

FROM 1922 TO 1926 BOVINE TUBERCULOSIS was reduced from 4 to 2.8 per cent in the United States by the cooperative federal, state and county testing program, says the U. S. D. A.

The Fight In the House

I. A. A. APPRECIATES BANKERS HELP ON BILL

Appreciation for the indorsement by the Illinois Bankers Association of the Haugen Federal Farm Board measure was expressed in a resolution passed by the I. A. A. executive committee at monthly meeting May 7, as follows:

Whereas, the administrative committee and the committee on agricultural relations of the Illinois Bankers Association, in joint meeting assembled at Chicago on April 21, 1926, have by suitable action endorsed the activities of the Illinois Agricultural Association in its effort to secure the enactment into law of the farm organizations' Federal Farm Board bill; and have given assurance of the cooperation of the Illinois Bankers Association.

Therefore, be it resolved, by the executive committee of the Illinois Agricultural Association:

That we express, on behalf of both the Illinois Agricultural Association and this committee, and of the members of our association, genuine appreciation of the action taken and expression made and conveyed to this Association; and

Be it further resolved, that a copy of this resolution be transmitted by our secretary to the secretary of the Illinois Bankers Association; and that this resolution be incorporated in the minutes of this meeting of the executive committee.

Important Ruling of Commerce Commission Affects Many Farmers

Farmers who have or want electrical conveniences on their farms gained a large measure of protection from possible exorbitant rates as a result of the recent order issued by the Illinois Commerce Commission which requires that all public utilities about to render rural electric service in the state shall file with the commission a detailed statement of the cost per mile of constructing rural lines.

This ruling is of considerable importance and means much to the advancement of electrification of the farms of Illinois, according to L. J. Quasey, director of the department of transportation of the Illinois Agricultural Association. Heretofore, states the commission, estimates of costs of building rural electric lines have varied from $600 to $1,600 a mile for the same quality of lines.

INDIANA WHEAT POOL SELECTS A NEW NAME

"Central States Soft Wheat Growers Association" is the name selected by the board of directors of the Indiana Wheat Growers Association to replace their present one because of expansion of the organization beyond Indiana. This will be submitted to a vote of the members by mail according to Vernon Vaniman, who is handling grain marketing work for the I. A. A., and, in all probability it will carry.

Illinois membership in the pool is gradually increasing, Vaniman finds. Clark and Effingham counties are now giving the wheat growers in certain communities the opportunity of securing the advantages of marketing their wheat through their own agency.

I. A. A. Treasurer Analyzes Situation of McNary Bill in Congress; Adverse Vote in House Does Not Mean Defeat

Industrial East Voted Solidly Against Farm Relief; Illinois Delegation in House, Excepting All But One of Congressmen from Chicago, Voted Solid for Farmers' Bill.

(Note: R. A. Cowles, treasurer of the Illinois Agricultural Association was in Washington the week of May 17 to 22 in behalf of the association's interest in the Haugen bill (McNary bill in Senate) and has written this report so each member can know what has been happening, and something of what may be expected to happen in the near future.—Editor.)

By R. A. COWLES

THIS report is offered in an attempt to acquaint the members of the Illinois Agricultural Association and their friends with the events that have transpired in Washington during the past week, with respect to the action in the House on farm legislation, the status of legislation now pending in the Senate dealing with disposal of surplus, and to forecast within the limitations of the writer and others, opportunity to secure the enactment of the farm organizations' Federal Farm Board Bill in this session of Congress.

R. A. Cowles.

The "Haugen Bill" was voted down in the House of Representatives by a vote of 212 to 167, with 51 Congressmen reported as not voting. Let the reader bear in mind, however, that the bill voted down was a bill that was prepared by the Chairman of the Committee on Agriculture of the House, at the direction of his Committee, and that this bill embodied in it, provisions and certain references to the tariff that were omitted from the bill earlier prepared by the representatives of the united farm organizations and supported by the Executive Committee of 22 of the Central West Agricultural Conference, as presented to the House Committee on Agriculture by those representatives, and embodying the provisions that they thought should be and might properly be incorporated in a bill. The subject of tariff, for instance, was very studiously avoided in the bill prepared and drafted by the farm organizations representatives aforementioned. And the unfavorable vote recorded in the House, in the judgment of those who have been closely associated with the legislative program in Washington, is attributable in part at least to the reference to the tariff and certain declarations relating thereto, as appearing in the bill voted down. The events that led up to the unfavorable vote on the bill will be recounted later in this report.

Rules Committee Unfriendly

While the Haugen bill has been voted down in the House, and it would be impossible at this time for the friends of the farm organizations' Federal Farm Board Bill in the House, to obtain from the Rules Committee a place on the House calendar for the consideration of their bill, substantially in the form as originally presented to the committee, fortunately, there is now pending in the Senate the farm organizations' Federal Farm Board Bill, as an amendment, appended to the administration's Co-operative Marketing bill. This result came about in this manner: The house early in the session passed the Administration's Co-operative Marketing Bill, which then went to the Senate; and was by the Senate referred to its Committee on Agriculture and Forestry. Senator Norris' committee deferred action on that bill until after the representa-

(Continued on page 4, col. 4.)

Drive Started to Get Members for Poultry and Egg Association

Flora Poultry Producers Association Members Soliciting Neighbors to Get Product of 250,000 Hens in Marketing Organizations.

Owners of 3,450 hens signed the first membership agreements in the Flora Poultry Producers Association at an organization meeting at Flora, Clay County, recently. These men were: C. R. Richison, Clane, president; C. D. McCommons, Flora; C. T. Hufford, Fairfield; Roy D. Cunningham, Rinard; J. T. McAllister, Xenia; W. R. Fry, Louisville; Orville Bryant, Xenia; J. M. Schwantz, Clay City; F. W. Logan, Louisville; John W. Wilkins, and Charles E. Dodd, Clane.

"This represents approximately one seventieth of the goal of 250,000 hens that must be signed up to make this marketing association a realty," says Frank A. Gougler, director of poultry and egg marketing of the I. A. A.

Only a few farmers have had time to solicit their neighbors to join, but those who have been active have been successful in getting members. There is no charge to a Farm Bureau member to join, but non-members are required to pay $5 for a share of common stock and two per cent is deducted from non-members' gross sales for overhead expense, and for service rendered by the Farm Bureau. This arrangement is bringing more farmers into the Farm Bureau, Director Gougler finds.

The Peoria County Farm Bureau and the Peoria Association of Commerce extended an invitation to the Illinois Agricultural Association to hold its next annual meeting in Peoria at the last executive committee meeting.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purposes for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, social and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Published once a month at 404 North Wesley Ave., Mount Morris, Illinois, by the Illinois Agricultural Association. Edited by Department of Information, Harry C. Butcher, Director, 608 South Dearborn Street, Chicago, Illinois. Entered as second-class matter October 20, 1926 at the post office at Mount Morris, Illinois, under the Act of March 3, 1879. Acceptance for mailing at special rate of postage provided for in Section 412, Act of February 28, 1925, authorized October 27, 1926. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record. Postmaster: In returning an uncalled for or missent copy, please indicate key number on address as is required by law.

Double Taxation of Mortgaged Real Estate

WHY RELIEF IS IMPOSSIBEE UNDER THE PRESENT CONSTITUTION.

By JOHN C. WATSON

Director, Department of Taxation and Statistics. Illinois Agricultural Association

UNDER the Illinois taxing system it is well known that the owner of mortgaged real estate is compelled to pay taxes on the entire property. He cannot deduct the amount of the mortgage from the value of the whole property and thus reduce his taxes to his equity or the interest which he has in the property.

J. C. Watson.

In contrast with its treatment of tangible property, the revenue system of Illinois carefully relieves intangibles of double taxation. Owners of money, notes, mortgages, trust deeds, stocks, bonds, or other evidence of indebtedness, are expressly given the right to deduct bona fide debts from the valuations of such property. Owners of real estate are denied the right to deduct debts from the valuations of their real estate. The present constitution of the State makes relief impossible. Until the constitution is amended in such a way as to make a fair taxing system possible, owners of mortgaged real estate, whether farm lands, town and city lots, or corporate property, including the railroads, must continue to pay taxes not only on the equity, but upon the entire property. In addition, whether the mortgages pay any tax or not, mortgagors must pay a somewhat higher rate of interest on the mortgages, because they are taxable.

Various remedies, either to prevent double taxation of real estate or to relieve tax payers from its worst effects, have been proposed.

It has been proposed that mortgages be exempted from taxation, as is now done in some states. Without constitutional amendment, mortgages cannot be exempted in Illinois. The pending amendment would permit exemption. But exemption is not the proper remedy, because an equitable distribution of the burden of taxation is impossible under a system of exemptions. The proper remedy is the taxation of intangibles in such a way that the tax cannot successfully be shifted. The only kind of a tax which cannot easily be shifted by some people and usually cannot be shifted at all is the tax on net income. Why this is true will be shown in a later article.

It has been proposed that disclosure of the ownership of intangibles be forced by making it impossible by legal action to collect any debt unless the document evidencing the debt bears the assessor's stamp or has other evidence that it has paid a tax. Such a law would force the disclosure of the ownership of intangibles, but it would not keep them on the assessment books. Under such a law intangibles would rapidly be converted into tax exempt securities, or would be invested in other states or even in other countries. The supply of credit would be drained away, resulting in foreclosure of mortgages, reduction of property values, and stagnation, both in production and in commerce. It would reduce taxes on real estate by making it impossible for real estate to carry the present burden.

It has been proposed that owners of mortgaged property be taxed only on their equities. Under this remedy it is held that the remainder of the tax would be paid by the holder of the mortgage either through taxation of the mortgage or through taxation of his interest in the property. Under the first method as shown above, either the tax would be shifted or the supply of credit would be drained away either into other states or countries or into tax free securities. In the same way, if the mortgagee were taxed on his interest in mortgaged property, he would force the mortgagor to pay the tax either directly or through a higher interest rate. Otherwise he would refuse to make the loan.

Taxing owners of mortgaged property only on their equities would result in a heavy reduction in valuations of property actually paying taxes. This would be true even if the remedy would not cause wholesale foreclosures, loss of property, and reduction of property values. It is a well known fact that loans on farm lands usually do not exceed one-half of the current value of the land, though recently, due to the refunding of floating indebtedness, loans on lands often exceed one-half of their present value. It is also well known that loans on city and village property often exceed fifty per cent of current values. This is especially true of mortgages given to building and loan associations. It is also true of such large city properties as business houses, hotels, and apartment buildings. It is also well known that corporations and large business enterprises, including the railroads, are usually operated largely on borrowed money. In many cases the bonded or mortgage indebtedness is much larger than the capital stock or equity in the property. Owners of farm lands would probably gain less from taxation only of the equity than owners of other real estate.

It is now generally believed that farm mortgages in Illinois have a total face value of about 35 or 40 per cent of the value of all farm lands. The proportion of mortgage or bonded indebtedness is probably even larger in the cities and in corporation property. If taxation of equities only is established for any of these properties, it must be established for all of them. The reduction in taxable valuations could not be made up from the mortgages, bonded indebtedness, or from any other property. The result would be a heavy increase in tax rates. If the reduction in valuations amounted to 40 per cent, it would require an increase of 66-2/3 per cent in tax rates to produce the same amount of taxes. If the reduction in valuations were 50 per cent, it would require an increase of 100 per cent in tax rates.

Even if taxation of equities only would not result in wholesale destruction of property values, it would force such an increase of tax rates as largely or wholly to offset the reduction in valuations. Owners of small equities in property would gain some advantage. Owners of large equities in property would be worse off than they are now. Owners of unencumbered property would be crushed by the burden of taxes. They could escape only by mortgaging their property, and the degree in which they would escape would be measured by the size of the mortgages.

Until the present constitution is amended so as to permit fair and effective taxation of money and credits, without shifting of taxes, owners of mortgaged real estate must continue to pay double and multiple taxes. The pending amendment if approved by the people of the state will permit a fair taxing system and gradual relief from the unfair burden of taxes real estate is now carrying. No change in the taxing system can be made which would give immediate relief.

Why Farmers Should *Support* the Tax Amendment to Illinois Constitution

(To be voted on in November, 1928)

1. Real estate, although less than one-half—many say less than 40 per cent—of the property in the state, is now paying about 80 per cent of all of the taxes for most purposes.

2. Tangible property, although probably not more than one-half of the property in the state, is now paying more than 92 per cent of all the taxes for most purposes.

3. A minority of the people of the state are now paying all of the taxes for most purposes.

4. Owners of some kinds of property easily can and do add their taxes to the prices of their services or products. Owners of other kinds of property, notably land, cannot shift their taxes to others to pay.

5. Owners of mortgaged property are now paying double or multiple taxes. They pay taxes not only on their equities, but also on the value of the mortgages, and pay a higher rate of interest on taxable mortgages whether the mortgages pay taxes or not.

6. Lack of personal interest on the part of most people in the economical and efficient use of tax moneys, and their belief that they are paying no taxes of any kind, promote extravagance and a rapid increase of deferred taxes in the form of bonded indebtedness.

7. Taxes are rapidly increasing in Illinois partly because the population is increasing, but chiefly because of the demand for new forms of service.

8. Under the present constitutional limitations none of the inequalities of the present taxing system described above can be fairly or properly corrected. The proposed amendment is a grant of power to the General Assembly, enabling it from time to time to correct inequalities in taxation and to establish a modern and equitable system of taxation.

Earl C. Smith

President, Illinois Agricultural Association.

[Brief articles in support of the points stated above will be printed in later issues of THE RECORD. Questions relative to the proposed tax amendment are invited and will be answered through THE RECORD.]

Farm Bureau Baseball Underway; At Least 14 Counties After Trophy

Peoria and Marshall-Putnam Play First Game of Season May 29; Some Schedules Still in the Making.

Organized baseball will be played by the Farm Bureaus in at least 14 Illinois counties this year, all of which aspire to the state championship which is held by the Tazewell County Farm Bureau team, according to George R. Cline of Virginia, Cass county, president of the Illinois Farm Bureau Baseball league.

As many as five or six other Farm Bureaus may join the league in time for play this season, but 14 have sent in their dues to the treasurer. These 14 are: Marshall-Putnam, Peoria, Woodford, Tazewell, Livingston, McLean, Mason, Cass, Morgan, Schuyler, Adams, Henderson and Warren. Mercer county is expected to play this year, as is Brown. No action has been taken yet in McDonough, Menard or Logan. Jefferson county, in southern Illinois, wants to play, but apparently has no competitors in that section of the state. All the other counties are in west central Illinois.

Divided into Five Districts

The counties already in the league are divided into districts as follows: 1, Henderson and Warren (and Mercer if it comes in); 2, Marshall-Putnam, Peoria, Woodford and Tazewell; 3, Livingston and McLean; 4, Adams and Schuyler (and Brown if it comes in); 5, Mason, Cass and Morgan (and Logan and Menard if either or both come in).

In District 2, a schedule has been arranged as follows: May 29, Peoria at Marshall-Putnam and Woodford at Tazewell; June 5, Peoria at Woodford and Marshall-Putnam at Tazewell; June 12, Peoria at Tazewell, and Woodford at Marshall-Putnam; June 10, Tazewell at Woodford, and Marshall-Putnam at Peoria; June 26, Tazewell at Marshall-Putnam and Woodford at Peoria; July 3, Marshall-Putnam at Woodford and Tazewell at Peoria.

Schedules in other districts are being arranged by mutual agreement in each district.

Representatives of most of the Farm Bureaus in the league met at Peoria May 18 and made plans for the season and apportioned the districts.

Other States Becoming Interested

At the meeting it was decided to play the championship game at Mt. Vernon in connection with the I. A. A. annual picnic, providing funds are provided there for expenses, otherwise the game will be played at a point mutually agreeable to the two teams in the finals. In order to be eligible in the finals, each team must have eliminated at least one other team. Some counties will have more than one team for intercounty games. Livingston expects to have two teams and will pick its county team from players of both nines. Farm Bureau members or members of their families are eligible to play. Playing and practice are usually on Saturday afternoons. The late spring has interfered with baseball playing. The I. A. A. gives a cup each year to the championship team.

This is the only organized farm bureau baseball league existent, but other states are becoming interested, notably Ohio. Officials of the league look forward to the day when there will be interstate contests.

Promoters of Farm Bureau Baseball

Here are some of the "magnates" of Farm Bureau baseball. They met at Peoria recently and made arrangements of the affairs of the Illinois Farm Bureau Baseball league. Left to right (top row)—Harry C. Butcher, director of information of the I. A. A. and secretary of the league; LeRoy Pike, Browning, Schuyler county; J. E. Harris, assistant adviser, Tazewell county (becomes assistant adviser in Mercer county June 1 and represented that county also); Wilfred Shaw, Peoria county adviser; T. R. Isaacs, Mason county adviser; L. E. McKenzie, Schuyler county adviser; C. L. Bates, Browning, Schuyler county. (Bottom row)—E. S. Sharp, Eureka, Woodford county; L. R. Walk, Martin, Tazewell county; C. E. Hopkins, associate adviser, Livingston county; George R. Cline, Virginia, Cass county, president of the league; Theodore Stempert, Panola, Woodford county, vice-president; W. A. Stevenson, Biggsville, Henderson county and E. D. Walker, Henderson county adviser.

Producers, Only Four Years Old, Handle 127 Million $ Business '25

Livestock Marketing Mechanicism Set up by Farm Bureaus Grows; Having Some Effect in Stabilizing Markets.

In four years the farmers of the Middle West, working through the state Farm Bureaus and the American Farm Bureau Federation, have built up a cooperative marketing mechanism which did a business during 1925 of over $127,000,000.

It was in 1922 that the "Committee of 15," a group of leading Middle Western farmers and college specialists selected by the American Farm Bureau Federation to study livestock marketing conditions, made recommendations for establishing a cooperative marketing organization along national lines, to be owned and operated by the farmers themselves. This cooperative marketing program is being supported by the Farm Bureaus, and today there are agencies of the producers actively and successfully operating on 13 markets, with representation on 14, all under the banner of the National Livestock Producers Association.

Producers Lead on 8 Markets

On 8 of the 14 markets, these farmer organizations handled, during 1925, more cars of livestock than any other agency, and on several others ranked either second or third, although two or three which were started within the last year or two did not handle so much.

The cars handled, and the percentage of total receipts for each agency are as follows: Chicago, 17, 071 cars, or 6 per cent; Peoria, 2,695, or 28.73 per cent; National Stock Yards (East St. Louis), 12,-991 cars, or 14.68 per cent; Indianapolis, 10,464, or 25.72 per cent; Buffalo, 3,939 cars, or 20.84 per cent; Fort Worth, 3,555 cars, or 7.49 per cent; Kansas City, 3,660 cars, or 2 per cent; Cleveland, 4,227 decks, or 23.01 per cent; Sioux City, 3,517 cars or 5 per cent; Evansville, Ind., 1,474 cars, or 45.84 per cent; Pittsburgh, 2,738 decks, or 18.64 per cent; Cincinnati, (10 and one-half month), 2,377 decks, or 11.5 per cent and Oklahoma City, 238 cars for an intermittent period during 1925 under pressure of a boycott against the cooperative.

These Ranked First

The Producer terminal agencies which ranked first were: Chicago, Peoria, E. St. Louis, Indianapolis, Buffalo, Cleveland, Pittsburgh, and Cincinnati.

According to William E. Hedgcock, director of livestock marketing of the Illinois Agricultural Association, there have been marked gains toward the cooperative's goal of stabilization of prices and receipts on all markets where the Producer agencies have handled as much or more than 15 per cent of the total receipts, a fact which, he declares, means economy and savings to both producers and consumers of meat products by eliminating some undesirable fluctuations.

The total business done by all farmers' cooperative livestock agencies for 1925 is estimated by the National Livestock Producers Association as 148,344 carloads of which the Producer terminal agencies handled 71,144 carloads. Total value of all cooperatively handled stock is estimated at $269,820,000.

Illinois Cooperates Most

In an analysis of origination of shipments to Producer agencies covering 1925 business, made by the National Livestock Producers Association, it is revealed that Illinois farmers are using cooperative marketing to a greater extent than farmers in any other state, there having been 19,481 carloads from this state, with Indiana second, Iowa third, Ohio fourth and Missouri fifth.

Illinois farmers shipped 89 carloads to Producer agencies at Buffalo; 8,140 to Chicago; 66 to Cincinnati; 33 to Cleveland; 221 to Evansville; 2,810 to Indianapolis; 5,616 to E. St. Louis, and 2,502 to Peoria. A large percentage of the shipments originate from local shipping associations operated by farmers. There are 4,000 of these local associations in the United States, most of which are in the Middle West. Illinois has 527; Iowa about 700; Minnesota about 600; Indiana, 270, and Wisconsin, 240. In Illinois the shipping associations work closely with county Farm Bureaus.

One feature inaugurated by the National Livestock Producers association which effectively shortens the economic path from producer to consumer is a lamb pool which has been conducted for two years. Lambs are bought and assembled by the national organization in western states and delivered to corn belt farmers for fattening. So far this year, 25,000 lambs have been contracted by corn belt feeders for fall delivery, according to Charles A. Stewart, secretary of the national organization. Last year over 70,000 lambs were handled.

Why Not Think?

IT'S a little thing to do,
Just to think.
Anyone, no matter who,
Ought to think.
Take a little time each day
From the minutes thrown away;
Spare it from your work or play—
Stop and think!

You will find that men who fail
Do not think.
Men who find themselves in jail
Do not think.

Half the trouble that we see,
Trouble brewed for you and me,
Probably would never be
If we'd think.

Shall we, then, consider this?
Shall we think?
Shall we journey, hit or miss,
Or shall we think?
Let's not go along by guess,
But rather to ourselves confess
It would help us more or less
If we'd think!

Anon.

Dairymen of Chicago District Working to Form Pure Milk Body

"The dairymen in the Chicago dairy district are almost on the last lap in completing the membership work of the Pure Milk Association," declares A. D. Lynch, I. A. A., director of dairy marketing.

"The association will serve as a selling agency for the dairymen in the district. It is the first organization of its size to accept as members only those whose herds are free from bovine tuberculosis. The fact that the Chicago milk ordinance, which went into effect April 1, permits only tuberculin-tested milk to be sold in the city makes the Pure Milk Association the only logical organization for dairymen to join who intend to use this market.

"The directors have recently employed A. E. Richardson, formerly manager of the Ill.-Mo. Cooperative, E. St. Louis, as field service manager to assist in completing the membership work. He is cooperating with the county locals in their program to complete the organization work as rapidly as possible in order that the tuberculin-tested herd owners may finally have an organization to represent them.

"The Pure Milk Association stands for true cooperation. It believes that this cooperation should extend not only among its members but to the distributors and the consumers. The following clause at the beginning of the member's agreement shows what each member agrees to do:

"'The member expressly agrees to cooperate with the milk distributors and consumers of milk, through their health officers, by producing milk of the highest quality in accordance with ordinances, rules and regulations now in effect or to be enacted during the life of this agreement.'"

The officers and directors are as follows:

L. E. Johnson, Capron.....Boone
Herman Schwake, Arlington Heights..Cook
A. A. Sheller, Maple Park.....DeKalb
H. C. Vial, Downer's Grove.....DuPage
(Secretary)
W. C. McQueen, Elgin, R. 3.....Kane
(President)
J. Leo Mohrman, Waukegan.....Lake
(Treasurer)
Ole Stalheim, Harvard.....McHenry
(Vice-President)
John H. Cryder, Plainfield.....Will
D. N. Geyer, Harvard.....At large

Farmers' Tornado Fund Still Helping Sufferers 14 Months After Ordeal

Four Carloads of Soy Beans and Cow Peas Now Being Distributed Free to Southern Illinois Farmers.

Fourteen months after the worst tornado ever experienced in the United States, and particularly in Illinois and the Middle West, finds the Illinois Farm Relief Committees still on the job distributing necessities to farmers who were caught in the catastrophe.

A car load of cow peas and soy beans is being distributed in each of four counties—White, Franklin, Jackson and Hamilton. The Farm Bureaus in the first three counties named are making the distribution, while a committee consisting of Chas. N. Burnett and C. C. Wright, McLeansboro, is handling the carload for Hamilton county, where there is no Farm Bureau.

R. A. Cowles, treasurer of the I. A. A. and director of the Illinois Farm Relief Committee jointly with Curt Anderson of Xenia, Ill., announce that a final survey will be conducted soon after the soy beans and cow peas are distributed.

Every farmer who suffered from the tornado's ravages has been or is being notified that the peas and beans are available free—an offer that is possible only because of the generosity of farmers all over Illinois in subscribing liberally to the tornado relief fund, which amounted to approximately $180,000, nearly all of which has now been put to the good use for which it was intended. All leading farm interests in the state cooperated in raising the fund, including the farm press and all farm organizations.

American Institute of Co-ops Convenes at St. Paul in June

I. A. A. Director on Program as is C. C. Mast of Adams County; A Short Course on Co-op Marketing.

To clarify the future course of cooperative marketing, and to seek a definite set of principles for the entire movement, 500 national cooperators will meet at University Farm, St. Paul, between June 21 and July 17, to attend the second annual session of the American Institute of Cooperation.

The Institute was organized in January, 1925, by twenty national cooperative organizations as an educational institution for the purpose of collecting information about cooperative marketing, training leaders and workers, assisting educational institutions in improving their teaching courses, and as a means of focusing the cooperative movement toward community and national development. The Institute program this year is sponsored jointly by the University of Minnesota College of Agriculture and the Institute of Cooperation. George R. Wicker, director of cooperative accounting of the I. A. A., is also a speaker, and is a trustee of the Institute, representing the I. A. A.

The program for this year has been divided into four major units of one week each. Each week's program will deal with the cooperative marketing of a particular commodity. The association of cooperative principles to the marketing of a particular commodity will make the discussions concrete.

To Study Shipping Associations

Facts of interest to every member of a livestock shipping association will be disclosed during the first week, from June 21 to June 26. Livestock and wool will be the commodities emphasized during the initial week. Leaders of that field from all parts of the country will be present to guide the discussional groups. E. G. Nourse, of the Institute of Economics, Washington, D. C., and chairman of the Institute of Cooperation program committee, will open the program with an address on the history and structure of cooperative livestock shipping.

In addition to the regular topics on the livestock program, a four day short course will be offered for members of shipping associations on June 22, 23, 24 and 25. One of the highlights will be a grading demonstration under the direction of N. K. Carnes, Central Cooperative Commission Association, to be held at the South St. Paul terminal. J. S. Montgomery, manager of the same organization will also address the group. C. C. Mast, manager of the Adams County (Ill.) Shipping Association, will discuss county federations.

The second week, June 28 to July 3, will be devoted to dairy products marketing. At that time pertinent question of the dairy industry will be discussed by groups of creamery men, milk distributors, cheese makers and by-products manufacturers under the leadership of nationally known cooperators. Problems of price, distribution, sales promotion and increased consumption will be taken up by the various groups.

KEEP SMILING

There is something buoyant and cheery and breezy about any person who can live above his surroundings—that is, can find something to cheer in every state, and who prefers to ponder on the brightness of the sun rather than discover the spots in it.

If you would sing and whistle and laugh more, heartaches would be fewer. Laughter is a contagious thing. It calls forth a similar response. People feel the tingle of life, and experience its thrills as they laugh. And there is such a lot in life to smile over.

Prairie Farmer Man Becomes I. A. A. Head of Publicity June 15

Assistant Editor Thiem Takes Place of Harry Butcher, Who Becomes Editor of The Fertilizer Review, Washington, D. C.

E. G. (George) Thiem, for the past two years assistant editor of Prairie Farmer and for three years assistant farm adviser in Whiteside county, becomes director of information of the Illinois Agricultural Association June 15.

E. G. Thiem

Thiem is a product of the farm and has a sympathetic understanding of farm problems which is a necessary requirement in a position where one is relied upon to inform intelligently and effectively the membership and the public about the activities of a state-wide organization.

Thiem was employed by a committee consisting of C. E. Bamborough, Polo, Ogle county; R. F. Karr, Iroquois, Iroquois County, both of whom are executive committeemen of the I. A. A. and George A. Fox, executive secretary.

He takes the place of Harry C. Butcher, who has been director of publicity for the association for over two years and who resigned recently, affective July 1, to become editor of The Fertilizer Review, a new journal published by the National Fertilizer Association at Washington, D. C. Butcher will be associated with Charles J. Brand, formerly consulting specialist in marketing of the U. S. Department of Agriculture, and late Henry

Butcher came to the Illinois Agricultural association direct from Iowa State College, Ames, where he handled agricultural and sport publicity for the college in connection with undergraduate work.

I. A. C. A. INSTITUTES COLLECTION SERVICE

A new service has been instituted by the Illinois Agricultural Cooperatives Association to help member organizations collect past due accounts.

199

"A study of the financial condition of 65 farmers' elevator companies at the close of Feb. 28, 1926, of $462,905.30 and notes receivable of $96,263.51. The ratio of accounts receivable to net worth was 37.04 per cent, while reserve established to meet anticipated losses from uncollectable accounts was approximately one per cent of sales," stated George R. Wicker, general manager, in a report to the I. A. A. executive committee May 7.

"This condition is general and seriously affects the success of farmers' elevator companies. In view of this fact, it has been suggested that a collection service be established within the I. A. C. A. for the benefit of its members. The present practice of analyzing and classifying accounts receivable and recommendations for credit and collection policies will be supported by establishing an actual collection service. Such service is for member companies."

The membership of the I. A. C. A., which functions as the department of cooperative accounting of the I. A. A., is now 199.

INCREASED FARM PRODUCTION THIS YEAR "will undoubtedly end this favorable economic position," meaning the present "farm prosperity," states the U. S. Department of Agriculture. In other words, increased production in 1926 means still less income than 1925.

THE CALIFORNIA FARM BUREAU FEDERATION is successfully operating a 500-watt radio station.

MANY FARMERS AFTER CROP HAIL INSURANCE

The Farmers Mutual Reinsurance Company is now receiving hail applications. This will mean a saving of $6 to $8 per $1,000 of insurance for the farmers of Illinois to take out farm crop hail insurance on a mutual basis through the reinsurance company, according to Vernon Vaniman, field representative.

The insurance is written on an acre basis. Based on the crop being valued at the amount of insurance carried the insured will be reimbursed for the actual loss or damage done by hail. For example, if the crop is insured for $2,000 and there is a total loss the insured will receive $2,000. If a 50 per cent loss the insured will receive $1,000.

One of the largest mutual hail insurance companies in the world is following the practice of insuring on the acre basis. It has been in operation 32 years. Illinois farmers are fortunate in now being able to secure their hail insurance on a basis which has proved satisfactory to the farmers of other states.

The following counties have sent in application for hail insurance: Heiderson, Henry, Knox, Lee, Mercer, McDonough, Vermilion.

Henry and Knox Counties head the list in the amount of insurance sent in.

The Farmers Mutual Reinsurance Company is gradually extending its services so it can further supply the insurance needs of the farmers of Illinois on a mutual basis.

Level of Prices on Peoria Market Rises Due to Cooperative

Manager of Peoria Producers Finds Level of Livestock Prices at Peoria on Par With Chicago Now.

Cooperative marketing has raised the general average of prices on the Peoria market to a par with Chicago, whereas before a cooperative agency of farmers was organized at Peoria, the price level averaged about 25 cents a hundred lower than at Chicago, according to W. B. Hembrough, manager of the Peoria Producers Commission Association.

According to Manager Hembrough, the Peoria Producers will declare either a 25 or 30 per cent dividend to members at the close of this fiscal year May 31. For 1922, the first year, the dividend was 20 per cent; 1923 and 1924, 30 per cent. Practically the same amount of business was done this year as last, in spite of marked decreased receipts on the Peoria market—an amount of business which is interpreted as a continuance of the steady growth of cooperative marketing of livestock on this market.

There is also much less fluctuating on the Peoria market since the advent of the cooperative, Hembrough finds.

Illinois Man Made Director in Wheat Pool; More Members

Southern Illinois soft wheat producers who are pooling their wheat with the Indiana growers, were granted a voting director at the recent annual meeting of the Indiana Wheat Growers Association.

The director is C. L. Scott of Grayville, White county.

"Edwards and Wabash counties have completed their membership campaigns," states Vernon Vaniman, who is representing the I. A. A. in this work. "White county has not completed the campaign. Fifteen new members have been secured for the Farm Bureau as a result of the pool campaign in White county. Wayne, Saline, Gallatin and Clark counties are planning to give members in those counties an opportunity to market their wheat through the pool."

This year 163 new members have joined the pool in Illinois, making the total in this state 392.

Society Note: Madame Hen Creates 3-Strand Girdle for Ma Earth

Girdle is of One Year's Illinois Eggs Placed End to End; Enough Material Left for Pendant from Equator to North Pole and Back.

The results of the 1925 activities of Madame Hen, popular society matron of Illinois barnyards, in the creation and delivery of the well-known breakfast partner to ham, show that her efforts, excluding similar activities of her sisterhood in all other states excepting Illinois, would, if placed end to end, thrice girdle Mother Earth about the equator with enough eggs remaining to form a pendant to hook around the North Pole and suspend back to the equator.

Such is the importance of Madame Hen in Illinois, according to Frank A. Gougler, director of poultry and egg marketing of the Illinois Agricultural Association.

In fact, says Mr. Gougler, she is so important that farmers are spending considerable thought and effort in working out ways and means for marketing her contributions to the nation's wealth, so the farmer who owns her can get a maxium return and the consumer who buys her eggs can do so economically without paying tribute to some unnecessary middlemen.

Poultry Co-ops Successful in Other States

Minnesota and Ohio farmers, have been successful in applying cooperative marketing to poultry and eggs in important sections of these states, and conditions there are quite similar to those in Illinois. Many Ohio farmers have added an average of 2 cents a dozen to their returns through their organization, he says. Exceptionally successful farmer-organizations for marketing their own products are functioning in California, Washington and Oregon.

In Illinois, an educational campaign has been under way for a couple of years under the direction of the Illinois Agricultural Association. In the near future, Mr. Gougler declares, this campaign will be flowering into actual organizations.

The first is likely to be in "Little Egypt" in Clay, Marion and Wayne counties, with headquarters at Flora. Under the local leadership of the Farm Bureaus in those counties, membership contracts are now being signed and when the product of 250,000 hens are signed up, the organization will begin functioning. A manager will be employed and eggs will be gathered from members in the country, assembled and graded at Flora, and shipped in carloads to the big markets.

Central Illinois Interested

Knox, Warren and Henderson County Farm Bureaus are also interested, several meetings having been held to acquaint farmers with details and workings of joining together in their marketing. If an organization is formed in these counties, the headquarters will be at Galesburg. Ford County Farm Bureau is planning a one-county organization along similar lines, with headquarters at Gibson City.

The ten Illinois counties which produce the most poultry and eggs per 100 acres of improved land, and the value, are given as follows by the Illinois Agricultural Association: Edwards, $347; Clark, $270; Cumberland, $264; Wayne, $244; Clay, $242; Effingham, $234; Clinton, $223; Jasper, $223; Jefferson, $208 and Shelby, $202. Southern Illinois counties are heaviest poultry and poultry-product producers in the state.

THE U. S. DEPARTMENT OF COMMERCE reports that Illinois has 16 cities over 30,000, three of which border Chicago. All increased since 1922, while the farm population decreased considerably.

GOVERNMENT LIVESTOCK MARKET NEWS SERVICE is being extended by Congressional authority to markets at Pittsburgh, Buffalo, Cleveland, Cincinnati, St. Joseph and Indianapolis soon after July 1.

Cowles Reports on Status of Relief

(Continued from page 1, col. 5.)

tives of the united farm organizations, supported by the Executive Committee of 22, had appeared before that Committee and presented and offered its Federal Farm Board Bill. Subsequently, the Senate Committee reported to the Senate, through Senator McNary, the Co-operative Marketing measure with the farm organizations, Federal Farm Board Bill, appended thereto as an amendment. So that the Federal Farm Board bill, as a committee amendment to the Administration's Co-operative Marketing bill is pending now before Congress in the Senate, and is likely to be taken up for consideration as this report is written or at least within the next few days. I repeat that the Senate measure makes no reference to tariff and that it omits certain provisions that were objected to in the consideration and debate on the "Haugen bill" in the House. And without attempting to enter into a discussion of the matter, let it be recognized (as it has been all along by those associated together in their efforts to secure legislation dealing with the surplus problem), that the introduction of the subject of tariff either by reference or by declaration in any bill dealing with the problem of surpluses might be expected to prejudice certain support, particularly in the south, that was needed to secure the enactment of adequate legislation. Let it also be remembered that a group of Senators, representing the majority of the Senators, have recently agreed that the Congress shall not adjourn until farm legislation is enacted. The present situation is quite the opposite of the situation that existed in Washington when the old McNary-Haugen bill was defeated in the House, in the 68th Congress, two years ago. At that time the vote on the bill in the House came during the closing week of the session and Congress had agreed to an adjustment, with no opportunity to secure action by the Senate.

Substitutes Offered

Returning to the immediate events preceding the unfavorable vote on the Haugen bill in the House, late Thursday afternoon, the reading of the bill was concluded under "five minute rule," permitting members of the House to offer amendments to the bill or speak for or against the section of the bill previously read. During the reading of the bill certain constructive amendments had been made, as agreed to by the friends of the bill, and all objectionable amendments were defeated. The bill was before the House under a special rule, by the terms of which, either the Tincher or the Aswell bill were permitted to be offered as substitutes for the Haugen bill, or interchangeably. Therefore it was in order, at the conclusion of the reading of the Haugen bill on Friday evening, to offer either bill as substitute; and accordingly the Tincher Bill was offered, on motion, as a substitute for the Haugen bill, and then the Aswell bill was offered as a substitute to the Tincher bill, after which the House adjourned.

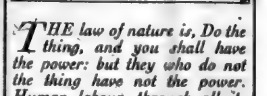
Administration Attempts "Painless Killing" But Fails

The House reconvened Friday morning and took up the Haugen Bill. Both the Tincher Bill and the Aswell Bill were at once withdrawn; and following this action by the preponents of these measures, Congressman Madden, from Chicago, Chairman of the Administration's Appropriation Committee, offered a motion to recommit the Haugen bill to the Committee on Agriculture. The effect of this motion, had it prevailed, and its evident purpose, was to have the bill "die in committee." This disposal of the measure would have effectively prevented a record vote on the Haugen Bill in the House. An aye and nay vote was taken on the motion to recommit, and the Chairman (Mapes of Michigan) announced, "the ayes seem to have it." A divison of the House was called for by rising vote, and the Chair announced again, "the ayes seem to have it." A vote by tellers was requested and the ayes were 182 and the nays were 200, and the motion to recommit was lost.

"The previous question" was moved, and the vote was on the Haugen bill. Those answering the roll call in the affirmative were 167, those in the negative, 212—51 not voting. And the clerk announced 3 additional pairs. So the bill was rejected.

Democrats Shy at Tariff Mention

The vote on the motion to recommit the bill, and the vote on the bill, revealed the following: first, that democrats from the south had voted with the friends of the bill in defeat of the motion to recommit, thereby forcing a record vote on the bill and disclosing its republican opposition. The failure of southern leaders and their following in the democratic party to support the bill on roll call, and to vote the bill down will be accounted for by them, no doubt, because of the fact that the bill, by its specific declaration, stated its purpose to be "to protect domestic markets against world prices and assure the maximum benefits of the tariff upon agricultural commodities," and because of other reference in the bill to the tariff.



Cotton Alliance Strong

However, through the active support and influence of the American Cotton Growers Exchange, and its affiliated state associations of cotton growers, the so-called "cotton states" contributed forty-three votes for the bill. Space does not permit recounting here the story of the working alliance formed with the Cotton Growers.

Without attempting to furnish a detailed vote on the bill in the House, our members no doubt will be interested in knowing something of the vote. The Illinois delegation in the House outside of certain Chicago Congressmen, and including the Congressmen at Large, voted solidly for the bill. Congressman Sabath of Chicago, from the 5th Congressional District, voted for the bill. The Indiana, Iowa and Nebraska delegations voted solidly for the bill. The Minnesota delegation, with the exception of the Congressman from Minneapolis, voted for the bill. The Missouri delegation, with the exception of the Congressman from Kansas City, and two Congressmen from St. Louis, and the Congressman from the 14th District, voted for the bill. The delegation from Wisconsin cast seven votes for the bill, two against the bill, and two Congressmen were recorded as not voting. Seven favorable votes were recorded from Pennsylvania, five from Ohio, three from Michigan. The vote in Ohio and Michigan was disappointing. Four favorable votes were recorded from Washington, and one vote against the bill. Two favorable votes were received from Oregon, and one vote against the bill. One favorable vote was recorded from California. Idaho, Nevada, Utah, Wyoming, South Dakota, North Dakota, Montana, Arizona, voted for the bill. The delegations in the House voting against the bill were: New Hampshire, Connecticut, Maine, Massachusetts, New Jersey, New York, Vermont, Virginia, West Virginia, Kentucky and Louisiana.

Still Hopeful in Senate

Friends of the bill in the Senate believe the bill has opportunity, and if passed then goes to Conference Committee, composed of members of both houses of Congress, with subsequent action by the House and Senate on the report of the Conference Committee. There is reason to believe that the House will adopt the Conference Committee report if the bill is reported substantially in its present form.

THE law of nature is, Do the thing, and you shall have the power: but they who do not the thing have not the power. Human labour, through all its forms, from the sharpening of a stake to the construction of a city or an epic, is one immense illustration of the perfect compensation of the universe. Everywhere and always this law is sublime.—Emerson.

"WE'VE JUST BEGUN TO FIGHT," REPLY CORN BELT TO SENATE DEFEAT

Over-Extension of Credit Makes Hard Sledding for Co-ops

Wicker Tells Elevator Managers to Decide on Fair Credit Policy, Then Stick to It for Success.

"Adopt a credit policy for the purpose of restricting credit within a reasonable margin of safety, then follow a systematic plan of collection to keep down accounts receivable to a minimum figure."

Geo. R. Wicker

This is the advice George R. Wicker, director of cooperative accounting for the I. A. A., handed out to 50 or more farmers' elevator managers at their short course at the University of Illinois on June 17.

"The interest on accounts receivable may amount to a considerable sum, and this money must be supplied either by investment or loans to accommodate the practice. A direct interest expense results in either case," he said. "The uncollectable account is generally the result of an overextension of credit, either as to time or amount or both. But direct losses of this kind are not so serious as the loss from having funds tied up in non-interest bearing accounts.

Should Safeguard Credit at Sale

"The time to safeguard credit accounts is at the time of sale. Have an understanding with the customer when payment will be made. Then follow up this understanding by pressing for collection at the time agreed upon.

"The credit policy should hinge upon two points: first, the amount of invested capital which may be safely tied up in accounts; second, the ability to pay and integrity of the buyer. Don't extend credit to men who have not established a reasonable basis for credit. Willingness to pay should also be considered. An account which must be collected with interest and costs usually results in dissatisfaction and financial loss."

Credit Losses Serious

Sixty-five Illinois elevators during 1925 had accounts receivable totalling $463,000. Thirty-eight of the companies had on their books $312,500 of which 48 per cent were from one to 90 days old. Sixteen per cent were from 90 to 180 days and 22.6 per cent were over one year old. Credit losses during the year were $66,331. Credit losses of the entire group were about one per cent of merchandise sales amounting to $1,806,000.

The 65 elevators were divided into three groups. Group 1 consisted of 18 companies including those which had an income of $2000 or over. Group 2, comprising 16 companies, included those which had an income under $2000. Group 3 included 31 companies whose operations resulted in a loss. The loss of the latter group exceeded the gains of Group 1 and 2 by $1,062.15.

This loss was brought about largely through credit losses.

Charge Interest on Old Accounts

By making accounts receivable subject to interest at 90 days or not later than six months, long-time credits might be partially avoided, suggested Wicker. The directors of the company ought to go over the credit accounts regularly and agree on a credit policy based on their knowledge of their business and the individual debtors.

"It is my personal experience in business that there is less dissatisfaction on the part of the customer if he understands that the company has a definite credit policy and that it will enforce collection when that policy is violated," said Wicker. "It has also been my experience in business that most people, when they have made a definite promise to pay, will hesitate to violate their own promise. Therefore, it is quite essential that a thorough understanding should be had at the time of sale."

Who'll Take the Last Trick?

Organization Got John Anderson $127.55 More Than He Could Singly

When John Anderson, of Utica, Lasalle county, had two steers killed on the railroad right-of-way, while driving a drove to the Utica stock yards, he applied to the railroad for damages of $187.55. The crossings were not protected against cattle, but the railroad refused to pay more than $60 for the loss.

Anderson appealed to Farm Adviser Walter McLaughlin who immediately referred the case to L. J. Quasey, director of transportation. Quasey secured a pencil sketch showing how the accident occurred and again presented the claim in person to the railroad for the full amount.

On June 18, the general claim agent of the railroad wrote: "We have now received additional reports and I hand you herewith draft and release in favor of Mr. Anderson in the sum of $187.55."

Since June 1 the transportation department of the Illinois Agricultural Association has collected 11 claims totalling $719.64 and has filed nine other claims. During the same time the transportation department's service to the Chicago Producers has resulted in the collection of 62 loss and damage claims amounting to $1123.63, and 14 overcharge claims totaling $81.26 or a grand total of $1204.89. Thirty-nine other loss and damage claims and 10 overcharge claims, not yet settled, have been filed since June 1.

State Picnic Aug. 12 Will Show Egypt at Her Best; Good Program

Sen. McKellar Of Tennessee Asked To Deliver Principal Address; Special Features For Women.

Southern Illinois hospitality, famed throughout the Middle West, will be at her best when thousands of cars packed with mother, dad, sons, daughters, and the kiddies plus the well known fried chicken and layer cake roll into Mt. Vernon in Jefferson county on the morning of August 12.

The I. A. A. picnic will be a great gala event for all "Little Egypt" and great plans for the entertainment of the state-wide picnickers are now in progress. This is the first year the state picnic has gone so far south, and the people from Jefferson and surrounding counties are hoping to outdo their neighbors from central and northern Illinois who have entertained heretofore.

An unusual number of visitors from central and northern Illinois are expected because of the splendid opportunity to see Southern Illinois' great harvest of golden peaches, said to be the heaviest crop in the history of the state.

The championship farm bureau baseball game, the horseshoe pitching contest, the chicken and hog calling contests, and other events will be the principal attraction for sport lovers. Mrs. Spencer Ewing, president of the Illinois Home Bureau Federation is helping to arrange an interesting program for the women. The speakers for the event have not been definitely chosen but Senator McKellar from Tennessee has accepted our invitation conditionally depending upon the health of a member of his family. The cotton folks of the south are urging him to come.

President Smith Reveals Inside Story of Broken Promises of Administration In Comment On Defeat of McNary Bill

Redoubling of Efforts to Secure Equality for Agriculture Will Be Outcome of Failure of Congress to Recognize Need; Early Conference of Corn Belt Leaders Planned in Chicago.

Note: Earl C. Smith, president of the Illinois Agricultural Association, was in Washington at frequent intervals in the interest of farm legislation. His story which follows describes simply yet forcefully his uncolored version of what took place in and about the White House and the congressional chambers.—Editor.

-By EARL C. SMITH

THE DEFEAT of the McNary Bill in the Senate 39-45 on Thursday, June 24, does not in any way justify its opponents in believing that they have put to sleep the principles upon which it was founded. On the contrary, it means that when the reasons prompting the opposition in their efforts are analyzed and the sources from which it emanated are fully understood, farmers and their friends will rise as a unit in repudiation of the now self-satisfied group who are responsible for its defeat. Let's review the fight and see what really happened.

Earl C. Smith

Farm leaders of the midwest and west, acting under instructions from their various constituents and backed by the Committee of 22 set up at the Des Moines Conference, assembled in Washington early in March. They asked Congress for legislation necessary to give agriculture equality with other industry. The need for such legislation had been recognized and promised in the platforms of both parties in 1924.

Immediately after their arrival in Washington, the farm representatives called upon the President and the Secretary of Agriculture and expressed their desire to cooperate with them in bringing forth such a program. Those vested with the duty and responsibility of keeping the pledges of 1924 had nothing definite to offer, but requested the farm representatives to get together and bring forth a specific measure that would cope with the situation. We were advised by President Coolidge and Secretary Jardine that they felt sure we would find a sympathetic atmosphere in both houses of congress to any suggestions in definite form that addressed itself to the basic problem confronting the industry, and that in no event would they embarrass a full and fair consideration of such proposals.

Acting upon this request, was brought forth Committee Print Number One or the Federal Farm Board Act, which was presented to the Agricultural Committee of the House and was under consideration there for several weeks. It gained support very rapidly *(until there developed strong administration pressure in opposition)* to the fundamental principles upon which it was founded.

I feel it germane to say that the spokesman for this opposition, Mr. Fort of New Jersey, openly prided himself that he came from a district that did not have a farmer in it. Counter proposals were under consideration but none of them, we believe, carried the possibility of genuine relief or in any way made possible the restoration of agriculture to her rightful economic position.

The result of several weeks of

(Continued on page 3, col. 1.)

1927 Annual Meeting Goes to Peoria; Had Invitation to Canada

Peoria will be the scene of the next annual meeting of the Illinois Agricultural Association in January, 1927, the executive committee decided at its June 11 meeting. Among the invitations to the association was one from Montreal, Canada, which, of course, could not be considered since the meeting is always held within the state.

Among the sales points used in the Montreal invitation were: "Montreal has many attractions both natural and *otherwise*"; * * * the individual liberties of the citizens have not been disturbed and Montreal is able to offer a hospitality in *entertaining* guests, which, under existing laws cannot be equalled by any other city in America."

But Peoria won.

Washington County May Have Bureau; 208 Want One; Need Another 100

Two hundred and eight farmers in Washington county, southeast of St. Louis in "Little Egypt," have signed membership agreements to join the Washington County Farm Bureau when it is formed.

These farmers have been anxious to complete their organization, but have been advised to get at least 300 or 350 members before electing officers and hiring a farm adviser.

Martin Schaeffer of Hoyleton has been a prime mover for a Farm Bureau in this county and has been working with his neighbors toward this goal for several months. The additional members are expected to join within a few weeks, and if so Illinois will have another county organization working for a permanent, profitable and happy farm life.

EXECUTIVE COMMITTEE
(By Congressional Districts)

1st to 11th ..... William Webb, Route One, Joliet
12th ..... G. F. Tullock, Rockford
13th ..... C. E. Bamborough, Polo
14th ..... W. H. Moody, Port Byron
15th ..... B. H. Taylor, Rapatee
16th ..... A. R. Wright, Varna
17th ..... F. D. Barton, Cornell
18th ..... R. F. Karr, Iroquois
19th ..... J. L. Whisnand, Charleston
20th ..... Charles Borgelt, Havana
21st ..... Samuel Sorrells, Raymond
22nd ..... Frank Oezner, Waterloo
23rd ..... W. L. Cope, Salem
24th ..... Charles Marshall, Belknap
25th ..... R. K. Loomis, Makanda

OFFICERS

President, Earl C. Smith ..... Detroit
Vice-President, Charles R Finley ..... Hoopeston
Treasurer, R. A. Cowles ..... Bloomington
Secretary, Geo. A. Fox ..... Sycamore

Published once a month at 404 North Wesley Ave., Mount Morris, Illinois, by the Illinois Agricultural Association. Edited by Department of Information, E. G. Thiem, Director, 608 South Dearborn Street, Chicago, Illinois. Entered as second-class matter October 20, 1925, at the post office at Mount Morris, Illinois, under the Act of March 3, 1879. Acceptance for mailing at special rate of postage provided for in Section 412, Act of February 28, 1925, authorized October 27, 1925. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record. Postmaster: In returning an uncalled for or missent copy, please indicate key number on address as is required by law.

Can Taxes On Agricultural Land Be Shifted?

By JOHN C. WATSON

Director, Department of Taxation and Statistics
Illinois Agricultural Association

THE general property tax is based upon the assumption that uniformity of valuations insures a fair and equitable distribution of the tax burden. The assumption is not only unwarranted, but cannot possibly be true. As has been shown in a previous article, most of the income of the people of Illinois is not derived from property at all, but from salaries, fees, commissions, and wages, which pay no direct taxes in this state.

J. C. Watson.

Property itself, even if valued uniformly, can have no uniformity in its tax burdens. Some property is easily hidden and usually evades the assessor. If it is discovered, it can readily be transferred to other localities or states, or changed into tax free securities. Real estate cannot escape the assessor, and cannot easily be exchanged for other forms of property. Property of the same value produces widely varying returns. "Owners of some kinds of property easily can and do add their taxes to the prices of their services or products. Owners of other kinds of property, notably land, cannot shift their taxes to others to pay."

The determination of who really pays a tax levied on land is too extensive and complex for discussion in a brief article. Instead of such a discussion, the conclusion of Professor E. R. A. Seligman, of Columbia University, is given below. Professor Seligman is recognized as one of the foremost authorities of the world on this subject. His book, "Incidence of Taxation," in which he discusses the circumstances under which various kinds of taxes can or cannot be shifted, should be studied by every one who is interested in one of the greatest problems of taxation.

In his discussion of Taxes on Agricultural Land, Professor Seligman reaches the following conclusion:

"Our conclusion, hence, is that under actual conditions in America today the landowner may virtually be declared to pay in last instance the taxes that are imposed on his land. At all events, it is erroneous to assume any general shifting to the consumer. To the extent that our land tax is a part of a general property tax, it cannot possibly be shifted; to the extent that it is more or less an exclusive tax, it is even then apt to remain where it is first imposed—namely, on the landowner."

Why Farmers Should *Support* the Tax Amendment to Illinois Constitution

(To be voted on in November, 1926)

1. Real estate, although less than one-half—many say less than 40 per cent—of the property in the state, is now paying about 80 per cent of all of the taxes for most purposes.

2. Tangible property, although probably not more than one-half of the property in the state, is now paying more than 92 per cent of all the taxes for most purposes.

3. A minority of the people of the state are now paying all of the taxes for most purposes.

4. Owners of some kinds of property easily can and do add their taxes to the prices of their services or products. Owners of other kinds of property, notably land, cannot shift their taxes to others to pay.

5. Owners of mortgaged property are now paying double or multiple taxes. They pay taxes not only on their equities, but also on the value of the mortgages, and pay a higher rate of interest on taxable mortgages whether the mortgages pay taxes or not.

6. Lack of personal interest on the part of most people in the economical and efficient use of tax moneys, and their belief that they are paying no taxes of any kind, promote extravagance and a rapid increase of deferred taxes in the form of bonded indebtedness.

7. Taxes are rapidly increasing in Illinois partly because the population is increasing, but chiefly because of the demand for new forms of service.

8. Under the present constitutional limitations none of the inequalities of the present taxing system described above can be fairly or properly corrected. The proposed amendment is a grant of power to the General Assembly, enabling it from time to time to correct inequalities in taxation and to establish a modern and equitable system of taxation.

Earl C. Smith

President, Illinois Agricultural Association.

[Brief articles in support of the points stated above will be printed in later issues of The Record. Questions relative to the proposed tax amendment are invited and will be answered through The Record.]

The Palliative Pink Pill

NOW that the administration has the scalp of the corn belt bill safely nailed to its belt, the spokesman from the White House would mitigate the wrath of western and middle-west farmers by offering them the Fess Amendment. This bill provides a federal revolving fund of $100,000,000 to be loaned to cooperatives, and for a farm board of six $12,000 a year members to be appointed by the president.

We can see in this new move nothing but a mere political gesture for favor. It lacks all the earmarks of a sincere attempt to remedy the farmers' troubles. The farmer's present channels for borrowing money are adequate to give him all the cash he ought to have. And a new board subject to political appointment with little or no power to effect any permanent improvement in the condition of agriculture would be of no more value than the President's recent agricultural commission.

The administration recognizes with loud expressions of profound sympathy that the patient has the appendicitis. But it refuses to operate. It seeks to bring the patient around with the well-known palliative pink pill. We believe the situation demands a new set of doctors. **Come on 1928.**

How The McNary Bill Was Defeated

(Note: Here is a message received just before going to press from Robert A. Cowles, who has been in Washington representing I. A. A. for the past two weeks. His comments are of particular interest because they come fresh from the national capitol.—Editor.)

Washington, D. C., June 25.

E. G. Thiem, Director of Information
Illinois Agriculture Assn.
608 South Dearborn St., Chicago, Ill.

Defeat of committee amendment to cooperative marketing bill in senate known as McNary bill by a margin of six votes is attributable to negative votes of Senators Borah, Idaho; Walsh, Montana; Reed, Missouri; King, Utah; Warren, Wyoming; Phipps, Colorado, and to a shift in four southern votes. In the contest, organized industry exerted powerful influence and pressure through party leaders regarding with alarm the united front presented by farm organizations north and south. As viewed by party leaders this non-partisan alliance given the opportunity through the federal farm board provided in the bill and appointed from those nominated by farm organizations presented possibilities for the solidification of the farmer vote into a powerful non-partisan political organization to be reckoned with in the future. In other words, the organization and forces that influence the election of senators evident throughout the struggle were arrayed against the bill and in spite of which many senators dared to support and vote for the bill. The show-down finally came as a non-party or political sectional contest with the great industrial east reaching out its powerful influence wherever it might. With the committee amendment voted down, the president has late today through public announcement thrown his influence directly behind and is urging the enactment of the so-called Fess amendment known in the house as the Tincher bill and the administration is driving for its passage. The bill is a gesture with a political farm board appointed without farm organization nomination. The evident purpose of action at this time by the administration and its effect if successful in both houses of congress will be to foreclose further effort on the part of farm organizations to secure enactment of legislation designed to effectively control and dispose of surplus farm commodities with the commodity bearing the charges therefore and with the control of the commodity in the hands of farmers. COWLES.

8 Ford County Co-ops Adopt Federated Audit Service for Protection

Wm. E. Hedgcock

Eight Ford county shipping associations blazed the trail toward securing an up to date audit service and improving their methods of doing business when they cooperated recently in having their books audited by the Illinois Agricultural Cooperative Association.

The associations operate independently as before but they agreed to adopt uniform rules of accounting and to submit their records annually for audit. At a meeting of the association officers and managers following the audit, considerable interest developed regarding accounting and shipping problems.

W. E. Hedgcock and George R. Wicker of the Illinois Agricultural Association attended the meeting and led the discussion toward helping each organization with its work.

"I believe that the expense involved in extending service to a single association makes it both unsatisfactory and unprofitable to accept associations as members of the Cooperatives Association," said Wicker. "But if the livestock shipping associations will cooperate in a county or district so the records of all companies could be assembled at one point, the cost of service will be largely reduced. The net result of such cooperation will be to enable us to make comparative studies toward bringing about better practice and more uniformity in operations and accounting."

Helping Poor Kiddies Get Vacations Is Practical Application of Christianity

YOUR State Farm Bureau—the Illinois Agricultural Association—is cooperating again this year with the United Charities of Chicago to try and make it possible for some of the unfortunate children of Chicago's poor districts to have an opportunity to spend two weeks in some of our good Farm Bureau homes.

The United Charities will see to it that the children are fresh, clean and properly dressed before they are sent from Chicago. They have all arrangements with the railroads which have agreed again this year to carry the children free. Attendants from the United Charities organization will accompany the children to their destinations and will call for them when their two weeks have passed.

A Farm Vacation is Fun For Him and Pleasure for the Host

The Farm Bureau members' part consists of giving them a good time while they are in the country, and farm families who have opened their homes and hearts to these youngsters in the past report that entertainment for city children in the country is easy and simple. They make their own good times and furnish their hosts with a great deal of entertainment besides. The wonder and delight with which they will greet the most commonplace things in the country is a source of constant amusement to many farmer-hosts.

A card addressed to the Outing Secretary, Illinois Agricultural Association, 608 S. Dearborn St., Chicago, will make known your willingness to take part in this practical, Christian endeavor.

Hail Insurance Tops Million Dollar Mark In Farmers' Mutual Co.

Hail insurance signed by the Farmers' Mutual Reinsurance Company topped the million dollar mark on June 21 when a total of $1,147,850 was reported by J. H. Kelker, assistant secretary of the company.

Henry county led all others in the amount of insurance written with a total of $686,939. Most of this was written by members of the Farmers' Mutual Company of that county. A total of 631 policies were recorded on that date.

Practically all the insurance so far has been written in western Illinois where damage from hail in recent years has been particularly severe in localities. Knox county is second with $134,415; McDonough county third with $112,085, and Mercer and Rock Island counties next with lesser amounts. Sixteen counties so far are represented.

The initial payment on delivery of the policy is $4 per $1000 of insurance. At the end of the crop season the losses from hail damage will be totaled and assessments prorated to the policy holders. The maximum assessment, according to estimates of the company, will not run over $24 per 1000 including the initial payment. Old-line companies are charging around $30 per 1000 for this class of insurance.

Illinois Delegates to Tour to St. Paul Institute in July

Gougler Will Conduct Party to Cooperative Feeding Plant at La Crosse, Wisconsin.

A representative delegation of 25 to 30 men will leave Illinois by automobile on Sunday, July 4, and Monday, July 5, to attend the American Institute of Cooperation at St. Paul, according to Frank Gougler, director of poultry marketing.

Frank A. Gougler

Wayne, Clay, Effingham, Ford, Knox, Henderson, Warren and possibly other counties will be represented in the tour to the Twin Cities where Gougler, A. B. Leeper, and Geo. R. Wicker of the Illinois Agricultural Association will appear on the program. The tourists will stop to go through the cooperative poultry feeding plant recently established at La Crosse, Wisconsin, by the Lake Region Cooperative Egg and Poultry Exchange. This plant is being used in conjunction with a larger one now operating at St. Paul to concentrate and feed and fit live poultry for market before shipment to New York.

The delegation from Illinois will spend their time seeking information and the experience of others in poultry and egg, fruit, and dairy marketing.

Mr. Gougler will present a history of poultry and egg marketing experience in Illinois with a condensed summary of his observations in this and other states.

A. B. Leeper, director of fruit and vegetable marketing, will discuss the successes and failures of cooperative fruit marketing in Illinois and the experience of the Illinois Fruit Exchange, while Wicker will speak on cooperative audit service for farmers' elevators.

Germans Pass Bill to Stabilize Farm Prices

That the Federal farm board plan is not so revolutionary as its opponents would have the world believe is borne out in the recent action of the German Reichstag which has passed a bill granting a loan of 30 million marks ($7,150,000) to a German Grain Trading Company composed of farmers, fertilizer syndicates and others, the purpose of which is to study ways and means to render German agriculture profitable and also to stabilize grain prices by buying, storing and selling German grain.

Scatter The Orders For Limestone: Bent

The limestone companies are kicking about the large percentage of orders they receive on the 1st and 15th days of the month causing a peak demand at these two periods, according to J. R. Bent.

Many buyers would be just as well pleased to place their orders for delivery the 5th, 10th, 20th, or 25th, and the limestone shippers can thus effect a more even distribution of labor. It is suggested that farm bureau members and farm advisers who order limestone in the future try to accede to this request.

Senate Asks Jardine of Chicago "College"

Secretary Jardine was asked Friday, June 25, by the Senate to explain his connection with the Roundup College of Scientific Price Forecasting of Chicago.

A resolution making the request was offered by Senator Caraway (Dem. Ark.), and adopted. Caraway said the secretary had accepted appointment as a member of the faculty of the college to teach students "how to speculate and get around the rules of the grain futures act which he administers."

The resolution asked the secretary to state whether his information on grain futures markets was obtained as a result of his official connection with the department of agriculture, and what compensation he has received from the college.

The Roundup College school for price broadcasting was held at the Congress Hotel four weeks ago. Secretary Jardine was announced in publicity as the principal speaker. The school is run by J. Ralph Pickell, listed in the telephone book with offices at 1848 West Washington Boulevard and 328 Ashland Boulevard. It is said, however, that the offices have been moved to Western Springs, Ill., near Chicago.

Pickell at the time the school was held, said about 500 students would be in attendance. Each student, he said would pay $50 for the course.

War On Chicken Thieves Continues

Prairie Farmer's war against chicken thieves has brought a full awakening of the necessity for cooperation all along the line in stopping this kind of crime. Vermilion, Woodford, Lake, Edwards, and Dewitt are some of the latest county farm bureaus to offer rewards and help set up local protective associations of farmers to detect the lawbreakers. Five organized township units in Dewitt county have offered $50 each for information leading to the arrest and conviction of anyone stealing from members. Let the good work go on.

Quasey Represents Farm Bureau In Rate Case At Springfield

Farmers of Fulton county joined hands with citizens of Canton in opposing an increase in rates requested by the Canton Home Telephone Company at a hearing before the Illinois Commerce Commission in Springfield on Tuesday, June 22.

The telephone company is asking for a raise from $18 to $24 per year on party lines, and from $5 to $9 per year for switching service to 415 farmers on mutual telephone lines around Canton.

L. J. Quasey, director of transportation, represented the I. A. A. and the Fulton County Farm Bureau at the hearing. He succeeded in revealing information by cross-questioning officials of the company which indicates the utility has been doing very well financially since it merged with another company in 1922.

At that time the company was given a substantial increase by the commission, and was allowed to merge on the plea that economies could be effected. On Dec. 31, 1925 the company had accumulated a reserve for depreciation purposes of $67,951.50. It has met regularly the interest on $150,000 of bonded indebtedness, but has not paid dividends on $145,000 stocks. The commission is expected to render a decision by July 1.

Wheat Pool Meets At Carmi

Fifty Illinois members of the Central States Soft Wheat Growers' Association met at Carmi, in White county, on June 23 for a frank and full discussion of last year's results in the wheat pool. Earl C. Smith, president of the Illinois Agricultural Association, addressed the meeting. The membership reaffirmed their faith and expressed their determination to make the pool a success.

Oil and Gas Supply Companies Will Be Discussed in July

Oil and gasoline and the problems to be met by farm bureau supply companies engaging in the distribution of these commodities will be the subject of a series of conferences to be held during July by J. R. Bent, director of the I. A. A. farm supply department.

Meetings will be held as follows: Springfield, Monday, July 19, 11 a. m.; Centralia, Tuesday, July 20, 1 p. m.; Champaign, Wednesday, July 21, 11 a. m.; Rockford, Thursday, July 22, 1 p. m.; Galesburg, Monday, July 26, 11 a. m.

They will be attended by Mr. Bent, Donald Kirkpatrick, legal counsel, and George R. Wicker, director of cooperative accounting. The Illinois Agricultural Association in sponsoring these meetings hopes to give such advisory service as will help those contemplating such service.

The first meeting at which this subject was discussed was held at Henry in Marshall County on June 30, where an oil and gas supply company is now in operation.

The Regular Delivery By R. J. Bieger

WE'VE JUST BEGUN TO FIGHT

(Continued from page 1, column 5.)

consideration by the House Agricultural Committee was a deadlock, resulting in their voting out three measures, the Haugen, Tincher, and Aswell bills to the House as a Committee of the Whole, for consideration. One-third of the time was to be given to consideration of each measure; but the Congressional Record shows quite clearly that the proponents of both the Aswell and Tincher Bills confined themselves largely to criticism of the farmers' programs, which naturally forces us to view with suspicion the sincerity of purpose directing their efforts.

The farm leaders could have, at any time, compromised on a measure carrying twelve good jobs and an endless amount of money for farmers to get further into debt; but so far as I know, although every farm organization of note was represented except the National Grange, not a single one for a moment ever entertained a notion of doing so. We had been promised legislation that would give to agriculture equality with other group interests, and on that platform we stood, preferring temporary defeat to any compromise of principles necessary to achieve that result.

In the Senate our bill known as the McNary Bill, had a somewhat different status, in that it had been favorably reported out of the Committee as an amendment to the administration's co-operative measure. In consideration on the floor of the Senate, party lines and party precedents were broken, and it is only due them to state that many able senators with considerable political embarrassment to themselves, were staunch supporters of the farmers' program and defended the bill to the end.

It was the desire of those responsible for the preparation of our bill to do nothing or ask nothing that would seriously disturb the prosperous condition prevailing throughout the industrial world or would in any way, affect adversely American labor standards. It was, however, not only our intention but determination to receive our just portion of the benefits of the protection afforded these groups. It is quite surprising to note in a careful analysis of the vote on these bills before both Houses, that those who have most enjoyed the fruits of protection are unwilling for farmers to share with them its benefits. In the Senate only one vote was cast for this bill from east of Indiana and north of the Ohio River. That was Copeland's from New York. Practically the same proportioning of support was true in the House. This alone is sufficient evidence of the need of and necessity for every red-blooded American farmer to rally and stand shoulder to shoulder in defense of his rights. Although temporarily defeated, the only result of such defeat will be a redoubling of our efforts to secure what so rightfully belongs to us, believing more than ever in the justice of our cause and that justice must and will prevail.

THOMAS P. COOPER, FORMERLY CHIEF OF THE Bureau of Agricultural Economics, has resumed his position as dean and director of the College of Agriculture and Experiment Station at the University of Kentucky.

Fall Community Meetings OK'd; Institute Asked to Chicago; Peoria Gets Annual Meet

Here are the detailed minutes of the Executive Committee meeting on June 11.

Roll call showed the following members present:

Wm. Webb, Will County.
Geo. F. Tullock, Winnebago County.
C. E. Bamborough, Ogle County.
Wm. H. Moody, Rock Island County.
A. R. Wright, Marshall County.
Frank D. Barton, Livingston County.
R. F. Karr, Iroquois County.
J. L. Whisnand, Coles County.
Charles Borgelt, Mason County.
Samuel Sorrells, Montgomery County.
Frank Oerner, Monroe County.
W. L. Cope, Marion County.
Charles Marshall, Johnson County.
R. K. Loomis, Jackson County.
Charles R. Finley, Vermilion County.
E. A. Carncross (Substituting), Dupage County.
Earl C. Smith, president, Pike County.
Geo. A. Fox, secretary.
R. A. Cowles, treasurer.

President Smith called for the action of the Committee on approval of the minutes of the May 7, 1926, meeting.

MOTION—Mr. Moody:

That the minutes of the last meeting be approved.

Second—Mr. Webb—Carried.

President Smith called the Committee's attention to a Suggested Declaration of Policy. A copy of the suggested policy was handed each member of the Committee. President Smith asked that consideration be given to this prepared suggestion by each member and suggestions regarding the same be communicated to Secretary Fox or Mr. Tullock, Chairman of the Financial Business Service Committee, before the next meeting in order that the material may be gotten into definite form for full consideration at the next meeting.

Brookhart Makes Few Remarks

Senator S. W. Brookhart, of Iowa, was introduced by President Smith and addressed a few remarks to the Committee.

President Smith asked that consideration of the selection of the place for the next annual meeting be given at this time.

Secretary Fox stated that invitations had been received from the University of Illinois, Urbana, Peoria, Springfield, Montreal, Canada, and Chicago. He reported that he had made a trip to Peoria, with Mr. Wright, for the purpose of looking over facilities there. He reported that Peoria has ample facilities for handling the meeting. He reported that an investigation of facilities had been made at Springfield and they also were in a position to take care of the annual meeting.

Annual Meeting to Be at Peoria

MOTION—Mr. Wright:

I move that the next annual meeting be held at Peoria and that proper officials negotiate arrangements for the meeting.

Seconded—Mr. Barton—Carried.

President Smith stated that a telegram had been received from Washington stating that it was imperative that either Mr. Cowles or himself go there immediately. It was decided that Mr. Cowles should leave immediately for Washington.

He stated that in the absence of Treasurer Cowles, copies of the financial statement for the month of May would be handed to each member of the Committee.

MOTION—Mr. Whisnand:

That the Financial Statement be received and placed on file.

Second—Mr. Karr—Carried.

Mr. Wright reported that the Special Committee, consisting of himself and Mr. Potter, had visited Mr. Allen of the Farmers' Grain Dealers' Association of Illinois in the interest of the sale of stock of the National Farmers' Elevator Grain Company, Co-operative.

MOTION—Mr. Barton:

That the officers of this Association, together with the Chairman of the Grain Marketing Committee, including Mr. Wright, a member of the last Grain Marketing Committee, be authorized to meet with the Farmers' Grain Dealers' Association of Illinois at such time and place as the Elevator people suggest, provided that assurance be given our Association that the Elevator people will be represented at such meeting with sufficient representation and power to enter into contract if such a plan should be developed.

Seconded—Mr. Moody—Carried.

Fall Community Meetings Approved

Secretary Fox brought up the matter of holding fall community meetings over the State in conjunction with district conferences. He asked for expressions from the members of the Committee as to whether they approved of this arrangement and all seemed to be thoroughly in accord with the plan.

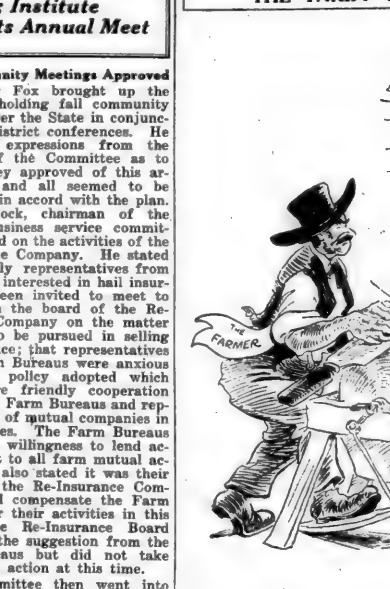
Mr. Tullock, chairman of the financial business service committee, reported on the activities of the Re-Insurance Company. He stated that recently representatives from 13 counties interested in hail insurance had been invited to meet to confer with the board of the Re-Insurance Company on the matter of policy to be pursued in selling hail insurance; that representatives of the Farm Bureaus were anxious to have a policy adopted which would insure friendly cooperation between the Farm Bureaus and representatives of mutual companies in their counties. The Farm Bureaus expressed a willingness to lend active support to all farm mutual activities but also stated it was their belief that the Re-Insurance Company should compensate the Farm Bureaus for their activities in this behalf. The Re-Insurance Board considered the suggestion from the Farm Bureaus but did not take any definite action at this time.

The Committee then went into Executive Session and discussed the relationship existing between the Illinois Agricultural Association and Farm Bureaus—the Re-Insurance Company and farm mutuals. At the conclusion of the discussion, the following motion was offered by Mr. Tullock:

MOTION—Mr. Tullock:

Theft, Life and Auto Insurance

The Illinois Agricultural Association has fostered the promotion of the Farmers Mutual Re-Insurance Company solely for the benefit of the farmers mutual, fire, lightning and windstorm companies. It has no intention of entering the fire, lightning or windstorm field. The executive committee of the Illinois Agricultural Association authorizes the officers of the Illinois Agricultural Association, to investigate the advisability of theft, life and automobile insurance for its members.



Second—Mr. Karr. Unanimously carried.

Mr. Barton, Chairman of the Public Relations Committee, reported that a conference was held at Springfield, May 26, with officers of the Illinois Anti-Horse Thief Association and the Illinois State Detective Association. He stated the advisability of forming a Farm Bureau Protective Association in each county and providing theft insurance for the members of such Associations was discussed in the conference and favorably received. It was the opinion of all present that Farm Bureau Protective Associations would not attempt to duplicate activities where other Protective Associations were actively functioning but would cooperate in such territory. Representatives of the Illinois Anti-Horse Thief Association and the Illinois State Detective Association expressed themselves as believing that theft insurance and cooperation on the part of the Farm Bureaus would be helpful to their organizations.

Institute of Cooperation To Chicago

Secretary Fox stated that the American Institute of Cooperation is being held at the University of Minnesota this year at which time the Executive Committee of the Institute will receive invitations for the 1927 session. He stated that several meetings had been held with Dr. Taylor, of the Northwestern University and Mr. Evans of the American Farm Bureau Federation. He said that it will be necessary to pledge a sufficient sum of money to make up the amount necessary to finance the Institute. The Laura Spellman Memorial Fund has raised its offer to duplicate dollar for dollar cash contribution to the Institute up to $15,000 for this year and has extended this offer to apply upon next year's donations; that it was thought the farm organizations might assume $2,000 or $3,000 of the total amount necessary to hold the Institute in Chicago.

THE TARIFF REGISTERS "CONCERN"

Courtesy Chicago Tribune

MOTION—Mr. Moody:

That the committee authorize a contribution of $500 toward the amount necessary to finance holding the 1927 session of the American Institute of Cooperation in Chicago, discretion on the part of the officers to be used in contributing an additional $500, if necessary, in order that the required amount may be raised.

Seconded—Mr. Whisnand—Roll call showed motion unanimously carried.

Secretary Fox stated further that the Association had been asked to contribute toward financing the 1926 session of the American Institute of Cooperation which is being held at Minneapolis.

MOTION—Mr. Whisnand:

I move that we appropriate $200 towards financing this year's session of the American Institute of Cooperation.

Seconded—Mr. Karr—Roll call vote was taken and motion unanimously carried.

Illinois Milk Producers Contract

Secretary Fox asked that the Committee consider the matter of an agreement between the Illinois Milk Producers' Association and the Illinois Agricultural Association. He stated that the contract is identical with the one adopted a month ago with the Pure Milk Association with the exception that the deduction is 5c per cwt. instead of 1c. The Illinois Milk Producers' Association has been in promotion for the past ten months and includes the counties of Tazewell, Peoria, Woodford and Fulton. He stated that the contract has been passed upon by the Board of the Illinois Milk Producers' Association.

Mr. Finley, Chairman of the Marketing Committee, stated that the Marketing Committee met with Mr. Fox, before the Executive Committee went into session, and went over the agreement rather thoroughly. He stated that the Marketing Committee recommended the contract and also that the officers sign the same.

Organization Conference to Be Held

Secretary Fox stated that plans were under way for holding an organization school or conference, perhaps during the middle of August, at which time a definite program on organization would be worked out for that week. He stated that the surrounding states are interested in a conference of this kind and it had appealed to them to have their men actively engaged in organization work participate in this conference. He stated that Mrs. Sewell had been appointed as Chairman of the Committee to work out plans for the school at the last Mid-West conference and she had asked Mr. Lincoln, of Ohio, and himself to serve on this committee. A meeting was held on June 3 and another meeting is scheduled for June 16. He stated that it was thought the cost of holding this conference would probably amount to $1,000 which would be divided between five different states. He asked whether or not the Committee approved of having this conference and spending $200 or $300 as the Association's share of expense covering same.

MOTION—Mr. Barton:

That this matter be referred to the officers of this Association and the Organization Committee, with power to act.

Seconded—Mr. Moody—Carried.

New Director of Information Employed

Mr. Karr reported that applications for the position of director of the department of information had been considered at a meeting with President Smith, Secretary Fox and Mr. Bamborough on May 14, at which time it was decided to employ Mr. E. G. Thiem.

MOTION—Mr. Karr:

I move that the Committee concur in the action of the committee appointed to employ a director for the department of information.

Seconded—Mr. Whisnand—Roll call vote resulted in motion being unanimously carried.

The next subject to be acted upon by the Committee was the annual appropriation towards the expenses of the winning judging teams in attending the International Live Stock Show. Mr. Hedgcock explained to the Committee that the money contributed would be used in defraying the expenses of the winning judging teams in attending the judging contest and also for the vocational winning judging team in attending the International Live Stock Show.

MOTION—Mr. Webb:

That the Association appropriate $200 towards the expenses of the winning judging teams.

Seconded—Mr. Marshall—Roll call vote resulted in motion being unanimously carried.

MOTION—Mr. Whisnand:

That the picture of our former President, Mr. S. H. Thompson, be framed and placed on the wall in the Executive Committee room.

Seconded by Mr. Moody—Carried.

MOTION—Mr. Wright:

That the committee authorize the completion of the remaining six photographs into transparencies for use in the windows of the Executive Committee room.

Seconded—Mr. Karr—Carried.

MOTION—Mr. Moody:

That the next meeting of the Executive Committee be held Friday, July 9.

Seconded—Mr. Whisnand—Carried.

Adjournment.

Farm Bureau Baseball Teams Swing into Play for State Championship

Hard Struggle For Honors in District 4 Between Tazewell, Marshall-Putnam and Woodford.

Although the late spring delayed Farm Bureau baseball, there has been considerable activity lately.

A report by L. R. Welk, of Morton, Tazewell County, chairman of the district which includes Tazewell, Marshall-Putnam, Woodford and Peoria Farm Bureaus, says:

"The first games in this district were played on May 29, Tazewell winning over Woodford 14-7, and Marshall-Putnam defeating Peoria 17-5. On June 5, Marshall-Putnam defeated Tazewell 4-2, the winning team putting over 3 runs in the ninth. On the same date Woodford won from Peoria 8-1.

"On June 12, Marshall-Putnam beat Woodford in a hotly contested game 2-1. This was a pitchers' duel between Hallem and Vogel of Woodford and Earl Hinman of Tazewell.

"It appears there will be a real struggle for first honors in this district."

Adams, Brown and Schuyler Counties constitute another district. The first game was scheduled for June 26 at Quincy between Brown and Adams. The remainder of the schedule is: July 3, at Mt. Sterling, Brown vs. Schuyler; July 16, at Quincy, Adams vs. Schuyler; Aug. 6, at Rushville, Adams vs. Schuyler; Aug. 26 or 28, at Mt. Sterling, Brown vs. Adams; Sept. 2, at Rushville, Brown vs. Schuyler.

Earnest D. Walker, farm adviser in Henderson County, sent in the following report of a game between Warren and Henderson:

"With the score tied at one each in a game played Saturday, June 19, and both pitchers going like a house afire, John Painter came to bat in the eighth with one down. He placed one into center field which was good for four bases. This proved to be enough to win, but the Henderson team made one more for good measure on hits by Steffey, E. Pence and Fryrear.

"The first score for Warren county came in the second inning when Bradley reached first on an error and stole second. A throw to catch him at third bounced off Fryrear's glove into the crowd and the umpire allowed the score to count on the ground that the ball was blocked.

"This run looked big until the fifth when Keener reached first on an error. Ricketts was safe on Keener's out at second, stole second and scored on a hit by Painter. This tied the score and it remained so until the fireworks opened in the eighth.

"Both pitchers were going fine, each allowing six hits and getting 14 strikeouts.

"The return game with Warren county will be played Saturday afternoon, July 3, at Little York.

"The line-up:

Warren	AB	H	R	E
J. Kinney, ss	4	1	0	0
Whitman, cf	4	0	0	0
F. Kinney, rf	4	0	0	0
L. Peterson, 1b	4	1	0	0
Bradley, c	3	1	1	0
Anderson, lf	3	1	0	0
Riggle, 3b	4	1	0	0
E. Peterson, 2b	4	0	0	1
Turner, p	4	1	0	0
	34	6	1	1

Henderson	AB	H	R	E
Steffey, cf	4	1	1	0
E. Pence, c	4	0	0	0
Fryrear, 3b	4	2	0	1
Felton, 2b	3	0	0	2
Downes, 2b	1	0	0	0
Keener, 1b	3	0	0	2
C. Pence, ss	3	0	0	1
Ricketts, lf	3	0	1	0
Painter, rf	3	2	1	0
H. Pence, p	3	1	0	0
	30	6	3	6

The championship game is expected to be played at the annual statewide picnic of the I. A. A. which is to be at Mt. Vernon, Jefferson county, Aug. 12. Some playing schedules will have to be revised if the championship game is played on this date.

54,326,000,000 POUNDS OF MILK AND CREAM in fluid form were consumed in the United States last year according to the United States Department of Agriculture. This is the largest year's record in the Nation's history and represents an increase of 1,554,900,000 pounds over 1924.

Southern Illinois To Be On Dress Parade

Protection For All Or Protection For None, Corn Belt Says

Farm Leaders Unite To Continue Fight In Next Session of Congress. Aid of Western and Southern States To Be Solicited

Protection for all or protection for none. This is the slogan adopted by the corn belt leaders at Des Moines on July 19 and 20 where 20 farm organizations and 10 out of 11 Middle West states were represented.

The meeting of the corn belt committee of farm organizations on Monday was an executive session to determine the next move in the fight for agricultural equality. The committee of 22, led by George Peek, which met the following day, was called for the same purpose. Never was there greater unanimity of sentiment and determination to continue the fight for protection to agriculture equal to that accorded other industries.

The attitude of the corn belt committee toward the administration was expressed in the following resolution.

Condemn Industrial Policy.

"We condemn the shortsighted industrial policy expressed by spokesmen for the national administration, including Secretary Mellon, Secretary Hoover, and Secretary Jardine, which opposes any move to make tariffs effective for agriculture on the ground that to do so would place American industry at a disadvantage in competition with foreign competitors in the export markets of the world.

"Such a policy would lead to the industrialization of the nation at the expense of the farmers, subordinating our agriculture to our industry in order that the latter might compete more favorably abroad. Certainly such a policy is not favorable to the economic development of the middle west or the nation."

The Committee of 22 which met on Tuesday passed a resolution concurring in the resolutions of the corn belt committee quoted above.

George N. Peek expressed almost the same sentiments in his report to his committee.

Peek Hits Administration.

"It is the plain and unmistakable attitude of the administration," Mr. Peek said, "to oppose making the tariff effective for agriculture because of the belief it would raise the price of foodstuffs above the foreign costs. This, the administration insists, would react to the disadvantage of American industry in the export markets."

Investigations by congressional committees of "interrelations that appear to give to industrial advisers who are not without self-interest as dealers and speculators in farm products, the deciding voice not only in influencing the enactment of agricultural legislation but in determining the manner of administration of such laws after enactment" were recommended by the corn belt committee.

By these investigations the corn belt committee seeks to learn of possible collusions which it suspects.

"The activities of Secretary Hoover to dominate and encroach upon the functions of the Department of Agriculture, including interference by Mr. Hoover in the personnel of the department and the source of the opposition toward effective agricultural legislation described by Senator Norris in his speech of June 14 in the Senate were other lines of investigation recommended.

In a brief conference with George Peek and Chester Davis in Chicago recently, Senator McNary of Oregon, new chairman of the Committee on Agriculture in the Senate, expressed the same interest and determination in renewing the fight for surplus control legislation in the next Congress.

Both committees took steps to form a closer alliance between states of the middle west, far west, and south. Summer and fall meetings were planned for states of the south and middle west at which farmers may discuss their common economic problems. The ultimate outcome of such meetings it is hoped will be to increase farm strength in Congress.

The I. A. A. RECORD will report the latest developments in the fight for farm relief in the next issue.

Tentative Program State Picnic Aug. 12

9:00 A. M.—Horseshoe Tournament Opens
10:00 A. M.—Band concert, Peach Grading Demonstration

Adarding of trophies.
Address by Hon. Senator James E. Watson of Indiana
3:30 P. M.—Band concert

Senator James E. Watson of Indiana To Speak At I. A. A. Picnic, Mt. Vernon Aug. 12; All Set For Big Annual Event

Southern Illinois City To Be Mecca For Thousands Expected From Every Part of State; Horseshoe Tournament Draws Many; Free Peaches Special Attraction; Championship Baseball Game Scheduled

COME to Mt. Vernon, Aug. 12. Come and see our wonderful peach harvest. Let us show you the wonders of "Little Egypt." Get acquainted with your neighbors in the lower third of the state. Give us a chance to demonstrate real southern hospitality. That's the invitation and welcome Southern Illinois is broadcasting to its neighbors to the north in preparation for the greatest state farmers' picnic of all time.

Jas. E. Watson

Thursday, August 12, will be a big day in Southern Illinois. They expect to make history at Mt. Vernon. Never before has the I. A. A. picnic, the gala event unequalled anywhere in past years, gone so far south. And to show how much they appreciate the honor, Jefferson, Wayne, White, Franklin, Jackson, Marion, Williamson, Randolph, and those other counties where Illinois' history was first made, are cooperating to display Egypt in all her glories.

The beautiful wooded city park at the edge of Mt. Vernon will be the setting for the picnic. Shade, water, swimming, wading pools, playgrounds, tourist camp, rest, these are only a few of the accommodations it offers.

But the program of the picnic itself where records are smashed and new champions are made, where statesmen proclaim views of national import, will be the great mecca to bring thousands from every nook and corner of the state. Here are a few of the features.

1. James E. Watson, senior United States senator from Indiana, a leader in the fight for the McNary bill in the Senate, will be the speaker of the day. Senator McKellar of Tennessee, who has been invited, promised to come providing the health of a member of his family is such that he could get away.

2. Mrs. Chas. E. Sewell of the American Farm Bureau Federation, a speaker of national prominence known everywhere to farm bureau people, will speak on the morning program arranged especially for the women.

3. A giant fruit display from the best orchards in Southern Illinois.

4. Free peaches to be distributed by the Illinois Fruit Growers' Exchange. Peaches for sale in handy packs for carrying home.

5. The Annual State Horseshoe Pitching Tournament.

6. The Annual State Baseball Championship.

7. Hog Calling and Chicken Calling Contests.

8. Boys' and girls' clubs demonstrations and displays.

9. Band concert.

10. Awarding of trophies.

11. Peach Grading and Sorting Demonstration.

12. Southern Illinois exhibits of:

a. Red Top by Egyptian Seed Growers' Exchange.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely to promote, protect and represent the business, economic, social and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Published once a month at 404 North Wesley Ave., Mount Morris, Illinois, by the Illinois Agricultural Association. Edited by Department of Information, E. G. Thiem, Director, 608 South Dearborn Street, Chicago, Illinois. Entered as second-class matter October 20, 1925, at the post office at Mount Morris, Illinois, under the Act of March 3, 1879. Acceptance for mailing at special rate of postage provided for in Section 412, Act of February 28, 1925, authorized October 27, 1925. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record. Postmaster: In returning an uncalled for or missent copy, please indicate key number on address as is required by law.

Plain Language

THE Philadelphia Public Ledger takes up the cudgel in a recent editorial reprinted in the Chicago Tribune to denounce the presentation of the truth regarding the recent fight at Washington by President Earl C. Smith and our editorial exposing the Fess Amendment subterfuge published in the July issue of the I. A. A. RECORD.

We are accused of "playing politics," and "advancing the political interests of ex-Gov. Lowden and Gen. Dawes"; of "price fixing" and wanting "Uncle Sam to buy us all a farm." As an example of unmitigated childishness expressing complete ignorance of the corn belt's interest in farm relief, this attempt at ridicule is unequaled.

The Illinois Agricultural Association never has set itself up as a political organization. It does not do so now. It is interested in no one's political fortunes. It does believe however, in the policy of protection for all, agriculture included, or protection for none. The administration opposed this principle. Its opposition was aptly expressed in Secretary Mellon's letter to the last congress. We used plain language in denouncing such apparent provincialism. We are just a bit skeptical even now about the prospects of securing any worth while legislation to make the farmer's dollar worth as much as his fellow's, until after 1928. If the Public Ledger editorial, conceived in ignorance, was representative of a large portion of the country, our skepticism would be complete for all time.

Thursday, Aug. 12

SOUTHERN Illinois is making grand preparations for a great entertainment at Mt. Vernon on Aug. 12. Here is an opportunity for Northern and Central Illinois folks to see Egypt, the fruitland of the Middle West, the longest settled area in Illinois, the bristling peach and apple orchards, and on top of all these a day of splendid entertainment and recreation.

Mt. Vernon is more than 100 miles north of the extreme south end of the state. It is located on paved Route 15 which may be reached from north and south by Routes 2, 25, and 1. It is on the direct route of the C. & E. I. R. R. between Chicago and Thebes. A clean, shady tourist camp for picnickers who drive in the night before adjoins the picnic grounds. It will be a trip well worth while for those who have or have not seen Southern Illinois.

A Step Forward

THE recent inauguration of a collection service for cooperatives by the Illinois Agricultural Cooperatives Association may never cause a ripple, over the state and yet it represents a move aimed directly at one of the greatest needs of farmers' organizations, of all time.

When George Wicker finished examining the books of 65 farmers' elevators in Illinois he turned the spotlight on more than a half million dollars worth of accounts and notes receivable. Many were of long standing. The ratio of accounts receivable to net worth was 37.04 per cent. He had uncovered the reason for the losses and failures of not a few elevators.

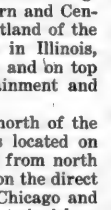
This condition, he said, results in a heavy financial burden and is the cause in most instances of disastrous borrowings.

The new collection service offered at cost without increasing the personnel of the association was the result. Classifying accounts receivable according to age, sending out letters to debtors from headquarters, personal visitation for the purpose of making collections, and reporting back to boards of directors with recommendations for legal procedure will be methods employed to turn accounts into cash.

This service may not sell memberships in the farm bureau but it is a forward step in making farmers' business ventures successful.

Good News

ANNOUNCEMENT of the refusal of the Interstate Commerce Commission to grant western railroads an increase of five per cent in freight rates on agricultural products including livestock is good news for farmers throughout the Middle West. The American Farm Bureau Federation through O. W. Sandberg, director of transportation, and Fred Jackson, special attorney took the initiative in presenting figures and statistics showing the depression existing in agriculture, to the Commission. L. J. Quasey of the Illinois Agricultural Association gave valuable aid in the hearings.



Farmers are not opposed to the railroads earning 5¾ per cent interest on their investment, but they see no reason why the government should guarantee the carriers such a return through its ability to fix rates, when farmers are not so prosperous and are left to shift for themselves.

"These railways for six years have not earned, and are not now earning anything approaching a 'fair return' (5¾%)," says the Railway Age in a bitter condemnation of the Commission's decision, "and the commission offers no definite suggestions as an alternative to the proposed general advance of freight rates."

Hard luck, isn't it. Agriculture isn't even asking the government to fix prices so farmers may earn 5¾ per cent. All it wants is a little assistance to help manage the damaging surplus. The freight rate case reveals just another reason why farmers need a strong organization.

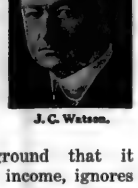
Organization Greatest Need—Lowden

"I am more convinced than ever that organization is the greatest need of the farmers of this country." This is the message ex-Governor Lowden had for more than 500 Illinois bankers at the banker-farmer field day held at Sinnissippi Farms, Oregon, on July 30.

Frank O. Lowden

Mr. Lowden, in his own vigorous way, drove home the point that the combined efficiency of the Danish farmer plus his inherent ability to organize and cooperate with his brothers, in producing and marketing his crops were responsible for the happy condition of agriculture in Denmark.

"The farmer's interests are your interests and anything you can do to help them will react to your benefit and the good of the country," said Mr. Lowden. "It is more necessary that you lend your aid first to agriculture rather than to industry, for when the farmer is prosperous there is prosperity for all." The ex-governor had returned from a tour through Denmark, and other Scandinavian countries only the day before the meeting.



In spite of the rain, the bankers went home pleased with the day and its practical lessons in farm management. The Illinois Bankers Association cooperated with the University of Illinois in arranging the events of the day.

Income Tax is Permitted by Present Constitution

By JOHN C. WATSON

Director, Department of Taxation and Statistics.

OPPOSITION to the pending revenue amendment is occasionally expressed on the ground that it permits a tax on income. It is true that it does permit a tax on income. This is the most hopeful and valuable feature in the amendment. As has been shown in previous articles, this is the only important source of fair taxation which has not been tapped in Illinois. It is the only source that can save real property, urban and rural alike, investment and home alike from the present menace and the eventual certainty of confiscation of values.

J. C. Watson.

Opposition to the pending revenue amendment, on the ground that it permits a tax to be established on income, ignores the fact that a tax on income is permitted by the present constitution. The foremost constitutional lawyers in the state hold that section 2 of Article IX, which has been in effect since the year 1870, gives the General Assembly authority to establish a tax on income. The section is as follows:

"The specifications of the objects and subjects of taxation shall not deprive the General Assembly of the power to require other subjects or objects to be taxed in such a manner as may be consistent with the principles of taxation fixed in this constitution."

There can be little or no doubt that "other subjects or objects" would be interpreted as including a tax on income.

An income tax under the provisions of the present constitution would differ sharply from an income tax under the terms of the proposed amendment.

Under the present constitution a tax on income could be passed by the General Assembly by a bare majority of the members of each of the two houses. The pending amendment would require a two-thirds vote of the members of each of the two houses.

Under the present constitution a tax on income would be uniform on all income alike whether large or small. There could be no exemptions, no offset of income tax against property tax to prevent taxation both of property and of the income produced by property, and no substitution of a tax on income entirely in place of a tax on property.

The pending amendment, if approved, will permit graduated or progressive rates on income, the fixing of limits below which the tax on income will not apply, the offsetting of income taxes against property taxes to prevent double taxation, and the substitution of a tax on income in place of part or all of a property tax, either all property or any class.

The pending amendment would permit a fair system of taxation. An income tax under the present constitution could not be fair. This is probably the leading reason why it has never been established.

Mt. Vernon, August 12, That's the Day

Oil and Gas Supply Companies Attract State-wide Interest

Knox County Company Incorporates For $50,000. If Farmers Must Help Themselves, This Is Our Way, Say Members

State-wide interest in the formation of cooperative oil and gasoline supply companies was evidenced in the recent series of meetings held by J. R. Bent of the Illinois Agricultural Association for the purpose of acquainting farm advisers, members, and others with the possibilities and limitations of this new project.

Since Hancock county started operating an oil and gas supply company more than two years ago and since Marshall-Putnam county made a very successful beginning less than a year ago, other counties have investigated and apparently have seen a new opportunity for another effective way to shorten the road from producer to consumer to help the farmer.

Meetings Throughout State.

Meetings under the auspices of the I. A. A. were held at Henry, Centralia, Springfield, Champaign and Rockford, within the past few weeks, at which half the counties of Illinois were represented. Knox county thought so well of the project that the farm bureau there organized a corporation with capital stock at $50,000. Fifteen thousand or more in cash already has been paid in and the new company is on the high road to a happy beginning.

"Since Congress has failed to give us any relief, we have decided to help ourselves," says the Knox county farm bureau members. "Almost every politician in Washington who opposed real farm relief measures has been preaching that the farmers should be more efficient and lower their cost of production. Thus we Knox county farmers have started out to do this by buying our own gasoline, kerosene, and lubricating oils on the cooperative basis."

Trucks Deliver Products.

Bulk stations will be located at convenient places in the county as rapidly as possible and trucks will deliver petroleum products to every member's farm, says the Knox County Farm Bureau Bulletin. Preferred stock at $25 per share bearing 7 per cent are being offered to farm bureau members to help finance the project.

For the man who buys his gasoline at filling stations, there will be pumps established in every town so he may use his own products.

The Marshall-Putnam Oil Company is in full operation, according to F. E. Fuller, county adviser, since each one of its stations has two truck drivers to deliver. A second driver was recently installed at McNabb, and a new service station is to be located soon at the Ford garage in Granville.

The Illinois Agricultural Association has drawn up a model set of "Articles of Incorporation" under the provision of the Cooperative Marketing Act. These are ready for distribution to everyone interested in the project.

Need Should Be Considered.

"Some counties are going to succeed while others may fail," said J. R. Bent in commenting on the probable outcome of the new venture. The degree to which success may be achieved, or failure encountered will depend primarily upon the need for such a cooperative company, the general interest in it on the part of farmers, local competitive conditions, the form of organization and the financial and "business set-up," and the experience, business-like character, and ability of the management.

The responsibility for the new companies organized will rest with the incorporators themselves, but the Illinois Agricultural Association is making a determined effort to give helpful information and advice to every county interested.

Pack 'em in and Head for Mt. Vernon.

78 Respond Already To Appeal For Farm Outings For Kiddies of Chicago's Slums

This Little Fellow Needs An Outing in the Country. Write and Tell Him to Come.

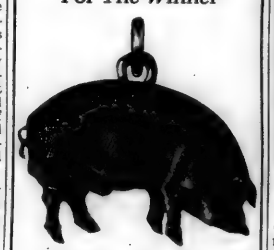
SEVENTY-EIGHT slum kiddies already farmed out through the I. A. A. for summer vacations—that's the record of the past two weeks. The United Charities of Chicago, with whom we are working in getting vacations for the poor children of the tenement districts report that they have many more children who have not been provided for. Here's an opportunity to be happy through making these unfortunate children happy for a couple of weeks this summer.

The United Charities deliver the children in clean clothes and come after them at the end of the vacation period. A card addressed to the Outing Secretary, Illinois Agricultural Association, 608 So. Dearborn St., Chicago, will make known your willingness to help in this splendid work. If possible, secure the aid of your neighbors so a dozen or more children can be delivered to the same town.

20 Counties Show Increase in Total Membership—Metzger

G. E. Metzger.

Twenty counties reorganized this year signed more members in the farm bureau than they did three years ago, according to G. E. Metzger, director of organization, who recently completed a survey of organization work throughout the state.



And a number of other counties which have completed or are about to complete their new drives for members report memberships approximately the same as three years ago. With the greater portion of the work completed for the new period, prospects for a similar or slight increase in membership over the total of three years ago are becoming more apparent each day.

Pulaski, Bond and Jackson counties started resigning members within the past two weeks, while Edwards and St. Clair counties will resign their memberships within the coming two weeks. By the end of August, Henderson, Schuyler, Richland, and Scott counties will start their campaigns for members for the new three-year period.

Washington county in Southern Illinois, one of the few counties in Illinois which never has had a farm bureau, has its quota of 300 members nearly enrolled and plans to establish an office and employ a county adviser by September first. When Washington comes into the fold, the total will be swelled to 93 county farm bureaus in the state. Washington County Farm Bureau officials will hold a meeting at Nashville on Aug. 4 to complete final arrangements for the official launching of their new organization.

Take Route 2 and Turn East at Ashley.

For The Winner

This is a replica of the solid gold watch charm to be awarded to the new hog-calling champion at Mt. Vernon on August 12. Come and win it.

Mid-West Conference at Saugatuck, Mich., to Present Many Subjects

The first Mid-West State Farm Bureau training school, to be held at Saugatuck, Mich., Aug. 16-20, will be a bell-ringer, according to announcement made recently from the office of the American Farm Bureau Federation.

Mrs. Chas. E. Sewell, chairman of the committee in charge of the school, announces that Dr. Carl Taylor, of the University of North Carolina, will be the principal speaker at the banquet, to be held the first night, Monday, Aug. 16. The general address on publicity will be made by S. J. Duncan Clark, Editor-in-chief of the Chicago Evening Post.

G. E. Metzger, director of organization, will speak on the "Art of Salesmanship Applied To Farm Bureau Needs," during the first day of the convention.

"Simple Rules For Effective Public Speaking" will be the special subject of R. E. Pattison Kline, of the Kline School of Effective Speech Training, Chicago. Lucius E. Wilson, another "imported" speaker, will discuss "Outlines of Modern Psychology As Related to the Art of Selling." Many other prominent speakers are billed.

The program will continue throughout the week, winding up with an open forum and summary on Friday afternoon. The meeting and conference is called especially for county advisers, organization directors, solicitors, and farm bureau workers. Reservations may be made through the American Farm Bureau Federation, 58 E. Washington St., Chicago.

Send 'Em In

Entries for the State Horseshoe Pitching Tournament must be sent to L. R. Caldwell, County adviser, Mt. Vernon, Ill., at once. Contestants should be at Mt. Vernon ready to play by 9:00 a. m., Thursday, Aug. 12.

WILL THEY COME BACK?

Samuel G. Smith and Reuben Bright shown above carried the silver cup back to McLean county in 1924 in the annual Horseshoe Tournament. Walter and Harry Torbert of DeWitt county won last year as well as in 1923. These four masters of the art are expected at Mt. Vernon Aug. 12 in a new duel for state honors. Ed. Torbert, father of Walter and Harry, and Joe Heskitt carried off the honors in 1920, 1921, and 1922. They may all be matched at the 1926 tournament. Will these old champions come back, or will a dark horse team put them all on the toboggan. It's worth a trip to Mt. Vernon to see this annual fight for supremacy. Don't miss it.

Kentucky's Champ.

Henry Cassell of Harrodsburg, Ky., is the champion hog-caller from the Bluegrass State, who is looking for other worlds to conquer. "We will challenge the best you have in Illinois for we think our man can lick anyone in the United States," writes Stuart Brabant, county agent at Harrodsburg. Brabant didn't state whether Cassel's favorite call is W-h-o-o-e-y, or S-o-o-e-y, but we have enough confidence in our coming state champion to pit him against Cassel and others in a National Hog Calling Contest, to be held at the International Livestock Exposition, Chicago, 1926.

Here is the Illinois score card, which will be used at the I. A. A. State Picnic, Aug. 12, for judging the hog callers:

1. Volume, loudness, or carrying capacity. This is important, because the voice must reach the ears of the hogs if they are in the back field 40
2. Appeal to the hog. The voice must be earnest and sincere, denoting honesty. It must carry conviction to the pigs that their supper awaits them 20
3. Variety. A varied call is more interesting and penetrating than a monotonous one given in the same key 20
4. Originality. The hog should know his own master's voice so he may not be fooled by impostors 10
5. Clearness and musical quality. A clear, musical call is much more enticing and appealing than a throaty one lacking music. Hogs enjoy music and happiness aids digestion. A musical call will bring them in quicker and with better appetite to enjoy their meal with profit to their owner 10

United States Leads In Fire Losses Per Capita Report Shows

Windstorm and hail insurance for horticultural crops will be the next type of insurance considered by the Farmers Mutual Reinsurance Co., according to V. Vaniman, field representative of the company. Demands are now coming on from over the state for such insurance. A survey of the new company recently completed by Vaniman shows that practically 20 per cent of all mutual companies in the state are now carrying blanket reinsurance.

The Dix Mutual Fire Insurance Co., according to Vaniman is now classifying property and allowing deductions on cost of insurance to property protected with lightning rods, fire proof roofs, and fire proof walls. This company had 124 policies with $147,670 of insurance in force back in 1890, and today there are more than 1200 policies representing $4,486,830 in force.

"One of the effective ways to encourage fireproofing is to lower the rate on buildings where some attention is given to fire protection," said C. B. Goodrich of Gibson City in commenting on differential in rates.

A special committee on fire waste and insurance of the United States Chamber of Commerce reports that the annual per capita losses from fire are more than three times greater in the United States than in France, the next highest country in fire loss. Here are the figures, taken from total losses in the years from 1912 to 1915 inclusive:

United States	$2.26	per capita
France	.74	per capita
England	.64	per capita
Norway	.55	per capita
Italy	.53	per capita
Sweden	.42	per capita
Germany	.23	per capita

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely to promote, protect and represent the business, economic, social and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

... Wesley Ave. ... Morris, Illinois, by the Illinois Agricultural Association. Edited by Department of Information, E. G. Thiem, Director, 608 South Dearborn Street, ... at the post office at Mount Morris, Illinois, under the Act of March 3, 1879. Acceptance for mailing at special rate of postage provided for in Section ... individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the ... ing an uncalled for or missent copy, please indicate key number on address as is required by law.

Plain Language

The Philadelphia Public Ledger takes up the ... aged in a ... t editorial reprinted in the ... go Tribune to denounce the presentation ... the recent fight at Washington by President Earl C. Smith and our editorial exposing the Foss Amendment subterfuge ... in the July issue of the I. A. A. RECORD.

We are accused of "playing politics," and "advancing the political interests of ex-Gov. Lowden and Gen. Dawes," of "price fixing" and wanting "Uncle Sam to buy us all a farm." As an example of unbelievable childishness expressing complete ignorance of the corn belt's interest in farm relief, this attempt at ridicule is unequaled.

The Illinois Agricultural Association never has set itself up as a political organization. It does not do so now. It is interested in no one's political fortunes. It does believe however, in the policy of protection for all agriculture included, or protection for none. The administration opposed this principle. Its opposition was aptly expressed in Secretary Mellon's letter to the last congress. We used plain language in denouncing such apparent provincialism. We are just a bit skeptical even now about the ... prospects of securing any worth make the farmer's dollar worth ... fellow's, until after 1928. If the Public Ledger editorial, conceived in ignorance, was ... representative of a large portion of the country, our skepticism would be complete for all time.

Thursday, Aug. 12

SOUTHERN Illinois is making grand preparations for a great entertainment at Mt. Vernon on Aug. 12. Here is an opportunity for Northern and Central Illinois folks to see Egypt, the fruitland of the Middle West, the longest settled area in Illinois, the bristling peach and apple orchards, and on top of all these a day of splendid entertainment and recreation.

Mt. Vernon is more than 100 miles north of the extreme south end of the state. It is located on paved Route 15 which may be reached from north and south by Routes 2, 25, and 1. It is on the direct route of the C. & E. I. R. R. between Chicago and Florida. A clean, shady tourist camp for picnickers who drive in the night before adjoins the picnic grounds. It will be a trip well worth while for those who have or have not seen Southern Illinois.

A Step Forward

THE recent inauguration of a collection service for cooperative ... by the Illinois Agricultural Co-operative Association may never cause a ripple, over the state and yet it represents a move aimed directly at one of the greatest needs of farmers' organizations, of all time.

... George Wicker finished examining the books of 65 farmers' elevators in Illinois he turned the ... on more than a half million dollars worth of accounts and notes receivable. Many were of long standing. The ratio of accounts receivable to net worth was ... per cent. He had uncovered ... son for it ... and failures of not a few ...

... Gen. ... said, results in a heavy financial burden and is the cause in most instances of disastrous conflagrations.

... collection service offered at cost without ... the personnel of the association was the result. Classifying accounts receivable according to age, sending out letters to debtors from headquarters, personal visitation for the purpose of making collections, and reporting back to boards of directors with recommendations for legal procedure will be methods employed to turn accounts into cash.

This service may not sell memberships in the farm bureau but it is a forward step in making farmers' business ventures successful.

Good News

ANNOUNCEMENT of the refusal of the Interstate Commerce Commission to grant western railroads an increase of five per cent in freight rates on agricultural products including livestock is good news for farmers throughout the Middle West. The American Farm Bureau Federation through O. W. Sandberg, director of transportation, and Fred Jackson, special attorney took the initiative in presenting figures and statistics showing the depression existing in agriculture, to the Commission. L. J. Quasey of the Illinois Agricultural Association gave valuable aid in the hearings.

Farmers are not opposed to the railroads earning 5¾ per cent interest on their investment, but they see no reason why the government should guarantee the carriers such a return through its ability to fix rates, when farmers are not so prosperous and are left to shift for themselves.

"These railways for six years have not earned, and are not now earning anything approaching a 'fair return' (5¾%)," says the Railway Age in a bitter condemnation of the Commission's decision, "and the commission offers no definite suggestions as an alternative to the proposed general advance of freight rates."

Hard luck, isn't it. Agriculture isn't even asking the government to fix prices so farmers may earn 5¾ per cent. All it wants is a little assistance to help manage the damaging surplus. The freight rate case reveals just another reason why farmers need a strong organization.

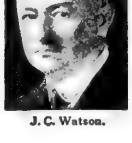
Organization Greatest Need—Lowden

"I am more convinced than ever that organization is the greatest need of the farmers of this country." This is the message ex-Governor Lowden had for more than 500 Illinois bankers at the banker-farmer field day held at Sinnissippi Farms, Oregon, on July 30.

Frank O. Lowden

Mr. Lowden, in his own vigorous way, drove home the point that the combined efficiency of the Danish farmer plus his inherent ability to organize and cooperate with his brothers, in producing and marketing his crops were responsible for the happy condition of agriculture in Denmark.

"The farmer's interests are your interests and anything you can do to help them will react to your benefit and the good of the country," said Mr. Lowden. "It is more necessary that you lend your aid first to agriculture rather than to industry, for when the farmer is prosperous there is prosperity for all." The ex-governor had returned from a tour through Denmark, and other Scandinavian countries only the day before the meeting.



In spite of the rain, the bankers went home pleased with the day and its practical lessons in farm management. The Illinois Bankers Association cooperated with the University of Illinois in arranging the events of the day.

Income Tax is Permitted by Present Constitution

By JOHN C. WATSON

Director, Department of Taxation and Statistics.

OPPOSITION to the pending revenue amendment is occasionally expressed on the ground that it permits a tax on income. It is true that it does permit a tax on income. This is the most hopeful and valuable feature in the amendment. As has been shown in previous articles, this is the only important source of fair taxation which has not been tapped in Illinois. It is the only source that can save real property, urban and rural alike, investment and home alike from the present menace and the eventual certainty of confiscation of values.

J. C. Watson.

Opposition to the pending revenue amendment, on the ground that it permits a tax to be established on income, ignores the fact that a tax on income is permitted by the present constitution. The foremost constitutional lawyers in the state hold that section 2 of Article IX, which has been in effect since the year 1870, gives the General Assembly authority to establish a tax on income. The section is as follows:

"The specifications of the objects and subjects of taxation shall not deprive the General Assembly of the power to require other subjects or objects to be taxed in such a manner as may be consistent with the principles of taxation fixed in this constitution."

There can be little or no doubt that "other subjects or objects" would be interpreted as including a tax on income.

An income tax under the provisions of the present constitution would differ sharply from an income tax under the terms of the proposed amendment.

Under the present constitution a tax on income could be passed by the General Assembly by a bare majority of the members of each of the two houses. The pending amendment would require a two-thirds vote of the members of each of the two houses.

Under the present constitution a tax on income would be uniform on all income alike whether large or small. There could be no exemptions, no offset of income tax against property tax to prevent taxation both of property and of the income produced by property, and no substitution of a tax on income entirely in place of a tax on property.

The pending amendment, if approved, will permit graduated or progressive rates on income, the fixing of limits below which the tax on income will not apply, the offsetting of income taxes against property taxes to prevent double taxation, and the substitution of a tax on income in place of part or all of a property tax, either all property or any class.

The pending amendment would permit a fair system of taxation. An income tax under the present constitution could not be fair. This is probably the leading reason why it has never been established.

Mt. Vernon, August 12, That's the Day

Oil and Gas Supply Companies Attract State-wide Interest

Knox County Company Incorporates For $50,000. If Farmers Must Help Themselves, This Is Our Way, Say Members

State-wide interest in the formation of cooperative oil and gasoline supply companies was evidenced in the recent series of meetings held by J. R. Bent of the Illinois Agricultural Association for the purpose of acquainting farm advisers, members, and others with the possibilities and limitations of this new project.

Since Hancock county started operating an oil and gas supply company more than two years ago and since Marshall-Putnam county made a very successful beginning less than a year ago, other counties have investigated and apparently have seen a new opportunity for another effective way to shorten the road from producer to consumer to help the farmer.

Meetings Throughout State.

Meetings under the auspices of the I. A. A. were held at Henry, Centralia, Springfield, Champaign and Rockford, within the past few weeks, at which half the counties of Illinois were represented. Knox county thought so well of the project that the farm bureau there organized a corporation with capital stock at $50,000. Fifteen thousand or more in cash already has been paid in and the new company is on the high road to a happy beginning.

"Since Congress has failed to give us any relief, we have decided to help ourselves," says the Knox county farm bureau members. "Almost every politician in Washington who opposed real farm relief measures has been preaching that the farmers should be more efficient and lower their cost of production. Thus we Knox county farmers have started out to do this by buying our own gasoline, kerosene, and lubricating oils on the cooperative basis."

Trucks Deliver Products.

Bulk stations will be located at convenient places in the county as rapidly as possible and trucks will deliver petroleum products to every member's farm, says the Knox County Farm Bureau Bulletin. Preferred stock at $25 per share bearing 7 per cent are being offered to farm bureau members to help finance the project.

For the man who buys his gasoline at filling stations, there will be pumps established in every town so he may use his own products.

The Marshall-Putnam Oil Company is in full operation, according to F. E. Fuller, county adviser, since each one of its stations has two truck drivers to deliver. A second driver was recently installed at McNabb, and a new service station is to be located soon at the Ford garage in Granville.

The Illinois Agricultural Association has drawn up a model set of "Articles of Incorporation" under the provision of the Cooperative Marketing Act. These are ready for distribution to everyone interested in the project.

Need Should Be Considered.

"Some counties are going to succeed while others may fail," said J. R. Bent in commenting on the probable outcome of the new venture. The degree to which success may be achieved, or failure encountered will depend primarily upon the need for such a cooperative company, the general interest in it on the part of farmers, local competitive conditions, the form of organization and the financial and "business set-up," and the experience, business-like character, and ability of the management.

The responsibility for the new companies organized will rest with the incorporators themselves, but the Illinois Agricultural Association is making a determined effort to give helpful information and advice to every county interested.

Pack 'em in and Head for Mt. Vernon.

78 Respond Already To Appeal For Farm Outings For Kiddies of Chicago's Slums

This Little Fellow Needs An Outing in the Country. Write and Tell Him to Come

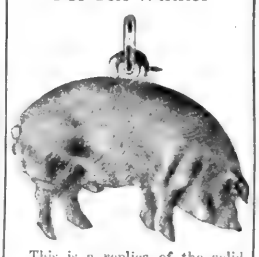
SEVENTY-EIGHT slum kiddies already farmed out through the I. A. A. for summer vacations—that's the record of the past two weeks. The United Charities of Chicago, with whom we are working in getting vacations for the poor children of the tenement districts report that they have many more children who have not been provided for. Here's an opportunity to be happy through making these unfortunate children happy for a couple of weeks this summer.

The United Charities deliver the children in clean clothes and come after them at the end of the vacation period. A card addressed to the Outing Secretary, Illinois Agricultural Association, 608 So. Dearborn St., Chicago, will make known your willingness to help in this splendid work. If possible, secure the aid of your neighbors so a dozen or more children can be delivered to the same town.

20 Counties Show Increase in Total Membership—Metzger

Twenty counties reorganized this year signed more members in the farm bureau than they did three years ago, according to G. E. Metzger, director of organization, who recently completed a survey of organization work throughout the state.

G. E. Metzger.



And a number of other counties which have completed or are about to complete their new drives for members report memberships approximately the same as three years ago. With the greater portion of the work completed for the new period, prospects for a similar or slight increase in membership over the total of three years ago are becoming more apparent each day.

Pulaski, Bond and Jackson counties started resigning members within the past two weeks, while Edwards and St. Clair counties will resign their memberships within the coming two weeks. By the end of August, Henderson, Schuyler, Richland, and Scott counties will start their campaigns for members for the new three-year period.

Washington county in Southern Illinois, one of the few counties in Illinois which never has had a farm bureau, has its quota of 300 members nearly enrolled and plans to establish an office and employ a county adviser by September first. When Washington comes into the fold, the total will be swelled to 93 county farm bureaus in the state. Washington County Farm Bureau officials will hold a meeting at Nashville on Aug. 4 to complete final arrangements for the official launching of their new organization.

For The Winner

This is a replica of the solid gold watch charm to be awarded to the new hog-calling champion at Mt. Vernon on August 12. Come and win it.

Mid-West Conference at Saugatuck, Mich., to Present Many Subjects

The first Mid-West State Farm Bureau training school, to be held at Saugatuck, Mich., Aug. 16-20, will be a bell-ringer, according to an announcement made recently from the office of the American Farm Bureau Federation.

Mrs. Chase E. Sewell, chairman of the committee in charge of the school, announces that Dr. Carl Taylor, of the University of North Carolina, will be the principal speaker at the banquet, to be held the first night, Monday, Aug. 16. The general address on publicity will be made by S. J. Duncan Clark, Editor-in-chief of the Chicago Evening Post.

G. E. Metzger, director of organization, will speak on the "Art of Salesmanship Applied To Farm Bureau Needs," during the first day of the convention.

"Simple Rules For Effective Public Speaking" will be the special subject of R. E. Pattison Kline, of the Kline School of Effective Speech Training, Chicago. Lucius E. Wilson, another "imported" speaker, will discuss "Outlines of Modern Psychology As Related to the Art of Selling." Many other prominent speakers are billed.

The program will continue throughout the week, winding up with an open forum and summary on Friday afternoon. The meeting and conference is called especially for county advisers, organization directors, solicitors, and farm bureau workers. Reservations may be made through the American Farm Bureau Federation, 58 E. Washington St., Chicago.

Send 'Em In

Entries for the State Horseshoe Pitching Tournament must be sent to L. R. Caldwell, County adviser, Mt. Vernon, Ill., at once. Contestants should be at Mt. Vernon ready to play by 9:00 a. m., Thursday, Aug. 12.

WILL THEY COME BACK?

Samuel G. Smith and Reuben Bright shown above carried the silver cup back to McLean county in 1924 in the annual Horseshoe Tournament. Walter and Harry Torbert of DeWitt county won last year as well as in 1923. These four masters of the art are expected at Mt. Vernon Aug. 12 in a new duel for state honors. Ed. Torbert, father of Walter and Harry, and Joe Heskitt carried off the honors in 1920, 1921, and 1922. They may all be matched at the 1926 tournament. Will these old champions come back, or will a dark horse team put them all on the toboggan. It's worth a trip to Mt. Vernon to see this annual fight for supremacy. Don't miss it.

Kentucky's Champ.

Henry Cassell of Harrodsburg, Ky., is the champion hog-caller from the Bluegrass State, who is looking for other worlds to conquer. "We will challenge the best you have in Illinois for we think our man can lick anyone in the United States," writes Stuart Brabant, county agent at Harrodsburg. Brabant didn't state whether Cassell's favorite call is Whoo-oo-ey, or Soo-ey-ey, but we have enough confidence in our coming state champion to pit him against Cassel and others in a National Hog Calling Contest, to be held at the International Livestock Exposition, Chicago, 1926.

Here is the Illinois score card, which will be used at the I. A. A. State Picnic, Aug. 12, for judging the hog callers:

1. Volume, loudness, or carrying capacity. This is important because the voice must reach the ears of the hogs if they are in the back field 10
2. Appeal to the hog. The voice must be correct and meet almost hoggish requirements. It must carry conviction to the pigs that their supper awaits them 20
3. Variety. A varied call is more interesting and penetrating than a monotonous one given in the same key 25
4. Originality. The hog should know his own master's voice so he may not be fooled by imposters 10
5. Clearness and musical quality. A clear musical call is much more welcome and appealing than a throaty or lacking music. Boosters, ho's and happiness add color. A musical call will bring them in quicker and will better succeed in getting their meal with a shout to their owner 35

United States Leads In Fire Losses Per Capita Report Shows

Windstorm and hail insurance for horticultural crops will be the next type of insurance considered by the Farmer Mutual Reinsurance Co., according to V. Vaniman, field representative of the company. Demands are now coming on from over the state for such insurance.

A survey of the new company recently completed by Vaniman shows that practically 20 per cent of all mutual companies in the state are now carrying blanket fire [illegible]

The Dix Mutual Fire Insurance Co., according to Vaniman, is now classifying property and allowing reduction in cost of insurance to property protected with lightning rods, fire proof roofs, and fire proof walls. This company has 524 policies with $1,147,670 insurance in force back in 1890, at which time there are more than 12,000 policies representing $4,486,[illegible]

"One of the [illegible] encourage [illegible] the rate on buildings where fire attention is given to [illegible] tion," said C. B. Gwinn [illegible] commenting [illegible] in the

A [illegible] on fire [illegible] and [illegible] the United States Chamber of Commerce [illegible] per capita loss [illegible] fire losses more than [illegible] interest in the United States this [illegible] the next highest [illegible] loss. Executive Committee Met July 9; Report on Theft, Life, Auto Insurance; Poultry Co-op To Be Aided by Solicitors; Next Meet Aug. 11

Here are the high spots from the monthly meeting of the Executive Committee held on July 9 in Chicago, at which all members were present, as follows:

Wm. Webb, Plainfield; Geo. F. Tullock, Rockford; C. E. Bamborough, Polo; Wm. H. Moody, Port Byron; B. H. Taylor, Rapatee; A. R. Wright, Varna; Frank D. Barton, Cornell; R. F. Karr, Iroquois; J. L. Whisnand, Carleston; Charles Borrett, Havana; Samuel Sorrells, Raymond; Frank Oexner, Waterloo; Charles Marshall, Belknap; R. K. Loomis, Makanda; Charles R. Finley, Hoopeston; H. Fahrnkopf, Bloomington (McLean County); Earl C. Smith, Detroit (President); Geo. A. Fox, Sycamore (Secretary); E. A. Cowles, Chicago (Treasurer).

1. Secretary Fox reported that investigations were still being made of possibilities in theft, life, and automobile insurance for farm bureau members. Mr. Donald Kirkpatrick discussed the insurance program at length. It was the opinion of the committee that the officers, together with Mr. Tullock, chairman of the Financial Business Service Committee, continue the investigation.

2. Treasurer Cowles' report showed total current assets of the association at $183,293.50. A balance of $7,676.81 still remains in the Illinois Farm Relief Fund. Total assets including long term loans due, office equipment, deferred charges, etc., amount to $280,823.04. Liquid assets in the form of cash, Liberty Bonds, and Federal Land Bank Bonds amount to approximately $125,000.

3. President Smith reported on a conference at Chicago with representatives of the Chicago, Indianapolis, Peoria, St. Louis, and the National Livestock Producers at which problems of marketing livestock through cooperative channels were discussed. He stated that another conference was scheduled for Friday, July 16.

4. Mr. Matt Grennan of Whiteside County, Ill., presented a marketing plan, which he devised for the purpose of solving the agricul[tural] problem. The suggested dec[laration] was discussed at the meeting was brought up and [an] additional paragraph, prepared by Mr. Kirkpatrick, was read by Sec. Fox. Action on same was deferred until the next meeting.

5. Mr. Perry Crane, former Secretary of the Indiana Farm Bureau Federation demonstrated the use of an automatic fire extinguisher for use in rural districts. The matter of handling the extinguisher through the I. A. A. was referred to the Committee on Financial Business Service.

6. Moved by Mr. Sorrells, seconded by Mr. Finley that the next meeting of the Executive Committee be held at Mt. Vernon on Wednesday, August 11.

7. Secretary Fox read the following resolution from the 24th district.

WHEREAS, certain counties in this the 24th District are proposing to develop a cooperative poultry and egg marketing association, and

WHEREAS, each and every member of this association will pay his Farm Bureau and to the I. A. A. a substantial service charge, or will maintain himself as a member of his County Farm Bureau and the I. A. A., and

WHEREAS, non-Farm Bureau members are evidencing keen interest in this association and have already indicated a decided preference to join the Farm Bureau and the I. A. A. in lieu of paying this service charge, and

WHEREAS, the organization of this marketing association appears certain to result in strongly increasing the present Farm Bureau membership in the counties interested,

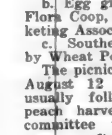
NOW, THEREFORE, be it resolved that we request and urge the I. A. A. to cooperate in the organization of the Flora Poultry Producers Association by furnishing I. A. A. solicitors on the same basis as for a Farm Bureau membership drive—for signing memberships directly in the marketing association and incidentally signing them also in the Farm Bureau and the I. A. A.

MOTION—Mr. Moody—

That the officers of the I. A. A. be authorized to negotiate an agreement with Farm Bureaus interested in the promotion of the Flora Poultry Producers Association to pay the Flora Poultry Producers Association $5 for each new Farm Bureau member secured by solicitors for the Poultry Producers Association, provided that two-thirds of the $5 shall be charged against County Farm Bureau dues where the County Farm Bureau dues are $10 and one-third charged against the Illinois Agricultural Association dues, and provided further that no money is to be paid until the first payment on the new Farm Bureau members' dues has been received.

Seconded—Mr. Wright—Roll call vote taken resulted in motion being carried unanimously.

Motion was made and duly seconded to adjourn.



Senator Watson to Speak at Picnic

(Continued from page 1, col. 5.)

b. Egg grading and packing by Flora Coop, Egg and Poultry Marketing Association.

c. Southern Illinois wheat grades by Wheat Pool.

The picnic was purposely held on August 12 because that date is usually followed closely by the peach harvest, and the program committee wanted visitors from northern and central Illinois to see the crop before it is harvested. After the peach harvest begins, it is nearly impossible for growers to break away even for a day to attend a picnic.

In a letter received from A. B. Leeper, of the Illinois Fruit Growers' Exchange, just before going to press, Leeper states that the Exchange expects to have a carload or more of peaches at the picnic for free distribution and sale, if enough ripe fruit can be had. The peaches will be brought up from the extreme south end of the state where the harvest begins a week or more earlier than at Mt. Vernon.

According to present plans, the speaking program will be held out in the open park under a canopy of beautiful oaks and elms where amplifiers tied to trees throughout the wooded amphitheatre will carry the message to every member of the throng.

The boys and girls will have the leadership of Eddie Walkup, professional director of organized recreation from Centralia. He will supervise them in stunts, swimming, races, games, and all the other things that kiddies enjoy at picnics.

The park is provided with tables and benches for the picnickers' lunch baskets. There are tennis courts available for lovers of the sport, croquet courts for the older folks, swings, slides, and trapezes for the youngsters, and a clean swimming pool lined with cement for young and old alike.

The Horseshoe Tournament Committee plans to build ten pitching courts so the games may be played and the championship decided well before the end of the day. A schedule will be worked out so the counties matched will not need to play off more than one series of games. Last year some difficulty was experienced in rounding up players after they had been defeated. This will be avoided this year according to the committee, under the new arrangement.

A baseball diamond is now being made ready for the championship game. As we go to press, the semi-final farm bureau baseball schedule is being played off, with a five cornered fight on between Marshall-Putnam, McLean, Morgan, Brown, and Henderson counties.

Order Phosphate Now

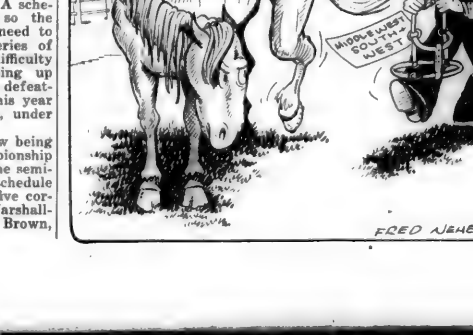
This is the time of year to get in your orders for rock phosphate, says J. R. Bent of the Farm Supply Department. The volume will probably be larger than ever and phosphate companies are making an effort to get ready for heavy shipments for the early fall deliveries.

Orders may be placed direct with the companies or through the county farm bureau. Farm bureau members through certificates furnished by the local organization receive a discount of 50 cents per ton on all phosphate orders which on a minimum size car of 30 tons amounts to $15, or farm bureau dues for one year.

W—H—O—O—E—Y

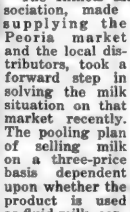
Here they are again. This male quartette was heard a mile away in the greatest Hog-Calling-Contest of all time at Taylorville last year. Left to right they are V. E. Robison, the state champion from Morton in Tazewell county, E. G. Brick of Cumberland county, Emery Erwin of Menard county, and Henry Brown of Sangamon county. Mr. Robison won the solid gold miniature pig watch charm shown elsewhere in this issue for his prowess last year.

Southern Illinois claims to have louder, clearer, more musical, and more appealing hog callers than elsewhere in the state. The champion at Mt. Vernon is expected to challenge the world. Don't miss this event which is to be held at noon on the big day, Aug. 12.



Will They Become Twice Champions?

Marshall-Putnam's 1924 champions are riding high, wide, and handsome again this year with a record of every game won. Last year they were put out of the running by Tazewell's crack nine, the 1925 champions, but this year the tables are turned in district four. Henderson, Brown, and Morgan counties are having a tussle to decide the Western Illinois championship as we go to press.



McLean expects to take a shot at Marshall-Putnam by July 31. According to dope experts, Marshall-Putnam will play in the big game at Mt. Vernon taking on the winner in the three cornered fight between Brown, Morgan and Henderson.

Determined to Halter Him

Peoria Inaugurates New Epoch in Co-op Milk Marketing Here

Producers and Dealers Join in Working out a Better Plan for Selling Milk. Dairy Co-ops in Illinois Succeeding

A. D. Lynch.

The Illinois Milk Producers Association, made up of dairymen supplying the Peoria market and the local distributors, took a forward step in solving the milk situation on that market recently. The pooling plan of selling milk on a three-price basis dependent upon whether the product is used as fluid milk, condensed or powdered, or for making ice cream and candy, cheese, or butter, was adopted at a meeting between the producers and dealers at Peoria on July 15.

The adoption of this plan, as recommended by the committee which studied the Detroit, Pittsburgh, and Philadelphia cooperative marketing plans, marks a new epoch in the history of cooperation in Illinois. The program includes leaving the distribution in the hands of the dealers, with the latter cooperating with the dairymen in arriving at a fair price.

A joint committee, composed of like numbers of producers and dealers, will determine the prices for the three classes of milk. Provision is made for arbitration in case of a deadlock.

The distributors agree to pay the association five cents per 100 pounds on all milk purchased from members, and the same check-off to be made on non-members and paid to a dairy council for the purpose of improving quality and increasing consumption.

The entire program, submitted by the special investigating committee, was unanimously adopted and a new group, composed of Bruce Roszell, Eugene Chapin, Fred Zimmerman, Edward Heinz, Wilfred Shaw, and A. D. Lynch of the Illinois Agricultural Association, was appointed to work out the details of the cooperative plan.

Rock Island Co-op Growing.

The Rock Island Cooperative Dairy Company has made more progress toward achieving financial and business success during the past year than at any time since its beginning. Starting only three years ago, without capital or business, this farmers' owned and controlled company invested $55,000 in a building and equipment, and has built up a thriving and growing business amounting to $15,000 a month.

It now has nine wagons, and four wholesale trucks in operation. It is leading the city in quality and service, and recently has increased the price 15 cents to producers without raising the cost to customers.

Quincy Co-op Thriving.

The Quincy Cooperative Milk Producers' Association has been successful from the beginning. The last audit showed a total net worth of $55,280.06 with a surplus of $25,935.06.

Bankers' Prexy

W. B. Crawford

W. B. Crawford, vice-president of the West Frankfort Bank and Trust Co., of West Frankfort, Franklin county, is the new president of the Illinois Bankers' Association elected at their annual meeting at Springfield in June.

Crawford rose to prominence as chairman of the Illinois Bankers' State Protection Committee. He is a young man who has been active in the banking business in Franklin County since 1912. Crawford is the 37th president of the state association.

LAND AND HOME OWNERS JOIN HANDS TO LIFT HEAVY TAX BURDEN

Bunk About Tariff Aiding Agriculture Exploded by Experts

Analysis By Leading Economists Reveals That Fordney-McCumber Tariff Bill Figures Little In Helping Farmers

Propaganda being broadcast throughout the Middle West purporting to show how the tariff helps the farmer as much as the manufacturer and industrialist is so false and misleading that the Department of Information has undertaken to reveal the truth about the tariff.

One of the most pernicious pieces of propaganda is an article in "Livestock Markets," an organ circulated by a commission merchant, Chicago, regarding the farmer and the tariff. The writer, S. W. McClure, an Idaho sheep feeder, mentions a great many articles including wheat, corn, barley, wool, potatoes, butter, sugar, eggs, flaxseed, beans, etc., protected by a tariff, and also a number of others which farmers buy and consume that are on the free list, namely, agricultural implements (does not include cream separators, typewriters, and linotype machines), copper ore, iron ore, crude rubber, petroleum, refinery products, hides, leather, boots, shoes, potash, shingles, lumber and timber, newprint paper, barbed wire, coal, binder twine, raw silk, cotton, raw furs.

Tariff Doesn't Help.

The assertion is made that because the former products are protected by a tariff, and the latter are on the free list, the farmer receives as much benefit from the tariff as anyone.

This will do for a superficial argument but unfortunately for the farmer the tariff isn't worth a continental so long as his products are on an export basis. Many of the farmer's products are sold on a world market, namely most of his wheat, corn, meat products, cotton, cereals, etc.

It will be noted that the articles mentioned on the free list are nearly all raw materials or productive equipment, and so are a boon to the manufacturer rather than to the farmer and consumer.

It is easily understood why McClure of Idaho so stoutly defends the tariff when it is known that the benefits of the tariff are practically confined among farmers to sheep growers who get the benefit of a high tariff on wool, to a lesser extent dairymen, and to a larger extent sugar beet growers.

The following statement taken from the paper of Prof. B. H. Hibbard, noted economist from the University of Wisconsin, which was read before the annual meeting of the American Farm Economic Association last year is illuminating on this particular point. Here it is:

What Hibbard's Study Shows.

"The greatest of all legislative results, however, so far as general income of a class, or classes, of people is concerned is that providing a payment for the privilege of bringing goods into the country. The tariff receipts are about $450,000,000, about one-third of which are on agricultural products mainly on sugar and wool. *While it appears on the face of it that the farmers are getting a good thing out of certain tariff protection, the total amount received in increased income is estimated to be $125,000,000 because of the tariff which, however, goes to a relatively small number of farmers.* The whole group of farmers pays in increased prices of goods, due to tariff on agricultural products, around $95,000,000 leaving as the net gain to agriculture about $30,000,000 or one dollar per capita for all farm people.

"On steel alone the farmers pay a tariff bill, including the additional charges accumulated along the way between producer and consumer of

Time to Equalize the Load!

Lower Freight Rate On Peaches Secured For Growers in Egypt

A NEW low freight rate on peaches shipped from points on the Illinois Central south of Odin to Cairo inclusive became effective last week.

L. J. Quasey.

The reduction in rates from $1.49½ per 100 to 59½c per 100 pounds came about following word received from the New Orleans representatives of the Illinois Fruit Growers Exchange that Southern Illinois quoted a much higher rate than points across the Wabash River in Indiana.

A. B. Leeper, manager of the Illinois Fruit Growers Exchange, immediately got in touch with L. J. Quasey, director of transportation, advising him of the discrimination against growers in Southern Illinois.

The I. A. A. representative communicated with the Illinois Central and subsequently with the Southwestern Tariff Bureau at Atlanta, Ga., and thanks to the energetic efforts of the I. C. R. R. the order for the lower rate was issued.

This lowering in the rate on peaches from 1.49½ to 59½ cents per 100 pounds will effect a saving of thousands of dollars to peach growers throughout Southern Illinois. It will enable shippers in that section to compete for markets with growers elsewhere who heretofore have enjoyed a lower freight rate on this commodity.

Can You Make a Good Speech? Here Are the Rules from an Expert

R. E. Pattison Kline, Director of Kline School for Effective Speech Training, Says Everyone Can Become An Able Speaker

WILLIAMS JENNINGS BRYAN was a great national figure not because of what he said, but how he said it," declared R. E. Pattison Kline, public speaking expert at the Mid-West Organization School at Saugatuck, recently.

"The spoken word can be made 1,000 times more effective than the written word," said Kline, "because the speaker may convey ideas by his eyes, his body movements, his hands, and by the inflections in his voice.

"Ability to speak effectively is the result of training. The first time Gladstone, the great orator, appeared in public his speech was a complete failure. He was hissed by the audience. He determined to make people respect his thoughts and began regular training by reading out loud and practicing his speeches many times before they were delivered.

"Abraham Lincoln, likewise, became an effective speaker after long arduous practice in speaking out loud in private. The first time he addressed an audience he was so ungainly both in speech and figure that people laughed at him. He became one of the most effective speakers of his day."

Kline makes the following suggestions for effective speech:

Speak distinctly.

Make your speech attractive. Make it alive, active. Put pep into it. No one likes a dead one.

Be positive. Adopt a note of authority.

Dominate your audience.

Learn to be direct. Talk to people, not at them.

Be spontaneous and so full of your subject that the words pour out fluently.

Never use a comedy story, or joke, in a serious speech. Laughter and applause divert attention from what you are saying. Don't try to get applause if you want people to keep interested in what you are saying.

Use plain language, short words, and be accurate in your choice of words. Profanity and coarse slang are detrimental to a good speech.

Learn to speak from an outline. Don't write out your speech unless necessary for press purposes.

Answer the questions, who, where, what, why, how, and when in your speaking.

Divide your speech into introduction, discussion, and conclusion, and make the introduction and conclusion very brief.

Modulate your voice, don't speak in a monotone.

Don't talk too loud, cultivate a resonant voice with tone quality.

Look into the eyes of your audience and they will not see your gestures.

Be aggressive. Lean toward your audience, with one foot advanced, hands at the side when not making gestures.

Sentiment For Revenue Amendment Grows Throughout State As People Learn Facts Regarding Inequality

Two Thirds of Downstate Counties Are Organized With Representatives In Each District to Work For Vote In November Elections. Determined to Change Present Condition Where 37 Per Cent of State's Wealth Pays 85 Per Cent of Taxes.

BATTLE lines are drawing hard and fast as the fight to put over the revenue amendment to the state constitution draws near. A. C. Everingham, legislative representative of the Illinois Agricultural Association who is working also with the organized real estate boards of the state has been in two-thirds of the downstate counties, and by the middle of September will have spoken before 30 county farm bureau picnics.

"Sentiment is rapidly crystallizing in favor of the amendment to the constitution," said Everingham, in a recent interview. "I hear 100 opinions expressed in favor of the tax amendment to one against it. I never have spoken to audiences more keenly alive and more attentive to my explanations of the need for tax reforms.

"We have county organizations set up in two-thirds of the downstate counties, and before the November elections we shall be 100 per cent organized," he declared.

"These county organizations are made up of representatives from the farm bureaus, real estate boards, women's clubs, bankers' associations, labor organizations, and people from almost every walk of life. We have on these county committees from one to five representatives in every voting precinct whose purpose is to disseminate information and urge people to vote on the proposal."

Speaks to 2500

At the Richland County Farm Bureau picnic last week, Mr. Everingham spoke, to 2,500 people assembled in the grandstand at the fair grounds. At Moline, recently, he addressed 200 men and women. In the group was represented every civic activity and organization in this manufacturing city. At the close of the meeting, the proposed amendment was unanimously endorsed.

"The opposition to the tax amendment expressed by John Glenn, secretary of the Illinois Manufacturers' Association is not representative of the business and industrial interests throughout the state," said Everingham.

"Everywhere I go I find more business men in favor of the proposed amendment than against it." Everingham has spoken to thousands of business men at luncheon clubs in addition to his appearance at county and district picnics.

Objections Not Reasonable

The objections to the amendment voiced by John Glenn and others are not based upon fact or sound reason," declared Everingham.

"One argument advanced is that the proposed amendment would make it possible to tax manufacturers out of business. My answer to that spurious attack is that if the present constitution were enforced and all industrial properties were

(Continued on col. 1, page 3.)

Cope Gets Check For $55.18

W. L. Cope of Marion county is $55.18 ahead as a result of more than a year's work on the part of the Illinois Agricultural Association transportation department in collecting a freight overcharge claim of two years' standing.

On September 6, 1923, Mr. Cope consigned a load of pears through the Illinois Fruit Growers' Exchange from Tonti to Alma, to finish loading, and on to Milwaukee. They were then reconsigned to Marion, Wisconsin.

This movement caused quite a controversy in the application of rates, the shipper being charged with a combination of locals also a combination on the refrigeration.

Claim originally was filed with the Federated Fruit and Vegetable Growers but they were able to collect only $9.51 from the railroad and so gave it up.

The Fruit Exchange turned it over to the I. A. A. The transportation department made a thorough check on the rates and took the matter up through the general offices of the railroad. The department was finally able to convince the railroad of their error by referring them to the various tariffs applicable.

Published once a month at 404 North Wesley Ave., Mount Morris, Illinois, by the Illinois Agricultural Association. Edited by Department of Information, E. G. Thiem, Director, 608 South Dearborn Street, Chicago, Illinois. Entered as second-class matter October 20, 1925, at the post office at Mount Morris, Illinois, under the Act of March 3, 1879. Acceptance for mailing at special rate of postage provided for in Section 412, Act of February 28, 1925, authorized October 27, 1925. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record. Postmaster: In returning an uncalled for or missent copy, please indicate key number on address as is required by law.

Tariff Bunk

MIS-STATEMENTS and misleading propaganda about the protective tariff and its effect on farm prices have been bobbing up periodically since the corn belt first announced its intention to make the tariff effective for agrictlure.

The old line protectionists sound the trumpet and rally around the flag whenever an innocent bystander raises the question, "Is the tariff fair to all classes; does the farmer share equally in its benefits?" Their answer is a broadside characterized more by its volume than its accuracy. Probably the most flagrant illustration was the tariff bunk in President Coolidge's Chicago speech. The jokester who supplied this information by a wonderful series of deductions, concluded that the cost of manufactured goods to the farmer was raised only two to three per cent as a result.

The story on page one in this issue is based upon the findings of two of the nation's leading economists following a distinterested study and analysis of the Fordney-McCumber tariff schedule. The information is untainted by political interest. The farmer is not disposed nor ready to swing the axe on the tariff but he would like to see an honest attempt made by the administration to accord its benefits to farm products.

A Hard Job

WILL ROGERS, cowboy comedian, says the trouble with the farmer is that there are too many middlemen between him and the consumer. "Cut out the middle, bring the two ends together, and the farmers' trouble will be solved," is his advice. Many a great truth has been said in jest. This is an example. Our expensive system of distribution, however, has a bull dog's grip on the country and the cutting out process is a disagreeable and difficult task.

Senator George W. Norris of Nebraska, in an article on "The Tariff and the Farmer," published in the current issue of "The Nation," says the trouble with agriculture is the inequalities of the tariff and the high cost of distribution. His suggestions for correcting the latter condition is expressed as follows:

"Even if the farmer were given the full benefit of the tariff, he would still be suffering under handicaps not applicable to other classes of citizens. The cost of distribution in many of our principal food products is greater than the cost of production. The result is that the farmer frequently gets too little to pay him for his investment and his labor, while the consumer pays a price so high as to be almost prohibitive. There is no doubt that this excessive cost of distribution decreases greatly the amount of consumption. . . . The farmer ought to get more and the consumer ought to pay less. Cooperative organizations of producers and consumer ought to be encouraged by law. It will require legislation to bring about the elimination of this great army of middlemen. Our producers as well as our consumers are so widely scattered and so difficult to organize that nothing can bring about the elimination of this waste except the strong arm of the Government."

Ten Commandments of Business

By George R. Wicker

1. Treat every person with the same honesty, fairness and consideration that you would like for yourself. Gold and silver, stocks and bonds, and other forms of property are much to be desired, but a profitable business is built upon a good reputation.
2. Do not be jealous of your competitors and do not look with covetous eyes upon their business. The public is discriminating and will reward you according to your merits.
3. Do not exaggerate, misrepresent or speak with a false tongue and do not resort to unfair or deceptive practices, lest your last days be lived in isolation and reproach.
4. If you would keep your friends and your money be sparing with the extension of credit. If you must transact your business on a credit basis conclude your sale with a definite understanding regarding settlement.
5. Be conservative in your effort for gain, for verily I say unto you that the skids to the bankruptcy courts are greased with the oil of speculation.
6. Render unto Cæsar the things that are Cæsar's, and be honest in your obligation to the Government, since the tax collector is a necessary evil. Look upon his coming cheerfully for the Government loves a cheerful taxpayer.
7. Be public spirited. Live agreeably with other people and take pleasure in helping to provide for the public comfort and convenience of the multitude, for in the performance of good deeds you shall prosper.
8. Be prompt in the payment of your accounts, for the virtue of a good credit is multiplied in the prompt settlement of your obligations.
9. As you hope for gain in your own business do not deny a just wage or fair profit to those who serve you.
10. Keep your own house in order. Life is uncertain and death in its coming knows neither time nor season. Keep your records as for the Day of Judgment, and it shall be well with you and your children.

Shall We Play Ostrich?

THE nation-wide attention and publicity given to the plan for improved management of farmers' elevators devised by the Illinois Agricultural Association through George R. Wicker, director of business service, has resulted in much favorable comment from many sources.

The I. A. A. plan would coordinate and strengthen the entire farmers' elevator movement by placing the management of groups of elevators in the hands of top-notch experienced men. It would give the efficient manager greater responsibility in handling the business transactions of two, four, six, eight, ten or even more elevators. There would be local managers in each elevator working under the group manager. But authority would be centralized. Overhead expense would be reduced by making unnecessary a high-priced manager at a small elevator. Successful methods and practices based on experience would be followed.

The plan is among the most constructive suggestions ever offered. It is based on authoritative information secured from the audits of 65 downstate farmers elevators. It would go far to stop losses and bankruptcies which audits show are all too frequent.

And yet, "keep it dark, soft pedal the shady side, don't mention the losses," is the advice of one manager. It will hurt us and the elevator movement, he says; what we need is optimism and boosters. Forget the group management plan, we are admonished.

Leave the rotten apple alone, put on the lid, and trust to luck to save the rest of the barrel. Shall we poke our heads in the sand like the ostrich, or shall we rout the danger by a bold, common-sense attack? Write your own answer.

Why Farmers Should *Support* the Tax Amendment to Illinois Constitution

(To be voted on in November, 1928)

1. Real estate, although less than one-half—many say less than 40 per cent—of the property in the state, is now paying about 80 per cent of all of the taxes for most purposes.
2. Tangible property, although probably not more than one-half of the property in the state, is now paying more than 92 per cent of all the taxes for most purposes.
3. A minority of the people of the state are now paying all of the taxes for most purposes.
4. Owners of some kinds of property easily can and do add their taxes to the prices of their services or products. Owners of other kinds of property, notably land, cannot shift their taxes to others to pay.
5. Owners of mortgaged property are now paying double or multiple taxes. They pay taxes not only on their equities, but also on the value of the mortgages, and pay a higher rate of interest on taxable mortgages whether the mortgages pay taxes or not.
6. Lack of personal interest on the part of most people in the economical and efficient use of tax moneys, and their belief that they are paying no taxes of any kind, promote extravagance and a rapid increase of deferred taxes in the form of bonded indebtedness.
7. Taxes are rapidly increasing in Illinois partly because the population is increasing, but chiefly because of the demand for new forms of service.
8. Under the present constitutional limitations none of the inequalities of the present taxing system described above can be fairly or properly corrected. The proposed amendment is a grant of power to the General Assembly, enabling it from time to time to correct inequalities in taxation and to establish a modern and equitable system of taxation.

Earl C. Smith

President, Illinois Agricultural Association.

[Brief articles in support of the points stated above will be printed in later issues of THE RECORD. Questions relative to the proposed tax amendment are invited and will be answered through THE RECORD.]

Sam Thompson Back From 3,000 Mile Trip Through Eight States

"The Farm Bureau is taking hold of the thinking people more than at any other time in its history," said Sam H. Thompson, president of the American Farm Bureau Federation before the recent Mid-West Organization Conference at Saugatuck, Mich.

S. H. Thompson

"In talking to thousands of farmers and business men throughout the western states of California, Oregon, Washington, Wyoming, Utah, Nevada, Kansas, and Missouri, I am more convinced than ever that farmers themselves as well as business men are coming to realize the needs of agriculture, and the necessity for an effective policy to bring back farm prosperity," said Mr. Thompson.

"And wherever I went, all interests are looking to the farm bureau as the great American agricultural institution to lead the way in securing the necessary aid," he said.

Sentiment for Amendment Grows

(Continued from page 1, col. 5)

assessed at their true valuations, the burden to industry would be enormous.

"The fact is that in some localities, tools, equipment, and tangible property owned by manufacturers is assessed at only around two per cent of its true value. The work of John C. Watson, statistician for the I. A. A., has shown that industrial properties in most counties are assessed far below their value.

Land and Home Owners Suffer

"The farmers already are being taxed off their farms, and home owners are being taxed out of their homes. The ownership of real estate, and even homes, is no longer considered desirable in many towns and cities because of the tax burden.

"In the City of Chicago real estate taxes are out of reason and rents are so high in desirable neighborhoods as to be almost prohibitive to people in moderate circumstances. The farmer and the home owner is the sufferer because he is not in a position to dodge taxes.

"No one wants to tax the manufacturer out of business, and moreover legislatures do not do what no one wants done. It is ridiculous to say that the legislature will place an undue burden on such interests."

The argument has been advanced that the amendment would give too much power to the legislature. The revenue amendment will not give the legislature any power it already does not have except to adjust and equalize taxes.

The legislature under the present constitution may impose an income tax, but if this were done it would serve merely as a double tax. It would not alleviate the present intolerable conditions. If the proposed tax amendment is passed, however, the legislature may remove some of the burden from farm lands and real estate, pass an income tax, and so equalize the load between different classes of owners.

If the amendment goes through, a two-thirds vote of the legislature will be necessary to pass any new tax laws. The two-thirds rule will safeguard against the passage of legislation not for the people's interests. If we can't trust one-third of our representatives to give us good laws, then we may as well abandon democratic government.

The state of New York adopted a state income tax years ago of one, two, and three per cent, depending upon the amount of income, the larger incomes being taxed more than the smaller. In that state there is no longer the intolerable spectacle such as obtained in Illinois where 37 per cent of the state's wealth bears 85 per cent of the tax burden.

I. A. A. Collects $13,502 Claims For Chicago Producers

Twelve hundred and forty-six loss and damage claims totaling $40,012.90 have been filed for member shippers of the Chicago Producers Commission Association since the I. A. A. transportation department began work for the Producers a year ago.

The total already collected amounts to $13,502.45 while more than $25,000 in claims are still outstanding.

The Chicago Producers through an arrangement made a year ago secured the aid of the Transportation Department of the Illinois Agricultural Association at a nominal figure to help in settling claims and overcharges.

The work of our transportation department for the Producers has attracted wide attention and a letter from the St. Paul Cooperative Commission Co., received a short time ago at the Producers office here, requested information as to how they were handling this work with such effect.

This department of the I. A. A. has had six years of successful experience, has made contacts with railroad officials and tariff bureaus throughout the country, and has saved thousands of dollars to the farmers of Illinois through freight rate reductions, and the collection of overcharge and damage claims.

Since starting work for the Producers, the department has devoted much attention to the improvement of conditions at local shipping points, has succeeded in getting new stock yards built, has had yards repaired, water installed in them, shade provided, while at countless stations the scales have been repaired through their efforts.

In addition the department has secured transit privileges on cattle and sheep from many western points. Thus feeders have been enabled to unload their stock, feed and fatten them at their farms, and reship them to market at a substantial saving in freight charges. This amounts to as high as $40 a car in some cases.

All this service is handed on down to customers of the Association without additional charge.

Lee County Board of Review Reduces Farm Values $5,315,653

The Illinois Agricultural Association through the work of John C. Watson, director of taxation, scored another victory in Lee County recently, when the county board of review made an 18 per cent cut in farm land valuations.

The cut in land valuations came following information revealed by Mr. Watson in a survey comparing the valuations of farm and city property. Watson found that valuations on land were practically the same as they were in the high times of seven years ago.

In making the reduction, the board of review issued the following statement:

"The board of review now in session in Lee County has seen fit to make a reduction on all values upon lands and so-called farm lands, including tracts of 10 acres or more, exclusive of buildings.

"The total amount of values for taxation purposes on farm lands in Lee County is placed at $29,531,406 at the present time. The reduction placed by the board is 18 per cent or a total amount of $5,315,653, which when deducted from the above values leaves a total of $24,215,753.

"We as members of the board feel justified in making this adjustment since the above land values were placed on these lands seven years ago during high prices. As a result of the deflation we believe farmers are entitled to a substantial reduction.

GEORGE FRUIN.
G. F. MALACH.
(Signed) W. F. AVERY.

This splendid piece of work will result in a saving of thousands of dollars to farmers in Lee County.

Divorce increased 14.4 per cent in Ohio last year over 1924. There was one divorce for every four marriages. In Michigan the divorce increase was 3.2 per cent with one divorce for every five marriages.

Farm Bureaus Help Stop Chicken Thefts Throughout Illinois

Thousands of Dollars In Rewards Offered. Local and County Protective Associations Offer Most Hope

THOUSANDS of dollars in rewards to stop chicken stealing and petty thievery in the rural districts are being offered by county farm bureaus throughout Illinois according to word received from the Illinois Agricultural Association today.

Many county farm bureau rewards of $50 to $100 for information leading to the arrest and conviction of chicken thieves have been in force from three to five years but counties heretofore inactive in the suppression of rural thievery have come to the front recently with county-wide campaigns which include the organization of local vigilanti committees, detective associations, and posting of rewards in bold, black type in prominent places.

Six fully organized townships out of 13 in the county is the record established by the Dewitt County Farm Bureau. A reward of $50 is paid by the association from which property is stolen and an additional reward of $10 is paid by each of the other organized groups, making a total reward of $110.

Kendall county, according to County Adviser Earl Price, first posted a reward of $125 in 1923, but subsequently changed the offer to double the value of the property stolen up to $100. The reward is paid only in case of conviction.

The Adams County Farm Bureau recently posted a reward of $100 for information leading to arrest and conviction of anyone stealing from a member.

"We are offering $100 reward and our protective association is open to anyone in the county," writes Ed. Creighton of the White County Farm Bureau. "Just before we started our organization two thieves were caught and plans were already on foot to get them paroled. But our association was able to bring enough pressure to prohibit this from being done, and when these thieves are brought to trial we plan to have at least 50 reliable citizens to see that these men go to the penitentiary where they belong."

The St. Clair County Farm Bureau enlisted in the fight to check farm thievery lately when it posted a reward of $100 for the arrest and conviction of anyone caught stealing from a member.

"A year ago the Henry County Farm Bureau paid Albert Schmidt of Kewanee township $50 for catching a chicken thief," said J. W. Wgisenand, farm adviser. "Schmidt got up in the middle of the night, shot one chicken thief in the back, and captured his partner."

The previous season Carl Doye of Kewanee collected a $50 reward when he and his wife caught two boys raiding their hen roost. Recently the Geneseo Farm Bureau Community Club in Henry county organized a local protective association to cooperate with the local authorities in the apprehension of thieves.

Following several convictions of chicken thieves in Knox county the farm bureau posted a $50 reward for information leading to the arrest and conviction of thieves stealing from members.

"Our Bureau has a standing reward of $100 to protect our members," writes Alfred Raut, of Madison county. "In case of a jail sentence this is increased 50 per cent. We have a county-wide protective association to prevent trespassing, but the members are prepared to take care of chicken stealing. They have devised a system of marking poultry so that each member's poultry can be identified if found at the St. Louis markets.

"At intervals our men look over the poultry bought by the dealers. This has been given wide publicity and has served quite well in holding down chicken stealing in this county. In the past three years only two of our members have lost poultry. About five poultry thieves have been sent to jail from this county. Walter Gerling, Edwardsville, is secretary of our county protective association."

The Kane County Protective Association organized by the farm bureau offers a reward of $100 for information leading to conviction of persons stealing from members.

In Bennington township, Marshall county, farmers have perfected a close organization to stop chicken stealing, which they hope to do first by offering a $50 reward. As soon as thievery is detected the members are posted to surround the territory where the thieves are operating. Secret alarms are being installed about their buildings. In addition the Marshall-Putnam Farm Bureau has posted a reward to protect its members.

Organized gangs have been stealing poultry from Lake county farmers for years, according to County Adviser Doerschuk. Two recent raids which netted the thieves 160 choice standard bred chickens valued at more than $300 led the Lake County Farm Bureau and the local protective association to post rewards of $50 each.

The Sugar Grove Detective Association composed of farmers of Vance and Catlin townships in Vermilion county was formed recently following wholesale raids by professional gangs operating throughout Eastern Illinois. The work of these gangs was exposed several months ago in Prairie Farmer. Aided by Otis Kercher, farm adviser, farmers about Fairmount assembled and under the leadership of C. H. Burton, president, perfected an organization of nearly 200 men to suppress lawlessness in that section. The Vermillion County Farm Bureau simultaneously posted rewards of $25 each for the first 10 thieves caught stealing from members.

Other county farm bureaus actively engaged in the fight to stop the crime wave by posting rewards and organizing protective groups are Williamson county, Edwards, Woodford, Mason, Hancock, Gallatin, Grundy, McLean, Greene, Carroll, Morgan, Jackson, Dupage, and Boone.

"Thieves have stolen three plows, several eveners, rolls of wire fence, as well as chickens in this county," writes C. W. Simpson, farm adviser in Gallatin county. "Last week they dug one-half an acre of potatoes by moonlight belonging to a farm bureau member and carried the loot away."

Fred Trautvetter of Hancock county collected a $50 farm bureau reward when he discovered his neighbor's chickens at the poultry house in Warsaw. The two thieves, Archie Neatrour and Carroll Nesbit, were apprehended as a result. The Hancock County Farm Bureau has placed no limit on the number of $50 rewards offered.

The Mason County Farm Bureau recently broadened its offer of $100 to include automobile as well as chicken thieves. "At present we are organizing an Anti-Horse Thief Association branch of the old state association, in Manito township," said T. R. Isaacs, county adviser. "Our reward was posted more than a year ago."

Listen In!

The Illinois Agricultural Association's half hour over radio station WLS, Chicago, was inaugurated at 12:30 p. m. on Thursday, Aug. 26.

The half hour over WLS is to be a regular feature each week at 12:30 standard time. News and information of interest to farm bureau members throughout the state will be featured.

A. D. Lynch, director of dairy marketing who recently completed a survey of milk marketing on several large eastern markets, will have the leading part in the program, Thursday, Sept. 2. A feature of the half-hour each week will be a dramatized story of farm problems or questions of general interest. George R. Wicker, who featured the program last Thursday, told in dialogue some of the principles for the successful operation of a farmers' elevator.

I. A. A. Elevator Plan To Be Discussed In Iroquois Co. Meeting

Illinois Farmers' Grain Dealers Assn. Expected to Show Hand On Proposed Plan For Strengthening Elevators

A COUNTY meeting to discuss the merits of the Illinois Agricultural Association's plan for the improvement of farmers' elevators with representatives of the Illinois Farmers' Grain Dealers Association and elevator directors in Iroquois county was in prospect as this issue went to press.

George R. Wicker

The proposed plan for federating the management under one head of eight Iroquois county elevators whose audits have been subject to the inspection of the Illinois Agricultural Cooperatives Association, a subsidiary of the I. A. A., met with almost unanimous acclamation by the boards of directors. But a small minority who favor a thorough consideration of the plan have held up its initiation due it is thought to influence coming from the headquarters of the Illinois Grain Dealers' Association.

The plan proposed some time ago provides for the operation of the elevators under one management but with each individual elevator maintaining its own identity as before.

There would be no pooling of profits or interests. All sales, however, as well as purchases would be made through the central operating company and the prices to be paid for grain at the various points would be determined by the board of directors. There is no provision for the assumption of losses of one elevator by another.

The plan for coordinating the management of elevators that those most successful may hold out a helping hand to the less fortunate is the outgrowth of the work of George R. Wicker, cooperative marketing expert and director of cooperative accounting for the I. A. A., who recently completed a detailed survey of 65 farmers' elevators subject to his audit.

The figures showed clearly that 39 of the 65 companies had capital and surplus whereas 17 showed the original capital impaired. Nine of the companies were insolvent.

Insufficient working capital necessitating heavy borrowings and the subsequent payment of disastrous interest was found by Wicker to be one of the chief causes of losses. That combined with speculative and bad account losses contributed most heavily to the downfall of the unsuccessful companies.

Mr. Wicker believes that knowledge of the business by the directors as well as the manager is essential to a well regulated elevator. Poor management was responsible for more losses than from any other cause.

The proposed meeting in Iroquois county suggested first by the Illinois Farmers Grain Dealers Association will probably be held the second week in September. The Illinois Agricultural Association welcomes the opportunity to be represented that the plan for strengthening the elevator movement throughout the state may have full explanation.

Theft, Life and Auto Insurance for Members Under Study by I. A. A.

Authorization has been given the officers of the Illinois Agricultural Association by the executive committee to investigate the advisability of theft, life and automobile insurance for its members in 92 Illinois counties.

However, the association will not, according to the executive committee's order, poach in the field of the farmers' mutual insurance companies, which are concerned chiefly with mutual insurance for farmers for protection against loss from fire, lightning and windstorm.

Tax on Income Can't Be Shifted, Declares Watson; Tells Why

By JOHN C. WATSON,
Director Taxation and Statistics.

THE most desirable feature of a taxing system is the fair distribution of the tax burden among the population. Taxes cannot be fairly distributed if some people can easily shift them to others to pay, while others cannot shift them at all or have the greatest difficulty in doing so. In a previous article it has been shown that taxes on agricultural land cannot be shifted. The same is usually true of taxes on urban land. In theory, owners of land, whether agricultural or urban, can usually shift taxes on their improvements, but there are conditions under which this is not true. The owners of farms on which the buildings are unoccupied, frequently found in parts of Southern Illinois, are one class of taxpayers who cannot shift the taxes on their improvements.

J. C. Watson.

Statement Not True.

It is sometimes said that all taxes are shifted to consumers. The statement is not true. There is one kind of tax which can be shifted only with extreme difficulty, if at all. This is the tax on net income, especially the progressive tax, with graduated rates increasing with higher amounts of net income.

The question is sometimes asked why one kind of tax can be shifted, while another cannot be shifted. The purpose of this discusion is briefly to answer the question.

A flat tax, the amount of which can be anticipated with approximate accuracy, and which if shifted, does not increase the amount of tax in a later year, offers the most favorable conditions for shifting. The general property tax, at least on some classes of property, offers conditions favorable to shifting. A sales tax also is usually easily shifted. But a graduated tax on net income differs sharply from both the general property tax and from a sales tax.

Why Can't Be Shifted.

There are two principal reasons why graduated taxes on net income cannot easily be shifted.

First, those who pay taxes on net income cannot shift them because they must compete with others whose net income is not high enough to be taxed. Those who pay the higher rates on net income cannot shift them because they must compete with those who pay lower rates or pay no tax at all.

Second, those who pay taxes on net incomes, or anticipate that they may have to pay them, cannot shift them because, by doing so, they only increase the amount of their net income and thus increase the amount of their tax. The tax, of course, does not increase as fast as the net income, but any taxpayer who tries to adopt this policy will not long be able to continue it. He can shift the tax only by increasing his net income. Under ordinary conditions he can increase his net income only by increasing the prices of his goods or his services.

Bunk About Tariff Is Exploded by Farm Experts

(Continued from page 1, col. 2)

probably over $5 per capita, or a total of $158,000,000 on steel alone. It would not be out of reason to say that the tariff costs the farmer, net, in the neighborhood of $300,000,000 or $10 for every man, woman, and child living on American farms. . . .

. . . Thus the farmer very properly asks what the facts are about his much praised home market. So far as he can see, it works well with respect to potatoes, tomatoes, and fresh vegetables, but fails to work respecting corn, hogs, cattle, wheat, rice, and cotton. For the most part the prices of these basic commodities are made on a world market and reflected back to American farmers.

"This is merely another way of saying that one of the greatest price making influences known is the tariff, and the farmer receives little benefit in the way of increased price, but pays bills made much larger by the tariff on manufactured goods."

Speaking for the same meeting in New York City some time ago, Prof. John D. Black, economist from the University of Minnesota, had the following to say:

Another Knockout.

"No nation has gone in for stimulating urban industries on so vigorous a scale as has the United States. The duties now generally average around 40 per cent of the value of what few manufactured goods are imported. Coupled with this, most raw materials of manufacturing have come in duty free, even though they compete with domestic farm products in some cases. Hides, vegetable oils, and Egyptian staple cotton are cases in point. All of this was done in the beginning to give our infant industries a chance to get started. We were largely an agricultural nation, and thoughtful people agreed that we would be better off if we diversified. But we allowed the infant to grow so strong that it has over-mastered us. The effect has been to penalize agriculture by making farmers pay higher prices for what they buy, while the protection they are receiving on their farm products is adding little to offset it. It must be remembered also that tariff protection for industry raises the whole level of money wages (not real wages) in the cities. The protected industries take labor away from the unprotected ones and the exporting ones, until only the more efficient units of these, those which can meet the high wages, are left producing. Along with this is a reduction in per capita output, because the labor is now used in less productive industries. The same analysis probably applies to the land and capital goods also used in production. The result is that nearly all the things which the farmers buy from the city, not just the dutiable goods, cost appreciably more.

"The total offset is not forty per cent, but it is surely more than the two per cent that certain quaint jugglers of figures managed to get inserted in President Coolidge's recent Chicago speech.

"Also the wages the farmer pays his hired labor are higher because of the competition of the protected city industries. Thus the farmers who are near the margin are crowded out just as are the marginal city producers in unprotected industries.

Mid-West Farm Bureaus Adopt Uniform Plans for Future Organization Work

The organization committe representing eight Mid-West states assembled at Saugatuck, Michigan, recently adopted a uniform plan for carrying on membership work in the various states. Here are the 10 recommendations adopted by the committee:

1. That a permanent membership is paramount if the farm bureau is to function in an educational, social and economic capacity; and that the farm bureau, county, state and national, must build its program, personnel and budget with membership as the primary consideration.

2. That a membership policy must be built on an appeal for an adequate standard of living on the farm, and a farm income to maintain it.

3. That membership work be based on volunteer effort.

4. That to have a healthy and permanent farm organization, farm leaders must have the courage to teach the membership that each American farmer owes to his occupation and his community a decent contribution of money, time and effort.

5. That the future of cooperative marketing and cooperative purchasing, can only be assured through an appreciation by the farmer, that such activities are only factors that help to make possible an adequate standard of living; and that he must recognize and appreciate the necessity of loyalty to, and understanding of these fundamentals, rather than a consideration only of immediate and direct monetary returns.

6. That publicity, properly adapted and directed, is indispensable to getting and keeping members; and its form and appeal must be of such character that it will create and maintain interest in the Farm Bureau.

7. That all farm bureaus should adopt an adequate uniform membership fee.

8. That financial support from Commodity Associations should be received only for specific services rendered, and should not be recommended as the principal source of farm bureau income.

9. That prompt collection of dues is fundamental to the success of membership work; and that a dues collection program must be continually in effect, and particularly should a dues collection campaign precede a membership campaign.

10. That we should look to the organization department of the American Farm Bureau Federation for the further development of a national plan of organization and membership maintenance, and that department should have the assistance of a competent personnel made available to train leaders and assist in the direction of organization work.

Oil Co-ops Succeed In Saving Thousands For Minnesota Men

Good Cooperation and High Class Management Reasons For Success, Declares J. R. Bent, Following Visit

"Cooperation aided by good management is saving the farmers of Minnesota thousands of dollars annually on their gas and oil bills," declared J. R. Bent, director of farm supplies who just returned from a study of cooperative oil and gas companies in Minnesota.

"Minnesota has 40 cooperative distributive stations in operation, said Bent, most of which are of recent origin. But the older companies have been paying almost unheard of dividends on their investments. The Cottonwood, Owatonna, and Freeborn county companies have made a pronounced success of their operations in both service and savings. Their earnings are almost too good to be true."

The Freeborn county company with a capital investment of only $20,000, but capitalized for $25,000, earned more than $16,000 net last year. A surplus of $1,600 was set aside, and a patronage dividend of $14,000 was declared for payment next year. This money in the meantime will help augment the working capital.

The Freeborn county company has a central bulk station at Albert Lea and three outlying bulk stations. There is only one retail filling station, and that is located at Albert Lea. According to Bent, the retail station is the least necessary part of the distribution system. The managers are not altogether convinced that the filling station is an asset. Each bulk station is equipped with one or more delivery trucks.

The Central Cooperative Oil Co., at Owatonna has been successful since its organization in 1922. It has only one bulk and retail filling station. Both are located together in Owatonna.

This company organized with 1000 shares of stock at $25 per share. Seven hundred shares only were sold. The last audit on January 1, 1926, showed the net worth of the company was approximately $16,000 with refunds for 1925, not paid, at $14,371.17.

The net profit for last month, July, 1926, of the Owatonna company amounted to more than $4,300 net. The Freeborn county company showed a profit for July of over $4,500. These figures are exclusive of taxes, insurance, and depreciation, but they are above all labor, management, and other overhead expenses.

"The chief reasons for the outstanding success of these companies is the splendid way in which the Danish, Norwegian, and German farmers of those sections cooperate in patronizing their own companies," said Bent. "Then, too, the companies got into the field even when there was little competition. Their profits may decrease somewhat as more competition develops.

"These companies buy their gas on the open market, and purchase lubricating stock following specifications on a contract basis."

The Freeborn county association has approximately 1300 accounts on the books. Between Mar. 1 and Dec. 31 last year it sold 555,138 gallons of gasoline, 138,738 gallons of kerosene, and 22,082 gallons of lubricating oils. A patronage dividend of 9.4 per cent on sales was declared.

The Illinois Agricultural Association is prepared to offer complete service and advice to counties interested in the formation of such companies. A detailed summary of the experiences of the Minnesota companies with facts and figures about their operations is being prepared for the benefit of companies organized in Illinois.

The I. A. A. is cautioning its members to be sure the local people are ready to support the cooperative venture before launching their organization. An aggressive and active board of directors and manager are essential to the success of such companies. The oil co-op is being looked upon as one of the greatest opportunities ever offered for farmers to save money. Minnesota, apparently, is more successful with its cooperative ventures than other states, largely because its Northern European population thinks in terms of cooperation.

Higher Prices for Beef Cattle Coming Is Govt. Prediction

HIGHER prices for beef cattle are in prospect within the next eighteen months for both the feeders and range producers, according to the report on the outlook for beef cattle made by the Department of Agriculture recently. An upward trend is probable over the next two or three years the department says. The numbers of breeding stock, of cattle on feed, and of young stock seem to be materially lower than for several years so that reduction in the market movement is expected.

While no considerable reduction in the number of stock held by range men was made for some time after the break of 1920, the number of steers has been reduced during the last three or four years accompanied by a less rapid reduction in the number of cows. The increasing number of cows and heifers now being slaughtered indicates further reductions in breeding stock still being made. It does not appear, therefore, that the number of cows is sufficient to long maintain the present high rate of slaughter, the report shows.

All indications are for smaller supplies of cattle on the markets during the next few months also, the department states. The movement of all cattle so far during 1926 has been less than for the same periods last year, and the best information from the range States indicates a considerably lighter run of grass cattle during the next three months than a year ago. In the Southwest there are lighter supplies of cattle available than a year ago. As the 1926 calf crop was good, the number of calves to be offered from the Southwest this fall will compare favorably with the past three years, however. Good range conditions and an improved financial situation have placed the southwestern cattlemen in a position so they would not be forced to sell on an unfavorable market.

Survey In Forty-Six Counties Shows Wealth Farm Bureaus

Net Worth Nearly Half Million Dollars and Represents An Industry Valued at Three Billion

FORTY-SIX county farm bureaus picked at random over the state of Illinois are worth approximately a half million dollars, they serve an industry in these 46 counties valued at three billion dollars, and they represent a total paid-up membership of 37,000 according to a survey recently completed by George R. Wicker, director of business service.

The survey covering 46 county farm bureaus whose books were audited by the Illinois Agricultural Cooperatives Association shows that the average net worth of the 46 bureaus was $10,009.85. The wealthiest county farm bureau showed a net worth of $24,623.80 while the smallest was rated at $495.02.

The financial statement shows that most farm bureaus are living within their income because the average of the 46 showed an excess of income over expense of $1,595.92.

Commercial activities of farm bureaus it was found are comparatively slight, and in most counties are limited to the handling of serum and virus for vaccinating hogs. The total income derived from such activities amounted to only 3 per cent of the total gross income. Membership dues were responsible for 72.97 per cent of the total income, receipts from state and federal appropriations represented 18.82 per cent, and commercial activities about 3 per cent.

Total expenses of the 46 farm bureaus included in the survey were $269,130.33 representing 90.3 per cent of income, resulting in an excess of income of $28,899.46 or 9.7 per cent of total income.

"The survey indicates that the farm bureaus whose expenses exceeded income last year, did not pay sufficient attention to the collection of membership dues," said Wicker. "The budgets in such cases did not take account of the delinquencies."

Rain Breaks Up State Picnic at Mt. Vernon, Aug. 12

Horseshoe Championship to Be Decided at Fairbury, Sept. 6. Marshall-Putnam Plays Knox County, Ind., In Interstate Championship Series

A crowd estimated at 15,000 mostly from the lower third of the state got a wet reception at the I. A. A. state picnic, Mt. Vernon on Thursday, August 12.

Intermittent showers throughout the day terminated in a downpour at 3:00 p. m. that sent picnickers scurrying for shelter in every direction, and before the torrent which bordered on a cloudburst had subsided the picnic grounds were swimming, and all hopes for continuing the program had vainshed.

Between showers, Marshall-Putnam's crack nine led by "Parson" Thompson, who preaches in Lacon on Sunday and pitches for the farm bureau team during the week, managed to rout Henderson county in a fast game by the score of 12 to 2.

This is the second state championship in the Illinois Farm Bureau Baseball League for the winners. Phelps and Wallace each brought in three runs for Marshall-Putnam, while Rickets and Keeney scored the two runs for Henderson. Wallace for the winners, and Keener for the losers each made home runs.

Marshall-Putnam was scheduled to play an interstate game with an all-star team selected from the 10 farm bureau teams of Knox County, Ind., at the former's picnic, Lacon, on Aug. 28. A series of games is planned to decide the interstate championship.

The hog-calling contest delayed by rain until afternoon brought out 24 entries, 21 of which reported for competition. It didn't take the three judges, Sam Sorrells, Clair Hay, and C. T. Hufford long to award the little gold pig trophy to Walton Hodge of Jefferson county. V. E. Robison of Tazewell county, last year's champion, was among the contestants.

Hodge won hands down with a penetrating, musical W-H-O-O-E-Y delivered from the side of the mouth.

Peterson Brothers from Marshall-Putnam and the Torbert boys from Dewitt were battling for the silver cup in the horseshoe tournament, when the deluge dampened their ardor and made a puddle out of the new clay courts.

Marshall-Putnam coming through the day without a defeat had won the first game when the contest was called off. Arrangements were made later to play off the championship at the state horseshoe meet to be held at Fairbury in Livingston county on September 6.

Senator Jim Watson of Indiana, the speaker of the day, merely had time to walk out on the platform, say a few nice things about the tariff, comment briefly on the fight for surplus control, and tell his listeners, "it's time for us to look about for protection," as the patter of rain drops announced the coming storm.

Mr. Watson's speech was reported in detail in the 16 page Special Picnic Edition of the I. A. A. Record published at Mt. Vernon in cooperation with the Register-News the day of the picnic. A large part of the crowd left the grounds before the the special edition could be distributed. Souvenir copies may be had by writing the I. A. A. office, Chicago or the Register-News, Mt. Vernon.

Mrs. Chas. Sewell of Otterbein, Ind., director of community and field service for the American Farm Bureau Federation spoke to the women following the rain in the morning. "The morale of the husband is largely determined by the mental attitude of the wife," she said. "The farm woman can help by supporting the farm bureau and insisting on maintaining a high standerd of living on the farm."

Mrs. T. L. Stookey of St. Clair county won the chicken calling contest in a field of seven entries.

Peaches were given away and sold by the Illinois Fruit Growers Exchange. Peach grading demonstrations acquainted many visitors from afar with the methods used in sorting and packing fruit for market.

1,000,000 VOTES FOR THE TAX AMENDMENT IS AIM NOV. 2

A Wet Trip With The Cornborer Thru Ohio, Michigan and Canada

500 Attend International Convention at Detroit Last Week.

By the Editor

Essex and Kent counties, Ontario, Canada have reduced their corn acreage 60 per cent already and promise a further reduction of 10 to 20 per cent next year as a result of the European Cornborer. The borer came 65 miles westward this year into five counties in Northeastern Indiana and almost across the state of Michigan to Kalamazoo. Can the Corn Belt stop the cornborer? Read the story of this dangerous insect and what is being done to keep the borer out of Illinois corn fields written by the Editor following a trip to the devasted area in Ohio, Michigan and Ontario.

Can the Middle West stop the European cornborer? This is the question and this the problem that brought more than 500 farmers, entomologists, editors, scientists, deans and professors, federal investigators, reporters, bankers, and officials from many walks of life to Toledo, Detroit, and on into Essex and Kent counties, Ontario, Canada on Sept. 23, 24, and 25.

I was astonished when I clambered from my berth at Toledo after an all night ride through the rain to find so many important men gathered to do homage to His Majesty, a little, white, insignificant looking grub of foreign parentage.

At the Fort Meigs Hotel, where we gathered early Thursday morning in a driving rain, boots and rubbers, raincoats, caps and rubber hats, were being sought in preparation for the wet drive through the infested Ohio and Michigan territory between Toledo and Detroit.

An International Gathering

A doctor of zoology from Germany with his short mustache, goatee and professional air, lent an international aspect to the gathering. The Canadians, of course, were there en masse. I was particularly interested in a light silk raincoat impregnated with rubber worn by the young German professor. It was equipped with a hood to pull over his hat so that when properly adjusted, the wearer was as snug and safe from the elements as a turtle in his shell.

The coat weighed only a few ounces and could be carried conveniently in one's pocket. Herr Professor told me he paid 90 francs for it in Switzerland, which at the normal rate of exchange is $20, our money.

The bus trip to Monroe was uninteresting although ample opportunity for getting acquainted with men who had been on former trips through the cornborer territory presented itself. Our bus carried about 30 men but the hum of their conversation scarcely could be heard above the tattoo of the downpour on the roof of the car.

Our first stop was in Lucas county, Ohio where we saw a field approximately 75 per cent infested. It was yellow dent corn planted May 20. From the road the corn did not look as bad as I had expected. The stalks were still green and nearly all upstanding, although the growth was stunted. There were plenty of ears, two to three per stalk, but they were smaller than our better Illinois corn, and upon closer examination, we found the infested ears were considerably damaged. Much of the corn was loose on

Determined to Do Something About It

42 Counties Join In Fire Protection Week To Stop Farm Losses

By VERNON VANIMAN

FORTY-TWO farm bureaus are cooperating in Farmers' Fire Insurance Week or Farm Fire Protection Week. Each farm bureau will hold at least one meeting in the county during the week of October 18 to 23 when it will discuss the why and wherefore of farm fires and how to safeguard the county against fire losses

V. Vaniman.

For the past seven years in Illinois there has been a gradual increase in the number of fires and also in the total loss. The number of fires have increased from 14,052 in 1920 to 18,049 in 1926 and the losses have increased from $16,552,248 in 1920 to $27,112,084 in 1926. These are for the fiscal years ending June 30th.

Exceed All Records

For the fifth consecutive year the fire losses of the nation have exceeded the half billion mark. This has been an ascending scale of several millions per year.

In 1921—$485,000,000
In 1922—$506,000,000
In 1923—$535,000,000
In 1924—$548,000,000
In 1925—$570,250,000

These are the figures recorded by the Actuarial Board of the Fire Underwriters which is America's official clearing house on such information.

The annual sacrifice of life in the U. S. by fire still runs around 15,000.

Each county will have the total number of fires and the fire loss for the past six years. The statement is made that 75 per cent of the fires

Revenue Amendment Criticisms Answered

Here Are Replies to Principal Objections to Constitutional Reform Sought.

By JOHN C. WATSON

1. *The pending amendment is objected to because it permits the establishment of a tax on income.* Some persons have even said that its approval will establish such a tax.

Approval of the amendment will establish no tax. It will permit no tax not now permitted by the constitution. The General Assembly now has the power, by a bare majority of each house, to enact an income tax, but any such tax would be without exemptions, and without proper deductions of taxes on income of property from taxes on the property itself. The pending amendment permits the General Assembly, by a two-thirds vote of the members elected to each house, to enact a tax on income, with such exemptions as it may deem proper, and with proper adjustments so that both income from property and the property itself will not be taxed.

2. *The amendment is objected to by some people because it permits classification of property for taxation.*

The power of classification is necessary for proper adjustment of the burden of taxation. For example, if an income tax is enacted, double taxation both of property and of income from property, as shown above, can be avoided only if the General Assembly has the power to classify. It is highly desirable also that mining property be taxed on its output, rather than on its value, and that the same principle be followed in the taxation of real estate which is better adapted to forestry than to any other purpose. The present Constitution does not permit the taxation of property on its output. It does not permit taxation in such a way as to encourage reforestation.

Classification might well be used also in the taxation of automobiles. Few counties get more than 60 per cent or 70 per cent of their automobiles on the assessment books. Cook County does not assess more than five or six per cent of its automobiles and trucks. If classification were permitted, the property tax on motor vehicles could easily and surely be collected with the motor license fees.

3. *Some people object to the pending amendment on the ground that the legislature cannot be trusted with the power it would give.*

The Amendment gives the General Assembly no power which it does not now have except to adjust the burden fairly between different sources of taxation and different tax payers. The objection here quoted is not a valid argument against the amendment, but so far as it is based on fact, is rather an argument for the election of better members of the General Assembly.

4. *Somewhat similar is the objection that the pending amendment, if approved, will give the General Assembly unlimited power to raise taxes.*

The General Assembly now has unlimited power to raise taxes. It has full power over the basis of valuations and within the last twenty (20) years has twice raised the basis of valuations. Except in the total for county taxes it has unlimited power over all tax rates. The present Constitution limits the total tax for county purposes to 75 cents on the hundred dollars of assessed valuations. It limits the General Assembly on no tax rate for any other purpose. By raising the basis of valuations to actual values, the General Assembly, under the present Constitution, could increase the county tax as well as other taxes about five fold. It could increase all tax rates except that for county purposes without any limit.

There is no danger that, under the pending amendment, the General Assembly would tax any or all persons out of business. Nobody wants any such tax. Under the present Constitution the General Assembly has almost no other source of taxation except tangible property, chiefly real estate. The real danger is that taxes on this kind of property will, as in fact they are already doing, more and more rapidly approach the full producing power of such property. This means, confiscation of values of property, especially property which cannot shift its taxes to others to pay.

Endorsement and Active Support By Labor and Other Groups Throughout State Assures Passage Is Prediction

Amendment Must Have a Majority of Votes Cast to Win. Opposition Tries to Befog Issue. Joint Committee Report of General Assembly Answers Criticisms.

ONE million votes for the revenue amendment to the Illinois constitution at the polls Nov. 2. This is the goal of the organized groups pledged to support of the tax amendment that will empower the state legislature, if passed, to revise our antiquated tax laws.

Following the unqualified endorsement of the tax amendment by the Illinois Federation of Labor at their recent annual meeting held at Streator positive assurance was held out by leaders in the movement that the amendment would receive the needed majority of votes cast.

Supporting the Tax Amendment

ILLINOIS AGRICULTURAL ASSOCIATION
ILLINOIS FEDERATION OF LABOR.
ILLINOIS BANKERS' ASSOCIATION.
ILLINOIS FEDERATION OF WOMEN'S CLUBS.
ILLINOIS LEAGUE OF WOMEN VOTERS.
ILLINOIS STATE TEACHERS' ASSOCIATION.
ILLINOIS FARMERS' INSTITUTE.
ILLINOIS ASSOCIATION OF REAL ESTATE BOARDS.
PRAIRIE FARMER.
ILLINOIS FARMER.
MOST OF DOWNSTATE PRESS.

Marked progress was made by A. C. Everingham during the past four weeks in forming an organization in every county to work for votes on the amendment.

"By the end of October we will have reached every county in the state," declared Everingham, "and by that time we will have an effective state organization with farmers, bankers, labor, real estate men, teachers, and civic leaders from every phase of business life supporting the tax amendment through active county and township units.

"This is the greatest legislative interest we have at the present time," said John L. Walker, labor president before their annual meeting in Streator two weeks ago.

Will Help You

"Here is one piece of legislation we can conscientiously help you put over," declared Victor A. Olander, secretary of the Illinois Federation of Labor in speaking to a representative of the Illinois Agricultural Association last week. "We are for it unqualifiedly because its right, not because we expect to get any particular economic advantage out of it."

Opposition from the spokesman for the Illinois Manufacturers' Association is dwindling down to a desultory fire by means of questions designed to befog the voter and cloud the real issue as to whether or not the legislature is to be given authority by a two-thirds vote to work out a revision and a more equitable adjustment of the tax burden.

The purpose of the amendment is stated very clearly in the report of the Joint Commission on Constitutional Amendment of the 54th General Assembly. Here it is in full:

To the People of Illinois:

At the general election to be held on the second day of November, 1926, you will be called upon to adopt or reject an amendment adding Section 14 to Article IX of the Constitution of Illinois.

Purpose of Proposed Amendment

The purpose of this proposed amendment is to permit the General Assembly of this State to employ other methods of taxation than those now provided by the Constitution. *The amendment itself establishes no taxes.* The Constitution of Illinois now requires that all property be taxed uniformly in proportion to its value. Under present conditions it has proved impossible to value

Published once a month at 404 North Wesley Ave., Mount Morris, Illinois, by the Illinois Agricultural Association. Edited by Department of Information, E. G. Thiem, Director, 608 South Dearborn Street, Chicago, Illinois. Entered as second-class matter October 20, 1925, at the post office at Mount Morris, Illinois, under the Act of March 3, 1879. Acceptance for mailing at special rate of postage provided for in Section 412, Act of February 28, 1925, authorized October 27, 1925. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record. Postmaster: In returning an uncalled for or missent copy, please indicate key number on address as is required by law.

Are We All Wrong?

ONE of the familiar answers made to the farmers' insistent demand for protection on a parity with industry is that domestic consumption as a result of our ever-increasing population will soon overtake production, and then the farmer will be in the saddle.

We wonder how some of our infant manufacturing industries would have fared had the same line of reasoning been followed. What if they had been told, "We know you are weak now and are having hard sledding, but you'll learn the ropes in a few years and everything will be all right. We don't believe a protective tariff would be good for you."

The tariff on aluminum helped make Andrew Mellon rich. And yet our secretary of the treasury was the first to raise the cry about Europe securing a cheaper food supply than America if the tariff were made effective for corn belt farm products.

The belief that American agriculture, except for a small minority like the wool and sugar beet growers, is suffering more from continued "young industry" tariff protection than anything else is substantiated in the authoritative article, "American Export Trade and The Tariff," written by Dr. Jacob Viner of the University of Chicago in the September 1926 Annals of the American Academy of Political and Social Science. The author says:

"In the past the restrictive effect of the American tariff has been felt most keenly by the agricultural industries. By raising the general money cost of living and the money costs of production, the tariff has acted as a depressive influence on the prosperity and growth of American agriculture insofar as its opportunities lay in foreign markets. In the main, American agriculture still undoubtedly loses more than it gains from the protective tariff policy. . . . . .

"The fundamental tariff principle is that the tariff-maintained industry is an anaemic industry kept alive by blood-transfusions from the healthy industries, and that these blood-transfusions weaken the latter."

Agriculture has given its life's blood toward making the United States the wealthiest country in the world. Is it not justified now in seeking to stop the blood-transfusions that weakened it?

The Tariff and Wheat

IN a recent survey of United States and Canadian wheat prices Chester C. Davis found that the price of wheat in the terminals of the United States now represents from 86 to 88 per cent of its pre-war purchasing power (on farms it is less because present freight rates are 45 per cent higher), and that wheat prices for the same grades at Winnipeg, Canada, were higher than those quoted at Minneapolis, Kansas City, and other terminals in this country.

To be specific, on Sept. 13 the Winnipeg cash price paid for No. 1 Northern Spring Wheat 60 lbs. to bu. 60 per cent dark, hard, vitreous kernels was $1.42¼. On the same day the prices paid for No. 1 Dark Northern Spring wheat (60 lbs. to bu. 75 per cent, dark, hard, vitreous kernels) ranged from $1.37¼ to $1.50¾. In other words, on that day Winnipeg ranged from 4½ cents above to 8½ cents below Minneapolis on comparable grades of spring wheat.

This difference is even more remarkable because Canadian freight rates on wheat in Western Canada are from seven to 10 cents less per bushel than are rates for equal distances from Montana points to Minneapolis.

On the same day, while No. 1 Northern Spring wheat was selling in Winnipeg for 1.42¼, No. 1 Hard Winter wheat was selling in Kansas City at from 1.30¼ to 1.36½—from 5¾ to 12 cents under Winnipeg.

At Chicago, No. 1 Red Winter commanded a cash price of 1.35½, or 6¾ cents per bushel under the Winnipeg price for No. 1 Northern Spring.

And yet United States wheat is protected (?) by a 42 cent per bushel tariff. Will someone from over the Alleghenies tell us how much of this 42 cents the American farmer is getting?

1,000,000 Votes

ONE million votes for the revenue amendment to the Illinois constitution. This is the goal of the allied organizations working toward the passage of the new tax provision which will empower the General Assembly to work out a fair equitable, modern taxing system for the state.

With the active support of the Illinois Federation of Labor whose endorsement was secured at their annual meeting held recently at Streator, little doubt as to the outcome of the vote was held by those back of the movement.

For the amendment are the ILLINOIS AGRICULTURAL ASSOCIATION, Illinois Association of Real Estate Board, Illinois Farmers' Institute, the Illinois Federation of Labor, Illinois Bankers' Association, Illinois Federation of Women's Clubs, Illinois League of Women Voters, Illinois State Teachers' Federation, Prairie Farmer, the Illinois Farmer, and most of the downstate newspapers.

The Illinois Manufacturers Association oppose the measure, and a referendum taken by the Illinois Chamber of Commerce indicated a majority of the members who voted on the proposal were opposed to it. Nevertheless, we believe there will be thousands of thinking business and professional men throughout the state who will vote for the tax amendment, for it is not a partisan measure. It is to the interest of the home owner and business man in the town and city just as much as it is to the interest of the farmer to see that our antiquated tax laws are revised and taxes are levied on an income producing basis.

The amendment must have a majority of votes cast to make it effective. One million votes will do it.

Every man and woman of voting age will be needed at the polls Nov. 2 to reach this goal.

Poor Judgment

GEORGE R. WICKER, director of business service for the Illinois Agricultural Association completed an interesting survey sometime ago based on the audits of 65 farmers' elevators in Illinois.

He compared the successful elevators with those that were unsuccessful or insolvent and point by point showed why some elevators were making money while others failed.

His survey was authoritative, distinctly different from anything else published in recent years, and its value was given due recognition in the farm and city press throughout the state and nation.

Wicker found that good management was essential to the success of an elevator. Hence, he aided in the development of a plan whereby the more efficient managers would be given greater responsibility in supervising the business transactions of more than one elevator. The plan was first proposed to a group of elevators in Iroquois county.

At a meeting of the Illinois Farmers Grain Dealer Managers Club at Dwight recently which presumably was called by Lawrence Farlow, secretary of Illinois Farmers' Grain Dealer Association, the latter is reported to have attacked Wicker and the I. A. A. in ungentlemanly language. The report was circulated that Wicker was invited but was afraid to appear at the meeting to defend his position. As a matter of fact Wicker never received an invitation to be present. The following resolution was passed at this meeting:

"We deplore and strongly condemn the activities of the Illinois Agricultural Association, who directly and through their subsidiaries have seemingly made a strong effort to inject themselves into the farmers' elevator movement. . . .

"We hereby ask the directors of our state association to pass resolutions setting forth the fact that the Illinois Agricultural Association and its subsidiaries are in no manner connected with the Illinois farmers elevator movement, have no right to talk for it or to give out any statement concerning any of its activities . . . ad finitum."

The Illinois Agricultural Association is the farmers' service organization of Illinois, with approximately 63,000 members. A large portion of its members sell grain through farmers' elevators, and in fact most of the stockholders and directors of the 550 farmers elevators are members of the I. A. A. And yet farmers are told that their own organization has nothing to say about the farmers' elevators. Are we to assume from this that the elevator managers' club assumes to dictate the policies of the managers' employers? Farmers will not be disposed to listen kindly to being told that they have no right to discuss their own business. The managers who endorsed these resolutions showed poor judgment. Farmers, we believe, will reserve the right to control their own businesses be they elevators or otherwise. We will welcome letters expressing opinion on this point.

Only four farm crops are now on a level equal to the level of wholesale prices of non-agricultural products compared with pre-war. They are hogs, wool, lambs and potatoes.

Policy of I. A. A. In Aiding Farmers Elevators Outlined

Wicker Broadcasts From WLS Telling Why It Is I. A. A.'s Business to Protect Members.

THERE are about 550 farmers elevators in the state of Illinois, many of which have been in continuous and successful operation from 25 to 30 years. A large percentage of the grain and corn produced in this state moves to market through farmer-owned warehouses. Most farm bureau members in the grain producing counties also are members of their local farmers elevators. Therefore, the Illinois Agricultural Association has a direct interest in the condition, the improvement, and the success of these local associations."

Geo. R. Wicker

This is the message, broadcasted over WLS recently by George R. Wicker, director of business service in answer to a letter sent out over the state on the stationery of the Illinois Farmers Elevator Managers' Club questioning the right of the I. A. A. in showing an interest in the improvement of farmers' elevators over the state.

In outlining the policy of the state association in serving its membership, Wicker said:

"We are living in a day of organization. Capital is organized, labor is organized, and industry is organized. It is not surprising, therefore, that farmers are organizing. The Illinois Agricultural Association has approximately 65,000 members who also are members of their respective county farm bureaus. The affiliated organizations cover the entire state of Illinois. Their members are engaged in a wide range of agricultural production, from cotton and fruit in the south to grain, live stock and dairying in the north.

A Service Organization

"The Illinois Agricultural Association is a service organization and as such does not engage directly in marketing or merchandising. It recognizes the need and the value of local co-operative associations and farmers elevator companies, and devotes a large part of its effort to their support and improvement. We are also interested in efforts to establish effective farmer controlled marketing agencies in the terminal markets, so as to complete the chain of organization by which the producer may come into more direct contact with the buyer. This is not a new or sudden interest of the Illinois Agricultural Association. The first farm bureaus were organized in counties largely devoted to the raising of grain, corn and live stock. Among the leaders of the farm bureau movement are some of the most progressive and successful farmers of the state, many of whom are also officers of their local farmers elevator companies. Therefore, it is impossible to separate or distinguish the purposes of the Illinois Agricultural Association from the interests of its individual members or their local associations.

Must Help All

"The officers of the Illinois Agricultural Association have no false pride of organization. They know that its continued existence must be justified by a record of service. The extent of that service will be limited only by the interests of its members, its financial resources and the ability of its staff, which has been selected to carry these purposes into execution. To this end the Association maintains several departments which are classified under five divisions.

1. Administration.
2. Organization and Information.
3. Public Relations.
4. Business Service.
5. Marketing and Farm Supplies.

The services of these departments are made available to members through their respective county agencies, and to such co-operative associations as enter into contracts for special service. Throughout all of the activities of the association first and constant consideration is given to the interests of the individual producer.

Strong Local Units Needed

"Co-operative grain marketing in this state is still in the local phase of development. Several unsuccessful efforts have been made to establish co-operative grain marketing agencies in the terminal markets. Each failure has pointed out the fact that the successful accomplishment of terminal marketing must be built upon the foundation of successful local units. The job immediately at hand, therefore, is to promote the improvement and the success of the local unit. This can be done only by close application to the problems of local associations, including the form of organization, method of financing, character of administration, management, facilities, membership and the general strengthening and improvement of business practices. Some of these problems cannot be solved by or within the local unit. Therefore, the principle of co-operation must be extended and made more effective through groups of local organizations. There is nothing new or revolutionary in this suggestion. It is the method by which modern industry has been built up. There is not a successful industry in America today that does not support this fact. Centralization for the purpose of providing better methods of financing, a larger volume of sales, increased purchasing power, better administration and more efficient management is the only means of a broader and more advanced form of co-operation.

"The Illinois Agricultural Association does not hesitate to accept its responsibility in supporting this policy. We have no criticism to make concerning the past. For the present we will not shut our eyes to conditions which require attention and understanding. For the future, we have a hopeful optimism and, we believe, a cheerful prospect."

A person good at making excuses is seldom good at making anything else.

Bent to Muscle Shoals

At the request of President Sam H. Thompson of the American Farm Bureau Federation, J. R. Bent, director of farm supplies is attending the meeting of the Federation directors at Florence, Alabama near the site of Muscle Shoals.

Farm Bureaus of the southern states are deeply interested in the nitrate production possibilities there, and the meeting was held at their invitation to discuss the farmers' interest in the project.

U. S. Chamber Comes To Rescue Farmer For $7.50 Is Story

Farm Bureau Secretary Advises Members to Read Carefully Before Signing List.

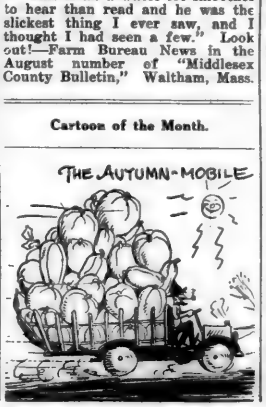
Salesmen claiming to represent the United States Chamber of Commerce have been working in Middlesex County, Mass., recently, collecting $7.50 each, from a large number of farmers.

They tell a long story about farmer co-operation, and farmer representation in Washington, and how the United States Chamber is taking a survey of the farmers. They say that the Chamber is anxious to place certain literature in the hands of the farmers, and the $7.50 is to help pay the cost of all this good work.

What they actually sell you is a three years' subscription to the magazine of the United States Chamber of Commerce, The Nation's Business.

Secretary Russell of the Farm Bureau Federation has advised Farm Bureau members that if they want to subscribe for a magazine for three years, well and good, but he wants them to know what they are paying for, as the agents are said not to mention the word magazine.

Here is the story as President Leon A. Wetherbee of Stow tells it:



"As I remember it the story of our U. S. Chamber of Commerce man runs like this: The Chamber has been asked by the President (Coolidge) and Secretaries Hoover and Jardine, none of whom were in favor of the farm relief measures which have been before Congress, to undertake a survey, the object of which was to help the farmer to market his crops to advantage through co-operatives or other organizations in each market which would work together to prevent gluts by proper distribution of reshipping and to discover what other ways and means there were for placing the farmers' dollar more nearly on a par with other dollars. The Chamber was going to all the expense of the work including the force of men like himself and cars for them (Essex Sedan), he was on his second having worn out one, and intended to publish such information as they gathered together with such publicity as might later be needed. All they wanted of the farmers was to be sure that they were back of the thing and would give it their moral support.

"You were willing to do that of course, and would you sign your name below a list of your neighbors and other influential farmers (which you did). Then of course, there was a large expense to all this and if you wished you could pay the expense of getting out this literature which the Chamber figured to be $7.50 for the period.

"He then produced a large bunch of checks signed by your neighbors, etc., and if you were in the field he had plenty of blank checks with him.

"This is all a whole lot smoother to hear than read and he was the slickest thing I ever saw, and I thought I had seen a few." Look out!—Farm Bureau News in the August number of "Middlesex County Bulletin," Waltham, Mass.

Cartoon of the Month.

I.A.A. Comes to Rescue As Hog Cholera Serum Shortage Is Threatened

OUTBREAKS of cholera throughout central and northern Illinois have kept many farm advisers on the jump during the past few weeks supplying members with serum and virus for immunizing shoats against the dreaded disease.

Appeals to the I. A. A. for help in the cooperative purchasing of more serum sent director of livestock marketing W. E. Hedgcock out scurrying for new supplies. Many farm bureaus already have exceeded their original quotas ordered early last spring, and serum companies unprepared for the deluge of orders have sent prices sky high in some instances with the veterinarians and unorganized groups at a sorry disadvantage.

Companies whose supplies have been sold largely to Illinois farm bureaus have stood by them in all instances and have refused flattering offers from outside parties and even other companies whose stocks have not kept up with demand.

The I. A. A. was able to buy late orders of serum for as low as 81 cents per 100 c. c. when private individuals were selling for between $1.50 and $2 per 100 c. c. Henry, Whiteside, DeKalb, Knox and other central and western Illinois counties were the hardest hit. Losses from cholera were not many due to the prompt action of the county advisers and farmers in immunizing all hogs in the areas where outbreaks occurred.

J. W. Whisenand, adviser in Henry County, reported the sale of 140,000 c. c. of serum and virus in one day with a total of 200,000 c. c. distributed in four days.

Farm Adviser Wise of Whiteside county distributed between 30,000 and 50,000 c. c. of serum daily in the busiest period in late August and September.

Endorsement and Active Support

(Continued from col. 5, page 1.)

property uniformly for taxation. The effort to do so has in reality been abandoned. The Constitution of 1870 was adopted when practically all property in the State was tangible, and could be assessed and taxed in the same manner. This is no longer the case. This proposed amendment is intended to remove the obstacles in the way of sane, equitable and fair tax laws, and to permit the adoption of a more satisfactory tax system.

Two-thirds Necessary

The broader powers conferred upon the General Assembly by this proposed amendment are fully safeguarded by the requirement of a two-thirds vote of all members elected to both houses of the General Assembly. The proposed amendment permits the General Assembly by a two-thirds vote to classify personal property and to provide for proper deductions and exemptions for purposes of taxation. Rates of income or other taxes which may be established under this amendment will require a two-thirds vote of the General Assembly. Should an income tax be established under the provisions of the present Constitution, no legislative authority exists to make exemptions or deductions and credits from such income tax because of other taxes paid by the same person. An income tax must, under the *present constitutional* provision, be in addition to other taxes. Under this proposed amendment it may be in substitution for other taxes, and the General Assembly will have authority to make allowances, exemptions or deductions and credits rendered proper by justice to the taxpayer.

The proposed amendment will appear upon a separate ballot at the general election of November 2, 1926. Here it is in part:

Amendment Ballot

This proposed amendment imposes no new taxes. It affects no existing exemptions from taxation. The provision concerning the "two-thirds" vote (contained in the proposed Section 14) applies only to such future tax and exemption legislation as may be pursuant to, that is "under the authority of this section." It does not apply to past legislation, nor to such future legislation as may be under the general powers of the General Assembly not as may be only under one or more of the old thirteen sections. The rates under new methods of taxation authorized by the amendment will require a two-thirds vote. The proposed amendment permits two-thirds of the members of the two houses to adopt methods of taxation, free from limitations in the present Constitution, adopted fifty-five years ago, which now prevent an equitable adjustment of the burdens of taxation. For this reason the two houses of the General Assembly propose this amendment to the people.

42 Counties Join in Fire Protection Week

(Continued from col. 2, page 1.)

with reasonable care are preventable. Following are some of the questions each county will present: Can the farmers in our county be accused of carelessness or negligence? If not what are we going to do about it or is there anything that can be done about it?

Do we believe in spontaneous combustion? What has been the experience in our county? Have there been any barn fires started by spontaneous combustion?

Matches and Smoking

The average number of fires per year for the past seven years through matches and smoking is 1,789 and the loss per year is $771,217. It is estimated that, of farm fires, 6% can be attributed to carelessness with matches and smoking materials.

A downstate farmer related this experience. On coming home from town he noticed smoke at the kitchen door and upon opening the door he found the floor on fire. After considerable effort the fire was put out. While thinking about the matter he remembered that on leaving the kitchen he knocked the ashes out of his pipe on the side of the door casing. This fire caused him to stop smoking.

Lightning Rods

Lightning rods and their value will come up for discussion.

Many insurance companies are charging less for insurance on rodded buildings.

There is still some prejudice against lightning rods. Estimated farm fire loss caused by lightning is 18 per cent of the total loss. In Illinois for the fiscal year ending June 30, 1926 there were no fires and no losses by lightning on rodded buildings. On unrodded buildings lightning caused 316 fires with a total loss of $593,424.

How to Protect

Some farmers have ladders always in place that can be used in case of fire. A large farm house in Macoupin County burned down because there was no ladder available to get up on the roof. A neighbor passing by saw the fire start from a spark from the chimney. Also a number of farmers have a fire hose attached to the force pump ready for use.

At Hastings, Michigan 400 farmers formed an association and purchased a fire truck. Farmers within a radius of eight miles of Hastings are members.

Officers and directors of the Farmers Mutual Fire Insurance Companies have rendered a valuable service in calling attention to fire hazards. Gasoline, coal oil stoves, gas engines, automobiles, electric irons, electric toasters, and cigarettes are all sources of fires.

Because of the fact that the farm bureau covers the entire county, directors and members of mutual fire insurance companies have asked the farm bureaus to call meetings to discuss fire problems. A fire prevented brings a benefit to everyone. With farm fires in Illinois amounting to 2¼ to three million dollars per year and with 75 per cent of these fires preventable the opportunity to save the farmers of Illinois about $1,800,000 per year in fire loss is a challenge. It is hoped the Fire Protection Week will be fruitful in reducing fire losses in 1927.

FARM FILLERS

THE BEAUTIFUL TRANSPARENT PICTURE showing eight purebred Percheron horses pulling a harrow, which hangs in the I. A. A. office was made from a photograph taken by J. C. Allen of Lafayette, Ind., on the farm of William Freitag in Tazewell county many years ago. Mr. Freitag was in the office recently and recognized his horses and farm in the picture.

WHALERS OF THE NORTH PACIFIC OPERATING from Vancouver, B. C., will use seaplanes this coming season in helping them locate their prey. Looking down from an altitude of 1000 feet, a range of 25 to 50 miles can be obtained, and an airman will be able to pick out the mammals and communicate his find to the fleet by means of signals.

DRYING THREE ACRES OF DISHES A YEAR, walking a quarter of a mile to bake a lemon pie, and pumping 15 tons of water in a year are some of the domestic feats performed by the average rural housewife who does not follow good methods of home management.

CHEWING GUM VALUED AT $47,124,000 WAS manufactured in the United States in 1925, according to the Department of Commerce.

Auto Insurance For Members Considered At September Meeting. Action Expected Next Month. Presidents To Meet Oct. 8

Mutual auto insurance for members of the Illinois Agricultural Association may become a reality judging from the interest created by the report of the business service committee to the executive committee at the monthly meeting on Sept. 10.

The committee decided to give the proposed project careful consideration before taking steps. But a motion by Taylor, seconded by Oexner providing that if a farm bureau mutual auto insurance company be set up, it be for and controlled by members of the Illinois Agricultural Association was passed unanimously.

A definite decision on the question of auto insurance will be forthcoming following the October meeting, scheduled for the seventh. Farm bureau presidents are being invited to attend a meeting in Chicago on October 8 in conformation with the precedent established several years ago of securing expression fresh from the membership, on general farm bureau policies.

A motion was made by Tullock, seconded by Cope that the I. A. A. lend its aid to W. P. Flint, state entomologist, in preparing for the advance of the European cornborer. George Thiem, director of information represented the I. A. A. at the International Cornborer Conference at Toledo and Detroit on Sept, 24-25.

J. G. Macherle of the State Farm Mutual Auto Insurance Co., Bloomington was given a hearing before the committee in which he presented facts and figures regarding his organization and its advantages. After careful consideration of Mr. Mecherle's message, and the report of the financial business service committee, the executive committee decided that if the I. A. A. entered into the field of auto insurance in a state-wide capacity, it would set up its own organization for farm bureau members.

The public relations committee made the following recommendations regarding protection to members against thievery to farm property:

Your Public Relations Committee has considered carefully the demand that has come up from the membership for protection against losses that occur through the thievery of farm property.

It has been suggested that the State Association should provide for such protection to its members through one of the following plans or a combination of them.

1. The organization of county protective associations and the federation of the county organizations into a state association, such associations to be organized under the law providing for associations to detect and apprehend criminals and appoint deputy sheriffs within the counties.

2. The offering by the State Association of rewards for the detection, apprehension and conviction of those guilty of farm thefts.

3. The employment by the State Association of a competent detective force that could operate throughout the state in conjunction with county farm bureaus for the detection, apprehension and conviction of those guilty of crime affecting the farmer.

4. The offering by the State Association through the county farm bureaus, or their agents, of an insurance policy that would protect the policy holder against loss from farm thefts.

In considering the question of protective associations, your Committee has taken into consideration the fact that there are such protective organizations now in the field and operating with varying degrees of success. The popular feature of offering rewards is also being worked. We do not desire to interfere with the effective activities of such organizations as the A. H. T. A., the I. S. D. A., and others now operating in these fields. However, in case it is the desire on the part of any county to organize a protective association, the necessary forms for same can be obtained from the Illinois Agricultural Association.

Your Committee cannot at this time recommend the employment of a detective force for the purpose of detecting, apprehending and convicting those guilty of violations of law affecting the farmer. The expense of maintaining such a force over such a large field of operation would probably be too great.

Investigation has indicated quite clearly that theft insurance alone be too expensive. The premiums collected from such insurance is not large. To make such a form of insurance available, it must be offered with other forms of insurance protection.

The Committee has been advised by the executive officers that there is a possibility that an insurance program of the association will be adopted at an early date. If such a program is adopted, this Committee will be ready to make recommendations along the line of protection from this source. This type of insurance can be and should be correlated with other types of insurance offered to the members of the State Association.

Supplement to Report to Executive Committee—

After due consideration of the question of what should be done by the I. A. A. and Farm Bureaus to boost the adoption of the Revenue Amendment to the State Constitution, we recommend that the November issue of the Record be published in time to get into the hands of the membership by Saturday prior to election day and that Mr. Watson and Mr. Thiem take care of preparation of the publicity relative to the Amendment.

In this connection we have further recommended that President Smith write a letter to all County Legislative Committees suggesting that they get before their Boards of Supervisors and urge them as supervisors of election to do all in their power to get voters to vote on the amendment. This to be followed a little later with sufficient number of posters and back auto curtain stickers to reasonably post the most important road corners, banks, etc. Further that literature explaining the main points of the Amendment be, in so far as possible, placed in the hands of every farm family. The posting of posters and distribution of literature to be done through the various tax committees, community chairmen or other Farm Bureau committeemen.

The Public Relations Committee has had its attention called to communications from W. B. Hedgcock relative to the activities of the I. A. A. in the matter of Boys and Girls Club work. Namely:

1. The I. A. A. Breakfast to Illinois Club Boys and Girls, and,

2. The appropriation of money toward the conduct of the Boys and Girls Club and the vocational High School judging contests.

With reference to the I. A. A. Breakfast we recommend that the I. A. A. Breakfast be given to all Illinois Club Boys and Girls on Wednesday of International Week. The anticipated attendance is 200 to 250.

Relative to the second point it appears that heretofore we have appropriated $250 for the conduct of the live stock and dairy judging contests and that the appropriation of $200 as made this year is not sufficient amount to take care of what we have done in the past and that failure on our part to appropriate the full $250 will make it necessary for those in charge of this work to seek help from other sources Hence, we recommend that the I. A. A. appropriation for this purpose be increased $50.

G. E. Metzger, director of organization reported on the Mid-west Conference at Saugatuck, and recommended a similar school for Illinois.

The Committee on Organization and Publicity made the following recommendations which were adopted as read:

Due to the growing sentiment among our members and organization workers for strengthening the service of the Department of Information to members of the Illinois Agricultural Association, the organization committee after thoughtful consideration makes the following recommendations for execution at the earliest posible moment:

1. That the Illinois Agricultural Association RECORD, now published once each month be changed to a semi-monthly.

2. That the form of the RECORD be changed to a four-page seven-column newspaper of regulation size to cost approximately $500 per issue including printing, paper, makeup, composition, proof-reading, mailing and cuts, based on a circulation of 60,000.

3. That to finance the project, the budget committee for 1927 allow the Department of Information the fifty cents per member to go for the Illinois Agricultural Association RECORD as stated on the Farm Bureau membership agreement.

4. That in the event of a possible shortage in funds to carry out the program of publicity planned for the coming year, the Department of information be empowered as a last resort to seek advertising at going rates, to defray added expenses of the department based on this enlarged program.

The committee believes that a field contact with the membership and County Farm Bureaus of the state for the sake of more effective local publicity is essential to a well ordered program. Under the present restricted means of the department this is not possible.

President Smith reported a favorable meeting with the officials of the Illinois Federation of Labor in which the latter extended to the I. A. A., the use of their radio station on the Municipal Pier at any time.

Secretary Fox reported that the Mooseheart Radio station officials had been to see him and were desirious of having the I. A. A. broadcast from their station, WJJD.

A statement on the revenue amendment prepared by Everingham and Watson was adopted as the expression of the committee.

It was moved by Taylor, seconded by Finley that the farm bureau presidents be requested to meet in Chicago on Oct. 8, and that the farm advisers be invited. Carried.

The next meeting of the Committee was set for Oct. 7, Chicago.

A Trip Thru Ohio, Michigan and Canada

(Continued from col. 1, page 1.)

the cob showing premature drying and lack of kernel development.

Mud Roads No Good

We were forced to abandon several of our stops located on the mud roads. The bus drivers would not venture off the pavement. Near Monroe, where we pulled up for luncheon, we went through the state and federal laboratories. There we saw thousands of cornborers in glass bottles. The borers were being used to breed the two parasitic wasps, Exeristes Roborator and Habrebracon Brevicornis. Their names are in keeping with the importance and esteem with which they are looked upon by our entomologists for these two insects are the great white hopes of the corn belt.

Will they be able to lick the corn borer? So far the latter has the best of the argument by reason of his ability to multiply rapidly under average corn belt conditions. But a new champion may come out of the west, and Exeristes or his brother, rather her sister, Habrebracon may be it. Here again the female of the species is more deadly than the male.

The cornborer invariably bores through the side of the stalk or into the cob of the ear and takes possession of the entire interior where he roams at will. Protected as he is from prowling birds, bats, and other natural enemies, he lives a sumptuous, secluded life eating away the core and sapping the corn plant of its life's blood. His domain is the entire length of the stalk, from the brace roots below to the upper extremities.

Cornborer Good Host

But Mrs. Exeristes and her kin Habrebracon have discovered that the borer makes an admirable host for rearing their children. With her long swordlike ovipositor unsheathed for action, the female wasp settles on the cornstalk where inside a borer is feeding, and humping her back like a jackknife drives the sword through the tough woody stalk stinging the cornborer inside. The sting paralyzes the borer rendering him *hors de combat*, whereupon the mother wasp deposits her eggs in the flesh of the host.

The eggs hatch in from 24 to 48 hours, and the little maggots finding a fresh meat supply awaiting them, attack it until there is little left but the crumbs. During the process, the Exeristes and Habrebracon maggots or larvae spin a web about the unhappy remains of Mr. Cornborer possibly to hold him more securely.

Now the problem is to propagate the parasitic wasps in large enough numbers to stem the tide of cornborer population. In Essex and Kent counties, Ontario the authorities bred and liberated 900,000 Habrebracon and 60,000 Exeristes flies last year, and since 1922, 109,300 Exeristes and 2,511,100 Habrebracon have been liberated in the cornfields of these two Canadian counties.

It is difficult to measure the effect of these parasites, but so far they are not numerous enough to control the borer. One authority told me that they couldn't hope for more than a 25 per cent control of the borer by means of the parasites for the next few years.

Wasps Quite Prolific

The wasps may bring out several broods a year. The life cycle of the Habrebracon is approximately two weeks. Wesley P. Flint, state entomologist for Illinois has liberated thousands of this latter species in this state. He is doing admirable work among the farm advisers, extension men, and through the farm press to prepare Illinois for the coming of the borer.

Worst Damage in Canada

The next day we saw our real cornborer damage. Crossing the St. Clair River to Windsor, Ontario early Friday morning I had my first five-cent ferry ride. The ferry boats dock every seven minutes and before you know it, you are whisked across the channel to Canada.

Congregated at the Prince Edward in that rather quaint, oldish town where every business house is "Limited" and where the going names for banks are "Imperial," or "Crown" we found a larger crowd than had assembled the day before. The farm machinery men from the colleges, and from implement companies, the Canadian officials, our own assistant secretary of agriculture, Rennick Dunlap, Worthley who is in charge of the control work for the federal government, Dean Curtis and Mark Thornburg of Iowa, Director Christie of Purdue leading the Indiana delegation a score or more of Ohio officials, Michigan and Wisconsin men and our own Illinois crowd represented by Professors Flint, Hackleman and Bauer from the university, county advisers Kercher, Keltner and Simpson from Vermilion, Winnebago and Gallatin counties, W. M. Givler, chairman agricultural committee the Illinois Bankers Association, DeLoach from Armour's, Frank Ridgway, Chicago Tribune, Vice-President Perkins and Cooley from the International Harvester Co., Brice Martin, Decatur Herald, Glenn and Anderson of the state plant inspection survey, and others were there.

The ride to Chatham, 60 miles northeast was through a flat, level, rather poorly drained country settled largely by Canadians of early French descent. The soil was fertile but the drainage was through open ditches almost entirely. Naturally we saw lots of water on the fields and in ditches. It was still raining. There was comparatively little corn. Kent and Essex counties, Ontario are in about the same latitude as our northern Illinois tier of counties, and normally this section grew quite a heavy acreage of corn, but today, four years after the cornborer got a toehold on Canada's lower extremity, farmers have been scared away from this crop into small grains, sugar beets, alfalfa, grapes, and truck crops.

Cash Raised to Help

And why not? The provincial government has appropriated money and is aiding farmers to raise funds to develop other interests. Already $100,000 has been raised to build plants and equip them for processing grapes in making light wines, jellies, etc. One acre of grapes brings in a net return equivalent to about 10 acres of corn.

Another $100,000 has been raised for a sugar beet plant, and the Essex County Farm Bureau according to Ira L. Graham, president, has raised money to start an alfalfa mill. Canadian farmers haven't stopped growing corn altogether but they have reduced the acreage from around 150,000 to 60,000 acres in Kent and Essex, and in the worst infested areas, the reduction is close to 90 per cent. Next year a further reduction of 10 to 20 per cent is predicted.

On the Charles Archibald farm in Essex we saw corn 90 per cent infested. The stalks were loaded with borers, from top to bottom. Farther on near St. Joachim we saw 100 per cent infestation on the Delphis Beaulieau farm. There was hardly enough good corn in the field to bother with. This corn was white cap yellow dent, planted May 24. It average 32 borers per stalk. The corn was short, much of it broken over due to rottenness caused by the insect, and altogether a discouraging mess. One could see the destruction plainly from the road.

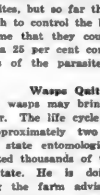
"Our worst areas are where our farmers have borrowed American customs and left their stalks standing in the field," said Lawson Caesar, provincial entomologist in charge of the eradication work. "Where our men are in the habit of removing the corn stalks for feed and fodder, the borer hasn't done nearly so much damage. Our problem now is to get every man to clean up and burn all his stalks. Our farmers are cooperating with us now that they see how serious is this problem."

Machinery Aids Control

New low cutting devices are being installed on corn binders. And the Ohio Experiment Station staff of agricultural engineers designed a new corn combine that cuts, husks, and chops up the stalk and stover into bits killing all borers and leaving the cut stover on the ground, or if desired elevating it into wagons to be carried away and stored.

The combine is rather cumbersome. It must be pulled by at least a 10-25 or 12-25 tractor. The John Deere company already has built one machine which is now in use on the county farm near Monroe. The International Harvester Co. likewise has built a powerful stubble pulverizer that slashes all corn stubble to bits. Both machines may become practical with further development if the borer hits Illinois and Iowa.

A recent provincial act in Ontario requires that every remnant of the previous year's corn crop be cleaned up by May 20. Inspectors have been appointed to see that the law is carried out. Weeds and trash are included with stubble, in the order. L. Caesar who is chief administrator in this control work states that most of the cleanup work will be done this fall.



Ira Graham, an Ohioan farming 900 acres in Essex reduced his acreage of corn from 300 to 150 acres. He will make a further reduction next year. The borer promises to stop canning of sweet corn altogether. In a badly infested field on one farm, the owner had few borers last year. This year there is 90 per cent infestation with prospects for a yield of only 15 bushels an acre.

The borer showed up in five northeastern counties of Indiana and in southeastern Michigan as far west as Kalamasoo. Its progress was approximately 65 miles through Southern Michigan according to the state entomologist. An east wind in June that lasted for 10 consecutive days is thought to have aided the cornborer moths in their flight westward. Allen, DeKalb, Steyben, LaGrange, and Noble are the Indiana counties where borers have been detected.

A strict quarantine requiring the stopping of all cars, wagons, and vehicles coming through the infested territory was found necessary. Numerous cases are on record of tourists carrying with them infested roasting ears. Forty borers were discovered in four dozen roasting ears taken from a tourist in Northwestern Ohio bound for Chicago.

If the cornborer comes to the corn belt in serious numbers what will be the result. Judge for yourself in the light of this information.

Eight Per Cent Tax Reduction in McLean

J. C. Watson.

AN eight per cent reduction on land values for tax purposes was made in McLean County according to recent word from the board of review there.

The reduction came following a long drawn-out controversy regarding the authenticity of various figures presented by John C. Watson, tax expert for the Illinois Agricultural Association and members of the McLean County board.

Figures presented last year by Mr. Watson showed a 10 per cent disparity between the valuations of farm and city real estate. Again this year, Mr. Watson presented two sets of figures taken from the county records showing land and real estate transactions. Figures which included master in chancery sales showed that land values were 12 to 13 per cent higher than city property. And excluding master in chancery sales there was a disparity of eight per cent against the farmer.

Criticisms of Watson's figures made by R. L. Carlock, member of a specially appointed investigating committee from McLean county were overruled in making the reduction.

The eight per cent reduction will amount to approximately a saving of $40,000 to the farmers of McLean county. Bank assessments likewise were reduced 16⅔ per cent.

This reduction of land valuations for tax purposes in McLean county follows similar reductions made within the past few weeks in Ogle and Lee counties. Word from Ogle county recently was to the effect that a 20 per cent reduction in land values was assured. An 18 per cent reduction in land values for assessment purposes was reported several weeks ago in Lee county.

These three reductions secured by the I. A. A. in recent months will result in a saving to farmers in the three counties of approximately the cost of operating the state association for the entire year.

VOTE "YES" ON THE TAX AMENDMENT, TUESDAY, NOVEMBER 2

Peek Raps Hoover-Mellon Policy Of Industry Expansion

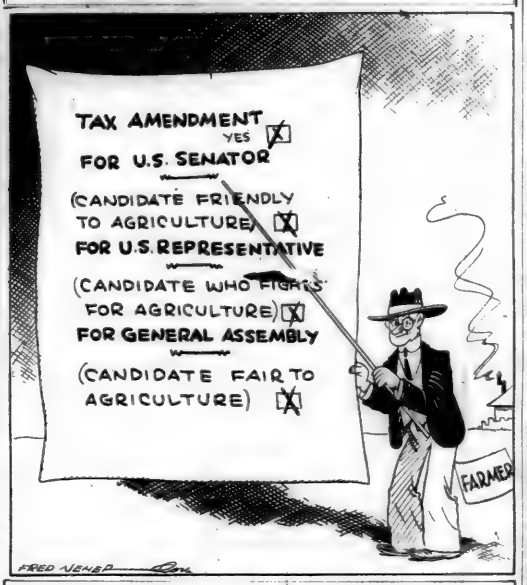
Sets Forth Present Position of Agriculture With Relation To Other Industries In Report.

Now—before election—is the time for candidates from agricultural states, to be made to understand that their duty lies first to the economic interests of their constituents, and secondly to their political parties. It may be said that this is a sectional stand. If so it has been forced upon us by the sectional position already taken by the industrial East. The need is for men in Congress who have vision enough to see the problem and having seen it, to rise above the crack of the party whip in working courageously for its solution.

If the Hoover-Mellon policy of expanding exports means anything, it means the definite submergence of agriculture.

Geo. N. Peek.

This is the warning sounded by the Executive Committee of 22 of the North Central States Agricultural Conference, George N. Peek, chairman, in a recent bulletin setting forth the present position of agriculture with reference to other industries in our national life.



Our national policy as it relates to agriculture does not fit present conditions, states the report. But instead of statesmen who can see its failure we have at the head of the administrative affairs of the nation men who are aggressively pushing a program of favoritism to industry that will not only continue but must inevitably increase the disadvantage not only of the farmers' position, but the position of all those great sections of the United States which are primarily agricultural.

Different Now

When a surplus agricultural production was necessary to repay foreign investors in the United States and to buy what we must import, our national policy of expanding agriculture upon an export basis worked admirably. When our greatest national test came it was our surplus agricultural production that fed the Allies and decided the issue of the World War. But the international balance shifted as a result of the war. We have the gold. The rest of the world owes us. These facts inevitably limit the volume of exports, both industrial and agricultural, from the United States. Our wheat, corn, pork, cotton and sometimes beef can bring the farmers only the price which foreign buyers will pay for what is left after the domestic need is satisfied. This condition is crucifying agriculture. It is directly due to our past policy of agricultural expansion, and to the development of the protective system.

(To be continued.)

The Way to Better Representation

SPECIMEN BALLOT

CONSTITUTIONAL AMENDMENT BALLOT

Proposed Amendment Adding Section 14 to Article IX of the Constitution of the State of Illinois

This proposed amendment imposes no new taxes. It effects no existing exemptions from taxation. The provisions concerning the "two-thirds" vote (contained in the proposed Section 14) applies only to such future tax and exemption legislation as may be pursuant to, that is "under the authority of this section." It does not apply to past legislation, nor to such future legislation as may be under the general powers of the General Assembly nor as may be only under one or more of the old thirteen sections. The rates under new methods of taxation authorized by the amendment will require a two-thirds vote. The proposed amendment permits two-thirds of the members of the two houses to adopt methods of taxation, free from limitations in the present Constitution, adopted fifty-five years ago, which now prevent an equitable adjustment of the burdens of taxation. For this reason the two houses of the General Assembly propose this amendment to the people.

HERE'S HOW TO MARK IT

FOR the proposed amendment adding Section 14 to Article IX of the Constitution.	**X**
AGAINST the proposed amendment adding Section 14 to Article IX of the Constitution.	

Method For Figuring Majority Votes Explained

By John C. Watson

The language of the Constitutional provision relating to amendments has caused a widespread belief that the proposed tax amendment, to be adopted, must receive a vote in excess of one-half of all of the votes cast for *members of the General Assembly.* This belief is erroneous. In 1917 (281 Ill. 17), the Supreme Court, two justices dissenting, held that a proposed amendment, to be adopted, must receive a vote in excess of one-half of the combined vote of *all candidates for the office for which the highest number of votes is cast.*

J. C. Watson.

The Illinois Agricultural Association believes that every qualified elector should vote both upon candidates for office and upon questions of public policy. In every election, however, many qualified electors do not vote. In this respect the coming election is not likely to be any exception. This situation offers an unusual opportunity for supporters of the amendment to do very effective work for it.

If people cast no other ballot, they ought to vote upon so important a question of public policy as the tax amendment. Under these circumstances a vote will count more for it than when the person casting it also votes for candidates for office. For he will increase the total number of votes for the amendment without increasing the vote of all candidates for any office.

If any person votes for candidates, but fails to vote on the amendment, his failure to vote on the amendment will have the same effect as if he had voted against it.

More Forces Rally to Support of Tax Relief Proposal As Campaign For And Against Draws To A Close

If Public Is Alive to Present Intolerable Condition of Our Tax Laws, Friends of Amendment Say It Will Get Needed Majority.

AS THE campaign to pass the revenue amendment draws to a close, the only organized opposition to it comes from the State Chamber of Commerce whose members are far from unanimous in endorsing the stand of its president and officers, the Illinois Manufacturers Association, and the Chicago Tribune.

During the past two weeks, the situation in Cook county has been greatly improved. The press has rallied to the support of the amendment. The Evening American, the Herald-Examiner, the conservative Chicago Daily News, the Evening Post, and the Daily Journal have come out either with strong editorial endorsements or comments friendly to the tax measure. The city Club voted 4 to 1 in favor and the Chicago Federation of Labor endorsed it.

But the opponents of tax amendment have on their side the apathy and inertia of the public, a powerful ally. The results of the election on Nov. 2 will tell whether the forces working to give the legislature an opportunity to revise our antiquated tax laws have succeeded in breaking down the barrier of disinterestedness, shown heretofore by so many people in important issues that affect their welfare.

Downstate Support

Downstate, the proposal has received minor consideration in the press, although most editors who have studied the amendment and understand it have come out with strong editorials in support. A few have taken their information from profligate literature bearing false witness against the proposition, but from no source has there been any defense offered to the present intolerable tax situation.

The tax amendment, nevertheless, has attracted more attention than either of the other two issues on the little ballot. The referendum on modification of the federal prohibition act which drew headlines in the metropolitan dailies several months ago is almost forgotten. The drys feel confident of a victory here, and the wets are hopeful that the vote will result in another entering wedge to separate the country from Volsteadism.

Another Referendum

The referendum to lease the state-owned Illinois and Michigan Canal has received little attention. The general opinion seems to be that the old canal is no longer useful as such and should be filled in so the space it occupies can be leased to private parties for buildings and other purposes.

The Illinois Agricultural Association has distributed more than 75,000 "Truth About Tax Relief" folders through the county farm bureaus. The Tax Relief Committee made up of representatives of the organizations working for the amendment likewise has issued 70,000 booklets explaining the proposal and answering charges of the opponents.

Answers To Charges

Following are answers to some of these charges:

1. The amendment provides for an income tax in addition to other taxes.

Answer—The amendment provides for no tax not now permitted by the Constitution. The General Assembly now has the power to establish an income tax, but such a tax must be in addition to property taxes. The pending amendment permits an income tax in lieu of property taxes.

2. Classification would permit an unfair burden to be thrown on real estate or other classes of property.

Answer—The present taxing system not only permits, but compels an unfair burden on real estate. Classification is necessary to prevent double taxation, as for example, of property and income from property, or of real estate and mortgages thereon.

3. The amendment would give the Legislature unlimited power to increase taxes.

Answer—The General Assembly now has unlimited power to increase taxes. The amendment grants it no right which it does not now have except the power to equalise the burden and adjust the taxing

(Continued on col. 5, page 2.)

President Smith Urges Affirmative Vote On Amendment

To all those who favor a fair and equitable tax system, I have no hesitancy in recommending that they not only vote for, but actively support in every legitimate way, all efforts put forth to secure passage of the Revenue Amendment to the Constitution to be voted on November 2.

Careful consideration of this proposal during recent months has caused the lines to be tightly drawn between those favoring and those opposing the Amendment.

It discloses that the opposition is largely made up of those who, under the present tax system, are escaping in a large measure, their due proportion of the tax burden, while those who have unquestionably been bearing an unjust proportion of this burden are most actively supporting this proposal.

The farm and home owners, to a large degree, make up the latter class and we earnestly solicit not only the affirmative vote of the farmers of Illinois, but all those who favor a modern and fair division of the cost of government.

Earl C. Smith

EXECUTIVE COMMITTEE

Published once a month at 404 North Wesley Ave., Mount Morris, Illinois, by the Illinois Agricultural Association. Edited by Department of Information, E. G. Thiem, Director, 608 South Dearborn Street, Chicago, Illinois. Entered as second-class matter October 20, 1925, at the post office at Mount Morris, Illinois, under the Act of March 3, 1879. Acceptance for mailing at special rate of postage provided for in Section 412, Act of February 28, 1925, authorized October 27, 1925. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record. Postmaster: In returning an uncalled for or missent copy, please indicate key number on address as is required by law.

Helping the Farmer

"I AM FIRST for Illinois, then for the great Middle West, and then for the United States and America.

"The farmer is one man in America we should do everything in our power to help. I will help him all I can so long as I don't interfere with the present economic position this country now enjoys."

Thus spoke Congressman Martin B. Madden of Chicago, chairman of the powerful appropriations committee in Congress, before a group of Chicago business men and farm leaders in his home city recently.

Mr. Madden is a shrewd business man, an able and valuable representative to have in our law-making body. But his expressed good wishes for the farmer are like the biblical sounding brass and tinkling cymbal.

Mr. Madden voted and worked against the Haugen bill in the last Congress. This bill embodied the only legislation that gave promise of relieving the economic plight of the farmer "which he is far from enjoying." Mr. Madden stated that he is first for Illinois and the Middle West, and yet he stood with the industrial East when the test came. We would remind the congressman that agriculture is a dominant industry in Illinois and the Middle West. The farmer wants more convincing evidence than mere statements that Mr. Madden is for the state and section of the country he represents.

Know Your Friends

THE best index to the fitness of a candidate is his record in office. And the most reliable means of finding out the attitude of a representative toward agriculture is to study his voting record on farm measures.

In this issue we are presenting the records of candidates for Congress and the General Assembly on legislation supported by the Illinois Agricultural Association. We are glad to announce that all our down state Congressmen as well as our two U. S. senators supported surplus-control legislation in the last Congress at least with their votes. A few worked industriously on this farm aid bill and these should be given special consideration.

While the issues in the last General Assembly were not as clean cut for agriculture as they might have been, yet the vote on the Tice bill, the revenue amendment, and the state police bill all of which were endorsed by the Association indicates the attitude of the candidate toward representing his farm constituency. Remember your friends when you go to the polls Nov. 2.

International Time

THE annual classic of the breeds known far and wide by lovers of good livestock as the International will be with us again in less than a month. The time is Nov. 27 to Dec. 4. Why not bring your wife to the city for that long delayed wedding trip, and show her the sights. Our friend Barney Heide, manager, says it will be a bigger, and better show than ever.

Help The Flood Victims

HUNDREDS of our neighbors in the Illinois Valley are homeless with their crops totally submerged and their farm machinery, buildings, and livestock swept away by the floods. More than 100,000 acres of corn are reported under water. President Smith sent out an appeal to the county farm bureaus last week for contributions to a relief fund for these stricken people. Solicitation for funds will continue throughout the winter. The American Red Cross with headquarters at Beardstown will have charge of and distribute all funds raised. Here is an opportunity to help a neighbor in distress. Leave your contribution at your county farm bureau office.

Why Auto Insurance

THE new mutual auto insurance company presented elsewhere in this issue offers several advantages to members of the Illinois Agricultural Association not revealed by a cursory examination of its merits.

The control of the company is democratic and rests within the membership. The I. A. A. Executive Committee will act as the first board of directors.

There will be no expensive sales force since the county farm bureaus are their own agents.

The policy holder always retains his interest in the reserve and surplus accumulated by the company. If he withdraws he is entitled to his share of the surplus on hand at the time of withdrawal. There is no such advantage in a privately owned and controlled company.

Farm Bureau members are better than average moral risks. In every community they are the more substantial and responsible citizens.

Liability and accident insurance offers protection that should not be overlooked in view of the alarming number of smashups and fatalities occurring annually. The opportunity offered the member to have this protection in his own company at a rate which should be decidedly lower than is offered elsewhere should not be overlooked. Stop at the local Farm Bureau office, sign a policy, and become a charter member in your own company.

The Important Issue

THE proposed revenue amendment to the Illinois constitution is the important issue for farmers to vote on Nov. 2. If the amendment carries it must have a substantial majority downstate. Nothing but the solid "Yes" vote of farmers will make this possible. Help lift the burden of taxation from farms and homes by doing your bit at the polls next Tuesday.

Illinois ranked fifth among the states in the number of motor cars and trucks registered the first six months of 1926. The five leading states are as follows: New York, 1,562,492; California, 1,459,570; Ohio, 1,370,756; Pennsylvania, 1,326,682; Illinois, 1,217,265. Michigan and Texas ranked next with less than a million each. A total of 19,697,832 motor vehicles were registered in the United States during this period.

VIEWS FROM THE PRESS

(Galesburg Republican-Register)

LINING UP

Forces seem to be lining up for and against the proposed tax amendment.

Here for instance comes the ILLINOIS AGRICULTURAL ASSOCIATION RECORD, with a leading article espousing the amendment and urging people to vote for it and representing that it has the support of this association, the Illinois Federation of Labor, the Illinois Bankers Association, the Illinois Federation of Women's Clubs, the Illinois League of Woman Voters, the Illinois State Teachers' Association, the Illinois Association of Real Estate boards, and other interests. . . . . .

On the other hand the Illinois Chamber of Commerce representing largely the business interests of the State has come out in opposition to the measure after a referendum vote showed that a large number of the Chambers were opposed to it.

Furthermore there has just come to hand a small pamphlet entitled: "Danger!" and with a lantern on it, and "Vote No!" all printed in red ink, and it is representing the sentiments of the Illinois Manufacturing Association.

The RECORD points out the benefits that the amendment, if adopted by the people, will confer. This circular represents that it will open the door to unlimited taxation.

The RECORD story shows that along this line the Legislature will have no more power than it has at present, and the opponent prints by years a list of figures showing how Illinois taxes have mounted.

However, the association seems to have forgotten that this mounting has all been done under the present system, and it does not answer the problem of equalizing the burden of taxation, a point that the RECORD stresses.

It is evident that the discussion is now on. The Republican-Register believes that the approval of the amendment, giving the Legislature needful powers does not signify that the Legislature will abuse those powers, for if it did, its members would not dare to come up again for election.

Furthermore it is clear that the present provision of the constitution has not afforded the opportunity to abolish some of the wrongs which the present system has given rise to.

(Decatur Herald)

SPIKE THE LIES

Second only to forth-right corruption, the most destructive tendency in democratic government is the clouding of referendum issues by deliberate misrepresentation. It appears to be more and more the reliance of opponents, not to meet an issue fairly in argument, but to defeat the proposal by lying about it.

The proposed new constitution for Illinois, submitted to the voters a few years ago, was defeated by lies. Teachers were told that their pensions were endangered; trade unions were told that the new constitution would operate in favor of the open shop; there were other alarming tales for each class of the population. None of these allegations were true, but they had their effect. . . . . .

Now, the voters of Illinois are about to be asked to cast their ballots upon a proposed amendment to the tax clause of the state constitution, and again the opponents are found arguing, not the merits of the real question, but the bogey of a malicious falsehood. . . . . .

The most common and reprehensible lie that is told about the proposed tax amendment is, that it is going to set up new, and additional taxes—that it is "going to take more money out of the pockets of the people." There is every reason to believe that the men who are raising this smoke screen of fear know, as they do so, that their statements are false. It just happens to be the grave misfortune of this people that leaders have learned that it is easier to beat a measure by lying about it than by meeting the issue squarely.

The truth about the proposed amendment is, that it does not authorize any new tax whatever. Any form of taxation possible under the new section can be enacted by the legislature under the old, including the income tax. If there is any movement for a new tax after the amendment is adopted, that issue will be a new one, to be met and fought out on its own merits. . . . . .

The lies will continue to be spread industriously, right up to the day of the election. It is the business of every landowner who feels the sting of excessive taxes to see that the lies are met and labeled for what they are. The issue presented by this referendum is too important to the people of the state to go down by default, in a cloud of misrepresentation.

KNOW YOUR FRIENDS WHEN YOU GO TO THE POLLS. VOTE ACCORDINGLY

Legislative Committee Reports On Representatives in Congress And General Assembly Showing Records

State Legislators' Vote On Revenue Amendment, Tice Bill, And State Police Bill Supported By Farmers Indicates Attitude Toward Agriculture.

Editors Note:
The following legislative report of representatives in Congress and the General Assembly is published in acordance with the policy of the Illinois Agricultural Association in giving its members facts about their representatives in the state and national law-making bodies. The attitude or interest of the candidate in agricultural legislation is the basis of this report.

FOR UNITED STATES SENATOR

None of the candidates for this office subject to election Nov. 2 has a previous record in the United States senate. Frank L. Smith, republican candidate declared himself early in his candidacy for farm relief, as provided in the surplus control legislation supported by the Illinois Agricultural Association. His past record in Illinois has shown him to be friendly and helpful to agriculture. Smith comes from a farming district, and his interests are mainly agricultural.

George Brennan, democratic candidate, placed himself on record in favor of farm relief and surplus control legislation in his Bloominton speech.

Other candidates for the United States senate so far as we are informed have taken no position on farm relief through surplus control legislation.

For United States Representative

Among the 10 representatives in the 69th Congress from Chicago and Cook county only one, Adolph J. Sabath, voted in favor of the Haugen bill which was supported by the Illinois Agricultural Association. All the others were against it.

Every downstate congressman voted for the bill. Those who most actively supported it and spoke for it from the floor of the House are starred, in the list of those who voted for the bill, following:—

Richard Yates, Henry R. Rathbone*, Adolph J. Sabath, Frank R. Reid, Charles E. Fuller (deceased), William R. Johnson, John C. Allen, Edward J. King, William E. Hull, Frank H. Funk*, William P. Holaday, Charles Adkins*, Henry T. Rainey*, Loren E. Wheeler*, Ed. M. Irwin, William W. Arnold, Thomas S. Williams*, Edward E. Denison.

For General Assembly.

The Lantz revenue amendment resolution, the Tice Tuberculosis Eradication Bill, and the Dunlap State Police bill are the three measures in which the Illinois Agricultural Association was most interested in the last session of the General Assembly. The gasoline tax bill didn't come to a vote so there was no basis for an authentic report on this measure.

Eighth district—Counties of McHenry, Lake and Boone.

Rep. Wm. Weiss, Waukegan, lawyer.
Voted for revenue amendment, Tice Bill, and state police bill.

Rep. N. L. Jackson, Belvidere, farmer.
Voted for revenue amendment, but failed to vote on Tice Bill and state police bill.

Tenth district—Ogle and Winnebago counties.

Rep. David Hunter, Jr., Rockford, farmer.
Voted for revenue amendment, Tice Bill and state police bill. Good record.

Rep. Leroy Y. Green, Rockford, lawyer.
Voted for revenue amendment, Tice Bill, but against state police bill.

Twelfth district—Counties of Carroll, JoDaviess and Stephenson.

Rep. John Acker, Savanna, salesman.
Voted for revenue amendment. Did not vote on Tice Bill.
Voted to kill state police bill.

Rep. Chas. D. Franz, Freeport, wholesale beverage business.
Voted for revenue amendment and for Tice Bill. Did not vote on state police bill.

Fourteenth district—Kane and Kendall County.

Rep. Frank A. McCarty, Elgin, lawyer.
Voted for revenue amendment, but against Tice Bill and state police bill. Mr. McCarty led the fight against the Tice Bill, but later actively opposed reduction of the appropriation for tuberculosis eradication. A good fighter, but has been on wrong side of some important public questions, namely, on T. B. eradication measures.

Rep. John M. Peffers, Aurora, attorney.
Voted for revenue amendment, state police bill and Tice Bill. Good record.

Rep. Ralph H. Hoar, Elgin, insurance.
Voted for revenue amendment, Tice Bill and state police bill. Good record.

Sixteenth district—Counties of Livingston, Marshall, Putnam and Woodford.

Rep. Chas. M. Turner, Wenona, farmer.
Voted for revenue amendment, Tice Bill, and state police bill. Mr. Turner was chairman of committee on agriculture in the House during last session. He had a consistent voting record for the session and deserves re-election.

Rep. Calistus A. Bruer, Pontiac, farmer.
Voted for revenue amendment and Tice Bill. Also for state police bill. Has a consistently good record on farm measures and exhibits marked qualities of leadership.

Rep. Michael Fahy, Toluca, real estate.
Voted for revenue amendment and Tice Bill. Voted against state police bill.

Rep. Robert Scholes, Peoria Heights, lawyer.
Voted for revenue amendment and Tice Bill, but against state police bill. Mr. Scholes was speaker of the House during last Assembly. Fair in most of his dealings with agricultural questions, but he was not fair in giving consideration to friends of the Tice Bill, when a special conference committee to iron out the disagreements was named.

Rep. David H. McCluggage, Peoria, hotel proprietor.
Voted for revenue amendment, and Tice Bill, but against state police bill.

Twentieth district—Grundy and Iroquois counties.

Rep. John Trotter, Coal City, farmer and banker.
Voted for revenue amendment, but was away because of illness when Tice Bill was voted on. Voted against state police bill.

Twenty-second district—Edward and Vermilion counties.

Rep. H. M. Luckey, Potomac, farmer.
Voted for revenue amendment and Tice Bill, but against state police bill.

Rep. Abraham L. Stanfield, Paris, grain dealer.
Voted for revenue amendment and Tice Bill. Against state police bill.

Rep. Edgar B. Brown, Paris, accountant.
Voted for revenue amendment and Tice Bill. Voted to kill state police bill.

Twenty-fourth district—Champaign and Piatt counties.

Rep. Roger F. Little, Champaign, lawyer.
Voted for revenue amendment, Tice Bill and state police bill. Good record.

Rep. James A. Reeves, Champaign, farmer.
Voted for revenue amendment and Tice Bill, but against state police bill.

Twenty-sixth district—Ford and McLean Counties.

Rep. Gus J. Johnson, Paxton, real estate.
Voted for revenue amendment, Tice Bill and state police bill. Consistently favors farm legislation and has marked qualities of leadership. Deserves re-election.

Rep. A. L. Hutson, Colfax, merchant.
Voted for revenue amendment, Tice Bill, and state police bill.

Rep. Jacob Martens, Anchor, farmer and banker.
Voted for revenue amendment and Tice bill. Also for state police bill.

Twenty-eighth district—DeWitt Macon and Logan Counties.

Rep. W. C. Chynoweth, Decatur, farmer.
Voted for revenue amendment, Tice Bill and state police bill.

Rep. John Clark, Decatur, miner.
Voted for revenue amendment. Did not vote on Tice Bill. Voted against state police bill.

Rep. Grover G. Hoff, Decatur, attorney.
Voted for revenue amendment, Tice Bill and state police bill.

Thirtieth district—Brown, Cass, Mason, Menard, Schuyler and Tazewell.

Rep. Homer J. Tice, Greenview, farmer.
Voted for revenue amendment, Tice Bill and state police bill. Tice is one of the veterans of General Assembly. Has sponsored many agricultural bills. Has splendid record and deserves re-election.

Rep. H. B. Teel, Rushville, lawyer.
Did not vote on revenue amendment. Voted for Tice bill, also state police bill.

Rep. Martin B. Lohman, Pekin, insurance and real estate.
Voted for revenue amendment and Tice Bill. Against state police bill.

Thirty-second district—Hancock, McDonough and Warren Counties.

Rep. Rollo R. Robbins, Augusta, publisher.
Voted for revenue amendment, Tice Bill and state police bill. Robbins has a consistently favorable record on farm legislation.

Rep. James H. Foster, Macomb, insurance.
Voted for revenue amendment, Tice Bill, also state police bill.

Rep. Wm. Adcock, Galesburg, farmer.
Voted for revenue amendment and state police bill. Did not vote on Tice Bill. Adcock introduced a resolution memorializing congress to provide for a bounty on exportable surplus of farm products. Passed unanimously.

Thirty-third district—Henderson, Mercer and Rock Island counties.

Senator Martin R. Carlson, Moline, Merchant.
Voted in favor of Lantz Revenue Amendment Resolution and for Tice bill. Voted against reducing appropriation for tuberculosis eradication. Voted for Police bill. A good record.

Representative Harry M. McCaskrin, Rock Island, Attorney.
Voted for Revenue Amendment and Tice Bill. Against Dunlap Police bill. Good record.

Rep. Thos. P. Sinnett, Moline, attorney.
Voted for Revenue Amendment and the Tice bill. Also voted for state police bill. Good record.

Thirty-fourth district—Clark, Coles and Douglas.

Rep. Harry Baxter—Newman, automobiles and farmer.
Voted for revenue amendment and Tice Bill. Voted to kill state police bill.

Rep. Walter E. Cork, Marshall, insurance.
Voted for revenue amendment and Tice Bill. Voted to kill state police bill.

Thirty-fifth district—DeKalb, Lee, Whiteside counties.

Senator Harry G. Wright, DeKalb, banker.
Voted for revenue amendment and Tice bill. Voted against reducing appropriation for tuberculosis eradication. Voted for state police bill. Senator Wright has been friendly to agricultural proposals, and has a good record.

Rep. Henry C. Allen, Lyndon, farmer.
Voted for revenue amendment, Tice Bill, and state police bill. Allen has a very good record and has been favorable to measures for betterment of agriculture.

Rep. John P. Devine, Dixon, lawyer.
Voted in favor of revenue amendment and Tice bill. Against state police bill. Devine has not always shown disposition to support agricultural legislation but of late his record has been fairly good.

Thirty-sixth district—Adams, Pike and Scott Counties.

Rep. A. Otis Arnold, Quincy, publishlisher.
Voted for revenue amendment, Tice Bill and state police bill. Consistently favorable to agricultural legislation. Deserves re-election.

Rep. Harold Bush, Pittsfield, newspaper publisher.
Voted for revenue amendment and Tice Bill. Also for state police bill.

Thirty-seventh district—Henry, Bureau, Stark counties.

Senator Randolph Boyd, Galva, retired manufacturer.
Voted for revenue amendment and for Tice bill. Voted to reduce appropriation for tuberculosis eradication. Voted for Barr appropriation bill on its passage. Voted for state police bill. Record good.

Rep. Frederick W. Rennick, Buda, lawyer.
Voted for Lantz revenue amendment resolution, also for tuberculosis eradication bill. Voted for state police bill. Good record.

Rep. John R. Moore, Kewanee, lawyer.
Voted for revenue amendment, Tice bill, but against state police bill.

Rep. Milton T. Booth, Atkinson, retired merchant.
Voted in favor of revenue amendment. Tice bill, and state police bill. Good record.

Thirty-eighth district—Greene, Jersey, Macoupin and Montgomery counties.

Rep. Otto C. Sonnemann, Carlinville, retired.
Voted for revenue amendment and Tice Bill. Against state police bill.

Rep. Robert Whiteley, Carlinville, farmer and merchant.
Voted for revenue amendment and Tice Bill. Against state police bill.

Rep. Truman Snell, Carlinville, attorney.
Voted for revenue amendment and Tice Bill. But against state police bill.

Thirty-ninth district,—LaSalle County.

Two new candidates for Senate: George M. Reynolds, Utica, republican, and B. J. Shanley, Ottawa, democrat.

Rep. R. G. Soderstrom, Streator, Linotype Operator.
Voted for revenue bill and Tice bill. Against state police bill.

Rep. John Wylie, Ottawn, Farmer.
Did not vote on Lantz revenue amendment resolution; voted for Tice and state police bills.

Rep. Lee O'Neil Browne, Ottawa, Lawyer.
Failed to vote on revenue amendment; voted for Tice bill, but voted to kill state police bill.

Fortieth district—Christian, Shelby, Fayette and Cumberland counties.

Rep. H. D. Sparks, Shelbyville, Business Education.
Voted for revenue amendment and Tice bill. Failed to vote on state police bill.

Rep. Arthur Roe, Vandalia, Lawyer.
Voted for revenue amendment, Tice bill, and against state police.

Forty-first district—DuPage and Will counties.

Senator Richard J. Barr, Joliet, Lawyer.
Voted for revenue amendment and for Tice bill. Voted to reduce appropriation for tuberculosis from $3,000,000 to $2,000,000 in his own bill. Did not vote on state police bill. Barr generally has given active support to farm measures and has a good record.

Rep. Lottie Holman O'Neill, Downers Grove, Home-maker.
Voted for revenue amendment and Tice bill. Failed to vote on state police bill.

Rep. Michael F. Hennebry, Wilmington, Lawyer.
Voted for revenue amendment, but did not vote on Tice or state police bill.

Forty-second district — Clinton, Marion, Clay, Effingham counties.

Rep. R. J. Branson, Centralia, Attorney.
Voted in favor of revenue amendment and for Tice bill. Voted to kill state police bill.

Rep. A. B. Lager, Carlyle, Lawyer.
Voted for revenue amendment and the Tice bill. Voted against state police bill.

Forty-third district—Knox and Fulton Counties.

Sen. Wm. S. Jewell, Lewistown, Ill., Lawyer.
Voted for revenue amendment and for Tice bill. Voted to reduce appropriation for tuberculosis eradication. Voted against state police bill. Fair record.

Rep. Reed F. Cutler, Lewistown, Lawyer.
Voted for revenue amendment and Tice bill. Voted against state police bill. Mr. Cutler was majority floor leader and as such had an opportunity to wield more influence over legislation than the ordinary member. He actively supported the movement in the committee on appropriations to reduce the appropriations for tuberculosis eradication from three million dollars to one million and a half dollars. Mr. Cutler showed an inclination to be governed more by personal likes and dislikes of member sponsoring legislation than merits of matter contained in the bill.

Forty-fourth district—Randolph, Jackson, Perry, Washington and Monroe counties.

Rep. Elbert Waller, Tamaroa, School teacher.
Voted for revenue amendment but against Tice bill and state police bill.

Rep. Henry Eisenbart, Waterloo, Insurance.
Voted no on revenue amendment. Did not vote on Tice bill, and voted against state police bill. Poor record.

Rep. Charles J. Kribs, Prairie, DuRoacher, General merchandise.
Did not vote on revenue amendment nor the Tice bill. Voted against state police bill. Poor record.

Forty-fifth district—Morgan and Sangamon Counties.

Sen. Earl B. Searcey, Springfield, Writer.
Voted for revenue amendment, but did not vote on Tice bill. Voted against effort to reduce appropriation for tuberculosis eradication. Did not vote on state police bill. (An entire new slate of candidates for representative has been nominated from this district.)

Forty-sixth district — Jefferson, Wayne, Richland and Jasper Counties.

Rep. W. B. Phillips, Mt. Vernon, Banker.
Voted for revenue amendment, Tice bill and state police bill. Good record.

Forty-seventh district—Bond and Madison Counties.

Norman G. Flagg, Moro, Farmer.
Candidate for state senator on republican ticket. Had excellent record as representative in the last General Assembly. Voted for revenue amendment, Tice bill and state police bill.

Rep. Chas. F. Malloy, Sorento, Oil, gas and coal leases.
Voted for revenue amendment and for tuberculosis eradication bill. Voted against state police bill.

Forty-eighth district—Crawford, Edwards, Lawrence, Wabash, White, Gallatin and Hardin Counties.

Rep. Ed. Ryan, Lawrenceville, Farmer.
Voted for revenue amendment, Tice bill, and state police bill. Good record.

Rep. Jerome L. Harrell, Norris City, Publisher and lawyer.
Voted for revenue amendment, Tice bill and state police bill. Good record.

Forty-ninth district — St. Clair County.

Senatorial candidates are both new men.

Rep. Ed. P. Petri, Belleville, Insurance, real estate and loans.
Voted in favor of revenue amendment and against state police bill. Failed to vote on Tice bill.

Rep. Thomas L. Fekete, East St. Louis, Lawyer.
Voted for revenue amendment, Tice bill and state police bill.

Fiftieth district—Franklin, Pulaski, Williamson, Union and Alexander Counties.

Rep. Wallace A. Bandy, Marion, Real estate and insurance.
Voted for revenue amendment, Tice bill, and state police bill. Good record.

Rep. Carl Choisser, Benton, Lawyer.
Voted for revenue amendment and Tice bill. Against state police bill.

Fifty-first district—Johnson, Pope, Saline, Massac and Hamilton Counties.

Candidates for Senator from this district are new men.

Rep. Claude L. Rew, Harrisburg, Insurance and real estate.
Voted for revenue amendment and Tice bill. Voted against state police bill.

Rep. W. B. Rush, Metropolis, Farmer and merchant.
Voted for revenue amendment, Tice bill and state police bill. Good record.

Rally to Proposal

(Continued from col. 5, page 1.)

system to new conditions as they arise.

4. The Legislature cannot be trusted with additional power. It might tax important industries out of business.

Answer—The Legislature now has the power to tax important industries out of business. But nobody wants to tax industry out of business. Nobody wants to make Illinois an unfavorable home for industry, capital, or any other worthy enterprise. Legislatures don't do what nobody wants done.

The amendment requires a two-thirds vote on all legislation enacted thereunder. Any legislation so enacted may be repealed by a majority vote. If any one does not believe these provisions a sufficient safeguard against unfair legislation, he must regard representative government as a failure.

5. The requirement of a two-thirds vote of the members of each House for the enactment of any legislation under the amendment is itself unconstitutional.

Answer—This objection ignores the fact that the Constitution requires a two-thirds vote for the expulsion of members by either house, the conviction of any official under impeachment, the passage of any act with an emergency clause, the passage of any act over the Governor's veto, or the submission of a constitutional amendment.

6. The amendment would permit the single tax—that is, the taxation of land without regard to buildings or other improvements.

Answer—It is specifically provided in the amendment that real estate except mining land or land devoted to reforestation, shall be in one class. There is no provision for the taxation of land and improvements separately or for the taxation of land and the exemption of improvements.

5000 CHARTER MEMBERS GOAL NEW AUTO INSURANCE COMPANY

19,828 People Died From Auto Accident Last Year Is Report

Ten Times As Many Are Injured and Thousands of Cars Are Wrecked.

By V. Vaniman

THE RAPID growth of the automobile industry has been matched by a similar growth in automobile accidents.

V. Vaniman.

More people are killed by the automobile today than in any other way, barring diseases. The type of accident that stands out preeminently is the personal injury accident. Last year there were 19,828 fatalities by automobiles and ten times as many more were seriously injured in the United States.

No other form of insurance has had such a rapid development as auto insurance. At close of 1920 there was approximately 9,000,000 cars registered in this country. During the same year 424 insurance companies wrote automobile insurance of some kind, the premium income being about $185,000,000.

One person is killed by an automobile every 30 minutes. An accident can happen in the twinkling of an eye.

Accidents Similar

Following is a typical story of an accident. Out in the country—bad cross roads—both to blame—one killed, three injured. Who pays?

It is worth dollars and cents to have your mind at ease and to know the hazards of sudden loss have been removed. Many people every year are confronted with a $5,000 or $10,000 liability loss. Every one wants to feel whatever they are liable for in case of a serious accident will be forthcoming. Members of your family or friends driving your car, should an accident occur, if held liable, naturally would be expected to pay. A child at play may hurl or fall in front of your car. Can you imagine any picture which would touch the heart of a jury more quickly than a crippled child. An automobile owner unprotected by public liability insurance, by reason of judgment against him, loses everything he owns.

May Sue Later

Do you know that under the law a person injured in childhood may sue for damages when he or she reaches maturity, regardless of previous settlement having been accepted by his or her lawful guardians, unless settlement is approved by a court of competent jurisdiction?

There are some unavoidable accidents. Insurance is the first accessory. Become a charter member of a company which will operate for you and your own fellow farmers who have indicated their belief in cooperation by being a Farm Bureau member because they know the farmer has problems to solve. With the increasing number of automobiles, with the trend toward compulsory automobile liability insurance and with the increasing number of automobile accidents it behooves every member to think seriously if he should not have his own automobile insurance company not only for himself but for the sake of his family.

An Open Letter from Our President

For a considerable period of time there has been a demand for the Illinois Agricultural Association to furnish automobile insurance to its members. After thorough investigation and consideration, the Executive Committee unanimously decided that an insurance company be organized to be owned and controlled by the membership and operated exclusively for members of the Illinois Agricultural Association. At a recent meeting of the Farm Bureau presidents, they heartily endorsed the action of the Executive Committee.

The Illinois Agricultural Association is your organization, and you are entitled to the best service it can render, and likewise, the Association is entitled to your best thought and support.

The trend toward compulsory liability insurance is also a factor that merits your consideration. Every Farm Bureau member owning an automobile should be vitally interested in automobile insurance. Especially is this true with reference to liability protection.

It is my opinion that you, as a Farm Bureau member, will not only be strengthening your Farm Bureau organization by becoming a charter member and making application for insurance in this company, but that you will be creating a protection which you owe to your estate.

Your decision, and the decision of other members, will determine how soon the company can start operations.

Earl C. Smith

Four Classes of Coverage Offered to Protect Against Fire, Theft, Collision, Public Liability

To make the insurance just as simple as possible, so as to reduce bookkeeping and give the members the protection needed, four classes of coverage are offered as follows:

Class I. Fire and theft, property damage and public liability and collision.

Class II. Fire and theft, and property damage and public liability.

Class III. Property damage and public liability.

Class IV. Fire and theft.

Class I is called the full coverage policy. It protects the car of the insured and also the insured against liability imposed by law against damage his car may do to property or persons.

EXPLANATION OF COVERAGE

Fire and Theft—It is becoming standard practice for these two forms of coverage to be written together. With the fire is also transportation coverage. The insured is protected against (1) fire, arising from any cause whatsoever, and lightning; and (2) while being transported in any conveyance by land or water. The theft insurance protects the insured against theft, robbery or pilferage, excepting by any person or persons in the insured's household or in insured's service or employment. In case of loss from fire, transportation, or theft, the insured will be paid the actual value of the car. This will be determined by the insured and the company and in case they can't agree provision is made for an appraiser to be selected by both parties. The cost per car for fire and theft insurance will be determined by dividing the total losses by the value of the cars insured. This will give the per cent loss per $100 of value.

Collision Insurance

Collision Insurance—This is to indemnify the insured against actual loss or damage to his automobile by collision with an object. It covers only collision with movable objects except in case the insured in avoiding a collision with a moving object, collides with a stationary object, then he is protected. There are many factors connected with collision insurance. It is not fair to other members of the company to have them part with their money to recompense a party who is negligent or careless in driving his automobile. For example, if the insured goes to sleep driving his car, run off the road and hit a tree, this might be termed negligence or carelessness or both. However, if the driver runs into a tree to avoid hitting an individual, he will be protected by his insurance. The cost of this insurance will be determined by classifying the cars and finding the losses that each car of the class should pay. It will cost just as much to replace a fender on an old Ford as on a new one. Fords may be in one class—Dodges and similar priced cars in another class, etc.

No Deductables

It is common practice among many companies to have deductables, for example, $20 or $50 or $100 deductable. This means that one must stand the first $20 or $50 loss himself. Then the company will pay the balance. The Board of Directors decided that there would be no deductables. Instead the insured will receive 80 per cent of the loss damage.

Property Damage and Public Liability—These two types of insurance are invariably written together.

Property Damage—This insurance promises to indemnify the insured against loss from the liability imposed by law upon the insured for property damage to other parties of every description, resulting from the ownership, maintenance or use of the insured's car. The limit of liability of the company is up to $1,000 for any one accident.

Public Liability—This insurance indemnifies the insured against loss from liability imposed by law for "bodily injuries" suffered, or death caused by the operation of the insured's automobile. The company will write the ordinary limits of the public liability policy which is $5,000 for one person, and $10,000 for any one accident injuring more than one person.

In determining the basis for payment for property damage and public liability it is pointed out that a $500 car running 30 miles per hour can do as much personal injury as a $1,000 car running at the same rate of speed. After examining the loss figures of this kind of coverage for more than 25,000 automobiles, no justification could be found for basing the cost on the value of the car. Therefore each automobile will bear in equal proportion losses for property damage and public liability insurance.

Many factors are involved in determining the proper basis for determining what each automobile should pay for a particular coverage. The only basis that will eventually stand the test of time will be one that is fair and equitable.

Launching of New Organization Follows Unanimous Endorsement of Plan on Oct. 8 by Farm Bureau Presidents in Chicago

No Money to Be Collected Until 5,000 Applicants Insure Success of Venture. Company Will Be Owned and Controlled By and Operated Exclusively For Members. Farm Bureaus Are Agents.

A State-wide mutual automobile insurance company to be owned and controlled by and operated exclusively for members of the Illinois Agricultural Association became a reality following action taken by the I. A. A. Executive Committee and Farm Bureau presidents in joint session on Oct. 8 in Chicago.

There was no dissenting opinion expressed in this representative meeting. Farm bureau members want mutual auto insurance but they want it under their own control so that its benefits may be exclusively for the people who are supporting the movement.

Investigation Made

The decision to launch the new company came after many months of careful consideration and investigation by Donald Kirkpatrick, V. Vanimon and others. It was not hatched overnight. The Association had the choice of linking its future interest in auto insurance with a privately-controlled mutual or of organizing its own company. It chose the latter course.

Donald Kirkpatrick.

What does the company offer? How much will a policy cost?

These are salient questions. There will be no membership fees. The only requirement, is membership in the Illinois Agricultural Association. The law states, however, that a premium must be collected in cash in advance. This will amount to $10, and will be known as a premium deposit. At the end of each six months period the member will pay his share of losses and expenses, and thus restore the premium deposit and renew his insurance for another six months period.

The policyholder retains his $10 interest in the initial premium deposit. The policy fee is $5, to cover overhead expenses requisite to putting the name of the holder on record.

Policy Holder Benefits

The Board of Directors has in every instance formulated plans having in mind the best interests of the policy holder. The unused portion of the premium deposit will be returned to the policy holder upon cancellation of his policy. Likewise his surplus share, will be returned upon cancellation of the policy.

There are legal requirements that do not permit the company to guarantee that this will be done since such promises would create a paper liability not permitted by the State Insurance Department. In the same way the earnings on the surplus will be credited to the policy holder regardless of the form of auto insurance coverage. The surplus share will be a contribution by the members to the company's surplus to meet the law requiring the company to have five times its maximum risk. The surplus share is $10. The maximum risk of the company will be for public liability, which is for $10,000 in any single accident. The member will get his insurance at the cheapest possible cost. In case he parts with his automobile he will have contributed only $5 to the company beyond the cost of actual insurance.

5000 Members Needed

Five thousand Farm Bureau members, who will become charter members, are needed to start the company. No money will be collected until the company has the necessary 5,000 applications to begin operations.

The Farm Bureaus will have the agency for the Company. When they secure applications from 10 per cent of their members they will be authorized agents. When they secure 20 per cent, they will have their quotas.

Legal Reserve Company

The Company is organized under the uniform mutual law of the State of Illinois and is a legal reserve company. The powers of the Company are broad enough so it can write other forms of insurance besides automobile. It will not, however, enter the fire, lightning, or windstorm field.

The company is to be owned and controlled by its members who must be farm bureau members or members of their immediate families.

The board of directors will consist of 19 men. The first board of directors will be the Executive committee of the Illinois Agricultural Association and its executive officers. Every policy holder will have one vote.

Volume 4 | Issued Every Month for 63,000 *Thinking* Farmers—December, 1926 | No. 12

LOWDEN TO ADDRESS FARM BUREAU CONVENTION, CHICAGO, DEC. 6-7-8

South and Grain Belt Unite At St. Louis In Epoch-Marking Assembly

3500 Word Declaration of Principles Heralds National Acceptance of Policy for Surplus Control.

THE agricultural South and the Grain Belt joined hands in a solemn pact to unite for their economic welfare at an epoch-marking meeting in St. Louis on Nov. 16-17.

Earl C. Smith

Unity of thought and action was the key-note of this important meeting, and before the delegates from twelve states went home a farmers' Declaration of Principles had been drawn up and adopted without a single dissenting voice. It was a great day for American agriculture. It was the first time in history that representatives from two great sections of the country united in a pledge to hold love for agriculture above political faith in the great fight for a common cause.

Smith Chairman.

Earl C. Smith, president of the Illinois Agricultural Association, was chairman of the program and arrangements committee that framed the 3,500 word "bill of rights."

The Declaration of Principles, too lengthy to reproduce here, asked for the assistance of commerce, industry, finance, and labor in mapping out a constructive program but it expressed disfavor with movements for farm relief initiated independently of farm organizations. It reaffirmed the faith of farm leaders in surplus control legislation, the equalization fee, and a Federal Farm Board with broad powers. Muscle Shoals, the tariff, cooperative marketing, farm blocs, and a plea for unity of agricultural interests regardless of political affiliation were named in the statement.

South Hard Hit.

The immediate cause for this meeting that brought farm leaders from all the great agricultural states is the dilemma of the cotton grower, and the continued depression in farm prices throughout the grain and livestock areas.

With an 18,000,000 bale crop of cotton selling now for only 12½ cents per pound, or nearly six cents per pound below the cost of production, the South is facing hard times and possible bankruptcy.

Southern leaders point out that a small surplus of 2,000,000 bales of cotton reduced the value of the crop $760,000,000. When the U. S. Dept. of Agriculture put out its first crop estimate cotton was selling for 18 cents per pound. But only a few weeks later when returns showed a crop of approximately 18,000,000 bales, the bottom of the market dropped out and cotton fell to 12 cents per pound.

Unnecessary Loss.

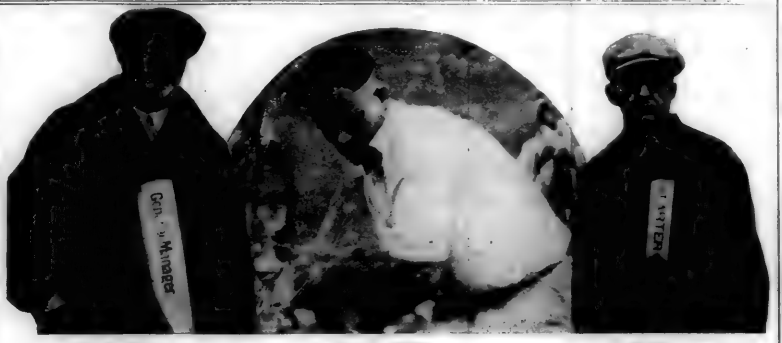
B. W. Kilgore, president of the American Cotton Growers Ass'n, the great cooperative of the South figures that 6,000,000 bales of cotton could have been bought at the going price of $60 per bale for $360,000,000, and the crop would still have given the grower $400,000,000 more than he stands to receive under existing conditions.

The real problem of agriculture is to prevent the overwhelming depression in prices, created by small surpluses.

This was the central thought of every speech made in the convention.

"Surpluses are necessary if the world is to be fed and clothed," declared Gov. Lowden repeatedly, and time after time he presented facts and illustrations using the corn, potato and cotton crops of successive years to show how the smaller crop invariably is worth more than the larger crop.

Stabilization Possible.



"Surpluses can be controlled and prices stabilized," declared Lowden. He cited the Brazilian government's mass selling of coffee, and the English government's curtailment of rubber offered to foreign trade, as examples of price stabilization.

Lowden reaffirmed his conviction that a Federal farm board with broad powers could stabilize prices, remove surpluses from channels of trade, and assess the cost equally among all producers of the commodity.

"I'm satisfied," declared Lowden, "that the present distress among cotton growers of the South could have been averted by a Federal farm board, which could have maintained a price of 18 to 20 cents per pound for cotton."

Illinois was well represented at the gathering by farm bureau members, farm advisers, and county and state executive officers from every section. Dr. Tait Butler, editor of the Progressive Farmer, the South's great farm paper, presided.

The happiest moment of a failure's life—quitting time.

O. L. Hatch — Elmer Williams — E. E. Brown

Seven thousand people saw Elmer Williams, 1925 national champion cornhusker, successfully defend his title against 14 dark horse candidates in the Third Annual State Corn Husking contest sponsored by Prairie Farmer and the Stark County Farm Bureau near Elmira in Stark county on Nov. 12. William's record at 28.83 bushels husked in one hour and 20 minutes compares with his record of 35.76 bushels made last year which still stands as the world's record.

The contest went off smoothly under the direction of O. L. Hatch, president of the Stark County Farm Bureau, and farm adviser E. E. Brown. The people of the Elmira Community club provided helpers and lunch. The 15 contestants had all been selected at county contests conducted by the farm bureaus of Piatt, Livingston, Mason, McLean, Moultrie, Montgomery, Knox, McDonough, Mercer, Hancock, Marshall-Putnam, Rock Island, Ford and Stark.

Williams lost the Mid-West contest at Fremont, Nebr., the following week to Fred Stanek of Iowa who brought in a net load of 27.07 bu. The Nebraska corn was lighter and the husks were much tighter about the ears thus giving hook huskers the advantage.

Gas Tax and Income Tax With Exemptions May Be New Proposals

Legislative Committee Adopts Policy Against Any Increase in Taxes to Farmers.

A DETERMINED stand against any kind of legislation that will increase taxes to farmers or attempt to saddle any additional burden on farm property will form the foundation for the legislative program of the Illinois Agricultural Association in the coming legislature.

Frank Barton.

This was the policy adopted by the legislative committee, Frank Barton, chairman, which met in Chicago recently to outline its plans for the coming year.

Gas Tax Discussed.

While specific legislation to be supported by the Association was not considered in detail, a gas tax with the "in lieu of" feature which assures that such a tax will replace a portion of the county road and bridge tax, in equal amount, will undoubtedly get the Association backing. The Association will be against such a tax that adds to the farmers' burden.

Incensed at the defeat of the tax amendment proposal, the committee urged that the Association continue its efforts toward keeping alive the general tax relief committee of state organizations that it may continue its campaign of education.

Income Tax Recommended.

As one step toward getting the public interested in a new taxing system, the enactment of a state income tax law with sufficiently high

(Continued on col. 3, page 4.)

Eastern Policy of Exploiting Farmer Condemned by Peek

Declare Farmers' Job to Produce Cheap Foods to Aid American Industry and Exports.

(Continued from last month.)

The farm debt has more than trebled and the actual exchange value of farm lands has declined 20 per cent during the past 15 years. There is continuing in this country on a vast scale a redistribution of wealth away from the farms into the cities—from those who have produced it to those who have not.

Hoover and Mellon say in substance that American farmers must provide the food and raw material for American industry and labor at prices no higher than foreign manufacturers and labor pay. Why? In order that American industry may export manufactured goods in competition with Europe.

In other words Hoover and Mellon and all they stand for are pushing as America's new policy toward agriculture, the proposition that it is the American farmer's duty and place to produce and sell here at home just as cheaply as does the Russian peasant and the South American peon in Europe.

Their aim is to develop the capacity of the United States to compete for world markets with industrial exports. They suggest that to make this possible the American farmer must provide the basic materials on the same level as the foreign industrialists are supplied. They hope the American farmer can do this and maintain his standard of living by superior and increasing efficiency in production and distribution. If he cannot that is his hard luck; no matter what happens to him he must make it possible for our industrial exports to continue.

Lower Wages Result

To apply this same reasoning

Nation's Eye On Assembly In View of Farm Depression

Exposition and Old Time Farm Dance New Features This Year.

Among other speakers scheduled for the three-day program are:

Magnus Alexander — Pres. National Industrial Conference Board, N. Y.

Robert S. Pack—Pres. National Electric Light Ass'n., Minneapolis.

Dr. B. W. Gilgore—Pres. American Cotton Growers' Ass'n.

Dr. Carl C. Taylor—Dean and director, North Carolina Agricultural College.

S. J. Duncan Clark—Editor Chicago Evening Post.

FRANK O. LOWDEN, Illinois' war governor and champion of agriculture, will be the key-note speaker at the annual meeting of the American Farm Bureau Federation, Chicago, Dec. 6-7-8. Gov. Lowden's address will be made on Wednesday morning, Dec. 8, when agricultural leaders from every state in the Union will assemble for the most representative farm gathering ever held in the United States. A varied program with speakers representing several schools of thought on agricultural relief is promised.

The Eighth Annual Meeting which takes place the second week in December will find the American Farm Bureau more firmly entrenched in its position as first in agricultural America, than at any previous time since its formation. It will find at the helm, Sam Thompson, "Our Sam," a vigorous thinker and fighter for agriculture who came up through the ranks from a farm to farm membership campaigner to his present position.

Frank O. Lowden

Country Dance Monday.

An old-fashioned country dance the first night of the convention, a banquet in the Grand Ballroom of the Hotel Sherman on Tuesday night, and the First National Farm Bureau Agricultural Exposition are new features.

The Agricultural Exposition will display a cross-section of farm bureau activities, cooperative marketing, and commercial institutions that supply farmers' needs. The entire mezzanine floor of the hotel has been engaged for the exhibits.

On Friday and Saturday preceding the convention, a home and community training school will be held.

The meeting this year will undoubtedly have greater significance and will present a group with more unity of thought and spirit than at any previous time.

To advance the purpose for which the Farm Bureau was organized, namely to promote, protect and represent the business, economic, social and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Published once a month at 404 North Wesley Ave., Mount Morris, Illinois, by the Illinois Agricultural Association. Edited by Department of Information, E. G. Thiem, Director, 608 South Dearborn Street, Chicago, Illinois. Entered as second-class matter October 20, 1925, at the post office at Mount Morris, Illinois, under the Act of March 3, 1879. Acceptance for mailing at special rate of postage provided for in Section 412, Act of February 28, 1925, authorized October 27, 1925. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record. Postmaster: In returning an uncalled for or missent copy, please indicate key number on address as is required by law.

A Lesson In Organization

A CAREFUL analysis of the vote on the defeated tax amendment leads us to several inevitable conclusions. Our first is that the Association functioned and functioned well. Its members voted overwhelmingly for the tax amendment. This is shown clearly by the great majority in favor of the measure in the well organized farm bureau counties where the rural population predominates. In unorganized or poorly organized counties farmers failed to rally to this cause which meant so much to them.

Organized Crawford county returned 4,171 votes in favor, and 1,239 against with total votes polled at 7,401. But across the county line in unorganized Jasper county the result was 1,480 for, 1,370 against with a total of 5,537 votes cast. Here is a lesson in organization. There are others.

Out of 13,388 votes cast in Morgan county, the amendment received 5,298 in favor and 3,167 against. In Jacksonville, the largest city in the county, the amendment had a slight majority but in the rural townships, the count was 2,576 for and only 1,020 against with 1,952 not voting.

"Following are the figures in some of my best Farm Bureau sections," writes farm adviser Forest Fisher:

	Total	For	Against
Pisgah	181	145	12
Arcadia	170	124	45
Sinclair	157	80	24
Alexander	412	196	41

"All we need is to sell our people on the value of organization," concludes Fisher.

In DeKalb county the amendment had the needed majority with 5,709 votes in favor and 1,716 against out of a total of 9,982 votes cast for the office receiving most votes. This is a county largely rural with a strong farm bureau, good advisers, and plenty of able leadership.

Likewise Grundy county voted nearly 3 to 1 in favor, Piatt the same, Pike county more than 5 to 1 with the needed majority, Warren more than 2 to 1 with the required majority, Stark 3 to 1 for, Ogle 3 to 1, Gallatin the same, Mercer nearly 4 to 1 in favor and so on.

But the inescapable and deplorable truth is that because of the ignorance, poor citizenship, or lack of interest displayed by such a large percentage of the mass of voters who failed to express themselves on a measure so vital to all, this proposition went down to defeat when the thinking voters were for it decisively. Here is democratic government at its worst. It doesn't seem fair to allow the non-thinking people to decide so important a question.

Farmers displayed much more intelligence in the last election than town and city people if we use the vote on the amendment as a yardstick. In Cook county a larger percentage failed to vote on the tax amendment than in most downstate communities. County Adviser Burns of Champaign county in an interesting survey made in his county shows that in 20 well-organized farm bureau communities 65 per cent voted for, 19 per cent against, and 16 per cent didn't vote on the amendment, out of a total of 3,764 voters.

In two communities where there was strong farm bureau leadership influence 64 per cent voted for, 13 against, and 23 per cent non-voters.

In seven half-organized communities 47 per cent of the 1,876 voters were for the amendment, 27 per cent against, and 26 per cent not voting.

In seven unorganized communities or precincts only 40 per cent voted for, 28 per cent against, and 32 per cent didn't vote out of the total of 1,321 voters. In Urbana the vote was 37 per cent for and 36 per cent against, 27 per cent not voting. In Champaign 42 per cent voted for, 31 against, and 27 per cent not voting.

The obvious lesson is stronger organization if the farmer is to keep pace with and gain justice in a highly organized society. The Illinois Agricultural Association should have 40,000 more members. It ought to keep its organization staff in the field until it gets them.

A. F. B. F. Meets

THE annual meeting of the American Farm Bureau Federation Dec. 6-7-8, in Chicago, will be watched with much interest by men from all walks of life. Its pronouncements will be read as the thoughts of real farm folks on the problems of the day. When all other industries are prosperous except agriculture something is the matter. Farmers know better than any others what's wrong. They are in the best position to prescribe a remedy. Whatever thoughts come out of this national assembly, should have careful consideration by all who are in a position to help the industry.

Funds Needed

THERE will be no Christmas spirit in the homes of hundreds of flood sufferers, our neighbors in the Illinois valley, unless those who are able provide for them. The Red Cross is making a valiant effort to care for the needy, but funds are inadequate. More money will be necessary to give these people even the necessities of life. Our duty and obligation to the hundreds of poor, tenant farmers who lost everything is plain. Send your contribution to your local Red Cross chapter, farm bureau or to R. A. Cowles, Treasurer, Illinois Agricultural Association, 608 So. Dearborn St., Chicago, and it will be relayed to the proper authorities.

The International

AS WE go to press the great International Live-stock Exposition with all its glamour and attraction for the stockman is in full swing. There's something in the sight and feel of choice purebred livestock that breeds optimism and confidence in the future of farming. There's inspiration in looking at a beautiful flock of sheep or a showy, well-groomed herd of cattle. With all our efforts and energy directed toward the economic side of agriculture, let us not lose our appreciation for the beauty, romance, or what-you-may-call-it of the farm. It's such appreciation, not desire for gain, that has developed our choicest livestock. And love for the finest things in farm life is the reason so many of us stay by it.

The Cornborer Scare

AT the recent cornborer meeting held in the offices of the Illinois Agricultural Association several speakers referred to the scare created by half-baked information about the ravages of this insect.

One young man from Southern Indiana broke off a deal for a farm because he feared the borer would stop corn growing. Panicky insurance companies and bankers, it was reported, are withholding loans on farm lands because they fear the cornborer.

While we would not minimize the possible dangers from this pest, yet we are convinced after traveling over the infested areas of Ohio, Michigan, and Canada that the insect can be stopped. Damage can be largely avoided. And if the borer comes we can learn to live with it.

Burning, shredding, or plowing under of all stalks, corn stubble, and trash will destroy 95 to 98 per cent of the insects. Farmers of Kent and Essex townships, Ontario, would have suffered little, experts admit, if they had shown more interest and activity in destroying the pest. Legislation and a police force were found necessary there to compel cleanup work.

There's another side to this new situation. The borer might do for us what we can't seem to do for ourselves, that is, to reduce our crop so corn will be worth at least cost of production. The cotton boll weevil rested last summer and let the South grow 18,000,000 bales of 12 cent cotton to its own great loss and sorrow. A 16,000,000 bale crop would have been worth $300,000,000 more. Now the weevil is being hailed as a public benefactor. The corn belt will continue to grow heavy corn crops in spite of the borer.

More Coordination Here

THE downstate business interests voted against the tax amendment except in such towns and cities where business men had been enlightened about the real tax situation. There is ample proof of this assertion in the vote records of the urban precincts.

The referendum submitted by the Illinois Chamber of Commerce to its members according to the figures released showed that 75 per cent of the members who voted were against the amendment.

Merchants and business men as a class, probably think little and know less about tax matters than almost any other group. In many cases their knowledge of farm problems is bounded by what they learned 20 or 30 years ago as a boy on the farm.

The fault doesn't lie in lack of interest in, or sympathy for, a prosperous agriculture. It is due mostly to ignorance and lack of information. There needs to be more coordination between the farmer and the people of our towns and cities. The man on Main Street needs to be enlightened with facts. Here is a challenge for the county farm bureaus. The influence of the farmer working alone is on the wane because the drift of population is constantly to the towns and cities. It is important to the farmer that the local merchants, business and professional men keep in tune with agriculture.

What The Counties Are Doing

STARK MANAGES STATE CORN HUSKING CONTEST

When the opening shot was fired in the race for the state corn husking title on Nov. 12, E. E. "Buster" Brown, county advisor was behind the gun while O. L. Hatch, president of the Stark County Farm Bureau as general manager was on the job keeping the 150 helpers busy and caring for a crowd of 7,000 spectators. The contest held recently south of Kewanee in Stark county was the third sponsored by Prairie Farmer. The Stark County Farm Bureau and the allied community clubs about Elmira deserve a lot of credit for their good work. Elmer Williams, who won the state title again this year is a member of the Stark County Farm Bureau and a real farm bureau booster.

HENRY WALLACE SPEAKS AT CORN MEETING IN HENRY

Henry county reports an interesting seed corn meeting on Morgan Brothers' farm Nov. 10. Henry A. Wallace, editor of Wallace's Farmer and an expert on seed corn breeding was there to discuss his pet hobby and see the results of the Morgans' variety test work. Four of the five comparisons on disease testing in the 1926 corn plots favor the tested corn, which outyielded the untested by nearly three bushels. Harold Holmes, Henry county's entry in the state corn husking contest placed fourth.

LET-UP IN HOG CHOLERA IN COLES ANNOUNCED

The worst hog cholera outbreak in history is the verdict of Coles county in announcing that conditions are improved there. Farm adviser Melvin Thomas has spent all his available time and then some teaching farmers to vaccinate in an effort to save the hog crop.

MAKE 'EM SNAPPY IS HUGHES' MOTTO

Hereafter pen drawings of fancy dancers and bathing beauties will "perk up" the monthly publication of the Monroe County Farm Bureau. Editor Hughes is also a well known writer of humor for farm bureau folks.

"Have you ever been to a side show with some good actors (as illustrated) doing their stuff, or to a ball game, dog fight, or a trial for bigamy and see a lot of fellows who wouldn't cross the road to attend a farmers' meeting," writes Hughes in the November issue. The answer is "yes," all of which shows that people want to be entertained, not educated.

WHITESIDE ACTIVE IN HOG CHOLERA CONTROL

Whiteside county's activity in teaching farmer-vaccination against hog cholera has drawn the fire of a local veterinarian who reported farm advisor L. O. Wise and several members to the state authorities for "vaccinating unlawfully and spreading disease." Subsequent investigation showed that the loss from farmer-vaccination has been notably less than that sustained by the complaining "doctor." The state returned a verdict of not guilty.

McLEAN COUNTY ORGANIZES PROTECTIVE ASSOCIATIONS

Lawndale and Chenoa township farmers in McLean county have formed local protective associations as branches of the Illinois State Detective Association. Forty-one charter members were signed up at the initial meetings of the two associations. County adviser Harrison Fahrnkopf is assisting in forming these local associations whenever the demand arises.

MARSHALL-PUTNAM OIL CO. HIRES NEW MANAGER

Don Smith of Varna was employed recently as manager of the Marshall-Putnam Farm Bureau Oil Company. Smith had been employed by one of the large oil companies for six years. The Marshall-Putnam Company is doing a business of approximately $15,000 per month. A higher test gas and a special oil for zero weather will be offered the trade this winter.

VERMILION COUNTY HOLDS BOYS' CORN CLUB SHOW

The third annual boys' corn club show was held in Danville on Nov. 8 in cooperation with a local business house. A free dinner was furnished all the boys who attended. Close to 600 people attended the recent dairy extension meetings at ten different places over the county. The train was operated over the C&EI.

LOGAN COUNTY HOLDS UTILITY CORN SHOW

The Second Annual Utility Corn Show was one of Logan County's features for November. Two hundred and fifty dollars in prizes were offered for the various corn classes. The annual club round-up and achievement day rally was held on Friday, Nov. 26 in cooperation with the Lincoln Chamber of Commerce. Afternoon and evening entertainments were provided along with a special luncheon at the corn show room.

DuPAGE COUNTY CLAIMS HIGHEST TWP. MEMBERSHIP

"We are challenging the state to show a township with a higher farm bureau membership than Naperville township in this county," writes Elmer Carncross, farm adviser. This township has a membership of more than 100 which represents nearly a 100 per cent sign-up. A meeting was held in the Glouger consolidated school recently to celebrate the occasion.

Naperville Township in Dupage county claims the state record for having more farm bureau members than any other. At the call of county adviser Elmer Carncross, the members celebrated the completion of their successful campaign by a dinner and meeting at the Granger Consolidated School. Mike Lyons at the right who is one of the I. A. A.'s crack solicitors was instrumental in bringing the membership above the 100 mark, but he gives part of the credit to Helen Binder, 21, at the left who drove him most of the time. Senator Harold Kessinger of Aurora and George Thiem of the Illinois Agricultural Association appeared on the program.

FINLEY TO LEAVE FOR CALIFORNIA

Chas. R. Finley

Vice-President Chas. R. Finley will spend the winter in California, he announced at the November meeting of the Executive Committee. Sam Sorrells who represents the 21st district will succeed Finley as chairman of the Marketing Committee.

Corn Market Weak Due Surplus From 1926, Wheat Low

By U. S. Bureau of Agricultural Economics.

THE grain market during November has been rather unsettled with prices fluctuating with the changing crop and market developments. Corn prices reached a new low for the season and had a weakening influence upon the market for other feed grains. The wheat market turned weaker late in October and prices declined to about the same level as prevailed during the latter part of September.

Old Corn On Hand

The large stocks of old corn on farms which was estimated by the Department of Agriculture at about 181,000,000 bushels on the first of November has been one of the principal weakening influences in the corn market. In addition to large farm stocks there were around 23,000,000 bushels in store in the principal markets which made the total stocks of corn on farms and in the principal trading channels approximately 145,000,000 bushels larger than last year. The crop, however, according to the Nov. 1 estimate, is about 211,000,000 bushels smaller than last year, making the total supply of corn at this time about 65,000,000 bushels smaller than at this time last year, with the quality of the new crop considerably below average. It is estimated that less than three-fourths of the crop is of merchantable quality.

R. F. Karr of Iroquois county is president of his county farm bureau and represents the 18th district on the Executive Committee of the I. A. A. The photographer caught him in a characteristic pose enjoying his pipe. The tractor in the background is nine years old and is still doing heavy duty in the field and on power jobs about the farm.

A. R. Wright New Prexy Marshall-Putnam Bureau

A. R. Wright of Varna, who represents his district on the Executive Committee of the I. A. A. was elected to the presidency of the strong Marshall-Putnam County Farm Bureau recently. Mr. Wright who served as secretary for many years, succeeded L. F. Boyle who served faithfully as president for four years. Guy French of Putnam succeeded Wright as secretary.

A. R. Wright

Corn Price Low

The receipts of new corn have not been large but a large percentage contains excessive moisture and can be sold only at wide discounts under the better grades of old dry corn. On November 17 Nos. 5 and 6 grades of new corn at Chicago ranging in moisture from 21-29 per cent and in test weight from 47-53 pounds, sold at 46-60c per bushel. This compares with sales of No. 3 yellow corn at 71-72c and shows a discount of from 12-25c per bushel. With so much old corn available both in store and in the current receipts buyers are unwilling to incur the risk of handling the new grain except at what they consider safe margin.

Industries are absorbing fairly large amounts of corn but eastern and southern demand is light. In the Southwest the low price of milo and kafir is restricting the demand for corn. The Pacific Coast is taking considerable corn from Kansas City and Omaha. Feeder demand is of only fair volume. According to reports to the Department of Agriculture decreased cattle feeding in the corn belt this winter is still indicated. Outside the corn belt, however, indications are that feeding will be considerably increased.

Wheat Market Weakens

Increasing stocks of wheat in both the United States and Canada, together with more favorable weather in Argentina, is having a weakening influence on the wheat market. Stocks of wheat in the principal markets of the United States now total around 80,000,000 bushels. Canadian stocks on Nov. 7 totaled around 93,000,000 bushels. This is about 14,000,000 bushels more Canadian wheat and around 30,000,000 bushels more United States wheat than was in store at this time last year. The Canadian crop is now estimated at approximately 406,000,000 bushels, which is larger than earlier expectations. Recent trade estimates indicate a prosepctive increase in the Argentine crop over earlier estimates.

How Ohio Poultry Association Helps Pay More For Eggs

By Frank B. Gougler
Director Poultry Marketing

Frank Gougler

IN northwest Ohio are four counties covering an area about 50 miles square. Early in 1924 the farm bureaus of these counties, together with the State Farm Bureau, decided to organize a poultry marketing association. Throughout the organization period and for nearly a year following its inception, the association struggled for existence. The membership campaign was drawn out for more than a year. While the first member was signed up April 10, 1924, it was July 10 of the following year before marketing actually began.

It was not all smooth sailing even then. Finances were ever an important question with the officers and the manager. The initial capital has been raised through a $3 membership fee. This was about all used as organization expenses. The association was able, however, to finance itself through notes taken from its members on the basis of 20 cents per hen.

A Deficit

After operating six months an audit of the association's books showed a deficit of $4,171. This was largely due to organization expenses, nevertheless it gave the officials considerable anxiety.

From that time on he was determined to build up a reserve and again on September 1 this year another audit was made which showed results as follows:

Assets	$58,941.45
Liabilities	39,227.86
Net Worth	19,713.59
Reserves	17,985.00
Undivided Surplus	$ 1,728.59

Members Sacrifice

The building up of this reserve was not done at a sacrifice of prices to the members less than outsiders were receiving.

An analysis of the pool statement of October 1-15 will show some comparative prices received. A pool statement shows the amount of eggs handled during two weeks, how they graded and the price received by the members. It follows:

45,000 dozen furnished by 1,800 members.

	Oct. 1-15, 25		Oct. 1-15, 26	
	%	¢	%	¢
Henneries	32.	58	45.	57
Standards	56.	43	35.	46
Trades	9.	30	17.	32
Checks	1.8	22	1.3	32
Rejects	.4		.6	

Higher Prices

The weighted average price received by the members of the association for the first two weeks of October this year was 47.5 cents. The average country buying price for Ohio during this period according to quotations given in the Produce Packer was 42 cents. In Illinois during this period the country price was 39 cents. This shows Ohio prices three cents over Illinois, and the members of the Ohio association received 5½ cents more than the general country price for Ohio and 8½ cents more than Illinois current prices. The association was able to secure these splendid prices for its members even after deducting one cent per dozen for the reserve fund which also belongs to the members.

The two pool statements, with a year intervening, are shown in order to illustrate the improvement made in egg quality. It will be noted that last year only 32½ made the top grade while this year 45½ were up in this grade. Money talks—pay the producer on a quality basis and attention will soon be given to the care of eggs.

Smith, Wright, Barton and Moody To Represent I. A. A. As Official Delegates at Annual Meeting of American Farm Bureau Federation Dec. 6-7-8, Sorrells New Chairman

THE regular meeting of the Executive Committee of the Illinois Agricultural Association was held in Chicago on Nov. 5. All members were present except R. K. Loomis, 25th district, and Charles Borgelt, 20th district.

Mr. Sorrells

President Earl C. Smith presided. Harrison Fahrnkopf, president, represented the Illinois State Farm Advisers Association.

Report by Treasurer R. A. Cowles as of Oct. 31 shows current assets $23,632.36, total accounts receivable including $96,808.45 U. S. Liberty Bonds, and $15,131.25 Federal Land Bank bonds, of $187,745.77, and total assets of $292,553.63.

Liabilities amount to $13,141.85, and an excess of assets over liabilities of $279,411.78. Moved by Moody, seconded by Bamborough treasurer's report be placed on file. Carried.

Moved by Wright, seconded by Bamborough that delegates be elected to annual meeting of American Farm Bureau Federation. Carried. Smith, Barton, Wright, and Moody were elected as official delegates.

Finley Leaves

Moved by Finley, seconded by Taylor that all members of the Executive Committee be authorized to attend A. F. B. F. meeting, expenses to be paid by Association. Carried.

Moved by Barton, seconded by Tullock that Harrison Fahrnkopf, president of Illinois Farm Advisers Association be authorized to attend A. F. B. F. meeting at expense of I. A. A. Carried.

Moved by Whisnand, seconded by Bamborough that the Committee concur in President Smith's recommendation that Sam Sorrells be appointed as chairman of marketing committee to succeed Chas. R. Finley who left to spend the winter in California. Carried.

Secretary Fox announced following schedules of meetings of advisory committees:

Financial Business Service, Nov. 17.

Public Relations, Nov. 22.

Marketing, Nov. 23.

Organization, Nov. 24

Budget Committee, Dec. 1.

Moved by Barton, seconded by Marshall that next Executive Committee meeting be held Thursday, Dec. 9. Carried.

Question of contributing $100 to National Industrial Conference Board for publications and material released by them left to officers on motion by Barton, seconded by Tullock and carried.

To Indianapolis

Moved by Moody, seconded by Bamborough that Secretary Fox, Whisnand and Barton represent I. A. A. at Chamber of Commerce Conference in Indianapolis Nov. 15-16. Carried.

Pres. Smith called attention to St. Louis Conference on Nov. 16-17. Motion carried that county farm bureau officials be urged by letter to attend.

Secretary Fox read copies of resolutions from eight counties regarding plans of Illinois Agricultural Mutual Insurance Company. Moved by Taylor, seconded by Tullock that Fox write each county stating I. A. A. postion and answering questions raised.

Moved by Moody, seconded by Sorrells that Swanson and Ogelvie auditors, be employed to make annual audit of the books of the Illinois Agricultural Association. Carried.

24th District O K's Auto Insurance Plan At Shawneetown Meet

Farm bureau members from the counties of Saline, White, Johnson, and Gallatin meeting on Nov. 15 at Shawneetown in the I. A. A. 24th district conference, went on record urging all members in the district to cooperate with the Illinois Agricultural Auto Insurance Company in securing the membership required to establish the company.

Chas. Marshall

Charles Marshall, I. A. A. Committeeman from this district, called the meeting to order but Andrew Turner presided as permanent chairman.

Milk marketing discussions which prevailed early in the day revealed that farmers in the adjoining counties are not satisfied with price and marketing conditions. A. D. Lynch, director of dairy marketing, will be asked to come in and make an investigation. In Johnson county, hauling difficulties have arisen and exorbitant charges are made so that the net return per 100 lbs. of milk is comparatively low.

Local dairies in Harrisburg are paying $2.60 per 100 lbs. it was reported.

A resolution endorsing the action of the Illinois Agricultural Association in trying to secure remuneration for local farm bureaus that secure business for the Producers was passed. A campaign was urged to influence the people of Southern Illinois to use soft wheat flour, for the sake of boosting the soft wheat industry throughout this section of the state.

Farm Advisers Whitchurch, Creighton, Simpson, and Foote attended the meeting.

Executive Committee Broadcast Features Program Over WLS

A cross section of farm sentiment in Illinois under the caption "What Farmers Are Thinking About" was the feature of the I. A. A. half hour over radio station WLS on Thursday, Nov. 4, broadcast by members of the Illinois Agricultural Association, Executive Committee.

Chas. Finley of Vermilion county, vice-president of the I. A. A. related some of his observations while serving as an election judge in his home precinct.

Frank Barton gave a general summary of crop, livestock, and farm conditions in Livingston county. Chas. Marshall of Johnson county told his audience that Southern Illinois farmers had good crops this year. Frank Oexner of Monroe county dwelt on the glories of sweet clover the life-saver crop for Southern Illinois.

Sam Sorrells told what the Illinois Farm Bureau Serum Association had done for farm bureau members. Wm. Webb of Will county told his listeners how to select a good ear of seed corn for the International, where he has judged for many years. Bert Leeper, manager of the Illinois Fruit Exchange answered questions and talked interestingly about the 1926 apple crop in Illinois.

Route 3 over the Illinois River at Beardstown was submerged under several feet of water when the flood reached its highest stage. Travel over this route was stopped and the people of the city were forced to go about in row boats to their occupations. The lower floor in the Park Hotel was raised three times to keep it above the flood waters. Portions of the bottom lands were submerged under 20 to 25 feet of water and around 140,000 acres are still under water. Only seven drainage districts out of 21 that went out will be reclaimed according to one local attorney.

Rock Phosphate Pays On G. F. Tullock Farm

Forty bushels of wheat per acre on a rock phosphated field in Winnebago county is the record made last season by G. F. Tullock, member of the Executive Committee of the Illinois Agricultural Association. Sweet clover was sown with the wheat as a catch crop.

G. F. Tullock

This particular field had been used many years as an experiment field by the University of Illinois.

On all the plots where rock phosphate and limestone had been applied during the time the state was operating the field, there was a growth of 14 to 16 inches of sweet clover, while on the border strips and check plots the sweet clover was short and hardly reached above the stubble.

These results were obtained following a lapse of at least five years since any applications other than barnyard manure were made. Tullock says that this is the most striking illustration of the lasting effects of limestone and rock phosphate he has ever seen.

Gas Tax and Income Tax with Exemptions

(Continued from col. 3, page 1.)

exemptions to remove the possibilities of any further burden from the farm and home owner, will be recommended to the executive committee for adoption. Such a law it was pointed out would bring income from intangibles, also other large incomes into the taxing system, so that a portion of the tax load might be lifted from real estate.

It was recommended that the matter of improving and perhaps liberalizing the amendment clause of the state Constitution be considered by the joint committee representing the different organizations supporting the tax amendment.

Likewise the establishment of a joint commission made up of representatives of the General Assembly and the larger state organizations to investigate the working of the present tax system and of the tax systems of other states, was recommended. The committee contemplates a continuous campaign to show the necessity of amending the revenue article to the constitution.

"I appreciate the prompt and valuable service you gave me in securing payment overcharge on freight on phosphate amounting to $16.07," writes Fred W. Wasman of McLean County.

Eastern Policy of Exploiting Farmer

(Continued from col. 4, page 1.)

to labor would mean that the American wage scales should be brought down to foreign levels; it is precisely equivalent to a demand for foreign price levels in the United States, but only upon products of the farm.

George N. Peek

Such a policy prefers an export market for manufacturers, made possible by sacrificing agriculture, to an improved domestic market made more prosperous by the extension of the American protective system to include the farmers.

The Hoover-Mellon doctrine is dangerous. Its vicious effect on agriculture needs no further demonstration. But it is equally unwise and short-sighted as a policy for our industry and commerce.

The buying power of the farm population of America is incalculably more important to our manufacturers as a whole even including those who manufacture for sale abroad than an export market. The nation's economic position in the world does not require or even sanction stimulated industrial exports.

This is true of the nation as a whole. For the mid-west, west and south the case is even more overwhelming. Their direct interest in industrial export trade is infinitesimal; their interest in agriculture's buying power is everything. There are some manufacturers in these districts who export some of their goods; but give them the choice between their export sales and a sustained home market built on agricultural prosperity, and they could not hesitate for a moment.

The 1923 census of manufacturers placed the total value of all manufactured goods that year at $60,556,000,000; the Department of Commerce reports the value of the manufactured exports as $2,625,000,000. Only four and three-tenths per cent of our manufactures exported—and yet our policy-makers gloat over that 4.3 per cent as if it were of more consequence in our economic welfare than the prosperity of thirty million American farm consumers.

Exports From Farm

In considering the importance of our exports it must be remembered that between 40 and 50 per cent of them come from the farm. In 1925 farm products and their manufactures accounted for 47 per cent of the total exports. Of the non-agricultural exports, the following commodities lead in order—mineral oils, automobiles and parts, machinery, copper and manufactures, iron and steel, coal and coke, lumber and agricultural machinery. None of the scattering remainder in the classification reaches 2 per cent of the total. Of these enumerated, how many are there in the United States and in the mid-west, west and south particularly, to whom an industrial export market is of more importance than a sustained farm market based on farm prosperity here at home?

Let Mr. Hoover and Mr. Mellon answer.

Mellon and Hoover are regarded as the spokesmen for the policy-makers of the present administration. Hoover is the administration's agricultural adviser. Jardine is hardly in a position to oppose him.

Backing Up

The Department of Commerce policy to expand industrial exports is too generally known to require elaboration here. Two or three years ago Mr. Hoover held and on occasion publicly suggested that the American farmers ought to get out of the export markets—presumably in order to make room for the manufacturers—and reduce their production to the needs of the domestic market. It is reported that more recently he has backed up on that opinion or at least will not sanction its publication as coming from him.

Congressman Fort of New Jersey, a former associate of Mr. Hoover, was Hoover's spokesman in the House of the 69th Congress. The two speeches he delivered against the Haugen bill were currently understood in Washington to have been prepared in the Department of Commerce.

Mr. Fort said, May 4th, 1926 (Cong. Record):

"Our labor in America is going to buy bread on a basis at least 47 cents a bushel higher for wheat than British labor and German labor and French and Canadian labor. We are going to cheapen the cost of production of foreign-made articles by selling foodstuffs cheaper to foreign labor than we sell them to our own." • • • •

"You are going to make it cheaper for the foreign competitor of American labor to live, but you are going to make it cost more for the American laborer to live, and, therefore, the cost of production to the American manufacturer must go up, while the foreign cost goes down, and his world market is lost."

Senator Fess of Ohio was generally regarded as the administration's agricultural spokesman in the Senate. In a speech in the Senate on June 9, 1926, he said:

"Mr. President, I do not propose to vote for any measure that will feed at a lower cost the producer of competitive articles that come in competition with American production."

The same note was struck by Mr. Mellon in his official letter of June 14, 1926, in which he said:

"Foreign consumers • • • under the proposed plan will secure American commodities at prices below the American level. European labor could purchase American products at a lower price and could live more cheaply than American labor. Foreign industrial costs would be lowered and the foreign competitor assisted in underselling American products abroad and in our home market."

It has been repeatedly pointed out that these men stand for the industrialization of America at the expense of agriculture.

Limitations to Exports

In our international position, the volume of export business which we can maintain is limited by:

(a) Our ownership of half of the world's gold supply.

(b) foreign government's debts to us.

(c) our increasing capital investments abroad.

(d) our tariff policy of restricting imports.

Under such strict limitations, anything which expands our industrial exports, makes it increasingly difficult to market our farm surpluses abroad. Our farm surpluses are the results of past and continuing government policies. The farm business cannot expand and contract its output, or regulate its production, in the way industry can.

Farmers Give Aid To Flood Victims

County farm bureaus throughout the state swung into action following a special appeal made jointly by the Illinois Agricultural Association and the American Red Cross for aid to the flood sufferers in the Illinois River Valley recently.

Following a conference at Beardstown on Nov. 19 between county farm bureau, Red Cross, and R. A. Cowles of the I. A. A. a definite plan of action was outlined for bringing the needs of these people to the attention of farm and city people throughout the state.

The following telegram was sent to county executive officers by Secretary Geo. A. Fox on Nov. 23:

"A grave situation faces our farmers in the lower Illinois River Valley who have suffered ruinous flood losses. Around 2500 families are in need. Hundreds of our neighbors in that section lost all their crops, some livestock, and many their homes and personal belongings. The Red Cross now discloses that at least $100,000 more is needed to care for these people. This deplorable situation is a challenge to us and demands that we act at once. We urge that you use your organization and recommend a farm to farm canvass for help. The Red Cross is working hard in the towns and cities but we must take charge in the country. May this cause have your active support. Contributions should be turned over to your local Red Cross chapter."

A. S. Anderson was elected president, R. L. Fox vice-president and Edward Lindholm, secretary-treasurer of the Ford County Farm Bureau for the coming year.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Volume 5 | Issued Every Month for 63,000 *Thinking* Farmers—January, 1927 | No. 1

1000 EXPECTED AT ANNUAL I. A. A. MEET, PEORIA, JAN. 26, 27, 28

Surplus Control Is Major Issue Before Both Houses Congress

Revised Bills Are Introduced Before House and Senate Adjourn For Holidays

THE third fight for surplus control legislation in Congress is on. Senator McNary introduced a revised surplus control bill the previous week and Congressman Haugen introduced a bill practically the same as the McNary Bill in the House on December 20.

A previous bill had been introduced in the House by Representative Fulmer of South Carolina. This bill provides for surplus control legislation to apply to cotton only, but otherwise it is identical with the McNary bill.

The revised surplus control bill differs in several important points from the McNary-Haugen Bill of last session. The "tariff yardstick" of the House bill and the "fair and reasonable" price-standard of the Senate bill are both omitted. The McNary bill does not contain any reference to price-standards or price-levels. The nearest it comes to mentioning the tariff is in the declaration that one of its aims is to "preserve advantageous domestic markets."

Stabilization Fund Provided.

The equalization fund in the old bill gives way to the Stabilization Fund in the new bill.

The much talked about equalization fee remains, but instead of being apportioned to "all producers" as in the old bill, it is assessed against "each marketed unit" in the new bill. The fee may be collected, in the discretion of the Federal Farm Board on the milling or processing, the transportation or the sale of the commodity. The equalization fee is made applicable to all products named in the bill when operations with respect to that product begin.

Five Commodities Named.

Five commodities are named in the bill—cotton, wheat, corn, rice and swine. Cattle and butter, in the old bill, are omitted. Rice appears in the bill for the first time. It is said this is the result of requests from Southern rice interests.

A new feature of the bill is a loan section which authorized loans to cooperatives handling any commodity for the purpose of "controlling the surplus," without the requirement of an equalization fee. This provision is similar to the loan feature of the Fess and Tincher bills of last season.

Federal Board Also.

A Federal Farm Board is provided, as in the old bill, to consist of the Secretary of Agriculture and one member from each Federal Land Bank District, to be appointed by the president from a list of eligibles submitted by a nominating committee in each district composed of representatives of cooperative associations and farm organizations.

A non-salaried commodity Advisory Council is provided for each commodity, to consist of seven men selected by the Board from lists submitted by cooperatives and farm organizations' representatives of the commodity.

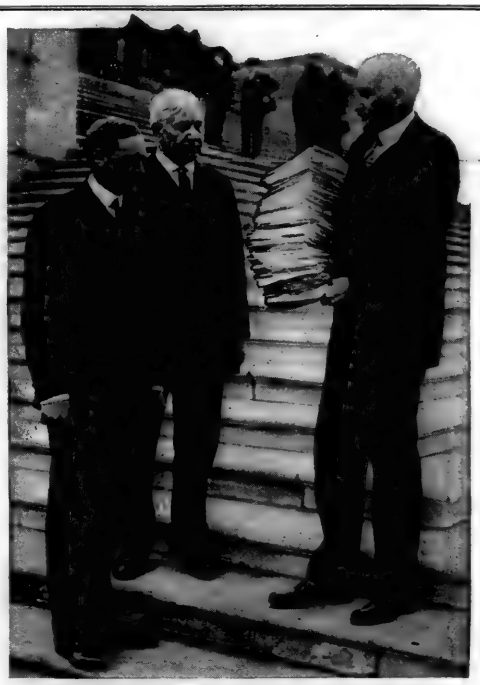
Revolving Fund.

The bill authorizes an appropriation of $250,000,000 which will constitute a revolving fund, from which loans may be made to the several commodity stabilization funds in anticipation of the collection of equalization fees. Loans may also be made from the revolving fund directly to cooperatives for handling the surplus. Both classes of loans, those made directly to cooperatives and those made to commodity stabilization funds, must be repaid with interest.

Appropriation Authorized.

The only costs to the government under this bill are the salaries and expense of the Federal Farm Board, for which an appropriation of $500,000 is authorized. All other costs are to be paid out of the several stabilization funds derived from the collection of equalization fees.

A Thought for the New Year



The holiday season is a time for joy and happiness when we are close to family and friends. The best within us finds expression in making others happy, in bringing cheer to those about us. It is this spirit of Christ, the lowly Nazarene whose example and work still lives throughout the world, that makes man lay aside the pettiness of quarrels and strife, egotism, hatred, selfishness, and ill-will.

Earl C. Smith

The Illinois Agricultural Association is a business organization of farmers, but it is also an association of friends interested in a common purpose, working for a common cause. As we enter the New Year, our eleventh year of active service, I hope that none of us may lose sight of the high purposes that led to this union. Let us strive to give character and soul to our organization, as well as stability and strength, in the coming year.

Earl C. Smith

The picture above recalls a familiar scene enacted at Washington in 1924 when Sam Thompson, then president of the Illinois Agricultural Association received thousands of petitions from Illinois farmers asking Congress to pass the McNary-Haugen bill. Senator Chas. L. McNary of Oregon, at the left, will address the annual meeting of the I. A. A. at Peoria this month. Congressman Haugen is the gentleman in the center.

Senator Chas. L. McNary, Chairman of Agricultural Committee And Leader In Congress To Speak On Fri., Jan. 27

Sam H. Thompson Scheduled For Banquet Talk; Music, Entertainment, Other Prominent Men On Program; Women To Hold Own Conference.

PEORIA is getting ready for a crowd of 1,000 delegates and farm bureau members from 93 Illinois counties. The new Pere Marquette Hotel, Peoria's newest and best hostelry, is being rushed to completion for the annual assembly that transcends all other agricultural gatherings in this state for being representative, business-like, and attractive of interest and respect.

Bring a Member.

The Illinois Agricultural Association will have the honor of dedicating the new hotel, and the latter the privilege of entertaining the Eleventh Annual Convention of the organization whose name and activities have become known throughout the United States and foreign countries.

The opening day of Wednesday, Jan. 26, will not be the opening of the convention proper. That day will be devoted to committee meetings, conferences, and the annual get-togethers of the subsidiary associations of the I. A. A. The Illinois Agricultural Co-operatives Association, the Illinois Farm Bureau Serum Association, and the Illinois Farm Bureau Baseball League will meet Wednesday to discuss their problems and plans for the coming year.

The Executive Committee of the I. A. A. will hold its annual pre-convention session on Wednesday night, and then on Thursday the decks will be cleared for the deliberations of the parent organization which finds itself on the threshold of its eleventh year of service.

Charles L. McNary, chairman of the Agricultural Committee in the United States senate and leader in the fight for surplus-control legislation, has promised to make the long journey from Washington to give Illinois farmers the last word on the possibilities of their bill and its promised relief going through.

Senator McNary is booked to speak at a special luncheon in his honor on Friday, January 27.

The Annual Banquet on Thursday night, where Sam H. Thompson, president of the American Farm Bureau Federation and its most popular and colorful chief, will deliver the message, will be made further attractive by music from the peer of all soloists and entertainers, James Goddard, of Chicago, who brought down the house last year at Urbana.

Some Banquet

Dr. Carl C. Taylor from the North Carolina College of Agriculture, Lucius Wilson, business organization efficiency expert, George E. Frazer, public accountant and business adviser, Prof. Chris Christensen, director of the division of cooperative marketing in the U. S. Department of Agriculture, and others to be announced later will

(Continued on col. 1, page 3.)

Knox County Claims Ontario Holds Title For High Membership

Ontario township in Knox county is the latest disputant to the claim of Naperville township, Dupage county for having the highest township farm bureau membership in the state.

A. R. Kemp, associate adviser in Knox county states that Ontario township has a membership of 103 and so is entitled to the honor of high farm bureau membership township.

"The Community With A Vision," is the term applied to Ontario Township which its residents claim is the garden spot of the world.

Previous to the present three-year-period, the township had a signed membership of 101, and ever since the farm bureau was organized, Ontario has been a banner community in farm bureau spirit and activity.

Rev. Guy Van Buskirk, pastor of the Ontario Parish, a real country church, is township farm bureau director. The community life of the township is built up around this church and the Ontario Men's Club.

James McBride, one of Knox County's "Master Farmers" is vice-director and secretary of the township.

TRAYLOR TO SPEAK AT FARMERS' WEEK, URBANA

Melvin C. Traylor, president of the American Bankers' Association will discuss "European Debts and and the Farm Situation," on the annual Farmers' Week program to be held Jan. 17 to 22 at the University of Illinois, Urbana.

Dr. Henry C. Taylor, economist from Northwestern University, Dan. T. Gray, dean of the Arkansas College of Agriculture, Lorado Taft, sculptor, Miss Lita Bane, president of the American Home Economic Association, and D. J. Caffrey, in charge of research work on the corn borer for the U. S. Dept. of Agriculture are other headline speakers.

The Annual Utility Corn Show, the annual meeting of the Illinois Crop Improvement Association a farmers' banquet, a horse show and horse-pulling contest, and a "Little International" fat stock show are other features announced for the week. Fare and one-half rates will apply for the round trip to Urbana at this time.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the farm bureau was organized, namely to promote, protect and represent the business, economic, social and educational interests of the farmers of Illinois and the nation, and to develope agriculture.

Published once a month at 404 North Wesley Ave., Mount Morris, Illinois, by the Illinois Agricultural Association. Edited by Department of Information, E. G. Thiem, Director, 608 South Dearborn Street, Chicago, Illinois. Entered as second-class matter October 20, 1925, at the post office at Mount Morris Illinois, under the Act of March 3, 1879. Acceptance for mailing at special rate of postage provided for in Section 412, Act of February 28, 1925, authorized October 27, 1925. The individual membership fee of the Illinois Agricultural Association in five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record. Postmaster: In returning an uncalled for or missent copy, please indicate key number on address as is required by law.

Master Farmers Honored

FIFTEEN outstanding Illinois farmers were honored by Prairie Farmer at its Second Annual Master Farmer Banquet in Chicago recently. They were all awarded the Master Farmer medal because they are "good farmers, good neighbors, and good citizens."

It isn't strange that all these men are active farm bureau members. Many of them are officers or former officers on their county executive committees. It's such men that made the farm bureau. They are its backbone, its leaders. They are the men who get the most out of their organization because they put the most in. It is idle to speculate how much the county farm bureaus are doing to make master farmers. Certainly their work has a tremendously large influence. The wide use of limestone rock phosphate, certified seed, improved livestock, farm accounting, better cultivation, all these were stimulated when the farm bureau was organized. The experiment station revealed the need in many cases, the farm papers wielded a powerful influence in initiating reforms and in spreading the gospel, but the county farm bureaus were needed to drive home the bargain and show by word, example, and demonstration the value of better farm practices.

Prairie Farmer and the other farm papers that are helping to honor the men who have succeeded in the oldest profession are making an inestimable contribution to the betterment of American agriculture.

Milk Shippers Have a Grievance

WHOLE milk shippers in the Chicago fluid milk zone are faced again with the dilemma of indifferent prices. Milk testing 3.5 per cent from tuberculin tested herds brings only $2.50 per cwt. The surplus above the average or base amounts delivered during August, September, and October sells for $2.20 per cwt. Dairymen contend that they can't continue to deliver whole milk so cheaply under the stringent requirements of the Chicago Health Department. Their costs have been raised tremendously by accrediting their herds, submitting to regular sanitary inspection, installing sanitary equipment, and employing high priced labor.

"There is no incentive to apply the tuberculin test," say the untested herd owners. "Selling untested milk to the condensery, or butterfat to the creamery at 60 cents a pound, is more profitable."

Here is a grievance that ought to be righted. The dealers are human and will continue to buy as cheaply as possible. The old Milk Producers' Association is defunct and out of the running. The Pure Milk Association, the new organization of tested herd owners, is valiantly striving to represent the whole milk shippers in securing fair prices. It could be more effective with a stronger following. Farmers' difficulties are not righted until they themselves take the necessary action. Wherever we start, we can't avoid getting back to more effective organization as the solution of most of our problems.

Tax Revaluation Ordered

ORGANIZED farmers were recognized again when the Illinois Tax Commission in a recent decision ordered revaluations for taxation purposes of urban and rural property in the four counties of Kane, Peoria, Franklin, and Clay.

When the adjustments placing farm lands on the same basis as city property are made, the rural taxpayers of these four counties will profit to the extent of approximately $200,000. On the basis of the 9271 farms affected, taxes will be $20.50 per farm less than they would have been had the readjustment not been ordered. In other words farmers have been paying $20.50 per farm more than their share of taxes.

The announcement of this new order follows four years of effort by the county farm bureaus of Clay, Kane, Franklin, and Peoria, and the Illinois Agricultural Association to gain a just equalization of farm property values. In Clay County it was found that farm lands were paying nearly twice as much taxes based on actual selling values as town and city property. Here farm lands were being assessed on the basis of 58 to 60 per cent of full valuation whereas property in the towns and villages was paying on only 32 to 34 per cent of full valuation. Actual sales records from the county recorder's office revealed this information.

Farmers are not averse to paying taxes. They have always contributed their share of the cost of government. But bad as our tax system is in this state, its administration works even a greater hardship when one class of real estate is discriminated against.

When these four counties equalize valuations it will virtually complete a job started more than four years ago. Since then nearly all counties in Illinois have equalized valuations as between farm and city property where a discrepancy was brought to light.

Mr. Watson estimates that Illinois farmers have been saved between $2,000,000 and $2,500,000 each year from this work alone. Taxes have not been necessarily reduced by this amount, but they were approximately that much less than they would have been had farm valuations not been equalized.

CAN'T SHAKE IT OFF

—Washington News.

Surplus Control Again

THE battle for surplus control legislation is on in Congress for the third time since 1924. The revised bill introduced in the Senate by Senator McNary, and most recently in the House by Representative Haugen is a modification of the McNary-Haugen bill of last year.

The features held objectionable heretofore by certain Southern democrats have been removed. But the bill has not been emasculated. It contains provisions for a Federal Farm Board, the application of an equalization fee, loans to cooperatives for handling surplus crops at a nominal rate of interest, and a revolving fund of $250,000,000 to be appropriated by Congress for loaning to the Board.

There is nothing in the bill that might be construed as price-fixing. The administration will have an opportunity to demonstrate its expressed interest and good intentions for agriculture as set forth in the president's recent message. We sincerely hope it will do so. Farm organizations throughout the country are as well united on this measure as it is humanly possible for them to be. It's the administration's turn to show its hand.

An Indictment

"THE farmer hasn't been insistent enough in his own behalf. He has been retiring, liberal-minded, individualistic; too ready to rely on his own self-sufficiency. This is the reason for the distinct tendency in this country for agriculture to be neglected in favor of industry and other branches of our economic life."

These words coming from a farm bureau membership solicitor might sound worn out and trite, but coming from Magnus Alexander, research worker, industrialist, and president of the National Industrial Conference Board they are worth more than passing attention. Consciously or unconsciously Mr. Alexander laid the farmers' difficulties squarely at his own door in his recent message before the American Farm Bureau Federation. In other words, while the steel trust was organizing, cutting out wasteful competition, securing a high tariff, and building up a "40 per cent stock dividend," the farmer was out trying to beat his neighbor growing crops and producing milk to sell below cost of production. Is Mr. Alexander right? Write your own answer.

Women Invited

THE women are coming to the annual meeting of the Illinois Agricultural Association this year. They will have a part in the program through the "Home and Community" conference to be held simultaneously with four other conferences on Thursday afternoon, Jan. 27. This is a departure from the old that promises to be productive of much good. Women have furnished the inspiration for most of man's enterprises. For years farm women have played prominently in community clubs, meetings, and organized activities. Now they are to be officially recognized at the state convention. The meeting will be better for their presence.

TAX COMMISSION UPHOLDS FARM BUREAU STAND FOR EQUALIZATION

What The Counties Are Doing

MARSHALL-PUTNAM TO BOOST DAIRYING A major project for 1927 in Marshall-Putnam County will be stimulating the dairy business by the use of high record sires and the purchase of good cows. "The farmers who are best off are the ones who have a few cows to milk, and little cream to sell," says Lloyd Jones of the First National Bank, Henry. Farm adviser Fuller states that the net profit from the M-P Co-operative Oil Co. are twice what it costs to run the farm bureau.

PEORIA COUNTY HOLDS CORN BORER MEETING A corn borer meeting was held in Peoria on Dec. 9 when Wesley P. Flint, state entomologist, presented the latest information about the westward march of the dangerous insect.

McLEAN COUNTY TO ORGANIZE SERVICE CO. We are sidetracking everything else to organize the McLean County Service Company, the name of our proposed cooperative oil company, states Harrison Fahrnkopf, farm adviser. During the past month the farm bureau was busy with the poultry show, the utility corn show, the annual meeting at which Congressman L. J. Dickenson spoke, and two farmers' institutes.

FORD COUNTY TO ORGANIZE MARKETING The Ford County Service Company now being organized will aid farm bureau members both in marketing and in buying commodities more advantageously. Poultry and eggs will be handled at Paxton; livestock will be shipped cooperatively; and later the collective purchase of gas and oil will be added to the other activities.

PIATT COUNTY COOPERATES IN HANDLING SEEDS The Piatt County Farm Bureau and the local farmers' elevators have entered an agreement by which the latter will handle all farm seeds for members at a small saving over the price paid by non-members. The farm bureau has agreed to assist the elevators in locating good seed, pooling orders, and increasing the business.

98% OF KENDALL COUNTY MEMBERS PAID UP The books of the Kendall County Farm Bureau which has a membership of two-thirds of all farmers in the county, show that 98 per cent of the dues are collected for 1926.

MASON COUNTY TO SHIP IN COWPEAS Plans are being made for shipping in cowpea seed and alfalfa hay, according to Farm Adviser Isaacs. Weather conditions last year created a shortage of both cowpea seed and alfalfa hay.

MOULTRIE COUNTY REPORTS SUCCESS WITH HATCHERY Our hatchery has been a means of selling better housing, feeding, and care of poultry, to our members, states Farm Adviser Turner. Thirty flock owners were interested in preparing for accrediting work. The Pullorin test will be used for detecting white diarrhea. The tested flock owners receive three cents more per dozen for eggs than state accredited flock owners.

OGLE COUNTY ORGANIZES PROTECTIVE ASSOCIATION A reward of $100 is offered by the newly organized Farm Bureau Protective Association for the conviction of thieves. Members will cooperate with the sheriff and the deputies of the county in securing convictions wherever there is sufficient evidence presented.

WAYNE COUNTY ACCREDITS POULTRY FLOCKS Under the supervision of the Farm Adviser, C. T. Hufford, thirty pure bred flocks, containing approximately 6000 birds will be state accredited this month.

SANGAMON COUNTY OIL COMPANY IN OPERATION The Sangamon Farmers Oil Company, recently organized, will establish bulk plants at New Berlin, Auburn, Buffalo and Williamsville. Truck headquarters will be stationed at Pleasant Plains, Pawnee and Illiopolis. The Springfield filling station is located at Ninth and Jefferson streets.

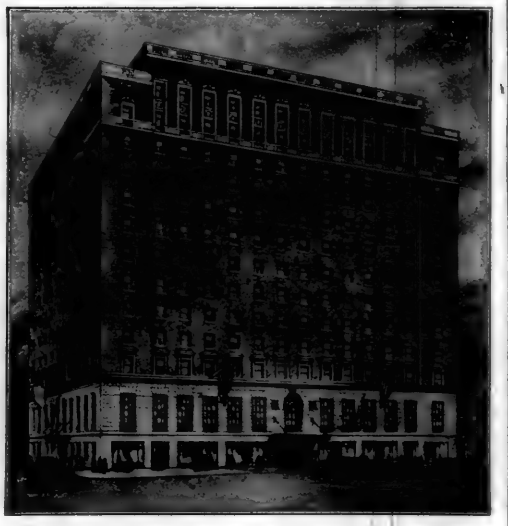
PULASKI COUNTY SIGNS MANY NEW MEMBERS A substantial increase in membership with 25 per cent new members is reported by Farm Adviser J. H. Hughes. Two bull blocks are being organized in connection with the dairy calf club. Pulaski County was represented at the International Livestock Show for the first time in history when Matthew Reichert, county club champion made the long trip unescorted. "Matthew came home tired but brim full of experience," writes Hughes. "He said that Chicago has too many cobble stones, banquets and good eats." (Continued next month)

1,000 Expected at Annual Meeting

(Continued from col. 5, page 1.)

make up the roster of prominent people engaged for the three-day session.

A new feature will be the Home and Community Conference on Thursday afternoon for women, and delegates interested in this work. This is the first time women have been invited and provision made for their participation in the annual convention.



TO SING

James Goddard of the Foreman National Bank, Chicago, will sing and lead the singing at the Annual I. A. A. Banquet, Peoria, Jan. 27.

Where We Will Meet Jan. 26-27-28

This is the new Pere Marquette Hotel, Peoria, where the Eleventh Annual Meeting of the Illinois Agricultural Association will be held. The Marquette is said to be the finest hotel in downstate Illinois. It is being rushed to completion to care for the I. A. A. convention.

Tentative Program Illinois Agricultural Association Annual Meeting

Jan. 26-27-28, 1927.
Pere Marquette Hotel, Peoria.

WEDNESDAY, JANUARY 26.

8:30 a. m.—Illinois Farm Bureau Baseball League, Annual Meeting.
10:30 a. m.—Illinois Farm Bureau Serum Association, Annual Meeting.
1:30 p. m.—Illinois Agricultural Cooperatives Association, Annual Meeting.
6:30 p. m.—Annual Dinner, Farm Bureau Presidents and Farm Advisers.

THURSDAY, JANUARY 27.
I. A. A. ANNUAL MEETING.

9:30 a. m. to 12:00 Opening Session.
President's message.
Secretary's report.
Treasurer's report.
1:30 p. m. to 4:30—Sectional Conferences.
I. ORGANIZATION AND INFORMATION, C. E. Bamborough, presiding; Lucius E. Wilson, pres. General Organization Co., present.
II. PUBLIC RELATIONS, Frank D. Barton, presiding; A. C. Everingham, legislative representative, and John C. Watson, director of taxation, present.
III. FINANCIAL BUSINESS SERVICE, Geo. F. Tullock, presiding; George E. Frazer, of Frazer and Torbet, public accountants, Chicago, present.
IV. MARKETING, Samuel Sorrells, presiding; Chris L. Christenson, director of division of cooperative marketing, U. S. D. A., present.
V. HOME AND COMMUNITY (for women) Mrs. Spencer Ewing, president of Illinois Home Bureau Federation, presiding; Mrs. Charles W. Sewell, field director, Home and Community Committee, present.
Mr. Eugene T. Lies, special-repr. Playground and Recreation Association of America, present.
4:30 to 5:30 p. m.—Congressional District Meetings.
6:30 p. m.—Annual Banquet and Election.
Sam H. Thompson—speaker.
James Goddard—soloist.
Humorist to be announced.

FRIDAY, JANUARY 28.

9:30 to 11:00 a. m.—Business Session of Delegates.
11:00 to 12:00 a. m.—Address—Dr. Carl C. Taylor, Dean Graduate School, North Carolina Agricultural College.
12:30 p. m.—Luncheon, Address, Senator Chas. L. McNary, chairman agricultural committee, U. S. Senate.
2:00 p. m.—Adoption of Resolutions.

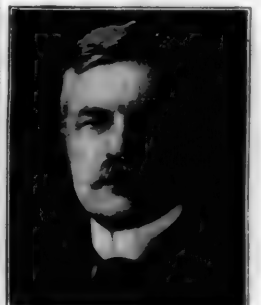
Kane, Peoria, Clay, And Franklin Co.'s Involved In Order

Revaluation Hearing Held Dec. 21. No. Evidence Presented By Boards To Show Why Reassessment Should Not Be Made.

COUNTY boards of review from the counties of Kane, Franklin, Clay, and Peoria appeared, two with their states attorneys, before the Illinois Tax Commission on Tuesday, Dec. 21, and presented pleas asking the Commission to countermand its order calling for a revaluation of farm properties in these counties.

J. C. Watson.

Up until time of going to press no action had been taken to countermand the order. Chairman Wm. H. Malone told the board of review representatives in the open hearing that their statements were good reason why revaluations should be ordered.



Figures Presented.

The decision of the Tax Commission ordering a reassessment came following presentation of facts and figures by John C. Watson and Earl C. Smith of the Illinois Agricultural Association showing that inequalities between farm and city valuation existed in the four counties mentioned.

The information revealed by Watson shows that landowners in these counties are paying around $200,000 more than their just share of taxes. In Clay county farm lands are being assessed on the basis of 58 to 60 per cent of full valuation whereas in the towns and cities the full valuation are only 32 to 34 per cent of actual selling values.

The controversy which led to the final order by the Tax Commission has been underway for four years. The boards of review have been appealed to repeatedly, by local farm bureau committees and the I. A. A. Their indifference and evident desire to defeat justice led the Association to appeal to the state Commission which has jurisdiction over such matters, with the result noted.

New Commission's Chairman

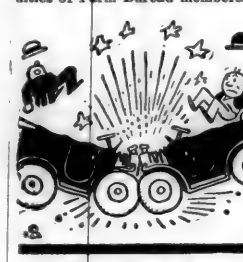
Charles Nagel, of St. Louis, Secretary of Commerce and Labor in President Taft's cabinet, is chairman of the joint commission representing the National Industrial Conference Board and the United States Chamber of Commerce recently appointed to work out a national plan and policy for agriculture. Mr. Nagel is honorary vice-president of the U. S. Chamber of Commerce.

44 Counties Ready To Sell Quotas In Auto Insurance Co.

Fire and Theft Policy Proves Very Popular.

By V. VANIMAN.

THE Illinois Agricultural Mutual Insurance Company, organized to provide auto insurance at cost, has a new name among farm bureau members. They call it "Our Company."



V. Vaniman.

The farm bureau presidents and the Executive Committee of the I. A. A. planned well and thought straight in setting up the company. No constructive suggestions have been made to date for improving the plan.

Forty-four farm bureaus already have organized to secure their quota of charter members equal to 20 per cent of the present farm bureau membership. The organization in each county consists of a county wide insurance committee of five men and a local township committee, including a chairman and four men from each township. All these men meet in a one-day session and school themselves on auto insurance so they can give their fellow farm bureau members accurate information about auto insurance.

Plan Is Popular.

The writing of what is termed a "No value policy" for fire and theft is meeting with unanimous approval. In case of loss of car by fire or theft the company pays the insured the actual value of the car at the time of the loss. Of cars of the same make and age one may be worth twice as much as the other one, depending upon care and usage, consequently the basis of a stated depreciation per month does not agree with the reasoning faculties of Farm Bureau members.

Collision Coverage Broad.

Collision coverage is to reimburse the insured for damage done to his car and the policy not only provides protection against collision with moving objects but also with stationary objects in case of avoiding collision with a moving object. There are no deductibles. The company will pay the insured 80 per cent of the collision loss or damage.

Public Liability and Property Damage.

Public Liability and Property Damage insurance is to protect the insured against the liability imposed by law for personal injury or damage the car does to persons or property. The insured is protected up to $5,000 for personal injury or death to one person and with that limit per person $10,000 for any single accident. On property damage up to $1,000 for any single accident. One Farm Bureau member reasoned that based on law of averages he could not afford to gamble $5 or $10 against $5,000 that his car might not injure some one or cause a fatal accident during the year.

Plan Simple.

The auto owner can have any one of the four optional forms of coverage, namely, Class I, Fire and Theft, Collision, Public Liability and Property Damage. This is what is termed full coverage; Class II, Fire and Theft and Public Liability and Property Damage; Class III, Public Liability and Property Damage or Class IV, Fire and Theft.

Cost of Insurance.

The company does not operate for profit. It is just to render one more service to farm bureau members. Each car will pay its proportionate share of the losses according to the form of coverage carried, plus the proportionate share of the operating expense of the company. *No money paid until company starts operation.*

The initial payment for each car or truck is as follows:

Policy Fee	$ 5
Premium Deposit	10
Surplus Share	10
Total	$25

The above amount is for life. There is no additional payment to the insured except the payment of his share of the losses and expenses at the end of the six month's period which restores the premium deposit and renews the insurance for another six months' period. Thus the policy never expires except through cancellation. The member can have his policy transferred to another car by paying a transfer fee of $1.

Retain Surplus Share.

The surplus share is each member's contribution to the surplus and each member is credited with his share of the surplus earnings on his surplus share.

Both the surplus share and the premium deposit are returned to the member upon cancellation of his policy, thus the assets of the member in the company are $20. It is understood, of course, that if the assessment is not paid at the end of the six months' period it is taken out of the premium deposit and the balance returned to the member together with the surplus share.

No Money Paid.

In order to cut the overhead cost of operation to a minimum and also to provide the necessary free surplus required by law, 5,000 applications for auto insurance must be secured. On making application a check or checks should be made out to the Illinois Agricultural Mutual Insurance Company. Do not date them.

Plan I. If you want insurance to go into force when company starts, make one check for $25 and attach to application. This will be dated and cashed ten days before company starts.

Plan II. If you have other insurance in force, make one check for $15, which will consist of policy fee and surplus share. Do not date it. This check will be cashed when company starts. Make another check for $10 which is for the premium deposit.

By making application for auto insurance and being a charter member you will have had a part in laying the foundation for a broad insurance program for farm bureau members. Plans are already being formulated for life insurance as another service for farm bureau members. Your enrollment as a charter member on auto insurance will hasten the establishment of the company. See your Farm Bureau or write direct to the Illinois Agricultural Mutual Insurance Company, 608 S. Dearborn St., Chicago, Illinois.

Howard B. Hancock, president of the New Jersey Farm Bureau Federation went out single-handed in his home county of Cumberland and signed up 90 per cent of all the farm families in his township. In his first 24 interviews he signed 22.

Illinois Commission Orders Tax Cut

Left to right above are James D. Telford, Wm. H. Malone, and Chas. R. Francis, members of the Illinois Tax Commission who upheld the county farm bureaus of Kane, Peoria, Franklin, and Clay and the Illinois Agricultural Association recently when they ordered a revaluation of farm property in the four counties.

Wm. H. Malone, chairman of the Commission is seen signing the order.

The order for a revaluation follows four years of consistent and painstaking effort on behalf of the Farm Bureaus and the I. A. A. during which statistics and data were collected to show that farm property was bearing an unequal portion of the tax burden.

When the necessary adjustments are made, farmers in the counties affected will save approximately $200,000 or $20.50 per farm.

15 Farm Bureau Men Awarded Gold Medals As Merit Recognition

Prairie Farmer Awards Master Farmer Insignias To Highest Scoring Candidates.

FIFTEEN farm bureau members from various sections of Illinois were honored at the second annual Master Farmers banquet given by Prairie Farmer at the Sherman Hotel during the week of the International Live Stock Exposition in Chicago.

The following men were so honored and were presented with gold medals by Burridge D. Butler, publisher of Prairie Farmer: George T. Harris, Rock Island County; Albert Hayes, Peoria County; E. D. Lawrence, McLean County; Martin Linn, Fulton County; W. G. McCormick, Douglas County; J. L. McKeighan, J. E. Main, and Jones McBride, all of Knox county, Charles E. Mies, Livingston County; Fred C. Parks, Woodford County; Wm. C. Rebhan, Montgomery County, Edward Schrock, Tazewell County; Carl Sargeant, Schuyler County; George Shuman, Woodford County and Clarence Watson, McDonough County.

Good Neighbors and Citizens.

"To these men, because they are good farmers, good neighbors, and good citizens, Prairie Farmer is awarding the degree of Master Farmer, and presenting each with a gold medal as a token," said editor C. V. Gregory, who acted as toastmaster.

William R. Dawes, President of the Chicago Association of Commerce, was the speaker of the evening. He told why the Middle West should have a deep waterway to the sea.

Knox County with three men had the honor of producing the largest number of Master Farmers this year. Woodford County produced two, and the other counties one each. In their speeches of acceptance the honored men paid glowing tribute to Dr. Cyril G. Hopkins, who instituted the Illinois system of Permanent Soil Fertility.

J. L. McKeighan of Yates City is vice-director and secretary of the farm bureau in Salem Township, Knox County. McKeighan has been a prominent seed corn grower and breeder of Hampshire sheep for many years. He was crowned corn king at the State show at Urbana in 1923 and 1924. McKeighan aided the farm bureau in arranging for the first state utility corn show held in Galesburg in 1921.

James McBride of Oneida, Knox County, was formerly director of the Farm Bureau from Lynn Township and has served as vice-director and secretary of Ontario Township since moving to his present home. He was active in establishing the Ontario Parish Experimental Plot, sponsored by the Ontario Men's Club, of which he is a member.

Grows Big Crops.

J. E. Main of Altona has been an active worker for the Farm Bureau in Walnut Grove Township ever since the organization was started. He has put into practice the methods of improving soil and crop yields as recommended by the Farm Bureau. He has further increased yields through the introduction of new varieties of seed oats and disease free seed corn introduced by the Farm Bureau. He has a record of producing 108 bushels of Iowa oats per acre on an 80 acre field.

Fred C. Parks of Minonk is vice-president of the Woodford County Farm Bureau and has been an active co-operator since its formation. He is just finishing his eleventh year as a co-operator in the farm management project. He is president of the Minonk High school board and is very active in community and church affairs.

A Charter Member.

George Shuman is also a charter member of the Woodford County Farm Bureau and is an active co-operator and is also completing his eleventh year in the farm management project. He as well as Mr. Parks has been very successful in his farm enterprises and especially so in swine production.

E. D. Lawrence of McLean County was on the board of directors of the Farm Bureau for four years, acting as secretary for three years. Lawrence farms around 500 acres of land. He is a graduate of the University of Illinois and is an active worker in community enterprises.

Boys' and Girls' Club Champion Guests of I. A. A. at Breakfast

"Gee kids, look at all the eats. Isn't this a swell room." These and many similar remarks, by the state and county club champions representing the 13,000 boy and girl club members of Illinois, were heard at the Illinois Agricultural Association club breakfast on Wednesday morning, December first.

W. E. Hedgcock

More than 200 boys and girls club leaders, farm advisers, and other officials were guests of the I. A. A. in the Crystal Room of the Great Northern Hotel during International week.

Matthew Reichert, 14, champion calf club boy from Pulaski County claimed the long distance record among the Illinois club members at the International. Matthew made the trip of nearly 400 miles unaccompanied. He had the honor of being the first club member ever to represent his county at this national club gathering.

Seven boys and girls were awarded gold medals. Six of the medal winners were members of the champion livestock and dairy judging teams as follows:

Champion Livestock Judging Team:
Raymond Benbone, Iroquois County.
Raymond Callahan, Iroquois County.
Harold Hixon, Iroquois County.

Champion Dairy Judging Team:
Bernard Montgomery, Bureau County.
Rudolph May, Bureau County.
Harold McDonald, Bureau County.

Speeches were made by Dean H. W. Mumford of the Illinois College of Agriculture, Earl C. Smith, president of the Illinois Agricultural Association, and E. I. Pilchard, state club leader. W. E. Hedgcock of the Illinois Agricultural Association awarded the medals.

Knox County's Champion Team

From left to right above are E. R. Bowman, Edd Holmes, Zina Crane, and J. W. Asplund, all from Knox county. These men comprise Knox county's championship sign-up team. They signed 30 members in the southeast quarter of Ontario Township during the recent drive of the Knox County Farm Bureau.

He that would catch the fish must venture his bait.—Franklin.

Iowa finished the year 1926 with the largest paid farm bureau membership. Illinois was a close second. New York state made a gain of 4112 members.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

ALL RECORDS BROKEN WHEN 2000 ATTEND 12th ANNUAL CONVENTION

Disloyalty To Middle West Is Charge Hurled At Colleagues By Congressman Brand In Speech Before Crowd Of 1700

Scores Opponents of Surplus Control Measure and Predicts Issue Will Become Political Football Unless Solved By Present Congress.

CONGRESSMAN Charles Brand of Ohio brought his heavy artillery and ammunition into play against opponents of surplus control legislation before 1,700 delegates and visitors at the Friday luncheon during the I. A. A. convention at Peoria last week.

Before finishing his interesting two-hour address to the greatest crowd ever assembled at an I. A. A. meeting, he poured volley after volley into his fellow congressmen from Chicago, St. Louis, Kansas City, Minneapolis, St. Paul, and Milwaukee who voted against the McNary Haugen measure.

"These men are traitors to the great Middle West which they are supposed to represent," he said. "If they had voted for agriculture, the industry that supports these cities, we would have had the needed majority to pass this legislation in the last congress."

Traylor and Jardine Scored

Melvin Traylor, president of the American Bankers Association and Secretary Jardine likewise came in for a round of condemnation for their opposition to the surplus control plan.

"The bankers have their McNary Haugen bill in the Federal Reserve Act, the railroads have theirs in the Transportation Act, and labor has the Immigration Act," said Mr. Brand. He commended labor, however, for its friendliness to the farmers' cause, and John Walker, president of the State Federation of Labor, and an interested listener, smilingly acknowledged the recognition.

"The analogy between the Federal Reserve Act and the McNary Haugen plan is perfect," said the speaker. "That Act stabilized credit in this country." Then he compared the two point by point and showed how the member banks pay 10 per cent of their deposits and six per cent of their capital into the Federal Reserve Bank.

"It is unbecoming of bankers to oppose this legislation for farmers when the government did so much for them," said the congressman. "Mr. Traylor may be one of the money changers in the temple."

Farmers Lost 20 Billion.

After showing how agriculture had lost 20 billions of dollars between 1920 and 1925, the speaker started an explanation of the surplus control plan showing how it might be used to stabilize prices of such crops as cotton, wheat, corn, and livestock.

"The fear expressed by some opponents that the price of food would be raised is groundless," said the speaker. Then to prove his point he showed how bread had remained at eight cents per pound for the past eight years while wheat varied from 80 cents to $1.85 per bushel. "Cotton goods haven't changed in price since the price of cotton went so low," he continued. "The only difference is that the cotton planters of the South get less while the manufacturers and spinners get more."

Before concluding his address the congressman predicted that if the surplus control plan is not adopted by the present Congress it would be thrown into politics.

"If that happens don't vote for anyone who isn't your friend," was the concluding word and directly following it the vast audience arose and cheered the speaker for fully five minutes. It was the greatest exhibition of enthusiasm and unanimity of sentiment ever expressed at a farm gathering in Illinois.

Flays Opponents

Congressman Charles Brand

Cooperatives Assn. to Indianapolis in 1927

Definite plans to open a branch office at Indianapolis in the coming year were laid at the annual meeting of the Illinois Agricultural Cooperatives Association held at Peoria on Wednesday, Jan. 26.

Sixty-two counties were represented in the meeting which was the largest held in the short history of the Association. Among the organizations represented were 24 county farm bureaus, 15 farmers' elevators, five shipping associations, six insurance companies, four farm supply companies, three dairy organizations, one livestock terminal commission association, and three seed and cotton cooperatives.

300 Members Goal.

The goal for the coming year is 300 active member associations as announced by George R. Wicker, manager. Eighty-four more members are required to reach this number.

(Continued on col. 5, page 4.)

Our Sam Asks For Continued Support To Relief Program

More Than 1,200 Attend Banquet On Thursday Night In Shrine Temple Building.

THE attitude which society takes toward agriculture depends upon farmers themselves. If we have the proper respect for ourselves and our calling, with faith enough to stand together through trials and adversity, we will write a story that will be the pride of our children and those to come after them. We canont fail if we do this.

Sam H. Thompson

This is the sage advice Sam H. Thompson, president of the American Farm Bureau Federation, and the pride of the Illinois Agricultural Association, handed out to his fellow citizens and friends at the annual banquet in Peoria on Thursday, Jan. 27.

Talks Plainly.

Our Sam was talking to his home folks and he talked plainly. The home folks responded with a powerful ovation that threatened to raise the roof off the Shrine Temple building.

After admonishing the great audience of delegates and visitors, many of whom he had worked side by side with in building the I. A. A. about the necessity for maintaining a strong organization and a united front, Mr. Thompson launched into a discussion of the economic situation of agriculture and the need for enabling legislation so the farmer may help himself out.

"Lack of stabilization is the trouble with our business," said the speaker, "and lack of bargaining power on the part of farmers is the root of all the evil."

Answers Criticism.

Answering the criticism of "price-fixing" and "economically unsound" both of which have been used in describing the surplus control legislation asked by farmers, Mr. Thompson stated that if this were true, the same might be said for the whole protective system as applied to other groups.

The last six years, the speaker pointed out, have seen the steady transfer of wealth from the farm to the city because the farmer had no way of securing for himself a fair price for his product. Farmers have lost while others have gained.

James Goddard of the Foreman National Bank, Chicago led the community singing and later sang negro melodies which drew tremendous applause. R. Bradley, "the talkative tailor" from Peoria was the humorist of the evening.

Congressman Brand's complete speech as well as copies of "A Short Story of the I. A. A. and Report for 1926" may be had by writing the Department of Information, Illinois Agricultural Association, 608 So. Dearborn St., Chicago. They will be sent free as long as they last.

Earl C. Smith Unopposed for President Is Elected by Unanimous Vote. Frank Barton Wins Over W. C. McQueen for Vice-President. Four New Men on Executive Committee

Congressman Charles Brand of Ohio Gets Glad Hand and Vociferous Applause From 1700 Delegates and Visitors at Friday Luncheon in Shrine Temple As He Flays Opponents of Farm Measure.

THE greatest annual convention in the eleven years' history of the Illinois Agricultural Association is over. It was greatest in attendance, in spirit, in enthusiasm, and in the impression made upon those who saw this mighty exhibition of the strength and loyalty of the organized farmers of Illinois.

Peoria, the metropolis of downstate Illinois, was taxed to care for the crowd that exceeded all expectations. One thousand was the number predicted, but more than 2,000 delegates, visitors, and their wives came from the 93 organized counties of the state to participate in the three-day program.

Twenty newspaper, farm paper and press correspondents from Chicago, Washington, D. C., Indiana, and the downstate cities of Illinois who attended the convention broadcast its proceedings into every state in the Union. It was a representative gathering.

Many Guests Present.

Mr. and Mrs. J. A. Miller drove to the meeting from Denver, Colorado.

John Walker, the vigorous president of the Illinois State Federation of Labor, Wm. H. Malone, chairman of the Illinois Tax Commission, Mrs. H. C. Rodenhouser of the Illinois Federation of Women's Clubs, Mrs. Arthur Smith of the Illinois League of Women Voters, R. C. Moore, secretary of the Illinois State Teachers' Association, H. E. Young, secretary of the Illinois Farmers' Institute, E. A. Eckert, of the Illinois State Grange, and Justice of the supreme court of Illinois, Clyde E. Stone were all guests at the Friday luncheon. Telegrams from eight Illinois congressmen, who were unable to attend were read by President Earl Smith.

Herman Danforth, first president, Howard Leonard, and Sam H. Thompson, all past presidents of the I. A. A. were other prominent guests there to celebrate the twelfth birthday of the organization which they helped build.

Beginning Tuesday afternoon, a steady stream of delegates and visitors poured into the city on the banks of the Illinois, by train, trolley, bus, and auto until by Thursday all hotels were crowded to capacity. It was the first large convention held in the new Pere Marquette hotel, but five of Peoria's largest buildings were required to hold all the sessions of the meeting.

Smith Unopposed.

Rumors regarding opposition to President Smith for reelection which were heard about the lobby prior to the election never materialized. When Frank Barton arose to nominate Mr. Smith following the call for candidates by A. C. Everingham, President Smith's name was received with loud acclaim. A few minutes later the secretary was instructed by the voters to cast a unanimous ballot for the popular candidate.

The vice-presidential berth, held last year by Chas. R. Finley was

McNARY DETAINED

Senator Charles L. McNary who was scheduled to speak at the Friday luncheon called by long distance telephone on Thursday to say that it was imperative he stay in Washington in the interest of the McNary farm relief bill.

I. A. A. Executive Committee Votes For "Bureau Farmer"

The BUREAU FARMER, official publication of the American Farm Bureau Federation, will be sent to all members of the I. A. A. according to a unanimous decision reached by the Executive Committee at its regular meeting held on Jan. 7.

The BUREAU FARMER which appeared officially January 1, is a 32-page magazine issued once each month. It is published by John Wilding, Ft. Wayne, Indiana, who signed a contract with the American Farm Bureau Federation by which the former assumes all risk and responsibility for advertising.

I. A. A. News Included.

News of the Illinois Agricultural Association and the county farm bureaus will be included in a four to eight page insert each month. The magazine will appear the first of the month.

The Illinois Agricultural Associa-

(Continued on col. 8, page 4.)

44 Counties Ready To Sell Quotas In Auto Insurance Co.

Fire and Theft Policy Proves Very Popular.

By V. VANIMAN.

THE Illinois Agricultural Mutual Insurance Company, organized to provide auto insurance at cost, has a new name among farm bureau members. They call it "Our Company."

V. Vaniman.

The farm bureau presidents and the Executive Committee of the I. A. A. planned well and thought straight in setting up the company. No constructive suggestions have been made to date for improving the plan.

Forty-four farm bureaus already have organized to secure their quota of charter members equal to 20 per cent of the present farm bureau membership. The organization in each county consists of a county wide insurance committee of five men and a local township committee, including a chairman and four men from each township. All these men meet in a one-day session and school themselves on auto insurance so they can give their fellow farm bureau members accurate information about auto insurance.

Plan Is Popular.

The writing of what is termed a "No value policy" for fire and theft is meeting with unanimous approval. In case of loss of car by fire or theft the company pays the insured the actual value of the car at the time of the loss. Of cars of the same make and age one may be worth twice as much as the other one, depending upon care and usage, consequently the basis of a stated depreciation per month does not agree with the reasoning faculties of Farm Bureau members.

Collision Coverage Broad.

Collision coverage is to reimburse the insured for damage done to his car and the policy not only provides protection against collision with moving objects but also with stationary objects in case of avoiding collision with a moving object. There are no deductibles. The company will pay the insured 80 per cent of the collision loss or damage.

Public Liability and Property Damage.

Public Liability and Property Damage insurance is to protect the insured against the liability imposed by law for personal injury or damage the car does to persons or property. The insured is protected up to $5,000 for personal injury or death to one person and with that limit per person $10,000 for any single accident. On property damage up to $1,000 for any single accident. One Farm Bureau member reasoned that based on law of averages he could not afford to gamble $5 or $10 against $5,000 that his car might not injure some one or cause a fatal accident during the year.

Plan Simple.

The auto owner can have any one of the four optional forms of coverage, namely, Class I, Fire and Theft, Collision, Public Liability and Property Damage. This is what is termed full coverage; Class II, Fire and Theft and Public Liability and Property Damage; Class III, Public Liability and Property Damage or Class IV, Fire and Theft.

Cost of Insurance.

The company does not operate for profit. It is just to render one more service to farm bureau members. Each car will pay its proportionate share of the losses according to the form of coverage carried, plus the proportionate share of the operating expense of the company. *No money paid until company starts operation.*

The initial payment for each car or truck is as follows:

Policy Fee	$ 5
Premium Deposit	10
Surplus Share	10
Total	$25

The above amount is for life. There is no additional payment to the insured except the payment of his share of the losses and expenses at the end of the six month's period which restores the premium deposit and renews the insurance for another six months' period. Thus the policy never expires except through cancellation. The member can have his policy transferred to another car by paying a transfer fee of $1.

Retain Surplus Share.

The surplus share is each member's contribution to the surplus and each member is credited with his share of the surplus earnings on his surplus share.

Both the surplus share and the premium deposit are returned to the member upon cancellation of his policy, thus the assets of the member in the company are $20. It is understood, of course, that if the assessment is not paid at the end of the six months' period it is taken out of the premium deposit and the balance returned to the member together with the surplus share.

No Money Paid.

In order to cut the overhead cost of operation to a minimum and also to provide the necessary free surplus required by law, 5,000 applications for auto insurance must be secured. On making application a check or checks should be made out to the Illinois Agricultural Mutual Insurance Company. Do not date them.

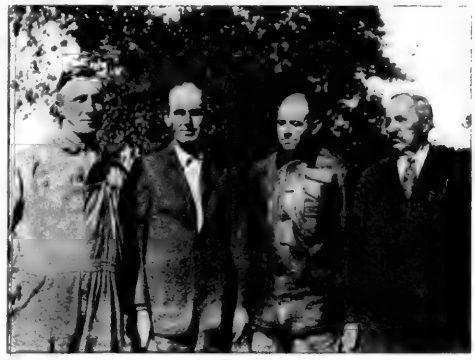
Plan I. If you want insurance to go into force when company starts, make one check for $25 and attach to application. This will be dated and cashed ten days before company starts.

Plan II. If you have other insurance in force, make one check for $15, which will consist of policy fee and surplus share. Do not date it. This check will be cashed when company starts. Make another check for $10 which is for the premium deposit.

By making application for auto insurance and being a charter member you will have had a part in laying the foundation for a broad insurance program for farm bureau members. Plans are already being formulated for life insurance as another service for farm bureau members. Your enrollment as a charter member on auto insurance will hasten the establishment of the company. See your Farm Bureau or write direct to the Illinois Agricultural Mutual Insurance Company, 608 S. Dearborn St., Chicago, Illinois.

Illinois Commission Orders Tax Cut

Left to right above are James D. Telford, Wm. H. Malone, and Chas. R. Francis, members of the Illinois Tax Commission who upheld the county farm bureaus of Kane, Peoria, Franklin, and Clay and the Illinois Agricultural Association recently when they ordered a revaluation of farm property in the four counties.



Wm. H. Malone, chairman of the Commission is seen signing the order.

The order for a revaluation follows four years of consistent and painstaking effort on behalf of the Farm Bureaus and the I. A. A. during which statistics and data were collected to show that farm property was bearing an unequal portion of the tax burden.

When the necessary adjustments are made, farmers in the counties affected will save approximately $200,000 or $20.50 per farm.

Howard B. Hancock, president of the New Jersey Farm Bureau Federation went out single-handed in his home county of Cumberland and signed up 90 per cent of all the farm families in his township. In his first 24 interviews he signed 22.

Knox County's Champion Team

From left to right above are E. R. Bowman, Edd Holmes, Zina Crane, and J. W. Asplund, all from Knox county. These men comprise Knox county's championship sign-up team. They signed 30 members in the southeast quarter of Ontario Township during the recent drive of the Knox County Farm Bureau.

15 Farm Bureau Men Awarded Gold Medals As Merit Recognition

Prairie Farmer Awards Master Farmer Insignias To Highest Scoring Candidates.

FIFTEEN farm bureau members from various sections of Illinois were honored at the second annual Master Farmers banquet given by Prairie Farmer at the Sherman Hotel during the week of the International Live Stock Exposition in Chicago.

The following men were so honored and were presented with gold medals by Burridge D. Butler, publisher of Prairie Farmer: George T. Harris, Rock Island County; Albert Hayes, Peoria County; E. D. Lawrence, McLean County; Martin Linn, Fulton County; W. G. McCormick, Douglas County; J. L. McKeighan, J. E. Main, and Jones McBride, all of Knox county, Charles E. Mies, Livingston County; Fred C. Parks, Woodford County; Wm. C. Rebhan, Montgomery County, Edward Schrock, Tazewell County; Carl Sargeant, Schuyler County; George Shuman, Woodford County and Clarence Watson, McDonough County.

Good Neighbors and Citizens.

"To these men, because they are good farmers, good neighbors, and good citizens, Prairie Farmer is awarding the degree of Master Farmer, and presenting each with a gold medal as a token," said editor C. V. Gregory, who acted as toastmaster.

William R. Dawes, President of the Chicago Association of Commerce, was the speaker of the evening. He told why the Middle West should have a deep waterway to the sea.

Knox County with three men had the honor of producing the largest number of Master Farmers this year. Woodford County produced two, and the other counties one each. In their speeches of acceptance the honored men paid glowing tribute to Dr. Cyril G. Hopkins, who instituted the Illinois system of Permanent Soil Fertility.

J. L. McKeighan of Yates City is vice-director and secretary of the farm bureau in Salem Township, Knox County. McKeighan has been a prominent seed corn grower and breeder of Hampshire sheep for many years. He was crowned corn king at the State show at Urbana in 1923 and 1924. McKeighan aided the farm bureau in arranging for the first state utility corn show held in Galesburg in 1921.

James McBride of Oneida, Knox County, was formerly director of the Farm Bureau from Lynn Township and has served as vice-director and secretary of Ontario Township since moving to his present home. He was active in establishing the Ontario Parish Experimental Plot, sponsored by the Ontario Men's Club, of which he is a member.

Grows Big Crops.

J. E. Main of Altona has been an active worker for the Farm Bureau in Walnut Grove Township ever since the organization was started. He has put into practice the methods of improving soil and crop yields as recommended by the Farm Bureau. He has further increased yields through the introduction of new varieties of seed oats and disease free seed corn introduced by the Farm Bureau. He has a record of producing 108 bushels of Iowa oats per acre on an 80 acre field.

Fred C. Parks of Minonk is vice-president of the Woodford County Farm Bureau and has been an active co-operator since its formation. He is just finishing his eleventh year as a co-operator in the farm management project. He is president of the Minonk High school board and is very active in community and church affairs.

A Charter Member.

George Shuman is also a charter member of the Woodford County Farm Bureau and is an active co-operator and is also completing his eleventh year in the farm management project. He as well as Mr. Parks has been very successful in his farm enterprises and especially so in swine production.

E. D. Lawrence of McLean County was on the board of directors of the Farm Bureau for four years, acting as secretary for three years. Lawrence farms around 500 acres of land. He is a graduate of the University of Illinois and is an active worker in community enterprises.

He that would catch the fish must venture his bait.—Franklin.

Boys' and Girls' Club Champion Guests of I. A. A. at Breakfast

"Gee kids, look at all the eats. Isn't this a swell room." These and many similar remarks, by the state and county club champions representing the 13,000 boy and girl club members of Illinois, were heard at the Illinois Agricultural Association club breakfast on Wednesday morning, December first.

W. E. Hedgcock

More than 200 boys' and girls' club leaders, farm advisers, and other officials were guests of the I. A. A. in the Crystal Room of the Great Northern Hotel during International week.

Matthew Reichert, 14, champion calf club boy from Pulaski County claimed the long distance record among the Illinois club members at the International. Matthew made the trip of nearly 400 miles unaccompanied. He had the honor of being the first club member ever to represent his county at this national club gathering.

Seven boys and girls were awarded gold medals. Six of the medal winners were members of the champion livestock and dairy judging teams as follows:

Champion Livestock Judging Team:
Raymond Benbone, Iroquois County.
Raymond Callahan, Iroquois County.
Harold Hixon, Iroquois County.

Champion Dairy Judging Team:
Bernard Montgomery, Bureau County.
Rudolph May, Bureau County.
Harold McDonald, Bureau County.

Speeches were made by Dean H. W. Mumford of the Illinois College of Agriculture, Earl C. Smith, president of the Illinois Agricultural Association, and E. I. Pilchard, state club leader. W. E. Hedgcock of the Illinois Agricultural Association awarded the medals.

Iowa finished the year 1926 with the largest paid farm bureau membership. Illinois was a close second. New York state made a gain of 4112 members.

ALL RECORDS BROKEN WHEN 2000 ATTEND 12th ANNUAL CONVENTION

Disloyalty To Middle West Is Charge Hurled At Colleagues By Congressman Brand In Speech Before Crowd Of 1700

Scores Opponents of Surplus Control Measure and Predicts Issue Will Become Political Football Unless Solved By Present Congress.

CONGRESSMAN Charles Brand of Ohio brought his heavy artillery and ammunition into play against opponents of surplus control legislation before 1,700 delegates and visitors at the Friday luncheon during the I. A. A. convention at Peoria last week.

Before finishing his interesting two-hour address to the greatest crowd ever assembled at an I. A. A. meeting, he poured volley after volley into his fellow congressmen from Chicago, St. Louis, Kansas City, Minneapolis, St. Paul, and Milwaukee who voted against the McNary Haugen measure.

"These men are traitors to the great Middle West which they are supposed to represent," he said. "If they had voted for agriculture, the industry that supports these cities, we would have had the needed majority to pass this legislation in the last congress."

Traylor and Jardine Scored

Melvin Traylor, president of the American Bankers Association and Secretary Jardine likewise came in for a round of condemnation for their opposition to the surplus control plan.

"The bankers have their McNary Haugen bill in the Federal Reserve Act, the railroads have theirs in the Transportation Act, and labor has the Immigration Act," said Mr. Brand. He commended labor, however, for its friendliness to the farmers' cause, and John Walker, president of the State Federation of Labor, and an interested listener, smilingly acknowledged the recognition.

"The analogy between the Federal Reserve Act and the McNary Haugen plan is perfect," said the speaker. "That Act stabilized credit in this country." Then he compared the two point by point and showed how the member banks pay 10 per cent of their deposits and six per cent of their capital into the Federal Reserve Bank.

"It is unbecoming of bankers to oppose this legislation for farmers when the government did so much for them," said the congressman. "Mr. Traylor may be one of the money changers in the temple."

Farmers Lost 20 Billion.

After showing how agriculture had lost 20 billions of dollars between 1920 and 1925, the speaker started an explanation of the surplus control plan showing how it might be used to stabilize prices of such crops as cotton, wheat, corn, and livestock.

"The fear expressed by some opponents that the price of food would be raised is groundless," said the speaker. Then to prove his point he showed how bread had remained at eight cents per pound for the past eight years while wheat varied from 80 cents to $1.85 per bushel. "Cotton goods haven't changed in price since the price of cotton went so low," he continued. "The only difference is that the cotton planters of the South get less while the manufacturers and spinners get more."

Before concluding his address the congressman predicted that if the surplus control plan is not adopted by the present Congress it would be thrown into politics.

"If that happens don't vote for anyone who isn't your friend," was the concluding word and directly following it the vast audience arose and cheered the speaker for fully five minutes. It was the greatest exhibition of enthusiasm and unanimity of sentiment ever expressed at a farm gathering in Illinois.

Flays Opponents

Congressman Charles Brand

Cooperatives Assn. to Indianapolis in 1927

Definite plans to open a branch office at Indianapolis in the coming year were laid at the annual meeting of the Illinois Agricultural Cooperatives Association held at Peoria on Wednesday, Jan. 26.

Sixty-two counties were represented in the meeting which was the largest held in the short history of the Association. Among the organizations represented were 24 county farm bureaus, 15 farmers' elevators, five shipping associations, six insurance companies, four farm supply companies, three dairy organizations, one livestock terminal commission association, and three seed and cotton cooperatives.

300 Members Goal.

The goal for the coming year is 300 active member associations as announced by George R. Wicker, manager. Eighty-four more members are required to reach this number.

(Continued on col. 5, page 4.)

Our Sam Asks For Continued Support To Relief Program

More Than 1,200 Attend Banquet On Thursday Night In Shrine Temple Building.

THE attitude which society takes toward agriculture depends upon farmers themselves. If we have the proper respect for ourselves and our calling, with faith enough to stand together through trials and adversity, we will write a story that will be the pride of our children and those to come after them. We cannot fail if we do this.

Sam H. Thompson

This is the sage advice Sam H. Thompson, president of the American Farm Bureau Federation, and the pride of the Illinois Agricultural Association, handed out to his fellow citizens and friends at the annual banquet in Peoria on Thursday, Jan. 27.

Talks Plainly.

Our Sam was talking to his home folks and he talked plainly. The home folks responded with a powerful ovation that threatened to raise the roof off the Shrine Temple building.

After admonishing the great audience of delegates and visitors, many of whom he had worked side by side with in building the I. A. A. about the necessity for maintaining a strong organization and a united front, Mr. Thompson launched into a discussion of the economic situation of agriculture and the need for enabling legislation so the farmer may help himself out.

"Lack of stabilization is the trouble with our business," said the speaker, "and lack of bargaining power on the part of farmers is the root of all the evil."

Answers Criticism.

Answering the criticism of "price-fixing" and "economically unsound" both of which have been used in describing the surplus control legislation asked by farmers, Mr. Thompson stated that if this were true, the same might be said for the whole protective system as applied to other groups.

The last six years, the speaker pointed out, have seen the steady transfer of wealth from the farm to the city because the farmer had no way of securing for himself a fair price for his product. Farmers have lost while others have gained.

James Goddard of the Foreman National Bank, Chicago led the community singing and later sang negro melodies which drew tremendous applause. R. Bradley, "the talkative tailor" from Peoria was the humorist of the evening.

Congressman Brand's complete speech as well as copies of "A Short Story of the I. A. A. and Report for 1926" may be had by writing the Department of Information, Illinois Agricultural Association, 608 So. Dearborn St., Chicago. They will be sent free as long as they last.

Earl C. Smith Unopposed for President Is Elected by Unanimous Vote. Frank Barton Wins Over W. C. McQueen for Vice-President. Four New Men on Executive Committee

Congressman Charles Brand of Ohio Gets Glad Hand and Vociferous Applause From 1700 Delegates and Visitors at Friday Luncheon in Shrine Temple As He Flays Opponents of Farm Measure.

THE greatest annual convention in the eleven years' history of the Illinois Agricultural Association is over. It was greatest in attendance, in spirit, in enthusiasm, and in the impression made upon those who saw this mighty exhibition of the strength and loyalty of the organized farmers of Illinois.

Peoria, the metropolis of downstate Illinois, was taxed to care for the crowd that exceeded all expectations. One thousand was the number predicted, but more than 2,000 delegates, visitors, and their wives came from the 93 organized counties of the state to participate in the three-day program.

Twenty newspaper, farm paper and press correspondents from Chicago, Washington, D. C., Indiana, and the downstate cities of Illinois who attended the convention broadcast its proceedings into every state in the Union. It was a representative gathering.

Many Guests Present.

Mr. and Mrs. J. A. Miller drove to the meeting from Denver, Colorado.

John Walker, the vigorous president of the Illinois State Federation of Labor, Wm. H. Malone, chairman of the Illinois Tax Commission, Mrs. H. C. Rodenhouser of the Illinois Federation of Women's Clubs, Mrs. Arthur Smith of the Illinois League of Women Voters, R. C. Moore, secretary of the Illinois State Teachers' Association, H. E. Young, secretary of the Illinois Farmers' Institute, E. A. Eckert, of the Illinois State Grange, and Justice of the supreme court of Illinois, Clyde E. Stone were all guests at the Friday luncheon. Telegrams from eight Illinois congressmen, who were unable to attend were read by President Earl Smith.

Herman Danforth, first president, Howard Leonard, and Sam H. Thompson, all past presidents of the I. A. A. were other prominent guests there to celebrate the twelfth birthday of the organization which they helped build.

Beginning Tuesday afternoon, a steady stream of delegates and visitors poured into the city on the banks of the Illinois, by train, trolley, bus, and auto until by Thursday all hotels were crowded to capacity. It was the first large convention held in the new Pere Marquette hotel, but five of Peoria's largest buildings were required to hold all the sessions of the meeting.

Smith Unopposed.

Rumors regarding opposition to President Smith for reelection which were heard about the lobby prior to the election never materialized. When Frank Barton arose to nominate Mr. Smith following the call for candidates by A. C. Everingham, President Smith's name was received with loud acclaim. A few minutes later the secretary was instructed by the voters to cast a unanimous ballot for the popular candidate.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the farm bureau was organized, namely to promote, protect and represent the business, economic, social and educational interests of the farmers of Illinois and the nation, and to develope agriculture.

Published once a month at 404 North Wesley Ave., Mount Morris, Illinois, by the Illinois Agricultural Association. Edited by Department of Information, E. G. Thiem, Director, 608 South Dearborn Street, Chicago, Illinois. Entered as second-class matter October 20, 1925, at the post office at Mount Morris Illinois, under the Act of March 3, 1879. Acceptance for mailing at special rate of postage provided for in Section 412, Act of February 28, 1925, authorized October 27, 1925. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record. Postmaster: In returning an uncalled for or missent copy, please indicate key number on address as is required by law.

Here Are the High Points in Resolutions Passed at Peoria

The visitors and delegates to the Twelfth Annual meeting of the Illinois Agricultural Association, held in Peoria, January 27 and 28, hereby express their hearty appreciation for the cordial welcome and uniform courtesy and cooperation extended to them by the Peoria County Farm Bureau, the Peoria Association of Commerce and all organizations and citizens of the city who have so efficiently contributed to the making of this Annual Meeting a success from every standpoint.

WE RECOMMEND that our efforts be redoubled to secure the enactment of a national policy for agriculture in the present session of the Congress designed to stabilize agriculture and to maintain an American standard for the American farmer. . . . We believe that such end can be best attained by providing for the adequate control of surplus agricultural products as provided in the bill now pending before Congress known as the McNary-Haugen bill. We further believe that such surplus control should provide for the stimulation and growth of commodity marketing organizations.

Waterways.

We favor the completion, at the earliest possible date, of the water route from the Great Lakes to the gulf, legislation for which has recently been enacted by the Congress of the United States. Due regard must be given to the property rights of land owners adjacent to the streams affected. We also favor the construction of the deep sea channel through the St. Lawrence River to the sea.

Oppose Domination.

We believe that the Federal Land Bank of St. Louis has rendered great service to the farmers of Illinois in lowering farm loan interest rates, expediting the closing of farm loans and eliminating useless red tape.

We deprecate instructions from the Federal Farm Loan Board, directed to appraisers, which are not in accordance with the established practices in Illinois and unnecessarily retard the closing of loans such as is embodied in Instructions to the Land Bank appraisers Numbers 4 and 5; all of which needlessly increases the cost to the farmer borrower and hampers the operation of the system.

We oppose legislation making the system a bureau of the Treasury Department, as contemplated by the provisions of the McFadden Banking Bill and urge that steps be taken to vest control of the system in the hands of its farmer owners.

Tuberculosis Eradication.

We believe that bovine tuberculosis is a menace to the health of our people and to the livestock industry of our State.

We, therefore, favor the adoption of a definite program for the removal of said menace at the earliest possible date to the end that our people may be protected, our livestock industry be preserved, and the market for milk and other dairy products be retained for the dairymen of Illinois. We recommend the appropriation of such funds as may be necessary to carry forward such program for the coming two years.

Black Stem Rust.

The prosecution of the campaign for the control of black stem rust of small grains through the eradication of the common barberry bush has resulted in the destruction of more than 370,000 common barberry bushes and thousands of seedlings.

The Illinois Agricultural Association recommends and urges that both the State and Federal Governments continue to cooperate and to support the barberry eradication campaign.

Favor Amendment.

The defeat of the proposed revenue amendment to the constitution, the soundness of which we hereby reaffirm, through lack of interest on the part of the voters, has demonstrated the extreme difficulty (amounting almost to impossibility) of amending the constitution under the present restrictions.

We, therefore, favor such changes in the amending clause as will permit the ratification of an amendment by an affirmative vote of two-thirds of those voting on the proposal when such two-thirds is less than a majority of all votes cast in the election.

Reapportionment.

We recognize that a great obstacle in the way of constructive legislation arises out of the fear of domination shared by both urban and rural populations of our state. This condition has arisen out of population developments not contemplated by our present constitution. We favor such solution of our problem of representation as will secure the fairest possible representation of all our people, but which will prevent the control of our legislative machinery by any geographical or political subdivision of our state. We recommend that our executve committee address itself to such solution of said problem and offer our cooperation to other organized groups in the state which seek to advance our general welfare.

Tax Revision.

In order to distribute the burden of taxation as equitably as possible, under present constitutional limitations, we ask for:

1. The enforcement of the revenue laws, as interpreted by the courts, requiring the assessment of all property at the same percentage of its fair cash value. We believe that the quadrennial revaluation of real estate in 1927 offers a favorable opportunity for the cooperation of supervisors of assessments, assessors, boards of review, and owners of different classes of property in securing substantial equality in assessments.
2. Such changes in the method of distributing the State School Fund as will insure its benefits to districts in proportion to their need for it.
3. Legislation permitting small tax payers to recover taxes illegally levied, objections to which are now profitable only to large taxpayers.
4. Such legislation and administration of law as is possible under existing constitutional limitations which will more equitably distribute the burden of taxation over the wealth and among the people of the state and secure participation in the cost of government from persons and property now contributing nothing or contributing inadequately for this purpose.

Hard Roads.

The people of Illinois by their vote on the $100,000,000 road bond issue in 1924 issued a mandate for the construction of the system of hard roads over the state as set forth in the law on which said vote was taken. Those roads cannot be completed within a reasonable time with the funds now available for that purpose.

We further recognize that many citizens of our state have no satisfactory connection with this system of roads, although they are paying their quota of the cost.

We, therefore, favor a law levying a tax on all gasoline used by highway motor vehicles, the revenue derived therefrom to be used to insure the completion of the bond issue system in a reasonable time, and all revenue not essential for that purpose to be applied to the improvement and maintenance of the state aid roads.

Provided, further, that all funds available for state aid roads be expended in a fair and equitable manner as between counties.

Poultry Stealing.

Wide spread stealing of poultry constitutes a real menace to the poultry industry of the state.

We, therefore, favor the passage of a law requiring dealers in poultry and poultry products to keep such records of their purchases as will assist in the apprehension of chicken thieves.

Corn Borer.

We recognize the menace to our grain farming and our general economic welfare in the approach of the European corn borer. We urge close cooperation with the Federal Government and with other states in measures looking to the eradication or control of such pest. We believe that this is a matter of national concern, and where farmers or other citizens are forced to assume special costs in compliance with state or federal regulations that they should be compensated for such additional burden.

We, therefore, urge the appropriation of such money as may be necessary to carry out any program that may be adopted looking toward such control.

Thank You, Gentlemen.

We commend the action of such of our congressmen and senators as have given their active support to agricultural legislation as supported by this association.

Also desire to express to the members of the General Assembly of the State of Illinois our hearty appreciation for their recent action in adopting a resolution memoralizing Congress for speedy consideration and prompt enactment of legislation looking to the stabilization of farm prices.

Tax Commission.

We commend the Illinois State Commission for its orders for reassessment in four counties, issued after careful consideration of the evidence submitted by the County Farm Bureaus and the Illinois Agricultural Association, and the establishment of the justice of our claims.

We urge the prompt compliance with these orders. We pledge to the Tax Commission our hearty support to the end that equitable assessment of property contemplated by these orders may be promptly secured.

We desire to express our appreciation to the various organized groups that have cooperated with us in an effort to find a more equitable distribution of the tax burden through the proposed amendment to the revenue section of our Constitution defeated in the recent election.

We recommend the continuance of the spirit of harmony and cooperation thus expressed relative to matters which may arise of concern to all our people.

Better Legislative Service.

We believe that all legislation enacted, directly or indirectly, affects the agricultural interests of our state and nation.

We, therefore, urge that steps be taken to provide a more definite study of all proposed legislation relative to its effect upon agriculture. Our members should be continually advised as to such laws and as to the stand taken by members of the General Assembly on legislation affecting their interests.

We further recommend increased effort to bring to the attention of other organized groups reliable information concerning farm problems. . . . . .

Help Producers.

We commend all efforts that have been put forth to secure a closer relationship and full understanding between this Association and other farm groups, especially those cooperatives for whose development we have a responsibility.

We urge a continuation of these efforts to the end that such cooperatives may become more potent factors in their respective fields, that farmers may enjoy the benefits to be derived therefrom at the earliest possible time.

We also urge the Illinois Agricultural Association and County Farm Bureaus to use every effort to increase the volume of livestock shipments to the various Producers' Livestock Agencies in and contiguous to Illinois territory.

Grain Marketing.

It is the sentiment of this meeting that improvements in our Grain Marketing structure in the State of Illinois and elsewhere are essential to the better marketing of grain. The legislation now proposed before Congress would require the use of Cooperative Marketing Agencies to function to the highest advantage to the grain farmer.

It is recommended:

That the Illinois Agricultural Association and Farm Bureaus cooperate with others interested in fostering and further developing and strengthening the farmers' cooperative elevator movement.

That the Illinois Agricultural Association and Farm Bureaus continue to cooperate with the Central States Soft Wheat Growers' Association.

That the Illinois Agricultural Association undertake a study of elevator warehouse facilities at terminal markets and elsewhere, and of storage and conditioning services now available—inviting farm organizations and others interested to join in such effort.

That the Illinois Agricultural Association undertake to form grower cooperatives at such time as may be needed to carry out and give full force and effect to surplus control legislation now contemplated.

Maintaining Membership.

The most effective farm bureau organization is attained when a large majority of the members understand its program and policies. The neighbor-sign-neighbor system of acquiring and maintaining membership contributes freely to acquainting a large number of men with the aims, policies and programs of the association.

We therefore recommend that in order that the greatest good may result from this type of membership campaign that the county farm bureau be urged to appoint regular membership committees to function throughout the membership period. . . . . .

Auto Insurance.

We commend to the farm bureau members in Illinois the automobile insurance offering of the Illinois Agricultural Association and urge the county farm bureaus to continue their active support of the insurance company in its charter membership campaign. . . . . .

Flood Relief.

We recognize that many of our farmers have suffered irreparable loss due to the unprecedented flooding of the lowlands.

We urge, therefore, such assistance as can reasonably be given by the General Assembly to assist those farmers in recovering from their misfortunes.

Radio.

Recognizing the outstanding value of the radio in presenting the cause of Agriculture to the American Public and the necessity of having available a broadcasting station owned and controlled by Agriculture, it is recommended that the Illinois Agricultural Association take immediate steps to consider the possibility of establishing such a station. In view of pending Federal Legislation, which will restrict the licensing of existing stations and the establishment of additional stations, immediate action in this connection is particularly opportune.

Protection.

Realizing that farmers often suffer loss in the marketing of their products through unscrupulous and irresponsible dealers, we favor such steps as may be necessary to protect them from such loss.

Mutual Insurance.

The Farmers Mutual Reinsurance Company was organized to supplement the activities of the local mutual fire insurance companies and not to compete with them in any way.

We recommend that the farmers' mutual fire insurance companies avail themselves of the services of the Farmers Mutual Reinsurance Company and inasmuch as the Farmers Mutual Reinsurance Company was organized through the cooperation of the local farm fire mutuals, the Farm Bureaus and the Illinois Agricultural Association, we encourage the continued cooperation of these organizations to the end that the farmers of the State of Illinois may secure their insurance at the cheapest possible cost.

What The Counties Are Doing

MORGAN COUNTY ANNUAL MEETING BIG EVENT

Five hundred and thirty men and women turned out for the annual meeting of the Morgan County Farm Bureau. Guy Bender, champion hog caller at the State Fair, called the men to dinner. Earl Smith, President of the Illinois Agricultural Association, spoke on the workings of the National and State Farm Bureau Organizations.

LIVINGSTON COUNTY TO HOLD WINTER MEETINGS

A schedule of winter meetings lasting half way through February began on Dec. 27, in Livingston county. The farm bureau recently bought ten cars of potatoes for members. An estimated saving of 75 cents a bag was made. The potato deal showed a profit of $16.20. Seed corn will be tested for members as in former years.

GREENE COUNTY HOLDS CATTLE FEEDERS' BANQUET

"Meat for our Second Annual Cattle Feeders' banquet was furnished by the champion calf of the Greene County calf club," writes R. J. Laible, farm adviser. Adviser J. H. Checkley of Logan County led the singing, and Professor R. R. Snapp, University of Illinois, delivered the speech of the evening on cattle feeding.

WABASH COUNTY ANNOUNCES MEETINGS

The annual meeting on Dec. 16, which was addressed by Earl C. Smith, president of the Illinois Agricultural Association, and J. C. Spitler, University of Illinois, the Wabash County Poultry Show, held on Dec. 20-23; and two schools, one for farm accounts, and the other for dairy feeding, were recent events announced by the Wabash County Farm Bureau.

WARREN AND HENDERSON TO ORGANIZE OIL CO.

Warren and Henderson Counties are looking forward toward forming a new oil company for their members. Preferred stock will be $25 per share to bear seven per cent interest. Common stock of no par value will be issued to farm bureau members only. Members only will participate in accrued profits.

BROWN COUNTY BOYS WINS AT PRODUCERS' CALF SHOW

Raymond Mobley of Mt. Sterling, won first honors in the Angus class at the recent Producers' Calf Club Show at St. Louis. Judges debated for an hour to decide whether the calf should be champion or reserve champion. The calf weighed 1135 pounds and sold for 30 cents a pound.

PULASKI REPORTS SUCCESSFUL HORTICULTURAL SCHOOL

One hundred farmers and 100 students attended the horticultural extension schools at Villa Ridge and Grand Chain. The east side of Pulaski County, which borders the Ohio River, promises to develop in fruitgrowing.

HENRY COUNTY SHIPPING ASS'NS. INCREASE BUSINESS

Nine livestock shipping associations handled 1474 cars of stock worth more than $3,000,000 last year. This is an increase over 1925. Sixty-five farm bureau members completed farm account books this year compared with 45 in 1925. Ninety members started keeping accounts for 1927. Frank Barton, A. C. Everingham and D. S. Swanson spoke at the combined annual meeting of the nine livestock shipping associations.

SANGAMON HOLDS FOURTH ANNUAL HOG-DAY

Mrs. John Shutt of Chatham won the hog calling contest in which 57 contestants completed at the recent Hog-Day banquet. Prizes were awarded to the owners of the nine successful ton litters of the county. Dr. H. B. Raffensperger of the U. S. Dept. of Agriculture discussed swine production problems as related to sanitation.

MACOUPIN BROODER HOUSE DEMONSTRATION

The brooder house building demonstration held at Herbert Malsbury's in North Otter Township, was well attended according to farm adviser Earl Rusk. Prof. Hanson of the University of Illinois directed the brooder house construction with the assistance of the assistant adviser, L. G. Neel. A picnic dinner arranged by the ladies helped bring out a crowd.

DUPAGE COUNTY SIGN-UP CAMPAIGN STILL IN PROGRESS

The membership sign-up in Du Page County totals 408 to date according to farm adviser Corncross. Naperville Township is in the lead with 108 members. The campaign is still progressing with M. E. Lyons as a solicitor. Lisle township has 72, Milton 68, and Bloomingdale 51. Five townships are yet to be solicited.

MADISON REPORTS INTEREST IN FARM ACCOUNTS

At the farm account school held on December 20, six new men started keeping account books, several others applied for books since that time, and five co-operators came in to close their accounts. Business methods among our members are improving each year. We operate according to budget and each month the Executive Committee gets a statement of money spent under each appropriation. The monthly bank balance also is reported.

MONROE'S MAJOR PROJECT SOIL TESTING

Due to the good work of Alfred Tate, now adviser in Scott County, many farmers here have completely limed, and all but a few have used some limestone, according to farm adviser Hughes. Soil testing is conducted to guide farmers in the more intelligent use of limestone.

90 PER CENT OF MEMBERS GET SERVICE IN McDONOUGH

An analysis made by the McDonough County Farm Bureau showed that 90 per cent of the members received some form of direct service. Eight per cent called at the office. Thirty-two per cent were given service at their farms. Forty-three and five-tenths per cent attended demonstrations.

EDWARDS FIRST TO OWN HOME

A record crowd came out for the last annual meeting in Edwards County. The report made by ex-farm adviser H. C. Gilherson showed that Edwards had made the greatest increase in membership and was the first farm bureau in Southern Illinois to own its own home. Albert Libkie was elected president. Harold U. Myers is the new adviser.

MONROE COUNTY ACTIVE IN COMMUNITY MEETINGS

Farm Adviser Hughes conducted meetings in ten organized communities recently. A plan is being outlined to give every member a place in one or more activities, which include organization, legislation, soils, crops, livestock, club work, and marketing.

Logan County Champions

J. H. Checkley, farm adviser left, is examining the prize sample of corn with which Edwin Rentschler right, won the Junior Championship at the recent State Utility Corn Show at Urbana. In addition to having the Jr. Corn King, Logan county boys and girls carried off two-thirds of the prizes in the Junior Corn Show.

15 Farm Bureau Members Honored As Master Farmers in 1926 Contest

Following are Short Sketches of Men Awarded Gold Medals by Prairie Farmer—Continued from Last Month

Carl Sargeant of Schuyler County is 39 years of age, married, and has three children, one girl and two boys. He farms 200 acres, has used limestone, keeps his buildings and improvements in excellent condition, has a modern home, and derives his chief income from hogs which are raised by the sanitation system. He is a member of the Farm Bureau, local Farmers' Elevator and has served on the board of directors.

Albert Hayes, Chillicothe, is a member of the Executive Committee of the Peoria County Farm Bureau. Mr. Hayes lives in Medina Township, has three children and operates a livestock farm.

He is active in the local Parent-Teachers' Association, also in forwarding the Farm Bureau work in his neighborhood and township.

Rebhan is Active.

Wm. C. Rebhan is vice-president of the Montgomery County Farm Bureau, president of the Raymond Farmers' Elevator, and treasurer of the Farmers' Oil Company (a county oil company owned by farm bureau members.) Mr. Rebhan is also Township Director of the Montgomery County Mutual Fire Insurance Co., and is County Supervisor from Raymond Township besides holding many other offices.

Charles B. Meis of Saunemin, Livingston County, Illinois, has lived on this present farm more than twenty years. Mies attributes no small part of his success to the loyal cooperation of his wife. He is interested in all activities for the benefit of his community, is a director on the Township High School board, a director in the local farmers' elevator, in the telephone company, and has been an active member and supporter of the Farm Bureau since it was organized in 1912.

Meis is at present a director in the Livingston County Farm Bureau.

A Northwestern Man.

W. G. McCormick of Douglas County, was very active in the organization of Douglas County Farm Bureau in 1920. He was vice-president during its first three years and has always been a farm bureau leader in his township. He was Secretary of the Farmers' Elevator for a number of years, and now is very active in church and Sunday-school work in the rural church of his community. Mr. McCormick is about 40 years of age and has a wife and two children. He secured his education at Northwestern University.

Martin Linn, of Fulton County, is 50 years old, and has a family of four girls and two boys. The oldest son is in partnership with him on The Duck Island Farm. Mr. Linn is an active church worker, a member of the School Board, and a Farm Bureau member since its organization in Fulton County.

Harris An Officer.

George T. Harris is vice-president of the Rock Island County Farm Bureau and has aided the organization ever since it was started. He is the Farm Bureau Director in his township and is always ready to assist in putting across any project which the Farm Bureau has on its program.

In addition he is president of the Taylor Ridge Livestock Shipping Association, president of a farmers' electric light company, and a director in the Hamlet Mutual Fire Insurance Company. Mr. Harris is an active member of Edgington Presbyterian Church and belongs to the Masonic lodge. Harris is a college graduate and has given both of his girls an opportunity to do college work. His wife is prominent in Home Bureau work.

Watson An Organizer.

When Clarence Watson of McDonough County was shucking corn on a certain November day in 1917 two men walked up on him and started shucking along with him. One was his neighbor and one was M. J. Wright from McHenry County. These two men had been talking about organizing a Farm Bureau in McDonough County and asked Clarence if he would like to help. The idea appealed to him and he went to the house and unhitched and went with Mr. Wright to see some of the men in the county whom he thought might be interested in the building of a real farmers' organization in McDonough County.

Watson probably signed more farm bureau members in the last campaign than any man in the county and has always been loyal in the program of the organization.

250 Women Assert Their Interest In Many Farm Problems

First Home and Community Conference at I. A. A. Meeting Exceeds All Expectations in Attendance and Interest.

The two hundred and fifty farm women who exchanged ideas in the Home and Community Conference held in the Pere Marquette hotel Thursday afternoon, Jan. 27, initiated a movement which promises to be an important feature at coming conventions of the I. A. A.

The growing economic independence of farm women along with problems pertaining to rural health, the one-room school, development of through beautification of the farm, 4H clubs, and the enrichment of life and organized play were discussed informally.

Mrs. Spencer Ewing, President of the Illinois Home Bureau Federation presided.

Mrs. Charles Sewell Speaks.

Mrs. Charles Sewell, in charge of home and community work for the American Farm Bureau Federation spoke of the change in status of all women and farm women in particular during the past few years.

A woman from Macon County told of the Thrift Exchange organized by the Home Bureau in Decatur three years ago. The women have a booth in the Farm Bureau office where they bring their products on Saturday morning. Ten per cent of the money taken in goes to the county organization and 90 to the women. One woman is educating a Mexican boy on what she makes in this way.

Sold $1100 Worth of Food.

One woman sold $1100 worth of cheese, whole wheat bread, plum puddings, coffee cakes, potato salad, baked beans, scrapple, and chickens on the Bloomington farmers' market. The Lasalle County Thrift Exchange operates every day under a paid manager. It was started four years ago. The receipts are never less than $200 a week and usually amount to $300 or more.

Mrs. Ewing recommended that the conference give its hearty support to the bill authorizing supervisors to appropriate money for establishing county health departments. This bill is to come up in the Legislature in the near future. Mr. Richards, who is on the State Board of Health, gave statistics showing that contagious disease is much more prevalent and that infant mortality is three points higher in rural than in urban districts.

One-Room School Discussed.

Mr. Hoffman, a rural school supervisor, spoke of the one room school as the nursery of the educational system.

C. E. Gates, State leader in boys club work, said there were 800 local clubs in the state with a total membership of 11,900 boys and girls.

Dr. Hieronymous, of the University of Illinois, stressed the need for beautifying the farm home through plantings, paint, and convenient arrangement of buildings. One woman declared that she had painted everything on the place but the livestock and that the improvement was marked. Eugene Lies of the Recreation and Playground Association told the value of carefully planned play in raising a happy family.

Married Women Employed.

Sam Thompson, president of the American Farm Bureau Federation, stressed the necessity of better living conditions. He deplored the fact that 44 per cent of all women now employed are married. He believes that many other problems will be automatically solved when a better home life can be brought about.

The women present were agreed in their wish that another conference be held next year in connection with the annual meeting of the Illinois Agricultural Association.

Nearly 2000 Attend Five Conferences on Thursday

The largest and most representative gatherings for informal discussion of farmers' problems ever held in the state described the five conferences held Thursday afternoon. Between 250 and 500 men and women attended each of the sessions held on problems pertaining to organization and information, public relations, marketing, home and community, and financial business service.

The ball room of the Pere Marquette hotel was nearly filled with delegates and members who had come to talk over the problems pertaining to the organization and maintenance of their association. In each case members of the Executive Committee of the I. A. A. presided.

The discussion in the organization and publicity conference indicated that the morale of the thinking farmer in Illinois was never stronger for organization. Several counties reported success in developing the life membership plan of solicitation.

The discussion on the gas tax in the public relations conference revealed that sentiment is strong for development of the secondary road system. Thousands of farmers have been left marooned on mud roads through certain seasons and so get little benefit from the hard road system.

Prospects Good for Surplus Control Bill

Eight Illinois congressmen and friends of the Illinois Agricultural Association wired their regrets at being unable to attend the Peoria convention. President Earl C. Smith who presided at the Friday luncheon read the following telegram among others:

"I regret that conditions here are such that I cannot attend," telegraphed Congressman Tom S. Williams from the 24th district. "Prospects for the passage through the House of real farm relief legislation are brighter now than ever before. The apropriation bills will all, be out of the way early next week, and the Haugen bill will be given immediate consideration under a special rule. We have made substantial gains since the vote last spring and are confidently expecting victory. The I. A. A. and other farm organizations of the corn belt have made a good fight. I congratulate you and wish for you a most successful meeting."

Similar telegrams were received from Congressmen Chas. Adkins, Wm. E. Hull, Henry T. Rainey, Ed. M. Irvine, Wm. W. Arnold, and Henry R. Rathbone. Max Murdock, secretary of the Illinois Association of Real Estate Boards wired his regrets at being unable to attend.

Kane County Board of Review Meets Feb. 1

A special meeting of the Kane County Board of Review was held on Tuesday, Feb. 1, at Geneva to review and equalize assessments in accordance with the recent order of the Illinois Tax Commission, which followed appeals from the Kane County Farm Bureau and the Illinois Agricultural Association.

A reduction of 10 per cent in valuations in the 10 townships of the west two-thirds of the county was agreed upon. This reduction will amount to over $730,000 in assessed valuations, or a saving of $28,000 on taxes of farmers in this area.

M. G. Lambert, president, W. B. Curtis, vice-president, A. H. Graham, secretary and E. O. Reaugh, treasurer, are the officers of the Hancock County Farm Bureau for the coming year. The Executive Committee is composed of 21 men. One is chosen from each township.

Puts Naperville Over

When Mike Lyons above heard that Ontario township in Knox county had 103 farm bureau members, which was three more than the records showed for Naperville township in Dupage county, he went right out and put Naperville up to 107 members. Mr. Lyons is with the organization department of the I. A. A., now aiding in renewing memberships in Dupage county.

Earl Smith Re-elected

(Continued from page 1, col. 5.)

contested for with Frank Barton of Livingston county, and W. C. McQueen of Kane county the nominees. The latter's unanimous support from the dairy districts was not great enough to overcome Mr. Barton's lead downstate, so Barton was elected by a substantial majority. The unofficial count showed 154 for Barton and 32 for McQueen.

Four new executive committeemen were elected at the district caucuses held Thursday afternoon.

The following committeemen subject to reelection were returned for a new two-year period:—C. E. Bamborough, 13th district, J. L. Whisnand, 19th district, Samuel Sorrells, 21st district, W. L. Cope, 23rd district.

The new men elected are as follows: H. C. Vial, 11th district, A. H. Skinner, 15th district, Geo. J. Stoll, 17th district, and Fred Diets, 25th district.

Brand Is Popular.

Congressman Charles Brand, who delivered the principal address at the Friday luncheon where Senator Charles L. McNary had been scheduled to speak, was loudly acclaimed. His presentation of the farmers' fight for farm relief, and the operation of the McNary Haugen plan was clear and forceful. His humorous and informal style, coupled with his deliberateness in explaining every point by maps and illustrations, won the hearts of his 1700 listeners.

John A. Gage, president, W. H. Norfleet, vice-president, W. E. Page, sec'y., and Onis McPherson, treas., are the officers of the Jefferson County Farm Bureau for the coming year. Directors chosen were E. A. Walker, W. L. Wimberly, J. L. Porter, Xavier Kiefer and Stanley W. Norris.

Mutual Reinsurance Co. To Meet At Springfield On Thursday, Feb. 10

Following the two-day session of the Illinois Association of Mutual Fire and Windstorm Insurance Companies, on Feb. 9 and 10 at Springfield, the Farmers' Mutual Reinsurance Company will hold a session in the Springfield Y. M. C. A. on Thursday afternoon to discuss its problems and future program.

The Farmers' Mutual Reinsurance Company has had a steady growth since its formation a year ago and plans are underway to develop a larger program of service in the coming year.

Vernon Vaniman and J. H. Kelker will represent the Illinois Agricultural Association at the meeting.

Baseball League Chooses Cline President, Thiem Arbitrator

George R. Cline of Cass county was reelected president of the Illinois Farm Bureau Baseball League at its annual meeting in Peoria on Wednesday, Jan. 26. W. G. Griffith of Marshall county was chosen vice-president, and E. G. Thiem, who automatically resumes the position of secretary-treasurer, was elected to act as dictator or arbitrator in settling disputes and arguments requiring prompt action.

Between 50 and 75 farm advisers, baseball captains, and members of the 14 county teams in the League attended the meeting.

The Constitution was revised to clear up questions about eligibility of players. The majority sentiment was strong for limiting players to farm bureau members and their sons whose residence and occupation is on the farm.

Several new districts expect to come into the League this year which promises to bring its strength up to 20 to 25 teams. Membership dues for teams are $5 per year, after the initiation fee of $5 is paid.

Piatt County Latest Claimant to Title

Cerro Gordo township in Piatt county has the largest farm bureau membership in the state according to Farm Adviser S. S. Davis. The list shows 130 members.

A complete list of the membership from this township received by the department of information verifies Piatt County's claim to the title. Dupage, Knox, and Marshall-Putnam were other competitors for the honor.

Cerro Gordo township is the banner township of Piatt county and is one of the best agriculturally in the state.

7 Michigan Counties May Join Ohio Co-op

Seven counties of southeastern Michigan may set up local poultry marketing associations and pool their produce with that of the Ohio Poultry Producers Association according to a recent announcement of the Michigan State Farm Bureau.

At a meeting held at Jackson, on Dec. 10, a committee was appointed to develop a plan of organization which may lead directly to a connection with the Ohio co-op in the marketing of poultry and eggs.

I. A. A. Executive Committee Votes For "Bureau Farmer"

(Continued from col. 4, page 1.)

tion RECORD will be continued as before. Its date of publication, however, will be changed to the middle of the month so members will have news of their organization every two weeks.

The insistent demand from the membership for publication of the RECORD more often than once a month added to the need for more direct contact with the national organization led to the adoption of the new publication. The agreement signed by the I. A. A. will go into effect with the March issue.

The great saving effected by cooperating with the A. F. B. F. and other state farm bureaus in securing this direct contact with the membership was important in the decision of the Committee.

Amos Abe Says:

As I was tellin' Maw the other day, when she bawled me out for hangin' my hat on her broom handle, married life is like farm machinery. When it's right new it's pretty hard pullin' and takes a lot'a adjustin', when it gets well broke in it runs along purty smooth an' nice, but when it begins to get old it take lots'a watchin' to keep it from rattlin', squeakin' an' knockin'.

Standard of Living Is Measure of Farm Efficiency—Taylor

Declares Farmers Haven't Advanced in Living Conditions Commensurate with Efficiency

Dr. Carl C. Taylor

"The rural standard of living is a measure of agricultural efficiency," declared Dr. Carl C. Taylor, Dean of the Graduate School of North Carolina Agricultural College, before the Illinois Agricultural Association convention at Peoria last week.

"It constitutes the monuments which have been built to the success or failure of agriculture. Rural people, like all others, carry on their occupations in order to obtain the necessary and desirable things of life. The standard of living is the human yardstick and is measured in terms of: food, clothing, shelter, health, education, religion, recreation and social contacts. People have these satisfactions to the degree they can afford them.

Standard of Living Test.

"While American agriculture can be measured in various ways, such as acres, farms, by value of crops, rural population, farm population, and the kind of lives those who till the soil live, yet the standard of living of the people who farm is the best and ultimate test of agriculture," said Dr. Taylor.

"It tells whether the system of farming pays over long periods of time. It tells whether the present status of agriculture is satisfactory or not. And it is the thing by which to measure the success and status of the individual farmer."

"There have been great gains in agriculture but no commensurate gains in the rural standards of living," said the speaker.

American Farmers Efficient.

"American farmers are producing more per man and more per acre today than ever before. In 1850 they represented 67 per cent of all gainfully employed, but in 1920 only 29 per cent. Their gain in efficiency is seen by the fact that in 1830 it took three hours and three minutes of human labor to grow a bushel of wheat. But in 1894 the same production required only 10 minutes. Here are the figures on corn and seed cotton.

"In 1855 it took four hours and 34 minutes to grow a bushel of corn. In 1894 it took only 41 minutes. In 1841 it required 10 minutes to grow a pound of seed cotton. In 1895 only 7/10 minute to grow the same amount.

Need Higher Standards.

Dr. Taylor argued that the United States can't build an acceptable civilization unless rural standards are held up, since rural people are the producers of much of the primary wealth of the world.

The lack of cultural things in so many rural homes he attributes to inadequate income to buy them.

The standard of living is low because of lack of institutional and community facilities, he believes. The remedy lies in larger communities with adequate institutions—schools, churches, playgrounds, hospitals, according to Dr. Taylor. Ideas only of production or owning land or making money, rob institutions. The value of art and of community life must be emphasized. Absentee landlordism takes money out of community and sacrifices dynamic interest of owner resident.

Light and Power Problems To Have Attention in 1927

L. J. Quasey

Electric Light and power on the farm, a subject which is assuming greater importance each year, will have special attention from the Transportation Department of the Illinois Agricultural Association in the coming year.

Studies of power line costs, and relative rates for various uses to which electricity is put will be made with the idea of presenting intelligent information to the Illinois Commerce Commission that fixes rates when controversies arise affecting the interests of farm bureau members.

"Light and power on the farm is a leading issue before the Illinois Commerce Commission at the present time," declared L. J. Quasey, who has represented farmers in the past five years in disputes before the Commission. "There is a tremendous lot of work to be done in this direction, since more farmers each year are taking advantage of electricity for power and light uses.

"It will be the department's aim to see that the farmer secures this service at a reasonable rate," he said. "Members having problems of this character are invited to write us for aid. The Illinois Agricultural Association believes in light and power from electricity for farmers and the sooner this service can be made available to all the better. But the Association will be on guard to protect its members against any possible exhorbitant charges or arbitrary routing of power lines that work a hardship against them."

Cooperatives Assn. to Indianapolis in 1927

(Continued from col. 2, page 1.)

"When we have 300 members, we will have the largest cooperative organization in the world," he said.

Great interest was expressed by the members in comparative figures which help them check their own businesses with others. The membership favors the continuation of this service.

New contracts providing for a three-year membership and continuous thereafter unless cancelled will be sent out in the near future.

Directors nominated for two years were H. J. Shaffer, Illiopolis, A. J. Gilfillan, Watseka, and L. P. McMillen, Rock Falls. George Potter, vice-president, presided in the absence of President McMillen.

Serum Association Elects New Officers

O. B. Goble of Charleston was reelected president of the Illinois Farm Bureau Serum Association at its annual meeting in the Jefferson Hotel, Peoria, Wednesday, Jan. 26.

Sam Sorrells of Raymond was elected vice-president, and W. E. Hedgcock again will serve as secretary-treasurer in the coming year. Directors chosen for 1927 were R. A. Norrish, Whiteside county, Adam McWilliam, Stark county, James Gilespie, Lawrence county, and J. H. Lloyd, Hancock county.

Dr. T. P. White of the bureau of animal industry, Washington, D. C. who delivered the principal address stated that vaccination is the only solution to the hog cholera problem. He recommended that farmers vaccinate every year against the disease.

Twelve states showed a membership gain on the books of the A. F. B. F. The honor roll states are Alabama, Arizona, Illinois, Indiana, Kansas, Louisiana, Nevada, New York, Tennessee, Utah, Virginia and Washington.

ILLINOIS AGRICULTURAL ASSOC RECORD

Volume 5 | Issued Every Month for 63,000 *Thinking* Farmers—March, 1927 | No. 3

"THE ISSUE WILL NOT DOWN," IS WEST'S REPLY TO COOLIDGE VETO

AUTO INSURANCE GOES INTO FORCE APRIL 1

J. P. Gibson, Jr. Employed To Direct Affairs Of Company

Goal In Sight As Counties Put In Last Licks For Quotas

ALL auto insurance policies in the Illinois Agricultural Mutual Insurance Company will go into force April 1 when the new mutual is officially launched.

This decision by the directors followed insistent demands from over the state that the company start functioning at an early date. With the announcement came the prediction by Vernon Vaniman, promotional manager, that between 3500 and 5000 policies would be in by April 1 so as to insure the successful inauguration of the new service to members of the I. A. A.

New Man Employed

J. P. Gibson, Jr., of the Security Mutual Casualty Co., Chicago, who has been identified with various insurance organizations since his graduation from Beloit College in 1917, was employed at the last directors' meeting to take charge of the office work connected with the new mutual. V. Vaniman will continue as field director.

J. P. Gibson, Jr.

Mr. Gibson was born in 1896 and reared in Wisconsin. At Beloit College he made Phi Beta Kappa and secured his B. A. degree just prior to enlisting in the Navy from which he was released as Ensign in March, 1919. Then followed two years' service with the Federal Mutual Liability Insurance Co. of Boston, Mass., a similar period with a Rockford, Illinois, real estate firm as insurance agent, during which he passed the Casualty Actuarial examinations, and since 1923 Gibson has been identified with the Security Mutual Co., as actuary and in charge of the reinsurance department. He married the daughter of Circuit Judge A. E. Fisher of Rockford, in 1925.

Winnebago in Lead

Winnebago county was still in the lead with the most policies signed at time of going to press. With more than 240 applications signed this county had 146 per cent of her quota. Quota equals 20 per cent of the farm bureau members in the county. La Salle county members turned in 154 applications on Feb. 28, which equals 78 per cent of her quota.

The plan of writing a "no value policy" and paying the actual value of the car at the time of the loss by fire or theft is meeting with general approval, according to Vaniman.

"The county farm bureaus are now beginning to feel that building a strong company is a matter of loyalty," he says. "It is a question of each farm bureau doing its part to make the new mutual a success."

Wisdom of I. A. A. In Opposing Grain Co. Upheld In Decision

Armour Grain Co. Charged With Falsifying Records and Changing Grain Samples

MORE light was shed on the $26,000,000 lemon known as the Grain Marketing Co., offered farmers by the large terminal warehouse operators two years ago, by the recent finding of E. E. Brown, arbitrator that the Armour Grain Co. had fraudulently changed records and grain samples in an attempt to swindle the company out of approximately $3,000,000.

This finding coming soon after the charge and investigation involving the Armour Co. for the alleged dumping of screenings into rye has shaken the Board of Trade and the entire grain business to its very foundations.

Condemned It

At the time Grain Marketing Co. stock was offered farmers and farmer elevators of Illinois by John Coverdale, Gray Silver and others, the Illinois Agricultural Association investigated the company and advised its members against investing money in the doubtful venture. Sam Thompson, then president of the I. A. A. and a director in the American Farm Bureau Federation stood out against the federation's endorsement of the proposal. As a result of the combined opposition of the I. A. A. and Prairie Farmer in Illinois, and the Indiana Farm Bureau in Indiana, the stock sale fell flat and the new so-called farmer's cooperative remained in the hands of the Armour Grain Co., the Rosenbaum Grain Corp., and Rosenbaum Brothers.

Half of the Grain Marketing Company stock is owned by the Armour Grain Co., and the rest distributed between the Rosenbaum Grain Corp., Rosenbaum Brothers; and smaller holders. The failure of the company with a loss of approximately $2,400,000 is charged entirely to the Armour Grain Co. which delivered low grade wheat on purchases when orders called for higher grades.

George E. Marcy, chairman of the board of directors of the Armour Co., and George Thompson, superintendent in charge of elevators have both resigned leaving only John Kellogg, president as a remaining officer. Testimony by Frank Crombie, superintendent of the Northwestern elevator who told how the grain samples were switched to falsify grades was mainly responsible for the decision by Brown asking the Armour Co. to pay the Marketing Company $3,000,000.

Put Winnebago Over

Homer Hitchcock

When the Winnebago County Farm Bureau decided to take on the new mutual auto insurance project, the executive committee gave the job of selling policies to gain its quota, to Homer Hitchcock, one of their own number. Hitchcock farms near Pecatonica, but he is at his best explaining the intricacies of an insurance policy. Winnebago turned in 220 policies in short order, and Hitchcock is responsible for most of them.

14,000 Word Message Of President Blindly Rehashes Old Arguments Previously Answered In Both House and Senate Debate On Farm Bills

Executive Committee of 22 Retaliates With Broadside Against 14 Points of Presidential Document Pointing Out Its Weaknesses and False Assumptions

A DISTINCT but undemonstrative wave of indignation swept over the great agricultural west following President Coolidge's veto of the McNary-Haugen bill on Friday, Feb. 25. Almost simultaneously his signature was given to the branch banking bill giving the federal reserve system perpetual existence in the law and promoting centralized banking. And the same day the tariff was raised on pig iron to the limit.

In the opinion of careful observers, no series of acts could more clearly illustrate how firmly entrenched is big business and the industrial East in the good graces of the administration, and how indifferent is the same administration to the needs of the farmer.

The 14,000 word apology for vetoing the McNary-Haugen bill raises a great many false issues, sets up imaginary evils and harmful influences credited to the proposed legislation, and calls it class legislation.

The Executive Committee of 22, in an 8000 word reply to the veto message, has the following to say:

"The President holds the bill to be unconstitutional, but his other objections are so numerous that the question of constitutionality can be waived in considering his message. He makes it clear that he would not have approved the bill even if its validity under the Constitution were beyond question. In passing, however, it may be observed that the President is no better constitutional authority than many Members of the Senate and House who supported the measure. It is the function of the court to decide this point, although the veto prevents a test at this time.

Replies to Veto

The President's veto of the McNary-Haugen Bill is a repudiation of the platform upon which he was elected which promised the farmers of America legislation necessary to give them economic equality, and which would safeguard the future of our basic industry, "American Agriculture." The principles upon which this legislation is founded have many precedents and will continue to gain in favor as in the past.

Regardless of the attitude of any individuals, a majority of the American people can be depended upon to rally in support of any sound program when its justice and fairness is understood.

In the meantime, the President and his advisors carry full responsibility for the delay in restoring agriculture to its rightful position in our National life.

Earl C. Smith

What of the Tariff?

It is difficult to understand how such an advocate of the high protective tariff as the President can employ some of the arguments that appear in the message. He says:

"The bill singles out a few products chiefly sectional and proposes to raise the prices of those regardless of the fact that thousands of others * * * would be directly penalized."

Again:

"The so-called equalization fee is not a tax for purposes of revenue in the accepted sense. It is a tax for the special benefit of particular groups. * * * Its real effect is an employment of the coercive powers of government to the end that certain special groups * * * may profit temporarily at the expense of * * * * the community at large."

Again:

"The bill would impose the burden of its support to a large degree upon those who would not benefit by it."

Again:

"It runs counter to the well-considered principle that a healthy economic condition is best maintained through a free play of competition."

Surely the President recognizes that every word above quoted is fully as strong an argument against the protective tariff as against the McNary-Haugen bill.

The surprising thing about the message is that it offers no reasons against the bill that were not used by partisan and embittered opponents on the floor of Senate or House and answered to the satisfaction of a majority of both parties in each body. In fact, most of the message is substantially identical with parts of speeches

against the bill made during its passage through Congress. Like the speeches it so much resembles, the message protests too much to be regarded finally as an unbiased report on an act of major importance. The objections given are so many that the reader is left wondering if, after all, the real reason for the veto was expressed.

The veto message is part of the program that is industrializing America at the expense of agriculture. Repeatedly it pictures evil effects following better prices for the Nation's cash crops. It expresses the viewpoint of laissez faire for agriculture while sanctioning protection for industry. After reading the message with its almost infinite faultfinding over details, the thought occurs that the fundamental, unexpressed objection may be that voiced by Andrew Mellon a year ago when he asked for the rejection of the surplus control bill on the ground that it would tend to raise the cost of food and raw material to industry in the United States.

The message is evidently a compilation from several sources assembled without any regular order; consequently an orderly consideration of its salient points is impossible without rearrangement and condensation of the reasons given for the veto. This is attempted in the following "14 points" of the veto message:

"That the measure deals with few, not all, farm commodities and in operation would discriminate against some farmers in favor of others; would check crop diversification and promote one-crop farming."

Here's Class Legislation

One is tempted to point out that the tariff, the immigration exclusion act, railroad labor legislation, and many other laws benefit a few, not all, classes of citizens and industries. Almost on the very day of his farm bill veto the President, under the so-called "flexible" provision of the tariff law, raised the duty on pig iron by 50 per cent— an act certainly for the special protection of one group at the expense of others in this country. It is significant that the President at this session of Congress signed the Lenroot-Taber milk bill, of extremely doubtful soundness, which would use sanitary regulation to supplement tariffs to protect New England and New York dairymen, although the result probably is to raise the cost of dairy products to consumers, including farmers, in those districts.

The President asks why beef, sheep, dairy products, poultry products, potatoes, fruit, vegetables, flax, and other important agriculture products are not included. This is a direct question and can be directly answered. Beef cattle were not included because no effort was made by producers of beef to come under the law, just as many commodities are free from it because the producers have not sought tariff protection. As a Nation we are deficient in wool production, and the tariff therefore is of practical help to the wool man. We have no surplus of wool. The same holds true of flax, poultry products, and butter. Wheat is an important cash crop over most of the United States. Cotton, tobacco, swine, and corn are the most important cash crops in great areas. These are normally surplus crops. Their stabilization and protection would have a steadying, helpful influence in the entire agricultural structure, particularly in substitute crops of livestock, rye, oats and barley. If the President's advice is good, and if we should turn from production of the staple crops to get away from low prices, what will happen to the dairy producers and other farmers now relatively well off when wholesale shifts bring increased production in competition with them?

It costs money to change from one type of farming to another. The farmer who is pressed to meet his fixed charges when cash crop prices are low is more likely to plant more land in cash crops if he stays on the farm than to buy a herd of dairy cattle to go into competition with the dairyman. The bill does not put a premium on one-crop farming, but it seeks to reach and help certain basic crops that are in need of aid and that lend themselves to assistance through surplus control. This obviously is not the case with perishables like fruit and vegetables, which is the very good answer to the President's query as to why they were not included.

There are provisions in the bill (sec. 12) asked for by dairymen and fruit growers which offer to them the assistance they represented was adapted to their needs.

Another Charge Nailed

The bill offered aid to every class of farmers in the United States who wanted or needed its benefits. Let the bill itself speak on this point. The sum of $225,000,000 is made available as a loan to farmers' cooperatives to manage the surplus of any agricultural product produced in the country, whether named in the bill as a basic commodity or not. This same section of the McNary-Haugen bill made $25,000,000 available to producers of any and all agricultural products in (1) for acquiring warehouses, processing plants, and other facilities; (2) for capital stock of credit corporations for extending production credit; (3) for expense of terminal market federation of producers' cooperatives. These benefits were made available to producers of beef cattle, sheep, dairy products, poultry products, potatoes, hay, fruit, vegetables, oats, rye, barley, and flax, which the President mentions as excluded from benefits under the bill.

Finally on this point, if presidential approval to a farm law is withheld until one reaches him that benefits all farmers and all commodities in identical degree, then no farm bill will ever be signed. And if the President is opposed to better prices for wheat and corn and cotton unless some magical method can be devised where better prices can be secured without some one paying them, then the farmers had better become reconciled to low prices, if the President can keep them low.

"That it would not benefit the farmers, because increased production and decreased consumption would follow better prices."

This is, of course, an entirely hopeless view. The President says increased prices are bad for the farmers and would tend to ruin him through increased production and decreased consumption. This objection may be raised with equal justice against any increase in price to farmers no matter what causes it, but it is strange to hear it urged in the present crisis, which is due to low prices. The same objection would lie against any farm legislation effective to aid agriculture. It would be even more valid against legislation to use Treasury funds without an equalization fee, since in such a bill the production and the responsibility of caring for crop surpluses are divided. The **message somewhat** uncertainly indicates that some kind of farm legislation might have presidential approval, but the President serves notice in this objection that he is opposed to any bill the effect of which would be to raise prices for the farmers.

The message errs in stating that authors of the measure "proposed originally to offset this tendency (to increase production) by means of the equalization fee," but that "in the present bill the equalization fee is to be paid by only part of the producers." The original intent, and the intent in the bill Congress passed, is to collect the fee on each unit of a commodity that moves in regular channels of commerce. The exemptions from the fee are of small interfarmer transactions and are no broader in the 1927 measure than in former bills. In each case the fee places on the industry benefited the responsibility of caring for crop surpluses, which is the only sound principle of surplus control.

The message says: "Experience shows that the high prices in any given year mean greater acreage the next year." With due deference to the President, this is not supported by the facts. For example:

The Facts Are These

The price of corn on the farm dropped 10 cents a bushel, or 21 per cent, from December, 1909, to December, 1910, yet the area planted to corn in 1911, the spring following, increased 7,500,000 acres. In the fall of 1913 corn on the farm averaged 69.1 cents a bushel, the highest December price of the five years 1909-1913, and an increase of 31 cents over the preceding December price; but the acreage instead of increasing fell off 2,400,000 acres. The highest corn acreage in history was reached in 1917 with 116,730,000 acres. Corn sold for the highest average farm price known to that time, $1.27 per bushel, but the next spring's acreage showed the greatest decline in the history of corn in this country—12,268,000 acres. That year (1918) the average farm price was $1.865 per bushel, the highest of all time, but again there was a spectacular drop in acreage, this time 7,297,000 acres, to a total acreage in 1919 below that of 1909, when the price of corn was only about one-third as great.

The next year (1920) the price dropped to about one-half—from $1.865 to $.67 a bushel. The acreage again disproved Mr. Coolidge's theory by increasing over 2,000,000 acres in 1921. By 1924 the price was "more than" doubled (to 1921 price (42.8 cents), but the acreage in 1925 showed a decrease of 2,000,000 acres below 1921.

Similarly with wheat, during the four years 1866-1869 the wheat price dropped steadily, until in 1869 it was almost exactly one-half the price in 1866 ($1.53 per bushel in 1866; $0.76 5/10 per bushel in 1869). Yet the wheat acreage increased from 15,424,000 acres in 1866 to 18,993,000 acres in 1869.

During the decade 1880—1889 the December 1 farm price of wheat averaged 83.4 cents per bushel, and the acreage during the last year of the decade (1889) was 38,580,000 acres. During the following decade, 1890—1899, the December 1 farm price of wheat averaged 65.1 cents per bushel, or 22 per cent lower. Following Mr. Coolidge's reasoning, one would expect to see the acreage of wheat fall off correspondingly, but the reverse was true. The wheat acreage during the last year of the decade (1899) was 52,589,000, an increase of 57 per cent over the acreage 10 years before. Carrying the comparison out through the following decade (1900-1909) it is interesting to note that the December 1 farm price of wheat averaged 76.7 cents per bushel, an increase of 18 per cent above the average price of the preceding decade, but the acreage, instead of showing corresponding increase, decreased to 44,262,000 in the last year of the decade (1909), a drop of 15 per cent.

It is impossible to get more accurate comparisons after 1909, owing to the fact that a weighted average farm price for wheat is available commencing with that year to replace the December 1 price. During the five years, 1910 to 1914, the average weighted price of wheat dropped from $1.01 in the season of 1909-10 to $0.793 in the season of 1913—14, a decline of 21.4 cents per bushel. But the acreage went the otherway, and increased from 45,681,000 in 1909 to 53,541,000 acres in 1913, an increase of 8,860,000 acres.

It is true that the acreage of wheat increased during the war while prices were high, but no one has forgotten that the highest possible pressure was applied by every Government officer, from the President down to the humblest school-teacher, to increase the acreage planted to wheat.

Trends in cotton to which the President refers as an increase in the cotton acreage of 17,000,000 acres in the last five years, "under the stimulus of high prices," merit more careful study than the message accords them. The facts disclose that this addition of 17,000,000 acres to the area planted in cotton was drawn from other cash crops, notably corn, cattle, and swine. The increased cotton acreage, therefore, was due to low prices of competing crops fully as much as to high cotton prices.

If cattle and corn prices had been stable and fair, and if the plan proposed in this bill had been in operation to equalise the supply of cotton to demand over a period of years, the acreage would not have shifted to cotton.

Inconsistent Here

The message argues, on the one hand, that we have overproduction of agricultural staples in the United States and, on the other, that production can be curbed only by decreased prices. Congress passed the bill in the belief that the farmers, given effective machinery to stabilize and protect their markets, would consolidate its advantage and not throw it away through recklessly increased production. The bill sets up comprehensive machinery to assist in adjustment of production to the best advantage.

The board, the land-bank district conventions, the commodity advisory councils, and cooperative associations are knit together in an organization to work to bring about the adjustment of production to secure maximum advantage to the producers. If farmers ever can benefit from better prices they can under this act.

There is evidence to justify this faith. Labor has not thrown away its wage advantages under the stimulus of good pay for short hours, with attractive rates for overtime. The Corn Belt for two years has exercised restraint upon numbers of hogs produced notwithstanding increased and fairly satisfactory prices since the close of 1924. The number of hogs on farms on January 1, 1927, was 52,536,000 compared with 52,055,000 a year before.

The assumption that increased prices of staple farm commodities mean decreased consumption is not conclusive. The price of wheat before the war has been considerably below pre-war exchange value, yet the per capita consumption of wheat has fallen off 25 per cent from the rate of 20 years ago. The falling off of pork consumption to which the message alludes is due to lack of pressure of supply rather than to high prices. There has been no radical change in retail pork prices. Of course, it is impossible to raise pork prices out of line with other meats and keep them there and this fact, instead of being an argument against the bill, is one of the elements relied on to make it work, since (a) the point at which substitution will turn to substitute is the economic barrier to unreasonably high prices, and (b) this tendency to substitute would extend the benefits of operations in one commodity to the growers of competitive substitutes in this country.

The wheat farmer gets 15 to 17 per cent of the retail price of a loaf of bread, and therefore the price of bread does not fluctuate with the price of wheat. The cotton farmer gets but 15 to 20 per cent of the retail price of cotton cloth, and a much smaller share of the retail price of articles made from the cloth. A fair price to the producer would not affect the retail prices enough to influence volume of consumption at all, while the increased purchasing power of farmers would be a new and stimulating influence in national prosperity.

"That it involves both price fixing and buying and selling of farm commodities by government."

No Price-fixing Mentioned

There are no price-fixing standards or provisions in the bill. Purchases and sales made under contract with the board would involve only the excess supplies—the surplus—leaving the remainder, the great bulk of the crop, to be bought and sold at any price, buyer and seller could agree upon. Even for the surplus that might be handled under contract with the board, the bill fixes no price, nor need the board fix any price in its contracts. Purchases and sales under contract would be made fairly at prevailing market prices. The influence on price is not secured by purchasing at an artificially fixed figure, but by withholding, removing, and disposing of surpluses. With the surplus removed, prices would rise until checked by danger of imports, or by economic factors such as substitution of other meats in case of operation wth livestock.

The aim of the bill is to regulate the movement of these staple commodities in commerce—not to fix prices. It would influence prices, to be sure, but so do the tariff and many other laws.

It is charged that the bill involves government buying and selling of farm commodities. Under its provisions the Government board can not buy or sell a pound. It can not as a board, own any farm commodities. Purchases and sale would be made by private agencies, on their own account, but their operations would be made possible and guided by the board to the extent necessary to secure an orderly movement of the commodity dealt with.

No Guarantee Here

"That it guarantees profits to packers, millers, and cotton spinners at the expense of farmers; would destroy all processors who failed to secure contracts with the board, and discriminates against processors by collecting an equalization fee on imported units of the raw commodity, but not on imported products of that commodity."

The report of the Senate committee answered the first point convincingly when it said:

"The committee feels that power to contract with processors may be necessary in order to insure, for example, that as much of the exports of wheat as possible may be sent abroad in the form of flour, thus encouraging the employment of mill capacity and mill labor in the United States and retaining the feed by-products within this country. Again, in order to maintain a stable hog market in this country, it may be necessary to enter into contracts with packers governing such export operations as result in the sale of lard abroad.

"Nothing in the bill gives any justification for the charge that the bill, because of this provision, insures that the business of a packer or a miller shall be conducted at a profit. On the contrary, the measure specifically provides (subdivision (e) of section 6) that the profits resulting from any such agreements between the board and the association, corporation, or person handling the surplus shall accrue to the stabilization fund for that commodity. The board is given the authority to enter into such contracts as are necessary to secure the handling of the surplus in the interests of the producers. There is no reason to assume that it would not negotiate terms as favorable to producers as possible."

If this provision of the McNary-Haugen bill is objectionable, it may be observed that the Curtis-Crisp bill, which the message indorsee by implication, permits corporations to use Government money to make contracts which guarantee profits of packers and millers. The safeguard is that the board must approve such contracts. The same safeguard and additional ones are in the McNary-Haugen bill.

Processors that had no contracts with the board would be no more discriminated against than are those manufacturers and contractors today who fail, in competition, to secure contracts for Government supplies and services.

The objection that processors are discriminated against because the equalization fee is collectible on important units of a raw commodity, but not on manufactured products of that commodity is valid only if domestic prices rise above prices outside of the United States by the amount of the tariff. To the extent to that point the duty on the raw material and the compensatory duty on the manufactured products would protect the manufacturer.

"That the equalization fee is impossible of exact predetermination; would not be collected on units of a commodity that do not move in commerce; its collection would prove an impossible task; and the return of any excess collected to the producer is not provided for except in the case of cotton."

In practice the equalization fee would be fixed at an amount which would, over a period of years, adequately cover the average costs and losses, if any, of operations. The fee would be adjusted from time to time to conform to experience and changed conditions. The bill is very carefully drawn to cover this point. If the amount collected under one equalization fee is too great, the fee would be reduced by order of the board for succeeding operations. If the amount collected is not enough, the fee would be increased.

If the fee is collected on the units of the commodity in the stream of commerce, its identity with the grower of the commodity is lost and its return to the producer impossible, notwithstanding the provision giving the board power to issue participation certificates and return any excess collected in the case of cotton. This provision for cotton was in a lesser draft of the bill which provided for collection of the cotton fee at the gin, and was carried over after the change in the point of collection was made. This rendered the cotton participation certificate paragraph inoperative, but at least it is harmless and not of sufficient importance to justify Executive disapproval.

Fee Not a Tax

It is objected that the fee would not be collected on units of a commodity that do not move in commerce. These are all important cash crops. The aim is to collect the fee on that portion which actually sells as a cash crop and to exempt the portion that is consumed at home for feed or seed, as well as the small interfarm transactions which are specifically exempt because they are not part of the stream of interstate and foreign commerce, as they would be if sold to an elevator or mill or shipped by common carrier. The fee is not a tax on production but a fee necessary to the proposed promotion of orderly movement of commodities in commerce. Therefore the exemptions are not objectionable, but are necessary and justifiable.

The message cites somebody's estimate that the fee would be collected upon 16,000,000,000 units, creating the impression that the very number of units makes collection impossible. It should be noted, however, that the fee will be imposed at the narrowest point in commercial movement of a commodity, and the persons and firms from whom it would be collected are in fact few. The board is empowered to collect the fee on "sale, transportation, or processing." Each term is carefully defined. The board would probably collect the fee in the case of cotton from the railroads transporting it, which would add its amount to their freight charge. Some cotton would be trucked or sold direct for milling or export. Fees on such cotton as had not moved by rail would be collected on the sale. There is nothing impossible about it. Similarly, there is a practical point on which the bulk of the fee would be collected on any commodity and supplemental points on which the fee could be collected on the remainder.

Salaried Positions Few

That it "means an enormous building up of Government bureaucracy."

Actual salaried positions created by the bill are few. Adequate personnel to operate the system on behalf of the farm producers would, of course, be required; but there is no reason to suppose the force required for satisfactory operation would be "enormous," as suggested by the message. Regular trade agencies would perform all the market functions involved. The collection of the equalization fee would be narrowed down to the fewest possible points. Instead of being charitable toward the farm bill on this question, the message is uncharitable. This line of reasoning has not been invoked in opposition to the great and growing system of Government intervention on behalf of industrial and commercial groups.

That the method of nominating the board is not only unconstitutional, but when taken in connection with the broad delegation of powers to the board constitutes a dangerous precedent in government."

If the restriction on the President's power to name whom he desires on the farm board should be held invalid, that need invalidate no provision other than those for nominating the board. If the bill had been permitted to become a law, and the President, accepting the nominating committees' recommendations, appointed from the lists submitted to him, the question would not be raised at all.

This Assumption Unfair

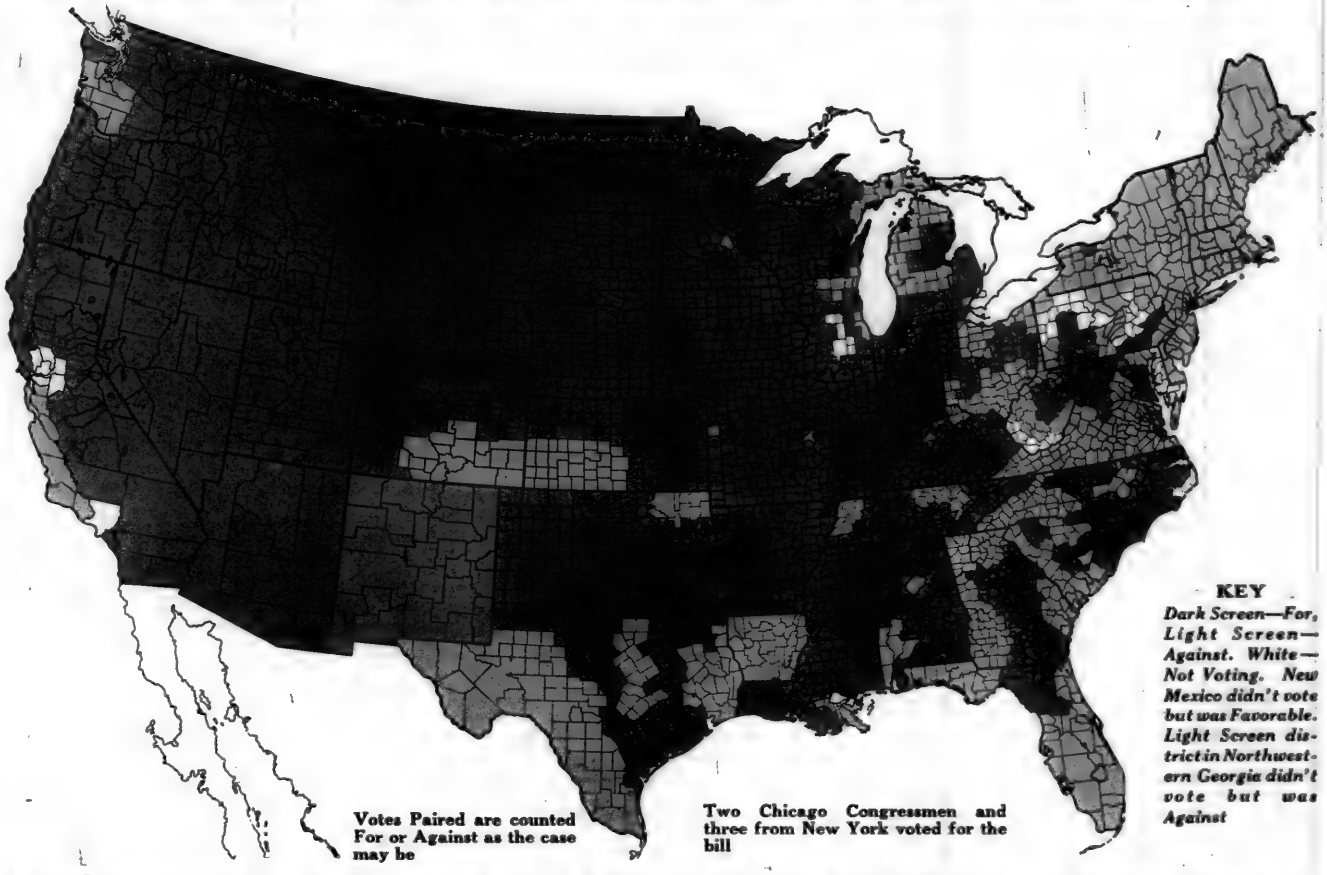
Fear is expressed that the board would be free from restraints imposed by anti-trust law, and because "no time limit is placed upon the contracts which the board may make." It is not fair to assume in advance that the farm board would be unpatriotic, stupid, selfish, reckless, and incompetent, yet this is what the message in effect implies, not only in its objection from the standpoint of delegated powers but at nearly every other point. Congress is in session annually; and if experience demonstrated that the board as constituted used its delegated powers unwisely it would not only be easy to change the law, it would be next to impossible to prevent changing it.

"That it might obligate the Government beyond the $250,000,000 receiving fund."

This not only evidences an unwarranted lack of confidence in the board; it contradicts the provisions of the act itself. The board, in its operations is not empowered to make contracts obligating the revolving fund, or the Treasury, for any sum whatever. It is empowered to make advances out of the revolving fund to the stabilization fund for any commodity "in anticipation of the collection of equalization fees." If all the money in the revolving fund should be advanced to the several stabilization funds the board would have no power to advance further. The extreme illustration with cotton used in the message is not only inconsistent with the provisions of the bill; it assumes that the board would be foolish and incompetent. While the collection of the fee remained in doubt, or if restrained by injunction from its collection, the board would only enter into contracts under which risk of loss would be slight.

"That it would not aid cooperative marketing, but would remove the reasons why farmers now join cooperative associations."

The fact that nearly every large scale cooperative association in the United States handling a basic commodity had a hand in drafting the measure ought to be sufficient on this point. The Senate committee report said of this objection:



"The cooperative associations representing producers of wheat, cotton, rice, corn, and swine are asking Congress to pass the committee bill—a sufficient answer to the objection that the measure would affect their interests adversely. The bill would remove the present handicap to successful operation which cooperative associations are unable to overcome—the surplus. It is the only measure proposed that makes all who contribute to the production of a surplus, not alone those in the cooperative association, responsible for caring for the surplus in the interests of orderly marketing and a fair domestic market."

In addition to the cooperative named as asking Congres to enact the bill, the committee might have added the burley and dark tobacco growers associations.

A Trivial Objection

"That the provision for expression of producers' sentiment through State conventions is unworkable."

How Congressmen Voted On The McNary-Haugen Bill In Last Congress

KEY

Dark Screen—For, Light Screen—Against. White—Not Voting. New Mexico didn't vote but was Favorable. Light Screen district in Northwestern Georgia didn't vote but was Against

Votes Paired are counted For or Against as the case may be

Two Chicago Congressmen and three from New York voted for the bill

This provision, inserted as a Senate amendment, provised that State conventions shall be held for the purpose of expressing producers' sentiment in States where less than 50 per cent of the producers belong to a farm or cooperative organization. The bill elsewhere provides that the board, before operating with any commodity, must satisfy itself that the majority of the producers favor such action. The point is made in the veto message that "the bill does not say 'delegates,' it says 'producers,' the farmers themselves," therefore, it is concluded, "it is entirely unworkable."

Such an objection is almost trival. The bill provides that the heads of the State department of agriculture shall prescribe rules and regulations for such conventions. The President reaches the surpassing conclusion that the physical presence of a majority of all the producers of a State is required in one convention by this provision—certainly an unreasonable interpretation, in the light of the power conferred on the State commissioner of agriculture to prescribe the rules and regulations for the convention in his State.

The original bill did not contain this section. It might be regarded as unnecessary, but it is not unworkable of itself.

Not Purpose of Bill

"That 'we are already overproducing,' and that the measure would result in disastrous dumping of farm products abroad, giving an advantage to our foreign farm competitors, but at the same time leading to reprisals on the part of foreign nations."

For example, the message says: "we shall send cheap cotton abroad and sell high cotton at home." Nothing could be further from the intent of the bill. Cotton is a commodity of which our exports constitute nearly two-thirds of the total international trade. There was proposed in this bill a way in which surplus cotton could be withheld so that the world cotton buyers, abroad as well as at home, would be required to buy in a market free from the pressure of more cotton than currently needed. The message is clearly uninformed and prejudiced in this point.

Much is said of the consequence of "dumping" American feeds abroad, thus subsidising livestock competition for ourselves. Corn is the only feed crop in the bill. The authors clearly recognised that with corn the problem is rather to overcome the effect of excessive production one year and scant supplies the next than to dispose of a large exportable surplus abroad. There is no reason to believe it impossible or unwise to secure the price benefit of the small corn tariff, both through an intelligent carry-over program and export sales. Mill feed is classed with corn, notwithstanding that a policy of exporting wheat as flour would retain mill feed in this country and thus cheapen its home price.

Our exports of agricultural products go to countries that are themselves deficient in farm production. They might fear a move to restrict our farm surpluses; they will not protest against a measure that tends to keep up their supply.

It is not consistent to argue, as the message does, in one paragraph that we are conferring unfair advantages on foreign agriculture, and then argue in the next paragraph that foreign nations will be moved to reprisals. One or the other of the objections might be valid, but surely not both.

It is objected that "we are already overproducing." Our agriculture was developed on an export basis by conscious effort of National and State governments, of railroads, banks, and civic agencies. The war forced further expansion of agriculture, industry, transportation, and labor. Our national postwar effort has been directed successfully to save industry, transportation, and labor from the effects of transition to a peace-time basis, leaving agriculture exposed to the full shock of postwar deflation. It was our national policy that expanded agriculture. Therefore it has become a national responsibility to aid agriculture as other groups were aided. Instead of meeting that responsibility, and developing a national program to promote agriculture side by side with industry, we are pursuing a national policy aimed to expand industrial experts at the expense of our agricultural market in other countries.

Taking the long view of the relation between our farm production and population, the National Industrial Conference Board makes a clear statement of the falling behind both of acres and farm production: "Since the beginning of the century our mining production increased about 231 per cent; our manufacturing production about 190 per cent; whereas agricultural production only increased 58 per cent. The number in farms per capita increased up to 1860, but then started to decline since it was then limited by the limits of our territory. The per capita of improved farm land increased up to 1880, but since then has shown a downward trend. The acreage in harvested crops per capital increased up to 1900. Since then it has shown a downward trend. In the period 1920-1925 this decrease was very sharp, between 9 per cent and 10 per cent.

Instead of this process resulting in an increase in yield per acre to make up for the declining per capita acreage in crops, there has been a slackening in the upward tendency in the yield per acre, which was in evidence before the beginning of the century. Neither has there been any increase in the total per capita agricultural production. In fact, the period 1920-1925 shows about 6 per cent below the pre-war years 1910-1914.

Would Help Co-ops

"That the insurance provision is 'destructive of all orderly processes of trade,' and is unfair to non-members of the cooperatives."

This provision takes previous utterances of the President at literal value. It has been repeatedly said from the White House that cooperative organizations are the agencies through which the agricultural surplus should be controlled. With an insurance agreement such as proposed cooperative associations could afford to withhold a surplus from the market when supply and demand conditions jeopardise producer's interests. The cooperative would be able to advance nearly the full current market value at time of delivery by its members. This would overcome the great handicap that now prevents cooperative associations from increasing membership. With it removed, it is believed that cooperatives would rapidly bring a majority of producers of certain commodities within their organizations.

The insurance proposal does not insure a cooperative association against loss if it sells unwisely. It merely insures against changes in the level of the quoted market. Nor is there any "straight Government agreement" to insure cooperatives, as the message represents. The agreements were to be made with the backing of the stabilization fund for a commodity, raised by the fees paid by the commodity itself.

This Isn't Right

"That it would disrupt existing channels of trade."

The report of the Senate committee anticipated this criticism. It said:

"Under the committee bill existing agencies are employed to do all of the buying, storing, or selling that the board deems necessary in controlling and handling the surplus. Instead of upsetting existing trade channels, the committee bill uses them exclusively. It is true that under contracts with the board corporations created and controlled by cooperative associations would probably handle, store, and sell, both in domestic and export markets, a larger volume of the surplus commodity than at present. To that extent they would probably render unnecessary some non-cooperative private grain exporters and buyers of farm commodities for speculative profits. The committee understands that this result would likewise follow from any equivalent growth in the functions of cooperative associations. Congress must abandon its policy of promoting cooperative marketing if it is to preserve from interference every speculative dealer or exporter trading in farm commodities."

A Weak Excuse

"That many farmers have not asked for it."

During four years in which this legislation has been considered not a single representative of a membership farm organization has opposed it before committees of Congress. On the contrary, the committee reports list literally hundreds of organizations that have appeared petitioning for it. Unanimity among bankers was not required as a condition to enactment of the Federal reserve act or of the branch banking act, which the President signed on the day of his veto of the farm bill. There is probably no precedent for a veto based on such a reason. After all that has been said by the present administration about cooperative marketing, the recommendations of the associations handling the commodities affected are pushed aside, while the message emphasises a suggestion that "important minorities" have advised the President against the legislation.

Senator Norris, former chairman of the Senate Committee on Agriculture, on March 29, 1926, inserted in the Record correspondence referring to an agreement by the President and two of his Cabinet officers with the former chairman and the legal advisor of a national council of cooperative marketing associations. In this correspondence these gentlemen then representing the cooperatives admitted that they had agreed with the President and the Secretaries of Commerce and Agriculture that their organizations would oppose legislation aimed at surplus control—to which the veto message now refers as "the heart of the whole problem." This understanding was reached without the knowledge of the cooperatives that composed the council. Practically all of them were, in fact, favorable to surplus control legislation and supported the McNary-Haugen bill. This incident indicates at least one quarter from which came the President's advice on what the farmers want.

The message says "several of the largest farm organizations have refused to support' the farm bill. The foregoing paragraph throws light on what happened to one of them. Of the three national farm organizations, one of them on this very issue repudiated its president, who had stood with the administration. Another at its annual meeting in October indorsed the Corn Belt program for agricultural equality, which includes the McNary-Haugen bill. The third at its annual convention in November made an emphatic declaration on the surplus problem and indorsed far more radical legislation involving Government subsidy through bounties on exports.

Bill for Surplus Control

As a summary of what the bill does contemplate, it may be said that it is addressed primarily to surplus control. It provides especially for certain "basic agricultural commodities," because they are the principal cash crops of which we expect a surplus. Collectively they are the foundation of farming in the great agricultural areas of the United States. In addition the bill treats with all farm commodities as fully as any loan measure can soundly provide for them.

The bill provides a method by which a majority of the producers of a "basic" commodity may regulate the flow to market of the surplus portion of a crop in order that supply and demand may be balanced over a longer period than is possible under existing conditions. Through the principle of an equalization fee it would enable American farmers to influence the marketing of their surplus products in ways that would permit maintenance of domestic price levels in line with domestic costs and standards of living. It does not attempt to annul the law of supply and demand, but to administer it in the interest of producers. The equalization fee spreads the cost as well as the benefits over the whole crop and avoids Government subsidy. If supply and de-

Published once a month at 404 North Wesley Ave., Mount Morris, Illinois, by the Illinois Agricultural Association. Edited by Department of Information, E. G. Thiem, Director, 608 South Dearborn Street, Chicago, Illinois. Entered as second-class matter October 20, 1925, at the post office at Mount Morris, Illinois, under the Act of March 3, 1879. Acceptance for mailing at special rate of postage provided for in Section 412, Act of February 28, 1925, authorized October 27, 1925. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association RECORD. Postmaster: In returning an uncalled for or missent copy, please indicate key number on address as is required by law.

The Coolidge Veto

"The political explosion expected to follow President Coolidge's veto of the McNary-Haugen farm price stabilization bill has, as yet, failed to materialize and friends of Mr. Coolidge here are making no secret of their satisfaction."

This is the burden of a Washington press dispatch. So the White House favorites are gloating over what they have done. It is true there has been no explosion. The veto was less of a surprise to farmers and the West than our Eastern neighbors realize, although we had reason from past experiences and observations to expect something different. The veto certainly showed little statesmanship. The merits of the farm relief proposal, seemingly, were never considered.

The bill appeared to be inimical to the interests of the industrialists, it promised to raise the price of food. Therefore it was rejected. The President is too astute a politician to break with the prejudiced, selfish, moneyed crowd that maneuvered him into office. Had he signed the bill there undoubtedly would have been a terrific explosion among the disappointed Easterners. The Washington Post, the President's champion, would have had a stroke of apoplexy and passed out. So would Andrew Mellon, Herbert Hoover, Julius Barnes, John O'Leary, and the rest of the crowd that was bitterly opposed to the measure.

Calvin Coolidge was in a tight place. He chose the easier way out. It's our hard luck that an issue of such economic importance to American agriculture was settled by political considerations rather than on its own merits.

The Veto Message

THE McNary-Haugen veto message of President Coolidge made a profound impression on thousands of people whose notion of the surplus control plan was more or less hazy. It was worded to accomplish just that, to arouse doubt and suspicion. It raised the old bogey of price-fixing, it called the bill sectional and class legislation. It accused the plan of promoting one-crop farming, of being economically unsound, of being unworkable and unconstitutional.

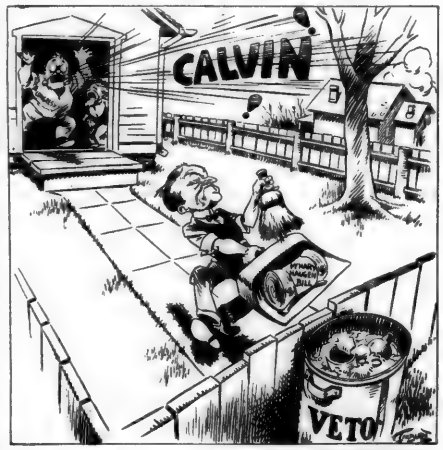
When the writers had tired of throwing bricks and had run out of bad names, like the small boy with his tongue out whose parting shot is "you're all that plus a thousand times," they said:

"This measure is so long and involved that it is impossible to discuss it without going into many tiresome details. Many other reasons exist why it ought not be approved, but it is impossible to state them all without writing a book."

All these objections were raised in the House and Senate debates. All were effectively answered. The bill might have been unconstitutional in the method provided for the selection of the Federal Farm Board. But the Supreme Court could have decided this point, after all a small one, if the issue ever arose.

The length of the message, and its unusual vehemence, on the other hand, gave it the appearance of an apology for the veto. Many of the accusations could have been used against the Federal Reserve Act, the protective tariff, the Immigration Act, the Esch-Cummins Act and other legislation none of which allows "free play of competition."

The reply by the Executive Committee of 22, is published in full in this issue. Every member should read it carefully. The criticism of the message is set forth under 14 points. The reply refrains from saying that a book might have been written in criticism of the message.



Labor and the Farmer

John H. Walker, president of the Illinois State Federation of Labor commented favorably on the growing friendliness between organized labor and the organized farmer, in a recent talk at Champaign. He referred to the school of thought which believed or believes that organized labor by reason of its success in gaining higher wages and shorter hours is largely responsible for the high cost of commodities the farmer must buy, for the scarcity and high cost of good farm help, and for the disparity in prices between agricultural and non-agricultural goods. There is another side to this question which thinking farmers fully appreciate.

Labor and the farmer unquestionably have much in common. Labor belongs to the consumer group. It buys what the farmer produces. Prosperous labor is the farmers' best customer. Few if any begrudge labor its better working conditions and higher standards of living. They realize that labor through organization has done for itself what farmers have yet to accomplish.

On the other hand, labor has been sympathetic to the farmers needs and demands. In Illinois, the State Federation endorsed the McNary-Haugen bill. It fought for tax revision on the basis of ability to pay. Its leaders have shown a most admirable broadness of vision in these and other questions.

Farmers have much to learn from labor. With as thorough and unified an organization as the latter, agriculture could get what it needs with much less effort than has already been expended toward securing surplus control legislation.

(Courtesy Scripps-Howard Papers)

The Outlook for 1927

The 1927 outlook of the federal bureau of agricultural economics is on the whole decidedly pessimistic. It says there is slight hope for improvement unless there is a drastic cut in acreage of corn, cotton, wheat, and rice.

It credits the livestock and dairy business with more favorable prospects. These and other farm commodities are briefly mentioned in the outlook report, as follows:

"A slightly larger supply of farm labor and possibly lower wages.

"Hard spring and durum wheat growers cannot expect as much for the 1927 crop as they received in 1926.

"Corn growers are faced with the prospect of lower prices unless acreage is substantially reduced.

"Oats and barley are likely to be in greater demand for feed. Prices will depend upon supply.

"Prices of cattle are expected to average somewhat higher than 1926.

"Hog producers have a favorable outlook but present prices will continue through 1928 only if pork production is held down to the level of the past two years.

"Sheep production expected to increase slightly but a strong consumptive demand is anticipated.

"The dairy industry is on a stronger basis than a year ago.

"Egg and poultry producers may not expect as profitable a year as 1926.

"Horses and mules are plentiful enough to meet demands but supplies of young stock are low.

"Potato growers should guard against overplanting by watching acreage plantings in other states.

"Trend of fruit production is upward but as large a crop as last year is not likely again. Don't plant more peach trees.

"Increase alsike and red clover seed production."

Cutting production by acreage reduction is not always effective because of the uncertainties of the weather. But it will be well to heed the handwriting on the wall as revealed in statements of surplus and its possible effect on prices. For the diversified livestock farmer the chances for making some money in 1927 are good. For the straight grain farmer opportunity is less favorable. A good poultry flock will pay because the demand for poultry products is firm and we are still on a domestic consumptive basis under the protection of the tariff. It is now up to the farmer to help himself.

I. A. A. Offices Retained

Offices of the I. A. A. will be retained in the Transportation Building, the present location at 608 So. Dearborn St., the Executive Committee decided at its last meeting.

While slight savings in rent might have been realized by moving a distance from the loop, the inconvenience to directors and members who come to the city and the loss of time involved in going to meetings and maintaining contacts with other groups were held to counteract the difference in cost. The I. A. A. pays its rent a year in advance and thereby secures a discount of 15 per cent from the regular rate. Approximately 5500 square feet of space are used by all departments of the Association.

The loop is slightly overbuilt with office space as a result of the many new skyscrapers recently completed. Bids were secured from many space sellers anxious to have the I. A. A. officers.

What The Counties Are Doing

DEKALB CORN 40 PER CENT BETTER THAN LAST YEAR

At the recent corn show held in DeKalb County, on December 6-11, William Webb of Will County judged. Mr. Webb stated that the type of corn exhibited was fully 40 per cent better than that exhibited last year, and freedom from disease and germination was 50 per cent better, bringing home the real value of a project of this kind. The show was held in cooperation with a clothing store in DeKalb which furnished the prizes valued at $175.00. One hundred thirty-eight 10-ear samples were entered.

CHAMPAIGN GOES AFTER FARM LOANS

The leadership system of education works according to Farm Adviser Burns. The Champaign County Federal Farm Loan Association organized 8 years ago had loaned only $262,600 in that time. Since starting an educational campaign through community leaders, the new secretary placed $341,000 worth of loans between October 9 and December 29. This year the leaders of each unit will set definite goals of attainment. One unit hopes to get 75 per cent of its members to use poultry self-feeders and the home grown balanced poultry mash ration.

LA SALLE COUNTY IMPROVES FARM HOMES

The farm and home bureaus of La Salle county decided that the two things needed most in their farm homes were running water and sewage disposal systems. They co-operated with the farm mechanics department of the University of Illinois in a home equipment project. Educational meetings were held, moving pictures and slides were shown illustrating different kinds of water systems, and visits were made to homes to help solve improvement problems.

GRUNDY HOLDS 8TH ANNUAL CORN AND POULTRY SHOW

"When we held our first corn and poultry show eight years ago we had all sizes, types, and varieties of seed corn in our exhibits," states Farm Adviser Longmire. "At the last two shows our corn was remarkably uniform. Wm. Webb and J. L. McKeighan who have judged nearly every year remarked about the great improvement made. Our poultry shows likewise have stimulated interest in purebred stock until today we have many purebred flocks in the county which furnish hatcheries with eggs at premium prices."

GALLATIN STRONG FOR SWEET CLOVER

Seventy per cent of the membership in Gallatin county sowed sweet clover in 1926. The farm bureau bought 39,815 pounds of seed. Between 1921 and 1926 the acreage of sweet clover increased from 100 to 6,000. In five years 32 lime spreaders were sold, or one for each eight members. A total of 220 carloads of limestone was spread during this period. One thousand bushels of sweet clover seed was threshed in the county last year.

FARMERS' LUNCHEON CLUB IN WINNEBAGO

The Farmers' Noon-Day Luncheon Club modeled after Rotary and Kiwanis is a new idea recently introduced in Winnebago county. Farm bureau members and their wives meet at the Nelson hotel, Rockford, for luncheon the second Saturday of each month. A good program with community singing, music and a top-notch speaker are provided. Shop talk is barred. Those who attend make their reservations at the farm bureau office by the preceding Thursday night. Two hundred and twenty attended the first luncheon, and 236 the second on Feb. 12.

10,000 ACRES OF ALFALFA GOAL IN LOGAN

The 10,000 Acre Alfalfa Club of Logan county was launched recently to increase the present acreage of 1,000, ten-fold in this county. This means 2½ per cent of all farm land in alfalfa. The farm bureau, the County Bankers Association, and the Blue Valley Creamery Co., are cooperating.

MENARD STARTS CORN GERMINATOR IN HATCHERY

A corn germinator with 128 bushel capacity every six days was set up in conjunction with a local commercial hatchery at Petersburg recently. The same narrow range of moisture and temperature conditions in the hatchery prevail in the germinator. Results so far exceed expectations and stamp the project as one of the most successful in the state. Around 2000 bushels will be tested by May 15 according to farm adviser Crosby.

19 SHIPPING ASS'NS. IN HENRY SHIP 2394 CARS

The 19 shipping associations of Henry county shipped 2394 cars of livestock in 1926 which netted producers about $4,660,000. This compares with 2176 cars in 1925 worth $4,130,000. The associations handled 56.05 per cent of the total shipments from the county in 1926, and 51.73 per cent in 1925.

DuPAGE 100 PER CENT; WINNEBAGO 98

One hundred per cent collection of 1926 dues, and 80 per cent collection of 1927 checks is the recent report of the DuPage County Farm Bureau. Winnebago collected 98 per cent of its last year's dues, according to Farm Adviser Keltner. Eight farm bureaus in Illinois have collected more than 80 per cent and four more than 60 per cent of their 1927 dues.

PULASKI ENTERTAINS ORCHARD TRAIN

The Southern Illinois orchard train on the Big Four made four stops in Pulaski county on Feb. 14 and 15. Exhibits were displayed in the cars, and meetings held in town halls with a total attendance of 1,005.

DeWITT EMPHASIZES CULTURAL PROGRAM

Educational programs on economics and social science will be innovations in the work of the DeWitt County Farm Bureau in 1927. Records of local livestock shipping associations are being centralized.

HANCOCK RESULTS FAVOR KRUG CORN

A summary of yields of original Krug corn grown by 23 farm bureau members in 18 townships in Hancock county shows the average yield on 203½ acres to be 51.9 bushels per acre compared with a yield of 47.25 bushels per acre on 543.5 acres of other varieties grown in the same fields or under similar conditions. This shows a gain of 4.65 bushels per acre for Krug corn. Cooperators state that Krug corn is superior in quality and will produce more pounds of beef and pork per bushel. Krug corn matures 10 days earlier than Reid's Yellow Dent.

OYSTER SOUP DRAWS CROWD IN MACOUPIN

An all-day combination farm bureau and shipping association meeting at Modesto with oyster soup at noon, brought out a good crowd in Macoupin county. The European cornborer, poultry, and swine feeding and sanitation were the problems discussed by J. H. Bigger, field entomologist, Red Neel, and Farmer Rusk. Local club leaders and soil project leaders met later in the month.

MADISON HAS MANY COOPERATORS

Ten townships expect to hold monthly meetings, and five are planning for annual picnics, homecomings, or community fairs for 1927 in Madison county. Eleven directors agreed to increase the membership in their townships, and 36 men offered to cooperate in the use of limestone and growing of legumes. A seed corn culling school was held, and 23 men have agreed to follow the corn improvement program.

GLOVER SPEAKS IN McHENRY COUNTY

A. J. Glover, editor of Hoard's Dairyman was the principal speaker at the annual dinner of the McHenry County Herd Improvement Association held February 16. Glover was the first cow tester employed in this state. Medals in the Illinois 500 Pound Butter Fat Cow Club were awarded to A. D. Cornue, W. H. Gardner, Wm. Wittmus, and F. M. Barber.

M-P EDUCATES MEMBERS ON OIL

Oil testing demonstrations to inform farmers about good and poor lubricating oil are being featured in Marshall-Putnam counties. Special emphasis is being placed upon the damaging effect of dilution in the crank case. An accredited list of truck drivers, who boost for and haul more than 50 per cent of the stock received by the Peoria Producers, is kept by the farm bureau.

800 AT MERCER ANNUAL MEETING

More than 800 attended the eleventh annual meeting of the Mercer County Farm Bureau held in Aledo, January 11, 1927. Members and their wives were guests at dinner furnished free of charge by the farm bureau. Three hundred fifty-one registered members were present.

Wins Sam Thompson Trophy

F. E. Fuller, farm adviser in Marshall-Putnam county, left, is seen accepting the sterling silver loving cup from Sam Thompson, president of the American Farm Bureau Federation, who offered the prize more than a year ago to the county farm bureau having the best publicity service.

The publicity of Marshall-Putnam was judged to be the most original, interesting, varied, and effective in keeping the name of the farm bureau in a favorable light before the people of the two counties. The cup will remain the property of the farm bureau winning it three times.

CORN CULLING POPULAR IN CARROLL

The Carroll County Farm Bureau held a better seed corn meeting on February 15, with 35 present. Clair Golden of Rock Island county gave a culling demonstration. Each man culled the sample he had brought from home.

500 AT MASON ANNUAL MEETING

Over 500 people attended the Mason county annual farm bureau meeting which was one of the largest and most successful in the history of the organization, according to adviser T. R. Isaacs.

McLEAN SERVICE CO. ELECTS OFFICERS

Share-holders of the McLean County Service Company held their first meeting February 19. E. D. Lawrence was elected president; Geo. L. Clarke, vice-president; and Len E. Jones, secretary-treasurer. The company will handle petroleum products.

WABASH BUSY MAKING SOIL MAPS

Soil mapping meetings are being held in Wabash county. Each member tests soil from 40 acres, and draws a map under the adviser's direction.

JOHNSON COUNTY MUTUAL A GO

The Johnson County Mutual Fire Insurance Company, chartered December 15, 1926, had more than $300,000 worth of insurance pledged to it within two months. It insures only farm bureau members. Risks are classified according to hazards, and specific and blanket reinsurance is carried in the Farmers Mutual Reinsurance Company.

A member with $2500 worth of insurance can save his farm bureau dues every year in reduced cost.

GOOD MEMBERSHIP IN LAWRENCE TWP.

Lawrence township, Lawrence county has 90 farm bureau members, all of whom are paidup. The membership was signed by local solicitors with William Philbert in charge. "Any time Lawrence township wants to add 10 members, and make it 100, we can do it," says Philbert.

SANGAMON TELEGRAMS GO TO COOLIDGE.

More than 100 farmers started farm account records January 1, 1927 in Sangamon county. Scores of telegrams urging President Coolidge to sign the McNary-Haugen bill were sent from this county just prior to the veto.

The International Live Stock Exposition announces that the Chicago Association of Commerce for the fourth consecutive year will award agricultural college scholarships of $500, $300 and $200 to the three highest ranking individuals in the non-collegiate live stock judging contest to be held at Chicago, November 26.

I. A. A. Stand Against Cornborer Quarantine For Illinois Is Upheld

ILLINOIS corn growers and corn shippers will not be hampered or inconvenienced by a quarantine ban, as a result of a recent decision of the Federal Horticultural Board not to include Illinois in the European cornborer quarantine area.

Earl C. Smith

Earl C. Smith, president, who was in Washington at the time of the quarantine hearing, appeared in protest before the board, stating that inasmuch as only one specimen of the borer had been found in Kankakee county, Illinois should not be subjected to the dangers of further infestation by inclusion in the quarantine.

Had the federal quarantine been established, Illinois corn growers and shippers would have been prohibited from shipping ear corn outside the state except to such points already in the cornborer zone. Such action, likewise, would have made it possible for corn from the heavily infested areas to be imported into Illinois, thus increasing the danger to Illinois corn fields from this pest.

$10,000,000 Appropriation Passed

The bill appropriating $10,000,000 for the control of the borer was passed and signed by President Coolidge on Feb. 22. The act provides for control work in 76 counties in New York, Pennsylvania, Ohio, Michigan, and Indiana, in which the corn crop is threatened. Approximately 2,500,000 acres of corn land in these states will be included in the cleanup.

The federal fund provides for the payment of $2 per acre to farmers who are obliged to do extra work in cleaning up stalks, stubble, trash, etc., in stamping out the borer. Supplementary legislation by the states must be passed in the meantime to secure the advantages of the federal appropriation.

The state department of agriculture cooperating with W. P. Flint, state entomologist, and the state natural history survey framed a bill which was introduced in the Illinois legislature very recently. This bill contemplates a $100,000 appropriation for cornborer control, a portion of which will be used to reimburse farmers should their expenses for cleaning up infested fields exceed the amount allowed by the federal regulation plus $1.50 per acre.

The State Cornborer Committee, of which Geo. A. Fox is chairman, will seek to insure the passage of this bill.

Coolidge Politics Revealed In High Sounding Statements In New York Speech Before Election

Veto Abrogates Campaign Pledges of Party and Promises of President in February, 1924

(Editor's note:—Following is a letter addressed to President Coolidge by Sam H. Thompson, then president of the Illinois Agricultural Association in April 1924, seven months before the last presidential election.

The Honorable Calvin Coolidge,
President of the United States.
Dear Mr. President:

In your address to the people of the United States, delivered at New York on February 12, you presented a clear picture of the existing condition in agriculture and its effect on other parts of our national structure. You identified the cause when you said:

"To this depression there have been other contributing causes, but the main difficulty has been the price of farm products."

The situation unmistakably leads to this conclusion, and agriculturally-minded men endorse it.

You said on that occasion:

*"There is no sound policy which is narrow or sectional or limited. * * * When there is a difficulty which affects so large a population, so large an area, and so important an interest as that of agriculture, it is distinctly a national question."*

There is a real gleam of hope for agriculture in your great declaration in the Metropolis of America:

*"The people of these numerous States cast an enormous influence on the making of the laws by which you are governed. * * * This problem is not merely the problem of the agricultural section of our country, it is the problem of industry, of transportation, of commerce, and of banking."*

Your remarkable address from which we quote lays down before the Nation in language that may not be misunderstood the condition and the cause, and directs attention to the common responsibility of applying the remedy.

The hope of agriculture centers upon the principles contained in the McNary-Haugen Bill now before Congress. In brief, the substance of this measure is:

1. To enable the producers, through an agency created for them, to purchase or to contract with others to purchase, the exportable surplus of certain basic crops at the same exchange value compared with other commodities that obtained for a normally representative period prior to the war.
2. To protect that value by an adequate tariff.
3. To enable the producers to sell this surplus at the best prices ruling in the world markets.
4. To collect the loss thereon and the costs of operation, from the producer.
5. To return to the Treasury any funds advanced by it.

This measure rests upon the promise laid down in your New York address. It prescribes the remedy for the basic difficulty of discriminatory price. The objections that have thus far been advanced against it rest almost wholly upon misrepresentations of the plan. They are that this is price fixing; that it will impair or destroy existing agencies that perform useful functions; that a circulating medium of indeterminate value will ensue; that international complication will result; that increased production will follow. Not one of these objections will withstand the test of close analysis. They proceed mainly from one source out of which the element of selfish interest is not lacking. It is only fair that this organization of agricultural producers be permitted to observe that Julius Barnes, grain-exporter, should not be permitted to write the agricultural policies of America. From everywhere intellectual assent has been given to your proposition that agriculture is in distress and that a remedy is called for.

Have the objectors a better plan to accomplish the necessary end? If so, the common interest demands that they make it known.

With deepest appreciation of your great service in calling attention to the critical situation, we wish respectfully to ask you for further leadership in aiding as far as you properly can, the enactment into law of this measure that provides equality for agriculture in the network of protective legislation that supports industry, and finance, and labor, and transportation in our present-day structure.

Yours very respectfully,
ILLINOIS AGRICULTURAL ASSN.
S. H. Thompson,
President.

Corn Borer Bill Is Introduced In Illinois Legislature

Provides For State Payment To Farmers In Corn Borer Cleanup Work

A bill known as the "Insect Pest and Plant Disease Act" introduced by Rep. C. M. Turner in the House and by Senator Simon Lantz in the Senate provides among other things for the reimbursement by the state, of farmers who sustain a cost in excess of $1.50 per acre over and above all money received from the federal government while following out instructions or regulations of the state in eradicating the European corn borer.

The federal bill provides for reimbursing farmers to the extent of $2 per acre for such cleanup work. Thus if an Illinois farmer sustains a cost of more than $3.50 per acre in excess of regular farm practice while following state regulations in stopping the borer, the state according to the bill, will reimburse him for the excess cost. Funds will come out of the appropriation to the Department of Agriculture.

Provides for Quarantine

The Act likewise empowers the State Department of Agriculture to establish quarantines within the state to stop the dissemination of insect pests and plant diseases from an infested section to an uninfested. Preparatory to enforcing a quarantine the state must hold a public hearing allowing interested persons to come and be heard.

The proposed Act will take precedence over a similar one filed June 29, 1917.

Reply to Veto

(Continued from page 3)

mand are fairly balanced, prices will equate themselves in line with general prices and with general business conditions. In this equation other than basic commodities will find their level; thus there is no justification for the charge that it will destroy diversification or that it favors one crop at the expense of another.

There is no Government buying or selling; there is no price fixing by Government agency; there is no guarantee of profits to millers or packers. The board is directed to assist in removing or withholding or disposing of the surplus of the basic agricultural commodity by entering into agreements with cooperative associations engaged in handling the basic agricultural commodity, or with a corporation or association created by one or more of such cooperative associations, or with persons engaged in processing the basic agricultural commodity, or with other persons if there are no such competent cooperative agencies. Such agreements may properly provide for the payment of the losses, costs, and charges arising out of contracts dealing only with surplus. There is no interference with the balance of the crop.

Proponents of this legislation have never claimed that it is a cure for all the ills of agriculture. It is recognised that high costs of production, distribution, transportation, local and State taxes, and other causes must be addressed. It is claimed, however, that the bill would remove one of the major hindrances to agricultural recovery, i. e., the difficulty of equating supply to demand over a reasonable length of time, and of preventing excess supplies from demoralising markets—which otherwise would be profitable.

Five Times President

L. C. Warner, of Warner, was re-elected president of the Henry County Farm Bureau for the fifth consecutive year at its recent annual meeting. Mr. Warner was one of the early organizers of the farm bureau in that county. Under his able leadership, aided by strong executive committees and good advisers, the Henry County Farm Bureau has thrived consistently. Today it is one of the strongest county organizations in Illinois.

I. A. A. AUDIT SERVICE FAME SPREADS TO FAR EAST

A letter from Jerusalem, famous in Bible history as the capitol of Palestine, was received by the Illinois Agricultural Cooperatives Association recently asking for a copy of the "Analysis and Summary of 65 farmers elevators in Illinois."

The request came from the general manager of the Central Bank of Cooperative Institutions in Palestine, Ltd. Jewish farmers in Palestine are developing rapidly in cooperative marketing and are interested in all old and new ventures of this kind in this country. The same bank recently asked for a copy of the plan of the Illinois Milk Producers Association at Peoria.

LAMB AND CATTLE POOL FEEDERS WARNED

To secure the benefit of the feeding-in-transit rate wherever it is applicable it is necessary for the shipper to present his inbound freight bills to the local agent at the time he makes out his bill of lading for shipment to market, according to L. J. Quasey, director of transportation in a statement to livestock feeders who bought cattle and lambs in the feeder pools of 1926.

"If this is not done, technical rights to the feeding-in-transit rates are lost," states Quasey.

I. A. A. Seeks Gas Tax With Provision For Secondary Roads

SOME provision for improving our secondary roads as soon as possible with a portion of the funds derived from the proposed gas tax is the position taken by the Illinois Agricultural Association on this most important issue.

In declaring for the 75 per cent of the farmers of Illinois who now live on relatively unimproved road, the I. A. A. is following the sentiment of its members as expressed at the recent Peoria convention.

No particular bill has received official endorsement. But the gas tax has been accepted as a fair and equitable way of shifting at least part of the road tax burden on those who secure the most benefit.

President Earl C. Smith has compiled a great deal of useful information on the cost of completing the hard road system on the gas tax issue, and on general road matters in an effort to fairly represent the interests of the membership.

A compromise measure with certain recognition to the needs of farmers for better farm to market roads will undoubtedly be the outcome of the shuffle for disposition of the proposed gas tax funds.

In the meantime, the Chicago Motor Club is fighting a gas tax. It will secure some support downstate, but from all appearances the agricultural group in the legislature has the balance of power and will have the final say so on this issue.

HOW THE SENATE VOTED ON FARM BILL

For the bill—Republicans: Cameron, Capper, Curtis, Deneen, Frazier, Gooding, Gould, Harreld, Howell, Johnson, Jones of Washington, La Follette, McMaster, McNary, Means, Norris, Nye, Oddie, Pine, Robinson of Indiana, Schall, Stanfield, Stewart and Watson—24. Democrats: Ashurst, Bratton, Caraway, Copeland, Dill, Ferris, Fletcher, Hawes, Kendirck McKellar, Mayfield, Neely, Pittman, Ransdell, Robinson of Arkanssa, Sheppard, Simmons, Smith, Steck, Trammell, Tyson and Wheeler—22. Farmer-Labor: Shipstead—1. Total, 47.

Against the bill—Republicans: Bingham, Borah, Couzens, Dale, Ernst, Fess, Gillett, Goff, Greene, Hale, Keyes, Lenroot, McLean, Metcalf, Pepper, Phipps, Reed of Pennsylvania, Sackett, Shortridge, Warren, Weller and Willis—22. Democrats: Bayard, Blease, Bruce, Edwards, George, Gerry, Glass, Harris, Harrison, Fetlin, King, Overman, Reed of Missouri, Stephens, Underwood, Walsh of Massachusetts and Walsh of Montana—17.

Pairs were announced as follows: Broussard (D) for, with Moses (R.) against; Jones of New Mexico (D) for, with Wadsworth (R) against; Norbeck (R.) for, with Edge (R.) against.

McLEAN COUNTY MILK PRODUCERS ORGANIZE

At a recent meeting of the McLean County Milk Producers' Association Guy Hilton was elected President. Other officers for the coming year are as follows: W. F. Coolidge, vice-president; Jay J. Wright, secretary; Homer R. Johnson, treasurer. Directors are: Conrad Schaefer, J. W. Smith, Wm. Welch, Howard B. Mason and H. W. Enns.

Officers of the Woodford County Farm Bureau for 1927 are Joe Jochums, president, Fred Parks, vice-president, J. Ira Powell, secretary and Jo Major, treasurer.

I. A. A. Executives Vote to Adopt New Organization Plan

State To Be Divided Into Eight Districts With Man In Charge of Each

A DEFINITE step toward a larger state organization was taken by the Executive Committee of the I. A. A. at its meeting on Mar. 10-11 when a plan providing for the employment of eight district managers to supervise organization work in the state was formally adopted.

The plan will go into effect at once and district managers are to be selected as soon as convenient to coordinate the organization work in every county in Illinois.

Under the new arrangement which has been under advisement for more than a year, a force of full-time managers will be placed in the field under Director G. E. Metzger, whose business it will be to help or direct county farm bureau drives, organize leadership, and give assistance toward building up a more effective and representative organization in counties and communities needing assistance.

The field force will be chosen by Mr. Metzger subject to the approval of the officers and Executive Committee. The new managers will be chosen entirely on their merits. All political considerations will be waived aside in their selection. The force will be divorced from participation in any of the politcal aspects of the organization and trained in the act of building effective membership selling groups in every community, township, and county.

The new managers will establish residence in a conveniently located city near the center of the district from which they will be within easy driving distance of the counties. Moderate salaries, and per diem expenses while out on the road are provided in the new plan.

The change in policy came following a general recognition that maintaining an organization with an adequate membership to make it effective is a year 'round job. Under the new arrangement of field forces a group of skilled and trained men will be at work 12 months a year seeking and developing leaders and new thoughts toward making the county farm bureaus and the I. A. A. more representative and effective in every county.

C. W. Wray Is New Field Secretary For Illinois Holstein Ass'n

C. W. WRAY of Lake county will take care of all calls for field service for the Illinois Holstein-Friesian Association in the coming year. This announcement was made at the last directors meeting of the Association.

Mr. Wray has been an officer in the state Holstein breeders association for the past two years. He operates a purebred Holstein herd and a 120 acre dairy farm at the present time. At the urgent request of his executive committee he agreed to devote part of his time to field work in the interest of the organization.

Mr. Wray is a graduate of the University of Illinois, class of 1916, where he specialized in dairying. Previous to operating his own farm in Lake county, he managed dairy farms in Pennsylvania and Indiana. He will give assistance to counties on forming Holstein calf clubs, cow testing associations, sales, registry and transfer information, and in helping to locate and select breeding stock for members.

Farmers elevator accounting will be the subject of a talk by Geo. R. Wicker of the Illinois Agricultural Association during the Grain Dealers' Short Course at Purdue University, Lafayette, Ind., on Mar. 16.

I. A. A. SAVES FARMERS OF ILLINOIS $60,000 ON LIMESTONE RATES

John H. Walker State Labor Head Asks Farm Backing

Points To Improvement In Relations Between Agriculture and Labor

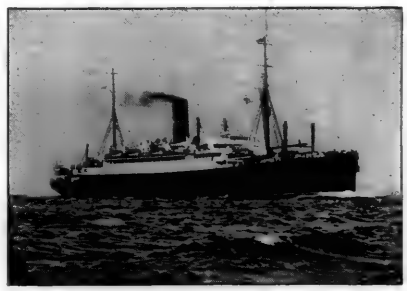
"WITH THE passing of the old style institute and the formation of the present Illinois Agricultural Association and the county farm bureau system, relations between labor and agriculture have steadily improved," declared John H. Walker, president of the Illinois State Federation of Labor in a recent speech before a state labor conference at Champaign.

"The old farmers organizations were not representative of the actual farmers at all," said the speaker. "The officers invariably were the largest landowners of the county concerned and often did not even live on their farm lands. The farmers, the ones who faced the real problems, had little or no authority in determining the policies of their organizations. Worst of all they were poisoned against labor when they should have been working with labor for mutual aims.

Wrong Idea

"They had the idea too that the Federation was after wages and interested only in that. Labor knew long ago that its interests and its prosperity were dependent upon the interests and prosperity of agriculture. But farmers' minds were so poisoned against labor that the goal of cooperation is not reached even yet.

"It is indicative of a more sympathetic understanding between the two organizations that the Illinois Agricultural Association sent two authorized delegates to the last convention of the State Federation of Labor at Streator. That, I believe was the first time in the history of the Federation that agriculture was officially represented at a Federation convention. These delegates remained throughout the convention. They learned of the problems and ideals of labor and presented those of agriculture. Their presence represents a long stride in improved relations between the two organizations.



Whole-Hearted Welcome

"I attended the state convention of the Illinois Agricultural Association at Peoria a short time ago and I venture to say that no other speaker was given the whole-hearted welcome I received. That proved conclusively that labor and agriculture are well along the road to understanding. There are fine men at the head of the Illinois Agricultural Association and I have a great admiration for their work and that of the association."

EGYPTIAN SEED GROWERS SELL MUCH RED TOP

Eighteen carloads of cleaned red top seed and five carloads of uncleaned seed were handled by the Egyptian Seed Growers Exchange in 1926 according to Curt Anderson, manager. The first nine and one-half cars brought approximately 25½c per pound gross and five cars more averaged between 22 and 23½ cents. These prices were realized when independent buyers were offering farmers around 16½ and 17 cents per pound.

The Seed Growers Exchange owns its own building and equipment with a capital investment of approximately $20,000. It has close to 800 members.

S. S. Aurania

No Money Allowed For Expenses On European Tour, I. A. A. Committee Decides

Party Proposes to Leave New York, July 30, for Isle of Jersey, Germany, Denmark, and Other Points on S. S. Aurania

NO farm bureau money will be spent to send any delegates or officials to Europe on the proposed 1927 American Farm Bureau Federation Pilgrimage, according to a decision of the Executive Committee of the I. A. A. at a recent meeting. This announcement is made following reports from downstate to the effect that officers and delegates from the I. A. A. and the American Farm Bureau would make the trip at the expense of the membership.

The American Farm Bureau Federation arranged the tour "to provide a unique and unusual opportunity to farm people desiring to visit Europe; to make the trip in the company of congenial companions and under favorable circumstances." According to the A. F. B. F. the tour was arranged to meet what it considers is a general demand for such a pilgrimage. It states that the U. S. Department of Agriculture has received many requests from farm people asking what particular points of agricultural interest could be viewed.

Kronborg—The Castle of the Legend of Hamlet at Helsingor (Shakespeare's "Elsinore")

The proposed voyage and tour is expected to start from New York on the S. S. "Aurania" on July 30.

The first stop will be made at the Island of Jersey where a day will be spent visiting the herds and breeding establishments for which the island is famous. The boat will land at Helgoland, the famous German North Sea fortress the next day. From there the party will continue to Cuxhaven and Hamburg, by train, and thence across the famous Kiel Canal to visit the Agricultural Experiment Station at Askov and the Royal Agricultural School at Brorup.

A motor trip will be provided through the most fertile sections of Denmark near Odense, followed by a train ride to Copenhagen and another motor trip up the east coast of Denmark. At Frederikssund the 51 cooperative slaughter houses will be visited. On the return trip to Copenhagen the seed exchange and cathedral at Roskilde will be seen.

The party will continue from here on in to Germany to Berlin, Potsdam, and Frankfort. The steamer trip down the Rhine from the docks at Mainz to Cologne is said to be one of the most picturesque in the world.

Four days will be spent in Holland. A part of this time will be devoted to things of scenic and historic interest and the remainder to Agricultural methods.

The week in Paris will be devoted to sight-seeing. Trips will be made to the great art galleries, cathedrals, parks, to the American battle fields of Chateau Thierry and Rheims, and a day will be spent at Malmaison, the home of Napoleon and the Palace at Versailles where the peace treaty was signed.

The schedule provides for two weeks in England. One will be spent in London and vicinity. On the journey to Scotland, stops will be made to see the Shakespeare country, the Liverpool Cotton Exchange and the famous Manchester Ship Canal. Headquarters in Scotland will be set up at Edinburg. The main tour will end here and the first sailings home will be scheduled from Glasgow to Montreal or from Liverpool to New York.

In all seven countries and their capitols and 43 cities and towns will be visited. Sixty-seven thousand miles will be traveled by steamer, 2500 by train, and 550 by car.

Reservations may be secured by an advance deposit of $60 to the American Farm Bureau Federation. The balance of $925 will be due four weeks before sailing.

Recent Ruling Of Commerce Commission Upholds Association

Quarry Representatives Appear in Support of Low Rate For Farmers on Fertilizer

A SAVING of 30 cents a ton net on one-third of all agricultural limestone used in Illinois will be realized by farmers as a result of the recent decision of the Illinois Commerce Commission in upholding the application of the combination rule on shipments of limestone. This will amount to approximately $60,000 annually it is estimated if the 1926 figures are used in the calculation.

Following a recent appeal by the railroads asking that the combination rule be cancelled, the I. A. A. through its transportation department, protested showing the importance of preserving a low rate on limestone to help farmers maintain and improve soil fertility. Representatives of all the larger limestone companies appeared before the Commission at the call of the I. A. A. in support of its stand.

In making its decision in this controversy, the Commission said, "No effort has been made to justify the increased rates resulting from the proposed cancellation of the Kelly Combination rule. Until such time as joint through rates are published to apply on all traffic, or until such time as the carriers present evidence to show that the resulting through charges are just and reasonable, we conclude and find that the Kelly Combination Rule should continue in effect."

During 1926, Illinois farmers most of whom were farm bureau members bought approximately 650,000,000 tons of agricultural limestone for soil improvement purposes. At least 200,000,000 tons, based on last year's business, will be effected by the new ruling so as to secure the advantages of a much lower rate on shipments travelling over more than one line.

Producers In First Place at Chicago and St. Louis Stock Yards

Chicago Association Breaks All Records With 13.37 Per Cent of U. S. Yards Receipts

THE CHICAGO and East St. Louis Producers Commission Associations have consistently led all other houses in these two terminals in recent weeks. Producers at the National Stock Yards has led that market since its organization but its business reached 22.5 per cent of the total receipts the week ending February 25. The following week 231 cars representing 19.2 per cent of total receipts were received.

Likewise the Chicago Producers crept up during February to first place where it has remained consistently since then. The high point was reached on Feb. 3 when 116 cars representing 11.8 per cent of the entire Chicago receipts went into the Producers alleys. This record stood only one day, for on Friday, the day following, 73 cars representing 13.37 per cent of the total receipts came in. The best week's business was 396 cars received the first week in February which was 144 cars more than were handled by any other firm.

Gross sales of the Chicago Producers aggregated $26,738,100.91 in 1926, for the total of 13,005 carloads of livestock received. Receipts comprised 6.2 per cent of all livestock shipped to the Union Stockyards. The largest receipts were in hogs which averaged eight per cent of all receipts. Gross purchases of feeder cattle, calves, and lambs, amounted to $1,282,513.46. This business increased 25 per cent for cattle and calves and 35 per cent for sheep during the past year.

The East St. Louis Producers gained 1228 cars in 1926 over the 1925 record. The total cars received for the year aggregated 13,599 compared with 12,371 for 1925. Receipts in 1926 were 17.6 per cent of the saleable stock sold on this market. Net earnings were $70,258.95, estimated savings made from reducing commissions $58,510.13, or a total of $128,769.08. Illinois led all states with 4,775 cars.

The Adams county, Illinois, Shipping Association led all county associations with 728 cars on which it received a patronage refund of $2,059.09. The Columbia Cooperative Shipping Association of Columbia, Mo., led all individual associations in the number of cars shipped to the St. Louis Producers with 300 cars on which the refund amounted to $792.24.

The St. Louis Producers have commission rates approximately 20 per cent lower than other firms on that market.

1000 Bu. Seed Corn Bought For Flooded Out Valley Farmers

One thousand bushels of high test seed corn was brought for distribution to flood sufferers in the counties adjoining the Illinois valley flood area according to Robt. A. Cowles of the Illinois Agricultural Association who is assisting the farm bureaus of Menard, Fulton, Mason, Schuyler, Morgan, Scott, Brown, Cass, Pike, and Greene counties in meeting the needs of their people.

R A. Cowles

This action followed a meeting of the farm advisers and Mr. Cowles at Jacksonville on Feb. 24. Distribution of the seed will be made according to needs and the funds available for this purpose. The committee in charge will make an effort to see that every worthy candidate for aid is supplied with seed corn.

It is pointed out that thousands of acres of flooded lands will be unfit for recropping this spring, while others are still submerged, unreclaimed from the floods.

Mr. Cowles expects to make an extended trip through the flood areas within the next two weeks assisting in apportioning aid where most needed and expending funds for seed corn where it will do the most good.

Applications for aid made to the county farm bureaus will be investigated and help given where needed.

Farm taxes take more than half the rents of farms in the lower peninsula of Michigan, the State College announced following its survey of 1133 farms. Taxes average 52 per cent of the net rents to farm owners between 1919-25.

Coolidge Politics Revealed In High Sounding Statements In New York Speech Before Election

Veto Abrogates Campaign Pledges of Party and Promises of President in February, 1924

(Editor's note:—Following is a letter addressed to President Coolidge by Sam H. Thompson, then president of the Illinois Agricultural Association in April 1924, seven months before the last presidential election.

The Horonable Calvin Coolidge,
President of the United States.
Dear Mr. President:

In your address to the people of the United States, delivered at New York on February 12, you presented a clear picture of the existing condition in agriculture and its effect on other parts of our national structure. You identified the cause when you said:

"To this depression there have been other contributing causes, but the main difficulty has been the price of farm products."

The situation unmistakably leads to this conclusion, and agriculturally-minded men endorse it.

You said on that occasion:

*"There is no sound policy which is narrow or sectional or limited. * * * When there is a difficulty which affects so large a population, so large an area, and so important an interest as that of agriculture, it is distinctly a national question."*

There is a real gleam of hope for agriculture in your great declaration in the Metropolis of America:

*"The people of these numerous States cast an enormous influence on the making of the laws by which you are governed. * * * This problem is not merely the problem of the agricultural section of our country, it is the problem of industry, of transportation, of commerce, and of banking."*

Your remarkable address from which we quote lays down before the Nation in language that may not be misunderstood the condition and the cause, and directs attention to the common responsibility of applying the remedy.

The hope of agriculture centers upon the principles contained in the McNary-Haugen Bill now before Congress. In brief, the substance of this measure is:

1. To enable the producers, through an agency created for them, to purchase or to contract with others to purchase, the exportable surplus of certain basic crops at the same exchange value compared with other commodities that obtained for a normally representative period prior to the war.
2. To protect that value by an adequate tariff.
3. To enable the producers to sell this surplus at the best prices ruling in the world markets.
4. To collect the loss thereon and the costs of operation, from the producer.
5. To return to the Treasury any funds advanced by it.

This measure rests upon the promise laid down in your New York address. It prescribes the remedy for the basic difficulty of discriminatory price. The objections that have thus far been advanced against it rest almost wholly upon misrepresentations of the plan. They are that this is price fixing; that it will impair or destroy existing agencies that perform useful functions; that a circulating medium of indeterminate value will ensue; that international complication will result; that increased production will follow. Not one of these objections will withstand the test of close analysis. They proceed mainly from one source out of which the element of selfish interest is not lacking. It is only fair that this organization of agricultural producers be permitted to observe that Julius Barnes, grain-exporter, should not be permitted to write the agricultural policies of America. From everywhere intellectual assent has been given to your proposition that agriculture is in distress and that a remedy is called for.

Have the objectors a better plan to accomplish the necessary end? If so, the common interest demands that they make it known.

With deepest appreciation of your great service in calling attention to the critical situation, we wish respectfully to ask you for further leadership in aiding as far as you properly can, the enactment into law of this measure that provides equality for agriculture in the network of protective legislation that supports industry, and finance, and labor, and transportation in our present-day structure.

LAMB AND CATTLE POOL FEEDERS WARNED

To secure the benefit of the feeding-in-transit rate wherever it is applicable it is necessary for the shipper to present his inbound freight bills to the local agent at the time he makes out his bill of lading for shipment to market, according to L. J. Quasey, director of transportation in a statement to livestock feeders who bought cattle and lambs in the feeder pools of 1926.

"If this is not done, technical rights to the feeding-in-transit rates are lost," states Quasey.

I. A. A. Seeks Gas Tax With Provision For Secondary Roads

SOME provision for improving our secondary roads as soon as possible with a portion of the funds derived from the proposed gas tax is the position taken by the Illinois Agricultural Association on this most important issue.

In declaring for the 75 per cent of the farmers of Illinois who now live on relatively unimproved road, the I. A. A. is following the sentiment of its members as expressed at the recent Peoria convention.

No particular bill has received official endorsement. But the gas tax has been accepted as a fair and equitable way of shifting at least part of the road tax burden on those who secure the most benefit.

President Earl C. Smith has compiled a great deal of useful information on the cost of completing the hard road system on the gas tax issue, and on general road matters in an effort to fairly represent the interests of the membership.

A compromise measure with certain recognition to the needs of farmers for better farm to market roads will undoubtedly be the outcome of the shuffle for disposition of the proposed gas tax funds.

In the meantime, the Chicago Motor Club is fighting a gas tax. It will secure some support downstate, but from all appearances the agricultural group in the legislature has the balance of power and will have the final say so on this issue.

HOW THE SENATE VOTED ON FARM BILL

For the bill—Republicans: Cameron, Capper, Curtis, Deneen, Frazier, Gooding, Gould, Harreld, Howell, Johnson, Jones of Washington, La Follette, McMaster, McNary, Means, Norris, Nye, Oddie, Pine, Robinson of Indiana, Schall, Stanfield, Stewart and Watson—24. Democrats: Ashurst, Bratton, Caraway, Copeland, Dill, Ferris, Fletcher, Hawes, Kendirck McKellar, Mayfield, Neely, Pittman, Ransdell, Robinson of Arkansas, Sheppard, Simmons, Smith, Steck, Trammell, Tyson and Wheeler—22. Farmer-Labor: Shipstead—1. Total, 47.

Against the bill—Republicans: Bingham, Borah, Couzens, Dale, Ernst, Fess, Gillett, Goff, Greene, Hale, Keyes, Lenroot, McLean, Metcalf, Pepper, Phipps, Reed of Pennsylvania, Sackett, Shortridge, Warren, Weller and Willis—22. Democrats: Bayard, Blease, Bruce, Edwards, George, Gerry, Glass, Harris, Harrison, Feflin, King, Overman, Reed of Missouri, Stephens, Underwood, Walsh of Massachusetts and Walsh of Montana—17.

Pairs were announced as follows: Broussard (D) for, with Moses (R.) against; Jones of New Mexico (D) for, with Wadsworth (R) against; Norbeck (R.) for, with Edge (R.) against.

McLEAN COUNTY MILK PRODUCERS ORGANIZE

At a recent meeting of the McLean County Milk Producers' Association Guy Hilton was elected President. Other officers for the coming year are as follows: W. F. Coolidge, vice-president; Jay J. Wright, secretary; Homer R. Johnson, treasurer. Directors are: Conrad Schaefer, J. W. Smith, Wm. Welch, Howard B. Mason and H. W. Enns.

Officers of the Woodford County Farm Bureau for 1927 are Joe Jochums, president, Fred Parks, vice-president, J. Ira Powell, secretary and Jo Major, treasurer.

I. A. A. Executives Vote to Adopt New Organization Plan

State To Be Divided Into Eight Districts With Man In Charge of Each

A DEFINITE step toward a larger state organization was taken by the Executive Committee of the I. A. A. at its meeting on Mar. 10-11 when a plan providing for the employment of eight district managers to supervise organization work in the state was formally adopted.

The plan will go into effect at once and district managers are to be selected as soon as convenient to coordinate the organization work in every county in Illinois.

Under the new arrangement which has been under advisement for more than a year, a force of full-time managers will be placed in the field under Director G. E. Metzger, whose business it will be to help or direct county farm bureau drives, organize leadership, and give assistance toward building up a more effective and representative organization in counties and communities needing assistance.

The field force will be chosen by Mr. Metzger subject to the approval of the officers and Executive Committee. The new managers will be chosen entirely on their merits. All political considerations will be waived aside in their selection. The force will be divorced from participation in any of the politcal aspects of the organization and trained in the act of building effective membership selling groups in every community, township, and county.

The new managers will establish residence in a conveniently located city near the center of the district from which they will be within easy driving distance of the counties. Moderate salaries, and per diem expenses while out on the road are provided in the new plan.

The change in policy came following a general recognition that maintaining an organization with an adequate membership to make it effective is a year 'round job. Under the new arrangement of field forces a group of skilled and trained men will be at work 12 months a year seeking and developing leaders and new thoughts toward making the county farm bureaus and the I. A. A. more representative and effective in every county.

C. W. Wray Is New Field Secretary For Illinois Holstein Ass'n

C. W. WRAY of Lake county will take care of all calls for field service for the Illinois Holstein-Friesian Association in the coming year. This announcement was made at the last directors meeting of the Association.

Mr. Wray has been an officer in the state Holstein breeders association for the past two years. He operates a purebred Holstein herd and a 120 acre dairy farm at the present time. At the urgent request of his executive committee he agreed to devote part of his time to field work in the interest of the organization.

Mr. Wray is a graduate of the University of Illinois, class of 1916, where he specialized in dairying. Previous to operating his own farm in Lake county, he managed dairy farms in Pennsylvania and Indiana. He will give assistance to counties on forming Holstein calf clubs, cow testing associations, sales, registry and transfer information, and in helping to locate and select breeding stock for members.

Farmers elevator accounting will be the subject of a talk by Geo. R. Wicker of the Illinois Agricultural Association during the Grain Dealers' Short Course at Purdue University, Lafayette, Ind., on Mar. 16.

I. A. A. SAVES FARMERS OF ILLINOIS $60,000 ON LIMESTONE RATES

John H. Walker State Labor Head Asks Farm Backing

Points To Improvement In Relations Between Agriculture and Labor

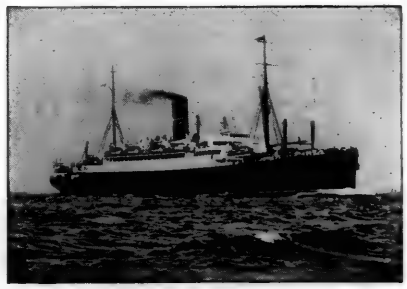
"WITH THE passing of the old style institute and the formation of the present Illinois Agricultural Association and the county farm bureau system, relations between labor and agriculture have steadily improved," declared John H. Walker, president of the Illinois State Federation of Labor in a recent speech before a state labor conference at Champaign.

"The old farmers organizations were not representative of the actual farmers at all," said the speaker. "The officers invariably were the largest landowners of the county concerned and often did not even live on their farm lands. The farmers, the ones who faced the real problems, had little or no authority in determining the policies of their organizations. Worst of all they were poisoned against labor when they should have been working with labor for mutual aims.

Wrong Idea

"They had the idea too that the Federation was after wages and interested only in that. Labor knew long ago that its interests and its prosperity were dependent upon the interests and prosperity of agriculture. But farmers' minds were so poisoned against labor that the goal of cooperation is not reached even yet.

"It is indicative of a more sympathetic understanding between the two organizations that the Illinois Agricultural Association sent two authorized delegates to the last convention of the State Federation of Labor at Streator. That, I believe was the first time in the history of the Federation that agriculture was officially represented at a Federation convention. These delegates remained throughout the convention. They learned of the problems and ideals of labor and presented those of agriculture. Their presence represents a long stride in improved relations between the two organizations.



Whole-Hearted Welcome

"I attended the state convention of the Illinois Agricultural Association at Peoria a short time ago and I venture to say that no other speaker was given the whole-hearted welcome I received. That proved conclusively that labor and agriculture are well along the road to understanding. There are fine men at the head of the Illinois Agricultural Association and I have a great admiration for their work and that of the association."

EGYPTIAN SEED GROWERS SELL MUCH RED TOP

Eighteen carloads of cleaned red top seed and five carloads of uncleaned seed were handled by the Egyptian Seed Growers Exchange in 1926 according to Curt Anderson, manager. The first nine and one-half cars brought approximately 25½c per pound gross and five cars more averaged between 22 and 23½ cents. These prices were realized when independent buyers were offering farmers around 16½ and 17 cents per pound.

The Seed Growers Exchange owns its own building and equipment with a capital investment of approximately $20,000. It has close to 800 members.

S. S. Aurania

No Money Allowed For Expenses On European Tour, I. A. A. Committee Decides

Party Proposes to Leave New York, July 30, for Isle of Jersey, Germany, Denmark, and Other Points on S. S. Aurania

NO farm bureau money will be spent to send any delegates or officials to Europe on the proposed 1927 American Farm Bureau Federation Pilgrimage, according to a decision of the Executive Committee of the I. A. A. at a recent meeting. This announcement is made following reports from downstate to the effect that officers and delegates from the I. A. A. and the American Farm Bureau would make the trip at the expense of the membership.

The American Farm Bureau Federation arranged the tour "to provide a unique and unusual opportunity to farm people desiring to visit Europe; to make the trip in the company of congenial companions and under favorable circumstances." According to the A. F. B. F. the tour was arranged to meet what it considers is a general demand for such a pilgrimage. It states that the U. S. Department of Agriculture has received many requests from farm people asking what particular points of agricultural interest could be viewed.

Kronborg—The Castle of the Legend of Hamlet at Helsingor (Shakespeare's "Elsinore")

The proposed voyage and tour is expected to start from New York on the S. S. "Aurania" on July 30.

The first stop will be made at the Island of Jersey where a day will be spent visiting the herds and breeding establishments for which the island is famous. The boat will land at Helgoland, the famous German North Sea fortress the next day. From there the party will continue to Cuxhaven and Hamburg, by train, and thence across the famous Kiel Canal to visit the Agricultural Experiment Station at Askov and the Royal Agricultural School at Brorup.

A motor trip will be provided through the most fertile sections of Denmark near Odense, followed by a train ride to Copenhagen and another motor trip up the east coast of Denmark. At Frederikssund the 51 cooperative slaughter houses will be visited. On the return trip to Copenhagen the seed exchange and cathedral at Roskilde will be seen.

The party will continue from here on in to Germany to Berlin, Potsdam, and Frankfort. The steamer trip down the Rhine from the docks at Mainz to Cologne is said to be one of the most picturesque in the world.

Four days will be spent in Holland. A part of this time will be devoted to things of scenic and historic interest and the remainder to Agricultural methods.

The week in Paris will be devoted to sight-seeing. Trips will be made to the great art galleries, cathedrals, parks, to the American battle fields of Chateau Thierry and Rheims, and a day will be spent at Malmaison, the home of Napoleon and the Palace at Versailles where the peace treaty was signed.

The schedule provides for two weeks in England. One will be spent in London and vicinity. On the journey to Scotland, stops will be made to see the Shakespeare country, the Liverpool Cotton Exchange and the famous Manchester Ship Canal. Headquarters in Scotland will be set up at Edinburg. The main tour will end here and the first sailings home will be scheduled from Glasgow to Montreal or from Liverpool to New York.

In all seven countries and their capitols and 43 cities and towns will be visited. Sixty-seven thousand miles will be traveled by steamer, 2500 by train, and 550 by car.

Reservations may be secured by an advance deposit of $60 to the American Farm Bureau Federation. The balance of $925 will be due four weeks before sailing.

Recent Ruling Of Commerce Commission Upholds Association

Quarry Representatives Appear in Support of Low Rate For Farmers on Fertilizer

A SAVING of 30 cents a ton net on one-third of all agricultural limestone used in Illinois will be realized by farmers as a result of the recent decision of the Illinois Commerce Commission in upholding the application of the combination rule on shipments of limestone. This will amount to approximately $60,000 annually it is estimated if the 1926 figures are used in the calculation.

Following a recent appeal by the railroads asking that the combination rule be cancelled, the I. A. A. through its transportation department, protested showing the importance of preserving a low rate on limestone to help farmers maintain and improve soil fertility. Representatives of all the larger limestone companies appeared before the Commission at the call of the I. A. A. in support of its stand.

In making its decision in this controversy, the Commission said, "No effort has been made to justify the increased rates resulting from the proposed cancellation of the Kelly Combination rule. Until such time as joint through rates are published to apply on all traffic, or until such time as the carriers present evidence to show that the resulting through charges are just and reasonable, we conclude and find that the Kelly Combination Rule should continue in effect."

During 1926, Illinois farmers most of whom were farm bureau members bought approximately 650,000,000 tons of agricultural limestone for soil improvement purposes. At least 200,000,000 tons, based on last year's business, will be effected by the new ruling so as to secure the advantages of a much lower rate on shipments travelling over more than one line.

Producers In First Place at Chicago and St. Louis Stock Yards

Chicago Association Breaks All Records With 13.37 Per Cent of U. S. Yards Receipts

THE CHICAGO and East St. Louis Producers Commission Associations have consistently led all other houses in these two terminals in recent weeks. Producers at the National Stock Yards has led that market since its organization but its business reached 22.5 per cent of the total receipts the week ending February 25. The following week 231 cars representing 19.2 per cent of total receipts were received.

Likewise the Chicago Producers crept up during February to first place where it has remained consistently since then. The high point was reached on Feb. 3 when 116 cars representing 11.8 per cent of the entire Chicago receipts went into the Producers alleys. This record stood only one day, for on Friday, the day following, 73 cars representing 13.37 per cent of the total receipts came in. The best week's business was 396 cars received the first week in February which was 144 cars more than were handled by any other firm.

Gross sales of the Chicago Producers aggregated $26,738,100.91 in 1926, for the total of 13,005 carloads of livestock received. Receipts comprised 6.2 per cent of all livestock shipped to the Union Stockyards. The largest receipts were in hogs which averaged eight per cent of all receipts. Gross purchases of feeder cattle, calves, and lambs amounted to $1,282,513.46. This business increased 25 per cent for cattle and calves and 35 per cent for sheep during the past year.

The East St. Louis Producers gained 1228 cars in 1926 over the 1925 record. The total cars received for the year aggregated 13,599 compared with 12,371 for 1925. Receipts in 1926 were 17.6 per cent of the saleable stock sold on this market. Net earnings were $70,258.95, estimated savings made from reducing commissions $58,510.13, or a total of $128,769.08. Illinois led all states with 4,775 cars.

The Adams county, Illinois, Shipping Association led all county associations with 728 cars on which it received a patronage refund of $2,059.09. The Columbia Cooperative Shipping Association of Columbia, Mo., led all individual associations in the number of cars shipped to the St. Louis Producers with 300 cars on which the refund amounted to $792.24.

The St. Louis Producers have commission rates approximately 20 per cent lower than other firms on that market.

1000 Bu. Seed Corn Bought For Flooded Out Valley Farmers

One thousand bushels of high test seed corn was brought for distribution to flood sufferers in the counties adjoining the Illinois valley flood area according to Robt. A. Cowles of the Illinois Agricultural Association who is assisting the farm bureaus of Menard, Fulton, Mason, Schuyler, Morgan, Scott, Brown, Cass, Pike, and Greene counties in meeting the needs of their people.

R. A. Cowles

This action followed a meeting of the farm advisers and Mr. Cowles at Jacksonville on Feb. 24. Distribution of the seed will be made according to needs and the funds available for this purpose. The committee in charge will make an effort to see that every worthy candidate for aid is supplied with seed corn.

It is pointed out that thousands of acres of flooded lands will be unfit for recropping this spring, while others are still submerged, unreclaimed from the floods.

Mr. Cowles expects to make an extended trip through the flood areas within the next two weeks assisting in apportioning aid where most needed and expending funds for seed corn where it will do the most good.

Applications for aid made to the county farm bureaus will be investigated and help given where needed.

Farm taxes take more than half the rents of farms in the lower peninsula of Michigan, the State College announced following its survey of 1133 farms. Taxes average 52 per cent of the net rents to farm owners between 1919-25.

Veto Leaves Farmer In Hole

Congressman Chas. Brand

"THE President's veto leaves the farmer in the hole—the hole of unequal legislative treatment," declared Congressman Chas. Brand of Ohio following President Collidge's veto of the McNary-Haugen bill.

"Industries have their tariff; railroads have their transportation act; banks have their federal reserve act; labor has its immigration law and the eight hour day law and those laws work to lift those groups above world conditions, but the farmer, for the most part, is competing with the world and trying to buy from those groups whose prices have artificially been raised by legislation. We have worked hard for four years writing a measure to bring about equality and we have answered every argument that has been offered by the President in a way so satisfactory that a majority of the members of Congress have been convinced and converted to approval of the bill . . . . .

Weakness and Strength

The McNary-Haugen Bill will raise the prices of farm products, and that is its weakness and its strength.

If we could present a bill which would secure equality for agriculture, and at the same time guarantee no advance in food prices all the objections would be waived and everybody, including the President, would be favorable to the bill.

I think farm prices can be raised to the extent of the tariff without advancing the price of food but I cannot prove that until the bill is in operation but if food prices were raised, it would be absolutely fair because the prices of other things have already been artificially raised by legislation. The battle of the farmer to save himself from this unequal situation will be intensified by the veto and all those who believe in equality of treatment will join the farmers, and all those directly or indirectly affected by farm conditions.

Although only six basic commodities are considered in the beginning yet all agricultural products would have been affected by the operation of the bill because the products of agriculture are largely interchangeable and substitutes for each other. The six basic commodities, mentioned in the bill, are the ones suffering most from surplus conditions and are the ones most needing the operation of the measure. Others may be added by Congress upon the request of the Agricultural Board.

The veto is a sectional decision because the vote shows that only the north-eastern section of the country is to any great extent opposed.

Nineteen more counties in 11 states were recently added to the modified T. B. accredited area for having less than one-half of one per cent infection in livestock. Crawford county was the only new addition to the tuberculosis free list in Illinois.

Marshall-Putnam First, Hancock Second In Publicity Contest

The Marshall-Putnam County Farm Bureau won first and Hancock second in the publicity contest for the Sam Thompson trophy which closed Feb. 15. Eight counties were entered including the two mentioned above, Henry, Vermillion, Peoria, Pulaski, Montgomery, and Madison.

The purpose of the contest was to determine which county farm bureau in Illinois is offering the most varied and effective publicity and news service. The volume and quality of clippings from newspapers, the official farm bureau paper, publicity stunts, number of speeches and radio talks made, state-wide publicity secured through farm papers, as well as other factors were taken into consideration.

The Marshall-Putnam Bureau sends a release with five to ten stories every Saturday to all the newspapers in the county. In addition it publishes a good monthly paper full of short, concise, interesting news about the bureau and its members. Moving pictures of farm activities are taken by F. E. Fuller, the adviser and shown at community meetings. Numerous speeches and radio talks are made advertising the organization.

Hancock county, J. H. Lloyd adviser, placed second, while Henry and Vermillion were honorably mentioned for their creditable exhibits and thoroughness in advertising the farm bureau. All the counties entered in the contest are above the average over the state in publicity service.

The judging committee follows: Sam H. Thompson, president American Farm Bureau Federation, C. V. Gregory, editor Prairie Farmer, Fred L. Petty, associate editor, Orange Judd Illinois Farmer, W. W. Loomis, editor Citizen, La Grange, who acted for H. L. Williamson, secretary Illinois Press Association, F. L. Keilholz, director of publicity, Illinois College of Agriculture, L. R. Marchant, farm adviser, Knox County, and E. G. Thiem, director of information, Illinois Agricultural Association.

COUNTY FARM BUREAUS CONTRACT 1927 SERUM

Signed contracts for serum and virus from practically every county engaged in hog cholera control work were received by the Livestock Marketing Department by Mar. 1. Eight companies including the American Serum Co., at Denver and Sioux City, the Anchor Serum Co., St. Joseph, Mo., the Browner Serum Co., Converse, Mo., the Denver Hog Serum Co., Denver, the Fidelity Laboratories, Chicago, the St. Joseph Veterinary Lab., St. Joseph, Mo., and the Swine Breeders Co. at Thorntown, Ind., bid on the county farm bureau business this year. Quotations varied from 57½ cents per 100 c.c. to 85 cents depending upon the terms of the order and the grade of serum purchased. The bulk of the business was placed at prices ranging less than 75 cents net per 100 c. .e to the farm bureau.

ILLINOIS FARM SUPPLY CO. FORMED

Th Illinois Farm Supply Co., Cooperative, was organized at a meeting of stockholders, and representatives of the local and county co-operative oil companies in Chicago last week to do a centralized purchasing service in petroleum products.

The company has applied for its charter under the cooperative act of 1923, with authorized capital stock of $250,000. There are 10 farmer-owned cooperative oil companies operating at the present time. Seven more are in the process of organization. The 17 companies will do an estimated business of $1,500,000 to $2,000,000 annually.

Ohio Farmers Profit Last Year by Selling Eggs Cooperatively in Pool

Members Secure $12.46 Profit Each Over Local Buying Prices, Year's Records Show

BY FRANK A. GOUGLER.

A RECENT study of the 1926 returns made by the Ohio Poultry and Egg Marketing Association, reveals that the average profit per member for the year was $12.46 net over what he would have received from local buyers.

Frank A. Gougler

The following table shows the volume shipped, and the loss or gain per dozen over prices offered by local buyers by two-week periods.

Semi-monthly pools	Dozens	Profit or loss in cents for each pool
Jan. 1-15	30,000	—5
Jan. 16-31	35,000	plus 3
Feb. 1-15	45,000	—2
Feb. 16-28	50,000	—1
Mar. 1-15	57,560	plus 1
Mar. 16-31	60,000	plus 1
Apr. 1-15	77,618	0
Apr. 16-30	92,000	plus 1
May 1-15	94,888	—1
May 16-31	84,929	—2
June 1-15	85,901	plus 1
June 16-30	70,000	plus 1
July 1-15	66,924	plus 1
July 16-31	66,788	plus 1
Aug. 1-15	54,960	plus 7
Aug. 16-31	50,000	plus 6
Sept. 1-15	45,000	plus 4
Sept. 16-30	30,000	plus 2
Oct. 1-15	25,000	plus 8
Oct. 16-31	20,000	plus 7
Nov. 1-15	16,000	plus 6
Nov. 16-30	18,000	0
Dec. 1-15	21,633	—7
Dec. 16-31	38,164	—4
Total	1,225,360	

The million and a quarter of dozens handled during 1926 represents 40,845 cases or 102 carloads. Note the heavy volume handled during the months of March, April, May and June. The profit and loss column represents the difference in the weighted average price received for eggs through the Association and the average buying country Ohio price for the same two weeks. The buying prices were taken from the Producer Packer, a weekly. In relation to local prices it is clear that the fall months, August to November inclusive, are the most favorable. The twenty-four pools show that fifteen were sold at an advantage to members, seven at a loss and two were even.

One Cent In Reserve

The net amount received by the members of this association during 1926 over local prices, amounted to $10,180. In addition to this, one cent per dozen was set aside for reserve. This amounts to $12,253 which belongs to the members.

Adding this to the $10,180 makes a net total gain of $22,443. Dividing this sum by the total membership of 1800 gives a net gain to each member of $12.46. This figure is conservative because the membership is somewhere between 1700 and 1800. It should also be stated that this report takes into consideration only the egg business of the association, while live poultry also was marketed for the members. The purpose of the reserve fund is to equip the plant for fattening, killing, packing, and storing dressed poultry.

The Ohio Association has been able to handle this large volume of eggs at a total cost not to exceed six cents per dozen. This includes all expenses from the time the eggs leave the farm until they are sold. The division of expenses is as follows:

Handling at receiving station	¼ cents per doz.
Trucking to district plant	¼ cents per doz.
Supplies, cases, fillers, etc.	2 cents per doz.
Office, management, grading etc.	1½ cents per doz.
Freight to New York	2 cents per doz.
Total	6 cents per doz.

Referring again to the table of egg pools it should be noted that the association had a distinct advantage over local prices during the fall months June to November inclusive. This is the period of gradually advancing prices on our terminal markets for fresh eggs. The remainder of the year prices usually work down from the high peak and there are times when fresh eggs are so scarce at country points that the local price may be higher than they are at the terminal markets.

The results accomplished during the past year in Ohio show clearly that the member cannot depend upon individual pools as a guide in determining whether the association is getting a better price than if the eggs were marketed independently.

The following table shows the average monthly net price received by each member and the average monthly per cent of each of the four grades of eggs packed by the association:—

(Prices net to Members and the Per Cent of Each Grade by Months for the Year 1926.

	Net to Members—cents				Per cent of each Grade			
	Hen neries	Stand- ards	Trades	Checks & Cracks	Hen- neries	Stand- ards	Trades	Checks & Cracks
Jan.	34	30	29	25	52	22	19	.5
Feb.	27	26	22	20	64	21	14	.5
Mar.	24	23	21	20	59	26	13	.6
Apr.	26	25	22	20	64	25	11	.4
May	27	26	23	20	54	31	13	.3
June	28	26	23	22	44	41	15	.3
July	31	26	23	22	37	42	14	.5
Aug.	36	30	25	24	42	44	10	1.6
Sept.	40	35	28	30	42	43	13	1.4
Oct.	55	50	45	35	45	36	17	1.3
Nov.	50	51	39	35	33	36	40	1.2
Dec.	43	41	39	39	42	26	30	1.3
Av.	36	33	29	26	48	32	16	.8

Best Eggs Get Premium

In reviewing the above table it should be understood that these average prices were net to members after all expenses of the association were paid and one cent per dozen set aside as a reserve. Note also that as an average for the year, the best eggs were worth 10 cents per dozen more than the poorest, and that only 48 per cent of all eggs handled made the top grade.

The Ohio association has been operating only 18 months but the members have already learned that extra care given to eggs as they are handled on the farms means a greater return. During October, 1925, only 32 per cent of all eggs graded as henneries, while for the same month, 1926, there were 42 per cent in this top grade.

Illinois now sells 75,000,000 dozens of eggs annually. Assuming that Illinois grades will average as indicated for the Ohio association; that through special care half of the second grade could be brought into the first grade; knowing that 16 per cent of seventy millions of eggs is twelve million and that henneries brought three cents more than standards; it follows that an additional income of $360,000 would be realized. Likewise, if half of the grade called trades, could be brought into the next higher grade, the result would be that six million eggs would bring four cents more, per dozen, or $240,000 more. This added to the $360,000 amounts to $600,000. Illinois producers, therefore, if given an opportunity to sell their eggs on a graded basis, could increase their income materially through the improvement of the quality of their product.

Re-elected President

George F. Tullock, I. A. A. Committeeman from the 12th district was reelected president of the Winnebago County Farm Bureau at its annual meeting on Saturday, Feb. 26.

Geo. F. Tullock

L. A. Frisbie was elected vice-president, and J. M. Rankin, secretary-treasurer. Six hundred and twenty-five attended the meeting. Earl C. Smith, president of the I. A. A. was the speaker of the day.

Pure Milk Asso'n Gets Quick Action On TB Retest Demand

A HURRY-UP appeal for aid in bringing T B retest work up to date in the Chicago dairy district brought an immediate response when Pure Milk Association officials wired the state department of agriculture following Health Commissioner Bundesen's recent order barring milk from herds which had not been retested within the past six months.

The order found thousands of herds under federal and state supervision unable to meet the requirements since retest work had not been kept up to date.

Director Stanard immediately surveyed the field and detailed state and county veterinarians from central and southern Illinois counties to the northern part of the state to help retest herds affected by the order.

Pure Milk Association officials at the same time appealed to Dr. Bundesen and secured an extension of time to Feb. 25 for the enforcement of the order. The date for enforcement later was deferred to March 11 while extra veterinarians got under way to prevent the loss of the Chicago market for the dairymen in the adjoining territory.

W. C. McQueen, president of the Kane County Farm Bureau, is president of the Pure Milk Association, and H. C. Vial, newly elected I. A. A. Executive Committeeman, is secretary.

Hedgcock On National Wool Market Committee

A movement to coordinate the work of the present wool marketing associations and centralize sales in a smaller number of agencies was launched Feb. 12 in Washington, D. C., when a national committee was appointed to this end.

The smaller associations and pools like those in Illinois, Iowa, and other Mid-West states will be aided in securing the advantages of the more powerful organizations like those in Ohio, Idaho, California, and in other western states.

J. F. Wilson of California is chairman and W. E. Hedgcock will represent Illinois wool growers on the committee to work out the plan. Announcement of the new plan will be made at the annual convention of the American Institute of Cooperation to be held at Northwestern University, June 20 to July 15, 1927.

ILLINOIS AGRICULTURAL ASSO RECORD

Volume 5 | Issued Every Month for 63,000 *Thinking* Farmers—April, 1927 | No. 4

EQUALIZATION MAKES HEADWAY AS COUNTIES ANNOUNCE TAX CUTS

I. A. A. ANNUAL PICNIC GOES TO MOOSEHEART

Thursday, Aug. 11, Date Decided Upon. Macomb Also Bids

Entire Program Will Be Broadcast Over Station WJJD. Site For Picnic Is 1023 Acre Plot

THE annual picnic of the Illinois Agricultural Association will be held at Mooseheart, famous foundation of the Loyal Order of Moose, located just north of Aurora on the Lincoln Highway in Kane County, on Thursday, August 11.

The only other contender for the annual event was Macomb. By a nine to seven vote, the Executive Committee in their monthly meeting on April 8 decided in favor of the former.

The site for the picnic is the 1023 acres of ground adjoining the Fox River, owned by the Loyal Order of Moose. Included in the grounds at Mooseheart is a park of approximately 200 acres, a grove of 150 A., a lake of approximately 50 acres, two baseball diamonds, playgrounds, a large track, and other accommodations.

Mooseheart is approximately 38 miles west of Chicago on the Lincoln Highway between Aurora and Elgin. Nine main paved roads connect this site with all parts of Illinois.

The entire picnic program, including speeches, results of the State Farm Bureau championship baseball game, the hog and chicken calling contests will be broadcast by radio station WJJD, owned by the Moose organization.

The invitation to hold the picnic at Mooseheart was extended by representatives of the Aurora and Elgin Chambers of Commerce, the Kane, DuPage, Will, Kendall, and DeKalb county farm bureaus, and the Mooseheart foundation.

The original invitation to hold the 1927 picnic at the place chosen was received by telegraph from Secretary of Labor, Jas. J. Davis, chief of the Moose organization, directly after the annual picnic last year.

President O. L. Welsh and M. L. Hunt of the McDonough County Farm Bureau presented the invitation of Macomb.

WABASH CO. FORMS NEW SHIPPING ASSOCIATION

A county livestock shipping association was recently organized in Wabash county with the aid of the Illinois Agricultural Association, livestock marketing department. John Deputy, former president of the farm bureau was chosen as first manager. Non-farm bureau members will be given service at a slightly higher cost than members. Sixteen new members came into the farm bureau during the past month.

HELPING TO EQUALIZE THE LOAD

Legislature Swings Into Action After Elections Clear Way

Home Rule, Reapportionment, T. B. Eradication, and Tax Proposals Are Important Issues

THE Illinois legislature got under way again early this week following its adjournment to enable members to go back home and campaign in the local elections. From now until final adjournment, the legislators are expected to get down to business and move the pending bills along rapidly.

The much discussed corn borer bill, carrying the I. A. A. amendment, was booked for the signature of the governor at an early date. The bill as originally introduced provided $1.50 per acre as the maximum amount any farmer would be required to expend for extra work required in clean-up territory. "At the request of the Illinois Agricultural Association, this amount was reduced to $1 per acre by amendment to the Senate bill," writes A. C. Everingham, legislative representative.

How It Works

Under its operation, if clean-up work should be ordered by the state or federal authorities, the federal government would expend up to $2 per acre or whatever is permitted with funds available. If the cost of clean-up exceeded this allowance, the farmer would stand up to $1 per acre more, but all above this sum would be borne out of state funds.

Another bill of considerable interest is H. B. 106, introduced by Representative Petri. This bill amends the game law by making it unlawful for any person to hunt on the premises of another without first securing permission. The law as it now stands makes it lawful to hunt on the premises of another unless those premises are posted or advertised. This bill will, without doubt, meet with the general approval of farmers who are interested in the protection of game, and also the protection of their crops and livestock from injury by the careless hunter.

After Chicken Thieves

Three bills were reported out of the House Committee on Agriculture on Wednesday preceding the local elections. All of them received the unanimous approval of the Committee with the recommendation that they do pass.

House Bill No. 325 introduced by Mr. Whiteley, provides that any person, firm or corporation engaged in dealing in live poultry shall obtain a license from the Department of Agriculture. The bill provides further that all trucks used by such person, firm or corporation shall also obtain license. Under the bill, all such poultry dealers are required to keep a record which shall show the date of all transactions, the number, the weight and descriptions of fowls purchased, and the name, address and brief description of the seller and the type of conveyance; if auto, they are required to record the license number.

This bill was introduced at the instance of the Anti-Horse Thief Association and the Prairie Farmer Protective Union, and has had the support of the Illinois Agricultural Association. The purpose of the Act is to secure protection of

Tax Work Of Farm Bureaus And I. A. A. Bears Fruit As Valuations On Farm Property Are Slashed

Knox, Vermilion, Champaign, Winnebago, Crawford, and Many Others Secure Cuts in Assessments for Coming Quadrennium.

RECENT reductions in farm valuations for taxation purposes in many counties over the state, ranging from 10 to 25 per cent or more, are regarded as the culmination of efforts put forth by the Illinois Agricultural Association and the county farm bureaus beginning nearly seven years ago to equalize valuations between farm and city property.

J. C. Watson.

The reductions in valuation in nearly every case came following careful checkups by farm bureau tax committees in the various counties. Returning from a swing through approximately 50 to 60 Illinois counties in behalf of securing equalization of farm and city assessments for the coming four years, John C. Watson, director of taxation stated that the county farm bureaus will resist every effort made to place farm property valuations higher than city valuations.

10 Per Cent Lower

"Selling values of farm lands have decreased at least 10 per cent during the past year in certain sections of Illinois, particularly in the grain belt," he said. "The livestock producing sections on the other hand seem to be holding better in selling values.

"If equalization by reduction of farm land valuations should bring total valuations to the point where maximum tax rates will not produce sufficient revenue," said Watson, "the boards of review will have the opportunity to change valuations so as to secure adequate revenue. But on the other hand, if equalization at the average level of the state will not produce sufficient funds, it is time for the people of both city and rural communities to ask that their valuations be not raised higher, but that the people vote a higher county or school tax rate. This will obviate their paying more than their just share of state taxes.

"My investigations in the majority of Illinois counties reveal that average full valuations of city property are less than 40 per cent of their actual selling values, while average full valuations of farm property are approximately 45 per cent of actual selling values," said Mr. Watson.

25 Per Cent Cut in Knox

Gross inequality on farm and city valuations which have existed in Knox county for years, were adjusted when the assessors met on April 1 and voted to reduce farm valuations 25 per cent.

The tax committee composed of George Charles, Robert Gibbs, and T. J. Sullivan, appeared before the assessors and presented figures compiled under the direction of Mr. Watson. A motion to reduce farm lands 25 per cent received the approval of all but two assessors who represented city interests.

The investigations showed, according to Farm Adviser L. R. Marchant that farm lands had decreased

(Continued on col. 3, page 2.)

Bond County Man Gets First Auto Policy

JOSIAH J. BAITS of Smithboro in Bond county has the distinction of receiving the first policy issued in the new Illinois Agricultural Mutual Insurance Company. Mr. Bait's policy, number 1, reproduced herewith, was sent to him on Wednesday, March 30. It provides for full coverage on his Ford touring car.

EXECUTIVE COMMITTEE
(By Congressional Districts)

Published once a month at 404 North Wesley Ave., Mount Morris, Illinois, by the Illinois Agricultural Association. Edited by Department of Information, E. G. Thiem, Director, 608 South Dearborn Street, Chicago, Illinois. Entered as second-class matter October 20, 1925, at the post office at Mount Morris Illinois, under the Act of March 3, 1879. Acceptance for mailing at special rate of postage provided for in Section 412, Act of February 28, 1925, authorized October 27, 1925. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record. Postmaster: In returning an unsalled for or missent copy, please indicate key number on address as is required by law.

Government Price Fixing

THE current issue of Dun's Review has the following to say on recent trends in the steel industry: "That competition for business is keen in some lines is shown by isolated price concessions, yet the price situation, broadly viewed, is firmer than was the case early in the year. Meanwhile basis pig iron, Valley furnace, has been advanced 50 cents a ton, which makes a rise of $1 a ton in that grade since the middle of March."

As a matter of fact the price of pig iron jumped 50 cents a ton within a few days after President Coolidge raised the tariff 50 per cent on this commodity. Simultaneously, common stock of the Steel Corporation began a steady rise. On April 1, Chicago newspapers heralded this fact in headlines as follows: ("STEEL COMMON LEADS STOCKS TO HIGHER LEVELS") "The United States Steel common's impressive strength was the feature of the stock market today. Rising to a new record of 167½ and ending the day at 167 for a net gain of 2⅛ points, its leadership enabled the market to give a good account of itself. The consistent strength of this stock doubtless in anticipation of the annual meeting on April 17 has brought strong reports of the possibility of an extra dividend on the old steel shares before stockholders are called to vote on the 40 per cent stock dividend."

Now pig iron has advanced another 50 cents. It must be comforting for officials of the U. S. Steel Corporation to know that they can go down to Washington whenever they choose and secure the aid of a benevolent (to industry) administration in fixing prices so they can make a profit. The steel price situation may be "firmer than earlier in the year," Mr. President, but the agricultural index is still at 80.

Finishing The Job

ILLINOIS has been engaged in a great war to drive tuberculosis, the most dreaded plague of both man and beast, out of the state. It has probably spent upwards of $10,000,000 of both state and federal funds in the last eight or ten years to accomplish this end for livestock alone. The cost to the farmer and herd owner whose cattle were slaughtered aggregates many times this amount aside from what he received in indemnities.

The battle is not won yet although more than half our cattle are tested. Since July 1, 1925, alone, the state has paid $980,511.78 of its own claims and $231,675.37 of federal claims. Expenses of administration during that time amounted to $133,828.05. Total claims and expenses paid and pending on March 1, 1927, aggregated $1,462,790.20 leaving a free balance of the $2,000,000 biennium appropriation of $573,209.80.

It is well that the state is committed to the task of finishing this most important work. It would be expedited to the advantage of all if the needed time and money were budgeted, the necessary appropriations made, and all efforts centered on finishing the job in a definite period of time. It can be done.

More Advice

IN a speech recently delivered before a group of farmers and townspeople at Sidell, Ill., President T. C. Powell of the C. and E. I. R. R. told the farmers that the only way to solve their problem is to do as the railroads have done.

"There is a close analogy between the problem of the farmer and the problem of the railroad," said the speaker, "because both are dependent upon various and fluctuating demands, and upon uncontrollable competition, and upon the weather.

"But the railroads attack the problems at the source, because being forced to deliver a certain produce, namely transportation, at a price fixed by public authorities, and therefore beyond their control, the railroads must start with this factor of delivered price and work back to the origin of all products; namely, the human factor, represented by labor and intelligent administration.

"The application of this principle to farming and the adoption of intensified cultural methods, directed toward the production of diversified items in marketable quantities, is, in my opinion, the only way to solve the farm problem."

We presume all this means that the farmer isn't efficient; that if he could make two blades of grass grow where one grew before he would be prosperous. As an analyst of the farm problem, Mr. Powell (or his speech writer) is a good railroad man. The analogy between the farmer and railroads doesn't hold good because the railroads have a guarantee of prices for their product, transportation, from the Interstate Commerce Commission. They are further protected to a large extent from cutthroat competition by the same body. The Commission fixes freight and passenger rates to enable the railroads to earn 5¾ per cent interest on their investments. It is true that not all of the carriers do this well. Some do better.

RADIO STATION WJJD AT MOOSEHEART

Mr. Powell tells us that farmers must do as the railroads have done to solve their problem. If they followed his advice, farmers would demand that Congress fix minimum prices on farm products, and limit competition so they could earn a fair rate of interest on their investment. The realization of such benevolence, even were it possible, is far beyond the expectation of the most sanguine of us.

We Succeed By Trying

THE numerous reductions in farm land valuations for tax purposes over Illinois is a further tribute to the value of organization. In nearly every case, these reductions come following the appearance of farm bureau tax committees before the county assessors and boards of review with facts and figures showing that farm lands were discriminated against. The very fact that prior to 1920 there was a marked discrepancy in most of the counties over the state between urban and rural valuations, to the disadvantage of the latter, is proof enough of the farmers' need for representation. Before the farm bureaus and the I. A. A. were organized no agency was doing this work for him. He wasn't around when the taxes were levied. Occasionally a farmer got on the county board of review. But then he was usually in the minority, and granting that he knew about inequalities in tax matters, he had no organization behind him to get a hearing.

For seven years, the I. A. A. has fought for equality in taxation. During that time taxes may have gone higher but at least the farmer has seen other interests pay more nearly their share of the cost of government. The work is not done yet. It will not be done so long as there is tax dodging and control of boards of review and assessors by corporations and moneyed interests. Another way to help this whole situation is for farmers to use their influence in placing men on county boards of review who will represent them.

Why The Strong Butter Market?

FARMERS who sold their cream in March this year sold their butter fat on the basis of a butter market which averaged 49.4 cents. This is a new record for March since war time. Considering the scarcity of butter, retail prices have not been exorbitant. Consumers have not paid more than 58 or 60 cents for butter. Oleo put the brakes on too high a retail price, says Art Lynch, our dairy marketing director.

But what brought about the strong market? Nothing more nor less than the fact that the storage holdings of March 1, 1927, set a new low record for 12 years. As a result farmers have been getting eight cents more per pound for butter fat than last year. This is one of the clearest illustrations of what surplus control as provided in the McNary-Haugen bill can do for the farmer. The small amount of butter in storage a year ago—some 26,000,000 pounds—could have been given away or dumped into the ocean without notice while the one billion or more pounds that went into consumptive channels brought five or ten cents a pound more.

What The Counties Are Doing

STARK GOES ON RECORD FOR EGG GRADING

At their regular meeting on Saturday, Mar. 26, the Stark County Farm Bureau directors voted to ask S. J. Stanard, state director of agriculture, to establish standard egg grades for the buying of eggs in Illinois.

HENRY BOYS AND GIRLS HAVE POULTRY CLUB

The Henry County Boys and Girls Poultry Club closed Mar. 23 with 91 entries. The farm bureau is cooperating with the Galva Poultry Association which furnishes two settings of eggs to each member.

PEORIA MAN WILL TAKE EUROPEAN TRIP

Keith Wehner, a local Smith-Hughes teacher, has been employed to handle the Peoria Farm Bureau club work next year. Glen McClurage of Limestone township will take the A. F. B. F. European tour this summer.

PIATT GOES OVER QUOTA IN INSURANCE

Piatt County had 143 applications for the new farm bureau auto insurance, Apr. 1. This was 35 per cent more than her quota. If plans materialize, farm bureau members there will be benefited by the new oil company now being organized in Macon County. A bulk station may be located in a town near the border which will serve a large number of farmers on both sides of the line.

JOHNSON TO OPPOSE TOLL RATES IN HEARING

Through signed petitions secured locally and with the aid of the I. A. A., the Johnson County Farm Bureau is trying to re-establish rural and village telephone service in that section of Southern Illinois. A hearing before the Illinois Commerce Commission will be held in Vienna, Apr. 19, when proposed toll rates between various exchanges in the county, which up to the present have been free from exchange service, will be opposed.

BOND TO HIRE VETERINARIAN IN APRIL

Twenty per cent of the Bond County Farm Bureau membership applied for policies in the mutual auto insurance company. A $4,000 appropriation was secured from the county board of supervisors recently to carry on tuberculosis eradication in cattle. A veterinarian will be employed to start work sometime in April.

SCHUYLER AND BROWN FORM DAIRY HERD ASSOCIATION

Schuyler and Brown County dairymen recently organized the Brown-Schuyler Dairy Herd Improvement Association to start work April 1. Twelve men are cooperating with the farm bureau and Prof. Robbins in the hog feeding project. Records are kept of amounts fed. Several men in the project are using the sanitation system and some are not. Some good comparisons are expected. Demonstration plots to show the value of different amounts of limestone and rock phosphate were recently sown to different kinds of clover and alfalfa on wheat.

GALLATIN COUNTY INTERESTED IN SPUDS AND DAIRYING

Thirty-five Gallatin County Farm Bureau members bought 146 bushels of certified seed potatoes of which 107½ bushels were Irish Cobblers and 38½ bushels, Early Ohios. This project was introduced three years ago. Six hundred and fifteen farmers attended seven dairy meetings held last week. Higher producing cows, better feeding, and improved breeding were discussed.

LAWRENCE COUNTY PEACH GROWERS GET TOGETHER

Lawrence County peach growers met with A. B. Leeper, H. W. Day, and W. L. Cope Tuesday, March 22, to discuss the formation of a Lawrence County unit of the Illinois Fruit Exchange. O. P. Dowell and F. L. Severns, both of Lawrenceville, were selected temporary chairman and secretary.

WILLIAMSON HAS BIG POULTRY CLUB UNDERWAY

Williamson County has 30 poultry clubs with 425 boys and girls enrolled. The merchants have provided 20,000 eggs, from pure bred flocks, for the members. Club leaders are rural and Smith-Hughes teachers.

WOODFORD CULLS CORN AND LEARNS NEW HITCHES

A series of corn culling and disease germination demonstrations were held in Woodford county during February and March. Nine men attended the University of Illinois corn disease germination school, and twenty the two-day county school. Losses in this county from corn root rot diseases approximated one-half million dollars according to Prof. Hackleman. One hundred farmers attended the three horse hitching demonstrations held here, showing how to use the four, five, six, and eight horse hitches with the tying-in and bucking-back system and driving with two lines.

GREEN COUNTY SIGNS 122 IN AUTO INSURANCE

One hundred twenty-two applications have been made by Greene County farm bureau members for auto insurance in the Illinois Agricultural Mutual Insurance Company. They think it the best project the farm bureau has sponsored for some time. "This number means that more than one member out of five has signed up for insurance in his own company," writes Farm Adviser Laible.

McDONOUGH HAS GOOD ANNUAL MEETING

O. L. Welsh was reelected president, W. R. Clawson was elected vice-president, Ward F. Higgins, secretary, and C. P. Kline, treasurer, at the recent annual meeting of the McDonough County Farm Bureau. More than 700 people attended. M. G. Van Buskirk of Oneida and Miss Claire Atwood from the University of Illinois were the speakers.

PULASKI HAS NEW COMMUNITY AND 4-H CLUBS

A new community club at Grand Chain and a 4-H Sewing Club of 25 members at Karnak are new accomplishments of the Pulaski County Farm Bureau. These new activities are in portions of the county which have been more or less dormant in the past. "Our people are coming to realize that it makes life more interesting and livable if they know each other better and work together," says Farm Adviser Hughes.

McHENRY HOLDS BROODER HOUSE DEMONSTRATION

Two dozen people came out on a stormy day to the brooder house building demonstration conducted recently by Frank Hanson of the University of Illinois on the Louis Koltz farm in McHenry county. A picnic lunch was served at noon in the barn.

STOPPING THE CORN BORER

Here are snapshots of the oil burners and a government army truck ready to burn over corn stalk ground on the Frank Love farm east of Grant Park in Kankakee county. The oil burners are made of gas pipe. The oil is forced into the burners from the truck tank with a pump. Outlets are placed 12 inches apart and the 27-foot pipe located behind the wheels covers a swath eight corn rows wide. The crude oil bursts into flame as it leaves the pipe and consumes all corn stalks, weeds and trash in its path Corn stalk ground within a radius of a mile of the spot where the first corn borer was discovered, has been or will be burned over.

TAX VALUES SLASHED

(Continued from col. 5, page 1.)

15 to 20 per cent in value since 1923, while city lots and improvements increased 12 to 15 per cent during the same period. It was Watson's opinion that the taxes on city property would have to be increased 35 per cent or farm lands reduced 25 per cent to put farm lands and city property on an equal basis.

One of the farmers supported the argument by stating that if taxes were based on the earning power of property, farm lands would deserve a much larger reduction. George C. Gale, Galesburg attorney, appeared before the assessors unsolicited and argued in favor of the reduction.

Champaign Cuts 10 Per Cent

The Champaign County Board of Assessors at their meeting in the Urbana courthouse Mar. 30 voted to reduce the assessed valuation of farm land 10 per cent. For the first time in years all the assessors were present, and the vote on the reduction was 27 to 2.

This tax reduction was the result of a survey made by the Champaign County Farm Bureau through its 52 tax leaders. Approximately two men were appointed to act as tax leaders in each township. This spring, these men under the leadership of Farm Advisor C. C. Burns, and John C. Watson made a record of all bona fide sales of property in Champaign county between the last half of 1925 up to Mar. 1, 1927. After these sales were recorded they were rechecked to make sure that no unfair examples were included, such as forced sales, gifts, etc. The sales were then divided into four classes including farm lands, village lots, Urbana lots, and Champaign lots. Then the full valuations on the assessors books for each of these properties were secured. The total of the full valuations of each class was divided by the total of the sales values of each class to arrive at the valuation ratio. The results of the summary were as follows:

No. Usable Sales	Class	Total Full Valuations	Total Sale Values	Valuation Ratio
59	FARM LANDS	$425,698	994,359.27	42.8%
67	VILLAGE LOTS	52,975	146,327.50	35.5%
68	URBANA LOTS	90,330	289,195.00	31.5%
115	CHAMPAIGN LOTS	135,950	543,938.56	24.9%

These figures were mailed out to the community director of each Farm Bureau unit with the suggestion that he and his tax leaders take them up with the assessor or assessors in the township or townships his unit covered. This was done in practically all of the units and when the assessors met March 31 they voted 27 to 2 to reduce farm lands, in spite of determined opposition on the part of the treasurer and assistant treasurer.

Winnebago Gets 20 Per Cent Cut

"Our local farm bureau tax committee went before our county treasurer and township assessors yesterday and submitted data collected by the committee," wrote Farm Adviser Keltner of Winnebago county in a recent letter. "The assessor then voted to reduce the valuation of our farm lands in Winnebago county 20 per cent."

Winnebago county followed the same plan four years ago and received on that presentation a 40 per cent cut which placed values on a fair basis at that time. Continued declines in farm values since then led to the new reduction.

Many Other Counties Reduce

Many other counties have announced reductions in valuations of farm property, including a cut of 20 per cent in Iroquois county, 10 per cent in Crawford county, and so on.

"The Macoupin County Farm Bureau went to court back in 1922 to protect the land owners of the county against an unjust tax increase—and won," writes Farm Adviser Earl Rusk. "And we have been fighting for the principle of equalization ever since. Four years ago we found farm land assessed out of line and succeeded at that time, with the cooperation of the assessors and others, in securing a reduction which went a long way toward equalization. This reduction has been the means of saving nearly $40,000 annually to land owners in the county.

"We have just finished an up-to-date summary of the tax," writes Rusk, "and have again appeared before the assessors with the facts. Land has decreased in value during the past four years so that it is again somewhat out of line with other property. We believe that most of the assessors will try again to equalize the assessments so that all classes of tangible property will be valued for tax purposes on a fairly equal basis. An attempt will be made also to get more intangible property on the tax books. We are committed to the task here of everlastingly watching and when necessary fighting for equality in tax matters."

Other counties which secured reductions are De Kalb, 10 per cent, Livingston 10 per cent, Edgar 10 per cent, Pike 25 per cent, Coles 15 per cent, and Iroquois 20 per cent. There are unconfirmed rumors of reductions in a number of other counties.

Farm Bureau Baseball Season To Open With First Games On May 7

Four New Counties From Southern Illinois Enter League To Form New Division

Farm bureau baseball in Illinois will open officially on May 7 when the first games of the season are scheduled in the new Southern Illinois division of the Illinois Farm Bureau Baseball League.

With the addition of four new teams which include Bond, Jefferson, Clay, and Lawrence counties promises to be a race for the state title more hotly contested than any time heretofore. The four new teams will comprise Division 6. At a meeting held in Mt. Vernon on April 5 a schedule of games was drawn up for the 1927 season.

The first games will be played on May 7 with Bond and Jefferson counties meeting each other at Mt. Vernon, while Clay and Lawrence counties fight it out at Louisville.

The 14 county farm bureau teams from Central and Western Illinois voted to launch their schedule on May 21 following a meeting of League officials at Peoria this week.

The five divisions from this section include teams from the following counties: District 1, Warren and Henderson; District 2, Marshall-Putnam, Woodford, Peoria, and Tazewell; District 3, McLean, DeWitt, and Logan; District 4, Adams, Schuyler, and Brown; District 5, Cass and Morgan.

Applications from other counties desiring entrance into the League will be considered, and if accepted will be placed in districts most convenient to them.

150 ATTEND DISTRICT MEET AT SHELBYVILLE

The best I. A. A. meeting ever held in the 19th district is the way members expressed themselves following the meeting at Shelbyville on Friday, March 25. More than 150 were present.

J. L. Whisnand

President Earl C. Smith and John C. Watson of the Illinois Agricultural Association spoke on activities of the Association while J. D. Billsborrow discussed the relation of University Extension to the farm bureau.

J. L. Whisnand, executive committeeman representing the 19th district, presided.

WINNEBAGO MAN PROPOSES IDEALS FOR CLUB

A creed and program of work has been proposed by E. F. Derwent for the Farmers' Luncheon Club organized by the Farm Bureau of Winnebago county. The program proposes that members work together to foster the idea that farming offers as good an opportunity as any business to serve society; to raise the standard of the profession, farming; to extend the influence and acquaintance of the members among high-minded, progressive farmers of other counties; to widen the mental horizon and develop the interests and intelligence of each member; to widen the spiritual horizon of each member; and to inspire each member to do some unselfish service for the good of the community, county, or state.

Auto Insurance Co. Grows Rapidly As More Policies Come In

Oil Trucks To Be Insured With An Advance Premium Deposit Of $25

Policies in force in the Illinois Agricultural Mutual Insurance Co. jumped to a new high level following the official launching of the company on April 1.

A total of more than 3,000 policies signed and in the office, was the record established on April 6. With those in the hands of solicitors and county advisers, membership in the company will soon exceed 3,500 it was predicted.

The rapid expansion of the new company made necessary an increase in its personnel from one to five helpers who are now busily engaged in sending out policies. A total of 2,300 were in the mails early this week with prospects for finishing the job within the next few days.

All applications for membership in the new company are being carefully checked against undesirable risks. More than a dozen have been thrown out as undesirables as a protection against the other policy-holders in the company.

At a meeting of the directors of the new company held on April 8, the following resolution was passed concerning insurance on oil trucks which are used by farm bureau oil companies over the state:

WHEREAS, there appears to be a demand from some of the Farm Bureau interests in the state for full coverage automobile insurance along the line of the contract heretofore authorized by this board covering Farm Bureau owners of automobile trucks used in the delivery and distribution of gasoline, oil and lubricants by cooperative supply companies under the control of County Farm Bureaus, and

WHEREAS, the Manager of the Company has recommended to the Board the issuance of such a contract with an advance premium deposit of twenty-five ($25.00) dollars with a contribution to surplus in the sum of $10.00 and a policy fee of $5.00.

NOW THEREFORE, Be It Resolved, that the Board of Directors hereby authorize and direct the Executive Officers to prepare and issue to those making application therefor a contract for automobile insurance for trucks distributing and delivering gasoline, oil and lubricants, such a contract to contain substantially the same provision as the contract authorized for issuance to owners of pleasure automobiles, and that the Advance Premium Deposit therefor be the sum of Twenty-five Dollars ($25.00), the contribution to surplus in the sum of $10 and a policy fee of $5; and that a separate classification be established and maintained for such class of automobile insurance risks.

Semi-annual assessments for this class of business will be determined on the basis of its own experience and, therefore, the insurance will be provided at absolute cost.

It was further decided to make no charge for transferring insurance from one car to another. In such cases a new application must be filled out covering the new car, and this sent to the company with the old policy.

Swine growers in 29 states produced 808 ton litters in 1926 says the U. S. Department of Agriculture. Tennessee placed first with 121 litters. Pennsylvania second with 114, and Illinois third with 90. Indiana and Kentucky were fourth and fifth. About 30 per cent of the total number of entries finished in the ton litter class.

Corn Surplus Grows Less Under Heavy Farm Consumption

What the U. S. Department of Agriculture Says About the Grain Market

ACCORDING to the March estimate by the United States Department of Agriculture, stocks of corn on farms at that time were about 215,000,000 bushels smaller than a year ago. When exports and present commercial stocks are considered, these statistics indicate that the consumption of corn from November to March was around 70,000,000 bushels greater than for the same period last year. The supply of corn available for consumption and carry over during the remainder of the season is only about 20,000,000 bushels more than were disposed of from March 1 to October 31 last year.

While the number of animals on farms on the first of January was slightly smaller than a year ago, the relative prices of livestock in the markets compared with grain prices are about as favorable for feeding as last year and there is also a possibility of an increase in the spring pig crop. It would appear, therefore, that the statistical position of the corn market is more favorable from the producers' standpoint than at this time last year.

The present weakness in the corn market can be attributed largely to the distribution of the supply this year. The larger crop in the Southern States has resulted in larger local consumption of corn but has restricted the shipping demand from the Corn Belt. This has resulted in the larger accumulation in the markets despite the materially reduced receipts this season. Present plans of farmers point to a large increase in corn acreage again this year in the Cotton Belt where farmers plan substantial increases in all important crops that can be substituted for cotton. A slight decrease is planned in the Central Corn Belt States, but for the United States as a whole an increase of nearly two per cent in the corn acreage this spring is indicated.

Oats Declines

The decline in the oats market during the past month has been caused principally by the limited demand. Farm stocks of oats on Mar. 1 were about 424,000,000 bushels, making the total supply available for the remainder of the season about 170,000,000 bushels smaller than on Mar. 1 last year. New crop winter oats are doing well in the southern states and these favorable prospects, together with abundant supplies of other grains, including grain sorghums, are offsetting the strengthening influence of the smaller supply.

Stocks of barley on farms, Mar. 1, were about 12,000,000 bushels smaller than a year ago, reflecting the better demand for barley this year in the North Central States, where the crop of other feed grains was short.

More Wheat This Year

About 40,000,000 bushels more wheat was held on farms and in country mills and elevators on Mar. 1 than a year ago. This supply will provide an average carry over and about 15,000,000 bushels more wheat for export than was shipped out from Mar. 1 to June 30 last year. Heavy shipments of wheat from the southern hemisphere have weakened the foreign markets and somewhat reduced the demand for United States wheat. European buyers appear to be giving preference to Canadian spring wheat for mixing with the Argentine wheat, which has shown less gluten strength than expected.

TWENTY-SECOND DISTRICT MEETS AT NASHVILLE MAR. 24

The most representative gathering ever held in the twenty-second district was the I. A. A. district meeting held at Nashville in Washington county on Mar. 24. More than 500 members and farmers from St. Clair, Madison, Washington, Bond, and Monroe counties came out. Mr. Griggs of Sparta, who spoke in the morning, stated that wild garlic is the greatest menace to the Southern Illinois wheat crop. County Adviser Smith of Washington county outlined plans for cultivation to eradicate garlic. In the afternoon Frank Scott of Edwards county, a director in the Central States Soft Wheat Growers' Ass'n., put in a good word for the Soft Wheat Pool. He said that Southern Illinois farmers have not yet awakened to the fact that they are producing a wheat which is in great demand.

Dairy marketing was discussed preceding the business meeting of the 22nd District. The new auto insurance company, likewise, was thoroughly discussed. Frank Oexner, executive committeeman from the district, presided.

"Here's just a line to tell you how much I appreciated the March issue of the I. A. A. RECORD. It certainly was a dandy. If you can hold that pace you are certain to get results. The hired man is reading it from cover to cover now." Ogle County, Ill.—Joe Brooks.

"The March issue of the RECORD is certainly a good one. We really need that much going to the membership each month. One of our members has requested that we get him two dozen copies of this March issue, for which he has a special use. Please send us that many and forward the bill."—C. C. Burns, Farm Adviser, Champaign Co., Ill.

Comptroller System Established In I. A. A. Office Aids Accounting

Recent revision in the internal bookkeeping system of the Illinois Agricultural Association and the establishment of a comptroller, promises to simplify future accounting, and to aid in determining the exact amount of funds devoted to various activities.

The revision leading to the adoption of the comptroller system was worked out with the aid of the Illinois Agricultural Cooperative Association, and its prosecution will be under the general direction of George R. Urcher, manager.

J. H. Kelker, office manager, will act as comptroller in allocating all expenditures to the proper division of the budget. At the end of the year each member will know at a glance just what part of the Association's funds went for organization, cooperative marketing, transportation and taxation service, and so on.

Illinois farmers plan to reduce the state corn acreage about six per cent and oats acreage five per cent if spring planting conditions permit them to carry out their expressed intentions according to a joint survey made by the Illinois and federal departments of agriculture.

By protesting against payment of certain taxes they considered illegally levied, 112 members of the McDonough County Farm Bureau saved $3,964.96 when the county judge and state supreme court upheld them in most of their claims. The members raised a defense fund of $5 each and hired an attorney to represent them.

Greene County Farm Bureau Awards $50 to Chicken Thief Catcher

The standing reward of $50 offered for the arrest and conviction of thieves caught stealing poultry from farm bureau members in Greene County, was recently paid to Lee Hopkins of Roodhouse, writes Farm Adviser Laible.

Hopkins apprehended three boys last fall after they had robbed his poultry roost of a number of choice hens. Upon being brought before the Roodhouse authorities they confessed to their guilt. After some argument with the former state's attorney, Hopkins and a neighbor succeeding in getting the lads bound over to the grand jury. The court recently imposed a jail sentence on two of the boys and paroled the youngest one for a year.

L. H. Raffety, president of the Greene County Farm Bureau in commenting on the case said that the executive committee was glad to pay this reward as an incentive for farmers and others in the county to work toward the apprehension of other gangs of chicken thieves.

LEGISLATURE STARTS WORK

(Continued from col. 4, page 1.)

farmers from petty and organized thieving in poultry and to assist in apprehending chicken thieves.

Dog Tax Law Amendment

House Bill No. 276 was introduced by Mr. Foster. This is an amendment to the dog tax law, and provides that swine, when killed or injured by dogs, shall come under the operation of the law. It provides that where hogs are killed or injured by dogs, where the ownership of such dog is not known, that the owner of the hogs so killed or injured shall receive damages out of the dog fund not to exceed $25 per head.

Under the present law, sheep, goats, cows, horses, and mules are compensated for, and the pending bill simply brings swine under the operation of the act.

House Bill No. 314, also introduced by Mr. Foster, provides that whenever a case of rabies has occurred in any locality, the Department of Agriculture in order to prevent the spread of the disease, may require all dogs in such locality to be locked up, restrained by leash, or muzzled. All owners of such dogs may be required to take such prophylactic measures as may be deemed necessary to prevent the spread of the disease.

Tax Increase Opposed

Three bills were introduced early in the session in the House, under the provision of which any high school or consolidated school may, on referendum, add materially to the tax rate both for building and educational purposes. These bills, as originally introduced, were operative only in districts containing a population of more than 1500 and an enrollment of 250 pupils or more. These bills have been opposed by the Illinois Agricultural Association, following its general policy to oppose all legislation, except in cases of absolute necessity, that will tend to increase taxes. The Association is compelled to take that position until such time as a way may be provided to more equitably distribute the tax burden.

Hearings on the Home Rule Bill relative to regulating public utilities are scheduled for immediate attention.

Reapportionment Up Again

There has been much discussion during the entire session relative to the reapportionment of the Legislative Districts of the State. Apparently realization is dawning in the minds of many members of both houses of the futility of any just reapportionment under the present Constitutional provision.

Everingham Placed in Charge I. A. A. Legislative Program

Executive Committee Votes To Keep Him At Springfield To Look After Members' Interests

A. C. Everingham of Hutsonville, Crawford county, for many years a member of the legislative committee of the Illinois Agricultural Association, was authorized to devote his time to the legislative program of the I. A. A. at a recent meeting of the Executive Committee.

A. C. Everingham.

Mr. Everingham was born on a farm in Crawford county in 1879 where he attended the district school, later high school, and subsequently Franklin College at Franklin, Ind., where he graduated.

He fitted himself for the legal profession at the Indiana Law School, Indianapolis, graduating from this institution in 1903. For five years he practiced law in Terra Haute, Ind., but the urge for the farm brought him back to Crawford county where he has resided ever since.

During the last two sessions of the legislature Everingham was especially active in representing the interests of farmers, and was the designated leader in charge of the I. A. A. program.

For years he has been prominent as a speaker for the Illinois Farmers' Institute and the I. A. A. speakers' bureau during which time he has spoken in all but two Illinois counties.

What the Counties Are Doing

MONTGOMERY OIL CO. HAS SUCCESSFUL YEAR

The Farmers' Oil Co., of Raymond, Montgomery County, organized Mar. 1, 1926 made 12.2 per cent net on total volume of sales after paying interest on investment and all other expenses. Trading margins on all products sold averaged 27.7 per cent. The board of directors voted to pay a patronage refund amounting to eight per cent of gross sales to farm bureau members patrons.

RANDOLPH AFTER WILD ONIONS AND GARLIC

"We have been getting in some 'licks' at wild onion and garlic during the past six or eight months," writes Farm Adviser Secor. "Our plots, started two years ago to demonstrate methods of eradication, have shown conclusively that the pest can be killed. The secretary of the Southern Illinois Millers Association is aiding us in getting control work started in other counties."

The Illinois Agricultural Association RECORD

Issued Every Month for 63,000 Thinking Farmers

Volume 5 MAY, 1927 Number 5

What's In The Income Tax Bill

Few Of The Critics Have Read It

THE large volume of propaganda being scattered over the state in opposition to the state income tax sponsored by the Illinois Agricultural Association plainly illustrates the ease with which false bogies and misconceptions may arise when people do not stick to facts. It is quite possible, if not probable, that the spurious attacks were and are premeditated. Whatever the cause, it is evident that there is a general lack of understanding regarding the provisions of the measure.

The bill provides first for a graduated tax on income with exemptions. A single person is allowed $1,000 of exemptions, a married man $2,000, and $500 additional for each child under 18 years. After exemptions the rates are one per cent on all taxable net income of $5,000 per year or less, two per cent on the second $5,000, and three per cent on all taxable net income above $10,000.

Corporations Not Taxed

Income is not taxed in the hands of corporations or partnerships but in the hands of share holders or partners. This point has been controverted, misrepresented, or completely ignored repeatedly. In the joint committee hearing of the House and Senate recently at Springfield, representatives of business organizations made the statement that the tax would drive industry out of the state. The president of one organization, then, was forced to admit from the platform that he was not aware that corporations were exempt by provisions of the bill.

All ordinary business expenses, but not personal expenses, may be deducted from the gross income in computing net income.

Any taxes paid on real or personal property in Illinois may be deducted from the tax computed on net income (except improvement taxes as for a drainage district). Persons paying a property tax, especially on real estate, will not be subject to an income tax under this provision unless their computed income tax exceeds their property tax. Thus taxes paid on property are directly deductible from the income tax. This point has been minimized for in this exemption lies the virtue of the tax in taking some of the burden off of farm and home owners, and placing it on that large portion of our people who now share no direct responsibility of citizenship.

The proposed income tax has been hailed as an extra tax. The usual argument is that designing politicians will find some way to use the extra funds derived without lowering the taxes on property. This argument is groundless. The income tax is a lieu or a substitute tax. The bill specifically states that funds so derived shall be placed in the state school fund to replace in equal amount property taxes levied for this purpose. Approximately one-third of the total state taxes now go into the state distributive school fund.

While the bill does not entirely correct the broken down taxing system of the state, yet it is a step in the right direction and leads the way toward a general revision of our tax laws so taxes may be levied according to ability to pay.

Examples of the operation of the measure follow:

1. Single person, no dependents, net income before exemptions, $2,000. Exemption $1,000. Net taxable income $1,000. Computed income tax $10.
   If he pays no property tax his income tax will be $10.
   If he pays property taxes amounting to $10 or more, he will pay no income tax.
2. Family with two young children. Net income before exemptions $5,000. Exemptions $3,000. Net taxable income $2,000. Computed income tax $20. If they pay no property tax, the income tax will be $20. If they pay property taxes to $20 or more, they will pay no income tax.
3. Husband and wife, no dependents. Net income before exemptions, $17,000. Exemptions $2,000. Net taxable income $15,000.
   Tax on first $5,000 at 1% ..... $ 50

(Continued on page 3.)

Prompt Action Needed

The proposed state income tax is designed to help equalize the tax burden by largely distributing it among that portion of our citizens who are at the present time escaping their responsibility of citizenship.

Propaganda by its opponents (chiefly the city press) is founded upon a misinterpretation and misstatement of the provisions of the bill.

Prompt action in support of this measure by the home and property owners (who are its beneficiaries) is imperative to secure its enactment. Immediately communicate your position to your senator and representatives.

Earl R. Smith

Income Tax Before Legislature This Week

Board of Trade Bill Passes Senate, Now Up to the House

LAST week saw the first skirmish between friends and opponents of the I. A. A.'s two measures, the state income tax proposal, and the Kessinger public exchange regulatory bill. Both won victories when the Senate Committee on Revenue voted overwhelmingly on Tuesday May 3 to send the tax measure out with a favorable recommendation, while the Board of Trade bill passed the Senate on Thursday with a vote of 30 to 11.

The Senate committee on Tuesday afternoon went to bat determined to get at the bottom of the income tax measure. Chairman Martin Carlson called on both opponents and proponents to present their arguments. John C. Watson started off for the I. A. A. explaining the salient features of the bill and emphasizing its in lieu features. Questions came thick and fast but Watson stayed on top, meeting all unfriendly attacks with figures and facts that mowed down the opposition.

Colin C. H. Fyffe, attorney for the Illinois Manufacturers Association who followed Watson, put all his eggs in one basket by centering his attack on the constitutionality of the proposal. "I hope to show in my remarks that this bill regardless of its merits can't possibly become law because it fails to meet the requirements of the Illinois constitution," he said. Simon Lantz replied sharply, "There are good lawyers who disagree with you. This same argument has been used time and time again against bills which are now on the statutes. That's a question for the courts to decide."

The counter attack by Lantz floored the speaker for a minute but he resumed warily pointing to statements by the revenue amendment committee of last year and bearing down on the graduated features of the tax which he stated are contrary to the revenue section of the constitution providing for uniform assessments on property.

Donald Kirkpatrick, legal counsel for the I. A. A., came back with a broadside of supreme court decisions in this and other states in which income or inheritance taxes with similar features had been upheld. Kirkpatrick's evidence was weightier and more authoritative. A. C. Everingham followed with a strong appeal summarizing the need for the reform. The round ended with the opponents getting the worst of it.

Douglas Sutherland, secretary of the Civic Federation of Chicago, who was with us in the fight to pass the revenue amendment, next took the floor and half critical, half commendatory, suggested a few changes including the provision that the state tax commission administer the tax rather than the auditor. He criticised the tax deducted from tax exemption feature but presented nothing to replace it. Minor suggestions were made by representatives of the Chicago Real Estate Board, and an insurance association.

Lantz Counters

Then the chairman opened the meeting for discussion, Senator Roy C. Woods of Chicago made a futile effort to refer the bill to the attorney general for an opinion on its constitutionality. Lantz advised that the attorney general refused to give opinions on the constitutionality of pending legislation. Woods got hot under the collar at that and harangued the chairman and everyone in general, but his motion failed to get a second and died in its tracks.

The committee then voted to pass out the measure with the recommendation that it "do pass." Woods and McDermott of Chicago cast the only dissenting votes. Barbour of Evanston voted present.

Over in the House Committee on Revenue, the same measure sponsored by Representatives A. Otis Arnold and Gus Johnson received rough treatment. The Cook county delegates who packed the committee, organized their steam roller and ran over the measure rough shod before Chairman Hutson knew what was up. The committee was scheduled for a hearing on the bill. The I. A. A. representatives and Fyffe of the Manufacturers Association were there but they never had a chance to get in a word.

The Steam Roller

The Cook county group saw that they had enough votes to do as they pleased so they forced through a motion by Schnackenberg that the bill be reported out with the recommendation that it do not pass. This motion carried 11 to 7. Voting to kill the measure were Church, Elrod, Juul, Schnackenberg, Swanson, Gill, Ratigan, Minsky, Igoe, and Lipka, all of Cook county. John Wylie of Ottawa was the only downstater who voted with the Cook county crowd. He will have to do some explaining down in Lasalle county next time he goes out to get the farmers' vote. Hennebry of Will county voted present. He is evidently not interested in helping the farm and home owner get relief from the tax burden.

Voting against the motion and for the measure were Allen, Hutson, Hunter, Phillips, Stewart, Vaughn, and Warren. All are from down state and all have good records on farm questions.

The Gas Tax

The gas tax hearing on Wednesday afternoon, May 4, was a walk-away for the administration. Frank Sheets, chief highway engineer, left nothing more to say. He took the wind all out of the sails of the Chicago Motor Club and the Cook county opposition by admitting that Cook county paid 34 per cent of the state motor license fees. He admitted likewise that the present schedule of roads under the $100,000,000 bond issue could be built without a gas tax.

"It's just a question of whether you want the roads now or 12 to 14 years from now," he said. "With the gas tax we can build 1200 miles of road a year. Without it we can build only around 800 miles per year, which will necessitate dragging out the hard road program until 1942."

The array of facts and figures presented by Sheets swept everything before him. He showed that there are 6021 miles of hard road completed of the 9800 miles provided for under the $60,000,000 and $100,000,000 bond issues. Sidney Gorham, attorney for the Chicago Motor Club, told why the gas tax was unnecessary. Si Mayer of the Illinois Automobile Club who followed him disputed the figures presented by Sheets. The hearing ended evidently with neither side convinced that the other is right in opposing or upholding the tax.

Meents Opens

Senator Meents opened up the hearing reviewing the road program in Illinois and emphasizing the point that the gas tax is a fair and equitable system of raising funds to build roads. He showed how all but four states have gas taxes, and stated that two of these will soon enact them. If the friends and enemies can get together with suitable amendments, the gas tax will go through, otherwise it will have to wait until a later time.

The I. A. A. is for a gas tax with certain reservations. We want to insure a definite portion of the funds going back to the counties to build secondary roads. The administration seems to be friendly to the proposal that a graduated portion of the funds beginning with 10 per cent the first year go back to the counties, the basis of distribution being the amount contributed by the various counties. Another proposal has been offered—not by the administration—that a graduated portion go back to the counties, 50 per cent on the basis of road mileage in the county, and 50 per cent on the basis of the amount of gas tax contributed by the county. The fate of the bill hinges on whether or not proponents of the various proposals can get together. Last reports indicated a deadlock. Watch for future announcements.

The public exchange regulatory measure which was carefully drafted by R. A. Cowles and Donald Kirkpatrick of the I. A. A. and introduced by Senator Kessinger passed the Sen-

(Continued on page 6.)

How The State Legislature Operates

Our Law Making Machinery in Action

THE Illinois legislature known as the General Assembly consists of a Senate of 51 members and a House of Representatives of 153 members. There are 51 senatorial districts in the state each of which is allowed one senator and three representatives. This apportionment was provided for in the Constitution of 1870.

The lieutenant-governor, at present Fred E. Sterling of Rockford, presides over the Senate. The House of Representatives elects its own chairman who is called the "speaker." The present incumbent is Robert E. Scholes of Peoria.

The legislature meets once every two years, in the odd-numbered years. In Illinois the session begins directly after New Years and lasts for nearly six months. This year it is scheduled to close June 20. In certain other states the legislative session is limited to from 60 to 90 days. In others there is a deadline or final date after which no more bills may be introduced. California is much a state which limits the length of the session and sets a date limit for the introduction of bills.

Chairmen and Committees

Shortly after the legislature convenes, the presiding officers of each house announce the chairmen and personnel of the various committees. Each member is assigned to a number of committees according to his profession and previous experience. Thus the lawyers are usually placed on the Judiciary among others, while farmers are ordinarily assigned to the Committee on Agriculture. A representative or senator may be a member of four, six, or more committees. These committees do most of the work of the legislature. They usually decide the fate of the various bills.

At the beginning of each session, the clerk of the House or Senate calls the roll. If a member wishes to introduce a bill he refers it to the clerk. The title is read at once and the bill is usually referred to a committee.

Committee Meetings

In the case of bills of wide interest or those over which there is bound to be controversy, separate or joint committee hearings are arranged. Proponents and opponents are then invited to present their arguments pro and con before the members. A recommendation—arrived at oftentimes by spirited debate followed by a vote—that the bill "do pass" opens the way for action on the floor of the House or Senate. If a committee recommends that a bill "do not pass" the measure is almost invariably killed. It is exceedingly difficult and in most cases impossible to resurrect a bill after it has been acted upon unfavorably by a committee.

First reading of a bill refers to the order in which the bill is reported to the House or Senate from committee. It consists of nothing more than a presentation of the report of the committee, upon which the bill, if reported favorably is advanced to the order of "second reading." If the committee report is unfavorable the bill is usually allowed to die there.

When the bill comes up for second reading it is usually acted upon. Amendments, if there be any, are proposed at this time. Amendments often result in roll call votes. A bill may be killed on second reading by adopting a motion to "strike out the enacting clause," with or without a roll call. A similar procedure may be followed in advancing the bill to the order of "third reading."

Majority Is 77

Third reading is the order of passage when no amendments are permitted. By common consent it may be moved back to "second reading" for amendment. The last opportunity for debate is offered at this time. After the member who sponsors the bill makes a last appeal for favorable votes, the clerk calls the roll. The bill must receive the affirmative votes of a majority of members elected or it is defeated. To pass, therefore, it must receive 77 affirmative votes of the House members and 26 affirmative votes of the Senate members. The late woman's eight-hour working bill introduced by Lottie Holman O'Neill of DuPage county received only 74 votes in the House, hence it failed to carry. A bill which receives 76 yea votes in the House without a single negative vote is nevertheless defeated becaus 76 is not a majority. Having passd one house the bill is then reported to the other house, where it goes through committee, and follows the orders of first, second, and third readings.

As soon as both houses act favorably on a given bill, it is declared passed. Frequently when a bill has passed one house, amendments are made in the other house. This requires a return of the bill to the house which first passed it. If that house then accepts or decides to "concur" in the amendments of the house, the bill is passed.

Conference Committee

If it disagrees, a conference committee representing both houses is asked for. It is the business of the conference committee to reach some agreement without inserting new matter. Any conference agreement is promptly reported to both houses, and if adopted by both, results in the final passage of the bill.

After the bill passes both House and Senate it goes to the Governor, who may follow one of three courses. He may approve the bill, whereupon it becomes law on July 1 unless a later date is provided in the new law (or an earlier date has been provided for as an emergency by a two-thirds vote of both houses). He may withhold his signature whereupon the bill becomes law in 10 days, providing that number of days remain before the final adjournment of the legislature. He may veto the bill whereupon it is dead and can be revived only by passing it over his veto by a two-thirds vote of both houses.

What's In the Income Tax Bill

(Continued from page 1.)

Tax on second $5,000 at 2%	100
Tax on remainder at 3%	150
Total computed income tax	$300

If they pay no property tax, their income tax will be $300.

If they pay property taxes of $175, their income tax will be $125.

If they pay property taxes amounting to $300 or more, they will pay no income tax.

The purpose of this bill is to secure some contribution to the cost of government from persons who have substantial income but pay little or no property taxes. Thus there are countless high-salaried workers, and many wealthy people who own little or no real estate but have large holdings of stocks and bonds from which they derive large incomes, who pay very little tax in proportion to their wealth and ability to pay. Such people enjoy all the benefits of citizenship, but they do not share its responsibilities. They help vote the taxes, but they do not help pay them. It is argued that they pay their taxes indirectly in food and rent. Food and rent are no cheaper to the taxpayer who owns real estate and property. He also pays indirect taxes in addition to his direct taxes.

The measure provides that the state auditor shall collect the taxes. If it becomes law, it will not go into effect until 1929.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the farm bureau was organized, namely to promote, protect and represent the business, economic, social and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Published once a month at 404 North Wesley Ave., Mount Morris, Illinois, by the Illinois Agricultural Association. Edited by Department of Information, E. G. Thiem, Director, 608 South Dearborn Street, Chicago, Illinois. Entered as second-class matter October 20, 1925, at the post office at Mount Morris, Illinois, under the Act of March 3, 1879. Acceptance for mailing at special rate of postage provided for in Section 412, Act of February 28, 1925, authorized October 27, 1925. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the ILLINOIS AGRICULTURAL ASSOCIATION RECORD. Postmaster: In returning an uncalled for or missent copy, please indicate key number on address as is required by law.

The Income Tax

THE struggle to help the farm and home owners of Illinois get out from under the crushing burden of our antiquated property tax system is renewed by the I. A. A. in the income tax proposal now before the legislature.

This is a good bill. It deserves to pass. Yet the hue and cry from the metropolitan press would have us believe that this is a dangerous piece of class legislation.

The income tax is the most distasteful of all our taxes. The very mention of it creates immediate antagonism from the salaried worker. The tax merely looks like robbery because so many in this group have never paid any taxes heretofore.

When the federal income tax was initiated and started to put the screws on heavy incomes the payee who assumed his rightful responsibility of citizenship for the first time squealed. He still smarts from the last check he sent to the federal revenue collector. Visions of a similar state tax raise a chorus of howls heard from one end of the state to the other.

With the tangible property taxpayer it is different. He is accustomed to paying taxes. He inherited the yoke from his father, grandfather, and great-grandfather and has learned to carry it with grace and fortitude, heavy as the burden has grown each successive year.

But like the long suffering colonials too much is plenty. It's time to have a taxpayer's Boston Tea Party. It's time to look into our order of representation without taxation. It's time for a new deal. If the voters who vote the taxes had to help pay them it would be good for our state government. It would help check extravagance.

Write your senator and representatives and tell them how you stand on the income tax.

Midwest Corn Pool

A MIDWEST Corn Pool for the 11 corn belt states was prepared by Matt Grennan, author of the plan, and John Conrad, both of Whiteside County, who appeared before the I. A. A. Executive Committee on May 6.

The plan proposes a giant organization of at least 75 per cent of all corn growers in the Middle West. Each grower would be placed under contract to market any corn not used on the farm for feed, in an orderly manner.

Every member would be apprised of his share of the surplus which he must agree to keep back and store on the farm. One twelfth of the total supply needed for domestic use would be sold each month, but never more than enough to hold the price at $1.10 per bushel, No. 0 basis, Chicago.

Members of the committee conceded that the plan has a great deal of merit. They agreed that it would be a stupendous undertaking. The task of organizing and then of insuring the cooperation of every man in the pool were points discussed at great length. Several expressed the belief that such a plan is little different than that proposed by the McNary-Haugen bill whereby producers would all cooperate under the law in controlling surplus and maintaining a fair level of farm prices.

After considerable discussion the committee adopted the following statement:

"The committee expressed to Messrs. Grennan and Conrad its appreciation for their presentation of the corn pool plan and the committee's confidence in their sincerity, but it is sense of the Executive Committee that the Illinois Agricultural Association is at present firmly committee to the principles embodied in the McNary-Haugen bill for proper control of surpluses in all commodities, and that this committee is determined to push to the utmost its activities in behalf of this measure without weakening its influence or dividing its energy in attempting to support other measures even though those other measures might have meritorious features."

What The Counties Are Doing

4-H CLUB CAMP NEAR DECATUR A 4-H Club camp at the Y. M. C. A.'s Camp Seymour near Decatur is being planned by the Macon County Farm Bureau on June 13, 14, 15, and 16. Adjoining counties will probably send club members also. The Y. M. C. A. athletic and swimming instructors will be there to supervise the 4-H boys.

WAYNE FORMS BULL CLUBS Two blocks of the Jersey Bull Association were formed recently in Wayne county. Two more blocks will soon be organized. "The four bulls were pledged at a Rotary Club meeting recently by Fairfield business men," writes Farm Adviser L. L. Corrie. "The business men here believe that boosting the farmer in every way is good for the community and will help them as well."

COWS AVERAGE 271 LBS. FAT Cows on test in the Henry County Dairy Improvement Association averaged 271.73 pounds of fat per cow in the year just closed according to Farm Adviser Whisenand. Dr. F. M. Reed and Sons placed high with an average for their Holsteins of 357 pounds. A Brown Swiss herd owned by C. A. Dunbar & Son placed second with 349.3 pounds of fat per cow. A grade Guernsey owned by L. L. Angevine of Osco scored highest with 516.8 pounds, while two Brown Swiss placed second and third.

OGLE TO HAVE SEED CORN PLOTS Twenty-three Ogle county members will conduct seed corn demonstration plots this year. The Farm Bureau germinator is being operated continuously testing corn in preparation for this work. Among 696 ears already tested, 17 per cent graded No. 1 or practically disease free, 49 per cent No. 2 (infected but good germination), and 34 per cent No. 3 or badly diseased.

HORSE HITCHES IN GREENE CO. Farmers who are striving to economize are using larger horse hitches here instead of buying more power machinery, writes Adviser Laible. H. L. Young of the Horse Association of America assisted in three demonstrations here showing the "tying-in and bucking-back" system of hitches. A truck made from the front running gears of an old wagon was used recently to make possible the use of a three-bottom tractor plow with an eight-horse hitch.

KNOX WRITES HAIL INSURANCE Knox county wrote $244,000 worth of hail insurance last year; $812.77 in losses were paid. Many of these policies were written at the Farm Bureau office. A saving of $8 to $13 per thousand was secured for these men. "This year we expect to write double this amount of insurance," states Adviser Marchant. "With five or six sub-agents and one man in charge we hope to cover the county."

CLARK HOLDS 30 MEETINGS Thirty night meeting were held during recent months by Adviser Merritt of Clark county in cooperation with the agricultural teachers at Martinsville, Casey, and Westfield. Soils and crops discussions featured the program.

MORGAN STARTS OIL COMPANY H. E. Kitner has been employed to manage the newly launched Morgan Farmers' Oil Company. The distribution of petroleum products started with four trucks from Jacksonville on April 16. A bulk station will be established at Chapin soon.

PULASKI COUNTY FIGHTS FLOODS "Our main project of late has been hustling sand bags and getting others to do likewise," writes Adviser Hughes. "The Mississippi and Ohio rivers lately became high enough to unite above Mound City and we are therefore pocketed with no means of transportation except by boat. We hope to be back to normal soon."

M-P DOUBLES SOYBEAN ACREAGE Marshall-Putnam county hopes to double its soybean acreage this year according to Farm Adviser Fuller. Two carloads of seed are being shipped in. Alfalfa, sweet clover, and more dairying are getting lots of attention.

SCOTT AFTER POULTRY TROUBLES "Farmers in this county are beginning to realize the importance of poultry sanitation," says Farm Adviser Tate. Two meetings were conducted there last month by Mr. Alp, University of Illinois Specialist. Girls' club work is a new project in Scott county.

LASALLE GETS 10% TAX CUT A 10 per cent reduction in assessed valuations of farm lands was announced at the recent assessors' school in LaSalle county. This is the second 10 per cent reduction for this county according to Farm Adviser McLaughlin. Fourteen seed corn project leaders gathered at the office recently to make final selections for their test plots in which will be planted both good and poor seed from their own supplies.

PHOSPHATE TEST IN HANCOCK Phosphate demonstration plots will be established on the farms of five project leaders in Hancock County this year. Both raw rock and acid phosphate will be used in these tests which will include applications of from 200 to 500 lbs. of acid phosphate per acre and from 1000 to 3000 lbs. of raw rock phosphate per acre. Notwithstanding the fact that the results on the Carthage Experiment Field show that rock phosphate has not given large returns, many practical farmers believe that their results have been satisfactory, which is the leading reason for the accurate tests to be made by the cooperators in this project.

PIKE BUYS 21 JERSEY CALVES R. H. Clanahan, agricultural teacher of Pittsfield, and Dean Sneeden, president of the local shipping association, drove 250 miles to Crawford county and bought 21 Jersey calves for club members. The calves all come from members of the Crawford County Farm Bureau. All the calves are from purebred dams with records averaging more than 400 pounds butterfat in a year. Farm Adviser Frazier and E. E. Pifer located the club calves after considerable driving and effort. These heifers will be used as foundation stock for new Jersey herds in Pike county.

RANDOLPH AFTER WILD GARLIC "We have been getting in some 'licks' at wild onion and garlic during the past six or eight months," writes Farm Adviser Secor. "Our plots, started two years ago to demonstrate methods of eradication, have shown conclusively that the pest can be killed. The secretary of the Southern Illinois Millers Association is aiding us in getting control work started in other counties."

WATSON ANSWERS EDITOR ON THE STATE INCOME TAX

Editor, The Chicago Daily News,
Chicago, Ill.

THE reference to the State income tax bill in your news article, April 28, and in your editorial the following day needs correction. The question asked me in the joint legislative hearing in Springfield related to the effect on farmers of the provision permitting any taxpayer on property to deduct his property tax from his income tax. To this question I replied that whether such a deduction is permitted or not, I doubted whether, under present conditions of farmers' income, five per cent of them would pay any income tax.

I call your particular attention to the words "whether such a deduction is permitted or not" and "under present conditions of farmers' income." Both clauses were omitted in the news article, and their omission is the basis of a so-called "admission" on my part. My reply was not an admission but a statement of fact about the income of farmers. Its truth has not been denied and cannot successfully be challenged.

Reference in your editorial to class legislation shows that you have not carefully considered the purpose and effect of the income tax bill. Is it class legislation for farmers and wage earners to offer a constructive measure designed to give owners of real estate and *tangible* personal property (not only farmers, but the much larger number of city and village people) some measure of relief from the unfair burden they are carrying under the present vicious taxing system? Is it class legislation for the minority of Illinois people who own real estate, but pay nearly all of the taxes to ask for a measure requiring some contribution to the cost of government from the greater number of people who have much the larger portion of the income of the State, but pay little or no direct property taxes? If this is class legislation, the revenue amendment which was supported last fall was class legislation. Any other remedial measure which might hereafter be offered would be class legislation.

We hold that the present unfair taxing system, which is taking an increasing proportion of the return produced by property, is class legislation, not designed to be such but not less effective than if it had been designed.

The people who are arousing class feeling are not the proponents of the bill, but the people who profit by the present unfair taxing system and fight every attempt to change it.

Your reference to "various exemptions adopted for their (farmers') special benefit" is also without foundation. Farm property on the assessment books is now only about thirty per cent of the total of all property taxed in the state. The exemptions and deductions provided for income from farm property apply also to income from city and village real and personal property. A very substantial percentage of people owning city and village property have income which, without the exemptions and deductions provided in the bill, would require them to pay an income tax in addition to their property taxes. All authorities agree that farmers have very low net income. If there were no exemptions and deductions provided in the bill, comparatively few farmers would have any taxable net income. These provisions of the income tax bill, therefore, will help owners of city and village property far more than they will help farmers.

Your argument that a tax on the net income of persons would be shifted brings you into conflict with practically all economists. If you were right, the people who have taxable net income would not pay it, but would collect it from others. Why, then, do they (or you) oppose the bill? If some of the provisions of the bill can be made better, why do not they (and you) help to improve it?

Other statements in your editorial betray ignorance of the provisions of the income tax bill and little comprehension of the serious situation it is designed in some measure to relieve. The small amount of tax it would require of people who now pay no direct taxes could not be a burden to them. They would be better citizens if they paid it. It is no defense to say that they pay indirect taxes, for property owners who are taxpayers also pay indirect taxes.

JOHN C. WATSON,
Director Taxation and Statistics.

Income Tax Before Legislature

(Continued from page 2.)

ate after a short, spirited debate, on Thursday morning. The vote was 30 to 11. Senators Rodney Swift and John Denvir attacked the measure bitterly. Voting for the bill were Abt, Bailey, Barr, Bohrer, Boyd, Burgess, Carlson, Dailey, Dich, Dunlap, Emmons, Flagg, Forrester, Hamilton, Jewell, Kessinger, Lantz, McNay, Meents, Meyers, Reynolds, Learcy, Smith, Sneed, Starr, Telford, Thompson, Urlson, and Woods. Denvir voted *for* to enable him to enter a motion for reconsideration the following week. Against the bill were Barbour, Boehm, Broderick, Courtney, Haenisch, Huebsch, Hughes, Joyce, McDermott, Marks, Swift. This bill has a good chance to pass in the House next week. There is no reason why the Chicago Board of Trade should not be subjected to the same supervision as are banks, public utilities, and insurance companies. There is a general feeling that the Board would not object to mild supervision such as is imposed by the Kessinger bill if all its dealings were legitimate and above board.

Rush Bills Buried.

The two Rush bills providing for authorizing county advisers to vaccinate pigs against cholera and test cows for tuberculosis are buried in sub committee. These bills are not sponsored by the I. A. A. and will not be supported by the Association. Their passage might lead to ill consequences.

The anti-poultry thief bill sponsored by Prairie Farmer is getting on nicely and will probably go through without opposition. Flood sufferers in the Illinois Valley will be given aid as a result of the passage of the Arnold bill appropriating $250,000 for this purpose. The University of Illinois appropriation measure passed without dissent. The well known woman's eight hour bill regulating the hours women may work to a maximum of eight daily, lost by three votes. Lottie Holman O'Neill, its sponsor for the past three of four sessions, promises to stage a comeback in the next General Assembly. Watch for the next legislative story in the I. A. A. Section of the Bureau Farmer.

MISSOURI CUTS LAND AS SESSMENTS

The State Board of Equalization recently voted to cut farm land valuations for assessment purposes $21,281,930 announces the Missouri Farm Federation. The net reduction in other farmer owned property consisting of livestock and machinery amounted to $3,249,688 below last year.

"This reduction in valuations comes after many months of work by the Missouri Farm Bureau Federation first with the assessors before the assessments were made, then in rendering assistance to the assessors in helping them arrive at fair valuations of the various classes of property," says the M. F. B. News.

The Missouri Farm Bureau appeared before the State Tax Commisison and the State Board of Equalization frequently to present the need for a true valuation of fram property. There was a slight increase in valuations on sheep and a larger one on hogs.

The total net reduction, however, on all classes of farm property amounts to $24,531,618. Should the state tax rate this year total 12 cents on $100 valuation, this reduction will mean a saving of $29,437.92 to the farmers of Missouri.

Bloomington Dairymen Organize

Milk producers about Bloomington are making rapid progress with their new association modeled after the one at Peoria. More than one-third of the dairymen have already joined the organization. One of the three larger dealers recently started price cutting by selling ten milk tickets for one dollar, which means a drop in the retail price of 1½ cents a quart.

I. A. A. Briefs

Eighty farm bureaus are now writing auto insurance in the Illinois Agricultural Mutual. Applications totaling 3570 were in the office the first week in May. Ten thousand applications by Aug. 1 is the goal of V. Vaniman in charge of promotional work.

Farm crop hail insurance signed up to date totals $62,000. The goal set by the Farmers Mutual Reinsurance Co. for the season is $4,000,000.

Fruit and garden truck hail insurance written the first of May amounted to $264,700. Cancellations due to frost totaled $45,000, leaving a net of $219,700.

The Illinois Farm Supply Co., has already handled 18 cars of kerosene, 13 cars of gasoline, and six cars of lubricating oils, besides miscellaneous supplies and equipment. The company was incorporated Mar. 7, 1927, under the cooperative marketing act of 1923. Officers are M. G. Van Buskirk, president; G. F. Tullock, vice-president; A. R. Wright, secretary, and R. A. Cowles, treasurer. The Board of Directors includes the president, vice-president, secretary, and E. D. Lawrence, M. G. Lambert, W. A. Dermis, L. R. Marchant, Harry Jewell and Sam Sorrells. Membership contracts are now being received from the local farm bureau oil companies about the state.

Twenty-one limestone quarry companies have signed agreements with the I. A. A. providing a 10c per ton discount to all farm bureau members. Phosphate companies will continue to operate under an agreement similar to that of last year. Shipments of phosphate so far this year have been slightly heavier than in 1925 and 1926.

Higher limits of coverage for public liability damage will probably be made available soon to auto owners by the Illinois Agricultural Mutual Insurance Co., at small additional cost. Reinsurance in larger companies makes these higher limits possible without jeopardizing the success of the company.

The I. A. A. auto insurance company placed 2939 policies in force during April. Premium deposits during the month amounted to $29,520; policy fees $14,685; surplus shares $34,990. Premiums earned against which losses and expenses for the month may be charged were $4,382.

Twenty-three claims were reported with losses incurred of $1,357.56, or a loss ratio of 31 per cent. Fifteen claims came under collisions, five under property damage and one each under public liability, and fire and theft.

Community High Schools and Taxes

TOWNSHIP and community high schools in Illinois increased from 84 in 1923 to 495 in 1924. During the same period the enrollment and current expenditures of these schools increased 425 and 800 per cent respectively. In 1923, the rural districts included in 210 townships and community high school districts, comprised 37.68 per cent of the school population, furnished 30.41 per cent of the high school enrollment, paid 56.44 per cent of the high school taxes, and received only 22.28 per cent of the estimated net income of the people in the districts. This is the striking information revealed in a study entitled, "The Distribution of the Tax Burden of Township and Community High Schools in Illinois," by Carl Althaus, now assistant professor in the University of Kansas who completed an exhaustive investigation under commission from the Educational Committee of the I. A. A. in 1923.

Area Varies

The area of the 210 districts on which the study is based ranged from 12 to 120 square miles, the average being 49 square miles. In the study the common school district in which the high school building is located is considered urban, and the remainder of the territory is considered rural. The chief motive for combining the rural and urban districts for high school purposes was the financial motive. In over half of the 210 township and community high school districts the urban districts contained a potential majority of the legal voters of the proposed districts. Thus it was possible under the laws which required a favorable majority vote for the urban districts to vote the rural districts into the high school districts even if the rural people were opposed to being included in a township or comunity high school district.

Property subject to taxation in Illinois can be classified into four classes: lands, village and city lots, personal property, and railroad property. In 1923, 46.64 per cent of the total tax burden of township and community high schools was placed on lands while lots, personal property, and railroad property carried 22.51, 19.05 and 11.80 per cent respectively.

Taxed Unequally

"From these data it appears that the rural districts are taxed out of proportion to the benefits they receive, or their ability to pay," stated Althaus in summarizing his study. "The disproportionate distribution is more marked in some districts than others, yet the conditions are so general that it appears that the general property tax which operates in all the districts is the cause for the conditions revealed by this study. The general property tax in Illinois has actually broken down for it causes inequalities between territories, types of property, size of property and classes of people." The author has submitted his study for a doctor's degree at the University of Chicago. The 100 page book embodying the study complete with charts and figures is just off the press. Its price is $1.00 each. Copies may be had by writing the Illinois Agricultural Association, 608 So. Dearborn St., Chicago, enclosing check.

Culp and Higgins Hired

A. B. CULP of Woodford county and F. M. Higgins of LaSalle county have been employed as assistant directors of organization for districts five and six under the new organization plan adopted by the Association. Mr. Culp, who started work May 1, will have direct charge of membership work in the counties of McLean, DeWitt, Logan, Menard, Sangamon, Mason, Piatt, Champaign, Vermillion, and Douglas.

Mr. Culp is a charter member of the Woodford County Farm Bureau. He started soliciting for the I. A. A. in 1919 and has been at it almost continuously since then. He will make Champaign his headquarters where his son will enter the University of Illinois.

F. M. Higgins of LaSalle county is a journalist-farmer with 20 years of newspaper experience, and a considerable career of farming back of him. Higgins became active in farm bureau work early in the history of the organization. Following the death of his wife in 1918 he returned to his LaSalle county farm to live with his daughter and son-in-law. He joined the LaSalle County Farm Bureau in June, 1918, where he has been a staunch supporter continuously since that time. In 1922 he started out as a special solicitor for the I. A. A. His knowledge of the farm bureau and his firm personal convictions of the need for a powerful farm organization led to his success wherever he went. In the spring of 1924, Higgins left for Nebraska where he spent a year in charge of organization work for the Nebraska Farm Bureau Federation.

He will have direct charge of organization work in the counties of Christian, Shelby, Moultrie, Coles, Edgar, Cumberland, Effingham, Clay, Jasper, Richland, Lawrence, Crawford, and Clark. His headquarters will probably be Mattoon.

Sixty-seven out of 86 counties whose membership expired in the past year have been reorganized with a substantial increase in membership in many counties. Losses were sustained in the Chicago dairy district. The counties of Clay, Clinton, Cumberland, Gallatin, Iroquois, Pope, and Wayne will renew their memberships in 1927.

709,600 TONS LIMESTONE USED IN ILLINOIS IN 1926

A total of 709,600 tons of agricultural limestone were used by Illinois farmers in 1926, according to estimates made by J. R. Bent, director of farm supplies, after reviewing records of the various limestone companies.

This tonnage is double that of any other state in the Union although it is approximately 100,000 tons short of the amount used in 1925. Wet weather and bad roads which prevailed last spring and in late summer and fall retarded Illinois from beating its former high record according to Bent.

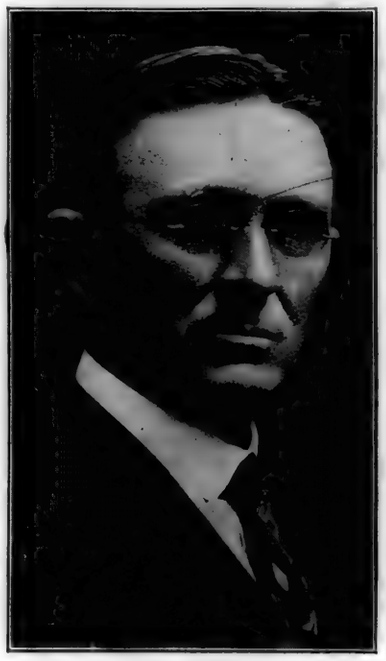
St. Clair county placed first in the state with a total tonnage of 43,500, exceeding its former record of 37,000 tons used in 1925. According to Bent, this is perhaps the greatest tonnage ever used by any one county in the United States.

Randolph county placed second with 32,500 tons, Washington third with 24,500, Madison fourth with 23,100 tons, Clinton fifth with 23,000, and Monroe sixth with 20,000 tons. Twenty counties used 10,000 tons or more each.

To maintain a supply of calcium carbonate in the soil essential to soil neutrality would require the use of approximately 2,000,000 tons annually in this state, according to Mr. Bent.

Richardson Hired

A. E. Richardson, formerly with the Pure Milk Association, was employed recently as field representative for the Illinois Agricultural Mutual Insurance Co. Mr. Richardson will work with V. Vaniman, field manager, in selling auto insurance to farm bureau members. Ten thousand policy holders by Aug. 1 is the goal of the company.



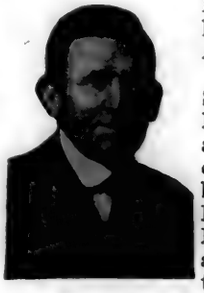
A. E. Richardson

Richardson helped organize the State Farm Mutual Auto Insurance Co. of Bloomington back in 1922. Later he solicited members for the I. A. A. under J. C. Sailor and G. E. Metzger, did organization work in the St. Louis dairy district and more recently acted as director of organization for the Pure Milk Association.

Richardson, who is 39 years old, is the son of Hon. John C. Richardson of Edinburg, Christian county, Ill., a member of the State legislature for 18 years.

Heavy barrows will be eligible to compete in the individual classes at the International Live Stock Exposition at Chicago, Nov. 26 to Dec. 3, according to a recent decision of the Board of Directors.

OVER THE TOP



John L. Eustis.

Under the leadership of John L. Eustis, chairman of the auto insurance committee, LaSalle county members went over the top in their recent auto insurance drive and secured 229 applications or 22 per cent of the 1041 Farm Bureau members.

Macomb District Conference

Full approval and commendation of the Illinois Agricultural Association's legislative program was expressed in resolutions at the District Conference held at Macomb on April 22.

W. H. Moody

President Earl C. Smith reviewed the I. A. A. legislative activities before the conference of members from Rock Island, McDonough, Hancock, Mercer, and Warren counties. W. H. Moody, representative on the Executive Committee from the district, presided.

The field service program in behalf of the Producers' Commission Association was discussed and full approval given.

It was recommended that the I. A. A. use its influence to secure farm speakers on chautauqua programs. The meeting went on record in favor of holding the next annual meeting of the Association at Rock Island. The district conference idea was highly commended and the next one scheduled for September.

Senator Capper Addresses I. A. A. Executive Committee

A HEARTY endorsement of the grain exchange regulatory measure drafted by the I. A. A. and introduced in the state senate by Senator Harold C. Kessinger of Aurora was given by U. S. Senator Arthur Capper of Kansas before the executive committee at its last meeting on May 6.

Arthur Capper

"My own state will be greatly pleased if this bill passes and becomes law," declared the senator. "There is a growing feeling that something is wrong on the Chicago Board of Trade, and there is a general lack of confidence by the public at large in this exchange.

A state regulatory commission would help rather than hinder the Board, he said, because it would tend to restore public confidence. He stated that the Capper-Tincher Act had done some good but had not come up to expectations in purging the exchange of all suspicions of guilt and shady practices.

Senator Cuthbertson, chairman of the Committee on Education in the Senate has asked John C. Watson, director of taxation and statistics, to review carefully his bill amending the state school fund statute and to make suggestions on other proposed school legislation.

Danville and Rock Island Invite I. A. A.

DELEGATIONS from both Danville and Rock Island appeared before the Executive Committee on May 6 to ask for the next Annual Meeting of the I. A. A.

The new Hotel Ft. Armstrong and theatre seating 2,000 people as well as the U. S. Arsenal were the big attractions offered the I. A. A. delegates and members by Walter F. Archer, representing the Rock Island Chamber of Commerce. Farm Adviser S. S. Carney and W. H. Moody supported Archer in the invitation.

Farm Adviser Otis Kercher brought up an invitation committee from Danville. Allen T. Gordon, secretary of the Chamber of Commerce, Frank P. Myers, a local merchant, and President Lenhart of the Vermilion Farm Bureau all collaborated in persuading the committee to come to Danville. "We have everything at Danville," said Myers, the chief spokesman. "Just name it and we'll deliver."

The committee will probably announce its selection at an early date.

Legislature Draws to Close

Gas Tax, Increased Bonding Bills, Appropriations, and Traction Feature Last Week's Session

THE Fifty-Fifth General Assembly is scheduled to adjourn this week. While there is nothing in the law to prohibit the session continuing, any bills passed and signed after June 20, can not become effective until July, 1928. Hundreds of measures, both good and bad, are listed on the calendar or lie in committee, and the mad scramble has begun to put them through before the curtain goes down next Saturday.

A. Otis Arnold

The Arnold gas tax bill, Chicago's increased bonding and traction measures, Lee O'Neil Browne's vitriolic reply to the Chicago Tribune's recent attack on him, and the omnibus bill were the prominent subjects at the Legislature last week.

The fight over the gas tax opened on Wednesday afternoon when this bill was called up on second reading by Rep. Arnold. Cook county members sought at once to strike out the enacting clause, but a motion to that effect by Weber lost eighty-two to sixty-one. Failing in this attempt, Rep. Schnackenberg offered an amendment providing for a referendum on the proposition at the next general election. This motion, likewise, was defeated but by a smaller margin.

The debate was continued on Thursday morning when David Hunter, Jr., of Rockford, submitted an amendment providing for the distribution of the gas tax funds on a 70-30 basis with seventy per cent refunded to the counties, thirty-five per cent on the basis of hard road mileage, and thirty-five per cent on the basis of license fees. His amendment provided further for collection of the tax by the Secretary of State instead of by the Department of Finance.

Amendments Voted Down

Homer Tice of Greenview defended these amendments on the floor of the House in which he repeatedly referred to the I. A. A. asking that the Association endorse them because the new plan offered more money to the counties to build secondary farm to market roads. He further attacked the provision in the bill for the refunding of fifty per cent of the funds to the counties after expenses for administering the act had been deducted.

"This leaves a loophole for an unlimited number of political appointees and white-collared loafers," he said. "Why they can have an inspector in every filling station in the state to administer the act at such expense that little money will be left to build roads."

This criticism was obviated, however, when Rep. Arnold of Quincy introduced a bill providing for

A SCENE at Mooseheart showing the beautiful lake and dam where the I. A. A. picnic will be held on Thursday, Aug. 11. Preparations are under way to entertain a crowd of 50,000 people.

only $50,000 to administer the act if it passes. At the same time Arnold introduced bills appropriating $9,200,000 for refunding to the counties to build roads, and $1,840,000 for rebates on gasoline not used in motor cars, should the gas tax measure pass.

Rep. Little of Champaign attacked the measure because he said, "there are too many strings tied to the money to be refunded to the counties." A spirited debate continued with Arthur Roe of Vandalia, Wood of Keenes, Moore of Kewanee, Snell of Macoupin County, and Arnold of Quincy defending the bill.

Amendments were offered repeatedly by O'Grady and Lyons of Cook, Tice of Menard, and others, but all these were voted down. The opponents then withdrew, and allowed the bill to go along to third reading when it is expected to pass and be referred to the Senate.

Fight Awaits In Senate

The I. A. A. sponsored the measure bearing Rep. Arnold's name after much deliberation because it considers the bill most fair and acceptable to all interests concerned. Cook county legislators have repeatedly taken the narrow and selfish view that it is not concerned in the downstate road program and hence is opposed to any gas tax. They continually belabor downstate representatives for lack of cooperation, but on an issue such as this one which concerns the entire state, oppose it because the rest of the state will get a slightly larger piece of the pie than the county of Cook.

The amended gas tax provides that fifty per cent of the funds so derived will be returned to the counties to build and maintain state aid roads under state supervision. Such funds may also be used to retire bonds already issued for roads within the county. A fight awaits the measure in the Senate when it passes the House, but with the amendments noted it is expected to pass and be signed by the governor.

School Bill Amended

The Cork bill which would more than double the maximum non-high school tax rate was further amended in the Senate on Tuesday when Cuthbertson secured an amendment reducing the maximum rate from $1.25 to $1.00 per $100 valuation. Hicks had previously amended the bill reducing the rate from $1.50 as provided in the original bill to $1.25. The present law allows a levy of only 66-2/3 cents per $100 valuations. The Cuthbertson amendment is in line with the I. A. A.'s thought on this question, and allows enough taxing power to any district whose assessed valuations are at the state level.

The McCarthy Public Warehousing bill, H. B. 553, was up before the Senate Committee on Agriculture on Wednesday morning when I. A. A. amendments were submitted by Senator Cuthbertson. Section 6 B of the act would validate all trades and transactions on the Chicago Board of Trade whether they are legal or otherwise. R. A. Cowles and Donald Kirkpatrick appeared before the committee against this provision contending that it did not belong in the bill in the first place, and moreover would legalize dishonest transactions contrary to the interests of the public and particularly farmers.

Senator Swift upheld the provision claiming it was germane to the bill and necessary to protect the millers who buy wheat and sell flour on contract, hedging their purchases to protect themselves against market fluctuations. Senator Dunlap defended the I. A. A. amendments to strike out Section 6 B. Senator Meents admitted the bill would be stronger without 6 B although he saw no harm in it. Cuthbertson's motion to strike out the section was sustained a moment later and the bill was reported out with the recommendation that it do pass as amended.

H. B. 471 O'Hair, known as the fertilizer bill, was amended in the Senate Agricultural Committee on motion by Senator Dunlap to exclude nitrate of soda, and nitrate and sulphate of ammonia from the provisions of the act. Sen. Dunlap claims that these fertilizers do not need to be tagged, and that the tax for this purpose would just handicap and increase the cost of these fertilizers to the fruit growers who use this material. The state department of agriculture contended that these materials ought to be tested, analyzed and tagged to safeguard the smaller buyers. Senator Dunlap, who is one of the largest fruit growers in the state, promised to look into this feature before the bill comes up for passage.

Bonding Bills Win

A sharp encounter between friends and enemies of the Chicago increased bonding measure, S. B. 446, occurred in the House Revenue Committee on Wednesday afternoon. This bill would double the bonding power by doubling the assessed valuations, in every taxing district of Illinois. Corporation Counsel Ettelson of Chicago and his colleagues appeared in defense of the measure again with the argument that Chicago can not go forward with its public improvements and school building program unless it has authority to issue the bonds the people have already voted.

Margaret Haley of the Chicago Teachers' Federation and Harris Keeler of the Public Bureau of Efficiency of Chicago maintained that the bill was not needed, that the $35,000,000 of bonds just voted could be issued when the money was needed. Nevertheless, when put to a vote, this bill together with S. B. 447-532 which cut the maximum tax rates in half in taxing districts throughout the state, were passed out fifteen to eleven with favorable recomendation. The I. A. A. fought these measures with all its strength. The vote of downstate members who were not representing the interests of their constituents when they voted for these measures, was responsible for them going to the floor of the House. The roll call vote on S. B. 446 which doubles assesed valuations throughout Illinois follows.

For: Overland, Beckman, Elrod, E. A. W. Johnson, Juul, Phillips, Schnackenberg, Stewart, Swanson, McClugage, McSweeney, Rategan, Minsky, Lipka, O'Brien. McClugage explained his vote saying he would vote against the bills on the floor of the House. Igoe voted present.

Against: Chr. Hutson, Hunter, Allen, Church, Clark, Vaughan, Warren, Wylie, Gill, Fahy, Hennebry.

It is hard to understand how any legislator could be for these bills, much less a downstate representative when they open wide the gates for higher taxes.

The vote on the other measures S. B. 447-532 was the same.

Senate Bills Delayed

The Board of Trade bill, S. B. 148, was not called up this week. Pressure is being brought to bear to prevent the passage of this measure and there are evidences of influence to block its further consideration. It was on the calendar, second reading, on Thursday. The I. A. A. will ask to have it brought up for early consideration this week.

The state income tax bill, S. B. 313, was in the same position. An effort will be made to bring it up for early consideration likewise.

The Lantz cornborer appropriation bill, S. B. 553, which would give $30,000 to the state experiment station for special research work on the cornborer, lies in the House Committee on Appropriations facing opposition from certain committee members. It will be brought out early next week, according to present indications, and moved up for passage.

Cooperative Bills

S. B. 366—Lantz—the amendment to the Cooperative Act of 1923 passed the Senate with some bad amendments, which would virtually prevent a cooperative from entering into a contract with a producer, passed the Senate and lies in the House Committee on Agriculture. The same bill H. B. 509—McCarthy—was up on third reading in the House ready for passage on Thursday. The House bill is not amended. This bill will be pushed along to the Senate where an effort will be made to pass it without amendment.

H. B. 578—Tice—the grain warehousing on farms bill is up on third reading in the House. Its companion measure S. B. 433—Cuthbertson—has passed the

(Continued on page 8.)

Talks to Bankers

"AGRICULTURAL assets have been depleted some $20,000,000,000 in the past five years. In ten years the indebtedness of agriculture has increased from $3,320,000,000 to $12, 250,000,000. The total value of Illinois farms in 1920 was $5,250,294,752 and by the close of 1925 they had decreased to $3,428,229,461, showing a loss of $1,822,065,291."

Earl C. Smith

This is part of the story told the organized bankers of Illinois by President Earl C. Smith, who recently completed a speaking tour before ten group conferences of the Illinois Bankers Association.

"We all enjoyed having you with us on the trip, and I want to thank you most sincerely for your splendid contribution to the program," said M. A. Graettinger, secretary of the Illinois Bankers' Association, in a letter to President Smith. "I feel that your efforts have spurred the interest of the bankers in the agricultural problem as it has never been done before and I am sure that this will lead to some helpful action on the part of the association within a short time."

Stops were made at Barry, Litchfield, Murphysboro, Mount Vernon, Casey, Dixon, Kewanee, Peoria, Pontiac, and Woodstock.

NEW LIVESTOCK DIRECTOR

RAY E. MILLER of Quincy, Ill., farm adviser in Adams County, has been employed as director of livestock marketing for the Illinois Agricultural Association, to succeed Wm. E. Hedgcock, who recently tendered his resignation. Mr. Miller will also serve as director of field service for the four cooperative livestock producer agencies operating in the Illinois territory under the terms of an agreement entered into between the Illinois Agricultural Association and these Producer Agencies. The organizations concerned are the Chicago Producers' Commission Association, Producers' Commission Association, Indianapolis, Peoria Producers' Commission Association, and the Producers' Livestock Commission Association, National Stock Yards, Ill.

Ray E. Miller

Mr. Miller will assume his new duties about July 1. He is a graduate of the University of Missouri and during his four years' employment as farm adviser in Adams County established an enviable record of accomplishment. Adams County has the reputation for shipping more livestock cooperatively than any other county in the state. Mr. Miller is president of the Illinois Association of Farm Advisers. He will probably establish residence in Chicago. Miller is married and has one daughter.

INDIANA FARM BUREAU GETS INTO TAX FIGHT

THE Indiana Farm Bureau is taking the lead in a statewide campaign to lower assessed valuations of farm lands. In a series of meetings conducted by the state board of tax commissioners throughout the state, the Farm Bureau showed that assessed valuations on farm lands are higher than their actual selling value.

The State Board under the law must equalize valuation.

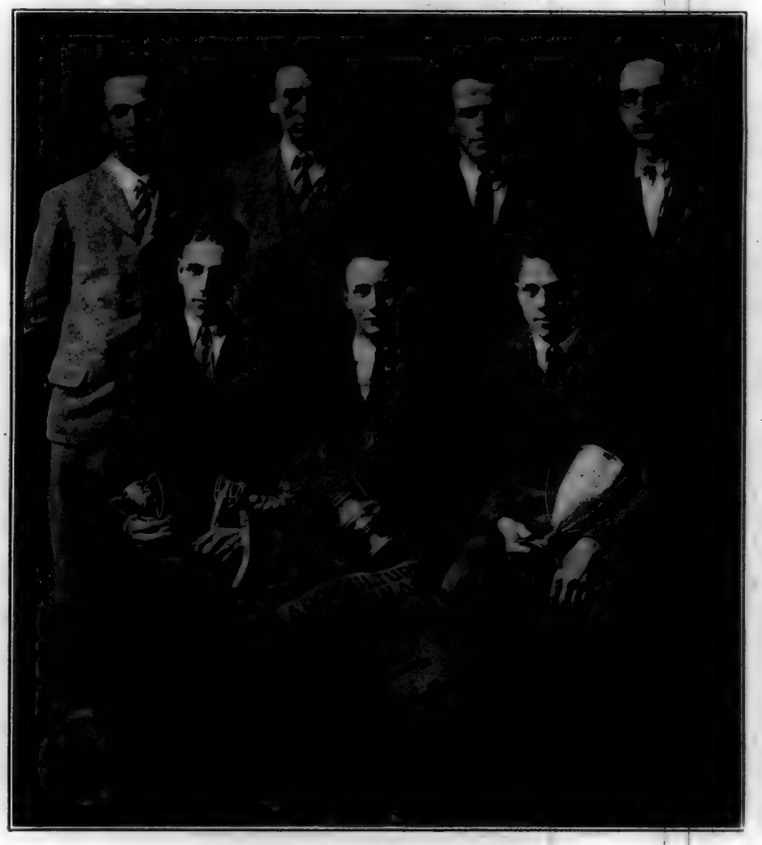
Smith Speaks at Centralia

President Earl C. Smith addressed a joint luncheon of 120 farmers and business men at Centralia on Friday, June 3.

W. L. Cope

"It was a fine meeting and there ought to be more like it throughout Illinois," said W. L. Cope, I. A. A. Executive Committeeman from Salem, who introduced the speaker. The meeting had been arranged by the Centralia Commercial Club with the help of A. B. Leeper, manager of the Illinois Fruit Exchange.

The ninth annual meeting of the American Farm Bureau Federation will be held at the Sherman Hotel, Chicago, Dec. 5, 6, and 7, 1927, according to a recent announcement of President Sam H. Thompson.



ROCK ISLAND GETS MEETING

Rock Island will be the scene of the next annual meeting of the I. A. A., according to a decision of the Executive Committee in session last week.

W. H. Moody

The decision lay between Danville and Rock Island, although Peoria made an effort to bring the convention back to that city through the efforts of Mike Finn of the Peoria Chamber of Commerce and Wilfred Shaw, farm adviser. W. H. Moody, member of the committee, made an earnest plea in behalf of Rock Island, while R. F. Karr spoke for Danville. The members voted eight to five for the western Illinois city. The convention will be held Jan. 18, 19 and 20, 1928. Rock Island, old stamping ground of Blackhawk, should provide an interesting setting for the meeting.

JUDGING CONTEST WINNERS

These boys from the Chenoa High School placed first in their section in the recent livestock judging contest, held at the University farm, Normal, Ill.

Top row, left to right, are Lowell Gerdes, Arthur Downs, Kenneth Jordon and J. A. Twardock, coach.

Bottom row: Kenneth Mears, Edwin Rhoda and James Andes.

They placed first in dairy, third in fat stock judging, and first in placing sheep. Mears won first and Andes third in individual judging.

Sixteen schools and 200 contestants competed.

I. A. A. PICNIC MAKES PROGRESS

"We are getting ready to entertain a crowd of 50,000 people at Mooseheart on Aug. 11" is the optimistic note expressed by Harry P. Kelley, Kane county farm adviser, who is chairman of the general committee for the I. A. A. State Picnic. Following are the names of the people who will see that the picnickers get a royal welcome.

I. A. A. Picnic Committees.

General—H. P. Kelley, Geneva, chairman; Theodore G. Miller, Mooseheart, secretary; John Esser, Aurora, treasurer.

Finance—C. B. Hagams, Geneva, chairman; C. W. Tennant, Aurora; Karl Stouffer, Elgin; Robert B. Irwin, Aurora; John Geiss, Batavia; O. G. Olwin, DeKalb; Wm. Webb, Plainfield; J. F. Betz, Oswego; Dr. Fred Miller, Elgin.

Sports—Glenn Warne, Sugar Grove, chairman; Dan G. Davies, Sugar Grove; Harry Gilkerson, Libertyville; Raymond Nelson, DeKalb; Harrison Fahrnkopf, Bloomington.

Program—Col. Frank D. Whipp, St. Charles, chairman; Rodney Brandon, Mooseheart; J. F. Hedgcock, Joliet; J. A. Young, Aurora.

Women's Program—Miss Lulu Black, Geneva, chairman; Mrs. I. R. Judd, Aurora; Mrs. Harvey Fraley, Naperville.

Grounds—Homer McCoy, Mooseheart, chairman; E. A. Carncross, Wheaton.

Publicity—J. W. Lino, Aurora, chairman; Malcolm Watson, Yorksville; Lewis Murkvicka, Aurora; K. White, Elgin.

Concessions—M. F. McCarty, Aurora, chairman.

only $50,000 to administer the act if it passes. At the same time Arnold introduced bills appropriating $9,200,000 for refunding to the counties to build roads, and $1,840,000 for rebates on gasoline not used in motor cars, should the gas tax measure pass.

Rep. Little of Champaign attacked the measure because he said. "there are too many strings tied to the money to be refunded to the counties." A spirited debate continued with Arthur Roe of Vandalia, Wood of Keenes, Moore of Kewanee, Snell of Macoupin County, and Arnold of Quincy defending the bill.

Amendments were offered repeatedly by O'Grady and Lyons of Cook, Tice of Menard, and others, but all these were voted down. The opponents then withdrew, and allowed the bill to go along to third reading when it is expected to pass and be referred to the Senate.

Fight Awaits In Senate

The I. A. A. sponsored the measure bearing Rep. Arnold's name after much deliberation because it considers the bill most fair and acceptable to all interests concerned. Cook county legislators have repeatedly taken the narrow and selfish view that it is not concerned in the downstate road program and hence is opposed to any gas tax. They continually belabor downstate representatives for lack of cooperation, but on an issue such as this one which concerns the entire state, oppose it because the rest of the state will get a slightly larger piece of the pie than the county of Cook.

The amended gas tax provides that fifty per cent of the funds so derived will be returned to the counties to build and maintain state aid roads under state supervision. Such funds may also be used to retire bonds already issued for roads within the county. A fight awaits the measure in the Senate when it passes the House, but with the amendments noted it is expected to pass and be signed by the governor.

School Bill Amended

The Cork bill which would more than double the maximum non-high school tax rate was further amended in the Senate on Tuesday when Cuthbertson secured an amendment reducing the maximum rate from $1.25 to $1.00 per $100 valuation. Hicks had previously amended the bill reducing the rate from $1.50 as provided in the original bill to $1.25. The present law allows a levy of only 66-2/3 cents per $100 valuations. The Cuthbertson amendment is in line with the I. A. A.'s thought on this question, and allows enough taxing power to any district whose assessed valuations are at the state level.

The McCarthy Public Warehousing bill, H. B. 553, was up before the Senate Committee on Agriculture on Wednesday morning when I. A. A. amendments were submitted by Senator Cuthbertson. Section 6 B of the act would validate all trades and transactions on the Chicago Board of Trade whether they are legal or otherwise. R. A. Cowles and Donald Kirkpatrick appeared before the committee against this provision contending that it did not belong in the bill in the first place, and moreover would legalize dishonest transactions contrary to the interests of the public and particularly farmers.

Senator Swift upheld the provision claiming it was germane to the bill and necessary to protect the millers who buy wheat and sell flour on contract, hedging their purchases to protect themselves against market fluctuations. Senator Dunlap defended the I. A. A. amendments to strike out Section 6 B. Senator Meents admitted the bill would be stronger without 6 B although he saw no harm in it. Cuthbertson's motion to strike out the section was sustained a moment later and the bill was reported out with the recommendation that it do pass as amended.

H. B. 471 O'Hair, known as the fertilizer bill, was amended in the Senate Agricultural Committee on motion by Senator Dunlap to exclude nitrate of soda, and nitrate and sulphate of ammonia from the provisions of the act. Sen. Dunlap claims that these fertilizers do not need to be tagged, and that the tax for this purpose would just handicap and increase the cost of these fertilizers to the fruit growers who use this material. The state department of agriculture contended that these materials ought to be tested, analyzed and tagged to safeguard the smaller buyers. Senator Dunlap, who is one of the largest fruit growers in the state, promised to look into this feature before the bill comes up for passage.

Bonding Bills Win

A sharp encounter between friends and enemies of the Chicago increased bonding measure, S. B. 416, occurred in the House Revenue Committee on Wednesday afternoon. This bill would double the bonding power by doubling the assessed valuations, in every taxing district of Illinois. Corporation Counsel Ettelson of Chicago and his colleagues appeared in defense of the measure again with the argument that Chicago can not go forward with its public improvements and school building program unless it has authority to issue the bonds the people have already voted.

Margaret Haley of the Chicago Teachers' Federation and Harris Keeler of the Public Bureau of Efficiency of Chicago maintained that the bill was not needed, that the $35,000,000 of bonds just voted could be issued when the money was needed. Nevertheless, when put to a vote, this bill together with S. B. 447-532 which cut the maximum tax rates in half in taxing districts throughout the state, were passed out fifteen to eleven with favorable recomendation. The I. A. A. fought these measures with all its strength. The vote of downstate members who were not representing the interests of their constituents when they voted for these measures, was responsible for them going to the floor of the House. The roll call vote on S. B. 446 which doubles assesed valuations throughout Illinois follows.

For: Overland, Beckman, Elrod, E. A. W. Johnson, Juul, Phillips, Schnackenberg, Stewart, Swanson, McClugage, McSweeney, Rategan, Minsky, Lipka, O'Brien. McClugage explained his vote saying he would vote against the bills on the floor of the House. Igoe voted present.

Against: Chr. Hutson, Hunter, Allen, Church, Clark, Vaughan, Warren, Wylie, Gill, Fahy, Hennebry.

It is hard to understand how any legislator could be for these bills, much less a downstate representative when they open wide the gates for higher taxes.

The vote on the other measures S. B. 447-532 was the same.

Senate Bills Delayed

The Board of Trade bill, S. B. 148, was not called up this week. Pressure is being brought to bear to prevent the passage of this measure and there are evidences of influence to block its further consideration. It was on the calendar, second reading, on Thursday. The I. A. A. will ask to have it brought up for early consideration this week.

The state income tax bill, S. B. 313, was in the same position. An effort will be made to bring it up for early consideration likewise.

The Lantz cornborer appropriation bill, S. B. 553, which would give $30,000 to the state experiment station for special research work on the cornborer, lies in the House Committee on Appropriations facing opposition from certain committee members. ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the farm bureau was organized, namely to promote, protect and represent the business, economic, social and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Published once a month at 404 North Wesley Ave., Mount Morris, Illinois, by the Illinois Agricultural Association. Edited by Department of Information, E. G. Thiem, Director, 608 South Dearborn Street, Chicago, Illinois. Entered as second-class matter October 20, 1925, at the post office at Mount Morris, Illinois, under the Act of March 3, 1879. Acceptance for mailing at special rate of postage provided for in Section 412, Act of February 28, 1925, authorized October 27, 1925. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the ILLINOIS AGRICULTURAL ASSOCIATION RECORD. Postmaster: In returning an uncalled for or missent copy, please indicate key number on address as is required by law.

The Attacker's Advantage

IN ANY dispute or argument hinging upon a constructive piece of legislation or program the critic or opponent always has the proponent on the hip. If he is a clever liar, he can raise more false issues and befuddle the minds of the credulous public so completely that the proponent on the defensive is always at sea.

Smoke screens are no less effective in a battle of words and ideals than they are in actual warfare. False bogies become real to the casual reader. They only fall to the ground under the thoughtful scrutiny of the careful observer.

Producer's Agreement Signed

FOR the past year an agreement has been pending between the I. A. A. and the Livestock Producers' Association at Chicago, Peoria, Indianapolis, and E. St. Louis. The agreement provides for a statewide field service arrangement to be administered by a joint field service committee consisting of one representative each from the four agencies, one from the National Producers' Commission Association, two from the I. A. A., and one from the American Farm Bureau Federation. This agreement has finally been accepted by all interested parties. Announcement of the details of the new plan will be made in the near future.

The Raid Is On

THE expected raid on the tax payers, predicted when Mayor Thompson's eighty-seven revenue bills were cast into the legislative hopper, has already become real. The county clerks were the first on the scene at Springfield last week putting in their bid for more taxing power. They showed up en masse to amend Senate bill 518 so as to increase the maximum tax rate for general county purposes sixty per cent.

They would do this very innocently and unobtrusively, but cleverly. S. B. 446 provides that assessments hereafter shall be based on full valuations instead of half thereof as at present. To leave tax rates the same would double all taxes, so Mayor Thompson had eighty-six other bills drawn up each of which cuts the maximum tax rate fifty per cent in one or another taxing district in Illinois.

The result of all this is to keep taxes where they are but to double any district's bonding power. At present, the limit of bonding power in a district is five per cent of the assessed valuations. By doubling the assessed valuations, the effect is the same as increasing the bonding power to 10 per cent. That's so Chicago can continue its orgy of spending unhampered by legal restraints.

Farmers don't object to Chicago doubling its bonded debt but they are against allowing their own counties and communities to do likewise.

The county clerks want to reduce the maximum tax rate for county purposes from fifty to only forty per cent instead of to twenty-five as provided in S. B. 518. It looks like an innocent enough proposal, but it may saddle sixty per cent more taxes on the farm and home owners. This is only one of many more raids to follow.

The only thing to do is to beat the increased bonding bill and its retinue of eighty-six dependent allies. That's what will happen in the House next week if each member tells his representative how he stands on these measures.

Can and Can't

THE amusing statement presented below which has been going the rounds among the county farm bureau papers in Illinois is indicative of the farmers' reaction to the diversification argument, as outlined in the Coolidge veto message on the McNary-Haugen bill:

"Diversification is the hope of agriculture, according to the 'farmer' from Vermont. We are in the midst of one of the best diversified agricultural regions in the nation, yet we are also in the midst of the region of agricultural depression.

"What is the farmer here to do?

"He shouldn't raise more corn, nor

"He shouldn't raise more oats, and

"He can't raise much more wheat or hay, nor

"He can't raise many more chickens, sheep, cattle, or hogs, with out making them unprofitable.

"He can't raise another loan because he already has a mortgage growing on the ground, and can't cut it.

"He can't raise more children, because he's already supporting twenty-seven per cent of the population on only nine or ten per cent of the national income.

"He CAN raise hell with the administration, and that's what he will raise if he isn't accorded the same rights as others."

Disregarding the political reference, the statement pithily reveals the fallacy of trying to solve a national problem by such a shallow and trite recommendation. Which is more dangerous to our national welfare and security, a crop shortage or a surplus? Then again, who is to cut acreage? Who can say how much of any crop farmers shall produce to insure them a reasonable profit? Who is qualified to tell how many acres are required to grow a given number of bushels without accurate long distance weather forecasts?

These are some of the questions the diversification and reduced acreage theorists must answer satisfactorily before farmers will abandon their own solution for the surplus problem.

What The I. A. A. Is Doing

FRUIT AND VEGETABLE RATES IN DANGER The Illinois Central Railroad, the Chicago & Eastern Illinois, and other railroads operating in Illinois, Indiana, and Ohio, have asked the Interstate Commerce Commission for permission to cancel out their present rates on fruits and vegetables applying from points in Illinois and Indiana to Chicago, and instead, establish substantially higher rates. This action is based upon the case in which the I. A. A. was active two years ago when a very substantial increase in Illinois rates was prevented. The railroads are now making another effort to boost Illinois rates. L. J. Quasey, director of transportation, will file a protest against rate increases on the ground that the economic position of the fruit grower in Southern Illinois is such that they can not stand any further handicaps.

PEACH RATES ON I. C. R. R. Negotiations are under way with the Illinois Central Railroad Company for a reduction in the minimum weight on peaches from 24,000 pounds to 20,000, and to apply the same rate on peaches southbound as that applicable on peaches northbound from Georgia. If we are successful in bringing this about, it will result in a very substantial reduction to our people.

FEEDING-IN-TRANSIT ON WABASH As a result of our efforts, the Wabash Railroad Company has put into effect a feeding-in-transit rate on cattle and sheep so that they may be stopped in transit for grazing or fattening at a very substantial saving in freight on the through movement to market. This applies to points on the Wabash intermediate to Chicago.

REDUCTION ON C. & E. I. R. R. As a result of our negotiations with the C. & E. I. Railroad Company a reduction in stocker and feeder rates has been granted from the National Stock Yards at East St. Louis, to points on the C. & E. I. railroad in Montgomery County. This makes the rates 25 per cent lower than those previously in effect.

MILK AND CREAM RATES REDUCED On April 15 we reported that the Wabash Railroad Company put into effect increased rates on milk and cream which particularly concerned shippers in and around Raymond, Illinois. We immediately took the matter up with the Wabash Railroad Company and filed informal complaint with the Illinois Commerce Commission. As a result of our action, the Wabash Railroad Company issued their new tariff M-9, to become effective May 28, 1927, reducing the rates practically to their former basis.

STOCK CATTLE RATES The C. & A. Railroad Company has issued a tariff to become effective June 15, 1927, which increases the freight rate from 27 cents to 29 cents a hundred on stock cattle from Kansas City to points in Illinois on the C. & A. and connecting lines. We have filed a petition with the Interstate Commerce Commission opposing this increase.

PROPOSED CANCELLATION OF L. C. L. RATES The railroads are proposing to cancel the less than car load commodity rates on a large number of commodities, including fruits and vegetables, moving between points in Illinois, and to apply a higher class rate. This move is being opposed by this association and other interested parties. Hearings are being conducted jointly by the Illinois Commerce Commission and the Interstate Commerce Commission. The outcome of this proposition will be reported later.

JERSEYVILLE TELEPHONE CASE This case involves a petition by the Jerseyville Telephone Company for an advance in telephone rates in Jersey County. The final hearing was held in Springfield, May 19. Mr. Coddingham, Chairman of the Farm Bureau Committee, Mr. Shuman, farm adviser of Jersey county and L. J. Quasey of the I. A. A., represented farm bureau member subscribers. From the report of the Commission's engineers, it appears that the company will earn on the basis of the present rates, about five per cent, which practically means that the petition for the advance in rates will be denied by the Commission.

ILLINOIS SOUTHERN TELEPHONE CASE We have just received the Illinois Commerce Commission's decision on this case which was heard in Vienna, April 19. The Commission has refused to grant the petition of the company to discontinue free toll service and to abandon certain exchanges. The Commission also ordered the company to re-establish certain service which they had discontinued without authority from the Commission. Immediately after this order was issued by the Commission, the company withdrew another petition which it had filed with the Illinois Commerce Commission affecting telephone service in ten other counties in Illinois. The I. A. A. and the farm bureaus gave the testimony which resulted in the favorable action of the Commission.

CLAIMS COLLECTED From January 1, 1927, to April 30, 1927 the I. A. A. collected $12,306.91 in claims. For the month of May, 1927 the total was $1,767.70 or a grand total of $14,074.61. Of this amount, $6,994.08 was collected in the name of the Chicago Producers' Commission Association for the period from January 1, 1927, to April 30. For the month of May $1,375.27 was collected for the Producers.

AUTO INSURANCE HITS 4000 By the end of May, auto insurance applications in the Illinois Agricultural Mutual Insurance Co., totaled 4,080. The record of the month was 530 applications. The drive for 10,000 applications by Aug. 1 is on. Every Farm Bureau will be asked to devote a week toward securing new policy holders.

HAIL INSURANCE PROVES POPULAR A total of $615,887 worth of fruit and garden truck hail insurance has been written in thirty-one counties. The heavy frost will cut the total amount that would have been written at least fifty per cent. Farm crop hail insurance written up to June 8 totaled $1,133,055 in forty-three counties. The heavy demand for this insurance will come later.

Got Loading Chute

I. A. A. Transportation Dept.:

Referring to your letter of May 26 about stock loading pens at Twin Grove, I am mighty glad to report that these facilities were put in three weeks ago.

Please be assured I greatly appreciate your part in getting this fine accommodation. I think it is an object lesson to my non-farm bureau member neighbor who had repeatedly told me he had tried for twenty years to get what we have just gotten so easily.

E. D. LAWRENCE,
McLean County, Ill.

What the Members Say

EAT MORE EGGS

Editor, I. A. A. RECORD:

THERE is so much talk of helping the farmer, I believe I have a good suggestion to make; one that would help them and also the public. This is the time of the year when the production of eggs is large and they are fresh, and now is the time to get the people to eat them when the farmer is producing, not after the hen has stopped laying and they are in the hands of the speculator.

The crop is the largest in history, and indications are for a heavy lay. I believe you should encourage the farmer and small town population as well as the city dweller to increase their consumption now, and by so doing stimulate prices for the farmer. There is no use to let the speculator put the market down to where it would cost the farmer money to produce, now that the speculator has his load in cold storage to sell next fall at a good profit. Now is the time to start a campaign to eat more eggs while they are fresh, and not wait and let the speculators do it this fall when the hen is through laying. Such an advocation coming from you over the radio and through the press and your papers could make thousands of dollars for the farmer, and cost you nothing as all information is eagerly sought from an organization of your standing by all newspapers and a short talk on the radio nightly by one of your speakers. Hoping you will take some action on the suggestion, I am

WILBUR FULLER,
Cook County, Ill.

A good suggestion, Fuller. Some day farmers will learn to store their own eggs and share in the profits when eggs are high.—Editor.

AGAINST TAXES

Editor I. A. A. RECORD:

I OBJECT to *any* income tax for farmers, in fact if the farmers were exempt from any tax for at least one year it would help regain a little of what they have lost. Speaking for myself I am land-poor and sand land at that which was bought by my father with the laudable desire to make it productive. Buildings and fences and cross fences were a big expense and the feed for the livestock on it has to be bought.

In the course of time by using carloads and carloads of limestone, and growing legumes it has a chance to be more valuable.

I buy corn, and feed it and apparently when the returns come in it might look as though I was making money—but—what about borrowing money at seven per cent to pay for corn and livestock, also hired help at high wages?

I don't believe in the gas tax either, but will not write about that now as I have to take a six mile ride to the farm to see how things are and also work even though I have two high-priced men. I am up at from three to four a. m. retiring at 9:30 or 10:30 p. m., perhaps—indeed most of the time lying awake worrying.

Mine is no rocking chair or swivel chair job I can assure you, and I am tired, tired, tired of these eternal taxes. Just take the farm and be done with it.

A lot of the farmers won't build or improve their property for they know taxes will be increased. Why not legislate for lower prices for the things we have to buy?

There is only one farmer in my community who has bought farm machinery and everyone wonders how he did it.

CATHERINE STEVENSON,
Mercer Co., Ill.

The state income tax is designed to help you, not to add to your burdens. It would exact taxes from the wealthy owners of stocks and bonds, and the salaried workers who now make no direct contribution to the cost of state government. If we had a state income tax, all the burden of taxes would not fall on farms, homes, and real estate as is the case now. Only farmers with large net incomes who pay little or no personal property or land tax would contribute to an income tax, and under present economic conditions, this number is conceded to be very small.—Editor.

BLAMES FEDERAL RESERVE

Editor, RECORD:

I am the man who 'phoned you twice since your talk over the WLS radio station last Thursday. I am the one who blames the Federal Reserve System for the present condition of agriculture all over the country.

I am indeed confident as to my position in this matter; for I have given it much forethought and study since the enactment of the Federal Reserve Act of 1913.

Until 1920, the farmer enjoyed the same so-called prosperity experienced by everybody else; but when the Federal Reserve Board was requested to call in $15,000,000, the grain prices were the first to be affected. When the Federal Reserve called in this $15,000,000 the dollar was and had been for some time worth approximately 33 1/3 cents. With the action of the Federal Reserve Board by order of the Treasury, the dollar advanced from 33 1/3 cents in value to about 75 cents. During this fluctuation, corn dropped from $2.25 a bushel to about $0.30 per bushel; and the farmer was ruined.

At this juncture, the deflation was halted because it was on the verge of affecting general prices to a downward trend. More money was put into circulation which brought the dollar back to about 62 cents where it has remained practically all the time since that time; but grain prices have never been put back to their original point of inflation where other prices still remain, practically.

The foregoing is the story of the calamity. Although it is unnecessary for one to be an expert economist, yet the American people do not understand the reality of the situation; and the so-called agricultural doctors in the form of farm bureaus, cooperative marketing association, and all other organizations connected with the improvement of agriculture are working night and day to figure out the remedy which is indeed simple.

The abolition or modification of the powers of the Federal Reserve are the only two alternatives for the solution of the difficulty. There is absolutely no legislation whose enactment can help agriculture permanently without the abolition or limitation of the Federal Reserve System; and I am ready to stand behind the truth of this statement under all circumstances.

G. REX CLARKE,
Cook County, Ill.

The deflation policy of the Federal Reserve Board following the war, undoubtedly was partially responsible for the rapid fall in farm prices. But this is not the only reason for the continued agricultural depression. The deflation policy affected other commodities as well as farm products. The organized industries, however, were able to check the fall in their prices to some extent by reducing production, whereas agriculture had no effective method of decreasing production and thereby maintaining a fair level of prices.—Editor.

THANK YOU

Editor, I. A. A. RECORD:

I have just received bulletin No. 345 "The Distribution of the Tax Burden In Township and Community High Schools In Illinois" put out by your Association. It is such an excellent piece of work that I must congratulate you upon sponsoring it. Authentic data, intelligently interpreted, is one of the things we need for the improvement of country life.

K. LLEWELLYN MACGARR,
Taylor University, Upland, Ind.

Half Million Left of T. B. Appropriation

Don W. Robison, state superintendent of animal industry, submits the following financial statement on tuberculosis eradication in the State of Illinois for May, 1927:

Indemnity and Expenses Paid and Pending	
APPROPRIATION	$2,000,000.00
Indemnity claims against the State paid since July 1, 1925	$1,058,519.49
Amount of federal claims paid by the State	231,675.37
Expenses incurred since July 1, 1925	156,209.61
Claims pending on 4,251 reactors secured since July 1, 1926, allowing $15 per head. (State share)	63,765.00
Total claims and expenses paid pending	1,510,169.47
Free Balance of Appropriation	$ 489,830.53

Farmers pay approximately 16 per cent of the state auto license fees in Illinois.

Seventy-eight per cent of Illinois farmers live one or more miles off a paved road.

What The Counties Are Doing

KRUG CORN TO 100 CLUB MEMBERS IN MASON

One hundred boys and girls have entered the Corn Club sponsored by the Mason County Farm Bureau. Each member received a supply of Krug corn from the Farm Bureau.

JERSEY HOLDS FEEDING SCHOOLS

One-fourth of the members of the Jersey County Farm Bureau are feeding the modified Wisconsin chick ration as a result of feeding schools held over the county. The ration can be mixed for about $1.50 per cwt. if milk is available, says Frank Shuman, farm adviser.

CONG. BRAND SPEAKS AT DEKALB MEETING

The largest annual meeting since the DeKalb County Farm Bureau was organized in 1912, was the last one on May 10 when 712 sat down to the banquet and heard Congressman Brand speak. Eight hundred attended the meeting. Business men and bankers from over the county as well as farmers were there. The Home Economics girls at the DeKalb High School served.

HANCOCK EMPLOYS INSURANCE SOLICITOR

We recently employed a county insurance representative, L. W. Baxter, who in conjunction with eight or ten local agents will offer mutual automobile insurance in the Illinois Agricultural Mutual Insurance Company and mutual hail insurance on farm crops, fruits, and vegetables in the Farmers' Mutual Reinsurance Company to every member says Adviser J. H. Lloyd. This decision was reached at a recent meeting of the executive committee when unanimous approval of the insurance program was given and the county insurance committee authorized to provide this important service for members.

HENRY COUNTY FARMERS COMPARE CORN IN PLOTS

Six farmers cooperate with the Henry County Farm Bureau in conducting identical corn plots comparing various strains of corn, including a number of hybrids, and checking on the value of disease testing and seed treatment. The men are Morgan Bros., G. E. Hulting, Wm. H. Miller, C. D. Ford, Otto Lundberg, and Lynn and Ephraim Kerr. The task of producing a hybrid especially adapted to Western Illinois has been undertaken by Morgan Bros.

VERMILION SEEKS 30,000 ACRES ALFALFA

Our campaign for 30,000 acres of alfalfa provides for 10 acres on every farm in Vermilion county, says Farm Adviser Kercher. One hundred and five farmers had a total of 1,026 acres according to an initial survey, but new seeding this spring brought the total up to 2,500 acres. One hundred and seventy-five boys and girls are entered in club work.

SCOTT COUNTY HAS SWEET CLOVER DAY

The International Harvester Co., and the John Deere Implement Co., both conducted demonstrations on preparing the seed bed at the Third Annual Sweet Clover Day on May 17 in Scott county. Prof. E. T. Robbins demonstrated multiple hitches. Attendance and interest was good in spite of bad weather, says Adviser Tate. Two hundred girls are entered in the eight 4-H clubs just organized. This is the first girls' club work ever undertaken here.

LAKE COUNTY ENROLLS 150 IN POULTRY CLUB

Lake county recently enrolled 150 members in poultry club work, 75 per cent of which are from non-farm bureau families. We hope to reach the non-member in this way and show him what real Farm Bureau work means, says Farm Adviser Harry Gilkerson. The money to buy eggs was furnished by the Waukegan Chamber of Commerce. Three settings of eggs from good quality stock were distributed to each boy and girl, and in the fall the members are to return one pullet for each setting. These pullets are to be sold at a public show where they have been displayed and awarded premiums. The local Smith-Hughes instructors did most of the work in getting members. A local calf meal company supplied each member with 10 lbs. of chick feed free.

KNOX BOYS AFTER GOLD MEDAL

Competition among our 50 calf members is keen for the gold medal offered by the Chicago Producers Commission Association writes Farm Adviser Marchant. The medal is awarded the most outstanding calf club member, the placing of the calf counting only 25 per cent. This has been an incentive to the members to attend meetings regularly, give reports and discussions, and keep complete feed and management records. All calves on feed this year were purchased locally. Twenty-two are Shorthorns, sixteen Herefords, and twelve Angus. The fifty members feeding these calves are organized into five standard 4-H clubs.

LASALLE HAS GET TOGETHER MEETING

A. C. Everingham, legislative representative of the Illinois Agricultural Association pleaded for elimination of sectional lines and class prejudices before a large gathering of farmers and business men at LaSalle on the night of May 19. "This meeting, in the opinion of our people, was a very successful one," writes Farm Adviser Walter McLaughlin.

NEW WABASH ASS'N. SHIPS 18 CARS LIVESTOCK

Eight cars of livestock were shipped during its first six weeks of operation by the Wabash County Livestock Shipping Association. Farm Adviser Spencer is busy conducting hog cholera vaccination demonstrations.

MARSHALL-PUTNAM FARMERS TREAT CORN

We are emphasizing the mercury treatment for seed corn this spring, states Farm Adviser F. E. Fuller. Fully 40 per cent of our members' entire corn acreage will be treated. Two hundred tests with various seed treatments are being carried on in cooperation with James Holbert of the U. S. D. A. The M-P Oil Co. passed its 100 carload mark before the first year was up. Annual cattle Feeders Day will be held on June 16.

How Illinois Spends Its Tax Money

THE payments for maintenance and operation of the general departments of Illinois for the fiscal year ending June 30, 1926, amounted to $43,158,525, or $6.04 per capita, according to the U. S. Department of Commerce. This includes $8,877,223 for education from the state school fund. In 1925 the comparative per capita for maintenance and operation of general departments was $6.94, and in 1917, $3.62. The decrease in per capita maintenance and operation shown for 1926 was due to the decreased payments for compensation of soldiers and sailors of the World War.

The expenses of public service enterprises amounted to $40,952; interest on debt, $5,667,947; and outlays for permanent improvements, $27,357,093. The total payments, therefore, for expenses of general departments and public service enterprises, interest, and outlays were $76,224,517. Of this amount $319,612 represents payments by a State department or enterprise to another on account of services. The totals include all payments for the year, whether made from current revenues or from the proceeds of bond issues.

Of the governmental costs reported above, $26,364,926 was for highways, $2,041,542 being for maintenance and $24,323,384 for construction.

Income $10.52 Per Capita

THE total revenue receipts of Illinois for 1926 were $75,223,910, or $10.52 per capita. This was $26,356,486 more than the total payments of the year, exclusive of the payments for permanent imporvement, but $1,000,607 less than the total payments including those for permanent improvement. These payments in excess of revenue receipts were met from the proceeds of debt obligations. Of the total revenue receipts $319,612 represents receipts from a State department or enterprise on account of services. Property and special taxes represented 51.2 per cent of the total revenue for 1926, 45.2 per cent for 1925, and 74.9 per cent for 1917. The increase in the amount of property and special taxes collected was 19.3 per cent from 1917 to 1925, and 48.3 per cent from 1925 to 1926. The per capita property and special taxes were $5.39 in 1926, $3.75 in 1925, and $3.49 in 1917.

Earnings of general departments, or compensation for services rendered by state officials, represented 4.2 per cent of the total revenue for 1926, 4.9 per cent for 1925, and 6.3 per cent for 1917.

Business and nonbusiness licenses constituted 38.5 per cent of the total revenue for 1926, 39.2 per cent for 1925, and 16.8 per cent for 1917.

Receipts from business licenses consist chiefly of taxes exacted from insurance and other incorporated companies, while those from nonbusiness licenses comprise chiefly taxes on motor vehicles and amounts paid for hunting and fishing privileges.

Debts $19.39 Per Capita

THE net indebtedness (funded or fixed debt less sinking fund assets) of Illinois on June 30, 1926, was $138,633,018, or $19.39 per capita. In 1925 the per capita debt was $18.41, and in 1917, $0.33.

For 1926 the taxable valuation of property in Illinois subject to ad valorem taxation was $4,194,769,417; the amount of State taxes levied was $35,655,540; and the per capita levy, $4.99. In 1925 the per capita levy was $3.83, and in 1917, $3.75.

LEGISLATURE DRAWS TO CLOSE

(Continued from page 2.)

Senate and is up on second reading in the House. This measure should go through without delay early this week.

Lantz's park district bill, S. B. 342, was up on second reading in the House on Thursday. This is a good measure and should go through.

Lantz's S. B. 335, the new Canada thistle and noxious weed bill up on second reading in the House on Thursday is slated to pass.

S. B. 186—Lantz—the state department T. B. eradication measure, which would allow the state to enter and test a man's herd at his own expense when three-fourths of the cattle of the county are tested, was on second reading in the House. When called there is likely to be opposition from the dairy districts of northeastern Illinois where the T. B. test is still more or less unpopular.

Senator Flagg's flag smut relief bill, S. B. 181, was up on second reading in the Senate and should be moved along without opposition. This measure carries a small appropriation to reimburse farmers in Madison County who burned their straw stacks to prevent the spread of flag smut in wheat.

Other bills of more or less importance are being watched to protect the interests of I. A. A. members.

Omnibus Bill Storm Center

The $2,000,000 T. B. appropriation is included in the omnibus bill which was up on second reading in the House this week. This bill was attacked vigorously by Rep. Tice, Castle and others who objected to the fact that it provides for $9,000,000 appropriations in excess of the budget. The appropriation for an artillery firing range at Camp Grant was stricken out on the objections of Reps. Green, Hunter and Baker from that section. Other slight additions and subtractions were made before the measure was allowed to go along to third reading.

Heavy barrows will be eligible to compete in the individual classes at the International Live Stock Exposition at Chicago, Nov. 26 to Dec. 3, according to a recent decision of the Board of Directors.

Walton Peteet Improved

Walton Peteet, former secretary of the National Council of Cooperative Marketing Associations, is recovering from a paralytic stroke that left him almost helpless on the right side, according to reports from his home in Washington, D. C. He had been ill for several months previous to the stroke. Friends of Mr. Peteet in Illinois will be glad to know he is much improved.

Walton Peteet

NEW HOLSTEIN SECRETARY

JAMES A. BALL, formerly with the Department of Animal Husbandry, University of Illinois, is the new secretary of the Illinois Holstein-Friesian Association. Ball is a graduate of the University of Illinois and for the past two years has been engaged in experimental and research work for the University. He started work as Holstein secretary on June 1, with headquarters at 608 So. Dearborn, Chicago. If you want any information on Holsteins or have a bull to sell get in touch with him.

The Farmer's Railway

By B. B. Goodin, President Dewitt County Farm Bureau

Farming is like a mountain railway
With an engineer for all.
He must make the run successful,
From the springtime to the fall.
Watch the bugs, the worms, the moisture,
Never falter, never quail
With his hand upon the throttle
And his eye upon the rail.

Farming will be growing pleasant
With our I. A. A. as guide
We must make our work successful
We must cross the swelling tide
With its agents as conductors
Do our duty never fail,
For his hand's upon the throttle
And his eye's upon the rail.

We will often hear objections
For selfish reasons that are plain
And on farmer's vital interests
They will try to wreck our train.
We will make the run successful
Never falter, never fail.
Keep your hand upon the throttle
And your eye upon the rail.

Many troubles has our agent
But a patience that is great.
He will give us much assistance
If we all cooperate
With a Farm Bureau behind him
That is strong, he'll never fail
For his hand's upon the throttle
And his eye's upon the rail.

URBANA, ILL. NL
MISS M Y C ... LIBRARY

The Illinois Agricultural Association RECORD

Issued Every Month for 63,000 Thinking Farmers

Volume 5 **JULY, 1927** **Number 7**

Charges of Trading Branded False

Legislative Committee Presents Truth About Gas Tax

THE Fifty-fifth General Assembly, which just passed into history, was one of unusual interest to Illinois farmers. The Illinois Agricultural Association was involved in much legislation of major importance. These matters were highly controversial, the decision hinging, in most instances, on two or three votes.

The outstanding example of this was the so-called Chicago bonding bills, which provided for the assessment of property at full value. As originally introduced, Senate Bill No. 446 would have doubled the bonding limit of every taxing body in the state.

Earl C. Smith A. C. Everingham Frank D. Barton

I. A. A.'S LEGISLATIVE COMMITTEE.

At various stages of the assembly the association was charged, both in the press and from the floor, of trading support on various measures. These charges were utterly false. The Illinois Agricultural Association was party to no traffic in bills. It supported or opposed legislation strictly on the individual merits or demerits of pending bills.

Terrific Pressure

Members from down-state were often subjected to terrific political pressure to influence their action on various measures. Senators and representatives who stood up under that pressure and voted in the interest of Agricultural and down state communities deserve the profound gratitude and ardent support of down-state voters who are interested in the future welfare of agriculture and rural development.

Many bills were passed, some were defeated and others were amended, due to activities of agricultural representatives. The Illinois Agricultural Association was never more potent as a legislative influence than now. The complete story of agricultural participation in the Fifty-fifth General Assembly, together with roll calls on important controversial measures, will be presented in a special legislative edition of the RECORD to be published Aug. 15.

Truth About Gas Tax

The position of the Illinois Agricultural Association in favor of the proper sort of a gas tax has long been known. That a strenuous effort would be made to establish a gasoline tax at the session just closed early became apparent. To that end a bill was introduced providing for a gas tax of two cents per gallon, devoted entirely to the completion of the bond issue system.

This bill never received any support from the Illinois Agricultural Association. It failed to recognize a secondary system of roads. It left more than seventy-five per cent of the farmers and down state communities wallowing in the mud, though they had supported the development of the trunk line system and had continuously contributed to its construction.

In face of certain defeat, this bill was stricken from the calendar in the Senate and the Senate bill was dead. At the time of the introduction of the Senate bill an identical bill was introduced in the House which was still pending.

I. A. A. Amendments Adopted

The Illinois Agricultural Association presented certain amendments to that bill to the House Committee on Roads and Bridges, which were adopted and the bill as amended by the Illinois Agricultural Association was voted out of the committee with recommendation "that it do pass."

All partisan and political lines were ignored in the fight that ensued on this bill, the issue being between the down-state more rural representatives who supported the bill while almost to a man those representing the large cities of the state put forth every effort for its defeat.

It was the opinion of John C. Watson, Tax Director of the Illinois Agricultural Association, based on the figures of the highway engineer, which he believed to be substantially correct, that, without a gas tax or some additional revenue, the bond issue system could not have been completed within a reasonable time. Most of the roads, the completion of which would have been long delayed, serve down state rural and urban communities.

How Bill Operates

What does this amended bill do?

1. It levies a tax of two cents per gallon on all gasoline used in motor vehicles on the highways in Illinois.

The complete summary of the Illinois Agricultural Association's legislative policy and the story of each measure of interest to agriculture will be related in detail in the August issue of the RECORD. Personalities involved in the struggle to secure agricultural legislation and the part they played in the passage and defeat of good and obnoxious measures will be presented without bias. Members will be fully informed of the voting records and efforts in behalf of farm legislation so they may vote intelligently in coming elections.

2. It provides exemption for gasoline used for agricultural, industrial and purposes other than in motor vehicles used on the highways.

3. It provides for the prompt completion of the bond issue system, (one-half of the tax going for that purpose), thereby removing to a large degree the element of politics in designating which roads shall be first completed.

4. It recognizes the secondary roads as a part of the state highway system. One-half of the gasoline tax goes back to the counties on the basis of the automobile license fees coming from such counties for the construction and maintenance of state aid roads.

5. It removes state politics from the selection of the state aid roads for improvement by providing that such roads shall be designated by the county boards.

6. It provides that funds derived from the gas tax may be used to pay the principal and interest of county road bonds where such bonds have been issued for the construction of state aid roads and where such roads have been built according to approved specifications.

7. It provides that county boards may, by resolution, use the funds derived from the gas tax to replace funds now levied against property for state aid road maintenance.

Best Possible Arrangement

It is the opininion of those in touch with the legislative situation that the gasoline tax just passed is the best possible arrangement obtainable under present conditions. They believe further that at no future period would as satisfactory an arrangement have been possible.

The large cities have already been supplied with roads and have lost interest in the rural requirements. If this program had gone forward for two more years, other communities would have grown cold to those needs. Never again would we have been able to secure substantial recognition of secondary roads.

We have made possible through the gas tax a comprehensive road program. The farmer's end of the road has been recognized. We may now look forward to the development of a real farm to market system of roads.

"Apples for Health, Inc." an organization representing the apple growing interests of America will soon launch a campaign to raise $4,000,000 to advertise this fruit says the Illinois Fruit Exchange News. A national advertising company has been retained as counsel.

A gold medal for the champion calf club member in each county having a regular organized calf club of five or more members, and a silver medal to the champion fat barrow club member will be awarded by the Chicago Producers Commission Association to boys and girls in all counties in northern and central Illinois, this year.

DR. TAYLOR TELLS CHICAGO WHY I. A. A. ATTENDS LEGISLATURE

City and Country Should Work Together For A Square Deal In Washington and Springfield

THE press of Chicago seems to be convinced that because the farmers of the state of Illinois control the legislature and seek to pass some measures which seem to shift the tax burden from country to city, Chicago should secede and set up a state of her own. This suggests the need of sober thought," declares Henry C. Taylor of The Institute for Research in Land Economics, Northwestern University, in a recent issue of the Evanston, Ill., News-Index.

"Which group is the more prosperous at the present time, the citizens of Chicago or the down-state farmers? Which group has the higher standards of living? Which group is getting ahead financially the more rapidly? The answer is well known. Since 1920, city incomes have been much higher and farm incomes have been much lower in purchasing power than before the war. The wealth of Chicago has greatly increased, while the wealth of the farmers of Illinois has decreased more than 25 per cent.

Agriculture at Disadvantage

"This shrinkage in agricultural income and wealth is in large measure due to specific acts of the federal government which have placed agriculture at a disadvantage in the distribution of the wealth of the nation. The farmers have found Washington as completely dominated by the financial and industrial bloc as Chicago has found Springfield dominated by the 'Squires.' The farmers have found it utterly impossible to secure relief legislation which would put agriculture on a parity with the city industries. The Chicago delegation in Congress failed to help the Illinois farmers to secure needed legislation in Washington.

"It is most natural that the farmers who have failed to secure the legislation in Washington which would restore their purchasing power, should turn to their state legislature where they have some influence and seek legislation which will reduce their tax burden and place more of the burden on those who have incomes which are better because of federal legislation.

"The solution should be a simple one. Let the city and country in Illinois recognize their community of interest, work together for a square deal in primary distribution of wealth, and then the distribution of the tax burden can easily be adjusted. City and country should work together for a square deal in Washington and Springfield. This will end country and city strife. If country and city strife continues and Chicago and other cities similarly situated secede, it will be equally logical for the agricultural regions of the United States to ask the privilege of withdrawing from the Union and establishing a separate government because they find Congress dominated by the financial and industrial bloc.

Is Chicago Ready to Help?

"There are two roads open at the present time. The one we are on and the one we should be on. The one we are on is the road easily traveled by the politician who is dominated by private interests and which leads to injustice, war and chaos. The one we should be on can be traveled only by statesmen dominated with the national point of view and seeking the welfare of all. It leads to justice, harmony and a square deal for all.

"The experience Chicago is having in Springfield should help her to understand and appreciate the position of the farmer in Washington. I happen to know that it was the failure of the farmers to get what was due them in Washington which led them to seek relief from their tax burdens in Springfield.

"Is Chicago ready to work with the farmers of the state for a square deal all round? If so, there is hope for the city, the state and the nation."

TELEPHONE COMPANY GETS RATE INCREASE

THE Illinois Commerce Commission recently granted the Jerseyville Telephone Co., an increase of $3 a year on service to subscribers. This means that rural subscribers will pay $21 per year, hereafter, instead of $18. Commenting on this action, L. J. Quasey, says:

"This was rather a close case, in that the old rates were not adequate to give the company a fair return, and the rates ordered by the Commission will tend to make an earning of about seven per cent. This is rather high for a small telephone company. However, the Commission does not make changes up or down that amount to less than 25 cents a month. The company has been backward in its rural service policy and we hope that the advance will induce them to be more amenable to the demands for telephone service in the country. The fact that they were allowed the advance puts us in position to insist more strongly on this point."

The Transportation Department collected $18,468.09 in claims from Jan. 1 to June 30, 1927.

The total quantity of phosphate rock sold in the United States in 1926 was 3,209,976 long tons valued at $10,893,800 according to the U. S. Dept., of Commerce. This is 8 per cent less than was sold in 1925.

FRIDAY, AUG. 26, FARM BUREAU DAY AT STATE FAIR

FARM BASEBALL TITLE RACE ON

Lawrence Wins In Southern Illinois Division. Others In Doubt

WHO will win the 1927 state farm baseball title? That's the question to be decided within the next three to four weeks. It's anyone's contest at this writing. Five or six teams are running neck and neck while a dark horse or two are ready to jump in and upset the dope any minute.

Lawrence county's leadership in the Southern Illinois division is undisputed by virtue of her four successive victories. What this team will do in competition with the seasoned nines from Central and Western Illinois is a puzzle, however.

Dopesters point to the fact that other Southern Illinois teams, including Jefferson, Bond, Wayne and Clay, have piled up too many runs against the Lawrence Farm Bureau team to make it look like a state championship contender.

Competition Keen
